PREFACE TO THE FIRST EDITION

The standpoint of this Encyclopedia is, primarily, that of one who, interested in foreign mission work, seeks to enlarge his vision and increase his knowledge; secondarily, that of one who, looking forward to a personal share in it, seeks to inform himself as to its various phases, that he may the more readily decide where he can probably labor to the best advantage. The basis is the Society in which each individual is more especially interested; its history, organization, development; its missions and stations. Then the view broadens to take in the countries, races, and religions in their relations to the work, not only of his own, but of other denominations. Special topics open up, individual workers stand out in prominence, and as one step after another is taken, it becomes apparent that the work is not divided, but is one; and all these with varied names are but portions of the one great army of the Church.

The plan thus includes two general departments: 1. The organized work—the societies, their origin and growth at home, and their work abroad; 2. The countries in which, the races for which, that work is carried on, and the religious beliefs that are encountered.

Accessory to these are: 1. A gazetteer of Mission Stations; 2. Biographical sketches of Missionaries; 3. Description and enumeration of Bible versions; 4. Articles on special topics closely related to the work of Foreign Missions; 5. Maps, appendices of bibliography and statistics, and indices.

It became early evident that to accomplish so much, minutiae must give place to perspective. However fascinating the details might be, they must be constantly used merely as illustrations. To do more, would not only have so enlarged its extent as to make the book unwieldy, but have blurred the distinctness of the impression that has been sought to give. Thus in the accounts of the societies and their work personal terms are few. The history of Missions, both at home and abroad, is largely the history of individual men and women. Those who have stood at the helm and guided these great organizations were and are no less missionaries than those who have gone to the foreign field, yet even to mention the names of all within the space allowed would have almost made the work a mere chronicle. So of the countries and stations, the races and religions. The effort has been to give so much geography, history, etc., as would serve as a framework for pictures of missionary work and spiritual need.

With regard to the biographical sketches, it became evident very early that it would be necessary to draw the line sharply to exclude the living, and that to mention all, even of the dead, would be impossible. The sketches, too, must be brief, indicating rather than describing the work each did. So of the Bible versions; brief paragraphs were all that could be attempted.

When the question of special topics came up, the scope seemed unlimited. There were city missions; home missions; missions in their relations to commerce, music, the liquor traffic, the slave-trade; early Christian and medieval missions; the various questions under discussion in regard to methods of missionary work,—the lay element, education, self-support of native churches, etc. To treat even a few of these thoroughly, the eminently desirable, would be impracticable. As careful a selection as possible has been made, and as much space given as seemed proportionate to the general scope of the work.

The plan led also to the decision to embody statistics and general lists in the form of appendices, which could easily be changed in subsequent editions, as the work developed. These appendices include: (a) A bibliography; (b) Lists of Bible versions, arranged alphabetically and geographically, showing the languages and dialects, the number of people reached by them, the linguistic families to which they belong, the characters
in which they are written, the amount of translation work done, and the society under whose auspices they have been prepared, and in the Index the page of the Encyclopedia where they are referred to; (c) A list of missionary societies with the addresses of their secretaries, the date of organization, and the page of the Encyclopedia where they are spoken of; (d) A list of missionary stations, giving their geographical location, the societies carrying on work in them, the number and sections of the maps where they are found, and the page of the Encyclopedia where they are described; (e) Tables of statistics: (1) By societies and missions; (2) By countries and societies; (3) A summary of the whole. The General Index includes names of persons mentioned, places referred to, and general subjects treated. The maps cover all important mission-fields with as much fulness as is practicable. The effort has been made to locate every mission station of importance, and in some cases the outstations. The importance of political influence in Africa and of the languages of India has led to the furnishing of a map of each country specially designed to bring out those characteristics.

Specific statements as to the appendices will be found in prefatory notes to them. Many questions came up for consideration. In the alphabetical arrangement of articles a difficulty arose in regard to the location of the societies. To place them under their corporate names would be confusing, and the effort has been made to designate each by the term by which it is most widely known, with cross-references wherever it seems necessary. If there is difficulty in finding any one, a reference to Appendix C will easily give the solution.

Then came the question of spelling. The spelling of foreign names is in hopeless confusion. No two societies agree. Often the same society is not consistent with itself. Governments have laid down rules, which few follow; and no two Governments make the same rules. Should we spell Beirut, Beyrout, or Beyroot; Maulmain or Moulmein; Harpoot, Harput, or Charput; Foochow or Fuhchau; Gurhwal or Garhwal; Punjab or Panjab; Hyderabad or Haidarabad; Assiout, Assyoot, or Siout; San Paulo or Sao Paulo; Otjimbenque or Otyimbingue?

But instances almost innumerable could be added. The reader will find a few of the perplexities noted in Appendix D. To be absolutely logical or consistent was impossible. In India names the spelling of Hunter's Encyclopedia has been adopted. In Africa, the Church Missionary Society and the ABCFM reports have been followed in the main; elsewhere the editor has done the best he could, and if in any instance some mission station eludes the patient search of the reader, let him make a note of his failure for the benefit of future workers in this line.

Numerous requests have come in for an indication of the pronunciation of the names of places. To do this, however, was so manifestly impossible that no effort has been made. Each reader is at perfect liberty to pronounce Kaecheh or Njenhangli as he chooses.

Another difficulty arose from the recurrence of the same name. If one is perplexed to distinguish the Washingtons that occur in every State of the Union he will understand the danger of confounding the various Sales of Africa, the Bethels of the West Indies and India, or the Bijnars (Bijnours?) of the Northwest Provinces and Oudh.

The question of statistics was also a perplexing one. After much consideration it was decided to give the general statistics in the form of tables in an appendix, introducing into the body of the Encyclopedia only such as were necessary in order to indicate the general nature and scope of the work in the different stations. So far as practicable, these have been brought up to date of publication.

At the commencement of the work blanks were sent to every mission society and mission station that could be learned of. The societies in almost every case responded, and many of the stations. With these as a basis and the careful study of the reports of the societies, the various Encyclopedias, etc., the great majority of the statements were prepared. In a few instances the society statements came from outside parties. Thus the article on the American Baptist Missionary Union was furnished by Dr. L. P. Brockett; that on the Moravian Missions, by Rev. B. Romig of Herrnhut; and so of a few others. Whenever it was practicable these statements were referred to persons connected with or specially informed regarding the societies, with a view to their being free from inaccuracy. Some countries, etc., were described by writers specially acquainted with them. Thus the India articles were prepared by Rev. C. W. Park, of
PREFACE TO THE FIRST EDITION

Birmingham, Conn., formerly of Bombay; Japan, by Rev. W. E. Griffis, D.D.; Brazil, by Rev. J. Beatty Howells, long a missionary in that country. The subjoined list will indicate most of the writers. The biographical sketches are chiefly the work of Rev. Samuel Hutchings, D.D., whose eighty-three years of age have not dimmed his interest or dulled the keenness of his pen. For the lists of Bible versions we are indebted to the kind courtesy of R. N. Cust, LL.D., of London. The sketches of the versions have mostly been prepared by Dr. Bernhard Pick, of Allegheny, who has made the subject a special study. The Arabic version, however, has been described by its translator, Rev. Dr. C. V. A.Van Dyck, of Beirut; the Turkish version by Rev. H. O. Dwight, of Constantinople.

In seeking for any title look first in the Encyclopedia; also in the Index of Appendix B for Bible versions; in Appendix C for societies or faith missions; in Appendix D for Mission Stations; and in the general Index for all. The page references in the appendices refer only to articles, not to places where mention of any topic is made in other articles; e.g., the station of Allahabad will be found, by Appendix D, on page 41 of Vol. I. It will also be found, by the general Index, on page 250, Vol. II., etc. So of the versions. Any person desiring to look up the whole work of a Society will turn from the account of the Society itself to that of the country where it works, the stations it occupies, and the biographical sketches of its missionaries, as he finds them mentioned in the different articles. In giving accounts of stations only those have been included in the body of the work with regard to which some definite information is given beyond the mere fact of their being occupied by a certain society. The complete list appears in Appendix D.

It is a pleasant duty to acknowledge the kind courtesy of the many who have assisted in the work: of the publishers, who have furnished the means and have left the editor so free to carry out the plan as fully as was practicable; those who have worked in the office with an interest that has shown their task to be no mere perfunctory duty; the contributors, whose patience, consideration, and ability have done so much to make the work not merely instructive, but entertaining; the officers of the Missionary Societies, whose unfailing willingness to answer innumerable questions has been so often put to the test. To name each one would be to give the list of all with whom the editor has come in contact in his work; yet he cannot but make special acknowledgments to Dr. Dalman, of Leipzig, for his article on the Jews; to the Rev. S. M. Jackson, for the Bibliography; to Dr. Cust, of London, for his table of Bible versions; to the officers of the Church Missionary Society, for the free use of their atlases of India and Africa.

That errors and omissions, some apparently inexplicable, will be noticed, must be expected. Any report of such to the publishers will be gladly received.

The work in truth has been a labor of love, and the highest return that can come from it will be the consciousness that it has furnished a link in the chain that is to bind together the great divisions of the one great army of the Church, as they come through its pages to know and understand each other better.

EDWIN MUNSELL BLISS.

NEW YORK CITY, March, 1891.
PREFACE TO THE SECOND EDITION

NO long series of reasons need be given why The Encyclopedia of Missions demands revision after twelve years. Political changes have parceled out among the nations the islands of the Pacific, have brought one at least of the Asiatic nations into parity of influence with Western Powers in shaping the destinies of the Far East, and have marked all Africa with the familiar national colors of Europe and made her mysterious central regions a field for the personally-conducted tourist, and a participant in the privileges of the Universal Postal Union. The body of experience in the mission field has crystallized into what is sometimes called a “Science of missions,” made up of more or less exact principles of labor, which are more and more widely accepted by missionaries of all nations as fundamental. The mere increase of missionary enterprises and the expansion of mission fields are notable facts, while above every other reason the growth of the Christian community in almost every non-Christian land requires the rewriting of every descriptive paragraph in the book. When the editors asked valued advisers in Europe and America what faults of The Encyclopedia of Missions most loudly called for correction in a Revised Edition, the answer, as unanimous as if the question related to some text-book of science written twelve years ago, was “Its antiquity.”

It is with grave misgivings, nevertheless, that this revision is offered to the public. Rigorous compression has been required in order to keep the Revised Edition within limits of bulk and cost which permit a considerable reduction of price.

Articles dealing with the various Missionary Societies have most persistently rebelled against our limitations of space. The history of societies of the first magnitude, the story of their origin, development and expansion under providential leadings; the record of the stedfast faith which has been demanded for their support, together with hints of the reasons why they are now recognized as instruments of a Divine purpose to shape the destinies of the race, would demand several volumes of the size of the one now offered.

The editors have, therefore, had no option but to give mere sketches of the Societies, showing salient points of history and general characteristics of effort rather than details of labors. Even so it has been impossible to mention, except in the Directory, many Societies which are doing noble work with narrow means and with but a handful, perhaps, of missionaries in the field. It is merely an introduction to the study of the missionary movement in the various nations and denominations which can be offered in this work. The great characteristics belonging to all the Societies in common: their motive, aim, difficulties, methods, mutual helpfulness, general relations and influences, direct and indirect, are treated in separate articles, all of which should be read by the student of the work of any one Society who would comprehend the fulness of its might as an agency for Christian civilization and the dignity of its position before those who hope for the elevation of the race.

One important change in the plan of the book, which some may regret, is the omission of maps. None of the old maps could be republished without radical and expensive changes. It is hoped that the wide circulation attained by Dr. Beach’s fine "Geography and Atlas of Protestant Missions" will go far to relieve inconveniences resulting from the absence of the maps in the Encyclopedia. As a further relief, an effort has been made, in describing mission stations, so to define their location that their approximate place can be found in any good atlas.

Descriptive notes of about 5,000 cities, towns, and villages are furnished in this work. Our aim has been to give some data concerning all places in non-Christian lands, which are of present importance in the missionary enterprise. In deciding what places
PREFACE TO THE SECOND EDITION

to omit through lack of space for all, we have tried to limit such omissions to outstations, and to stations which have shown little growth in a number of years, and may be regarded as in a dormant condition. The task of describing places, hundreds of which are found in no existing atlas or gazetteer, invites errors which we cannot hope to have escaped, and for which we must crave the leniency of critics. The spelling of the names of these places has caused much perplexity owing to diversity and even inconsistency of usage among the Missionary Societies. In order to avoid adding to the confusion we have thought best to follow as a general rule the system adopted by Beach in his "Atlas of Protestant Missions."

Success in our undertaking could not be possible without the collaboration of the officers of Missionary Societies all over the world. This has been freely asked, and we gratefully realize that it has been most cordially given. Moreover, many missionaries and others have placed at our disposal their knowledge as experts, or have prepared for the Encyclopedia articles on special subjects. A list of these contributions to the value of the book we give below, indicating at the same time the names of those whose articles in the first edition we were able to use without important modification. We would also make special acknowledgment of our indebtedness to Dr. Beach's "Atlas of Protestant Missions," whenever his laborious research has served to correct or to supplement our own endeavors. The general information found in Dr. J. S. Dennis' "Centennial Survey of Foreign Missions" has also been of great value in preparing for the Appendix the Directory of Missionary Societies and the List of Bible Translators.

In sending out this new edition of The Encyclopedia of Missions we cannot refrain from mentioning the astonishment mingled with awe aroused in our own minds by our close study of the growth of the missionary enterprise since the first edition was issued. It is our belief that if any will study this rapid advance and growth they will find the conviction unavoidable that this enterprise and its present power in the non-Christian world is the fruit of more than a merely human impulse. This book presents again an illustration of the fact that the "stone which the builders rejected is become the head of the corner. It is the Lord's doing and it is marvelous in our eyes!"

AAANA: A settlement in Upolu, Samos; station of the LMS.

ABACO ISLAND. *See Great Abaco.

ABADIOEH: A village in Palestine near the southern end of the Sea of Tiberias; mission station of the Friends’ Foreign Mission Society, with a school and a dispensary.

ABASA: Village E. of Cape Coast Castle, Gold Coast, W. Africa; outstation of the WMS, with six village schools and about 600 professing Christians.

ABBOTABAD: Town in the district of Peshawar in the northwest frontier province of India; mission station of the CMS, and of the Church of England Zenana Missionary Society, with a dispensary and a number of pupils in the zenanas.

ABDUL MASIH (Servant of Christ): The new name which was adopted by Sheikh Saleh, converted through the influence of Henry Martyn in 1809; and soon afterward admitted to the Church at Calcutta. He was born at Delhi, was Persian and Arabic Moonshi of Lucknow, then became keeper of the King of Oudh’s jewels and was for years a most zealous Mussulman. Just after he had been horrified by the atrocities of his coreligionists in the Rajput State of Jodhpur, he became deeply impressed by Martyn’s preaching, and accepted Christ as his Savior. The Sheikh Saleh’s conversion caused great excitement among his former associates; and he became an able and influential minister of Jesus Christ. He was the first native pastor under the Church Missionary Society in India.

ABEBIFY: Town in the Gold Coast Colony, W. Africa; 4,000 inhabitants using the Ashanti language and worshipping idols or fetishes; station of the Basel Missionary Society, having connected with it 17 outstations, in which are 15 village schools. The Christians of this place number 735. Name also given as Abetifi.

ABEEL, David: Born June 12, 1804, at New Brunswick, N. J. He accepted the position of chaplain of the American Seamen’s Friend Society at Canton, with a conditional appointment as missionary of the American Board at the end of a year, and sailed with Mr. Bridgman, October 14, 1829, for China. In December, 1831, Mr. Abeel entered the service of the American Board, and sailed on the 27th for Batavia, partly for his health, but chiefly to visit the churches planted by the Dutch, two centuries before, in the islands of southeastern Asia. While visiting London, July 25, 1834, he told of the degradation of the women of the East, and presented an appeal to the Christian women of Great Britain, which resulted in the formation of the Society for Promoting Female Education in the East. October 17, 1838, he returned to Canton, but the “opium war” preventing his usefulness there, he visited Malacca, Borneo, and other places. On account of ill health he returned to New York, April 3, 1845, and died at Albany, N. Y., September 4, 1846, aged 42. He published A Journal of a Residence in China; A Missionary Convention in Jerusalem; The Claims of the World to the Gospel.

ABEIH: A village of the Lebanon district in Syria, 25 miles S. of Beirut. A mission station established by the ABCFM, but in 1870 transferred to American Presbyterian Board. The Theological Seminary which was founded there in 1869 was transferred to Beirut in 1874. Depending upon the 4 stations of the Lebanon district are 46 outstations, and as many primary schools, with about 650 church members. The missionary statistics of Abeih are included in those of the district thus described.

ABENAUDI: This is a dialect of the Miombe language of the North American family. It was first reduced to writing by missionaries of the American Board, and is written with Roman letters.

ABEOKUTA: Capital of the Yoruba district (Lagos Protectorate), W. Africa. It stands on the E. bank of the Ogun river, about 60 miles N. of Lagos, with which it is connected by railroad. It occupies the two highest of several detached hills which ascend gradually to the N. E., and terminate in a bluff surmounted by masses of smooth gray granite. This bluff gives the place its name, which means “under the rock.” Wars ruined the Yoruba country in the early part of the 19th century and the fugitives from many towns gathered here, slowly forming the city which now has 150,000 inhabitants, and is an
important commercial center. The growth of the city was greatly stimulated about 1840 by the arrival there from Sierra Leone of freed and Christianized slaves, who were natives of the Yoruba country. These men set themselves against the human sacrifices and other cruelties of the fetishism and idolatry of the Yoruba tribes, the trade of which this city was a center. They also prepared the way for the establishment of missions.

A mission was opened in the city by the CMS in 1835, and by the WMS about the same time, and by the SBC (of America) in 1850-1876. Hostility of slave merchants and liquor dealers to the enlightening effect of Christianity has led to several fierce attempts to destroy a reform which opposed both. At last a general uprising against the English took place in 1867, during which all white men were driven from the city, and 400 native Christians fled for their lives; the churches were sacked, and Christian influence might have been destroyed for years had not Mr. Johnson, the able negro preacher, held to his post throughout the troubles. At present the four native chiefs who rule the city attend church regularly, and form a regular Council of Government. A Board of Education for the Yoruba region under these chiefs has taken the place of the savage council of the fetish priests, which terrorized the land in the first half of the 19th century. Intemperance and polygamy are forces which still resist advances of spirituality among the people, and the influx of foreign traders facilitated by the railway is not an unqualified benefit to the city.

Paganism, Mohammedanism and Christianity are the prevailing religions at Abeokuta. There is a Roman Catholic mission there. The Protestant Christian community consists of about 5,000 souls, of whom 1,700 are communicants. There are 12 native workers, men and women, connected with the three missions. The CMS carries on, in connection with Abeokuta Station, 21 village schools, a theological college and a dispensary, besides maintaining a special work for lepers. The WMS has 23 outstations, and 3 village schools; and the SBC reports 2 outstations and 1 village school.

ABETIFI. See ABERFIFY.

ABKHASIANS: A warlike tribe, inhabiting the country between the Black Sea and the Caucasus. Under the Russian Emperor Constantine, they became Christians, but subsequently adopted Mohammedanism, to which religion they still nominally belong, though their religion in fact consists of a barbarous mixture of Christian, Mohammedan and heathen notions and usages. The greater part of these people have been induced by the Turkish government to remove to Asiatic Turkey, where they form agricultural communities, living apart from the rest of the population.

ABOA: Town on the Rombi river in the German Colony of Kamerun; station of the German Baptist Missionary Society, opened in 1900. Also written Abo.

ABOKOBL. See AGROBA.

ABOMEY: The capital of Dahomey. It was captured by the French in 1892. It is not a mission station, but has been reached by the Wesleyan Missionary Society. It has about 20,000 inhabitants.

ABORIGINES PROTECTION SOCIETY: The tendency of colonists from the so-called civilized countries to disregard the rights of natives of territory which they desire to occupy has had many painful illustrations in Australia, the Pacific islands, and various parts of Africa. The so-called "barbarous" outstations are controlled by missionaries, carelessness, greed of white settlers. It seeks to prevent settlers from crowding natives off from lands actually in occupancy, and to secure just legislation regulating the distribution of land to white settlers, limiting or forbidding the sale of liquor to natives, and otherwise placing legal barriers in the way of injury to those who through ignorance or weakness cannot defend their own interests. The methods so far used by the Society have been by appeal to public sentiment through the press, and by direct application to the Govern-
ing authorities of the country in which the mission is carried on. Nevertheless its object is one which coincides with the purpose and wish of all missionaries, which fosters the spread of civilization among backward races and which attracts them toward the adoption of that Christian principle of good will to all on which the existence of the Society is based. Head quarters. Broadway Chambers, Westminster, London, S. W., England.

ABURAI: A town N. E. of Kumassi in the Gold Coast Colony, W. Africa; station of the WMS, with 1 missionary, 49 native workers, men and women, 75 outstations and 550 church members.

ABURI: A town of 6,500 inhabitants in the Gold Coast Colony, W. Africa. A station of the Basel Missionary Society, established in 1841. It has 6 missionaries and 18 native workers, men and women. It has 9 outstations, 10 village schools and 700 church members. Also station of the WMS, with 4 missionaries and 93 native workers, men and women. It has 14 village schools, 1 high school and 650 church members.

ABYSSINIA: The name is derived from Arabic "Habash" = "mixed" population. The inhabitants call themselves Itiopavians = Ethiopians. The region now included under the common name Abyssinia has been called most appropriately the "Switzerland" of Africa. It consists, for the most part, of a mountainous plateau averaging 9,000 feet above sea level, precipitous on the east, and falling away more gradually in other directions, everywhere being intersected by profound ravines and dominated by lofty snow-capped peaks. A desert, stretching from the Red Sea to the base of the mountains, still farther isolates this Alpine region. Abyssinia, made up of the provinces of Tigré, Lasta, Amhara, Gojam, Shoá, and adjoining lands, covers about 150,000 square miles. The average climate on this lofty plateau is delightfully temperate, the depths of the ravines being thoroughly tropical, while the higher mountains are decidely Arctic. The soil is fertile, and supports a great variety of vegetable and animal life. Rich mines of great variety abound, and the country furnishes every necessity of highly developed civilization.

The people of Abyssinia number about 3,500,000; they are much superior in every respect to their African neighbors.
The Introduction of Christianity: Abyssinia has been called the first and only mission field of the Church of Rome. Convinced of the necessity of Christian faith early in the 4th century, in this weakened Meropius, a philosopher of Tyre, went on a voyage for purposes of travel and observation to "India"—a much-abused title, supposed to designate in this case South Arabia. He had with him two young nephews, Frumentius and Edesius. The ship put into a port on the west coast of the Red Sea and its passengers were promptly slain by the natives. Frumentius and Edesius alone were saved alive as slaves, and taken to Axum, the ancient capital of Abyssinia. Frumentius was instrumental in introducing some knowledge of Christianity among the people and, having asked help in his missionary labors from the Church in Egypt, he himself was consecrated bishop of Abyssinia. He is known in the church of that land as Abu Salama, "the Father of Peace."

The venerable translation of the Bible into Ethiopic dates from the 4th century and, if not finished by Frumentius, was doubtless set under way through his zealous foresight. Upon this book rests whatever power Abyssinia had in its bead days.

The Abyssinian Christians are connected ecclesiastically with the Coptic Church of Egypt, but hold to certain observances of Judaism. The clergy being the only educated people and holding great power in their hands, conservative influences and deep suspicion of foreigners have ruled the policy of the kingdom up to the present time. In the new Africa, Abyssinia is destined to play an important part. That its Christianity should be revived and made to live in the hearts of its adherents is the most pressing duty of the Christian Church.

The Jesuit Episode: In 1490 A.D., the Abyssinian Christians were rediscovered by the naval officers of John II. of Portugal, who had sailed all the way around southern Africa. The Christian world thought that at last the famous "Frater John" was found again in the Abyssinian Mountains. The King of Portugal sent Pedro Cavilham, the Jesuit, to push the interests of Portugal in Africa. This interference was resented. The Abyssinians came to blows with the Portuguese soldiers, who worked under orders from the Jesuits. At one time these zealous churchmen were victorious, and 8,000 enemies lay dead upon the battle-field. As the young Abyssinian Prince Facilidas, whom the Jesuits had half won over, walked through the heaps of slain, he is reported to have come to this conclusion: "A religion which causes its holocausts to be good. We had better, the victorious, return to the faith of the conquerors and remain faithful, as they were." When he became king he expelled the Jesuits, and all further attempts on their part to get a footing in the country were in vain. The attempt, in 1621, when the Jesuits installed a patriarch in Abyssinia, was especially disastrous. Over a century later (1750-1754) a third attempt was unsuccessful. French influence now seems paramount in Abyssinia and the construction of a railroad to Harrar from Massawa, the seaport of Jibuti on the Red Sea has greatly strengthened this influence.

Protestant Missions in Abyssinia: In 1830 Bishop Gabot and Mr. Kugler were sent on a mission to Abyssinia by the CMS. The work began with bright prospects. Bishop Gabot traveled extensively and learned the Amharic, the common language of the people, a dialect of the ancient Ethiopic, which, though a tongue in itself, has become a dead language, even to many of the priests who go through the ceremonies. Bishop Gabot broke down in health, and had to leave the country. Mr. Kugler died. Later, Mr. Iensen and Dr. Kraff took up the work. The Jesuit cloud again appeared on the horizon in the shape of Sapero, who was sent out by the Propaganda. His intrigues aroused the old suspicions of foreign interference, and all foreigners were expelled the country in 1838. Kraff and Iensen went to Shoa, and were received in a kindly manner by the king. There they compiled an Amharic dictionary, as well as a geography and prayer-book. Before this the Bible had been translated at Cairo, in 1808, into Amharic by an Abyssinian monk, Abu Rumi, assisted by the French Consul Asseline. In 1840 the ms. was bought and revised by the British and Foreign Bible Society. Altho the Protestant missionaries had been expelled, the work went on. The Protestant missionaries remained on the borders of Abyssinia until 1859, when they were allowed to return to the capital only to be imprisoned in 1862 through a certain intrigue with the irregular and suspicious king Theodore. An English military force released the captives in 1868, and the CMS has not renewed its efforts for the Abyssinians. The Swedish Evangelical National Society in 1866 began a mission near Massaua on the Red Sea in what was Abyssinian territory, but is now the Italian colony of Eritrea. Its missionaries have gradually pressed toward the Abyssinian frontier and now they have 5 stations W. of Massaua manned by 18 missionaries and 13 native workers, both men and women, and with a printing house, schools, and about 300 communicants connected with their churches.

ACCA. See ACRE.

ACCR: A town on the Gold Coast, W. Africa; station of the WMS, with 3 missionaries and 34 native workers, men and women. It has 30 outstations and 2 village schools. The National Baptist Convention (U. S.) also opened a station here in 1900. The number of professing Christians for this area is about 650. The name is also written Akra.

ACCR, or Ga language: This language belongs to the negro family of African languages, and is spoken by about 100,000 people living in the region of the Volta river, Gold Coast Colony, W. Africa. It is written with Roman letters.

ACRE (St. Jean d'Acre): A seaport on the coast of Palestine, which was celebrated during the Crusades. It is a strongly Mohammedan town, surrounded by a wall and used as a place of detention for political prisoners. One of the recognized heads of the Babis resides here in banishment, and hence directs and encourages his followers in Persia and elsewhere. Acre is a station of the CMS, with 7 missionaries and 20 native workers, men and women; there is also a hospital with two dispensaries in the outstations, and there are 8 schools. Taking the town and its outstations together, the number of com-
municants is about 100, mostly from branches of the Oriental Church.

ADABAZAR: A town of Asiatic Turkey, about 60 miles E. of Nicomedia; a station of the ABCFM. Mission work resulted early in the establishment of a strong church, which supports its own pastor and schools and has become a center of great influence among the villages of that section. The church has taken upon itself responsibility for a girls' boarding school, the Bible Society, and three unwedded women missionaries as its teachers.

ADALIA: A seaport on the southern coast of Asia Minor, the ancient Attaleia. The population is about 13,000 Mohammedans, with quite a number of Greeks. It is not occupied as a mission station, but is visited by colporteurs of the BFBS.

ADAMS. See AMANZINTOTE.

ADAMSHOOP: Town in the Orange River Colony, S. Africa, founded by the son of a slave. Station of the Berlin Mission Society since 1867. One missionary and 20 native workers form the force at this station and 4 outstations and 500 church members.

ADA: A city of 48,000 inhabitants, the seat of a native government, known as the same name, S. of the Taurus Mountains in Asiatic Turkey. The people of the city are mostly Mohammedans, but there are a considerable number of Armenians, some Nusairiyeh and a small Greek community. The people of Adana are noted for energy and force of character. It is a station of the ABCFM, with a working force of 5 missionaries and 32 native workers, men and women. It has an excellent girls' boarding school, an orphanage, a fine church building with 650 church members.

Adana is also an outstation of the RP for work conducted in Arabic.

The ABS has a Bible depot and subagency there.

ADDA, or Ada: A town on the Gold Coast, W. Africa; station of the Basel Missionary Society, with several outstations and 6 village schools and 1 kindergarten. The number of professing Christians is about 250.

ADDYMAN, John: Born in Leeds, county of Yorkshire, England, on October 22, 1808. Converted at sixteen, he at once threw himself earnestly into evangelistic work, first in Leeds and then in London. He was at this time connected with the Wesleyan Methodists, but his views on the subject of church government having undergone some change, he left the Wesleyan community and united himself with the Methodist New Connexion. He was called into the ministry of that body in 1833. Just at this time the subject of commencing a mission in Canada was seriously occupying the members of the New Connexion and Mr. Addyman was chosen to be the pioneer of the movement in the Far West. His labors in Canada were very trying, involving great privations and dangers, and often attended by romantic experiences. During what is known as the Canadian Rebellion he was in great peril, his life being threatened; being suspected as a spy, he was arrested and kept for some time in prison. At length, through his arduous toils and trials, his health failed, and in 1845 he returned to his native land, having been the main instrument in establishing 177 churches, which contained more than 4,000 members, but which have since expanded into large and flourishing centers, and now form part of the Methodist Church of Canada.

ADELAIDE: A village of 1,200 inhabitants, on the left bank of the Koonan River, in Cape Colony, S. Africa. Religion, the denominations common in Britain and America; the native fetishism also exists. It is a mission station of the UFS, established in 1851, and has a working force of 1 missionary and his wife with a native worker. There are 185 church members.

ADEN: A fortified seaport at the southwestern corner of Arabia, belonging to Great Britain, having been bought from the Turks in 1839 by the British East India Company. The climate is hot and very trying to Europeans. The population is almost exclusively Mohammedan, but of several races and tribes who go to Aden for commerce from the interior of Arabia and from Africa. The UFS has a mission station at Shijk Othman in the district of Aden. Three missionaries, 2 native men and women, compose the force which carries on a high school, a hospital, and a dispensary.

ADIRANTAL ISLANDS: A group of islands lying N. E. of New Guinea, belonging to Germany and forming a part of Bismarck Archipelago.

ADOWA: Capital of Tigré, Abyssinia; a town of about 3,000 inhabitants. It has not now any mission stations or enterprises.

ADRIANOPEL: Capital of the Turkish province of the same name (Turkish Edirne), on the Maritsa (ancient Hebrus), in Thrace, 130 miles northwest of Constantinople. Population, 85,000 Mohammedans, Greeks, Armenians, Jews, with a few Roman Catholics and a small group of Protestants. The scenery of the city is beautiful, the gardens of the wealthy citizens delightful, and the appearance of the 40 mosques most picturesque. The trade, centered in a capacious bazaar, is considerable, and the city possesses strategic importance. Founded by Emperor Theodosius in 1240, the mission station of British Society for Propagating the Gospel among the Jews; I Jewish missionary; also an outstation of Constantinople (ABCFM); it has a native Evangelical church, and a Bible depot of the ABS.

AFGHANISTAN: A country of Central Asia, N. E. of India, which it separates from Russia and Persia. It is a mountainous country, with lofty tables and deep ravines, few rivers, and a climate that presents a great variety, changing from intense cold to tropical heat. The population is estimated at about 5,000,000 Mohammedans of the Sunnite sect, divided into two classes, Durrans and Ghilzais. They are a fierce, turbulent people, constantly at feud and difficult to govern. No mission work can be attempted at present in Afghanistan, but the British and Foreign Bible Society have published the New Testament, Psalms, and historical books of the Old Testament in Pashtu, or Afghani.

AFRICA: The continent of Africa is equal in area to Europe and North America combined, comprising nearly 12,000,000 square miles. Its greatest length is 5,000 miles, and its greatest breadth, 4,600. Both tropics cross it, and the equator intersects it a little below the center. By far the largest portion of its territory is
therefore intertropical. In its physical configuration Africa has been happily compared to an inverted saucer. It is rimmed on a great part of its seaboard by a narrow strip of low land; at a distance of from 50 to 200 miles from the coast the land rises rapidly to an average height of from 2,000 to 3,000 feet, and in some parts to lofty mountain ranges; then the whole interior is a vast table-land, sinking slightly in the middle. In this hollow lie the great lakes whence flow the mighty rivers that drain the whole country.

These rivers are the dominating features of African geography. The problems that have chiefly concerned the explorer have been to ascertain and locate the sources and the courses of the four great streams, the Nile, the Niger, the Congo, and the Zambezi; and the triumphs of modern African exploration are almost all connected with these four names. The Nile is by far the longest of the four, having a course extending over 37° of latitude; but the Congo exceeds it in volume and in the dimensions of its basin. Of the four great lakes of what is usually called Central Africa, Victoria Nyanza and Albert Nyanza belong to the Nile system; Tanganyika belongs to that of the Congo, and Nyasa to that of the Zambezi, one of whose tributaries, the Shiré, flows out of it.

I. Geographical and Political Divisions: The following table shows the divisions of Africa as constituted at the present time (1905). The process of delimitation is still going on in northeastern Africa, but by consulting the latest maps in connection with this table it will be seen that the process of partition is practically completed. For areas, populations, missionary and other facts the different divisions should be studied under their respective heads. The abbreviations in parentheses after the names in the table indicate the government under whose influence or into whose possession the territory named has fallen:

Britain; F—France; G—Germany; I—Italy; Ind—Independent State; P—Portugal; S—Spain; T—Turkey.

II. Geographical Exploration: The first of modern travelers was Bruce, who traveled through Nubia and Abyssinia in 1768–73, and traced the course of the Blue Nile. After that the Niger was for a half century the goal of successive explorers. Mungo Park reached its upper waters in 1796; Denham, Clapperton, and Laing followed; but it was not till 1830 that Lander, sailing down the stream, discovered its outlet in the Gulf of Guinea. In 1816 Tuckey attempted to explore the Congo, but fell a victim to the climate. Central Africa proper still remained untouched. In 1845 Sir Roderick Murchison, President of the Royal Geographical Society, said: "Our knowledge of Africa advances slowly, and is confined almost exclusively to the coast," and in 1851 another president, Captain Smyth, said: "All beyond the coast of Central and Southern Africa is still a blank in our maps."

The wonderful discoveries of the last 60 years begin with the two missionaries of the Church Missionary Society, Ludwig Krapf and John Rebmann, who were the earliest explorers of Africa, from the eastern side (1844–46). Rebmann's discovery of Mount Kilimanjaro. In 1845, was the first great step forward in what has been well called the Recovery of Central Africa. In the following year Livingstone made his first important journey, in the far south, and reached the small lake Ngami. In 1854 Baikie took the second Niger expedition (with which was S. Crowther) up the Benue branch more than 600 miles from the sea; and about the same time Barth was prosecuting his extensive journeys in the Sudan and around Lake Chad. Livingstone was then gaining his great reputation in the south, particularly by his journey across Africa from Loanda to the mouth of Zambesi, by which the course of that river was determined (1854–55). In 1857 Burton and Speke, stimulated by the researches of Krapf and Rebmann, which had for several years pointed to a great inland sea somewhere in the interior, made their great journey from the East Coast, and in the following year discovered Lake Tanganyika and the Victoria Nyanza.
In 1859 Livingstone discovered Nyasa, and, not knowing that the mystery of the inland sea, heard of by Rehbmann, had been solved, wrote home: "This (Nyasa) must be what the Church Missionary Society has been seeking for many years." (The Portuguese, however, knew of Nyasa; and Caizembo's capital, in the heart of the lake region, had been reached by Lacerda as far back as 1798, and by Monteiro in 1831.) In 1862 Speke, on his third and fourth Grand African Exploring Expedition, discovered Uganda, and the outflow of the Nile from the Victoria Nyanza, and sent home his famous message, "The Nile is settled." Meanwhile several Egyptian officers with Petherick had ascended the White Nile nearly to the Albert Nyanza, which however, was first seen by Baker in 1864. In 1866 Livingstone, abandoning his southern fields, began his later travels in the lake regions, around Tanganyika, and on what are now known to be the headquarters of the Congo. The search for him, when his long absence caused anxiety, led to Stanley's first journey (1871), and to that of Cameron. The latter was the first to cross Africa from east to west (1874-75); but his too southern route missed the course of the Congo, which was determined by Livingstone's (a journey in 1876-77). This was the journey in the course of which Stanley explored the Victoria Nyanza and visited Uganda. Meanwhile, the remarkable explorations in the Sudan of Schweinfurth, (1869-71) and Nachtigal (1869-74), particularly those of the former in the territories west of the Upper White Nile, revealed to the world countries and peoples utterly unknown before, notably the Monbuttu and Nyan-Nyam districts and races.

The Congo particularly, within eight years of the first visit of its course, became a comparatively familiar stream. The vast territories drained by it have, by European treaty, been formed (so far as commerce is concerned) into a Congo Free State.

Among the events and goings that in more recent years have contributed to the enlargement of our knowledge of Africa, may be mentioned the protectorate practically assumed over Egypt by Great Britain since 1883, the long-continued troubles in the Sudan, and especially events in the course of the Orange Free State and the South African Republic, and reduced them to British colonies. To these happenings should be added the activity manifested by Great Britain in pushing its African railway enterprises, aided by some other powers, a process that promises to bring into railway connection with the whole world the entire east coast and the eastern portion of the continent.

The more recent explorations have been undertaken less to discover new regions than to increase our knowledge of regions already reached. The best known of the expeditions since 1885 was that of Stanley, undertaken to discover the fate or whereabouts of Emin Pasha (Sntzer). This went up the Congo, traversed the vast forests of equatorial Africa, and crossed into Zanzibar. In 1899 an expedition led by E. S. Grogan and Arthur Sharp crossed the continent from north to south, investigating the feasibility of a "Cape to Cairo" railroad, and making many valuable discoveries. Donaldson Smith explored Somaliland with good results, Fourcroy crossed the Sahara to the Congo, and Mar- chand made his memorable "mission" to Fashoda within the period named. The future exploration of the continent will certainly be conducted from motives chiefly commercial, and in a scientific research to the next generation a knowledge of this vast continent as accurate and full as that which we now have of the better known regions of the earth.

III. Races and Languages of Africa: The missionary problem between vast "dark continent" is intimately related to the character of the races and languages found within its boundaries. The population of Africa is estimated by the more recent authorities at 175,000,000, or about one-eighth of the entire population of the earth. Deniker, in his "Races of Man" (London, 1900), gives a complete classification of the African races from which we derive the following abstract:

1. Arabo-Berber, or Semito-Hamites: This stock is found in N. Africa, as far as 15° S. lat. It includes about three-fourths of the so-called Arabs of N. Africa, who in fact are Berbers speaking Arabic. There are four sub-races (1) Djerbas, the Berbers of the Tunisian coast (2) the Elles type, of Central Tunis, (3) the present Berber type of Algeria-Tunisian, (4) the Jerid or Oasis type. The Fellahin of the Nile valley below the first cataract belong to this stock. The ancient Egyptian language preserved as the Coptic dialect is spoken by about 500,000 to 750,000 Berbers, and the Argo-Berber tribes of the Nile valley between the first and fourth cataract number about 100,000.

2. Ethiopians, or Kushito-Hamites, or Nubians: This stock inhabits N. E. Africa from the 25th deg. to the 4th deg. S. lat. They occupy the coast of the Red Sea, and of the Indian Ocean from the S. of the Aden Group: viz: (1) the Oromo, who are nearly pure Ethiopians, (2) the Gallas, or Oroma, who are nearly pure Ethiopians, (3) the Somalis, who are Gallas mixed with an Arab stock, and (4) the Afari, or Danakil.

3. Fulah-Zande Group: This comprises a whole series of populations of mixed Ethiopians and Nigrantians, extending in a belt five or six degrees wide across the continent, including with many other tribes, the Masai, of the eastern section, the Nyam-Nyam, or Zande, and on the west, the Fulani.

4. Nigrantians: These comprise all the negro populations that do not speak the Bantu dialects, and which are conveniently divided into four sections, viz: those of the Eastern, Central and Western Sudan, and the coast of Guinea, embracing many tribes and subdialects.

5. Negritos: These are a stock of pigmies, extending in a belt reaching in general three degrees on either side of the equator entirely across Africa.

6. Bantu Group: This group embraces numerous peoples of Central and S. Africa, whose dialects form the Bantu linguistic family, distinct from the Nigrantians. They are conveniently divided into Western, Eastern and Southern sections, embracing many tribes and families. To the southern section of this group belong the well-known Zulu tribes.

7. Bushmen-Hottentots: A people reduced by the more warlike Bantu tribes to a few thousand families, many of them nomads and forest hunters.

The ethnological divisions have not been easy
to fix, but the best authorities are fairly agreed in arranging them by language, and the linguistic grouping adopted in this work is such that the above may be taken to be a fairly consistent outline grouping of the races of the continent.

IV. Religions of Africa: The missionary to Africa has the task of making himself acquainted with a greater variety of religious customs and superstitions than can be found in any other quarter of the world. These religions are characterized in general by a belief in some sort of supreme being, in many quarters by the worship of ancestors, somewhat as in China, by Fetishism with its priests, sorcerers and groveling rites, and by superstitious fears, incantations, charms and barbaric ceremonies. Idolatry, in the sense of the making and worshipping of images, is not so widely diffused as might be supposed.

There is nothing in Africa like the elaborate image-worship of India. Hidæous idols are common among the West African Negroes; but in Central Africa, so far as is known, none are to be found. But what is called fetish worship is universal. A fetish is a charm; and almost any object—a tree, a stick, a stone, a shell, a plant, the limb of an animal, a vessel filled with some strange compound—in fact, anything whatever—may have power imparted to it by certain medicine-men—power to preserve the owner or bearer from danger, or power to injure his enemies. Particular fetishes fulfill particular purposes.

All these native religions may be comprised under the term pagan. Of the pagans on the entire globe, six-sevenths are in Africa, which is therefore emphatically the pagan continent. Of the imported religions of Africa the leading representative is Mohammedanism. Carried in the 7th century by fire and sword over North Africa, this faith has, in the last two centuries, advanced its borders considerably, and now prevails widely in both the Western and Eastern Sudan, in West Africa and along the east coast, and its missionaries are more or less actively spreading their faith among the populations of Central Africa.

The Christian populations of Africa comprise the Copts, descendants of the Monophysites of the 5th century, numbering about 750,000; the Abyssinians, when ecclesiastical system depends upon that of the Coptic Church; Roman Catholics who have had missionaries in Africa continuously since the 16th century, and now aggregate about 2,450,000; and Protestants, numbering about 3,250,000, including the English and Dutch of South Africa.

Hindus, chiefly dwelling on the east coast of the continent, number about 250,000 in Africa; and according to varying estimates there are from 550,000 to 750,000 Jews, chiefly on the Mediterranean coast.

V. Missionary Work in Africa, General View: The first Protestants to undertake evangelizing work in Africa were the Moravians, who began in 1792. Since that time nearly every Protestant denomination has undertaken missionary work in some part of the "dark continent." For details of this work the reader should consult the articles upon the political and territorial divisions of the continent, and particularly the statistical tables found in the Appendix to this work.

Statistics naturally take no account of the great number of Christian men and women in Africa not directly related to missions, but who exercise evangelizing influences in innumerable ways. Parochial self-supporting churches are naturally evangelizing agencies, and it is farther to be considered that very much work by Christians cannot be identified nor reduced to statistical form.

Obstacles and Difficulties encountered in Missionary Work in Africa: These are many, but not insurmountable. The first is the climate of many parts to which missionaries have undertaken to go. This is deadly to most Europeans or Americans who spend any time on the coast or in the lowlands.

The vast number of languages spoken by the 175,000,000 or more of the inhabitants of Africa is a very serious obstacle to missionary labor. Nowhere is a universal speech more of a desideratum.

Slavery and the appearance of the Arab slave-trader are still real terrors in many regions, and sadly interfere with the progress of the Gospel; but there is reason to hope that this great crime against humanity is permanently under restraint, so that its vitality will steadily fail.

The traffic in liquor is another obstacle to the missionary enterprise; and it is indeed a fatal impediment to the spread of the Gospel, particularly on the west coast of Africa. Steps have been taken to limit this evil.

Other difficulties and problems that confront the missionary in Africa can be only mentioned. The brutal animal nature of the natives in many regions makes the instilling of a pure religion seem nearly impossible. Polygamy and the degradation of women to the level of mere beasts are facts to be counted on. The influence of the sorcerer and wizard, based on the nearly universal belief in evil spirits, is encountered everywhere, and such men are the natural enemies of the missionary because they are the religious leaders of their tribes. The greed of commercial enterprise, resulting in age-long abuses of the natives, who have been wrung by the white man since the earliest times, also weighs in some parts of the continent to make entrance into the confidence of the African people more difficult.

Nevertheless, most Africans are hospitable to the foreigner, naturally docile under the influence of strange minds, and especially curious and eager to learn new things. In this latter trait they are far more easily reached than are the Chinese with their fixed and retrograde temperament. The Africans, moreover, are not naturally atheistic, and have many ideas and beliefs that prepare them to believe the Gospel. A history that shows individual Africans, like Bishop Crowther of Yorubaland, or national development, as in Uganda, promises like fruit from Christian teaching elsewhere.

AFRICA, German East. See German East Africa.
AFRICA, German Southw. See GERMAN SOUTHWEST AFRICA.

METHODIST EPISCOPAL CHURCH: Parent Home and Foreign Missionary Society of the, (1847): The foreign mission work of the African Methodist Episcopal Church is found in Africa, South America, West Indies and Hawaii. The first foreign field of the church was Haiti (1824), where the society now reports 10,000 members and 5,000 adherents. In British Guiana it reports 20 stations and 5,000 adherents. It reports 15 missionaries in the Windward Islands, and 3 missionaries in Cuba. Its missions in Africa include stations in Sierra Leone, Liberia, the Lagos Colony (on the West coast of the continent), in Cape Colony in South Africa, extending northward as far as Northern Rhodesia. In Africa it reports altogether 300 preachers and a membership of 11,000. The origin of the work of this organization in South Africa was the withdrawal, in 1894-95, of a number of native church members from the WMS churches in the Transvaal. The seceders formed a new body which adopted the name, "Ethiopian Church." The movement was in some measure a protest against a color line in the church. The society, in 1896, united this mission church with the African Methodist Episcopal Church of the United States, and the movement is spreading with some energy among native churches in Africa.

The Woman's Parent Home Missionary Society (1872), and the Woman's Home and Foreign Missionary Society (1892), are auxiliaries, the last named having its chief support in the Southern States. The headquarters of the society are: 61 Bible House, New York City. Organ: Voice of Missions.

AFRICAN TRAINING INSTITUTE (Colwyn Bay, North Wales): This Institution was founded in 1889 by the Rev. W. Hughes for the purpose of giving a thorough English training to exceptionally gifted Africans. The plan was heartily approved by many of the African Christian clergy and others, and is supported by auxiliary conferences which have at several points in W. Africa. The Training Institute is located in a delightful part of Wales, at Colwyn Bay, and has already shown its usefulness. It has educated more than 200 Africans, who are now working at about 15 places in W. Africa, mainly in the Congo region, and who, by so much, become the direct channels of the influence of the Institute. The Institute teaches its pupils some of the arts which will find place for application in Africa and it has 5 auxiliary or preparatory schools in Africa, the most intelligent of whose graduates will be taken to complete their training in the mother institution. The number of students now in training is about 75.

AGARPARA: A village near Calcutta, India; station of the CMS, with one unmarried woman missionary in charge of a house for female orphans.

AGBOGBA, or ABOKORI: A town N. of Accra in the Gold Coast Colony, W. Africa; station of the Basel Missionary Society, with 21 outstations and 15 village schools. The number of professing Christians is about 500.

AGNEW, Miss Eliza: Sailed from Boston to Ceylon, under the ABCFM, in 1839, and for forty-three years she labored as a missionary of the Cross, never returning to native land. She was the first unmarried woman sent as a missionary to Ceylon, and for forty years she was the efficient principal of the girls' school at Oodooville. In June, 1883, Miss Agnew received a paralytic shock, and during the same month she passed into her heavenly rest.

AGRA: A city of about 170,000 inhabitants, capital of the district of the same name in the United Provinces, British India. It has several magnificent architectural relics of the Mogul Empire, which have been venerated by the Hindus as the scene of the incarnation of Vishnu. It is an important center of Mohammedanism. The climate is good except from April to September. It is a station of the BMS, opened in 1811, and now carried on by 5 missionaries, men and women, and 24 native workers. There are 2 outstations and 9 village schools, an orphanage, and 70 church members.

It is also a station of the CMS, commenced in 1859, and now having a working force of 21 missionaries and 38 native workers, men and women, who carry on 7 village schools, 5 high schools and a fine college. There are 205 communicants connected with this mission.

The BZM commenced a station here in 1871 and has 5 missionaries and 11 native workers, all women, with 5 village schools and more than 400 women pupils in the zenanas.

The Edinburgh Medical Mission Society has a training class here.

The ME has a station here with a missionary and his wife and 32 native workers, 20 village schools, and 550 church members.

AGU: Town in the German colony of Togoland, W. Africa; station of the N. German Missionary Society, opened in 1900.

AGUADILLA: Town on the W. shore of Porto Rico; a flourishing station of the Presbyterian Home Missionary Society, with about 150 adherents.

AGUASCALIENTES: Capital of the smallest State in the Mexican Republic, 270 miles northwest of Mexico City. It takes its name from a hot spring which abounds in olives, figs, vines, pears, etc. Climate, temperate; population, 32,000 Mexicans; language, Spanish; religion, Roman Catholic. Mission station of Cumberland Presbyterian Church (1888); 1 missionary and wife; 14 native workers, 7 native workers, men and women; 2 orphanages, a printing house, 2 industrial schools, 1 outstation, 3 common schools, and 105 church members.

AHMADABAD: The capital of the district of the same name, Bombay, British India. It was formerly one of the most magnificent cities of India, and its superb architectural monuments and testifies to this fact. It is a religious center of the Parsees. It is a mission station of the PCI, established in 1861; with 6 missionaries and 30 native workers, men and women, a theological seminary, 2 orphanages, a high school, and 11 common schools. There are 100 members in the church.

It is also occupied as a mission station by the ME, with 1 missionary and his wife and 3 native workers, and by the Christian and Missionary Alliance, and the Salvation Army, statistics in regard to which are lacking.

AHMADNAGAR: A city in the presidency of Bombay, British India, standing on the Deccan...
plateau and on a line of rail joining Dhond on the Bombay and Madras line, with Mannad on the Bombay and Calcutta line. It has 35,000 inhabitants, of whom 3,572 are Christians, for the most part connected with the mission of the ABCFM. This mission was commenced in 1831. Up to 1855 the whole number of converts and present adherents on this line are 123. But them a movement is made across which spread to about 100 villages, and brought over 600 communicants into the church. A convert, Krishna Rao, introduced, in 1862, the Kirtan at the meetings—songs on the life of Christ, sung with instrumental accompaniment. The present force of the mission consists of 17 missionaries, men and women, of whom 2 are physicians and 3 industrial instructors. It maintains 1 theological seminary, 1 training school for women workers, 2 high schools, 1 industrial school of great efficiency, 1 industrial school for women, 1 hospital, 1 dispensary. Connected with the mission are 2 churches in the city which pay the expenses of their own Christian work and contain 634 members. In the district superintended from the city are 17 other churches with 1,290 members and 18 common schools.

The SPG entered Ahmadnagar in 1870, and has its headquarters outside of the city with a somewhat extensive work in the district to the north.

The Christian Literature Society for India has a publishing house in the city and conducts a normal training-school.

The Industrial Missions Aid Society has a rug factory in the city which gives employment to boys trained in the industrial schools of the Mission.

It is a notable fact that while the population of the district decreased by 52,000 in 10 years, 1891-1901, the Christians of the district increased in the same time from 6,734 to 20,864.

AHOUASAHT: Village on the W. coast of Vancouver Id.; station of the Presbyterian Church in Canada, with 1 missionary and his wife, 1 missionary woman, 1 Sunday-school and 1 village school.

ALIDIN: A city 57 miles southeast of Smyrna, Turkey. Population, 35,000, chiefly Mohammedians, but with a few Greeks and Armenians. It is picturesquely situated on the Meander River, and built out of the ruins of the ancient city of Tralles, once occupying this site. Out-station of the ABCFM worked by the missionaries at Smyrna.

AILSA CRAIG: Village in West Shiré, Nyasaland, Africa; station of the Zambesi Industrial Mission, with an industrial school and 2 village schools.

AIM OF CHRISTIAN MISSIONS: The aim of foreign missions is not to be confused with the aim of the Christian Church, but with the aim of the nations of the world. There are many good and Christian things which it is not the duty of the foreign missionary enterprise to do. And we must not confuse the aim of foreign missions with the results—an easy confusion—because there is no other force so powerful to accomplish results accessibly and indirect. It is misleading also to confuse the ultimate issues with the immediate aims; it is not only misleading, it is fatal. Some things can only be secured by those who do not seek them. Missions are powerful to transform the face of society, because they ignore the face of society, and deal with it at its heart. They yield such powerful political and social results, because they do not immediately concern themselves with them. Again, we must not confuse the aim of missions with the methods of missions. It is an easy thing to select a method with the view to the accomplishment of some given end, and then because the end is good, put them in the world. It is easy to exalt the method into the place of the end.

Having cleared the ground so far, what is the aim of foreign missions? It is a religious aim. It cannot be stated too strongly in an age when the thought of men is full of things, and when the body has crept up on the throne of the soul, that the work is not immediately and primarily a religious work, that the work is not of any sort whatsoever. It is a spiritual and a religious work. Of course religion must express itself in life, but the missionary does not go into the world primarily as trustee of a better social life. He goes as the trustees of His Life Work. He is a missionary of a spiritual work, no matter how it is to be performed. It is a spiritual and religious work. Of course religion must express itself in life, but the missionary does not go into the world primarily as trustee of a better social life. He goes as the trustees of His Life Work. He is a missionary of a spiritual work, no matter how it is to be performed. It is a spiritual and religious work. It is not a social work, in the sense of a social mission, a philanthropic organization. It is a spiritual and religious work, in the sense of a mission that is divinely inspired and divinely endowed.
exalts to a predominant and singular place the supreme aim of making Jesus Christ known to His native world, which is His Church. The enterprise seeks to plant in humanity the principle of the divine life itself, to live and bear fruit in a thousand widely differing forms and under conditions of intellectual improvement than the missionary movement as such could accomplish.

This description of the missionary aim does not lift from our shoulders the burden of responsibility that we cannot escape, and it does not lay there a burden of responsibility that we cannot bear. We dare not say that we have done our duty when we have spoken Christ's name to the world; nor that we have made Jesus Christ known to the world when we have given the world a new name, and have not sowed the world upon which His name is to be sown. Midway between the position of no responsibility, and of all responsibility, the Church stands, sharing something with God, sharing also something with the world. We cannot sever ourselves from that link of loving sympathy which binds us up to Christ; we cannot sever ourselves from that link of sympathy which binds us to His life. We are meant to be between His life and its death, channels of the grace and salvation of God.

The aim of missions is to make Jesus Christ known to the world with a view to the salvation of men for that eternity which embraces alike the time that is to come and the time that now is. We cannot narrow salvation to but one world, this one or the next. And further we must not narrow salvation to a world individualistic terms. Our duty lies certainly to our generation, but it does not stop there. We are bound to preach to everyone in the world the Gospel of the only Saviour; we are bound also to make known to the world that there is a body of Christ which is His Church, and to gather up all responsive men into visible churches, which shall be outward evidence of the body of Christ, and shall secure to the Gospel an influence and perpetuity which institutions and not individuals must supply. Henry Venn, Dr. Warnecke and Rufus Anderson have given proper emphasis to this element in missionary policy and duty. We are to establish and foster native churches, self-extending, self-maintaining, self-directing, which shall carry out to their own people, whom we may not reach, the message that has come to them, and which, shall carry down into the generations to come after them, the blessings which we have given them as their own. This is the aim of foreign missions, to make Jesus Christ known to every world, with a view to the full salvation of men, and their gathering into true and living churches to which the missionary enterprise may commit the larger and enduring Christian duty as it passes on to "regions beyond."

This is the supreme aim. It is a just thing to challenge the world to sympathy with missions, because of the philanthropic and social results that missions achieve, and the heroic spirit which they display. But their supreme aim is neither to establish republics or limited monitions, nor to lead Chinese or Hindu people to wear our dress, nor to remodel their social institutions, where these are already wholesome and clean. The supreme aim is to make Jesus Christ known. Any true view of the world must make room for the enterprise, and if we are not conscious of the supreme movement, it is upon all the great forces that are making the world. We cannot acknowledge that the force of political influence has escaped from His control, that He stands impotent before the their own and civilization of the world. His hand is upon these things. They play at last into His almighty purposes. They are but part of His influence. They and all the forces of life run resistlessly on to the great goals of God. Him these forces are only supplementary to the power that the missionary holds in his hands from His pierced hand Who died and rose again, and Who is King of them that reign as kings, and Lord of them that rule as lords.

This aim of missions should have determining authority in the way we allow ourselves to drift into methods of work that presuppose a quite contrary aim. When we lift off the shoulders of a new native church, for example, the burden that it must bear if it is ever to grow, the act seems like kindness, while it is fatal to the Church and neglectful of the supreme missionary aim. It is easy to slip into indirect conceptions of duty, or to do what God can do through other agencies. Missions are to do their own work, and not the work of other agencies or other forces. Methods of work, in their perfection and in their perpetuation, should be ruled by the supreme and determining aim of the missionary movement.

And not alone the method of missions, but the spirit of the enterprise should be ruled by that aim. It possesses no promiscuous and indefinite project. It has its own clean-cut piece of work to do. To be sure it is often confused enough in the actual work among men, but the circumstances which confuse it show also how important its clear perception and prosecution are. If this is the aim of missions, the enterprise is not a miscellaneous and indefinite one. It is a clear and practicable project, well justifying the words of Simeon Calhoun, the "Saint of the Lebanon:

"It is my deep conviction, and I say it again and again, that if the Church of Christ were what she ought to be, twenty years would not pass away till the story of the cross would be uttered in the ears of every living man."

AIMARA LANGUAGE: In Bolivia nearly 400,000 people speak this language. It belongs to the South American family, but has been modified by the Spanish. It is written with Roman letters.

AINU LANGUAGE: Closely the aboriginal languages of the Eastern Orient family, the Ainu has no literature and has been called for missionary purposes and in Roman letters only. It is spoken by about 150,000 people found in Japan.

AINUS: Tribes inhabiting Sakhalin, Yezo, the Kurile islands and various adjacent regions, partly under Japanese and partly under Russian jurisdiction. As in the case of many aboriginal
races the name of this race means simply men. Tradition says that the Japanese were originally Ainus, and only became a distinct race by intermarrying with the Chinese. The Ainus are different from other Mongolian tribes, and in their more recent physical formation resemble the Caucasian type. They are armed and painted like savages, they are inoffensive and hospitable, but rather shy. They are pagans, and practise polygamy. Groups of 10 or 12 families live together in miserable huts, with a chief for each group. They support themselves by hunting and fishing. Those of them who have been converted to Christianity have shown tardiness and enthusiasm.

AINTAB: A city of Asiatic Turkey, about 35 miles west of the Euphrates, in the province of Aleppo. It has 30,000 inhabitants, chiefly Mohammedans and Armenians. One of the most flourishing stations of the ABCFM, with a large female seminary and a college founded in 1874. There are 4 large churches, 2 of them having stone buildings, with accommodation for over 1,000 each. The Protestant community is one of the most influential in Turkey. The effort in 1803, to establish an Episcopal cathedral failed. The common schools are supported entirely by the people, and are of very marked efficiency. The Central Turkey College at Aintab alto independent, is closely connected with the mission. The hospital and dispensary has been most efficient. The work of the station is carried on by 12 missionaries and 132 native workers, men and women. It has 27 outstations, 61 primary schools, 7 high schools and an orphanage. The number of church members in the field is about 3,500.

AIZ-ZAHALTA: A village in the Lebanon district of Syria; station of the British Syrian Schools Society, with a dispensary, 6 outstations and 6 village schools.

AITUTAKI ID. See HERVEY ISLANDS.

AYANSH: A station of the CMS in the diocese of Caledonia, British Columbia, founded in 1883. It is carried on by a missionary and his wife and 5 native workers, men and women. An industrial school and a publishing establishment are carried on, and the number of communicant Christians is 78.

AJERMANDIDI: A mission station of the Netherlands Missionary Society in the Minahassa Peninsula of Celebes.

AJMERE: A territory in Rajputana, India, governed by a Chief Commissioner, appointed by the Governor General of India. Its area, including the district of Merwara, which forms its southern portion, is only 2,771 square miles, and its population (1901), 476,912. Hinduism is the prevailing religion. Mohammedans are also found and a small number of Christians. The language is Hindustani. The province adjoins the Rajputana desert, has a limited rainfall and is subject to destructive famines.

Missionary work is carried on in Ajmere by the CMS, the UFS and the ME. The whole number of places occupied as stations by these societies is four.

AJMERE: Capital of the commissionership of Ajmere in British India. Its population numbers (1901) 73,839. The prevailing religions are Hinduism, Jainism and Mohammedanism. It has a very fine and old Mosque built on the site of a Jain temple. It is a mission station of the UFS (opened in 1862). The ME and the SPG also have native workers here. The UFS has a publishing establishment, a dispensary and a hospital in this place. The aggregate working force is 8 missionaries, and 15 native workers. There are 52 churches, 42 schools, 1 high school and 1 hospital. There are 33 communicants.

AKABE: A town on the Benue river, Nigeria, W. Africa; station of the CMS, opened in 1897. The people are in the main fetish worshipers, with a few Mohammedans among them.

AKIDU: A village on Lake Kolar, Madras, British India. A flourishing station of the BOQ, established in 1890, and operated by 3 missionaries and 12 native workers. It has 9 outstations, a dispensary, a high school and 22 common schools, with 1,700 communicants in the field under its supervision.

AKITA: A city in the island of Hondo, Japan, with 30,000 inhabitants. A station of the PCMS, with 3 missionaries and 4 native workers, men and women. It has a dispensary, a nurses' training class, 9 outstations and 220 church members. It is also an outstation of the ME in charge of 2 native workers.

AKKAWAY, or ACAWO: This is a language of the South American family spoken by a limited number of the people of Guiana. For missionary purposes, it has been written with Roman characters.

AKROPONG: A town in the Gold Coast Colony, W. Africa, in the domain of the Ashanti language.

The religion of the people is Fetishism. The Basel Missionary Society opened a station here in 1835, which has been very successful. Ten missionaries and 38 native workers, men and women, form the corps of instructors for the people of the town and of 14 outstations. The total number of communicant Christians is 2,100.

AKWAPIM: A dialect of the Otshi language spoken in parts of the Ashanti country in W. Africa.

ALABA IS.: The northernmost group (commonly known as the Torres Is.), of the New Hebrides Islands. The Melanesian Mission has kept teachers in the Torres Islands since 1878.

ALASKA: The northwestern corner of North America, formerly known as Russian America, and purchased by the United States in 1867 for $7,200,000. If embraces all of the N. American continent W. of the 141st meridian of W. longitude, together with a narrow strip of land between the Pacific ocean and the British dominions, and also all islands near its coast, as well as the Aleutian archipelago. Including islands, its area is 590,883 miles; an area about equal to that of the Northern States east of the Mississippi, with the addition of the Virginias, Kentucky and Tennessee. The exact eastward bounds of the southern coast strip of Alaska are still unsettled. The population (1900) is 63,502, of whom 25,000 are Indians and Eskimos. The white population is rapidly increasing in conse-
quence of the discovery of several very rich deposits of gold in the western and central part of the country. The native tribes of Alaska are pagans, mostly worshipers of departed spirits, cruel in their rites, and superstitiously subservient to their medicine men or religious leaders. At the southernmost part of Alaska in its southeastern coast regions and in its islands is much less severe than in the same latitude on the eastern coast of the continent. On the central plateau, 600 miles long from east to west and 400 miles wide from north to south, the winters are quite mild, but the summers are very cool. Because of the hot summers the cereals and many vegetables of the temperate zone can be grown, and Alaska may yet prove to be an agricultural region with a large population. Access to the missionary associations and some smaller communities. Some of the mission stations occupied are within the Arctic circle, where daylight in winter is a sunless sort of twilight of but three hours duration. One station (Point Barrow), on the northernmost point of the territory, is reached by reindeer. A considerable number of Indians and Eskimos have been drawn under the influence of these missions. In the southern part of the country, men engaged in the liquor traffic seduce and destroy a certain number of the simple-minded natives. But in all the stations educators, especially industrial educators, have been made an ally of religion in lifting the ideals and enriching the lives of the people. The total of Protestant Christian natives is (1900) 7,600 souls.

ALBANIA: The region called Albania includes the two provinces of Jannina and Skodra (Scutari) in European Turkey, stretching along the eastern shore of the Adriatic from 39° to 43° north latitude, and from 19° 24' to 21° east longitude. Its area is about 15,000 square miles. From Montenegro to the Gulf of Arta and the frontiers of Greece, while its breadth varies from 50 to 100 miles, from the Adriatic to an irregular line on the east, generally following lofty mountain ranges. It is a mountainous region throughout, being traversed by two or three elevated ranges which run parallel, in general, to the shore of the Adriatic Sea. It is also well watered, although its rivers are not navigable. For large lakes of Jannina, Castoria, and Emir, and Scutari impart a singular interest to the country.

The earliest authentic notices of the country occur in connection with the Greek colonies of Epidamnus, or Dyrrhachium (now Durazzo), the ancient port of transit from Brundusium (Briareum) and Ambracia, by which we may add the later colony of Jannina, which seems to have grown up almost unnoticed, not far from the ancient Oracle of Dodona, on the western shore of the lake of the same name.

The name Albania, first applied to this country in 1079, originated from Albas, the seat of the tribe of Alban in the center of the land. Anciently the region from Preveza to the mouth of the Voussa was called Epirus, and was considered more or less as a province of Greece, while all north of Voussa was called Illyria. The Albanians of Preveza, and the Macedonians of Epirus there, may conclude that the Apostle Paul himself preached the Gospel in Albania, when he tells us (Rom. 15: 19), that "from Jerusalem, and round about unto Illyrium, I have fully preached the Gospel of Christ."

Albania is the least civilized of all the provinces of Turkey. Except at rare and short intervals, under honest and energetic Pashas, brigandage, with its cruel murders and atrocities, may be said to be an almost constant feature of the country; so much so, that the districts of Dibra, Jakova, and Ikpek have long been inaccessible to outsiders, while the Mirdites, southeast of Scutari, retain even now a barbarous semi-independence, to guard which all strangers are jealously excluded.

The soil is fertile, and in several districts is well cultivated; but much of it lies waste, partly from defective methods of agriculture, but also from the insecurity of life and property in consequence of the bands of robbers that so frequently infest the country and commit the most frightful excesses. It is difficult to form any reliable estimate of the population, but probably 2,000,000 may not be far from the truth.

There is no missionary station in Albania. The BFBS has colporteurs and book depots at various points, and the ABCFM has native workers who are Albanians teaching one or two schools in the borderland between Albania and Macedonia.

ALBANIAN LANGUAGE: As the term "barbarian" was applied by the Greeks to all who spoke a different language from their own, we know that the Pelasgi in Greece itself, the Epitores, and the Illyrians, with many of the Macedonians, spoke not Greek, but a different language, which there is every reason to believe is the same as the Albanian, now spoken by their descendants. The origin and character of the Albanian have been the subject of much discussion, some regarding it as belonging to the Indo-Germanic class, and others pronouncing it a Turanian language. In fact, like the Armenian, it partakes of the characteristics of both these classes; but from its undoubted analogy in its peculiar sounds to the Greek, Latin, Sanskrit, Celtic, etc., it is classed by some as a derivative from any of these, but as a sister of equal antiquity. A great obstacle to the
critical study of Albanian is the absence of any literature except of comparatively recent origin. No Albanian alphabet exists. The Gheg, or northern, dialect has been written with Roman letters, while the southern or Tosk dialect has been written in the Macedonian alphabet. A modification of the Roman alphabet will probably prevail as the one mode of writing Albanian.

Not a little care is needed to distinguish the original terms and forms of the language from the many words adopted later from the Greek, Latin, Slavonic, Turkish, and other languages. The subject has engaged much attention, and we may notice as preeminent in this department Dr. Hahn, who compiled an Albanian dictionary and grammar, with many characteristic specimens of the language, and Demetrio Camarda, who studied the language chiefly among the Albanian colonies of Calabria and Sicily, and has written largely on its structure and affinities. To promote these studies care is now taken to commit to writing such historical ballads as have been handed down to the present time, as well as other poems which have been preserved in various forms of writing. The publications also of the British and Foreign Bible Society and a few also by the Religious Tract Society, of London, have greatly aided these studies. Several grammars also have been published, among which the works by Mr. C. Christophorides, a native of Elbasan. It is worthy of note that the prelates of the Greek Church in Albania and the religious teachers of the Mohammedan body alike oppose with some violence every effort to transform the Albanian into a written language. The cause of this opposition seems to be the same in each case — political intolerance of independent growth in a subject people.

ALBANIANS: A people chiefly found in European Turkey, whose subordinate political existence, lack of literature, and tendency to wander abroad have arrested their national development and obscured their origin and racial affinities. Groups of Albanians are found in Sicily, in Calabria, in Greece, and in some islands of the Greek Archipelago. Traces of the Albanian language or of a tongue closely allied to it are also found in Italy. Political and other considerations have led some to conclude that the existence of isolated groups of Albanians points to their being the remnants of a people originally inhabiting Greece and Southern Italy, and retaining to this day their distinct language and racial peculiarities.

According to this view the Albanians are of one stock with the ancient Pelasgi. However this may be, they cling with an intense nationality to their language and their tribal organisation and the wild diversities of physical surroundings belong to Albania. Their strong clan feeling has prevented anything like cohesion to maintain a national unity. But their modern history offers instances of a temporary union of the clans to resist a common enemy. Such a general union took place in resisting the Bulgarian invasion of Albania in 517–550, and again under Prince George Castriotes in resisting the Turkish invasion in 1443–78. The military ability shown by Albanians in these episodes of their history and in such a case as that of Ali Pasha of Janina, is a quality by which the Turks still profit. The flower of the Turkish army is composed of Albanians; and of the great Albanians who have risen to distinction in the service of the Sultan, it is only necessary to recall the name of Mhemmed Ali Pasha, the renovator of Egypt and founder of the present Khedival house, to see that Turkey does well to seek Albanians for positions requiring initiative and courage.

The Albanians are called “Arnaouts” by the Turks. They call themselves, however, “Skepetar”—the Eagle People. They are divided into clans so sharply separated as to introduce much difficulty in the study of their language. Their clan feeling has been so strong that the Turkish Government has used with skill to foment jealousies that shall prevent the Albanians from uniting to throw off a hated yoke.

Since the conquest of Albania by Turkey in 1478 the Albanians have been alternately harassed and tempted by appeals to their love for a military life, and about one-half of their number have become Mohammedans, still clinging to their own language, however, and not regarded as thoroughly orthodox in belief because still admitting the ties of race. Of the Albanians who have refused to accept Mohammedanism, those living in the southern part of Albania belong to the Greek Church, and those in the northern part, including the semi-independent Mirdites, are Roman Catholics. In each case the ineradicable love of the Albanians for their language has tended to keep the masses of the people in dense ignorance. The Roman Catholic Albanians are taught to read in Italian or in Servian. The Greek Church follows its usual policy, insisting that schools and churches among its Albanian adherents shall use the Greek language. As to the Mohammedan Albanians, their schools are conducted in Turkish, and their religious worship in Arabic. Whatever their religious connection, worship is an unintelligible pantomime, and education, an opportunity for culture in a foreign tongue from which a few are profiting, and yet with the masses derive but little benefit because the women are wholly illiterate and the “bookless Albanian” is the sole language of the home-life.

ALBERNI: Town in Vancouver Id., British Columbia; station of the Canada Presbyterian Church, which has an industrial school there for the Indians.

ALBINA: A town on the Maroni river in Suri-nan; station of the Moravian Missions, opened in 1894 for East Indian cooies. It has 2 chapels and 2 village schools with about 40 professing Christians.

ALCHUKA-FU (A-she-ho): Town of some importance on the Transsiberian Railway, in Manchuria; station of the UFS. One of the resident missionaries is a physician. There are about 90 professing Christians there. (Also written Ashioh.)

ALEppo: A city of Asiatic Turkey, on the borders of the Syro-Arabian Desert, and capital of the province of the same name. The city is encompassed by low, barren hills and irregular mounds, intersected by fertile valleys. It is a city of opulent Oriental type, with extensive bazaars, numerous mosques, and a people remarkable for their elegant bearing. The streets are
unusually good for the East; and the stone houses are very well built. The city, being on the only safe route between Syria and Eastern Asia, is a center for the Djennes and Bagdad caravans. The inhabitants are noted for their shrewdness in trade. There has been a considerable European colony in Aleppo since the middle of the 16th century. It was the principal factory of the English Levant Company until Napoleon's Med-
iterranean enterprises broke up. The city has about 120,000 inhabitants, chiefly Mohammedans. There is also a strong Roman Catholic element in the population besides Greeks, Armenians and Jews. The ABCFM has occupied Aleppo as a station at various times but has abandoned it on finding it not so easy to make up to an effort. The PCE opened a station there in 1895 for work among the Jews. It has 2 missionaries and 4 native workers, with a primary school and a dispensary.

ALERT BAY: A settlement of the Kwaguil tribe on the northern coast of Vancouver Island; station of the CMS, with 2 missionaries and their wives, 2 married women and 2 native women. There is a high school, an industrial school and a primary school. The communicants number 22.

ALEUTIAN: This language is spoken by the people of the Aleutian Islands, and belongs to the Arctic family of the North American family. It has been written with Russian letters.

ALEXANDER, Bishop Michael Solomon: Born in Prussian Poland, 1799. He was brought up in the strictest principles of Rabbinical Judaism. When he was 16 he was a teacher of the Talmud and the German language. At the age of 21 he went to England, having not the slightest ac-
quaintance with English. He was almost married, the existence of the New Testament. He settled in a country town as tutor in a Jewish family. Whilst there the sight of a handbook of the London Society for the Conversion of the Jews aroused his curiosity, and he obtained and read the New Testament. Shortly afterwards he accepted the post of Rabbi at Norwich and subsequently at Plymouth. There in the providence of God, he became acquainted with the Rev. B. B. Golding, curate of Stonehouse, to whom he gave lessons in Hebrew, and Drugg whom, after much inward conflict, he almost came to a profession of the truth of Christianity. He used to steal silently down to Stonehouse Church on Sunday evenings, and, under the shadow of its walls, would stand riveted to the spot, while he listened to the songs of Christian praise, in which he dared not as yet take part. His congregation heard of his leanings towards Christianity, and he was suspended from his duties as Rabbi. Further trials awaited him, but the Lord strengthened his faith and on June 2, 1825, in St. Andrew's Church, Plymouth, he was baptized in the presence of 1,000 people. His wife's baptism followed six months later. In 1827 he was ordained deacon in Dublin, where he had settled in order to gain a livelihood as a teacher of Hebrew. Here, through his consistent Christian character, he made many friendships. Eventually he became a missionary of the Society, laboring first in Danzig and later in London, where he held the post of Professor of Hebrew and Rabbinical Literature in King's College, until 1841, when he was consecrated the first Anglican Bishop in Jerusalem. His work there was of great blessing, two prominent Jerusalem rabbis being baptized. It was a great blow to the Society's mission there when, in 1845, Bishop Alexander suddenly died, his last act being to pray that he might be held up to awaken one another world. One of his grandchildren is a CMS missionary in Japan.

ALEXANDER, T. T.: Born in Mt. Horeb, Tenn., October 8, 1850; sent by the Presbyterian Board (North) to Japan in 1877. Died at Honolulu, November 14, 1902. During his life in Japan he had been active in the opening of new stations, had taught theology in the Meiji Gakuen in Tokyo, and just prior to his departure from Japan had been in charge of the evangelistic work in the city of Kyoto, where also he was helping the Congregational missionaries in the Theological Department of the Doshisha.

Dr. Alexander was a man of great ability, one of the best Old Testament scholars in Japan; a man of rare openness of mind and beauty of character; a lover of peace; always forgetful of himself, modest and gentle in all his ways, yet a man of iron principle and of unswerving devotion to what he believed to be right. The missionaries in the Empire were so highly valued as he by the Japanese, both for the purity and sweetness of his Christian character and for the value and solidity of his counsel and judgments in their perplexities. He did much at the time when the liberal movement was strong in Japan, to help many to find a solid standing ground.

For the last seven or eight years of his life, Dr. Alexander was alone on the field, Mrs. Alexander and the children residing in Maryville, Tenn., for the education of the children. Happily, the eldest daughter, Miss Emma, under appointment as a missionary to Japan, had stopped in Honolulu for a brief visit with her father and was present with him at the time of his death.

ALEXANDER, William Patterson: Born in Paris, Ky., U. S. A., July 25, 1805; studied Latin and Greek at Bourbon Academy; taught school to obtain the means to go to college; entered Centre College, Ky., 1826; graduated at Princeton Theological Seminary, 1830; ordained by Presbytery of Cincinnati, October 12, 1831; embarked November 26, 1831, as a missionary of the American Board for the Hawaiian Islands, reaching Honolulu, May 18, 1832. Soon after his arrival he was appointed one of a deputation from the Hawaiian Islands to go to the English Mission at the Society Islands, and also to visit the Marquesas Islands to ascertain if it would be expedient to establish a mission there. A favorable report having been made, it was decided at a meeting of the mission in April, 1833, to undertake a mission at the Marquesas Islands, and Messrs. Alexander, Armstrong, and Parker were appointed to commence the new mission. They reached Nukahiva, the largest island, November 18, 1833. After spending eight months among the cannibals, they left the Marquesas Islands to the LMS, whose missionaries were then on their way thither, and returned to Honolulu, arriving May 12, 1834. Mr. Alexander's first station in the Hawaiian Islands was at Waioi, on the island of Kauai, where he remained from 1834-43. A great revival was experienced 1836-38, when the natives came incessantly from early in the morning till late at night to converse on religion. In 1837, Mr. Alexander translated Legendre's Geometry, and prepared a text-book on surveying and navigation for the Lahaina-
Luna Seminary. His efforts, in conjunction with Dr. Armstrong, to establish a boarding-school for the missionaries' children, resulted in the founding of the Ponahue School (chartered in 1853 as Oahu College). Failure of health requiring a change to a drier climate, Mr. Alexander left the Waioli parish, and took charge of the seminary's classes at Honolulu and in 1849. This was a high-school established for the special purpose of educating teachers. Mr. Alexander's health having suffered from his sedentary employment, he was granted, in 1849, a year of respite from school-teaching. This year he spent visiting lands of Hawaii Government on East Maui. During this period the Hawaiian Government was changed from an absolute to a constitutional monarchy, and the poor serfs were granted their homesteads in fee simple. In this movement Mr. Alexander was greatly interested, and gave its leaders his earnest cooperation. Besides his labors in the Lahainaluna Seminary, he published a Pastor's Manual, common school and Sunday school books, two standard books on the Evidences of Christianity, and A System of Theology. He died at Oakland, Cal., in 1884.

ALEXANDRETTA: A seaport in the province of Aleppo, Asiatic Turkey, at the extreme north of the Syria the coast line, and it is the terminus for the trade of Mesopotamia. It is low, marshy, and unhealthy, and most of those who do business there reside in the city of Beylan, on the mountains, about 12 miles distant. It is also called Iskanderun.

ALEXANDRIA: A city of Egypt, on the shore of the Mediterranean. Founded by Alexander the Great, 332 b.c. During the Roman Empire it was the capital of the country and a large and important city. It was the seat of a patriarch, and an important center of learning in early Christian history. During the Middle Ages it declined greatly in importance, and at the time of the Mameluke rule (1500-1800 A.D.) the inhabitants were reduced to about 5,000. Under the Turkish rule, however, and especially under the reign of Mohammed Ali (1811) Alexandria grew rapidly, and now the population numbers about 320,000. Of these 250,000 are Mohammedans (90 per cent.), speaking the Arabic language. The remainder are from every country in Europe and almost of the world, so that it is even more of a Babel than is Constantinople. The presence of a large number of Europeans resident there throughout the year has had a great influence in making the city one of the most attractive in appearance on the Mediterranean, with broad streets, fine buildings and pleasant drives. Being on the sea, the heat is not as intense as at Cairo, and there have grown up a number of suburbs, among which Harlek is one of the most popular.

The general character of the people is very low, the natives having acquired most of the vices of the Europeans. Some of these foreign residents, however, are men who take an interest in the public welfare, and are liberal in sustaining hospitals and other benevolent and philanthropic undertakings.

The Mohammedans have acquired a very bitter feeling toward the Christians and the Jews, and are ever ready to join in any demonstration or insurrection against them, if they have any reason to suppose that such a movement is agreeable to the rulers of the city. This feeling found expression in a massacre during Arabi Pasha's rebellion, when the city was bombarded by the British fleet, June 11, 1882, and occupied by British troops the next day.

Next to the Mohammedans the Syrian Catholics are quite strong. The Greek Church is wealthy and influential, but the Coptic community is small and feeble.

Mission work is carried on chiefly by the Missions of the United Presbyterian Church of the United States, who maintain 2 schools, one for boys and a very flourishing and efficient one for girls.

The Kaiserswerth Deaconesses also have a fine school here, opened in 1857. The Bible distribution is under the care of the BFBS. The Church of Scotland has a mission to the Jews in the city carried on by 10 missionaries, men and women, who have 4 schools. The North Africa Mission, the Egypt Mission Band, and the WMS also have stations in this city.

ALGERIA: A colony of France in North Africa, lying on the Mediterranean between Morocco on the west and Tunis on the east, indefinitely bounded on the south by the Sahara. It has an area of about 184,474 square miles, and a population of 7,752,774. About 1,435,000 of the French population numbers 292,461, the Jews 57,132, Tunisians and Moroccans 26,266, Spaniards 155,265, Italians 38,791, and about 25,000 other foreigners. The Algerian Sahara contains about 125,000 square miles and has about 50,000 inhabitants.

The native population is wholly Mohammedan, and consists mainly of Berbers (75 per cent.) and Arabs (15 per cent.). The Roman Catholic Church has 2 bishops and 386 priests. There are in the colony 21 Protestant pastors and 7 Jewish Rabbis. Government grants to the religious establishments are shared by the Protestants in proportion to their numbers. Oran, Algiers and Constantine are the capitals, respectively, of the three districts of the same names into which the colony is divided.

Laws of the colony protecting Mohammedanism as the prevailing religion restrict Christian missionary effort in Algeria. The Protestant missionary societies laboring there are the French Society for the Evangelization of the Nations, the Pioneer Collection Fund for Israel, the Algiers Spanish Mission, Miss Trotter's Mission, the Swedish Missionary Society, the NAM and the PB. Four central towns are the field occupied by these Societies.

ALGIERS: Capital of the French colony of Algeria, North Africa. Population (1901), 96,542. French, 20,000, including Jews, 6,000, who own most of the land in the city, and native Arabs. The town is built in the form of an amphitheater, on an elevation of 500 feet, and, seen from a distance, presents a very imposing appearance, heightened by the dazzling whiteness of its houses, which rise in terraces on the side of the hill. The climate is so equable as to make it a health resort. It is a strong Roman Catholic center. It is the seat of an agency of the BFBS with a Bible depot, colporteurs and Bible women. The North Africa Mission has a station there, with 6 mission-
aries, men and women. Several societies especially devoted to Jewish work also have missionaries there.

**ALIGARH:** City and railway station in the United Provinces, India, southeast of Delhi. Population of city and suburbs (1901), 70,454. There are 7 native and 1 English mission stations. There is a dispensary here. The general work is under charge of a married missionary and his wife, with 31 native workers, both men and women. There are 3 outstations, 10 village schools and about 100 communicants.

**ALLAHABAD:** A sect existing among the Mohammedans of Persia and Turkey. They are known under different names, as Dawudi, Abdulbegi, etc. There is great resemblance between their religious beliefs and those of the Nusairiyeh of Syria, if indeed the sects are not one and the same. They hold their real opinions in secret, while professing before Mohammedans to be strict Muslims, and in their presence conforming to all the rites of Islam. But to Christians they declare their hatred of the Mohammedan prophet and law, and do not hesitate to violate the Mohammedan ritual. Nevertheless, even to Christians they will not reveal their secret doctrines or practices with any particularity. They have no books. The Dawudi division profess to have great respect for the Psalms of David. Apparently this strange religion is but a heathenish conglomerate of Pagan, Mohammedan, Jewish, and Christian superstitions. Its adherents number many hundred thousands in Persia. It is understood that many of them are becoming Babis. Considerable attempts have been made to lead them to Christianity, but with little success. Their gross superstitions and ignorance, with their great fear of the Mohammedan rancor of bigotry, hold them fast in their present deplorable condition.

**ALWAR NORTH:** Town and railway station on the Sabarmati river in Cape Colony, South Africa; mission station of the Primitive Methodist Society, with 4 missionaries of both sexes and 5 native workers. It has an industrial school, 2 theological classes, 2 village schools, and about 1,200 professing Christians.

**ALLAHABAD:** Seat of the Lieutenant Governor of the United Provinces, British India; situated at the confluence of the Ganges, Jumna, and Saraswati rivers; the stronghold of Hinduism, which for centuries has fought successfully in this region against Mohammedanism. The population is (1901) 172,032, Hindus, Mohammedans and Christians, with a large number of less important religious groups. It was the first point in India occupied by the CMS (in 1813). It is now a station of the CMS, the PN, the ME, the Zenana, Bible and Medical Mission, and the Woman's Union Foreign Missionary Society of America. The total force stationed at Allahabad by these societies consists of 37 missionaries and 109 native workers, men and women. The various enterprises which they carry on include a Divinity school, a training school for women, 4 high schools, 3 orphanages, 43 village schools, a dispensary and a hospital. The Bible Societies and the YMCA also make this a center for their work in the Province. The total of communicants connected with the various missions is about 550.

**ALLEN, David Oliver:** Born in Barre, Mass., September 10, 1816; graduated at Amherst College, 1825; graduated at Andover Theological Seminary, 1827; ordained and sailed as a missionary of the American Board for India, June 6, 1827. There he was connected with the mission press for many years. In 1847 an edition of the Marathi, translated by the members of the two missions, was revised by Mr. Allen, editorial superintendent of the American Mission Press, and member of the Committee of the Bombay Bible Society. Dr. Allen was a faithful worker and wise counselor. His services, especially in connection with the press and the translation of the Scriptures, were of great value to the missionary cause. Dr. Allen published a valuable work on India, Ancient and Modern, and was the author of several articles in periodicals. He resided at Lowell, Mass., from 1860 to 1863, and died January 17, 1863.

**ALLEPPPE:** A seaport at the foot of the western Ghats, in Travancore, India. Population, 22,000. In 1816 the CMS founded a station there, principally for the purpose of redeeming the Jacobite community, which had been settled there since ancient times, but had utterly degenerated. In the beginning the undertaking seemed destined to succeed. The Syrians even allowed the missionaries to preach in their churches. But in 1836 a new bishop suddenly broke off all relations with the mission, and the missionaries addressed themselves to the heathen. The mission is now carried on by one missionary and his wife with 26 native workers, men and women. It has 8 schools and a special mission to lepers. The Mission to Lepers in India and the East also has a station and Leper Asylum here. A reform movement originating in the Jacobite Church now promises good results.

**ALLEMEINER EVANGELISCH-PROTESTANISCHER MISSIONSOEREF.** See Germany, Missionary Societies of.

**ALLUR:** Town in the Nellore district, Madras, India. It was occupied as a station by the ABMU in 1873, and has a missionary and his wife and 10 native workers, men and women. It has 5 outstations, 2 preaching places and about 300 church members.

**ALMORA:** Capital of the Kumaun district, United Provinces, India, situated among the Himalayaas, 5,337 feet above the sea, near the frontier of Tibet. Climate temperate, making it a resort for invalids during the hot and rainy seasons. Population is 20,000. It has 33,000 Hindus, Muslims, Europeans. Language, Hindi (Kumauni dialect). Mission station LMS (1850), with 10 missionaries and 48 native workers, men and women. It has 10 outstations, a college, a hospital, 6 dispensaries, a leper asylum, a high school and 18 common schools.

**ALVAY:** Village near the town of Pedro on the north side of the Jaffna peninsual. Connected as a mission station by the WMS in 1880. It has 1 missionary and 23 native workers, men and women, with 6 outstations and 8 primary schools.
ALWAR: A city of 63,000 inhabitants in Rajputana, India, and capital of the native state of the same name. A station of the UFS was established here in 1880. It is occupied by a missionary and his wife and 28 native workers, with 6 common schools and 2 outstations. Also called Ulwar.

ALWAYE: Village in Cochin, S. India, S. E. of Trichur. It is a station of the CMS since 1881 and is occupied by a missionary and his wife, and 21 native workers. There are 3 outstations and 4 village schools.

AMALAPURAM: Town in the delta of the Godavari river, Madras, India, occupied by the Plymouth Brethren as a station with a missionary and his wife and 3 unmarried women.

AMALIENTHEIN: A village in Cape Colony, S. Africa. Mission station of the Berlin Missionary Society (1853). The mission premises were originally presented to the mission by a German lady enthusiastically interested in missions, and her name is perpetuated by the name of the station. The work is carried on by 4 missionaries and 23 native workers, men and women. There is an outstation and there are more than 600 communicants, mostly Hottentots.

AMANZITOTE: Town in Natal, South Africa, situated from Durban; station of the ABCFM which has founded there important educational institutions, including a girls' boarding school, an industrial school and a theological class. It is also called Adams.

AMARWARA: A village in the Chhidwarah district in the Central Provinces, India. The Swedish National Missionary Society has a station there opened in 1886, and now occupied by 4 missionaries and 4 native workers. There is a hospital there and 2 outstations.

AMASIA: A city of about 30,000 inhabitants in the province of Sivas, Asiatic Turkey. It was the birthplace of Strabo, and the capital of the last kings of Pontus, of whose tombs and defensive fortifications there are remains. It lies on the Yeshil Irmaq River, about 60 miles from the Black Sea coast. It is an important trade center. There is a small German colony in the city and a Protestant Armenian community of some vigor connected with the ABCFM. The majority of the inhabitants are Mohammedans.

AMATELE: A village S. of Stutterheim, Cape Colony, S. Africa, where there are 8 outstations and more than 400 church members under the care of native workers connected with the Wesleyan Missionary Society of South Africa.

AMBALA: City of (1901) 78,635 inhabitants on the Punjab railway, and capital of the district of the same name in the Punjab, India. It is on the whole a healthy place of residence. The majority of the population are Mohammedans, but a little more than one-third of the inhabitants are Hindus. Both the Punjabi and Urdu languages are in use.

The PN Society has a station there occupied by 7 missionaries and 19 native workers. There is a hospital and dispensary, special work for lepers, 2 high schools and 4 village schools.

The WMS also has a station here under the care of a missionary and 2 native workers.

Also written Umballa.

AMBALANGODA: Town on the S. W. coast of Ceylon; station of the WMS with 1 missionary and 15 native workers, men and women. There are 3 outstations, 2 preaching places, 5 common schools and 25 church members.

AMBARAWA: Town S. of Samaran in Java; station of Neukirchen Mission, with a missionary and his wife, and 6 native workers and 6 outstations.

AMBATO: Town of Ecuador, South America, S. of Quito; station of the Gospel Missionary Union, with a missionary and his wife and one unmarried native woman; 2 missionary stations.

AMBATOHARANA: A town of Madagascar, near Antananarivo. Has a college founded in 1881 by the SPG and a community of nearly 700 Christians connected with that Society.

AMBATOMAKANGA: A district in the outskirt's of Antananarivo, Madagascar; station of the LMS (1831) with 2 missionaries and their wives and 1 unmarried woman and 292 native workers; 1 high school and 48 village schools, and 3,116 church members.

AMBATOMANGA: A village S. E. of Antananarivo, Madagascar; station of the Paris Evangelical Society, with 1 missionary and his wife and 1 unmarried woman and 99 native workers, men and women. It has 40 native wives and 40 village schools, 1 high school, 1 industrial school, 1 dispensary and 900 church members.

AMBOHIBÉLOMA: A town in the province of Imerina, west of Antananarivo, Madagascar. Mission station of the Paris Evangelical Society, transferred from the LMS after the French occupation of the island. It has 1 missionary and 134 native workers, men and women, 32 outstations, 25 village schools, 1 high school, a dispensary and about 200 communicant Christians.

AMBOHIDRATRIMO: A village in Madagascar, situated about 10 miles N. W. of Antananarivo. Formerly capital of a petty kingdom. Station of the LMS (1901) formed by separating a portion of the Amparibe district, including 40 churches. It now has (1903) 1 missionary and his wife, 350 native workers, men and women, 58 day schools and 5,531 professed Christians, of whom 1,830 are church members.

AMBOHIMAHASOA: A town in the eastern part of Madagascar, north of Ilahara; station of the LMS (1890), with a missionary and his wife and 119 native workers, 40 village schools, 1 dispensary and 1,200 church members.

AMBOHIMANDROSO: A town of south central Madagascar. The neighboring districts are thickly populated, the native population being Betelice. The uneducated people are extremely superstitious, and suspicious. Mission station of the LMS since 1875. There are 8 missionaries and 260 native workers, men and women. There is a dispensary, and a belt of 91 village schools in the surrounding region. The church members number about 1,000.

AMBOHIMANGA: A town N. of Antananarivo, Madagascar, station of the LMS (1862), with 2 missionaries, their wives and 242 native workers, 46 village schools and 2,063 church members. Station also of the SPG, with 1 native worker. Station also of the Norwegian Missionary Society; no statistics.

AMBOHIMIADAN: A town in the western part of Madagascar; station of the Friends Foreign Mission Association. Woman missionary and 187 native workers, men and women, 18 outstations, 1 dispensary, and 475 church members.
AMBRIYM: See NEW HEBRIDES.

AMBUR: Town of 10,000 inhabitants in the Eastern Ghats, not far from the border of Mysore, in the Madras Presidency, India; station of the mission of the German Evangelical Lutheran Synod of Missouri, Ohio, etc.; with a missionary and his wife and 2 native workers and 2 common schools.

AMEDSCOVHE: A town in German Togoland, W. Africa; station of the North German Missionary Society (1889), with 4 missionaries, 3 married women and 25 native workers, men and women, 7 outstations, 11 village schools, 1 college and 358 communicants.

AMERICAN AND FOREIGN CHRISTIAN UNION: The Society was formed in the city of New York in the year 1849, for the uniting of all Christian denominations in the work of the world's evangelization. Its early labors were among the so-called alien populations of our own country, especially in the large cities. It also wrought vigorously in foreign lands, with main reference to giving God's Word and the preaching of the Gospel to those who were in the territories of Roman Catholicism, Italy, Bohemia, Austria, France, Spain, the countries of South America, the West Indies and Mexico were included in its wide field.

As the denominations became more numerous and strong, there arose the not unnatural tendency to conduct their missionary labors through their own denominational agencies. Hence the Society found its resources gradually lessened, and was compelled to limit the field of its work. At present it devotes its energies to the evangelization of France.

The Union owns the site and building of the American Church, 21 Rue de Berri, Paris. The maintenance of that important church is included in the Union's care. It also cooperates with the French missionary societies. At the same time the Union is trustee of the funds raised in this country for the building of an American church in Berlin.

Headquarters: The Chelsea, 222 W. 23d St., New York.

AMERICAN BAPTIST MISSIONARY UNION: The constituency of this society is composed of the Baptists in the Northern and Western States. The Lott Carey Convention (colored), and the German Baptist Churches of North America cooperate with it in several missions.

A. History: The Baptists in America entered heartily into the missionary movement at the beginning of the 19th century, and as early as 1812 had afforded substantial assistance to the English Baptist Mission at Serampur, India. Many of the missionaries of that society had been obliged to go to America, where passage was denied them in the vessels of the East India Company. While their presence and addresses in the United States had aroused much enthusiasm, no organization to promote foreign missions was formed until, in consequence of the loss of the Bible on the passage to India, Mr. and Mrs. Adoniram Judson, and Luther Rice, of the newly organized ABCFM, became Baptists and were baptized at Calcutta. Mr. and Mrs. Judson remained to establish a mission wherever Providence might indicate, while Mr. Rice returned to America in the hope of inducing the Baptists in this country to undertake their support. The conversion of these missionaries to Baptist views was regarded as a Providential indication of the will of God, and the work of collecting funds to support the enterprise was begun under the Union. It entered upon the work of promoting the work of the Baptist churches with enthusiasm. A meeting of delegates representing all sections of the country was called to meet at Philadelphia; and there, on May 18, 1814, was formed the "General Convention of the Baptist Denomination in the United States of America for Foreign Missions." This body was incorporated June 15, 1821, when the words "and other important objects relating to the Redeemer's Kingdom" were added to the title.

From its organization, in 1814, until 1845, this Triennial Convention was supported by the churches of the whole denomination in the Southern as well as the Northern States; but the period, 1840-45, has been one of great excitement and agitation on the subject of slavery, and in 1845, upon the appearance of divergences of view as to the eligibility of slaveholders to appointment as missionaries, the churches in all the Southern States withdrew from the Triennial Convention, and a separate association, with the title of the Southern Baptist Convention, was organized. This action necessitated a reorganization of the friends of missions in the Northern States, which was brought about at an extra session of the Triennial Convention, held in New York City in November, 1845, when a new constitution was adopted, and the new Convention went into operation in May, 1846, under the name of the American Baptist Missionary Union. The enthusiasm of both the November and May meetings was greatly increased by the presence of Dr. Judson, then visiting his native land for the first time since he left it, in 1813. Missions about to be abandoned were reinforced, upon Dr. Judson's earnest pleadings, and new work was entered upon. The debt of the Convention, amounting to $40,000, was paid, and contributions were largely increased.

B. Organization and Constitution: "The single object of the American Baptist Missionary Union is to diffuse the knowledge of Jesus Christ, by means of missions, throughout the world." The Union is composed of missionaries in service, life-members and honorary life-members. It meets annually the fourth Tuesday of May, when its officers are elected, its treasurers, recording secretaries, and the Board of Managers are chosen by ballot. The Board of Managers
composed of 75 elective members, of whom not
more than three-fifths shall be ministers, and not
less than one-third women, to be elected by the
other annual meeting, the Board of Managers
elects its officers and an executive committee of
15 (not more than 8 ministers), whose duties
comprise the management of the entire mission-
ary work of the Union, and the control of the
finances at home and abroad, the latter in
accordance with the instructions and approval
of the Board of Managers.
All the officers and members of the Board of
Managers, the secretaries, and all missionaries
employed by the Executive Committee must
be members in good standing of regular Baptist
churches.
C. Development of Work: 1. Asiatic Missions:
Owing to the fact that, when Mr. and Mrs.
Judson were compelled by the East India
Company to leave Madras, the only vessel in which
they could secure passage was bound for Ran-
gong, the first work of the Baptist Convention
had its commencement in Burma rather
than in India, as was the first intention. The
mission thus started for the Burmese in Rangoon,
in 1813, was gradually extended, and included,
in addition to stations among the Burmese, the
Siamese, the Pwo-Karen, Shan, Kachin, and
Chin races. In 1831 the mission to Siam was
commenced.
In 1835 the Board of Managers were author-
ized by the Triennial Convention to "establish
new missions in every unoccupied field where
there was a reasonable prospect of success.
Accordingly, that same year the Telugu Mission
of India was established, and the following year
work was begun in Assam at the request of the
English Commissioner in that country. The
same year the Bangkok Mission in Siam was
removed to Hongkong, the work being chiefly
among the Chinese. In 1872 a mission was com-
menced in Japan, a mission having been pre-
viously begun in the Lu Chu Islands. In 1884
the Livingstone Mission in Africa was transferred
to the home mission, and in 1900 work was begun
in the Philippine Islands. The Society also
supports or aids Baptist work in France (1832),
Germany, Austria and Bohemia (1834), Den-
mark (1891), Sweden (1855), Finland (1889),
Spain (1870), Russia (1857), and Norway (1892).
The Woman's Baptist Foreign Missionary Society,
Tremont Temple, Boston, Mass., was
organized in 1871 as the result of appeals from
the wife of a missionary in Burma for single
women to work among the women of that coun-
try. In response, a general meeting for women
was convened in Boston, in April, 1871; a con-
stitution was presented and endorsed by the two
hundred women present; the object of the Society,
as stated in the constitution, was "to furnish sup-
port, through the American Baptist Missionary
Union, to Christian women employed by said
Union as missionaries, to teach girls or to
work women, together with the facilities needed
for their work, such laborers being recommended
by this Society." In December of the same year
their first missionary was sent out, and at the
end of the first year they had six missionaries in
the field. In 1903 the mission office numbered
141 auxiliaries, and the receipts were $9,172.
The Home Department consists of a Board of
Managers, meeting twice each month for an
entire day to transact the business of the Society;
this Board is divided into various committees
which meet more frequently. State secretaries
are appointed by the Board, and they in turn
appoint Association secretaries. The Home
Department (1902) includes 253 stations with
37,646 members; 419 young ladies' circles with
5,851 members; 452 junior organizations with
12,705 members. Total receipts, $121,771.26.
There are 78 missionaries on the foreign field,
433 schools with 16,690 pupils, and 134 Bible
women.
The Woman's Baptist Foreign Missionary Society
of the West was organized in 1871 on the
general lines of the other Woman's Society,
working through the ABMU. The first mission-
ary was sent to Burma in December, 1871, and
the receipts for the first year were $4,243. Its
Home Department (1902) reports 17,873 con-
tributors in the senior circles; 62 young ladies'
circles, and 134 junior organizations. Total
receipts, $60,280. It now has 35 missionaries on
the foreign field; 220 schools with 6,771 pupils;
and 100 Bible women.
The Woman's Baptist Foreign Missionary Society
of California was organized in 1875, in
San Francisco, and the Woman's Baptist Foreign
Missionary Society of Oregon was organized in
1878. In 1902 a joint committee of the Mission-
ary Union and the Woman's Societies was
appointed to consider the relation of the latter
to the Union. This committee recommended
that the Societies of California and Oregon be
merged into the Society of the West. This was
accurately done in 1902.
D. The Foreign Missions.
Burm (1813): On being
Dr. and Mrs. Judson went to Madras intending
driven from Bengal by the East India Company,
to find a mission in the Penang Straits. Failing,
however, to find a ship for Penang, they em-
arked for Burma, not wishing to wait at Madras
lest the East India Company should compel
their return to England. They landed in
Rangoon July 13, 1813. In 1816 G. H. Hough
and wife joined them, bringing a printing press
given by the Serampur Mission. June 27,
1819, the Bible convert was baptized, and others
followed. A church was formed. The
Emperor of Burma having died, the brutal con-
duct of his successor brought on the first Burmese
War with England (1824-26). On the capture
of Rangoon by the English in 1821 Mr. Judson
and Dr. Price were arrested and imprisoned.
Captured by the Burmans, their captivity culmi-
nating in the horrors of Oung-Pen-la, from which
they were released only in January, 1826, when the
king needed Mr. Judson's services as interpreter
in the negotiations for peace. The mission
was re-instituted after the restoration of peace,
and supplied with a skilled printer and all
appliances for issuing books and tracts. In 1834 Mr. Judson
completed the translation of the Scriptures
into the Burmese language, and it as well as
the other issues of the Mission Press were
dependently printed in the Burmese language.
The work is still continued, was founded in 1844. After
the death of Dr. Judson in 1852, the extension
of the British possessions in Burma gave oppor-
tunity for the enlargement of the mission. The
station at Rangoon was reoccupied at once, and
in 1854 the mission was removed to a new
site, and in 1857 there were 15 church members who had survived the 16
years of persecution. A general convention of the missionaries in Burma assembled at
Maulmain in 1853, which decided that Burma
missions should be at once permanently estab-
lished in Rangoon, Bassein, Henzada, Prome, Taunggyi and Shwegein; constituted a publication committee for the control of the Mission Press; and in 1854, the distinct Printing House was established in Bassein, by which the Gospel Press, the first missionary establishment, was inaugurated. The publication of elementary books and school-books for the Rangoon schools was started in 1857. The Burmese language was reduced to writing in 1837.

The Chinese language was reduced to writing twenty years later by a Karen preacher from Bassein, who baptized 40 of these wild people. The first Karen mission was not opened until 1865, when Dr. J. U. Cushing, in 1877. Several Karen teachers from Bassein were then sent into the Kachin mountain villages and since then Karens have been laboring among them, wholly supported by the Karens in Bassein. The first Kachin Church was formed in 1882 at Prome. In 1885 the Kachin language was reduced to writing by the Rev. Ola Hansen, who also translated the Gospel of St. John, a catechism and some smaller works. Since then a system of applying the Roman letters to the Kachin language has been adopted by the missionaries, and of the most important events in the history of the Burma missions.

Since the overthrow of the Burmese Kingdom in 1885 and the incorporation of its territories in the Indian Empire, the prospects of the work among the Burmans have materially improved. Work for the Karens was commenced by Rev. and Mrs. George Dana Boardman at Tavoy in 1828. That year Ko-thah-byu, the first Karen convert, also known as the "Karen Apostle," was converted. The first Karen school was formed in 1830. In 1832 the Karen language was reduced to writing and the first book printed. In 1843 the New Testament was printed in Karen, and publication of the Morning Star, a Karen journal, was commenced. The Karen Theological Seminary was inaugurated at Mandalay in 1846, and in 1848 the Karen pastors in the Bassein district assumed self-support. In 1850 a Home Missionary Society was formed, entirely under the direction of the Karens. The Jubilee of the Karen Mission was celebrated at Bassein in 1878, by the dedication of the Ko-thah-byu Memorial Hall, paid for by the Bassein Karens, and set apart for the use of the Bassein Sgaw Karen Normal and Industrial Institute.

In 1883 the entire Scriptures were issued in Pwo Karen. This completed the work of giving the Scriptures to the Karens.

A mission among the Shan, who are very bigoted Buddhists, was established in 1860, by Dr. Bixby at Taunggyi. Ten thousand Shans had been converted, and in 1907 a new church was formed. Bixby arrived there, they having fled from civil war in their own land. It being impossible to enter the Shan country, schools were established for them at Taunggyi, where a small church was soon organized. In 1871 the Gospel of Matthew and a grammar of the Shan language were printed. In 1885 the first edition of the Shan New Testament was published and the entire Bible in 1891.

After the deposition of King Thibaw and the annexation of Burma by the English in December, 1885, Shanziel itself was opened to the missionaries. A station was opened at Hispaw, in the Northern Shan states, in 1890, and at Mon, South of Mandalay, in 1892. In both stations medical work has an important part. The Karens are allied to the Shans and are nominally Buddhists. They are found on both sides of the western Yoma range of mountains, stretching from Arakan to the Naga hills of Assam. Those to the south are divided into 4 tribes using different dialects; those of the north are less known. The first Chin convert was baptized by Dr. Francis Mason at Tavoy, in 1837. The Chin language was reduced to writing in 1828; the Gospel and the Bible, in 1863. The first church was formed in 1885, and in 1890, the first Chin convert was baptized by Dr. Francis Mason at Tavoy.
erty, schools, and the little church of seven members, including the two Telugus, was left in the care of a Eurasian preacher, and the question of abandoning the Telugu Mission was again raised. Mr. Clough, however, recovered his health and, with Rev. Lyman Jewett, returned in 1845. The next five years were full of struggle. In 1853 a deputation sent by the Society to examine the Asiatic Missions having visited Nellore, advised that the mission be either strongly reinforced or relinquished at once. The workmanship of the ABMU threw the responsibility on the denomination, as represented in the annual meeting, which decided to reenforce and continue the mission. Other difficulties having arisen, in 1862 the question of abandoning the mission was again raised. The missionary map, always in view at the annual meetings of the Union, had upon it a number of red marks to indicate the stations in Burma. These marks looked like a cluster of stars, while across the Bay of Bengal there was one lone star, indicating the sole station of India, and at one of the meetings, when the question of abandoning or reenforcing this mission was under discussion, it was spoken of as the "Lone Star Mission." Dr. S. F. Smith, author of "My Country, 'Tis of Thee," wrote that night a poem picturing in place of the one star, a glorious constellation in that region. The prophecy has been fulfilled. In 1894 the working force was increased by Rev. J. E. Clough, the Missionary for Ongole. The following year four Telugus were baptized and from that moment fruit from the long period of seed-sowing began to appear. At the end of another decade there were nearly 4,000 baptized converts in that mission field. Then came a time of trial; famine, flood, cholera, and another famine was a terrible. The missionary were the new converts tried, but neither their faith nor the faith of the missionaries failed. During the period of famine the missionaries deemed it wise to put off all baptisms until the work of distributing relief was over. Then began another period. In September 9,147 were baptized, 2,222 in one day. The work went steadily on, and in December, 1890, another revival occurred, when 1,671 persons were baptized in one day and during the following five months nearly 10,000 were baptized at the various stations.

There are (1903) 26 stations and 388 outstations in the Baptist Telugu Mission, 99 American missionaries and 1,008 native workers; 116 churches with 54,995 communicants; 1 theological school with 149 students; and 549 other schools with 10,664 pupils.

IV. Missions in China: In 1853 Rev. J. T. Jones, of the Burma mission, in consultation with his associates went to Bangkok and turned his attention to the translation of the New Testament and the creation of a Christian literature. Altogether his work was in the Siamese language, the first converts in Bangkok were three Chinese. From the first the work among the Chinese was more promising than that for the Siamese, and on the arrival of reinforcements one of the missionaries removed (in 1842) to Hongkong and another (in 1846) to Foochow.

The mission at Bangkok has not been largely successful in itself. But through the Chinese converts in Bangkok an entrance to the people of China was secured before that Empire was open to foreigners. It is continued as a part of the enterprise of evangelizing China.

The first Baptist Church in China was formed in the Portuguese colony of Macao and the first convert was baptized in 1837. In 1843 the second Baptist Chinese Church was organized at Hongkong. In 1846 it was decided to remove the mission to the mainland and Swatow was chosen as the central station. In 1881 a branch of the Swatow mission took up work among the Hakka and the Min. Stations have been established in several centers in the Swatow region. The work of the Baptist Southern China mission embraces 5 stations and among other enterprises it includes a biblical school for preachers, a training class for Bible workers; Bible translation of high schools; general dispensary and hospital work and a medical class for students.

The Eastern China Mission of the ABMU was begun at Ningpo by J. D. Macgowan, M. D., in 1813. A hospital was opened and the good will of the people was gained. In 1857 the history of the four decade of difficult cases. The first convert in this field was baptized in 1849. Gradually the force was increased until the mission now has 5 stations and about 800 church members.

Rev. Josiah Goddard did important work in translating the New Testament into the Ningpo dialect, and his son, Rev. J. R. Goddard, was the chief translator of the Old Testament, which was put into Roman letters in 1901.

A boys' boarding school was opened about 1880 by the American Mission in Shanghai; Bible translation and high schools; general dispensary and hospital work and a medical class for students.

The Western China Mission was begun by W. M. Upright, formerly agent for the BFBM, and Mrs. George Warner in 1889. The first station was Haikou, in the province of Sze-chwan. When the first year seven men; elders were baptized. Medical work was begun by Mrs. Warner in 1891. Two new stations were opened in 1894. The following year the Sze-chwan riots occurred; the missionaries were obliged to flee, and the mission premises were totally destroyed. Operations were gained by the wicked treatment and hope was large for continued expansion of the work, when the Boxer Movement of 1900 swept through the land and the missionaries were obliged to flee and the mission property was again destroyed. Many foreigners and native Chinese were massacred. The work was resumed in 1901 and increased opportunities are everywhere manifest.

The Central China Mission was commenced in 1893 at Han-yang-fu by Rev. and Mrs. J. S. Adams of Rev. and Mrs. W. F. Gray. In 1895 the First Baptist Church was organized. Medical work was begun in 1897 by Rev. G. A. Huntley, M. D., and each year has witnessed a steady growth. In 1902 a mission hall and dispensary were erected and the new Metropolitical Tabernacle of the Baptists in mid-China was erected and dedicated.

There are (1903) in the southern, eastern, western and central China Missions 15 stations and 202 outstations; 77 American missionaries and 232 native workers; 85 churches with 3,870 communicants; 2 theological schools with 49 students; 6 high schools and 1 college with 313 students and 55 other schools with 531 pupils.

V. Missions in Japan: Jonathan Goble was sent to Japan by the American Baptist Free
Mission Society in 1800, where he labored for his own support in part until 1829, when the
First Baptist Missionary Society became a part of the ABMU,
which assumed Mr. Goble's support and appointed
Rev. Nathan Brown as their first missionary. To
him the Japan mission largely owes its early development.
The first Baptist Church in Japan was organized at Yokohama in 1858 with eight
members who had been converted in the languages
opened in 1876. In 1878 Kobe was occupied, and
Sendai in 1882. In 1886 a station was
opened in Shimosa, in Southern Japan, but
the mission headquarters were later transferred to Chofu. In 1901 native helpers were sent from
Kobe to work among the people of the Lu Chu
Islands, locating in the city of Naia. Osaka was
occupied in 1882, Mito in 1899 and Otarun in
1902. The progress in all these stations has
from the first been steady and substantial.

Lamentations (1903); missions) ended for stations;
58 American missionaries and 137 native workers,
30 churches, with 2,157 communicants; 1 theological
school with 19 students; 5 boarding and
high schools with 332 students; 6 other schools
with 313 pupils.

Missions to Africa; Liberia: The Triennial
Baptist General Convention was disposed very
early to aid the African Baptist Missionary
Society in planting a mission in Africa in the vicinity
of the present republic of Liberia. That Society
had sent missionaries to Liberia in 1821. But
the unusual difficulties of the field and the
mortality among its white missionaries led the
ABMU to suspend its mission there in 1856.

Congo: Henry M. Stanley, after crossing Africa,
appeared at Boma, near the mouth of the Congo,
August 7, 1877. When news of his feat reached
England, it caused a desire to begin mission
work in this hitherto untouched region. The
responsible management of the new enterprise
was placed in the hands of Mr. and Mrs. H. Grat-
tan Guinnness. The first missionaries of this
"Livingstone (1903); mission" sailed for the
Congo in 1878, and by 1883 six stations had been
established, extending from the coast to the head
of Livingstone Falls. A steamer for the naviga-
tion of the Upper Congo was launched on the
Pool, in November, 1884. The staff then con-
sisted of 20 missionaries; one of the languages
had been reduced to writing; a grammar and
dictionary had been published and a hopeful begin-
ning made in various lines of missionary activity.
At this time the mission was transferred to the
care of the ADU. In August, 1886, began the
remarkable revival at Bansa Manteke, known as
"the Pentecost on the Congo," and in November
of that year the first church on the Congo was
formed with 42 members by the Rev. Henry
Richards, after seven years of apparently fruit-
less labors. A training school for native evangel-
ists was opened at Bansa Manteke, and other sta-
tions speedily founded. At every point the suc-
cess at Bansa Manteke has been duplicated in
smaller degrees. From 1890-97 the progress of
the work was hindered by difficulties between the
natives and the Congo State officials. Largely
through the intervention of the missionaries, how-
ever, the troubles were settled, and since then,
with increased facilities for communication,
openings for aggressive missionary work have
steadily multiplied.

There are (1903) 8 stations and 98 outstations;
33 American missionaries and 217 trained Chris-
tian native workers; 8 churches with 3,104 com-
municants; 1 theological school with 20 students;
5 boarding and high schools with 36 students;
10 other schools with 360 pupils.

VII. Philippine Islands Mission: The interest of the American Baptists centers in the Visayan
group of islands. Rev. Eric Lund, for 20 years
a missionary of the ABMU in Spain, was chosen to
open the work. Early in 1900 Mr. Lund arrived
in Iloilo, the island capital, and organized
by Señor Branlio Manikan, a young Visayan who
had been sent from the Philippine Islands to
Spain to be educated for the priesthood, but
had been converted at Barcelona, in the mission under
the care of Mr. Lund. A special interdenomi-
national agreement the district north from Iloilo
on Panay and the western provinces of Negros
became the distinctive field of the Baptists, and
Jaro, which is an important trade center, was
chosen as the headquarters for the work. Reen-
forcements came in 1902 and 1903, and in June, 1901, a
church of 43 members was organized at Jaro. Tracts
and leaflets were distributed by the thou-
sand, a religious newspaper was founded, and
the work continued with accelerating movement.
In Negros, as in Panay, the work reached from
the central town and then into the country. Already
a remarkable company of native leaders
has been raised up, and the work has everywhere
developed with marvelous rapidity. While the
educated classes are friendly, the work is mainly
among the peasants. Medical work was begun
in 1902 and proved an important factor in gaining
all classes of the people. Persecution has been
severe, and as a result some 8,000 people have
left their villages and established a Protestant
town on the mountain side, calling it Calvary.
There are (1903) 2 stations and 5 outstations; 11
American missionaries and 7 native workers, and
3 churches with 372 communicants.

VIII. European Missions: European missions
were not contemplated in the original purpose of the
Triennial Convention. Aside from a few
points on the western frontier of the United
States, where domestic missions were maintained
for a few years, and a mission to the North
American Indians, the founders of the Conven-
tion thought of missions to the heathen as the
only ones within their scope; and when the
way was opened for missionary work in Europe,
a distinction was soon established between mis-
sions to lands where the Greek or Roman Cath-
olic is the State Church, and those where Protes-
tantism prevails. Thus, missions to France
(1832), Greece (1856), and, later, Spain (1870),
were conducted as foreign missions, and mis-
sionaries were sent to them from the United
States, their work to be supplemented, as in Asia,
by native preachers; while the missions in Ger-
many (1834), Sweden (1834), and in other Protes-
tant countries were from the first prosecuted
by native preachers, the Convention exercising
only a general superintendence, and rendering
counsel and financial aid when necessary.
The work of the ABMU in France dates from
1832, and was the result of the report of a com-
mittee sent by the Union to investigate the need
and opportunity for missionary work in that
country. Under Louis Philippe, the American
preachers were not molested, the native pre-
achers were arrested. Progress was slow, altho the
Rev. Reuben Saillens, associated with the
TeAll Mission, gave much assistance. Since
1891 Mr. Saillens has devoted himself specially to
the work, and great advance has been made,
and 31 preachers, 20 churches, and 2,409 members are reported (1903).

Baptist work in Germany was inaugurated by the baptism, by President Barnes Sears of Brown University, of seven men at Hamburg (1854). One of these, Johann Gerhard Oncken, the first president of Edenburg Bible College, and a bookseller, became the leader of the Baptist movement in Germany. Every effort was made by the ecclesiastical and civil authorities to stop the work. The leaders were imprisoned and fined, but the work progressed and extended rapidly. Edenburg Bible College (1902) reported (1902) in Germany, 203 preachers, 231 churches, 41,552 members; in Denmark, 40 preachers, 29 churches, 3,928 members.

The Missionary Union has had no American missionaries in Germany, tho Dr. Bickel and some others had been pastors here; but it has sustained a part of the missionaries aided in building chapels and houses, helping the theological seminaries, etc., especially in their missionary work in Austria, Hungary, Romania, Bulgaria and East Switzerland. Emigration has carried off large numbers of their members, who would do so still, but they show a fair net increase.

The Baptist work in Russia was commenced as a mission enterprise from Germany in 1851, at the same time as work in Lithuania and the Silesian Mountains. Progress was rapid notwithstanding severe opposition, and in 1888 the Russian churches hitherto included in reports from Germany were set apart. There are (1902) 117 preachers, 108 churches, 22,244 members; and in Finland 12 preachers, 34 churches, 2,138 members.

On the ship that carried Messrs. Colman and Wheelock to Burma (1817) were several Swedes and Norwegians. Some of these were converted and commenced work in their homes. Other sailors were converted in New York and Hamburg. One was ordained and a church was organized in Gothenburg in 1848. Soon after the Rev. Andreas Wilberg, a well known scholar of the Lutheran church in Sweden, joined the Baptist community, others of influence were added, and, by the help of the American Baptist Publications Society and the ABMU, the work has progressed until the year (1902) in Sweden 764 preachers, 568 churches, 42,011 members, and in Norway, 16 preachers, 35 churches, with 2,707 members.

In 1870 the ABMU adopted a work commenced in Spain a few years earlier by Prof. W. J. Knapp, an independent missionary. The work has not progressed rapidly. There are 4 preachers, 4 churches, and 135 members.

Summary: The Society was organized in 1814 with two missionaries in the foreign field, and with but a single convert from heathenism in 1819, had in 1840, 97 missionaries, 68 churches, 44 schools, and more than 2,900 baptized believers; and an income of $56,948.42. In 1870 the number of communicants had grown to 48,763; the force of missionaries was 127; the income amounting to $217,510.56. In 1902 478 missionaries of the Union were laboring in 7 heathen countries and preaching the Gospel in more than 25 languages. The converts in heathen lands alone numbered 111,650, organized into 1,003 churches, of which 968 were entirely self-supporting. In heathen lands there were 1,473 schools of all grades with 97,588 pupils, 2 colleges and 7 theological and Bible schools for the training of a native ministry. The receipts from all sources (1902) reached $624,713.79 and the average annual income for the previous five years was $653,777.

Periodicals published by the Society and Auxiliaries: The Missionary, 5 times a year (for foreign people); The Baptist Missionary, 5 times a year (for American people); David, 5 times a year (for young people and schools); The Baptist, 5 times a year (for young people); The Chinese Missionary, 2 times a year (for Chinese people).

General Literature: Smith (S. F.), Missionary Sketches, Boston, 1863; Robinson (R.), Mission Work in Sweden, 1884; Downie (I.), The Lone Star (the Texas Mission), Philadelphia, 1893; Saillens (L.), Au Pays des Peuples, Histoire de la Première Société Missionnaire, Paris, 1895; Titterington (Mrs. B.), A Century of Baptist Missions, Philadelphia, 1901; Jubilee Conference of ABMU Mission in Assam, Calcutta, 1887.

American Bible Society: Headquarters, Bible House, Astor Place, New York City, U.S.A.

Undenominational, representing all the evangelical communities of the United States. Combines both home and foreign work.

Historically, and since the adoption of Independence, the American colonies of Great Britain had been dependent on the mother country for all their English Bibles. The hostilities which ensued cut off the supply of books printed in London, and a memorial was addressed to the Continental Congress urging the necessity of the taking the publication of an edition of the Scriptures. The committee to which the matter was referred, after consultation with printers in Philadelphia, reported that the cost of an edition of the Bible would exceed $10,000, and that neither the type nor the paper could be procured in this country, but recommended the purchase, at the expense of Congress, of 20,000 copies in Holland, Scotland, or elsewhere. During the next thirty years private enterprise did much to meet the immediate wants of the nation, but failed of course to reach the homes of indifference and poverty.

The British and Foreign Bible Society was organized in 1804 at London, and its first foreign edition of the Scriptures was The Gospel of John (2,000 copies), in Mohawk and English. This was followed by efforts to secure an organization in America which resulted in the formation of the Philadelphia Bible Society in 1809. Similar societies were also formed in Connecticut, Massachusetts, New Jersey and New York, all with the well-defined object of the Society "to open the doors of knowledge to every destitute family within the immediate circle of their direct influence, and through the thinly settled regions on the frontier.

Samuel J. Mills, one of the four who, at the haystack prayer-meeting at Williams College, gave the impulse that resulted in the formation of the ABCFM, after his graduation from Andover Seminary in 1812 made two tours of investigation, and his report that the number of families found without the Bible far exceeded all expectations raised a deep conviction that some more efficient means must be found for meeting the want.

Early in 1816 Elias Boudinot, President of the New Jersey Bible Society made a public communication in favor of a national Bible movement. The New York Bible Society followed this with formal action, resulting in the calling of a convention, which met May 8, 1816, in the consistory of the Reformed Dutch Church in Garden Street, and organized the American Bible Society. Thirty-five local organizations united in this action, and eighty-four became auxiliary to it during the first year of its existence.
In the earlier years the offices of the Society were in the lower part of New York, but the great increase of work necessitated better accommodations, and in 1853 it took possession of its present quarters. The outlay involved in this building was provided for by individual subscriptions made for the purpose and by rentals received after its completion, no funds raised for publication and distribution being invested in it.

Constitution and Organization: The American Bible Society is incorporated under the laws of the State of New York for the purpose of publishing and circulating the Holy Scriptures without note or comment. It is required by its by-laws to put the prices of all its publications as low as possible, and practically sells them at lower prices than would be charged if all the ordinary elements of cost were taken into account.

The business of the Society is conducted by a Board of Managers consisting of thirty-six laymen, residents of New York or its vicinity, one-fourth of whom go out of office every year, but may be reappointed for any number of terms, who has been a life-member by the contribution of thirty dollars is entitled to be present and vote at the monthly meetings of the Board, with all the power of an elected manager. The executive officers are three corresponding secretaries: the treasurer; district secretaries employed in the United States, while the foreign work is chiefly under the care of specially appointed agents. A large number of Auxiliary societies are in close relation with the National Society, and are expected to see that their own districts are well supplied through depositaries, colporteurs, or voluntary agents, and to donate any surplus to the National Society for the general work. Until 1874 the Society had only two special agencies, in the Levant and La Plata. That number has been increased, until now it has its own representatives in Brazil, Central America, China, Cuba, Japan and Korea, La Plata, The Levant, Mexico, Philippines, Porto Rico, Siam and Venezuela. These agencies are, of some them, quite large, and have the charge of the translation, publication and distribution of Bibles, as well as of their distribution, chiefly through colporteurs. It also acts through the various missionary societies that naturally look to it as an American organization for assistance in their Bible work, or through other local Bible societies—e.g., the Bible Society of France. This action takes the form of grants of Scriptures when the versions used are published by the Society, and of sums of money for expense of colportage or printing or purchase of Scriptures not published by the Society.

In the foreign field the aim is always to work in complete harmony with other organizations of whatever kind that have the same end in view. Whether at home or abroad, it is the conviction of the Society that the best results are reached by no other method than by free distribution. This does not preclude special grants, but such are discouraged rather than encouraged.

Versions and Translations of the Bible Circulated: As early as 1818 plates of the New Testament in Spanish were procured for the Spanish-speaking nations of America, and at the same time provision was made for giving the printed Gospel to some tribes of North American Indians. Others followed, until the whole number comprises more than eighty languages and dialects. Many of these have been printed on the Society's own presses, or immediately at its own expense, while others have been printed or purchased by means of grants to missionary societies.

A large portion of these have been prepared at the expense of publication having been assumed by the Bible Society. Within the first seven years $37,000 was thus expended. The establishment of distinct foreign agencies has lessened the amounts paid among them all stands the Arabic version, prepared at the sole expense of the American Society, and which is recognized by scholars everywhere as one of the finest versions of the Bible in existence.

Development of Foreign Work: It was natural that the attention of the Society should be directed to the Spanish colonies of America. In 1818 plates of the New Testament in Spanish were procured, and a few years later a special report in regard to Mexico led to the sending of supplies of Scriptures to that country. South America also was visited about the same time by an exploring expedition sent out by the American Board, and in 1833 the Bible Society sent a special representative to report on the conditions along the west coast. No continuous work was done, however, beyond the making of grants to the missionary societies, until 1854, when a regular agent, Mr. Andrew W. Milne, was placed in charge of the La Plata field.

The development of missionary work in other parts of the world was not overlooked, and grants in aid of versions and for the distribution of Scriptures were made in many countries. In 1836 the Rev. Simeon H. Calhoun was appointed to represent the Society in Syria, but he served only a few years, and it was not until 1854, when the Rev. C. N. Righter was sent to Constantinople, that the Levant Agency was fairly inaugurated. In 1876 there was a new impulse given to the work by the sending of the Rev. Luther Halsey Gulick, M.D., to China and Japan, and of the Rev. A. L. Blackford to Brazil. It was not long before Dr. Gulick realized that the field was too large for one man, and he devoted himself to China, leaving Japan, with the subsequent addition of Korea, to form a separate agency. From that time the advance was rapid. Special agents were appointed in 1878 for Mexico; 1882 for Cuba; 1885 for Venezuela; 1886 for Colombia; 1888 for Siam and Laos; 1892 for Central Africa. The opportunities opened up by the war with Spain were promptly met; both as regards the
needs of the army and of the newly acquired provinces; and special agents were commissioned to Porto Rico and the Philippines.

In this general development, as was inevitable, the Society's work has frequently come into close relations with that of the British and Foreign Bible Society. In some cases the latter has even arranged a division of territory; in others, a combination of forces; while in others the two great societies have worked side by side, each realizing that there was work enough for both.

Statement of Foreign Work: South America: The American Bible Society has three agencies in South America: the La Plata, Brazil, and Venezuela and Colombia. The La Plata agency covers all of South America not included in the other two, especially Argentina, Uruguay, Paraguay, Ecuador, Peru, Chile and Bolivia. The Rev. Andrew W. Milne is still in charge (1903) after nearly forty years of service, with his headquarters at Buenos Aires, Argentina. The language used is chiefly Spanish, though there are versions of portions of the Bible in some of the Indian dialects, notably the Quichua and Aymara. The Bible has had from its inception to contend not only with the bitter hostility of the Roman Catholic priesthood, but with the opposition of the new governments to every form of evangelical work, which, however, is changing to a more favorable attitude. The following summary by decades shows how vigorously the work has been prosecuted:

The Brazil Agency is distinct from the rest of South America on account of the use of the Portuguese language. The work of Bible distribution from the headquarters at Rio de Janeiro is rendered easier than in the La Plata agency by the railways recently built and by the river navigation; but the general conditions are much the same: hostility on the part of most of the ruling class (with a few notable exceptions), as well as of the ecclesiastics; and absolute indifference on the part of the people. Experts, however, shows advance, and the total (1902) of 330,772 volumes distributed since 1876 shows the seed sown.

The Agency for Venezuela and Colombia, which has its headquarters at Bucaramanga, Colombia, is probably the most difficult field occupied by the Society. The continued revolutions, with the consequent disturbance of economic and social conditions; the rigid censorship, making it impossible for the agent to report fully and freely, have (1902) hampered severely. Yet, even under such conditions, more than 90,000 Scriptures were circulated in thirteen years; and with the establishment of peace and the opening of the Panama canal, great advance is looked for.

Central America: This agency covers all the States of Central America. In some cases it has its headquarters at Guatemala City, Guatemala. The present agent (Rev. F. G. Pensotti) had a long and most trying experience in Bible work in South America, and the circulation of over 94,000 volumes in nine years, mostly in Spanish, is witness to his success.

Mexico: From his headquarters at Mexico City, the agent of the Bible Society superintends the work both in Mexico and along the frontier in Texas. In no agency has there been more of individual labor, and special reference should be made to the work of Miss Melinda Rankin on the Texan border in 1852 and later. The circulation is chiefly in Spanish, and during the twenty-three years from the founding of the agency, numbered over 408,300 volumes.

Cuba and Porto Rico: The headquarters of these two agencies are at Havana and San Juan. The circulation in both is chiefly in Spanish and amounted in Cuba in nineteen years to 98,000 volumes, and in Porto Rico in three years to about 10,000, while in 1902, as many more were circulated.

The Levant: The prominent part taken by American missionary societies in the Levant has marked it from the first as a special field of the American Bible Society. The agency was at first some years delayed in extent, but initiated in general the entire Turkish Empire, in Europe, Asia, and Africa, with Greece and Persia, while a general superintendence of southern Russia and the Caucuses was conducted from the headquarters at Constantinople. The不愿意seed

One characteristic feature of this agency is that the great majority of the Scriptures distributed in it are manufactured at the Bible House, Constantinople, and the Presbyterian Mission Press at Beirut. The work done at both places compares very favorably with the best work in the United States. Special versions have been prepared, some of them of the whole Bible, as the Arabic, Turkish, Armenian, Bulgarian; others of portions in special dialects. These have been printed in numerous editions to suit the taste of every class of men, from the Turkish or Christian ecclesiastic to the poorest day laborer. The total circulation of nearly 2,000,000 copies has been almost entirely by sale, the prices, however, being placed within the reach of the people, with comparatively little regard to the cost of the book. Thus a Bible in plain binding, which costs the Society $2 for printing and binding alone, is sold for 60 cents.

In Persia, the British and Foreign Bible Society occupies the southern portion of the field, and the American Society's work in Northern Persia is conducted through the Presbyterian Mission. China: The first regular agent of the American Bible Society to China was Rev. Luther H. Gulick, M.D., who was appointed in 1876. A son of a veteran missionary to the Hawaiian Islands, and himself connected with mission
work in Micronesia, and afterward in Italy and Spain, he proved admirably adapted to the work of organization that devolved upon him. But work in the Tagalog was also at first included with China under Dr. Gulick’s care, but was, in 1881, made a distinct agency, and Siam was added, but was itself also made independent in 1889.

The flexibility that has marked the conduct of the Society illustrated in China, where the entire agency is divided into six colporteur districts, each under the care of a foreign superintendent to whom the native colporteurs report, while the general agent has his headquarters at Shanghai.

As was natural, the first efforts of the agency were put forth in the line of Bible translation, and as fast as portions could be prepared they were offered for sale. The number of copies sent out from two of the three presses during the first year was 39,371, of which over 33,000 were portions. This number was nearly doubled the next year, and in 1901 the total circulation was 428,927, including 12,341 Bibles, 32,334 Testaments and 384,252 portions; and this was a considerable falling off from the previous year owing to outbreak.

The work of translation still continues, the different missionary societies uniting with the British and Foreign, Scotch National, and American Bible Societies to secure as great uniformity and accuracy as possible. The manufacture is carried on at Shang hai, Peking, and Shanghai, but also at Fuchau and at Yokohama, in Japan. A conception of the work will be gained from the following table of publications in 1901:

Total: 273,700 46,102,000

An interesting and significant fact in Bible work in China was the interest taken in it by the young Emperor and the preparation and presentation to the Empress Dowager of a magnificent copy of the Scriptures in 1899.

Japan and Korea: On receiving information in 1872 that a Japanese version of some of the Gospels was nearly complete, the Society promptly made a grant to promote its publication. It subsequently assumed the support of Drs. S. R. Brown and D. C. Greene, and bore a considerable part of the expense of translating the New Testament, which appeared in part and was completed in 1880. The next year Japan was made a separate agency, and was so conducted until 1890, when the narrowness of the field and the peculiar intermixing of interests led to an arrangement between the American Bible Society, the British and Foreign Bible Society, and the National Bible Society of Scotland to act in union, appointing the territory between them, and acting under a general Bible Society’s Committee consisting of six missionaries appointed by the American Bible Society, the British and Foreign Bible Society and two by the National Bible Society of Scotland. The American Society is represented by an agent residing at Yokohama. The work done is indicated by the figures of circulation in 1901: 3,935 Bibles; 27,615 Testaments, 10,372 portions; total, 49,922.

It is notable that nearly one-third of the Bibles and Testaments were in English. Of the total, about one-half was assigned to the American Society.

The work in Korea, under the general care of the agent at Yokohama, is as yet not fully organized. The work of translation is still going on and the distribution is for the most part under the care of the missionaries.

Siam and Laos: Bible work in Siam was for many years carried on by the missionaries of the PN under the general direction of Dr. Gulick; but as the work enlarged both in China and Siam, a division became necessary, especially as the advance included the Laos people on the north. The headquarters of the agent are at Bangkok, where also most of the printing is done. From the organization in 1890 to 1902 the circulation was 282,954, the last year showing 37,216, an advance of 5,484 over the previous year. Of these, the great majority, 32,521, were Siamese, 3,615 Chinese, 942 Laos, the remainder Tamil, Cambodian, Malay and English.

Philippine Islands: This latest agency of the Society was established in 1899, and covers the entire archipelago. The agent’s office is in Manila. The circulation for the first year was, naturally, small, but the second year rose to 52,793, and in 1902 to 91,260. The New Testament in Tagalog has been completed by the BFBS, which had commenced the translation before the outbreak of the Spanish War. As yet only the Gospels have been translated into Tagalog and Ilocano, but the work is going on at a rapid speed. The printing is done in Japan.

The total issues of the Society for the year 1902 were 1,993,558, of which 734,619 were distributed in the United States (including Porto Rico and Hawaii), and 1,258,939 copies in foreign lands.

The Society has issued a few hundred copies of the Scriptures in 87 years amounting to 72,670,783 copies.

The Bible Society Record, an illustrated monthly, is the Society’s official organ.

AMERICAN BOARD OF COMMISSIONERS FOR FOREIGN MISSIONS:

I. History: In 1806 Samuel J. Mills, with three other students of Williams College, fled for refuge from a thunder storm to the shelter of a hay-stack, and while waiting there pledged themselves to the work of foreign missions. Later they entered Andover Theological Seminary. In 1810 Samuel J. Mills, Gordon Hall, Adoniram Judson, Samuel Newell and Samuel Nott, students in the Seminary, conferred with the faculty, and a number of prominent ministers, in the home of Professor M. Stuart, and were counseled, Go in the name of the Lord, and we will help.” The next day two of these ministers, Drs. S. Spring and S. Worcester, outlined a plan for organizing the American Board of Commissioners for Foreign Missions, which three days later, on the twenty-ninth of June, was adopted by the General Association of Congregational Churches of Massa-
chusetts at Bradford, Mass., and on September 5, 1810, at Farmington, Conn., a constitution was adopted and officers were elected. Dr. Worcester, the first secretary, prepared an address to the churches, and every effort was made to arouse interest in the new enterprise. The following year (1811) Judson was sent to England to confer with the London Missionary Society as to the advisability of cooperation, but the distance between the two organizations was deemed to make this inadvisable and he returned. In September of the same year Burma was selected as a promising field for the first enterprise of the Board. Owing to financial straits, it seemed unwise to attempt anything beyond what the actual cash on hand would warrant, and at a meeting of the Prudential Committee, January 27, 1812, there was at first but one vote—probably Dr. Worcester's—in favor of pledging the support of the men already appointed, but that one vote carried the day. It was decided to trust God, it was His work, and go forward, believing that the funds would be obtained. From this principle the Board has never departed.

By a special effort six thousand dollars was collected, and on February 6, 1812, Messrs. Judson, Hall, Newell, Nott and L. Rice were ordained at Salem, Mass., and before the end of the month Messrs. Judson and Newell, with their wives, sailed from Salem, and Messrs. Hall, Rice and Nott, with Mrs. Nott, from Philadelphia, for Calcutta.

The work thus being fairly inaugurated, the next step was to secure a charter from the Massachusetts Legislature. This met with some opposition, but at length on the 20th of June, the charter was granted, and the American Board had a legal existence.

It is doubtful whether the founders of the Board anticipated the support of other than Congregational churches, but at its second meeting in 1811, a proposition was made to the General Assembly of the Presbyterian Church for the organization of a similar society with which the Board might cooperate. The Assembly declined to do this, but recommended the Presbyterian churches to work through the American Board. Accordingly at the next meeting of the Board, in 1812, eight commissioners were added to represent the Presbyterian Church. In 1814 the number of Commissioners was increased by one number from the Associate Reformed Church, in 1816, by one from the Reformed (Dutch) Church, and later one from the Reformed German Church was added to the Board.

In 1825 a proposition was made by the United Foreign Missionary Society (Presbyterian), formed in 1817 for work among the Indians, for union with the American Board. This was cordially endorsed by the General Assembly, and for twelve years the Board represented officially the Presbyterian Church. In 1837, on the separation between the Old and New Schools, the former withdrew from support of the Board, and adopted the Western Foreign Missionary Society, formed in 1812, as their own organization. The New School branch of the Presbyterian Church continued to work with the American Board until 1870, when they withdrew to support the Board of Foreign Missions of the reunited Presbyterian Church. In 1857 the Reformed Dutch Church established its own Board; the next year the Associate Reformed Presbyterians became a part of the United Presbyterian Church, and formed for a distinct work; and in 1865 the Reformed German Church did the same, so that since 1870 the Board has practically represented Congregationalists alone.

The ABCFM now (1862) has in the different fields an aggregate of 549 American missionaries, 3,581 trained Christian native workers, 524 churches with 55,645 communicants, 14 theological schools, 118 boarding and high schools, with 10,895 students, 1,134 other schools with 46,149 pupils. Contributions from missionary fields in the year ending in July, 1862, were $167,512; in America, $677,593.83; total receipts, $845,105.85.

Coordinate with the growth of the Board itself has been that of its great auxiliaries, the three Woman's Boards. As far back as 1812 several missionary associations of women aided the ABCFM, and these were gradually so systematized that in 1839 there were no less than 680 with nearly 3,000 local agents.

In 1868, the Woman's Board of Foreign Missions was organized, auxiliary to the American Board. For the first the formation of an interdenominational society was contemplated. On the first Tuesday of January, 1868, about forty ladies met in Boston, and a proposition of the American Board for cooperation with it was submitted to them, and a resolution was adopted "to cooperate with the American Board in its several departments of labor for the benefit of our sex in heathen lands." Committees of ladies were appointed to prepare a constitution and list of officers; and on the ensuing week, at the same place, the New England Woman's Foreign Missionary Society was organized.

By the special request of leading members of other denominational Boards, and in accordance with the original plan of union of evangelical sects, the first article of the constitution was adopted as follows:

"The object of this Society is to engage the earnest, systematic cooperation of the women of New England, with the existing Boards for Foreign Missions, in sending out and supporting unmarried female missionaries and teachers to heathen women.

While there was to be union under the organization, in conference, prayer, and the home department of work, the treasurer was to keep a denominational account, crediting each religious body composing the union with the sums received from its constituents, and paying its aggregate amount to the Foreign Missionary Society with which it was connected.

In September of the same year the constitution was altered, and the work of the Society was limited to the fields of the American Board. The restriction of work to New England was also removed, by changing the name to The Woman's Board of Missions, whereby ladies in any part of the land in sympathy with the American Board could become auxiliary to its work.

The following year the Woman's Board was incorporated by the Legislature of Massachusetts. Auxiliaries were formed among the women of the churches, and these were gathered into "Branches" having regularly appointed officers, constitutions, etc., each comprising not less than 20 auxiliaries and mission circles.
During the first year the support of 7 missionaries and 11 Bible women was assumed. The field of work has been extended gradually until the support of all single and some married women, of girls' boarding and day schools, of primary schools in part, of kindergarten work, and of all Bible women laboring in the fields of the ABCFM is now provided by the Woman's Board, which also sustain an extensive medical work.

There are (1902) 24 branches with 1,136 senior and 573 junior auxiliaries and mission circles, and 221 cradle rolls, a total of 1,930 organizations, which hold, upon an average, as many as 12,000 meeting places. Canadian and Endeavor Societies, King's Daughters and Sunday Schools are affiliated. The Woman's Board of Missions now has 131 missionaries in 18 fields; 33 girls' boarding schools, 300 day schools, 200 Bible women. Its annual receipts are $139,607.29.

The Woman's Board of Missions of the Interior, also organized in 1868, and embracing the sixteen States of the interior and northwest, has its headquarters at 133 LaSalle Street, Chicago. It publishes the Monthly Missionary Magazine for Women and provides a department in Life and Light for Women. The whole number of societies contributing last year was 2,320, of which 1,154 were seniors, 102 young ladies, 542 Christian Endeavor societies, and 522 children's societies, including Junior Christian Endeavor, mission bands, Sunday-schools, and wees folksbands. It supports 72 missionaries, 70 native Bible women, 136 native teachers, 2 colleges, 17 boarding schools, 2 training schools for Bible women, as 12,000 meeting places. Canadian and Endeavor Societies, King's Daughters and Sunday Schools are affiliated. The Woman's Board of Missions now has 131 missionaries in 18 fields; 33 girls' boarding schools, 300 day schools, 200 Bible women. Its annual receipts are $80,820.01.

The Woman's Board of Missions of the Pacific was organized in 1873, and has five branches—Northern California, Southern California, Oregon, Washington, and Utah. It supports five missionaries, and helps in educational and medical work in India, China, and Japan. Receipts, $6,000.83.

The Constitution and Organization: The ABCFM is a company incorporated under the laws of the State of Massachusetts, U. S. A., "for the purpose of propagating the Gospel in heathen lands by supporting missionaries and diffusing a knowledge of the Holy Scriptures." It is composed of corporate members, of whom one-third are by law laymen, one-third clergy-men, and the remaining third may be chosen from either of these two classes. It is self-perpetuating, having full and sole power to fill all vacancies in its own body, elect officers, and to give final decision on all matters relating to the management of the missions under its charge. It has no ecclesiastical character or relations, no organic connections with any church or body of churches, and is legally amenable to no authority except that of the Legislature of the State of Massachusetts. It violates the terms of its charter. There has been, however, of late years an increasing desire on the part of the Congregational churches for closer, if not organic relations with the Board, and this has been recognized and met by the Board itself. The number of corporate members was increased to 350, and again to 500.

Efforts have been made to secure uniform representation from the different parts of the country, to guard against any general slackening of annual contributions from each section. Nominations to membership in the Board are made by the various State Conferences or Associations, the Board itself reserving the right of election. The regular meetings of the Board are held in different sections of the country, in the month of October of each year.

The actual business of the Board is entrusted to a Prudential Committee consisting of the President and Vice-president ex officio, and twelve members, six ministers and six laymen. The executive officers are three Secretaries, an Editorial Secretary, and a Treasurer. The offices occupied in the earlier years of the Board's history were generally small rooms in tenement houses, except in 1820-21, when they were in the basement of Lyman Beecher's Church in New York. For many years they were at 33 Pemberton Sq., the property of the Board. They are now in the Congregational House, 14 Beacon Street, Boston.

III. Development of Foreign Work: The two missionary parties that sailed for Calcutta in 1812 had been organized as a practical object, but the hostility of the East India Company and a change of views on baptism by Messrs. Judson and Rice resulted in the establishment of the Marathi Mission at Bombay in 1813. The next step, in 1816, to Ceylon, where Newell and his wife had visited, was a natural one. Meanwhile the interest grown and mindful of the need of the heathen nearer home, the Board sent an exploring committee through Georgia and Alabama, whose report resulted in missions to the Cherokees, in 1817, and to the Choctaws, in 1818. In 1825 several missions started by the United Foreign Missionary Society were transferred to the Board, and in 1830-35 several other tribes were brought within the scope of their work.

Attention was then turned to the Levant. In 1819, P. B. Fisk and Levi Parsons landed at Malta, then removed to Smyrna, and from there visited Palestine, Alexandria, Syria and Cyprus. These visits and the translation and press-work done at Malta and Smyrna laid the foundation for the missions to Syria, Egypt, Asia Minor, Persia, Greece, and Bulgaria.

Simultaneously with the sailing of Fisk and Parsons for the Levant, Bingham and Thurston, with several associates, set sail for the Hawaiian Islands.

The ten years from 1819 to 1829 were chiefly spent in strengthening the work already commenced; but then again the impulse forward could not be resisted. Bridgman and Abel sailed for Canton and Eli Smith and Dwight conducted a grand exploring tour through Asiatic Turkey and Persia, which resulted in the commencement of missions in Constantinople, the general enlargement of work among the Armenians throughout Asia Minor, and the establishment, in 1834, of the mission to the Nestorians in Persia. The struggle of the Greeks for national existence had attracted the attention of the Christian world, and in 1831 Jonas King commenced a station at Athens. Abel's journey from Canton to Singapore and Bangkok resulted in the formal opening of mission work in those places two and three years later. The slavery question and the efforts of the colonization societies had excited much interest in Africa, hardly
yet known even as the Dark Continent, and the Gaboon mission on the West Coast was started at Cape Palmas in 1834, and that to the Zulus in Southeastern Africa in 1855, but it was not until the bequest of Asa Otis, amounting ultimately to two million dollars, that the ABCFM felt able to undertake work in other parts of Africa.

The early growth of the missions was rapid, new fields ever opening before the Board. In 1834 work was begun in Madura, India; in 1836, Eastern Turkey; in 1841, Central Turkey and Fuchau, China. Assyria and Persia were opened in 1851; Micronesia in 1852; North China in 1854; European Turkey in 1859; Japan in 1869; Bulgaria in 1871. In 1872 the Board consented to undertake the care of the fields of the American and Foreign Christian Union in Papal Lands, and adopted the missions in Spain, Austria, Italy and Mexico. In 1880 it entered West Central Africa; in 1882 Shan-si, China; in 1883 East Central Africa; and in 1902 the Philippine Islands.

In 1857 the Amoy Mission in China and the Arcot Mission in India were transferred to the charge of the Reformed Church in America. In 1860 the Assyrian Mission was merged in that of Eastern Turkey; in 1870 the Persian, Syrian and Gaboon Missions, and two of the Indian Missions were transferred to the reunited Presbyterian Church; the other missions to the North American Indians were either developed into self-supporting churches or transferred to other societies; in 1871 the Hawaiian Islands practically assumed self-support.

IV. The Missions of the Board; 1. Marathi Mission: Driven from Calcutta on their arrival in 1812, and deprived of their associates, Mr. and Mrs. Nott and Mr. Hall, after many trials, established themselves at Bombay in 1813. They found the Governor, Sir Evan Nepeau, a warm friend, a vice-president of the BFIS, and immediately opened a school and took the template of preparing a translation of the Bible and other Christian literature, and opened schools. Other missionaries were sent to join them and new stations were opened. The first convert was Kader Yar Khan, a Mussulman, baptized in 1819. The first church was organized at Bombay in 1820, and the first pastor ordained in 1854. The mission has suffered from the famines 1876-8 and 1896-7 and from the bubonic plague. The mission has (1902) 8 stations and 124 outstations; 42 American missionaries; 553 native workers; 54 churches with 5,607 communicants; 185 Sabbath schools; 20 schools for higher education with 3,597 pupils; 156 common schools, and the grand total under Christian instruction in the mission is 9,093. Industrial and medical work are carried on; orphanages and widows' homes have been established; Christian Endeavor Societies flourish; the Dnyanodaya, a weekly paper, and the Balbodh Mewa, a monthly illustrated magazine for young people, are issued regularly.

2. Ceylon: In 1813 Mr. Newell had urged the occupation of Ceylon, and in 1816 Messrs. Richards, Meigs and Poor reached Jaffna, followed by Messrs. Spaulding, Woodward, Myron, Winslow and John Scudder. The Ceylon Mission began at Batticotta and Tillipaly in the ruins of Portuguese churches older than the settlement of America, and at Oodooville in the residence of an Anglican priest. From the very first great attention was paid to education and the preparation of literature. In 1826 Batticotta Seminary and Oodooville Female Boarding School were established, and in 1872 Jaffna College, which in 1895 organized the first college association in the mission field. The work in Ceylon has been among the Tamils, and from the first the spiritual development has been noticeable.

There are now (1902) in this mission 6 stations and 31 outstations; 13 American missionaries; 412 native workers; 18 churches with 2,100 communicants; 5 schools for higher education; 136 common schools, and the aggregate of those under mission control is 11,039. Jaffna College with 108 pupils is independent of the mission, but is in close relations with it. It is affiliated to Calcutta University. The churches have a native Evangelical Society for Home Missions, while a Students' Foreign Mission Society and a Woman's Society each support a missionary in Madura. The Christian Endeavor and YMCA also do good work.

3. Madura: In 1834 the Ceylon Mission sent Levi Spaulding to learn the condition of the Tamils of Southern India and the result was the establishment here of a mission. The population of over 2,000,000 was overwhelmingly Hindu and largely of the weaver caste. The bitter hostility to the missionaries as the "pariahs" of the white people was met by the marked courtesy of the English, and largely increased in grade and expects to be affiliated to Madras University. Medical work, industrial training and publication of literature are carried on effectually. The Madura Mission has (1902) 11 stations and 355 outstations; 55 American missionaries; 64 native workers; 28 churches with 5,036 communicants; 268 Sabbath schools with 7,643 pupils; 16 schools for higher education; 192 other schools, and the aggregate under Christian instruction in the mission is 8,059. The Christian Endeavor and YMCA are flourishing institutions. The mission has (1902) in its charge Madura, Pasumalai, from which two periodicals are issued.

4. Madras: In 1836 Messrs. Winslow and Scudder established at Madras a printing house for works in the Tamil language. There was cordial cooperation with the missionaries of the LMS and the work grew until, by 1842, 53,180,467 pages had been printed, and the press was able not only to refund the purchase money, but to pay all expenses and to aid the general mission work by its profits. The death of Dr. Scudder in 1855, the removal of Mr. Winslow in 1864, the entrance of other societies led to the transfer of the press to other hands and the close of the station in 1866.

5. Arcot: The Arcot Mission, commenced by Dr. H. M. Scudder in 1850, in connection with the Madras Mission of the ABCFM, but in 1858 was transferred to the care of the Reformed Church in America.

6. Sumatra: Messrs. Munson and Lyman with their wives sailed in 1833 to explore the East Indian Archipelago; they reached Batavia in September.

Leaving their wives they proceeded to Tappan Hill in Sumatra, and from there went to visit the Battas of the interior, arriving at the village of Saca in June, 1834. A petty war was in prog-
ress and both fell victims to the rage of the combatants. When it became known that the strangers were good men who had come to help the people, the neighboring villages leagued together and laid Seaca waste. A thick jungle covered the spot, and the houses lay destroyed from the place. The mission was not resumed.

7. Siam: In 1831 David Abel commenced work at Bangkok, finding a friendly reception from the Portuguese Consul, but great hostility on the part of the King. He was, however, permitted to settle within the city limits. In 1838, after several years, the scheme was resumed. The mission was closed in 1844.

8. Singapore: Work was begun in 1834 as a central point from which to reach southeastern Asia and the adjacent islands, but the decision of the Government of that country to close all its missionary stations sent from Holland defeated the plan, and the mission was closed in 1844.

9. Borneo: This mission, undertaken in 1836, was composed of members of the Reformed (Dutch) Church of America and derived its support through the Labadie Fund. The direction was determined by the nature of the field and from the objections of Dutch officials. The missionaries labored faithfully until 1845, when the failure of health compelled those then in charge to withdraw, and the failure to find recruits caused the mission to be discontinued.

10. Hawaiian (Sandwich) Islands: In 1779 these islands were brought into notice through the murder of Capt. Cook, and again in 1808, when the government of the Sandwich Islands was overthrown and a new one established. The missionaries, who were invited to go and teach the people, were first sent in 1813. In 1819 Hiram Bingham, Asa Thurston, and others were sent to Hawaii as missionaries of the ABCFM, arriving March 31, 1820. Their arrival was opportune, for the islanders had excelled against the tabu, destroyed the idols and their temples, and discarded for the moment their old religion. Four years later the principal chiefs agreed to recognize the Sabbath, and the ten commandments were adopted as the basis of government. In eight years there were 445 native teachers connected with the mission and 26,000 pupils in mission schools. The Bible was circulated, high chiefs became Christians, and in 1828, simultaneously and without communication, a revival unexpectedly commenced in Hawaii, Oahu and Maui, and in 1838 one of the most remarkable revivals in history began, lasting six years, and resulting in about 27,000 conversions. In 1850 the Hawaiian Evangelical Association was formed for work in their own and other islands, and in 1853 Hiram Bingham was ordained to the gospel ministry. The American Board of Commissioners for Foreign Missions continued to support the mission until 1870. In that year the first native church was organized in 1843, with 5,953 communicants; seven training schools, with 205 students; 85 native schools, with 3,297 pupils.

11. Micronesia: This name is applied to four groups of coral islands in the Pacific Ocean. In 1852 Messrs. Snow, Gulick and Sturges, with their wives and two Hawaiian helpers, were sent to these islands by the American Board of Commissioners for Foreign Missions. They occupied two stations, Kusaie and Ponapi in the Caroline Group. For four years they had no connection with the outside world, depending on the non-too-friendly trading vessels for mail and supplies. In 1856 a missionary ship, the Morning Star, was built by the Board for work in these islands, and the latter were stationed in the Marshall group. Languages were mastered and reduced to writing, simple books were laboriously prepared, schools were started and preaching services held, though the latter were difficult, and more was accomplished in the day schools and house to house visiting. For the work in these islands a "Missionary Navy" was essential. After the Spanish-American war in 1901, work was begun in the Ladrones, with a station in Guam.

There are 4 stations and 63 outstations; 24 American and 1 Hawaiian missionaries; 149 native pastors and teachers; 27 churches, with 5,953 communicants; seven training schools, with 205 students; 85 native schools, with 3,297 pupils.

Owing to political and financial difficulties the transfer of this mission by the ABCFM to some English or German society seemed almost essential. After the Spanish-American war of 1898, the latter was transferred to the Presbyterian Church in the U.S.A.

12. Palestine and Syria: Pliny Fisk and Levi Parsons, appointed missionaries to Jerusalem in 1819, landed at Smyrna, where Mr. Fisk stopped to study the language, while Mr. Parsons went on. A Greek revolt drove Mr. Fisk to Alexandria, and the coming of associates, followed by exploring journeys, resulted in the conviction that Syria offered the best location, and Beirut was selected, in 1824, as a missionary station. A printing establishment, part of a vessel, was afterwards moved to Constantinople and part to Beirut, was set up at Malta out of reach of the Turkish Government. At Beirut and vicinity hostility developed into persecution, and war and pestilence again and again broke up the work. The first native church was organized in 1843, with 57 churches, with 1,807 the Syrian Mission was transferred to the care of the Presbyterian Church in the U.S.A.

13. Asiatic Turkey: Mr. Parsons on his first visit to Jerusalem met some Armenian pilgrims who said they would rejoice if a mission could be sent to their people. An Armenian ecclesiastic secured and translated a letter written by Jesus King on leaving Syria in 1827, and it produced a wonderful effect in Constantinople. Two years later, Messrs. Eli Smith and H. G. O. Dwight made their long journey through Asiatic Turkey, the latter by way of Northern Persia, which opened up the condition of the Oriental churches to the Christian world and brought it face to face with the needs in that whole section. The result was the establishment of the station at Constantinople in 1831 by Mr. Goodell (with Messrs. Dwight and Schaufler), who came north from Beirut, bringing with him publications and letters issued at Malta. In quick succession Smyrna, Brousia, Trebizond, and Erzerum were occupied as stations. For a decade the strength of mis-
isionary effort was given to consolidation, and then commenced a new era of extension until by 1863 the entire region of Asia Minor, Northern Syria and Mesopotamia was dotted with missionary establishments.

The extent of territory covered, the poor means of intercommunication, and the variety of problems in different sections led to the division of the work into three missions, Western, Eastern and Central Turkey. Each is a separate unit for administrative purposes, yet there is a bond of union in the fact that the Constantinople station is the center for the publication work and the financial management, as well as the place to which all the questions concerning the relations with the government.

The work of the Western Turkey mission is chiefly among Armenians and Greeks; of the Eastern mission chiefly among Armenians, the one station, Mardin, reaches the Jacobites, the legacy of the old Assyria Mission; the Central is almost entirely among Armenians who have the peculiarity that their language is Turkish. The Western mission embraces also that portion of European Turkey where Armenians are principally found. There have been efforts to reach other classes. W. G. Schaufler was commissioned first to the Jews and afterward devoted himself specially to the Turks, but the great work of the ABCFM in Turkey has been among Armenians and Greeks.

Education has always held a prominent place. The American College for Girls at Constantinople, Euphrates College at Harput, Anatolia College at Marsouvan and Central Turkey College at Aintab, as well as the different theological schools and academies, are missionary institutions. There has been excellent literary work done in Bible translation, in general book publications and in the weekly and monthly periodicals. The missions have under the pressure of the massacres of 1891-5, but have to a considerable degree recovered themselves.

The missions of the ABCFM in Asiatic Turkey have 12 stations and 270 outstations; 145 missionaries; 811 native workers; 114 organized churches with 13,125 communicants; 1,245 Sunday grade and 1,134 lower schools with a total of 60,964 under instruction.

14. Persia: One of the results of the tour of exploration by Messrs. Smith and Dwight was to attract attention to the Nestorians in northwestern Persia as in the mountains of the Turkish border. In 1833 Justin Perkins sailed for that work, and two years later he and Dr. Asahel Grant opened a station at Urmia. They received a warm welcome from the Patriarch, Mar Yohannan, and the work prospered, especially that for girls and women under the care of Fidelity Fiske. In 1870 this mission was transferred to the Presbyterian Church in the U. S. A.

15. European Turkey: Work was commenced among the Bulgarians at Adrianople in 1858, in connection with the Western Turkey mission, but as new stations were formed, the European Turkey Mission was organized, the literary work of the new mission being carried on at Constantinople, however, until after the establishment of the Principality of Bulgaria. Various political disturbances have hampered missionary enterprise, but have never stopped them.

This mission has (1902) 4 stations and 56 outstations; 28 missionaries; 85 native workers; 16 churches with 1,145 communicants; 3 higher grade and 19 other schools, with a total of 787 under instruction.

16. Greece: The great interest felt in America in the Greek struggle for independence turned the attention of Chas. Johnson, an officer of the American Board, to the country, and Jonas King was called from Beirut to Athens to disburse the gifts for the sufferers. He remained there as a missionary of the American Board until his death in 1869. A few other missionaries were sent to Greece organized. the latter a mission station in Constantinople that seemed more important and promising, and with his death the mission was discontinued.

17. China, Canton (1830): Elijah C. Bridgman and David Abel, the latter under the American Seaman’s Friend Society, sailed from New York October 14, 1829, and arrived in Canton, February 25, 1830. After two years study of the language Mr. Bridgman issued the first number of the Chinese Repository. In 1833 S. Wells Williams and Ira Tracy joined the mission, followed the next year by Dr. Peter Fuchau from the Reformed Church. In 1840, the work was suspended till 1845, when it was resumed under many restrictions. In 1847 Mr. Bridgman was transferred to Shanghai. A civil war in 1854 and a war with England in 1856 again interrupted the work; the missionaries were expelled and their houses, printing establishment and books destroyed by fire. The treaty of 1858 with the foreign Powers guaranteed the toleration of Christianity in all parts of the Empire, and the work was again resumed. Canton was opened to foreign traders, and the government permitted missionaries to set up schools. The work prospered, and the forces becoming greatly depleted by death, the mission was discontinued.

18. Amoy (1842): Established by David Abel, who was joined in 1844 by two missionaries, Revs. terrified. Fuchau and Lynam, Basset, who was transferred from the mission in Siam. Reinforcements were sent out in 1848, 1850 and in 1853, when a small boarding school for boys and girls was opened. In 1857 the first church was formed of 4 members. The New Testament was translated into the Fuchau dialect and the first edition published, in 1866, by the American Board and Methodist Episcopal Missions conjointly. Work on the Old Testament was begun, but not completed fully till 1888. The American Female College was dedicated in 1881. The first Christian Endeavor Society of the Mission, as well as of the country, was formed in 1885. In 1893 the native Woman’s Missionary Society was formed. Evangelistic, Educational, Medical and Literary work are carried on, and the aim of the mission is self-support in all departments.

In the Fuchau Mission, there are 5 stations, 96 outstations, 38 American Missionaries with 210 native workers; 62 churches with 2,186 communicants, 2 theological schools, 2 colleges, 5 boarding schools, 90 common schools, 4 hospitals with 458 patients; 10 dispensaries with 30,857 outpatients; native workers contributed $1,844.59.

20. North China Mission (1860): Elijah C. Bridgman was transferred from Canton to
Shanghai in 1847, to assist in translating the Scriptures. In 1854 he was joined by Messrs. Atchison and Blodgett, thus forming the Shanghai Mission; in 1860 the Mission was transferred to Tientsin, the key to the surrounding country, and the name was changed to the North China Mission. A year later the first convert was baptized. In 1864 the famous Bridgman School was opened. In 1869 the only printing press under the control of Protestant Missions in North China was established. Besides the work of the Mission, there are daily papers for the American Bible Society, the Church Missionary Society, the Russian Ecclesiastical Mission, and the North China Tract Society. The Boxer movement of 1900 temporarily interrupted the work of the Mission; Mission buildings were destroyed, and missionaries and native Christians were massacred or fled for their lives. Indemnities have since been promised, and in some instances paid, and the outlook is full of hope.

There are in this mission (1902) 7 stations, 50 outstations, 52 American missionaries and 50 Chinese workers, 1,652 communicants; 1 theological seminary, 1 college, 8 boarding and high schools, 9 common schools; 3 hospitals, 3 dispensaries.

21. Shansi Mission (1882) : Established at Tuyueyuan by Messrs. Stimson and Wilson. Eleven millions of people inhabit Shan-si Province, of high natural ability but addicted to opium. Refuges have been established, and evangelistic and medical work is carried on. The first church was organized in 1888. The following year saw a boy's boarding school opened. The work was interrupted by the Boxer movement of 1900, but has since been resumed, with added opportunities for usefulness. There are (1902) 2 stations, 4 American missionaries, 9 native workers, 2 churches with 152 communicants, 1 orphanage, 1 common school, with 28 pupils.

22. South China Mission (1883) : Formerly known as the Hongkong Mission, established by C. R. Hager; the American Board occupies the field at the earnest solicitation of Christian Chinese who came from the Province of Canton. The field of this mission is inhabited by 2,000,000 people. For the first few years the work of the Mission was considered tentative. During 8 years there was but one missionary in the field, but in spite of hindrance the work has been successful. A building answering for church, missionary residence, station headquarters, etc., has been erected at a cost of $16,000, the larger part of this amount having been given by the natives. The Chinese Christians in California cooperate with the Mission in its outstation work. There are 2 stations and 20 outstations; 6 American missionaries and 7 Chinese workers, 4 churches with 1,000 communicants; 1 boarding school and 10 common schools; 1 dispensary.

23. Western Africa: In November, 1833, Rev. J. L. Wilson and Mr. S. R. Wyncoop embarked at Baltimore in February, sent out by the Maryland Colonization Society, and reached Cape Palmas early in the following year. Having decided upon Cape Palmas as a favorable location, they returned to America. The mission was established in December, 1834, by Mr. Wilson and his wife, greatly to the joy of the natives. The negroes of the Guinea coast were found to be fearfully degraded. Schools were established, missionary reinforcements sent out and new stations opened. In 1836 there were 100 native teachers, 500 pupils, and 2,500 from the far interior; a printing press was set up; a church with 6 members organized. In 1837 the Board was compelled to lessen its expenditures. It was a serious blow to this mission. Printing ceased, 2 schools were closed, the board of control reduced, the natives discouraged and confidence was impaired. They followed the inimical French occupation, and the abominations connected with the relations of foreign traders with Africa. In 1843 the mission was removed to the Gaboon, on account of the attitude of the American Colony from Maryland.

24. The Gaboon Mission: Was organized at Cape Palmas in 1835. The new location brought the mission into contact with nobler races, as the Mpongwas and Bakedes. Two dialects were reduced to writing and many men and women received the gospel gladly. Under great difficulties from the climate, the temper of the natives, and adverse foreign influences, it maintained itself and made a good record in school and church work during the thirty-five years of its connection with the Board. In 1870 this mission was transferred to the care of the Presbyterian Board.

25. Zulu Mission (1835) : Established by Messrs. Lindsay, Venable, Wilson, Grant, Champion, and Dr. Adams. It was the first organized effort of any society in this region; the people were savage and their language unwritten and unknown. Dingana, the chief of the Zulus, received the missionaries, and schools were opened and a printing press set up. Repeated conflicts between the Zulus and Dutch Boers hindered the work for the first years, and twice the missionaries were compelled to flee. The Board had decided to discontinue the attempt to labor amid such adverse conditions, when, in 1843, Natal became a British colony. From that time the work has gone steadily forward. The native writing and mission work has prospered; the little Zulu church is well attended, and there are churches and schools established; government allotments of land for mission purposes and annual grants-in-aid for schools were secured. In 1846 the first convert, an old woman, was baptized. Her son afterward became pastor of the church of which she was the first member, and her grandson was the first Zulu to receive a full medical education. In 1870 began a decisive conflict between heathenism and Christianity, which resulted in a more intelligent and decided Christian living in the converts. In 1853 the translation and publication of the entire Scriptures was completed, and a hymn book has since been issued. The Ummune Home and Iranda Seminary are for the higher education of the girls, while the High and Normal School at Amanzimtotse gives the boys a similar opportunity. In 1892 a hospital and dispensary were opened by Dr. Bridgman. A feature of the mission is the Zulu Home and Foreign Mission Society, which supports 5 evangelists. New opportunities have resulted since the closing of the British Board mission, so that the field is more attractive than ever before is open to the Zulu Mission. There are (1902) 11 stations and 13 outstations; 31 American missionaries; 397 native workers;
23 churches; 3,555 communicants; 1 theological seminary; 3 schools for higher education with 389 students; 50 common schools with 2,500 pupils; 1 hospital and a dispensary.

26. East Central African Mission (1883): This is the result of the enterprise of the Zulu Mission and an independent movement to reach the tribes in the interior. In 1880 Myron W. Pinkerton was sent by the Zulu Mission to examine the ground for a new mission, but died before accomplishing his object. The following year E. H. Richards was sent by the Mission to continue the work of exploration and reached the capital of Umzila's kingdom in October, 1881, when permission was given to open the new mission. In 1882 William C. Wilcox explored the region around Inhambane Bay, and the following year he established the mission. In 1884 he was joined by Mr. and Mrs. Richards and Mr. and Mrs. Osley, the latter being graduates of Fisk University, and of the schools of the American Missionary Association. In 1887 Miss Nancy Jones joined the Mission, the first white woman of African descent to be commissioned by the American Board. Four Zulu Christian workers were added to the force, and the work went quietly on. The Gospel and Acts were translated and published, and schools were established. The coast region proving unhealthy in 1893, the Mission was moved to Mt. Silinda, in Gazaland. Schools have been opened, including an industrial school, and evangelistic and medical work is carried on. In January, 1897, the first Church of Christ in Gazaland was formed with 16 members, all on confession of faith. Title deeds to 27,000 acres of land have been secured, including the fine Silinda forest.

There are (1902) 3 stations, 6 outstations; 11 American missionaries, 11 native workers; 1 church with 41 communicants; 1 boarding school with 64 students; 2 common schools with 41 pupils; 2 dispensaries.

27. West Central African Mission (1880): Established by Messrs. Bagster, Sanders and Miller, at Bailundu and Bihê. The Portuguese authorities at first treated the missionaries with coldness and kept them in a dependent position, and the natives heartily welcomed them; the traders were prejudiced against them, and succeeded, in 1884, by bribes and false reports, in causing their expulsion, but the governor was appealed to, and they were allowed to return. The first church was organized in 1887, with 14 members all under 20 years of age; deacons were chosen from among them, and later one became their pastor. A printing press was established; schools opened and industrial and medical work was begun. In 1901 the Mission was severely threatened by an uprising of the natives against the Portuguese authorities. Nevertheless steady growth and enlarged opportunities are reported.

There are 4 stations with 12 outstations; 24 American missionaries; 37 native workers; 4 churches with 163 communicants; 1 theological school with 13 students; 10 common schools with 1,146 pupils; 2 hospitals and 4 dispensaries.

28. Japan: About 1827, a company of Christian laymen of Boston and vicinity began to meet regularly to pray for the conversion of the Japanese people. The work was continued by a small annual contribution of $600 which was increased to $1,150 in 1830. The same amount was devoted to Japan, which as yet had not been visited by Protestant missionaries. Forty years later, Dr. Neesima, a Japanese, then a student at Amherst, appealed to the American Board to send missionaries to Japan. At this time the original gift of $600 had increased to over $4,000, and it was decided to send Rev. D. C. Higginson and his wife, to Japan. They landed in Yokohama November 30, 1869. Work was begun that same year in Tokio, but after a careful inspection of the field the mission was removed to Kobe in March, 1870. In February, 1873, the famous edict was issued which banned Christianity and imposed heavy penalties against Christianity posted during more than 250 years in every town and hamlet throughout Japan. Public preaching was immediately begun, and a church of 11 members was organized at Kobe, in April, 1874, and in May a church was organized at Osaka. Hospitals and dispensaries were opened, and evangelistic tours begun. The same year Joseph Neesima and Paul Sawayama returned from America, the one to establish a Christian school, the other to become an eminent successful pastor. The Kudo Training School, now called Doshisha, was opened in 1876, and a school for girls, now Kobe College, was opened. In 1883 the northern Japan Mission was opened at Niigata and Sendai, but in 1890 was incorporated as a station of the Japan Mission. In 1891 and 1892 the Mission moved to the Union Evangelistic Movement, when work was carried on in 42 provinces, by 22 denominations, employing 536 foreign and Japanese workers representing 376 churches. Seventy-seven evangelistic bands were formed; over 2,000,000 handbills and posters were used; over 60,000 tracts were distributed; and over 10,000 yen was raised for the work. About 20,000 enrolled themselves, giving name and address, as converts, or as earnest inquirers after the truth.

There are (1902) 12 stations and outstations; 68 American missionaries and 119 native workers; 81 churches with 10,856 communicants; 1 theological seminary with 16 students; 2 colleges with 506 students, 5 boarding schools for girls with 384 pupils; 1 kindergarten training school and 2 kindergartens. Native contributions were $16,895.

29. South America: Messrs. J. C. Brigham and Theophilus Parvin arrived in Buenos Aires, October, 1823. They perfected themselves in the Spanish language, opened a school with some 20 pupils and a give-a-way-school for Protestant children, with a similar number; revived a Bible Society which had been previously formed, and gave an impulse to Bible distribution; established preaching services both on Sunday and week days at the house of an Englishman; held Bethel meetings on board ships in the harbor, and in various ways promoted the work. Mr. Marvin visited America in September, 1825, was ordained in Philadelphia, and returned to Buenos Aires the next year with a press, printer, and female teacher. He wished to labor for the individual responsibility; the income of the school was sufficient for his support, and at his own request he was honorably discharged from the service of the Board. Mr. Brigham left Buenos Aires in October, 1824, and after a tour of exploration, pursuing the original design of The American Home Mission, North and South America in 1826, was there invited to the domestic secretarship of the American Bible Society, and was released from the service of the Board.
In 1833 an exploring expedition was sent out with a view to founding a mission on the western coast of Patagonia. The project was found impracticable, and the missionaries returned.

30. Mexico (1872): The Mission to Mexico represents the only work the American Board is now conducting upon this continent. It is one of the Board’s three missions in Spanish America, the other two being in Spain and Austria. The object of these missions in countries generally known as Roman Catholic is not to attack and disintegrate the dominant church, but to introduce the leaven of the simple Gospel of Christ, and to plant there gospel institutions which shall produce a more durable Christian ministry.

Work was begun in 1872 at Guadalajara by J. L. Stephens and D. F. Watkins; and, the following year a church was organized with 17 members. In 1873 a work conducted by Miss Melinda Parkinson in northwestern Mexico was transferred to the Board. In 1874 Mr. Stephens was killed while preaching at Ahuahuco. The next year was full of trials and adversities. In 1877 the work at Monterey was transferred to the Presbyterian Board which was already working on the part of the Roman Catholics, and a lack of harmony among the missionaries led the Board to reconstruct the mission on a new basis. In 1881 the missionary in charge was instructed to turn the work over to new missionaries on the next arrival; instead, however, he transferred the mission to the Methodist Episcopal Church, South, and, when Missrs. Crawford, Howland, and Bissell arrived, in 1882, they began what was practically a new mission. Two churches were organized, one at Tlajamulco in 1883, and another in 1884. The same year was commemorated by the publication of a weekly illustrated paper. In the meantime a new station was opened in 1882 at Chihuahua by Mr. and Mrs. J. D. Eaton. At this time Protestant Christianity was unknown in northwestern Mexico. In November, 1883, the first converts were baptized, and in April, 1886, the first church at Chihuahua was organized; the same year Hermosillo was occupied as a mission station. In 1890 the Rio Grande Congregational Training School was opened at Ciudad Juarez. In 1891 the various stations were united in one mission, having been given better facilities for communication by the building of railroads. There are (1902) 5 stations and 33 outstations; 16 American missionaries and 22 native workers; 21 churches with 1,121 communicants; 1 theological school with 8 students; 3 boarding and high schools with 177 pupils; 4 other schools with 133 pupils.

31. Mission to Italy: On the withdrawal of the American and Foreign Christian Union and at the earnest invitation of the Free Church of Italy the Board commenced a mission in Italy in 1872. The purpose was to aid certain churches and evangelistic agencies founded by the Union. In 1874 it was decided to suspend operations in that field because of the limited means and the limited number of persons that the Board found unable to employ in nominally Christian lands, and the difficulty of finding a clear field for the Board’s methods of labor on account of the presence of so many other evangelical agencies at work in Italy.

32. Mission to Spain: When in June, 1869, Spain adopted a constitution guaranteeing full religious liberty to natives and foreigners alike, various evangelical bodies took advantage of the situation to commence Gospel work in that land. In 1872 the American Board established a mission, with Barcelona and Madrid as its stations. Two sons of the Hawaiian missionary, Rev. Peter Clark, with Rev. Gustavus Alexy and Miss Blake, were sent out to this mission. A school, previously opened by Mr. Lawrence, connected with the Broadway Tabernacle Church, New York City, at once came under the care of the mission. A book was given to enable evangelical churches to acquire literature, and regular preaching services sustained. In 1873 Barcelona was abandoned, and the first church was dedicated at Santander in the same year. Political disturbances and the reactionary tendencies of a new government interfered with the work during the next few years. In 1875 Zaragoza was occupied and the following year a church was organized with 75 members from an old Protestant body and 12 new converts. A school for girls was established at Santander, which has since developed into a great Educational Institute under the title of Girls’ School at San Sebastian. During the Spanish-American war it was removed temporarily to Biarritz, France, and it is now to be located in Madrid.

In 1882 the mission assumed care of the work carried on in the province of Tara by the Evangelical Association of Geneva, so that since 1883 the field of the Board has extended from Santander along the line of railway to the Mediterranean. A monthly Christian Endeavor paper is published, and two National Christian Endeavor Conventions have been held. There are (1902) 1 station with 17 outstations; 5 American missionaries and 24 native workers; 8 churches with 354 communicants; 1 boarding school with 34 pupils and 15 common schools with 772 pupils. The native contributions were $3,068.

33. Mission to Austria: Established in 1872 by Missrs. H. A. Schaufeller, E. A. Adams and A. W. Clark and their wives, followed the next year by Rev. E. C. Bissell and wife. Prague, in Bohemia; Brinn, in Moravia, and Innsbruck, in Tyrol, were occupied; colonists, colporteurs, evangelists were employed and encouragement given to active Christian workers in the already existing Protestant churches. Violent opposition on the part of the Roman Catholic clergy and inimical interference by the government rendered the work very difficult. The action of the Reformed Consistory at Vienna for a time seriously crippled the work. In no field has opposition been more persistent, the difficulties greater, or the faithful labors of the missionaries more abundant.

The work among Bohemian immigrants in America has been greatly assisted by converts made in this mission. An important feature of the work has been the establishment of Christian Associations, both for young men and for young women. The only Rescue Home in all Bohemia and Austria is carried on by this mission. There are now 1 station and 63 outstations; 4 American missionaries and 17 native workers; 13 churches with 1,297 communicants; 14 YMCA; 1 YWCA; 1 Rescue Home.

Besides the various missions above described the ABCFM carried on 15 missions among the North American Indians. Of this part of the work of the society the following presents a summary:
1. Cherokees (1816-60): 112 missionaries, mostly lay and female; 12 churches, with 243 members in 1860; schools, printing, 14,084,100 pages; mission given up because the Board's proper work was done.

2. Choctaw (1818-59): 153 missionaries; 12 churches, with 1,362 members in 1859, when 1,153 were declared Christian; people, schools, printing, 11,558,000 pages; mission given up because of complications arising from existence of slavery; in 1872 1 missionary resumed labor, and withdrew in 1876, leaving 4 churches under the native pastor.

3. Hoosiers (1826-37): Commenced by United Foreign Missionary Society in 1820; transferred to the Board in 1826; 26 missionaries; 2 churches of 48 members; schools with 354 pupils; their country ceded to the Cherokees.

4. Maumee, or Ottawa (1826-35): Commenced by Western Missionary Society in 1822; transferred that same year to the United Foreign Missionary Society, and to the Board in 1826; 6 missionaries; church with 25 members; given up because of changes in the population.

5. Mackinaw (1826-36): Commenced by the United Foreign Missionary Society; 1826; transferred to the Board, 1826; 17 missionaries; a church with 35 members; given up for the same reason as No. 4.

6. Chickasaw (1827-35): Commenced by Synod of South Carolina and Georgia, 1821, and transferred to the Board in 1827; 10 missionaries; a church of 100 members; schools with 300 pupils; given up for the above-mentioned reason.

7. Stockbridge (1828-48): 8 missionaries; a church of 51 members; given up as above.

8. Creeks (1832-37): 6 missionaries; 80 church members; given up because of peculiar embarrassments.

9. Pawnee (1834-44): 10 missionaries; given up because of the roving character of the Pawnees and the hostile nature of other tribes.

10. Oregon Indians (1835-47): 13 missionaries; broken up by the massacre of 1847.

11. Senecas (New York State) (1826-70): Commenced by the New York Missionary Society, 1801; transferred to the United Foreign Missionary Society, 1826; to the Board in 1826; 47 missionaries; from first to last, about 600 church members; transferred to Presbyterian Board, 1870.

12. Tuscaroras (New York State) (1826-60): Commenced as above; 10 missionaries; church members gathered, 200; given up because the Board's work was done.

13. Ojibways (1831-70): 28 missionaries; converts not definitely known; transferred to Presbyterian Board in 1870.

14. Abenaki (1835-56): 1 Indian missionary; 76 members; given up because of increasing discouragements.

15. Sioux, or Dakota (1835-83): 40 missionaries; in part transferred to the Presbyterian Board in 1870; transferred to the American Missionary Association in 1885.

From the above statement it will be seen that two missions and a part of a third were transferred to the Presbyterian Board in 1870; one to the American Missionary Association in 1883; 5 were given up because of peculiar difficulties; 4, because of changes in the population; 1 because of massacre, and the remaining two because the tribes had become practically Christianized. The whole number of missionaries employed was 500; churches, 47; members, 35,000; Indians reached by the missions, about 100,000; 12 languages were reduced to writing, and besides the Scriptures much Christian literature was published and many schools established and conducted during the continuance of the missions.

The periodical publications of the ABCFM are The Missionary Herald, Life and Light for Women (by the Woman's Board), The Mission Dayspring (for children) and Mission Stories. These are monthly publications. An Almanac is also issued every year. Bibliography: History of the Missions of the ABCFM (R.); Memoir of the African Missionary Society, 24 vols., Boston, 1870-74; The Hawaiian Islands, Anderson (B.); China; Presbyterian Missionary Society; American Christian Missionary Society. See Protestant Episcopal Domestic and Foreign Missionary Society.

AMERICAN CHRISTIAN CONVENTION. See Christian Church.

AMERICAN FRIENDS' Board of Foreign Missions (1871): There are 14 yearly meeting Foreign Mission Boards and 10 women's organizations in the Society of Friends, each of which carries on a distinct foreign mission work. The other Yearly Meeting Missions have not opened separate missions, thinking it wiser to strengthen the existing missions than to begin weak ones of their own. In most cases they have some definite work in the missions which they assist. In the Quinquennial Conventions of 1852 provisions were made for the formation of a central bureau, as a medium of communication between the boards of other denominations and the Friends', and as a bureau of information. This was formally organized in 1894, under the name of 'The American Friends' Board of Foreign Missions.' In 1900 it was incorporated under the laws of the State of Indiana, and made preparations to take up work in the foreign field, following the plan laid down in the Uniform Discipline in its further organization for this class of work. Its income is derived from appropriations of the yearly meetings and other Boards, and from donations, legacies, etc.

Upon the organization of the Five-Years' Meeting in 1901, this central body became one of its organizations. It is made up of representatives appointed from the various Yearly Meetings.

The American Friends' Foreign Missions include the work of the Central Board and the Yearly Meetings and are carried on in China, Japan, India, Syria, Brazil, Africa, Mexico, Alaska, Cuba, and the West Indies. The total receipts (1903) were $58,268.00.

Missions: 1. Mexico (1871): The first foreign missionary work of the Friends was begun by the Indiana Yearly Meeting, at Matamoros and Ciudad Victoria, in the State of Tamaulipas, Mexico, in 1871. Schools were begun, and in 1872 a mission press was established at Ciudad Victoria, which issues a religious monthly paper as well as books, tracts, etc., which have a wide circulation throughout the Spanish speaking world.

In 1873 a girls' school was established at Matamoros, later known as the Hussey Institute. The Penn Institute at Ciudad Victoria, a boarding and day school for girls, was established and supported by the New York Yearly Meeting, which also supports two foreign missionaries and three native teachers. In 1902 the Juarez Evan-
gelical Institute, a school of high grade, and a Bible Institute for young men was established at Ciudad Victoria. In 1888 the Western Yearly Meeting opened a station at Lina in the State of Oaxaca; a second station was established by them in 1889 at Cedral and a third in 1901 at Catorce Real, where medical work was begun, and has proved of great value. In 1902 a fourth station was established at La Paz, besides educational and evangelistic work. A paper called El Católico Convertido is published by the mission and has a wide circulation.

There are (1893) 6 stations and 9 outstations; 16 American missionaries and 29 native workers; 11 churches, with 766 members; 3 boarding and high schools, with 133 pupils; 7 other schools, with 282 pupils.

2. West Indies (1883): The Iowa Yearly Meeting began work at Glen Haven, Jamaica, in 1883, among two distinct classes of people—the colored population born on the island and the coolies brought as laborers from the East Indies. These last are generally heathen. There is a well-established training home for girls and another for boys, with a large attendance of day scholars. In 1886 another station was established at Sea Side and a third, in 1889, at Amity Hall. All these stations are in good condition and the prospects encouraging.

There are (1903) 3 stations; 10 outstations; 9 American missionaries and 15 native workers; 3 churches, with 530 members; 2 boarding schools, with 34 students; 4 other schools, with 250 pupils.

The work is mainly evangelical and educational. A girls’ boarding school has been established at Mito by the Canada Yearly Meeting. Woman’s Foreign Missionary Society, and outstations have been established.

At Tsuchura a Meeting and First Day School are kept up by resident native Christians, with occasional visits from Japanese and foreign members of the Evangelistic Committee. At Ishioka, a Japanese evangelist has charge of the work. Since the disorganization of the Society of Friends in 1894, occasioned by Nationalist criticism of the work during the whole Chinese war, the mission has not reorganized under the name of Friends, but the church work is carried on under the care of a committee of Japanese and missionaries who are Friends.

There are (1903) 2 stations and 2 outstations; 7 American missionaries; 22 native workers; 276 church members; 1 boarding school, with 23 pupils; 1 other school, with 140 pupils.

4. Alaska (1887): The Friends’ Mission Board of the Kansas Yearly Meeting founded a mission at Douglas Island, Alaska, in 1887. Church services and First Day schools are held for both whites and natives, and a day school is taught during about seven months of the year. At the outstation of Takou preaching services are held and a school is carried on. A small steamer is used to follow the Indians to their outposts, but their absence from their homes during the winter and the year greatly retards the work. The Kansas Board is investigating the question of getting the Indians settled in industrial colonies.

A second station was opened in 1894 on Kaak Island, by the Foreign Mission Board of the Oregon Yearly Meeting, on the same general lines as the Mission at Douglas Island. Here too they are confronted with the problem of the long line of the Indians from their homes; and a home school for the native children is contemplated. In 1897 the Foreign Mission Board of the California Yearly Meeting opened a mission near Kotzebue Sound, looking toward the Polar Sea, and another at Nome for Eskimos. The Alaskan is accessible, teachable and responsive, and the outlook is encouraging. There are 4 outstations in the care of native helpers, who are said to have a good influence over the white miners and trappers as well as the natives.

There are (1903) 3 stations and 4 outstations; 9 American missionaries, and 15 trained Christian native helpers; 3 churches with 358 members; 3 day schools with 144 pupils.

5. Palestine (1888): This Mission was commenced in 1889 by Eli and Sybil Jones, and continued at their expense till 1874, when it became an independent mission under the name of the Friends’ Syrian Mission (England). In 1888 the Ramallah station was transferred to the New England Yearly Meeting, which has contributed to the work through the English Friends. At the time of the transfer there was a school for boys, another for girls, and a cottage hospital and dispensary. A Training Home for Girls has been established, and in 1902 a much needed Training Home for Boys was opened. Both boys and girls receive industrial training in addition to the school and Bible work. There are (1903) 1 station; 4 American missionaries and 31 native workers; 1 church with 36 members; 2 boarding schools, with 49 students; and 7 other schools, with 255 pupils.

6. China (1890): The Ohio Yearly Meeting Foreign Mission Board dates the founding of its China Mission 1890, tho its pioneer missionary, Esther Butler, had been in the country for three years, learning the language and preparing for the work in the mission of her denomination. A station was established at Nanking, where land was purchased and buildings erected. In 1892 a church was organized; in 1899 a girls’ boarding school and a hospital were opened. In 1895 a second station was opened at Luoho-sien, a few miles north of Nanking. Here evangelistic and educational work is being pressed forward. There are (1903) 2 stations and 10 American missionaries; 2 churches; 1 boarding school with 27 students; 4 day schools.

7. India (1896): This Mission was established by the Ohio Yearly Meeting Foreign Mission Board at Nowgong, Central Provinces, in 1886. The work is conducted by four American women missionaries and is mainly evangelistic.

8. Cuba (1900): The American Friends’ Board of Foreign Missions began work in the northeastern part of Cuba in 1900, sending out four missionaries who began work at Jibara. A second station was established in 1902 at Holguin, and early in 1903 Banes, Tanamo, and Puerto Padre were occupied. Church schools and colportage work are in successful operation. There are (1903) 5 stations and 2 outstations; 1 American missionary; 1 native worker; and 1 school, with 20 pupils.

9. Africa Industrial Mission: A board was organized in 1902, composed of two members from each of ten American Yearly Meetings, and incorporated under the laws of the State.
of Ohio, as the Friends' Africa Industrial Mission. Three missionaries were sent to begin the work and establish themselves among the Kavirondo people in British East Africa, near Kisumu. The location chosen was on the banks of a river, with waterfalls that can be utilized for power, and several springs of the best water for household purposes. The soil proved fertile and the prospects are most encouraging. There is one station and ten American missionaries.

**Woman's Foreign Missionary Union of Friends (1881):** The first foreign missionary organization of women among Friends was formed in 1881 as a Yearly Meeting Society. In 1890 the ten independent societies organized in the yearly meetings were united in the Woman's Foreign Missionary Union of Friends. It has four departments of work: Interest and Organization; Literature; Juvenile and Junior; and a Secretariat and Systematic Giving, having a general secretary for each department.

In 1903 there were ten yearly meeting organizations in the Union, the greater number working through the A. F. M. The missions in China, India and San Luis Potosí in Mexico are entirely supported by the organization of the Indian societies. 18 missionaries are supported by them.

**The Friends' Missionary Advocate, monthly.**

**AMERICAN MISSIONARY ASSOCIATION:** The American Missionary Association was formed in Albany, N. Y., September 3, 1846. It was preceded by four recently established missionary organizations, subsequently merged into it, the result of the growing dissatisfaction with the comparative silence of the older missionary societies in regard to slavery, and as a protest against it. The first of these, the Amistad Committee, secured the liberation of forty-two negroes who had risen upon their captors in the Spanish slave schooner "Amistad" that was bearing them into slavery, and were finally sent by the Committee to their native land, accompanied by three missionaries. The other organizations were the Union Missionary Society, formed in Hartford, Conn., the Committee for West India Missions among the recently emancipated slaves of Jamaica, and the Western Evangelical Missionary Society for work among the American Indians.

When Feisal, in addition to the missions received from the societies named, it took under its care one missionary in the Hawaiian Islands, two in Siam, and a number of missionaries and teachers laboring among the colored refugees in Canada—so that in its Foreign Department in 1854 its laborers numbered seventy-nine, located in Africa, Jamaica, the Sandwich Islands, Siam, Egypt—among the Copts, Canada—among the colored refugees, and in North America among the Indians.

The Home department embraced two distinct fields, that of the west and the south, and the largest number of home missionary workers employed by the Association was 112 in 1860, 15 of them being located in the slave States and in Kansas.

In 1859, as the crisis in the slavery question approached, the Society closed its work among the Copts and turned its attention distinctly to the colored people. As the war commenced, in 1861, the Association felt itself specially called and providentially prepared to work for negroes, and the first systematic effort for their relief was made by it. Large numbers of "contrabands," or escaping fugitive slaves, were gathered at Fortress Monroe, Va., and Orangeburg, S. C., and at Fortress Monroe the Association sent Rev. L. C. Lockwood as a missionary, to make investigations. He reached Hampton September 3, 1861, and the next day arrangements were made for meetings in several places, the house of ex-President Tyler being one of them—a new use for that mansion, and a new era for the colored people.

But the great event in Mr. Lockwood's mission was that on the 17th of September, 1861, he established the first day school among the freedmen. The teacher of that humble school was Mrs. Mary S. Peake, an intelligent Christian woman. Her mother was a free colored woman, her father an educated Englishman. That little school laid the foundation for the Hampton Institute, and was the forerunner of the hundreds that have followed. The school-house which first began in the southern mission school in Talladega forty-one years before, the first slave-ship entered the waters of the American Continent. That first slave-ship and this first negro school will hereafter be contrasted as the initiators of two widely different eras—of barbarism and mis-
American Tract

THE ENCYCLOPEDIA OF MISSIONS

1838, conducts that part of the work of the Association, by direct appeals and through Women's State Missionary Unions.

A summary of the Society's work shows that in the southern States it has 73,400 aids with 480 teachers and 14,017 pupils, 230 churches, 139 missions, and missionaries, 12,155 members, and 17,311 Sunday school scholars; among the Indians 20 churches, 1,453 members, 2,661 Sunday school scholars, 6 schools, 342 pupils, 47 white and 41 Indian teachers and missionaries; among the Chinese 33 American and 11 Chinese teachers; in Porto Rico, 2 schools, 10 teachers, 343 pupils.

AMERICAN TRACT SOCIETY: This Society is denominational, representing all the Evangelical communities of the U.S. It combines both home and foreign work, publishing Evangelical Christian literature in book and leaflet form in 155 languages or dialects. It has depositaries in principal cities, employs colporteurs, and makes grants to religious and benevolent institutions.

The possibilities of the printing press as an evangelistic agency were seen very soon after the invention of printing. At Basel, in Switzerland, there was virtually a Bible Society. Colportage Association, and a Tract Society for France as early as 1524. The New Testament and, afterward, the Old Testament, in several portions, were very widely circulated. In many places, unreached by the reformers, a circulation of the Reformation was originated by the circulation of the writings of Luther and Melancthon. Indeed the press proved a most effective agency in scattering seeds of reform everywhere.

The influence of this idea was manifested in England by the organization of the Society for the Promotion of Christian Knowledge in 1688, followed after a century by the Religious Tract Society, in 1799, and the movement extended across the Atlantic. In 1812 "The New York Religious Tract Society" was formed and in 1814 the "New England Tract Society," at Boston. In 1823 this latter society changed its name to the "American Tract Society," and in 1825 it became a branch of a national organization, which was then instituted, bearing the same name, and designed to constitute a great central society for the whole Union, inviting the cooperation of Christians of all denominations, and of other tract associations as auxiliaries, in publishing and circulating whatever would best "diffuse a knowledge of our Lord Jesus Christ as the Redeemer of sinners, and promote the interest of vital godliness and sound morality, provided only that such publications should be "calculated to receive the approbation of all evangelical Christians."

Organization: The Society, consisting of persons who have become members, and Directors by their payment of less than $30 at one time, elects a Board, consisting of President, Vice-President and 36 Managers. This Board appoints an Executive Committee of 18 Members which in turn appoints the Executive Officers, consisting (1903) of a Secretary, a Publishing, Secretary, a treasurers and Auditors. The Board of Managers also has authority to appoint Members, Directors, Honorary Vice-Presidents and to fill vacancies. The Executive Committee is divided into three Sub-committees on Publishing, Distribution and Finance. The Publishing Committee is not permitted to contain two members from the same ecclesiastical connection, and no tract can be published to which any member of the Committee objects. The headquarters of the Society are in the Tract Society Building in New York City. There are also depositaries in Boston, Cincinnati, and Chicago, and District Secretaries in Rochester, Cincinnati, and Chicago, with Superintendents of Colportage at Rochester and St. Louis.

Two of the organizations that were, for practical purposes, united with the American Tract Society of New York, still maintain a separate corporate existence; the American Tract Society, instituted in Boston, and the Western Tract Society, with headquarters at Cincinnati. The former withdrew from the New York Society during the anti-slavery discussion of 1857-60, but again united with it in 1897, as far as action is concerned, the District Secretary for New England of the New York Society acting as its Secretary, and the Manager of the Boston depository as its Treasurer. In Cincinnati the Western Tract Society has a separate Secretary.

Development: For two years after the Society's organization, only tracts were issued. In the third year volumes appeared, the first being Doddridge's Rise and Progress, Saints' Rest, Baxter's Call, Pilgrim's Progress, etc. Systematic tract distribution in New York City and elsewhere began in the fourth year. In the sixth year prominence was given to the value of tracts in connection with faithful personal efforts to save souls. Harlan Page becoming eminent in this transcendent duty. The work was inaugurated in the eighth year by attempt to reach every family in the South Atlantic States with one or more volumes. The West was included the next year. The work was so enlarged that in the seventeenth year nearly 40,000,000 tracts had been issued, the Evangelical Family Library was published, and some 2,000,000 volumes had been put into circulation, and 60,000,000 of tracts.

In 1841 the Society inaugurated its system of colportage, with special reference to the destitute, isolated settlements, unacquainted with the Christian faith, and with difficulty to the people who refuse to enter the churches. The number of colporteurs increased rapidly until by 1860, over 600 were employed for the whole or a part of each year.

Another important feature in the publications of the Society has been its periodicals. The first to be established was The American Messenger, the official organ of the Society, founded in 1843. It is an illustrated religious monthly.

There followed in 1847 the Amerikanischer Botschafter, similar in scope and purpose to the Messenger, designed for circulation among the German-speaking population; in 1852 The Child's Paper, now known as Good Cheer, an illustrated monthly paper for young folks; in 1871 a new German weekly, called the Deutscher Volksfreund, and the Illustrated Christian Weekly, which afterwards sold (1888) to another house. Two new periodicals were added in 1879; Morning Light, for the younger scholars in the Sunday school, and Apples of Gold for the youngest readers. Besides all these, there is Light and Life, a monthly tract periodical
consisting of a new eight-page tract each month. The new conditions occasioned by such exigencies as attended the Mexican War, the Civil War, and the Spanish War, have been met by the Society with special publications and arrangements for distribution. Especially has this been the case in a record attained under the opportunity furnished by the Spanish War. The Sunday School paper, *Apples of Gold*, has been issued in Spanish, under the title of *Manzanas de Oro*; hymnals have been prepared and a general literature as complete as possible, to all of which has been added an enthusiastic appeal from the missionaries of various denominations as well as from the pastors, teachers, and others in Cuba, Porto Rico, Mexico, and South America. The flood of immigration to America has furnished another field for the Society's work. The great mass of these immigrants land at New York City, and the Tract Society employs a colporteur, sometimes with one or more assistants, to meet, encourage and advise them and to supply them with leaflets, papers, etc., in their own languages. The readiness of immigrants to receive and to study literature is remarkable, and many times thanks are returned to the Society by the new comers after they have reached their homes in various parts of the country. Special colportage work is also carried on among the Mormons, the negroes of the South, in the mining and lumber regions, and libraries are supplied to the army and navy and to merchant ships.

The foreign work of the Society is carried on through grants to the missions of the various denominations or to local Tract Societies. The general method is for a committee, representing the several mission Boards abroad, to request the issue of specific publications, original or translated. The American Tract Society then provides the needed funds or prints the tract or volume on its own presses. Frequently it appropriates a lump sum from year to year to be used by a committee or mission press, according to the principles and methods of the Society. Among the missions thus assisted during 1901-2 were those of the ABCFM in Austria, Turkey, South Africa and India; of the ABM in British India; of the American Bible Society in India; of the PN in Africa, India, Persia, Syria, and Siam; of the RCA in Arabia and India, etc. Among the Tract Societies aided were the Religious Tract Society of France, the Evangelical Tract Society of Geneva, the Italian Evangelical Publishing Society, the North India Christian Book and Tract Society, the Central China, North China, and Chinese Tract Societies, the Korean Religious Tract Society, the Japanese Book and Tract Society, etc.

The total number of volumes issued from the home office during the seventy-eight years (to 1903), is 22,743,752; of tracts, 449,554,252; and of periodicals, 264,278,668; making a grand total of 746,576,672 copies of publications printed. During 1902 new publications issued at foreign mission stations, by the aid of funds furnished by the Society, were 38, of which 24 were volumes and 14 tracts. The whole number of publications issued up to 1903 at foreign mission stations, with the approval of the Society's Publishing Committee, either wholly or in part with funds of the Society appropriated for this purpose, is 5,080, of which 1,018 are volumes and 4,062 tracts.

The regular catalog of the society includes, aside from a large number of books, tracts, hand bills, maps, etc., in English, publications in over 20 foreign languages, including German, French, Spanish, Italian, Welsh, Dutch, Norwegian, Danish, Swedish, Hungarian, Finnish, Romanian, Geman-Hebrew, Lithuanian, Croatian and Chinese.

The foreign cash payments for publication (1902) were $4,028.08, making a total expenditure of $747,140.51. The total receipts (1902) were $383,983.06.

**AMHARIC:** This language belongs to the Semitic family of languages, is used in Abyssinia, and is related to the ancient Ethiopian or Giz. It is written with the Giz letters increased by some additional characters, and it has adopted words from the Galla and some other neighboring African tribes. The Amharic is modified into many dialects by the isolation of different sections of the country.

**AMILTY HALL:** A town near the eastern extremity of Jamaica, W. I.; station of the American Friends' Foreign Missionary Society (1897) with 1 missionary and his wife, 1 unmarried woman missionary, and 4 native workers, men and women; 3 outstations, 4 Sunday schools, 2 young people's societies, 1 high school and 108 professing Christians.

**AMKHUT:** A village in the Malwa region, Central India; station of the PCC (1897), with a missionary physician and his wife and 1 native worker, an orphanage and a dispensary.

**AMOY:** A seaport on the southern coast of an island of the same name, belonging to the province of Fochien, China. It has an excellent harbor; the climate is cool in winter, wet in spring, and hot in summer; its inhabitants, in 1901, were 96,000.

Amoy was one of the earliest centers of European trade in China. The stream of emigration thence to Singapore, noticed by missionaries and by the chaplains of foreign seamen, at that point, led to the establishment of the first English and American missions at Amoy.

The RCA (commenced by ABCFM in 1842 and transferred in 1854) now has at Amoy 15 missionaries and 16 native workers, men and women, with 6 outstations. The PCE (opened 1850) has 11 missionaries, men and women, and the two societies together 11 preaching places, 5 village schools, 3 high schools, 1 theological class, 1 training class for women workers, 1 medical class, 1 dispensary, 1 printing house, 1 foundling asylum, 1 orphanage, and 426 church members.

The LMS has at Amoy (founded 1844) 14 missionaries and 59 native workers, men and women, with 65 outstations, 40 village schools, 1 high school, 1 theological class, 1 college, and 2,000 church members.

The missionary operations at Amoy show a good example of comity between the three societies engaged.

**AMPAMARINA:** A town of Central Madagascar, near Antananarivo. Mission station of the LMS, opened in 1864 and carried on by a missionary and his wife, with 229 native workers. There are 25 village schools, and 2,822 communicants.

**AMPARIBE:** A town of Central Madagascar, a little northwest of Antananarivo. Mission
station of the LMS opened in 1861, and now carried on by one missionary and his wife with 425 native workers. There are 59 village schools and 3,845 communicants.

AMRAOTI: Chief town of a district of the same name in E. Berar, Central Provinces, India. Its population is about 33,000. It is a station of the CA but no statistics are given. It is an outstation of the UFS (1871) with 22 native workers, men and women, 4 village schools, and 48 church members.

AMRITSAR: An important city and commercial center of the Punjab, India, and the chief seat of the Sikh worship. Population (1901), 162,429. It has a "pool of Immortality," on an island in which stands the chief temple of the Sikh religion. This holy place makes Amritsar a religious metropolis, and attracts to it great numbers of Pilgrims.

It is a station of the CMS, founded in 1851, and now carried on by 14 missionaries, and 24 native workers, men and women, with 4 outstations, 1 village school, 1 high school, 1 hospital, 3 dispensaries, and 1 printing house. There are 165 communicants.

It is also a station of the CEZMS with 16 missionaries and 45 native workers, all women, with 13 village schools, 3 high schools, 1 industrial school, 1 training class for women workers, 1 hospital, 2 dispensaries, and 400 pupils in zenanas.

The religious importance of the place gave a profound influence to the conversion here of one of the Sikh priests some years ago. A Mohammedan religious teacher converted here in 1866 became the Rev. Imad-ud-din, a Christian pastor of influence and preacher of great power.

AMROHA: A city of 35,000 inhabitants in the Robilband division of the United Provinces, India. Occupied as an outstation by the ME with 13 native workers, men and women. It has 3 preaching places, 8 village schools, and the number of professing Christians is 570, chiefly Sikhs, but some of them converted Mohammedans.

AMSTERDAM FARM: A village in the Carolina district of the Transvaal Colony, S. Africa. Station of the SPG, with 2 missionaries.

AMURANG: A station of the Netherlands Missionary Society in the Minahassa peninsula of the island of Celebes.

ANAA. See TAMBOTU ISLANDS.

ANAKAPALLE: Town of 17,000 inhabitants (and railroad station), west of Visagapatam, Madras, India; station of the BOQ (1898), with a missionary and his wife, 4 native workers, men and women, and 3 Sunday schools.

ANALAKELY: A town in the Iméria district of Madagascar; outstation of the LMS, founded in 1861; has 148 native workers, with 20 village schools, has 1,400 communicants.

ANAMBOE: A village near Cape Coast Castle in the Gold Coast Colony, W. Africa; station of the WMS, with 1 missionary and 46 native workers, men and women, 33 outstations, 4 village schools and 450 church members.

ANAMITIC: A mongrel dialect of Cochin China so far influenced by the Chinese as to have its nearest affinity with that language.

ANAND: A town in the Gujarat district, Bombay, India. A station of the PCI, opened in 1877. It is now occupied by 4 missionaries and 42 native workers, men and women, with 5 outstations, 15 village schools, a high school and an orphanage. There are 144 communicant Christians.

ANANDPUR: A town in the Punjab, British India; a station of the Basel Missionary Society, opened in 1856. There are now 3 missionaries and 4 native workers, men and women, with 100 communicants.

ANANTAPUR: A town in a district of the same name, Madras, India; station of the LMS (1890), with 1 missionary and his wife, 1 missionary woman, and 20 native workers, men and women, 12 outstations, 12 village schools, and 45 church members.

ANCESTOR-WORSHIP: The worship of deceased ancestors has been an important feature of the religious practises among widely separated peoples from remote ages. In modern times it has chiefly attracted popular attention in China, but it exists in Africa (See Bantu Race); traces of it are found among the American Indians; it is discovered among the inhabitants of the Tahitian Islands. The sun of Vishnu is a ritual for its proper performance; it can be noted in Western Asia in a reverence toward the graves of sages and heroes, which leads Mohammedans and others to pray with equal fervor to the tomb of Hannibal as to the tombs of the great sages and heroes of the past. The worship of ancestors is a great religious observance of Egyptians, Greeks and Romans. Its essential features are: (a) unshakable belief in the immortality of the soul (b) trust in the power of the dead to help or harm the living and (c) a sense of personal privilege through ties of kin to enjoy the protection of the defied or semi-deified ancestor. The mind of the man who worships his progenitors is in an attitude resembling that of those who appeal for help to patron saints in some branches of the Christian Church.

In China, ancestor-worship is a part of the Confucian system, but is older by centuries than the time of Confucius, and its claims are more binding on a Chiman than those of any other form of worship. He may sneer at Buddhism, ridicule the outrageous claims of the Taoists, and may even be brought to see that the teachings of Confucius himself are but moral aphorisms incapable of changing the life and bettering the future of his disciples, but he will not give up the worship of the ancestral tablet, and the paying of that honor and reverence to deceased parents which is the outcome of filial piety, the root of all Chinese institutions, the bulwark of her government, the strong chain which has bound the people together as a nation. The worship of ancestors is the real religion of China, and as long as the incense is smoking on the ancestral altar, so long will Christianity find in this practise a formidable foe, founded as it is on the best and most natural instincts of the human heart.

When a man dies one of his three souls is supposed to go into the grave with the body, one goes to Hades, and one goes into the tablet which is prepared for its occupancy by his oldest son. The use of the tablet originated in the Chu dynasty, 350 B. C. Rev. Dr. J. Campbell Gibson thus describes this resting place for the soul:

"The tablet is a small black board with a square of inches in height and a few inches in breadth, on the front of which is written the name of the person whom it represents. It is sewn through its thickness into two portions, and on the
inner surface thus exposed the inscription of the name is made, using a fish as the symbol of birth and death. This tablet is prepared soon after death takes place, and it is retained during one or two generations in the home of the family. Offerings are made to it from time to time. The tablets of successive generations take their places in the building, each one superseding those of past generations in the ancestral temple. Every clan and every section of a clan has its own ancestral temples, and few villages can be without its slightest least.

On the new and full of every month special offerings and worship are paid, and at the spring pilgrimages are made to the tomb, which is swept and put in repair. There is no need of priestly interference in this worship; the head of the family is the high-priest, and as the older ones die the younger ones take their places in this as in all other family matters. Ancestor-worship binds family ties, it perpetuates mutual interest, and is the least objectionable and therefore the most dangerous form of pagan worship. While it is founded on high principles—the reverence and love of parents—it is, in fact, a duty rendered from motives of self-protection and self-interest, for if the tablet is not erected, if the worship be not paid, it is believed that the wandering spirit will wreak its wrath on the offending descendant. The fear of this wrath is more real, more vivid than the fear of any of the other gods.

Elsewhere conspicuous and sometimes irreligious property assigns a portion to be used for the permanent maintenance of offerings on behalf of the dead. The practise affects the laws of land tenure; it modifies the laws of inheritance, giving a larger share of the property to the eldest son, because responsibility for keeping up the worship rests upon him. It also makes the birth of numerous daughters a calamity, because sons only can assure maintenance of that worship which is supposed to benefit the departed soul.

Ancestor-worship has been of benefit to China in this respect: it has preserved the reverence of parental authority, which reaching upward has caused national respect for the head of the nation as the father of his people, and it has preserved the position of woman more on an equality with man, and has defined the position of the mother of the family. On one occasion, in the life of the monarch Tsing-kwah, father of the emperor, a wife is used as a consort"; can be named on the tablet to father and mother, so there is but one wife, tsih, in the family. Concubines there may be, but they are not admitted into the worship of the ancestral hall, and this one fact has done much to preserve the legal, social and domestic position of woman. Moreover, the system not only forms a link between the living and the past generations of the clan, but it also unites all contemporary branches descended from a common stock. In fact it has been said that Ancestor-worship is the only point upon which all the Chinese unite.

This peculiarity of the effects of the worship of ancestors is seen wherever it is practiced. In ancient Greece and Rome, as among the wild tribes of Africa to-day, the tie of blood relationship to a common object of worship always tended to knit the clans or tribes together into a close corporation, admission to which was almost impossible. It also tended to cultivate an exclusiveness which regarded all who are not members of the tribe as barbarians without rights and to whom enmity is a duty. In Africa this natural exclusiveness is somewhat counteracted among the Nuba, who are admitted to security by mingling his blood with that of a tribal chief. In this ceremony, intended to establish a sort of blood relationship between the foreigner and the savage tribe, there is ample reason for believing that its effect in requiring the foreigner to venerate the ancestors of the tribe is presupposed by those who accept him as a friend.

The barrier against Christianity formed by Ancestor-worship is solid and hard to pass. In China the people fed a shock of pain and revulsion on learning that Christians do not worship their deceased parents. When a Chinese becomes converted and abandons the practice he is regarded as having inflicted irreparable injury upon all of his ancestors. He has perhaps reduced them all to beggary. The stigma resting upon Christians is the more inexpressible and painful to endure because at the spring "feast of All-souls", every person in the Chinese Empire except the Evangelical Christians takes part in the worship of the dead.

Under these circumstances many wise men have advised against a too rigid rejection of Ancestor-worship, which may after all be nearly akin to filial respect. But the attitude of Christianity to this form of worship can easily be determined when its true character is understood. Dr. E. Faber succinctly stated its position, when the question was discussed in the Missionary Conference of 1890. In brief, "Ancestral worship presupposes the disbursement of souls to be subject to the same wants as living bodies; it demands real sacrifices to them; it makes the happiness of the living depend upon appeasing the desires of the dead; it is not merely commemorative, but it is a pretended intercourse with the world of spirits; it has developed an extreme view of paternal authority, placing it above the authority of God, and crushes individual liberty and it charms millions of people to the past and prevents sound progress."

Gibson (J. C.), Mission Problems in S. China, New York, Revell, 1906; Yates (M. T.), Ancestral Worship, Shanghai, 1887; Maine (H.), Early Law and Custom; Seebehm (H. E.), Structure of Greek Tribal Society, London: Religious System of the Amazusti; Ancestor Worship, Cullavay (H.), London, 1870.

AN-CHIA-CHWANG: A town in the province of Shan-tung, China; station of the ME, with 6 native workers, men and women, 2 village schools, 3,000 inhabitants, and 200 Chinese Christians.

ANDAMAN ISLANDS: A long narrow group of small islands in the eastern part of the Bay of Bengal. Area, 2,000 square miles. They include the North, Middle, South and Little Andaman islands, with a number of islets, and all are densely wooded. They are used as a penal colony. The climate is very unhealthy. The population in 1901 was 17,500 of whom 11,465 were convicts and 1,882 native aborigines.

The natives are a diminutive and barbarous people, who seem to be distinct from all other known races in physical features, language, and customs.

The people of these islands are averse to intercourse with strangers. Their religion is little known but seems to consist of worship of good and evil deities.

Missionary effort has been mainly directed toward the convicts at Port Blair.

ANDOHALO: District E. of Antananarivo, Madagascar; station of the Paris Evangelical Society, with 1 missionary, 45 native workers, men and women, 16 outstations, 16 Sunday schools and 640 communicants.

ANDEVORANTO: A village of 2,000 inhabitants on the eastern coast of Madagascar, and
The Encyclopedia of Missions

Andrews Antommavvo

an SPG station, founded in 1874. It now has 129 communicants under the care of one European missionary.

ANDREWS, Lorrin: Born April 29, 1795, at East Windsor (now Vernon), Conn.; graduated at Jefferson College, Pa.; Princeton Theological Seminary, 1825; sailed as a missionary of the ABCFM, November 3, 1827, for the Sandwich Islands, reaching Honolulu, March 31, 1828; was stationed at Lahaina with Mr. Richards. In 1831 he was appointed to establish the Lahainaluna Seminary, which was opened in September of that year with 25 pupils. During the succeeding ten years he exerted himself to found the institution on a permanent basis. He resigned his connection with the Board in 1842, because of conscientious differences of opinion. In 1845 he removed to Honolulu, and received the appointment of judge under the Hawaiian Government. For many years he sat upon the bench and officiated with ability and integrity. His services were highly appreciated by Judge Lee. For many years he acted as secretary of the Privy Council, keeping the records in English and Hawaiian. He resigned his office of judge in 1851, but the sum of $1,000 was appropriated for his benefit and continued by successive legislatures to the very last. During the later years of his life his mind and pen were constantly occupied. His Hawaiian Dictionary, defining nearly 17,000 words, occupied him for many years. His research into the folk-lore of the Hawaiian people had been very extensive. He died at Honolulu, September 28, 1868.

ANEIKADU: A village of the district of Tanjore, S. India, occupied as an outstation by the Leipzig Missionary Society. It has 10 native workers, men and women, and 356 communicants.

ANEITUM. See New Hebrides.

ANEITUM LANGUAGE: It is of the Melanesian family and is used by the people of an island of the N. Hebrides. It is written with Roman letters.

ANGOLA: A possession of Portugal, also called Portuguese West Africa, bordering the Atlantic, with a coast line of 1,500 miles. It has a thousand miles of bordering the borders of the French Congo to German Southwest Africa and extending back into the continent variable distances to the borders of the Congo Free State and British South Africa. It has an area of 484,000 square miles, and an estimated population of 4,119,000. That characteristic feature of the African coast, the line of cliffs approached by terraces, is continued northward through Angola. The country is well watered, especially in the north. In the south the rainfall is less, and many of the streams dry up. Great diversity of climate is experienced in such a length of coast line. There are also extreme local variations, due to accidental conditions. Vegetation becomes more abundant as you pass from south to north. The elephant and lion become scarce. Panther and leopards occur in the south. Insects are rare, but the rivers are well stocked with fish. Caouachou, orchilla moss (used in dyeing), gum copal, palm, acacia, baobab, etc., are chief sources of wealth. Manioc, maize, millet, sorgo, and Ensete, fruits and vegetables cultured. The country is also rich in minerals. The population of Angola is affected by the

northward movement of Boers; also by immigration from Brazil, and by the intermingling of Portuguese with the natives. But north of Mossamedes acclimatization of Europeans and a difficult and rigorous process. There are about 6,000 of European descent in Angola.

Preto is the name given to the negroes who have been brought into direct contact with European civilization, and who are found chiefly in the coast towns and their vicinity, and on the line of travel and trade. Among them are found many well-informed people, merchants, and colonial officials.

The tribes south of Benguela are supposed to belong to the primitive race, Bushmen or Hotentots, and partake of their general characteristics.

The Canguelas occupy the Upper Kubango basin. A great variety of social condition is found in studying the different tribes. They are represented as savage, but intelligent and enterprising. In some tribes trial by ordeal of the poisoned cup is practised. Their headdress is wonderful, surpassing that of most African peoples; their dress is scanty.

On the Congo is found the Balyote or Bacongo group. They were the founders of the ancient kingdom of Congo. That kingdom was lost about 1827, when the tribes have seceded. Roman Catholic influence was once apparently great, but evidently superficial. Fetishism is rampant, nearly every natural object being a fetish. The Bamba magicians have wonderful skill in feats of jugglery.

The principal centers of trade and general influence are San Salvador, capital of the old Congo kingdom, and the center of a flourishing Baptist mission; Ambriz; S. Paolo de Loanda, the capital and largest city for 3,000 miles on the west African seaboard; Dondo, at the head of navigation of the Quanza; Pamba, in the Ambaca district, terminus of the railway from Loando; and Bihé, the terminus of the southern trade route, 300 miles long, starting from Benguela.

Bihé is properly the name of the extremely fertile plateaus about 5,000 feet above the sea level occupied by rude and wholly uncivilized but shrewd people of mixed origin. It is the headquarters of a mission of the ABCFM. On the coast are Benguela, charmingly situated and Mossamedes, a well-sheltered port. Travel has been facilitated in recent years by the opening of new railroads. About 225 miles of railroad have been built, and other railways are projected, connecting the principal towns of the territory. There are also about 900 miles of telegraph in operation.

Apart from Roman Catholic missions under Portuguese protection, the missionary societies established in Angola are the BMS, ME, ABCFM, PB, and the FCMS. The BFBS also has an agency in Angola. The whole number of stations occupied by these societies is 14.

ANGORA: A city of 36,000 inhabitants; capital of the province of the same name in Asiatic Turkey. It is a place of considerable commercial importance, as it was in ancient times under the name of Ancyra of Galatia. The major part of the population are Mohammedians. It is a strong center of the Armenian Catholics. There are also Armenians, a few Greeks, and some Protestants. At Istanos, a
village a few miles from Angora, there is a Protestant church of influence and activity which affects all the region.

**ANGRA PEQUEÑA**: A town on a bay of the same name on the coast of German Southwest Africa. It is the seaport of Great Namaqualand, where the Rhenish Missionary Society has several stations and a colony of Europeans is slowly growing.

**ANG-TAU**: A village in the Fe-kien province, China, S. W. of Fuchau; station of the ME with 17 native workers, men and women, 4 outstations, 7 Sunday schools, 5 young people's societies, 5 common schools and 400 church members. Also written Tang-tau.

**ANGULANA**: A town S. of Colombo on the W. Coast of Ceylon; station of the WMS, with one missionary and 16 native workers, men and women, 3 outstations, 4 Sunday schools, 5 village schools and 65 church members.

**ANHALT-SCHMIDT**: A town in Cape Colony, South Africa. Mission station of the Berlin Evangelical Missionary Society (1860); with 2 missionaries, 12 native workers, men and women, 2 outstations, and 500 communicants.

**ANIAWA**: A small island in the southernmost group of the New Hebrides. Population, 192, all Christians.

**ANIWAN**: This language belongs to the Melanesian family and is used by less than a thousand persons inhabiting Aniwa Island. It has been written for missionary purposes with Roman letters.

**ANKLESWAR**: A town of 11,000 inhabitants near Broach on the N arbada River, Bombay, India; station of the German Baptist Brethren Mission, with a missionary and his wife, an orphanage, and 25 church members.

**AN-KO-CHUANG**: A town in the Chi-lj province of China; station of the ME, with 6 native workers, men and women, 1 high school, 1 village school, and 185 church members.

**ANLO**: A dialect of the Ewe language, q. v.

**ANNAM**: A kingdom under the protectorate of France, occupying the most eastern portion of the Indo-Chinese peninsula, east of Siam and southeast of Burma. Area, 30,000 square miles. Surface, irregular and mountainous. Rivers numerous, and, altho too shallow for navigation, most useful for irrigation. The country produces an abundance of rice, sugar, spices, and tropical fruits. The Annamese are somewhat akin to the Chinese in language and in many of their important customs, but they also partake largely of the Malay characteristics, and evidently form a link between the Mongolian and Malay races. They are generally quiet and inoffensive, indolent and fond of gayety. Their religion is worship, but not obliged to live in seclusion. The religions are Buddhism, Confucianism, Spiritism, and Christianity. Annam is governed by an emperor, with a French resident to guide his policy. Mandarins appointed by the emperor govern the provinces and control the standing army, which is comparatively large. The capital of the country is Huê, on a river of the same name. The early history of Annam is involved in obscurity; it is only known that wars with the neighboring powers determined its boundaries, and that the empire was formerly entirely subject to China.

In the 17th century, when Annam was most prosperous, the Jesuits (among them the celebrated Jesuit missionary, Alexander von Rhodes, who came there in 1615) introduced Christianity, and in spite of much persecution propagated it with such energy that at the close of the 18th century French priests had converted the emperor and established a hierarchy of great influence. Later, however, the doctrines were rejected by the emperors, and the priests and converts persecuted. One emperor, Tu-Duc, was especially opposed to Christianity, and the murder of several missionaries, between 1854 and 1855, served as pretext for the acquisition of a French colony in the East. In 1858 a French fleet was sent by Napoleon III., which succeeded in capturing several important towns, and altho the Annamese made stout resistance, the French succeeded in dictating terms of peace by which they became possessors of three provinces. These remain in their possession under the name of Indo-China, the only important French colony in the East. By this treaty three ports in Tonquin were opened, and Christianity was permitted throughout Annam. An insurrection occurred in 1862, which was quelled by the French.

There are no Protestant missions in Annam, the only missionaries being of the Roman Catholic Church. In the entire kingdom of Annam, with a population numbering (1801) 6,124,000, there are 420,000 Catholics, under the care of 125 European and 264 native priests, in 7 apostolic vicariates.

Tokhin, or France in the Far East, Norman (C. B.), London, 1894; Peoples and Politics of the Far East, ibid., London, 1895.

**ANNAMESE**: The language spoken in Annam belongs to the Mon-Anam branch of the Indo-Chinese family of languages. It has its own written characters, but has been written in Roman letters in some Bible translations. It is spoken by about 30,000,000 people.

**ANNFIELD**: A village in the Dehra Dun district, United Provinces, India; station of the CMS (1859), with 3 missionaries and 7 native workers, men and women, a village school and 206 communicants.

**ANOSIBE**: District S. E. of Antananarivo, Madagascar; station of the Paris Evangelical Society (1889), with 1 missionary, 2 unmarried missionary women, 62 native workers, men and women, 30 outstations, 30 village schools, 1 high school, 1 industrial school, and 25 communicants.

**ANTANANARIVO**: Capital of Madagascar. Climate, temperate. Elevation, 4,500 feet. Population (1901), about 50,000; of Hova, Malagasy, Polynesian and Micronesian stock, with each class speaking a separate language. Religion, fetishism; belief in charms and ordeals. Social condition, comparatively civilized. Occupations, metal and straw work, spinning, weaving, etc., in all of which skill is shown.

Station of the LMS and of the Paris Evangelical Society, to which the LMS transmitted the most of its work after the French occupation of the island in 1896. Together the Societies have 29 missionaries and 24 native workers, men and women, 9 high schools, 1 college, and a printing house. There are 30,000 church members in the district.
Also station of the Friends Foreign Mission Society, with 6 missionaries and 31 native workers, men and women. It has 2 high schools, a printing house and a dispensary, and 300 professing Christians.

Also station of the SPG with 6 missionaries and 8 native workers, men and women, and 733 communicants.

The Norwegian Missionary Society also has a station here (since 1869), with a hospital.

ANTIGUA: An island in the British Colony of the Leeward Islands, W. 38,000, chiefly negroes who are Christians. The Moravians have seven mission stations in the island.

ANTIOCH: A city of 17,500 inhabitants, in the province of Aleppo, Asiatic Turkey. It is situated on the Orontes River, about 20 miles from the Mediterranean Sea. The largest part of the population is Mohammedan. Greeks, Armenians, Roman Catholics, and a few Protestants make up the Christian part of the population. Alto the place has lost the importance of Apostolic days, it is still the seat of a Greek Patriarchate.

ANTIOKA: Station of the Reformed Presbyterian Churches of Ireland and Scotland, with 3 missionaries and 7 native workers, men and women, a dispensary, 2 village schools and 50 church members.

ANTOFAGASTA: A seaport in Chile, S. America, the terminus of a railway across the Andes into Bolivia. Population about 8,000; station of the ME, with 1 missionary, 2 Sunday schools, and 80 church members.

ANTSIRABE: A district near Betofo, Madagascar; station of the Norwegian Missionary Society, with 2 missionaries, and a hospital.

ANU: A town of the Volta Gold Coast, W. Africa. Population, 5,000. A station was founded here by the Basel Missionary Society in 1864, but in 1869 the city was destroyed by the Ashantis. In 1881, however, the station was rebuilt. There are now 5 missionaries and 31 native workers, men and women, with 21 outstations and 23 village schools. There are 740 communicants.

ANUPSHAHR: A town on the Ganges in the Bulandshahr district, United Provinces, India; station of the ME with 6 native workers, men and women, 8 Sunday schools, 5 village schools, a Young People's Society, and 600 church members.

AONLA: Town in the Rehilkhand district, United Provinces, India, S. W. of Bareilly; station of the ME, with 19 native workers, men and women, 8 Sunday schools, 4 village schools, and 750 church members.

AOMORI: A town of 15,000 inhabitants on the extreme northern coast of the island of Hondo, Japan. It is a station of the RCA with 1 missionary woman, 2 native workers, man and woman, and 30 professing Christians. Occupied in 1891.

It is also a station, occupied in 1893, of the PE, with 2 women missionaries and 2 native workers, man and woman.

It is also an outstation of the ME with 1 native worker.

APAIANG. See GILBERT ISLANDS.

APAM: A town on the coast E. of Cape Coast Castle, Gold Coast Colony, W. Africa; station of the WMS, with 1 missionary, 51 native workers, 42 outstations, 6 Sunday schools, 5 common schools and 325 church members.

APAMANA. See GILBERT ISLANDS.

API. See NEW HEBRIDES.

API, or BAKI LANGUAGE: The Api or Baki, belongs to the Melanesian family of languages and is spoken in the island of Api, New Hebrides. It is written with Roman letters.

APIA: The principal seaport of Upolu, Samoan Islands, with an excellent and much frequented harbor. Mission station of the LMS (1836), with 1 missionary, 357, 38 native workers, and 1,323 communicants.

Mission station of the International Medical Mission Association, with a missionary and his wife, 1 hospital, and 1 dispensary.

Also mission station of the Seventh Day Adventist Missionary Society, with a missionary and his wife and 3 unmarried missionary women. A book depot is kept up.

APICACO. Town in Tlaxcala, Mexico; station of the ME, with 8 native workers, 4 outstations, 5 common schools and 434 church members.

APPELSBOSCH: Village in Natal, South Africa; station of the Church of Sweden Mission, with 6 missionaries and 6 native workers, men and women. Connected with it are 6 outstations, 4 preaching places and 4 village schools.

APPENZELLER, Rev. Henry G.: Born at Sou- derton, Pa., February 6, 1858. Died June 11, 1902. Graduated from Franklin and Marshall College, Lancaster, Pa., in 1882; attended Drew Theological Seminary two years; appointed by Bishop Fowler, in 1885, as one of the first Methodist missionaries to Korea, arriving at Seoul with his wife, and settling in the city. During seventeen years he was one of the most faithful and efficient missionaries of the Methodist Episcopal Church and held, with honor, a number of responsible positions. He was president of the Pai Chai College at Seoul, principal of the Theological Department and pastor of three churches. As one of the translators of the Scriptures into the Korean language he made a permanent contribution to the cause of missions, and his linguistic services were highly esteemed by his associates of other denominations. The name of Pai Chai Hak Tang was given to the college by the King of Korea, who paid for the tuition of a number of pupils, and who showed the highest regard for the principal. On July 24, 1887, Mr. Appenzeller had the joy of hearing the testimony of the first convert in the mission; and Christmas day of that year he preached his first sermon in the Korean language, his text being: "Thou shalt call His name Jesus, for He shall save His people from their sins." In April and May, 1887, Dr. Appenzeller journeyed nearly 200 miles to Pyeong-yang, it being the first missionary journey taken in that direction, and during the following year he went to Wi-ju, the gateway to China, receiving eleven men into the Church on profession of their faith in Christ. In his explor-
ing itineraries, at a later date, he visited eight provinces of the kingdom; and during these missionary journeys he left a deep and lasting impression for good. In 1890 he took part in the organic. In 1890 he met in Seoul, and before his labor ceased in the afternoon of June 11, 1902, Dr. Appenzeller set sail for Mokpo to attend a session of the Board of Bible Translators, which had been called to meet that day. In the afternoon of June 11, 1902, the steamer was run into by another steamer near Gueulin Island, and with fourteen Koreans, three Japanese and eight of the crew, this devoted missionary lost his life.

**APOSTOLIC AND EARLY CHRISTIAN MISSIONS:** For the first three centuries of its life, the Christian Church was distinctively a missionary church. Its chief purpose was the spread of Christianity. It fought heresy bitterly, but for the great mass of the people, creeds were a secondary consideration. Preaching the Gospel took always the first place.

For the history of record, apart from the Book of Acts, and some references in the epistles, some have supposed that aside from Paul, Peter and John, and their immediate associates, there was little interest either in the Apostolic company or the great mass of believers, in the carrying of the Gospel message to remote sections. That this is incorrect, is manifest from the advance actually made (see Geography of Missions). It is impossible that a new faith should so rapidly have extended over so wide a territory and against such fearful odds, in comparatively so short a time without great effort. At the middle of the 2d century Justin Martyr wrote: "There is no people, Greek or barbarian or of any other race, by whatsoever appellation or manners they may be distinguished, however ignorant of arts or agriculture, whether they dwell in tents or wander about in covered wagons, among whom prayers and thanksgiving are not offered, in the name of the crucified Jesus, to the Father and Creator of all things."

Fifty years later Tertullian in his address to the heathen said: "We are but of yesterday, and yet we already have our cities, its lands, camps, your palace, senate and forum; we have left you only your temples."

Already Abgar, claimed by the Armenians as their first leader in the faith, had been baptized, and even if St. Thomas himself never visited India, a Christian teacher from Alexandria visited Mabhar in 190 and not long after it was reported that there were 350 strong churches in that land. Early in the 3d century twenty bishops from the Nile valley attended a council in Alexandria, while Tertullian's church at Carthage was but the leader among several in North Africa. It is to be remembered also that when Constantine made Christianity the religion of the Roman Empire, he accepted a situation already of remarkable character. It was no parallel to the conversion of some of the northern nations, where the ruler's will was all that was needed to insure a change of worship, regardless of a change of thought or of heart. No emperor, however mighty, could have made Rome Christian, had Christianity not already been woven into the very fiber of its national life.

In considering how this was brought about, the agencies, methods and underlying purpose must be kept in mind.

**Agencies:** The great agency of the Apostolic Church in the missionary enterprise was the rank and file of its membership. During the first three centuries there were very few who like Paul and Barnabas, Silas, Timotheus and a few others, gave their whole time to this. In the second, many were among the Gentile especially in the Roman Empire, who gave their entire time to the work. The third and fourth centuries, thousands of devoted missionaries, organized and systematized, were at work. The work of obscure men, for the most part laymen, and also for the most part not distinctively set apart for the work. The one supreme characteristic of the Apostolic Church in this respect is the missionary zeal and activity of the individual members. Women as well as men—merchants, miners, sailors, soldiers, craftsmen, voluntarily made it one of their chief objects, whether at home or abroad, in private or public life, to extend the Gospel of Christ to the ends of the earth. In no period since, was it true that every individual Christian was a missionary, and it was to this individualistic evangelism that was due the marvelous extension of those three centuries.

**Methods:** In all this, then, there was little organization. Bishops gradually acquired control in their own cities and districts, but all were equal, and there seems to have been no concerted action. Each man, whether in the centers or on the outskirts of the Empire, was free to conduct his dioceses much as he pleased and this freedom extended to the specific action of his individual followers, who were free to teach as they judged best, so long as they kept clear of heresy and made manifest in their lives the principles they professed. It was in the combination and accord of precept and practise that lay the great power of that early Church.

Yet there was after all a certain method apparent in this individualism. The special efforts were made in the great centers, the cities of the Roman Empire, and along the lines of commercial activity. As fast as the community in one place became a Christian, through a leader or workers tending there and expected to see that his diocese grew in numbers and influence. Thus Gregory Thaumaturgus was made bishop of his native city, Neo-Cesarea, in Pontus, when there were about twenty-seven Christians there. At the close of his ministry there were said to be but twenty-seven pagans left.

With the growth of the Church there developed also the aids to work. This is the period of the early versions—the Peshito and Curetonian Syriac for Syria and Mesopotamia; the Memphite, Theban and Bashmuric forms for Egypt; the Copto-Chaldean for the Upper Nile Valley; the North African and Italian Latin for Carthage and Rome. Alexandria, always a literary center, became, too, the seat of a catechumen's school, practically a missionary college from which trained workers were sent out to Africa, Europe and Asia.

**Notice:** In the earlier years of this period, the controlling motive in this missionary work appears to have been personal loyalty to the Savior and a desire that, as He had been rejected and crucified, so now He might be accepted and enthroned. There was indeed recognition of the need of the world. But the impelling impulse was less than their love for Christ and a desire that
He receive full honor. As the work continued the human element became more prominent. The risen Savior out of sight was to a degree replaced by the needy ones in sight. There was a better conception of the object of Christ's mission, in its relation both to the individual soul and to the multitudes the world. With God out before humanity, the human element assumed a larger place, and the salvation of men became more distinctly the object and motive of missionary labor.

With the opening of the 4th century there came a change in almost every respect. The active missionary propaganda of the Apostolic Church gave place to an effort to assimilate the great mass of heathenism, which, when Constantine made Christianity the dominant faith, accepted its forms without entering into its spirit. At the same time the loose individualism of the preceding period was followed by a closer, and more exact organization of the Church, change in political parts, partly to the necessity of better supervision to counteract the influences of heathenism, the growth of divergent and heretical creeds, and partly to incursions from the wild native tribes of the north. The Church had gradually become a nation, and the simpler forms possible in a community became inadequate to the new duties and responsibilities.

The result, so far as missionary work was concerned, was that the Church as a whole ceased to have any special interest in it, the immediate need filling the vision completely. It was the period of the great councils, and, to the leaders and the people generally, the conservation of the faith seemed more essential than its extension. The work, however, continued, and the Church apparently felt the burden of the nations, and the incoming of the hordes of East Goths, Vandals and Huns, presented opportunities as well as needs that taxed to the full the fervor of ecclesiasties at home, and such apostles as Ullias, Honoratus and Patrick set Europe, Gregory the Great in Arabia, Frumentius in Africa and the Nestorian missionaries who penetrated to Central and Eastern Asia, but left so little record that their achievements are clouded in obscurity. In agencies not so extensive and important as to attract the world's attention, the mission continued. The great mass of the Church gradually came to know nothing and care nothing about missions; the ecclesiastical leaders for the most part were content with their immediate duties, and individuals commissioned by the Church but scarcely supported by it were the sole agents.

With this period began, too, a movement toward national rather than individual conversion. Whole communities and even races were brought into the church en masse. So too, in this period, the motive that became so prominent in the next, of loyalty to and ambition for the Church, began to gain its hold. It was no longer Christ, the Savior of the needy soul, that filled the vision, so much as the "body of Christ," the Church to be, enlarged, solidified, glorified.

In a very real sense, then, the proclamation by Constantine making Christianity the religion of the Roman Empire was the greatest calamity that ever befell the Christian Church. It practically suffocated the already waning energies, and laid the foundation for that period of inactivity during which the Eastern Church crystalized and the Western developed the ecclesiastical machinery of Papacy. The missionary activity did not disappear entirely due to individuals rather than the Church, as will be evident in the record of the succeeding centuries until the Reformation, described in the article on Medieval Missions.

ARABIA: A peninsula at the southwestern extremity of Asia, lying within latitude 30° and 12° 45' N., and longitude 32° 30' and 60° E. Its inland boundaries are Egypt in the south and Palestine and Syria on the northeast. Commencing at the northeast, the waters which successively surround it are: the Persian Gulf, Gulf of Oman, Indian Ocean, Gulf of Aden, and the Red Sea. Its total area is estimated at over 250,000 square miles, and is roughly divided and described by foreigners as consisting of Arabia Petraea, the rocky mountainous region in the north; Arabia Deserta, the vast desert lands, and Arabia Felix, the "Happy" land, on the shores of the Red Sea and Indian Ocean. A study of the physical features of the country suggests a more rational division of the surface into equal thirds; one comprising the mountainous lands along the coasts; another the desert lands, which form almost a complete ring around the central plateau of tableland, which forms the third and the physical division.

Beginning with the coast district at the northwest, the principal districts are: 1. The Sinaitic peninsula, a triangle with the Red Sea as its apex, Palestine for its base, and the gulf of Suez and Akabah for its sides, corresponds very nearly to Arabia Petraea. 2. Hejaz extends from latitude 28° to 21° N. along the shore, and for a distance inland varying from 60 to 150 miles. It is for the most part sandy and stony, with only a few fertile spots around Medina and Meholay, a few days' journey north of Mecca. Around this holy city of the Mohammedan is the Haram, or Sacred Territory, at the southern extremity of the district. 3. Yemen occupies the remainder of the mountain coast as far south as Aden, and consists of two portions. That part lying along the shore is called Tehmah, and is flat and rocky, while the inland part, stretching sometimes 300 miles to the east, is mountainous, with precipitous hills and fertile valleys. The oasis of the southern Jowf is also included in this district. 4. Aden, a small peninsula on the coast, about 100 miles east of Bab-el Mandeb. It is the gateway to Perim, at the entrance to the Red Sea, is subject to Great Britain. It includes in its district a smaller peninsula, Little Aden, and the settlement and town of Sheikh Othman, ten miles from Aden, in all 70 square miles. Its population (1901) is 43,974. Aden is a coaling station, but its position makes it of great strategic importance.

5. Hadramaut and Mahrah occupy the 1,200 miles of coast between Aden and Cape Ras-el-Hadd. They have the same general features of the other coast districts—a sandy or rocky shore, behind which mountain ranges stretch back into the great desert—and little is known in regard to the interior, its inhabitants or products. 6. Oman and Hasa complete the line of coast districts, extending from Cape Ras-el-Hadd to the head of the Persian Gulf. The mountains in Oman are the highest on the coast, and the strip of coast land in Hasa has extensive fertile tracts. Mascat, the capital of Oman, is the only good harbor.

The central third of Arabia, especially Nejd, is the stronghold of the Arab nation. On the extreme north and northeast lies the desert, with
the oasis of Jof and Tema, varying the monotony of the stony waste. South of the stony desert lie the Nefud, or sandy passes, between which and Nijd is the district of Yemenia, with its two parallel mountain ranges running northeast to southwest. The principal provinces of the nine into which Nejd is divided are: Ared, the central province, containing the capital, Riyadh; Sedear, or Sudeir, in the highlands of the Toweyk mountain range, which runs north and south through the heart of Nejd; Yemenia, with its more fertile Ared, a fertile district, celebrated in native history as the home of brave men and beautiful women; and Woshem, a small but important district west of Ared. Of the desert surrounding Nejd, that portion lying to the southward is called the Dalna, or "Crimson," from the color of the sand, and covers 50,000 square miles. Of it little is known; not even the Bedouins have traversed its full extent, and European travelers shrink from its heat and sterility.

Climate. In the Sinaiitic peninsula the air is dry, clear, and, in the main, healthy, with winter rains. The summer temperature in the valleys is excessively high, but the nights are cool. In general the sandy slopes of the coast districts are hot and unhealthy, with a cooler, more healthy air in the mountains. In the desert the heat is intolerable, and in the Nefud district when the deadly "simoom" blows. This is a storm of a cyclonic nature, carrying in its center a noxious gas, which is death if inhaled in any quantity. It lasts from two to ten minutes at any one point, and the only way to escape is to cover the mouth with a cloth and lie down on the ground, where the heavier pure air is found. Camels instinctively bury their noses in the sand, but horses are often killed by the gas. The dwellers in Arabia are divided into the nomadic Bedouins, and the dwellers in towns.

1. The Bedouins are the shepherds and herdsmen, who wander about the deserts from one fertile valley to another. They have been called brigands, because they consider themselves the lords of the land, and, in the absence of constituted authority, take summary methods to punish thieving and robbery. In lieu of official fees for passports, they take whatever property they can lay hold of. By paying a fee to the first sheik whose territory is invaded, an escort is secured to the traveler, giving safety in that district; a similar payment to the successive sheikhs will insure like protection; but the neglect of such an acknowledgment of their rights will lead to loss of property and sometimes of life. The Bedouin is not murderous by nature, but of necessity, when his demands are resisted. There are northern and southern Bedouins. The southern or "pure" Bedouins are fewer in number and more savage in disposition. In all there are about 1,500,000 of the Bedouins. They recognize no authority save that of their chief, the sheik, for they are thorough nomadistic and consider every man equal. The chief may be such by the law of heredity, but is oftener chosen on account of his qualifications for the position. The Bedouin is nominally a Mohammedan, but he scorns the formalities of the Koran, and disregards its ceremonial requirements. One of theBedouin does not mingle with the devout who go there, nor will he always spare the caravan of pilgrims that passes through his territory. Among some of the tribes a lower religious belief exists; all gradations between sun-worship, tree-worship and no worship at all, have been found.

Lying, perjury, sensuality, and theft are their vices, while the characteristic of the Bedouin is a promise to the extent which the romancers chronicle are not uncommon. With all their bad traits, they are to be admired for their shrewd common sense, allied with a sarcastic, humorous side of their character. Their dress is simple, and the long brown robe, with crooks, together with short knives and old matchlocks, with which they seldom fail to hit the mark.

2. The sedentary Arabs number about six-sevenths of the entire population of the peninsula of Arabia. The Koreysh are the noblest of the race, and claim direct connection with the Prophet. Their clan ties and national feeling are very strong, and they own allegiance to their tribal head, the Sheikh, Imam, or Sultan. Where the doctrines of the Wahabees prevail the Mohammedan has a reputation as a sworn enemy of Christianity, and the Arabs make them the more inclined to give full scope to their religious principle of non-intercourse with people outside of Islam. Death would certainly smite any Christian discovered in the Sacred territory of Arabia, and the risk of death would attend travel in any part of the interior of the country. It is for this reason that Mohammedanism is the only religion professed in Arabia at any distance from the coast-line.

In person the Arab is tall, well formed, lithe, with dark hair and eyes. Physically and morally, the race compares favorably with any of the races of mankind; mentally, it is superior to most races. Special traits are found in the different provinces. The people of Hejaz are fickle; those of Yemen are noted for gentleness and pliability; together with revengefulness; the tribes in Nejd possess a reputation for tenacity of purpose and dignity of deportment. A love of sport and games is found among the races of Oman and Hasa which is absent elsewhere.

Arabic is spoken in its purity in Nejd and Shomer, more inelegantly in the other provinces, until in the southern provinces it is merged into an African dialect. Education is deficient; the teaching of the young is carried on mainly in the household, where the father teaches his sons to read and write. The girls are not instructed. How it is that this is not the case among the Arab children.

The total number of inhabitants of Arabia proper is estimated at about 6,000,000. Of this number the people of Hejaz (300,000) and Yemen (900,000) are admittedly subjects of the Sultan of Turkey. The remaining 4,800,000 of Arabia are governed by their own chiefs (Emir or Imam). Turkey claims the right to rule the whole peninsula but has not yet been able to make good the claim.
Missions have not found entrance to Arabia as yet, owing to the determined attitude of Mohammedanism toward dissent from its teachings wherever it has power to enforce the death penalty. Two notable attempts have been made by loving service to break through the barriers of fanaticism. One of these is the Keith-Falconer Mission at Aden (now carried on by the UPS), with its chief station at Sheikh Othman on the high land back of the seaport of the same name. The other is that of the Arabian Mission of the RCA operating from Turkish and independent territory on the Persian Gulf, with three stations, of which the most effective and most hopeful form of work is that of the hospital and dispensary:

ARABIAN MISSION. See Reformed Church in America, Board of Foreign Missions.

ARABIC: The Arabic language is closely allied to the Hebrew and Syriac, of the Semitic family. This appears in Bible translation, where the Hebrew may be turned into good English and translated into Arabic with comparative ease. Difficult and ambiguous passages can be translated word for word, often by the same word that is used in the Hebrew, leaving the ambiguity the same in the translation as in the original. It is rich and refined; has an abundant and valuable literature, and an active effort for Arabia is that of the Arabian Mission of the RCA operating from Turkish and independent territory on the Persian Gulf, with three stations, of which the most effective and most hopeful form of work is that of the hospital and dispensary:

ARABKIR: City of Eastern Turkey, on the caravan road from Aleppo to Trebizond, and 50 miles northwest of Harput. Population, 30,000. Mohammedans, Armenians and Protestants. The prosperity of the town is due to the caravan trade and the cotton industry. The vicinity is rich in fruit trees. It was formerly a station of the ABCFM, but is now an outpost of Harput. Its evangelical church has lost many members through integration, due to the insecurity of the country.

ARAGUARY: Town in Minas Geraes, Brazil; station of the PS (1895) with a missionary and his wife and an unmarried missionary woman; 14 outstations, and 250 church members.

ARAKAN: For sixty years a British province of Farther India, now a part of the province of Burma, since the war of annexation of 1855-86. It is separated from Burma proper by the western Yoma range of mountains, which have many volcanoes, mostly quiescent, and rise from 4,000 to 10,000 feet above the level of the sea. The habitable portion is a narrow strip of alluvium, extending from the mountains to the Bay of Bengal. It is the westernmost of the delta branches of the Irrawaddy on the south to Chittagong on the north, and is bounded on the W. by the Bay of Bengal. Above Ramree Island the territory widens, and from 19° to 21° 30' several short ranges of mountains are interposed between the Yoma range and the Bay of Bengal, and are inhabited mostly by the hill tribes. Its area is 16,500 square miles, and its population is 672,000.

The people are of the same Mongolid stock as the Burmese, excepting the inhabitants of the northern mountainous region who are of the same stock as the Karens. The religion of the people of the towns and the lowlands is Buddhism, while that of the hill tribes is spiritism or nature worship.

Missionary operations were commenced by the BMS about 1826 and by the ABMU in 1833, both missions being abandoned after some years because of the deadly climate. The ABMU re-established its mission in 1888 at Sandoway and has met with good success among the hill tribes and the Tamils and Telugus who go to Arakan for work. Also written Arsean and Arracan.

ARAWAK: This language belongs to the South American group, and is spoken in Dutch Guiana. It is written in Roman letters and is hardly one of the permanent languages since only a few thousand people are known to use it.

ARCHBISHOP'S MISSION to the Assyrian Christians: The interest of the Church of England in the Nestorians was especially aroused by the report of the Royal Geographical Society's expedition to the Euphrates Valley in 1837. This resulted in the sending out of a joint expedition by the Royal Geographical Society and the SPG. Their report supplemented by numerous appeals from the Nestorians occasioned another journey in 1876, and the sending out of a missionary in 1881, tho it was not until 1886 that the work was put on a permanent footing.

The mission has no regular organization or constitution, but is carried on under the auspices of the Archbishop of Canterbury. The mission priests, who are all unmarried, receive no regular stipends beyond £25 annually for personal expenses, but live from a common fund. The work carried on is largely educational. A college has been formed for priests and deacons, besides 5 high schools and 40 village schools, the total number of scholars being roughly estimated at 1,200. Besides the educational work, the mission clergy exercise the function of ecclesiastical and temporal judges, deciding disputes between the native Christians and divorce and other spiritual cases, according to the Canon Law of the ancient Chaldean Church.

The object of the Mission is stated to be "in the first place to train up a body of literate clergy; secondly, to instruct the youth generally in the religious and secular knowledge; and thirdly, to print the very early liturgies and service books, to which the Assyrians are much attached, which have never been printed in the original, and of which the very primitive character is shown by their freedom from doubtful doctrine. The Mission seeks in no way to anglicize the Assyrians on the one hand; nor on the other to condone the heresy which separated them from the rest of Christendom, or to minimize its importance." A committee connected with the Protestant Episcopal Church of the U. S., aids the mission.

ARECIBO: A seaport on the N. coast of Porto Rico. Population about 8,000; station of the ME (1901) with one missionary and his wife, and a Sunday school.

ARGENTINE REPUBLIC: One of the most important of the South American republics. It occupies that portion of the continent south of
latitude 22° S., with the exception of the western slope of the Andes which forms Chile. It is bounded on the north by Bolivia and Paraguay and on the east by Brazil and Uruguay. Its southern boundary has long been a matter of dispute with Chile, but was settled by treaty in 1881, according to the terms of which Patagonia has been separated from the Republic as far south as the Straits of Magellan, along with the eastern portion of Tierra del Fuego. At the same time a line running along the crest of the Andes was defined as the western boundary. At present the country is divided into 14 provinces and 9 territories, with a combined area of 1,319,247 square miles and an estimated population, in 1900, of 4,659,067. The provinces are: Buenos Aires, Santa Fé, Entre Ríos, Corrientes, Ríoja, Catamarca, San Juan, Mendoza, Cordova, San Luis, Santiago, Tucuman, Salta, Jujuy. With such an extent of latitude the climate is most varied, though in general healthful. All gradations between a temperate cool climate and a moist, tropical one may be found in this Republic. In Northern Patagonia the climate resembles that of the British Isles, while Buenos Aires and the vicinity of the Fuego Flats is tropical.

A dry cool temperature prevails along the mountain slopes, but along the coast at the north a thoroughly tropical climate is found.

The most remarkable feature of the country is its great plains or pampas, which occupy about three-fourths of the surface, stretching 2,000 miles in length and 500 in width. On these plains great herds of cattle are raised, and within late years wheat has been grown. The population has a large percentage of foreigners (Italians, French, Spanish, Germans, English), and the remainder consists of descendants of the Spaniards and Guaraní and Quichua Indians. Negro descendants are scarce, as few slaves were brought to this section. Spanish is the prevailing language, the in Corrientes the Guarani language is spoken, and Quichua in Santiago. The government encourages immigration from the south of Europe.

Although it has an area twenty times as large as that of the New England States, the Argentine Republic contains a population of less than three per square mile. The broadest religious liberties in America and the excellent system of education founded by the late Baron Hirsch for Jewish refugees is most flourishing.

The Argentine Republic was occupied as a Mission field in 1836 by the ME, which now has 5 stations there; and in stations and outstations about 2,000 communicants connected with its churches. The SAMS, the Seventh Day Adventist Missionary Society, the International Medical and Benevolent Society, the South American Evangelical Missionary Society, and the Missionary Pentecostal Association have established stations at Buenos Aires. The BFBS and the YMCA also have agents in that city. The Christian and Missionary Alliance and the Plymouth Brethren carry on missionary operations in two or three places, but no published statistics give information as to its extent.

ARKONAM: A town in Madras, India. Mission station of Established Church of Scotland; 4 missionaries and 23 native workers, men and women; 7 outstations, 11 village schools, and 90 church members.

ARMENIA: In strict use of the term, there is no Armenia at the present day. The name is not used either politically or geographically with reference to a definite territory. When used, the term refers in general to a vaguely defined region centering about Lake Van in Eastern Turkey, and extending thence north and southwest. Ancient Armenia was also a country whose bounds continually changed with the fortunes of war. Its northern limit was sometimes the Kur River, now in Russia; its eastern boundary was once, at least, the Tigris, and is usually the Euphrates River. The greater part of the region thus described now lies within the Turkish Empire and is also called Kurdistan.

In order that misunderstandings may be avoided it should be remembered that this region contains only a fraction of the Armenian Race. It is inhabited by Turks, Armenians, Russians, Persians, Kurds, Circassians, Greeks, Nestorians, Yezides, Syrians and Jews. These all have had long residence in the country, which is now divided between Turkey, Persia and Russia. The Armenians are scattered over the three empires.

ARMENIAN CATHOLIC CHURCH: Since the Council of Florence, A.D. 1439, a considerable body of Armenians have been connected with the Church of Rome. As is the case with members of other branches of the Eastern Church which have accepted the supremacy of the Roman pontiff, they are allowed to retain their own ancient liturgy and many of their peculiar usages. In Turkey, Armenian Catholics as a rule avoid using their own language in social life. On the whole, they are more frequently given to adhering to the Turkish Government than members of the Gregorian Armenian Church. The congregation of the Mechitarists, which was formed by the Abbot Mechitar, belongs to them. They possess a famous monastery on the island of San Lazzaro, near Venice, from which center they have successfully labored since 1702 for Armenian literature and education in the interests of the Roman Catholic Church. The Orthodox Armenians are inflexibly opposed to these schisms, as they call them.

ARMENIAN CHURCH: Its own writers claim that its history goes back to the time of Christ. One Abgar or Abgarus, King of Edessa, is said by Moses of Chorene, the Armenian historian, to have been converted by hearing of the wonderful works of Jesus and to have been baptized by Thaddeus, one of the seventy disciples first sent out by Jesus. This story was held by the Armenians to have been their king, although Tacitus calls him King of the Arabs.

It was not, however, until the 4th century that the Armenian nation, as a whole, accepted Christianity. At the beginning of that century...
St. Gregory the Illuminator preached at the Court of Armenia with such effect that from that time to this Christianity has been the national religion of the Armenians. For this reason the Armenian Church is often called "the Gregorian Church." The Armenians themselves, however, call it "the Church of the Illuminator (Lusavorichagan)."

Persecution only served to enlighen the Church to the people, and from that time it has been identified with their nationality. Under Turkish rule each religious body is also a political organism. The Armenian Church is little more than that at present. It is therefore inapplicable identified with the race, and is pervaded by much of the corruption of Oriental Christianity.

Church Doctrine: 1. By accident—some say purposely—the Armenians were not represented in the Fourth Ecumenical Council which met at Chalcedon in 451 a.d., and which condemned Nestorianism and Eutychianism. When the decisions of the Council were reported to them, owing perhaps to the poverty of their language at that time, it not having proper words to distinguish the two ideas of the nature of Christ and the person of Christ, the decision was misunderstood. In a synod of Armenian bishops in 491 the decision of the Council of Chalcedon was rejected, and at one of the synods of Tivan, now in Russia, their capital at that time, they declared decidedly for the Monophysite doctrine. This doctrine is not made prominent in their modern creeds.

Other leading characteristics of the Armenians are:

2. They believe the Spirit proceeds from the Father only.

3. They accept seven sacraments, altho in practice, baptism, confirmation, and union are intermingled. They baptize infants eight days old or less by threefold immersion, immediately offering them the communion.

5. They accept transubstantiation, and worship the consecrated elements as God.

10. They believe in the perpetual virginity of Mary "the Mother of God."

11. They regard baptism and regeneration as the same thing, and have no practical conception of a new birth. All are saved who partake of all the sacraments, do proper penance, observe the fasts of the Church, and perform good works.

12. Original sin is removed by baptism, actual sin by confession and penance.

Services are held in the church each morning at sunrise and each evening throughout the year. The altar is invariably toward the east. The sacrament of the Lord's Supper is observed twice a week, but the people partake usually only twice a year. Mass is observed as one of the formal rites of the Church. Communication to the priest is a necessary preparation for participation.

Church Government.—Originally the Church was under one spiritual head, the Catholicos, who was the general bishop. He resided at first at Sivas but later contentions arose, and with them divisions, until now there are those who hold his office, one, and those who are the Supreme Catholicos, who resides at Echmiadzin, their holy city, now in Russia; one at Aghtamar, upon an island in Lake Van, in Eastern Turkey; and one at Sitz, in the ancient province of Cilicia. It is said that at the consecration of the Echmiadzin Catholicos, the hand of Gregory the Illuminator is even now employed as a medium of succession. The Catholicos alone can ordain bishops and consecrate the sacred oil which is used in the various ceremonies of the Church.

Besides the Catholicos, there are in Turkey two patriarchs, one of whom resides at Constantinople and one at Jerusalem. These offices were established by Mohammedan authority for political purposes only. The patriarch must have a bishop's office ecclesiastically, but this is added considerable influence with the government, and over all Gregorian Armenians in civil matters. The patriarch of Constantinople is, by virtue of his office, the recognized civil head of the Armenian Church in Turkey.

There are nine different grades of Armenian clergy, all of whom are consecrated by the laying on of hands. These, in the order of rank, are: Catholicos, bishop, priest, deacon, sub-deacon, candle-lighter, exorcist, reader, and porter. There is also a class called vartasbeds, who are preaching monks. The priests are married, and must have a wife at the time of ordination, but can never remarry. The priest cannot become a bishop unless his wife dies.

Obstacles Peculiar to Missionary Work Among Armenians: 1. The idea that the Church is coextensive with the Armenian race, so that one who withdraws from the Church rejects his nationality. 2. The Church is already Christian, and consequently Christian life has little relation to the Christian profession. 3. The difficulty, from the side of the Turkish Government, and in maintaining Christian and educational institutions. 4. The existing poverty and oppression, accompanied by Oriental penuriousness. 5. The turning of the attention of young men to the Western world, as a refuge from oppression and massacres, and the consequent emigration of large numbers.

Peculiar Encouragements: 1. The religious nature of the race, and the fact that they accept the Bible as the Word of God. 2. The desire for education. 3. The peculiar relation of the Armenians to the 14,000,000 of other races among whom they dwell, and who must be reached largely through the evangelized Armenian Church. 4. Since mission work began among the Armenians, there has been a gradual rejection of their superstitions and reliance upon rites, and a marked awakening in the line of education. 5. Of late years, owing to the urgent demands of the people for the Gospel preaching, the vartasbeds, bishops, and sometimes the priests and teachers, preach, and their sermons are often evangelical in tone and full of wholesome advice.
In ecclesiastical matters the Armenian Church reckons A.D. 554 as the year 1. This is the period of the date found in nearly all old manuscripts of the Church.

**ARMENIAN LANGUAGE:** Belongs to the the Irano branch of the Aryan family of languages. It has two marked divisions, the ancient, written language, which is rich in vocabulary and idioms, and the vernacular, which has dropped many of the older forms and constructions, and contains Persian and Turkish roots and idioms. The difference between these two branches of Armenian is very marked; it is something the same as that between the Latin and Italian. The ancient language was the product of an age of learning, and was then embodied in literary works. The modern tongue is the result of centuries of ignorance, without books, literature, or education. The difference between these two branches is now so great that persons unacquainted with modern Armenian understand little or nothing of the classical language.

There are two principal spoken Armenian dialects at the present time—the Ararat dialect, which is spoken by many of the Armenians in Russia and Persia, and the western dialect, which is used in Southern Russia, Western Armenia, and Eastern Asia Minor. The Bible has been translated into both these dialects. The difference between these dialects consists mostly in forms and constructions.

Also there was a language, there was no Armenian alphabet until the beginning of the 5th century. At that time Mesrop, one of the learned saints of the Church, invented 36 of the 38 characters; the two others were added later. The relation of Armenian to other languages is yet a question of discussion and doubt.

Perhaps one-third of the Armenians in Turkey, especially those in the southern and western parts, and in the Kurdish Mountains, have lost their vernacular, and speak only Turkish or Kurdish. An effort is being made in Russia to form a Russian upon the Armenians in place of their own tongue.

**ARMENIANS:** It is probable that no country of the size of that anciently called Armenia now has so many separate races preserving their identity among its inhabitants. The early history of these peoples is so mixed with myth and legend that the truth is difficult to find. During the Assyrian and Median periods there was evidently a great organized monarchy, with a strong military power, in the Lake Van basin. The Van inscriptions show a line of kings who were, both in civilization and in military powers, far in advance of any of their contemporaries in neighboring kingdoms. At times they were formidable enemies to the Medes.

This country was well known to the Assyrians as early as the 9th century B.C. At that time three principal races occupied the territory. These were the Nairi, who were spread from the mountains west of Lake Van along both sides of the Tigris to the Euphrates, and even farther; the Urarda (people of Ararat), who dwelt to the north and east of the Nairi, on the Upper Euphrates, about Lake Van and possibly on the Araxes; and the Minni, whose country lay to

the southeast of the Urarda, in the Urmi basin. The Nairi, Urarda, and the Minni were probably Turanian or, at least, non-Aryan, races. Their country was in Western Armenia, between the Babylonians, and not the Medes, the Persians, or the Phrygians.

Besides these three races, it is evident, according to Sayce, from inscriptions recently deciphered, that, even at the time of the Egyptian King Thoutmosis IV. (1420-1400 B.C.), a country was in the north called the Hitites, or Khi. In the records of the conquests of Assur-nazir-pal mention is made of his conquests among the Hitites. As far as we can learn, nearly all of these conquests were made within the limits of Armenia or upon its borders. What became of this people is not known at the present day.

These races appear to have maintained their independence until the time of Assur-bani-pal, about 640 B.C., when the last king of this series succumbed to the Assyrian yoke.

But, at the time of Herodotus, everything seems to indicate that a strange people had entered the land, bringing with them a new language, new names and customs, and a new religion. The source from which they came is doubtful. Herodotus and Stephen believe they came from India, while their language and religion would indicate Media. One thing is certain: the old Turanians had ceased to rule, and the Armenian race had been formed, which is undoubtedly a mixture of the ruling Aryan tribes with the primitive Turanian populations. The new word "Armenian," "used in Isaiah xxxvii:38 and 2 Kings xix:37, is an incorrect translation for "the land of Ararat."

Armenian historians describe the events of some sixteen centuries respecting which contemporary evidence has not yet been found. According to them, the first ruler of Armenia was Haik, the son of Togarmah, the son of Gomar, the son of Japheth, the son of Noah. This Haik is said to have left Babylon to escape the tyranny of Belus, the King of Assyria. Belus pursued him to the land of Ararat, and there, in a great battle, was slain by Haik. This occurred some twenty-three centuries B.C. At this time the Armenian kingdom was set up. Even to this day the Armenians call themselves Haik, and their country Haikasan. Several centuries later, when they say, Aram, the seventh from Haik, having incurred the hatred of the Queen of Assyria, was slain in a battle with that nation, and his kingdom became an Assyrian province.

It may be mentioned in passing that the name Aram appears among the kings who left inscriptions upon the rocks at Van. But neither his race nor his language shows any affinity to the Armenian.

The Armenian histories narrate that at the time of the captivity of Israel a certain number of the Hebrews escaped to the mountains of Armenia, and were permitted to remain there. The later Armenian King Dikran (Tigranes) was the friend and ally of Cyrus. His successor was Vahakn, celebrated in song and story for his great victories, and deified after death.

The last of the Haik dynasty was Vale, who was defeated by Darius III. He was succeeded by the Macedonians, and was defeated and slain by them. From that time Armenia was trampled by conquering armies until 190 B.C., when the country was freed by two Armenian nobles, who divided it, one of them ruling over Armenia Major, and
During the time of Arsaces, Armenia Minor and Cilicia were conquered by Rome, and the Armenian throne was established. It was in this respect, as in others, the Jews. With their dispersal throughout the world, however, the Armenians intermarried with other races and a distinct tendency to race disintegration has appeared.

See also Armenia, Armenian Language, and Armenian Church.

**Personal Characteristics:** As far as moral traits are concerned, the Armenian compares favorably with the other races of the East. Ages generally disposed them to quiet submission. They have now little hope of political restoration as a nation, although a constant agitation is carried on with that end in view. The Armenians are cultivators of the soil, artisans, merchants, and bankers. They are persevering and shrewd in financial dealings. In Asiatic Turkey the Greeks alone can compare with them in trades, professions, business ability, and general intelligence. The Greek is more speculative and the Armenian slow and more cautious. In the finances of the Turkish Government, some Armenians hold high positions, and in many ways they have rendered themselves indispensable to the prosperity and life of the country. In spite of the general increase of poverty throughout Turkey, the Armenians, up to the period of the massacres of 1895-96, have done more for Armenians than the other races.

The number of Armenians who are now scattered throughout the world is estimated at from 2,000,000 to 3,000,000. Perhaps two-thirds of the race reside in Turkey. The rest are in Russia, Persia, India, China, Africa, Europe, North and South America, and in nearly every country of the world. Up to the present time the nation has preserved its individuality to a remarkable degree, resembling in this respect, as in others, the Jews. With
that his immediate and appropriate duties were connected with the cause of education, all the schools of the kingdom coming under his supervision, and that no government officer or mission-ary was brought into such close intimacy with the nation. Tho his week-day duties were so abundant and onerous, Dr. Armstrong never spared a moment to minister to the spiritual wants of his parishioners. He was an eloquent preacher in the Hawaiian language, and always listened to with deep interest by the people.

ARNI: Town in the North Arcot district, Madras, South India. Climate, tropical. Population, Hindu, Muslim, with a few Christians. Language, Tamil, Telugu, and Hindustani. Mission station of the Reformed (Dutch) Church in America, established in 1854. It has 2 missionaries and 64 native workers of both sexes, a publishing house, 17 outstations, an industrial school, and 18 village schools. The professing Christians number 300.

ARNO. See MARSHALL ISLANDS.

ARNOT'S GARENGANZE MISSION. See CHINA MISSION.

ARORAL. See GILBERT ISLANDS.

AROUCO: A town of Central Trinidad, east of Port of Spain and northeast of San Fernando. Mission station of the UFS, with 1 native worker and 185 church members.

ARU ISLANDS: A group of islands in the Dutch East Indies lying W. of New Guinea. The population numbers about 25,000. The Netherlands Missionary Society has a station on Wokan, the largest island of the group.

ARUPPAKOTAI: A town in the Madura district, Madras, India; station of the ABCFM, with a missionary and his wife, 94 native workers, men and women, 85 outstations, a high school, 42 village schools, a YMCA, and 965 church members. Also written Arrupukotai.

ARYALUR: A town of the Trichinopoly district, S. India; station of the SPG, opened in 1825; has 13 native workers, 6 preaching places, 4 village schools, and 320 native communicants.

ARYA SOMAJ: This body is one of several societies or organized bodies of Hindus which admit the spiritual and moral degradation of the people and seek to introduce reform. It originated in the Nizam of the Deccan, and while it has made some growth in Central India, its chief strength is in the Punjab. It is far more antagonistic to Christianity than the Brahma Somaj. Such antagonism is demanded by the appeal which it makes to the patriotism of Hindus, as exemplified in its watchword of "India for the Indians." In its view that man is a traitor to India who accepts Christianity. This political quality in its aims doubtless explains in some degree the vigor seen in the Arya Somaj.

Its religious ideas also contain elements of strength. It teaches that God is one God, the Creator of all things, and the kindly Well-wisher of all His creatures, who, however, has never revealed Himself by incarnation. This monotheistic teaching it claims to find in the four Vedas, which alone, by the way, it accepts out of itself. This body, in fact, by its views on religion, is a thinly disguised Brahmo Samaj.

Religion, according to the Arya Somaj, consists of obedience to God, study of the Vedas, contentment with one's lot, and the practise of truth and justice toward all men. The doctrine of the transmission of sins is the true eschatology, for it right all wrongs and at the same time cures, in time, the salvation of all from the condition of sin, commonly called Hell.

Some remarks on details will better show the bearings of its curious creed:

(a) Its testimony for the monotheism of the Vedas is clear and explicit. (b) It is inconsistent in adopting the schools of philosophy in general and Buddhism in particular, at the same time that it differs from most of them in its positive theism and in its theory of creation. (c) Its humane elements in respect to woman and child-marriage are evidently borrowed from Christianity and the higher sentiment which it has created. (d) Its doctrine in respect to caste is a virtual arraignment of the entire Hinduism on the ground of inferiority. (e) It strikes a blow at the all-prevailing pessimism of India in ascribing benevolence of design to the supreme and personal creator of all things. In this respect it approaches very nearly to the Christian view and to that of Plato and Aristotle. (f) It is a characteristic feature of the Arya Somaj to claim that its religious teaching is more spiritual than the old Hindu faith in its conception of heaven and hell, which it looks upon, not as places, but as characters and conditions; on the same principle, caste is character and not an essential of birth. (g) Brahmo Somaj is exalted in its ethical standards, and it gives to ethics a godward side. Obedience to God is one of its foremost requirements. (h) Its denial of all incarnations of deity is a two-edged sword, which strikes at both Hinduism and Christianity. It is so far in accord with Islam. (i) It approves of Yoga and asceticism, yet its definition of true religion is as practical as that of the apostle James. It embraces the cardinal virtues of life, both active and passive—such as contentment, repression of the passions, the return of good for evil, knowledge of the divine, obedience to God, and truthfulness and just dealings toward all men. (j) Its positively missionary character is in sympathy with Buddhism and Christianity, rather than with Hinduism. (k) Its advocacy of female education is a proof that it has caught the spirit of Christianity. In no one race and no one tribe do the Arya Somaj strike more deeply at the root of old Hinduism than in its policy with respect to women. (l) It apparently attempts a compromise between true theism and the prevailing pantheism. It subordinates the human soul in the infinite soul, and apparently destroys its absolute distinction into deity; yet it speaks of the soul as a real entity, and maintains its free will, and therefore its moral responsibility. (m) Its doctrine of transmigration is exceedingly plausible. No better reasons could be given for such a theory of eschatology.

The relation of the Arya Somaj to Christianity and to Western thought is unique and full of interest. It is exceedingly hostile to Christian propaganda, and yet it is a far more efficient handmaid of Christianity than was the Brahma Somaj in its most palmy days. It is more efficient, because its attitude toward all Hindus is more conciliatory, and therefore more persuasive and influential. It is less radical as to changes in doctrine, and yet not one more step radical with respect to those great social movements which Christianity in the West has thus far neglected. Moreover, the Arya Somaj is a real ally of Christianity against the various current phases of Western infidelity. It takes the side of truth against the agnosticism of Huxley and Herbert Spencer. It is strongly theistic. It believes in
an intelligent and omnipotent First Cause, and a real creation of the world. It maintains benevolence of design in the creation and government of the world, which Tyndall and Darwin reject. It is in advance of Marx, Müller in the doctrine of a personal revelation of God to man. It brings all virtue and philanthropy within the domain of religion, and is a rebuke to all those who would dispense with God in the government of human affairs. It challenges all forms of pessimism, ancient or modern, Eastern or Western, and maintains that the one God of the universe is wise and good, and therefore worthy of all reverence and love.

Nevertheless, while modern Aryanism is in some sense an ally of Christian civilization, it must not be taken for granted that it is more purely of the nature of an entrenched system of essential Hinduism. The more nearly it counterfeits the truth of God and shuns disgusting rites, the more plausible does it become. It considers that it has adjusted itself to modern science and progress, and needs no further change. Christian missionaries must bear in mind the fact that the Arya Somaj is an aggressive and bitter enemy of Christianity. It hopes to bar the extension of the teachings of Jesus Christ in India, just as it hopes to check Islam, or to overthrow the dying superstitions of popular Hinduism. In order better to attack Christianity it is borrowing from Western sources at the Bible a logic and a vocabulary and from the missionaries, a carefully proven theory of the uses of school, pulpit and press for purposes of propaganda. Its enmity to Christian teachings is deliberate and permanent.

This enmity might be a source of dread to the missionary, were not the Arya Somaj fatally weak in risking its whole system upon the untenable idea that it is the purest form of Hinduism. Because of this weakness which must some time be revealed, this active organization will serve its day, holding what light it has before the people, and then it will fall because it has no stable foundation.

ASANSL: Town in Bengal, India; station of the Anglican Episcopal Church, North, with 3 missionaries and 4 native workers of both sexes, 3 village schools, an orphanage, young people's societies and about 325 professing Christians.

ASHANTI LANGUAGE: This language belongs to the Negro family of African languages, and is spoken in W. Africa by about 3,000,000 people along the Gold Coast. For missionary purposes it has been written with Roman characters. It is also sometimes called the Oshi language. It exists in two dialects, the Akwapim and the Fanti.

ASHTON, Rev. W. : Born July 13, 1817. Died March 29, 1897. He was a missionary of the LMS at Barkly West, South Africa, and during a service of fifty-four years in the mission field he, as a self-sacrificing, consecrated missionary of the cross, did much for the enlightenment of the Dark Continent.

ASIA MINOR: Originally confined to a small section on the border of the Ægean, the term has come to include that portion of Asiatic Turkey between the Black Sea on the north and the Mediterranean on the south, the Marmora and Ægean seas on the west, and the Euphrates Valley on the east. This last boundary is vague, as the Euphrates is tortuous in its course. It is, however, sufficiently accurate for practical purposes. See Turkey.

ASIATICS IN THE UNITED STATES: The discovery of gold in California, in 1849, opened the way for the immigration of large numbers. In the one year of 1852 there were 20,000 arrivals. Twenty-five years later, there were no less than 150,000 in the United States. Of these, 30,000 were in San Francisco, somewhat more than this number in other parts of California, and the remainder scattered elsewhere. In San Francisco, Chinatown embraces the greater part of fifteen blocks, in which Chinese life as seen in China is quite accurately reflected. The Chinese being so extremely conservative, they cling very tenaciously to their own modes of life. While learning our language, and observing our ways, they largely live in a world of their own; and most of them eventually to go back home and die among their own people. They bring their idolatry with them, and in San Francisco alone have eighteen temples.

The first Christian work among the Chinese in 1852, by the Presbyterian Board of Foreign Missions, which sent the Rev. Wm. Speer, D.D., to San Francisco for this purpose. He labored with great zeal and earnestness until his health broke down, and for long years was remunerationless. The Rev. A. W. Loomis was succeeded in 1859 by the Rev. A. W. Loomis, D.D., who for thirty-two years was a devoted and successful laborer. In 1866 a Chinese church of twelve members was organized. In 1870 Dr. Loomis was joined by Rev. I. M. Condit, D.D., who still has charge of the Chinese work in California. The mission house built by Dr. Speer became too strait for the work, and in 1882 the First Presbyterian Church, being situated in close proximity to the overcrowding Chinese quarters, was purchased and occupied as mission head-quarters.

In 1868 Rev. Otis Gibson, D.D., established a mission of the M. E. Church. A commodious building was erected for chapel, school and rescue purposes, in which vigorous work has ever since been carried on. A Catholic mission was opened in 1870 by Rev. W. C. Pond, D.D., who has ever since been its efficient superintendent, with Rev. Jee Gam as native pastor. In 1898 this mission purchased a large building, which has been fitted up in a manner well adapted for work. The Rev. John Francis, of the Baptist Church, established a mission in 1870. Later a building for church and school purposes was built in a location well suited for its efficient work.

These missions, besides preaching services in the Chinese language, Sunday schools and other church work, have each evening schools, in which the rudiments of English are taught. They have also opened stations at many of the principal towns and cities of the State, where many Chinese have been instructed and brought to Christ.

Many Christian people in our American Churches were awakened to a sense of their responsibility to these heathens; but, with the barrier of an unknown tongue lying between, how could they do anything for them? The Chinese were anxious to learn English, and so the plan of Chinese Sunday Schools was adopted. These were opened in nearly all the prominent churches of San Francisco, and at other important points. As the Chinese East, missions and schools were gradually opened, until
now, more than seventy of them are found in the cities and towns of our broad land. In New York, Boston, Philadelphia, Pittsburg, Chicago, and Portland, Oregon, where Chinese are found in the largest numbers, many flourishing Sunday schools have been opened with the help of Christian teachers, and several organized missions. All this has resulted in the conversion of hundreds of souls, among whom are found many devoted Christians.

In the first years of Chinese mission work there were not many families or children. But as these began to increase in San Francisco, schools were opened. These schools are now found in the principal missions, with an enrollment of 250 scholars. A Chinese public school has been in existence for several years, which has grown until now five American teachers are employed. A goodly number, too, of the native-bom Chinese attend our American public schools; 2,600 in San Francisco are under eighteen years of age, and 2,000 of these are of school age. There are 1,700 native-born here, besides many who have gone back to China. 3,000 women are estimated to be in San Francisco, of whom the largest share are of bad character. Slave girls have been imported in large numbers, who are bought and sold like chattels. There is no such thing as slavery known among men, but among females it is sadly prevalent.

Homes for the rescue of these slave girls were established in 1873 in connection with the Presbyterian and Methodist missions. During the thirty years of their existence probably 1,500 girls have been rescued. Each mission has a fine building for a home. Many of these rescued ones have become Christians, married Christian men, and gone out to set up Christian homes for themselves.

In 1870 Chinese branches of the YMCA were formed in different missions. Each city has a central society in San Francisco, with branch societies at the various points where Chinese work has been established. There are scores of these societies, to which from the beginning several thousand members have belonged. Entering the association is the first step toward learning the religion of Jesus. The Chinese are very social in their nature and this society is a power to draw them together and away from the dangers of bad resorts.

Approximate results of Chinese work in our country may be briefly stated in the following summary:

1. The number of Chinese in the United States, 100,000. Of these, in San Francisco, 20,000; on the coast outside of San Francisco, 52,000; in other States and Territories, 28,000. The whole number of Christians in the United States from the beginning, divided between Presbyterians, Methodists, Congregationalists, and Baptists, with a few from other denominations, 4,000. The present number of Chinese Christians in the United States is 70,000. Of these in San Francisco, 60,000; on the coast 10,000; and in other States, 500. The number of Sunday Schools, 75, with an attendance during the year of 2,500 scholars; children in schools, 500. The number of lay preachers converted in U. S., who have labored both here and in China, 60. Chinese ordained ministers who were converted in U. S., 12.

2. The influence of those converted here upon their homes in China as they return is one of the most hopeful phases of the work. All the Chinese who have emigrated, not only to this country, but to nearly all others, are from the one province of Canton, and from a few districts or counties of that province. While this is so, still they represent a population of probably fifteen million souls. The reflex influence of the thousands of Christians converted here, and the thousands more who have been instructed in a knowledge of the truth, and seen with wondering eyes the prosperity of this Christian country, as they return home to dwell among the heathen, is very great. It is mightily weakening the power of idolatry, as well as building up the constituency of a Christian community. A score or more of chapels have been built, some entirely and others partly, by these American Chinese Christians. The number of Chinese in our country is not being entirely by California Christians, costing six thousand Mexican dollars, and in which they support a native pastor. This is only one notable instance among many. Quite a number of the native preachers of this region were converted in the United States, and their hearts the Chinese Christians among us are turning toward transplanting in China the seed which has been sown among them here. The contact of the Chinese with our Christian civilization is no mean power in helping to bring about the New China.

Mission work among the Japanese in the United States is a hopeful and growing one. On the Pacific Coast they are fast increasing in numbers, as they are free to come, while an exclusion law shuts out the Chinese. Dr. E. A. Sturje, who is the best of authority, says: "There are about 60,000 Japanese on this Coast, 40,000 in California, and 4,000 or 5,000 in San Francisco. More than forty steamers are plying between this Coast and Japan, and every steamer arriving adds to the number of Japanese in this country, but are not many of these people in the East, as there is no employment for them there. There are about a hundred in Chicago, and perhaps two hundred in New York City. Most of those who come directly from Japan belong to the student class, and are laboring while the majority of those who come from Hawaii belong to the laboring class. The Japanese in this land are nearly all young men, and very few of them expect to remain in America more than five years. As they wear the American dress, and reside in no special quarter, their presence is scarcely realized."

Mission work among this people was begun in a small way twenty-five years ago, but as they have rapidly increased in the last decade, the work has grown into two flourishing missions of the Methodist and Presbyterian Churches. Both of these missions have commodious buildings and are carrying on a most interesting and encouraging work. The Methodist mission, which is the largest, is under the superintendency of the Rev. C. Harris, D.D., and the Presbyterian is under E. A. Sturje, M.D. They both have the aid of native pastors. The Japanese readily accept Christianity, and a thousand Christians are now reckoned to be on the Coast. The work is spreading beyond San Francisco, as the people are scattering throughout the State in the fields and business. These Mission stations to the number of eight or ten, while the Presbyterians are also establishing stations at outlying points.
ASISIPI. See Sandy Lake.

ASMARIA: A village west of Massaua, in the Italian Colony of Eritrea, N. E. Africa; station of the Swedish National Missionary Society (1891), with an administrative staff and 6 native workers—men and women; 3 village schools, an orphanage, a printing house and 51 communicants.

ASSAM: A province of British India ceded to the East India Company by the king of Burma in 1826. Until 1874 it was administered as a part of Bengal. It is now a separate province under a lieutenant-governor. It lies between the parallels of 24° 30' and 28° 15' N. latitude, and between the meridians of 89° and 96° 50' E. from Greenwich. It is the chief seat of culture in India. Its area is 49,004 square miles and its population (in 1891) 5,476,833.

The country consists of two extensive river valleys between the three ranges of mountains. At the north, Bhutan occupies the southern slope of the Himalaya Mountains, and the somewhat lower range which overlooks the wide and fertile valley of the Brahmaputra. The valley of this great river extends from Sadiya in the east to the foot of the Range of the Great Himalayas, in the west. Between the ranges of the Brahmaputra and the Himalaya Mountains is the right bank level, and has broad fertile lands, densely inhabited; the left bank is crowded by a range of hills named from the tribes that occupy them, the Garo, the Khasi, and Jaintia, Naga, and Singpho. The complete broad valley extending from the right bank of the Brahmaputra is mostly occupied by the Assamese, the ruling race. They have also several cities and towns on the left bank. Southwest of the hills of the left bank lies the valley of the Surma, a large tributary stream flowing into one of the delta branches of the Jamuna or Brahmaputra. This valley is broad, well watered, and fertile. The Khasi and Jaintia hills overlook it. It was formerly claimed as a part of the Eastern Bengal plains, but the Indian Government has now transferred this whole valley to the Assam Province, to which it properly belongs.

The People: The ruling class, the Assamese, hold very similar relations to the hill tribes of Assam as the Burmans do to the hill tribes of the Shan country. They are of different race, habits, and religion. The Assamese are believed to be allied to the Shans, tho, perhaps, remotely. They were formerly Buddhists, but about the middle of the 15th century, having sought the protection of Bengal, they adopted the Brahmanist system—divinities, caste, idol-worship, and all. Their language, tho originally of the Pali stock, has, by the adoption of Hinduism, and their intimate association with Eastern Bengal, acquired a large infusion of Bengali. The hill tribes, which in the aggregate outnumber the Assamese, are, beginning with the Chinese frontier on the northeast: the Mishmis; the Khamtis, said to be of the Tai or Shan family who are most numerous on the Chinese side of the mountains; the Singphos, who are found in large number along the nearest workers on the native workers; the Garos, of several clans; and on the slopes of the Khasia and Jaintia Hills, looking toward the Surma Valley, the Khasi and Jaintia tribes, and still another tribe of Nagas, are found. To these must be added the Kols, a tribe from Chota Nagpur, in Central India, who have been brought by the Government into Assam to work in the tea gardens. It is said that there are over 250,000 of them now in Assam.

It is believed that some of the largest of these tribes are either closely affiliated to hill tribes in Burma, or, perhaps, indirectly connected with the Singhphos of Assam and Chittagong, and the Kachins of Upper Burma; also the Nagas of Assam and the Chins of Burma. The relationship of these tribes is a matter of some moment to those engaged in Bible translation for the work.

Climate: Assam is wholly within the north temperate zone, tho in the sub-tropical part of it. Its location and the high hills and mountains which cover so large a portion of its surface should make it healthy, but do not. In the valleys there are marshy lands, and the soil, moist, and variable temperature, with its terrible cold and its fervid heat, have rendered it particularly fatal to the Europeans and Americans who have spent much time there. It is frequently visited by the cholera, and both acute and chronic diseases of the liver prevail. Of late years the construction of good roads, and the drainage of the marshes for the establishment of tea gardens has somewhat improved the salubrity of the country.

Religion: The Assamese, as we have said, adopted Hinduism about 1760. They are rigid adherents to caste. One or two of the hill tribes on the north of the Brahmaputra, notably the Kacharis and several of the Bhutan hill tribes bordering on Assam at the north, are Moham-medans. The greater part of the hill tribes, including all those south of the great river, the Garos, Nagas, Khasis, Mikirs, Singphos, etc.—are demon worshippers, making offerings to the Nats, or demons, to induce them not to injure them. They believe in a living Supreme Being, the Creator, but think He is too much occupied with the vast affairs of the universe to care for human beings, and too merciful to punish them for anything they have done or may do; and so they do not offer Him any worship or reverence. They believe dimly in a future life, but not in a state of rewards or punishments. An account of the general social, moral and religious life as that of the hill tribes of Burma The tribes nearest to the Chinese have adopted some ideas of ancestral worship.

Missons in Assam: The first mission commenced here was that of the American Baptist Missionary Union, established in 1836 at the solicitation of Captain Jenkyns, the British deputy commissioner, who offered of his own means a considerable sum toward the expense of such a mission to the heathen under his charge. The first missionaries were Rev. Nathan Brown, an eminent missionary and scholar, who had begun his missionary life in Burma, and Mr. O. T. Cutter, a printer. The first station was at Sadiya, near the northeast frontier of Assam, about 400 miles from the Burman capital, and almost 200 from Yunnan, in China. The tribes to whom they were designated were the Khamtis, a hill tribe occupying both sides of the lofty range which separates Assam from China. The geography and ethnology of this region were not well understood, and the voyage up the tortuous Brahmaputra was tedious, occupying over four months in the native boat. The missionaries, however, entered upon their work with a
stout heart, and, finding that there was little to be done among the Khamtis, they turned their attention to the Assamese and Shans in and around Sadiya. Jaipur was abandoned from its unhealthiness and other causes, and Sibsagar, on a southern affluent of the Brahmaputra, was selected. This is now the chief town in Eastern Assam, and is still a station of the ABMU. The station at Nowgong was established in 1841. The first Assamese convert was baptized the same year. In 1842 a school was opened there, with 80 pupils, and in 1843 the Nowgong Orphan Institution was established, which for many years was the means of doing much good. It was given up in 1855. The station at Gauhati was commenced in 1843. There were very few converts, and these Assamese only, till 1846. From this time till 1853 there were frequent accessions to the churches in Sibsagar, Nowgong, and Gauhati, mostly Assamese, with a very few Kacharis and Nagas. In 1853 the first of the Garos, the fiercest of the hill tribes, was baptized, and soon became a missionary to his tribe. The same year one of the Mikirs was baptized. From these beginnings the good work proceeded with great rapidity till in the churches of the Garo Association, in 1877, there were 617 members. The Kols from Chota Nagpur, who are employed in the tea gardens, began to attract attention in 1874. They are mostly in the district of Sibsagar. Some of them had heard of Christ from Lutheran missionaries in their home in Bengal, and in Assam they were ready to accept Him. There are now two or three large churches of these people. There have been some conversions among the Mikirs, who are best reached from Nowgong. Tho there was considerable promise among the Kacharis, north of the Brahmaputra, the accessions from that tribe have not been large. Work was commenced among the Nagas as early as 1840, but without much result till 1871, when Rev. E. W. Clark made a tour there, and opened with great success the stations of that tribe in these hills. There are now 21 mission stations in Assam, of which 8 belong to the ABMU and 1 to the SFG, the remaining 12 belonging to the Welsh Calvinistic Methodist Society. The census returns 39,000 Christians in Assam of all denominations. ASSAMESE: A language spoken in Assam, belongs to the India branch of the Aryan family of languages. It is written with the Bengali character and is used by about 2,000,000 people.

ASSOCIATE REFORMED PRESBYTERIAN SYNOD OF THE SOUTH: The foreign missionary work of this denomination began in 1875, when a missionary was sent to Egypt to work in connection with the United Presbyterian Mission Society. Upon her death this connection ceased, and work was begun in Mexico. The field of operations is the State of Tamaulipas, with which the work spread to Tabasco. There are (1902) 17 outstations, 11 missionaries, 7 native workers, 330 communicants, 182 pupils in five schools. Income about $9,000. ASSUAN: A town in Upper Egypt, situated on the Nile near the first cataract. It is celebrated for its granite, and for the great irrigation dam finished in 1902. A station on the so-called Apostles' route, established by the Moravian Brethren in Egypt in 1865, but afterward abandoned by the Moravians. Visited as an outstation by the United Presbyterian Mission of the United States of America. Station of the Sudan Pioneer Mission of Eisenach, opened in 1900. It is occupied by a missionary and his wife and 3 native workers. There are 2 village schools.

ASUNCION: The capital of Paraguay, S. America, population 35,000; station of the ME, with one missionary and his wife, and one unmarried woman missionary, and 11 native workers, men and women; 3 village schools, 2 high schools, 1 college and 70 members of the church. Station also of the SDA with one missionary and his wife.

ASSYRIA: That portion of Asiatic Turkey extending from Diarbeikir on the north to Mosul on the south, and comprising the northern part of the Mesopotamia plain. The word is now seldom used as a geographical term.

ASSYRIAN CHRISTIANS: A term sometimes used to designate members of the Nestorian Church.

ASYUT, or ASIUT: Situated on the Nile, 228 miles by rail south of Cairo. Population 30,000, mostly Mohammedans. It was formerly a principal seat of the slave-trade, and an important military station. It is now noted for a great irrigation dam on the Nile, finished under English auspices in 1903, subsidiary to the great dam of Assuan. Ruins and catacombs abound in the neighborhood. It is a mission station of the United Presbyterian Church of the U. S., established in 1865, with 14 missionaries of both sexes, a hospital and dispensary, a high school for girls and a college.

ATAFU ISLAND: Also called Duke of York's Island, is one of the Tokelau group of islands, N. of Samoa.

ATHABASCA LANDING: Settlement on the Athabasca River in the district of Alberta, Canada; station of the CMS, with a missionary and his wife.

ATU. See Hervey Islands.

ATRAULI: A town of 15,000 inhabitants N. E. of Aligarh, United Provinces, India; station of the ME, with 10 native workers, men and women; 11 Sunday schools, 7 village schools, and 900 church members.

ATTABARI: A town in the Darang district of Assam, India; station of the SFG, with one missionary and 10 native workers, 8 preaching places, 5 common schools and 800 communicants.

ATTANGAL: A town in Travancore, S. India; station of the LMS (1899), with 2 missionaries and their wives, and 34 native workers, men and women; 12 outstations, 14 Sunday schools, 21 common schools and 110 church members. Also written Attangal.

AUCKLAND: A city on the Hauraki Gulf, New Zealand. It has, including the suburbs, 57,000 inhabitants, chiefly English, Irish, and Germans, engaged in working the gold and coal-mines near the town and in the manufactories whose products form the chief exports. Station of the CMS, with one missionary and 28 native workers, and 83 communicants.
AUER, John Gottlieb: Born at Neubulach, Wurttemberg, Germany, November 18, 1832. He was well trained by an earnest Christian mother. In 1854 he was admitted to the Missionary Training School at Basel; and in 1856 he was sent as missionary to Akrepong in W. Africa, and became a teacher in the seminary. In 1862 he dissolved his connection with the Basel Missionary Society, offered himself as a candidate for the ministry in the Episcopal Church, and was ordained by Bishop Payne of Cavalla. In 1863 his wife died, and shortly after he sailed for America. Returning to his field in 1867, he devoted himself to two definite objects—a higher education for the African Church and a systematic preparation for giving to the heathen the Gospel in his own tongue. He became Bishop Payne’s request, he became the head of the high school at Cavalla. He believed that the Bible should be given to the people in their vernacular. In addition to the work of teaching, he translated or composed books in the Kroo language and the Grebo. He prepared a Grebo primer and dictionary, and revised the translation of the Prayer-Book. He also devised a method of writing the Grebo with vocal marks, thus saving the use of multiplied vowels. He had a school of twelve students, whom he faithfully trained. He was ordained bishop of Cape Palmas, at Georgetown, D. C., April 17, 1873. Returning to Germany, in July, he began at once to carry his work through the press, and by November he had prepared an elementary book and a Bible history in the Kroo language, a translation of the Psalms, and a book of hymns in metre in the Grebo, a revised edition of the Prayer-Book and a tune-book. To this he added a book of chants. The translation of parts of the Scripture and Church Services into Grebo, begun by Bishop Payne, he completed. On November 20, leaving his family, he started for Africa. Tho very feeble on arriving at Cape Palmas, December 29, he entered earnestly on his mission work. He died, February 16, 1874, at Cape Palmas.

AUKA MISSIONES: Descendants of former runaway slaves in Surinam, who during a century and a half have become a large tribe inhabiting the forests at a distance from the white settlements. Moravian missionaries have labored among them since 1765 and have won about 30,000 of them to a profession of Christianity.

AULUA: A village on the island of Malicello, New Hebrides group, Polynesia; station of the New Hebrides Missionary Society, with a missionary and his wife and 17 native workers, men and women, 9 village schools, and 62 church members.

AURANGABAD: In the Nizam’s Dominions, India, 180 miles northeast of Bombay. Its population is about 34,000. It is a station of the CMS, opened in 1860, and now occupied by 5 missionaries and 54 native workers, men and women. There are 14 village schools, and 800 communicants.

AUSTRAL ISLANDS: A group of small islands lying 8. of Tahiti and belonging to France. They are divided into the following groups: the Hurutu, 50,000; the Rurutu, the largest, taking over the field from the LMS, after the islands passed under French control. There are 8 native workers and about 650 communicants in the group.

AUSTRALIA: When Australia was discovered the aboriginal race inhabiting it was found to be a nomadic people, very little in the scale of human progress. Anthropologists have difficulty in classifying them and in tracing their origin. Their languages have also puzzled philologists, as “they have little or no connection with that stock to which the Malay, Polynesian, and Melanesian belong.” Dr. Bleek, while doubtless putting weight to his opinion, believes them to be nearly allied to the languages of southeastern Africa.” This article will be limited to some mention of various efforts to evangelize these aborigines, and, also those directed to the Asiatic and translated portions of Australia. The first missionary effort for the aborigines was made at Lake Macquarie in 1825 by the LMS. Many of their agents passed through Sydney, and some of them had found an asylum there during times of peril at Tahiti. After six years of failure from the roving habits of the blacks, the London Missionary Society gave up the work, but the Colonial Government continued it. The missionary, Mr. L. E. Threlkeld, persevered among the aborigines and discouraged them to acquire the language, printed a spelling-book and translations of parts of Scriptures. But little impression was made upon the people and the tribes around Lake Macquarie having become almost extinct, the mission was closed in 1861. In 1832 another mission was established at Wellington. The same difficulties were encountered there, but the missionaries did their best to acquire the language of the district, to teach the young, and to address the people. They composed a grammar and a vocabulary, the St. Luke’s Gospel, and a part of the Anglican Liturgy. But they had to admit that the supply of food existing at the mission was what drew the people to them. As the country became settled the influence of Tichborne’s articles seemed to render the efforts all, and in 1847 the mission was broken up.

Through the influence of an eminent clergyman of New South Wales, Pastor Gösner of Berlin sent out several missionaries in 1840 to labor among the aborigines of New South Wales. But the enterprise came to nothing after eighteen years of continued effort. About 1850 Rev. William Ridley attempted missionary labor among the aborigines of New South Wales. He devoted his means and himself to the work, learned the language of the people whom he lived on the Namoi River, prepared a grammar of the language and translated portions of the Gospel narrative. His labors were not entirely in vain, but the migratory habits of the people forced him to abandon his mission. More recent efforts in New South Wales have been on the plan of forming reservations for the residence and work of the aborigines and for educating the children. In this the Government has become the protector of the tribes, and the Moravian Missionary Society and the various Church Society missions in Australia have worked perseveringly for their enlightenment and elevation. Missionary effort for the aborigines is carried on at 26 stations in the various parts of the Australian continent. But only a limited number of the tribes will submit to the
restrictions of life on a reservation. A certain number of these degraded people have become Christianized, but the general result of all these years of effort is the discouragement resulting from dealing with a dull and unstable people.

The total number of the Aborigines now existing in Australia is about 55,000. Of these about 5,000 are classed as civilized in the census reports.

Attracted by the gold fields and by the encouragement to industry, many thousand Chinese emigrated to Australia. Numbers of them are engaged in merchandise, others in gold mining, many in market gardening and other industrial work. Some of them can read and write, and all are accessible to Christian influence. The numbers in 1888 in Australia were about 40,000, and even the restrictive legislation directed against them has not reduced their number below 30,000 (1901).

Attempts have been made by the different churches to establish missions among them in the chief centres where they have been located. The agents have been chiefly Chinese converts, but commonly superintended by European missionaries who know the Chinese language. A gratifying amount of success has attended this effort.

Sugar planting in Queensland led to a great demand for cheap labor, and vessels were sent to recruit among the New Hebrides and Solomon Islands for laborers under an engagement for three years. Many evils sprang up in this deportation, and statutes were passed by the Imperial Parliament and by the Parliament of Queensland to regulate the labor traffic. As a result, a large number of Polynesians have been brought to Queensland during twenty years. Some of these were recruited near mission stations, and had been instructed in Christian truth. Most of them were from heathen and cannibal islands. All of them, however, bad heard of the missionary, and had been led to respect his efforts for their good. Unfortunately the languages of these islands are almost all different, and on one sugar plantation the laborers represented so many various tongues that missionary teaching in any one of them could only be very limited. But as there are more than 9,000 in Queensland the necessity for reaching them in some way has led to the use of the English language in missions among them. This they acquire very readily and encouraging results are reported.

AUX CAYES: A seaport town on the southwest coast of the island of Haiti, West Indies. Population, 8,000, chiefly negroes and mulattoes. The climate is unwholesome. The manufacture of rum is one of the principal industries. It is a mission station of the PE, which has a native worker and about 50 communicants. The Western Annual Conference of the West Indies Wesleyan Missionary Society, and the African Methodist Episcopal Church also have agencies here.

AVÉZA: Village on the island of Raiatea, Society Islands, Polynesia; station of the Paris Evangelical Society, with a native worker and 170 church members.

AWEMBA: A settlement to the S.W. of Lake Tanganyika in British Central Africa; station of the LMS (1900) with a missionary and his wife.

AXIM: A seaport on the coast of the Gold Coast Colony, W. Africa; station of the WMS, with a missionary and 52 native workers, men and women, 65 outstations, 12 Sunday schools, 10 village schools, and 360 church members.

AZAMOR: A town near Mazagan, Morocco; station of the Southern Morocco Mission, with a missionary and his wife, and a dispensary.

AZERBAIJAN TURKISH: See Turkish.

AZIMGARH: A city sixty miles north of Benares, British India; station of the CMS since 1831. The Society has there 5 missionaries and 19 native workers, men and women, with a high school and 8 village schools. The religions of the people among whom they work are in general Hinduism and Mohammedanism. There are about 100 Christians connected with the mission.

B

BA: A town on Viti Levu, Fiji Islands; station of the Australian Wesleyan Methodist Missionary Society, with 1 missionary and 628 native workers, 283 Sunday schools, 330 village schools, and 7,475 professing Christians.

BAAKLEEN: A village of the Lebanon district in Syria; station of the Palestine and Lebanon Nurses' Mission, with 4 missionary women, 2 native workers, 1 dispensary, and 1 hospital.

BAALBEC: A town of Syria, northeast of Beirut. It is celebrated for its ruins of the Temple of the Sun. It is a station of the British Syrian Schools' Committee, with 2 missionary women and 3 native women workers, 1 village school, a high school, and a dispensary.

BABIS (pron. Babes): A sect among the Mohammedans of Persia. In 1845 a young mollah of Shiraz, named Mohammed Ali, com-

mented to preach against the vices of his coreligionists. His bold invective against the corruption of the religious hierarchy won instant response from the common people and gave him great popularity as a preacher. It also aroused fierce anger among the men whose hypocrisy and luxurious living he attacked. He began to claim that he was divinely ordained to reform the religious faith and practise of the country, quoting from the Bible and the words of Christ as well as from the Koran in support of his teachings. As he diverged more and more from the doctrine that the teachings of the Koran have superseded all earlier revelations, he began to defy the mollahs of Shiraz to harm him, declaring himself to be the Bab, that is to say, the "door" or forerunner of the Mahdi who is to come to the last days to reform religion. Threatened with punishment by the chief Mohammadan.
THE ENCYCLOPEDIA OF MISSIONS

BACHELER, Rev. Otis Robinson, M.D.: Born in Antrim, N. H., January 17, 1817. In the spring of 1839 he was accepted as a medical missionary by the Baptist Mission Society; and after continuing his studies for another year, he sailed, with his wife, for India. He made Balac-
or the center of his work until 1851, when he returned to America. On his return to Kirki, in 1863, he settled at Midnapur, where the rest of his missionary life was spent. His dispensary proved to be a great blessing to many, and through its influence hundreds were attracted to the Gospel message. When he returned to India from America he brought a printing press which was of great use in his work; and in 1886 he became principal of the Midnapur Bible School, which position he held until he retired from the field. After spending 53 years as a missionary he retired in 1893, and passed into his rest at New Hampton, N. H., on New Year's morning, 1901.

BADAGA LANGUAGE: Belongs to the Canar-
ean group of the Dravidian family of languages. It is spoken by the Badaga tribe, living in the Nilgiri Hills south of Mysore, India. It is written with the Canarese letters.

BADAGRI: A city near Lagos, W. Africa, for-
merly important as a trading center. It is a mission station, opened by the WMS in 1842, and transferred to the CMS in 1845; it has 5 native workers, men and women, with 2 outstations, 3 village schools, and 102 communicants.

BADULLA: A town and military post in the
south central part of Ceylon. The climate is healthy because of the elevation, which is about 2,000 feet. It is a station of the WMS, with 3 missionaries and 37 native workers; it has 3 outstations, 14 village schools, 1 high school, 2 hospitals, 1 orphanage, and a printing house. There are 80 church members.

BADDEGAMA: A village N. of Galle in the
southern part of Ceylon; station of the CMS, founded in 1819. At present the station is occupied by 2 missionaries and 56 native workers, men and women. It has 3 outstations, 35 village schools, and 1 high school. There are 220 communicants.

BAGHARA: Town in the north of the Santal
Parganas, Bengal, India; station of the CMS (1873), with 2 missionaries and 36 native workers, men and women. It has 3 outstations, 35 village schools, and a high school, and 75 communicants. Also written Bhagaya.

BAGCHEJIK. See BARDEZAG.

BAGHDAD: A city of southern Mesopotamia,
capital of the province of Baghdad, in Asiatic
Turkey. It is situated on the Tigris, about 250
miles north of its confluence with the Euphrates.
The population, numbering about 190,000, is
composed chiefly of Arabs, of whom there are large
numbers of Persians, Kurds, Syrian Christians,
and about 15,000 Jews. It was the favorite seat
of the Abbasid Caliphs, and under Haroun-
ar-Raschid became very famous. Under Turk-
ish rule very much of its prosperity has been lost,
but it is the most important city of Southern
Eastern Turkey, both commercially and politi-
cally. Near it is the shrine of Kerbela, to which
the Persians flock in pilgrimages in honor of
the Shi'ite saints, Hassan and Hossein. There is thus
constant communication with Persia and

Theologians of Teheran he answered by a ringing
defiance of all efforts to lay hands on the messen-
ger of God. Multitudes of all classes of the
people became his followers; the Bab was re-
spected as supreme authority, and in the eyes of
the people he seemed to be the perfect embodiment of
the new doctrine. When
the authorities undertook to make further
arrests, the Babists resisted, and serious battles
occurred, particularly in the district of Shiraz,
in some of which the Persian troops were defeated.
In 1848 an attempt was made upon the life
of the Bab by some of the Babists. An edict of
execution was then issued against the sect
and thousands of its members were massacred.
The leaders of the Babists escaped to or
and established themselves at Bagdad. The Per-
sian Government, finding that the Bab could not be
defeated, transferred all the successors of the Bab
still living, requested Turkey to surrender the
refugees. This Turkey refused to do, but finally
conceded to place the leaders of the sect under
surveillance at a point distant from the Persian
frontier. All efforts were vain, however, and
Babism still flourishes in Persia more or less
openly.

The Bab left a volume of his teachings—an
ambitious but illiterate production called
"Bayan" (Exposition). The doctrine he held by
his followers seems to be of a progressive charac-
ter, however, and are now a mixture of Moham-
medanism, Indian Theosophy and Pantheism, in
which they follow the lead of the Sufis. Certain
texts and precepts taken from the New Testa-
ment and the Psalms of David are added to this
electric body of doctrine. A principle of the
sect held in common with some of the Dervish
orders is that all Mohammedanism as taught
to-day, and in fact all religions, are hopelessly
corrupt, that the Mahdi will, therefore, shortly
appear to reform the world and bring a new
religion which will be found to include parts of the
Mohammedan, Buddhist, and Christian teachings.
The system of morals preached by the Bab is in
marked contrast to that of Islam in laying stress
on the brotherhood of all mankind and in stigma-
tizing polygamy. Like all Mohammedans, they
hold the use of wine or spirits to be a sin.

Two rival disciples of the Bab, each claiming
to be his divinely appointed successor, are now
in exile under surveillance of the Turkish Govern-
ment, the one in the Island of Cyprus, and the
other at Acre, in Syria. The latter is named
Beha-ed-din, and has entered into relations with
English and Americans with a view to uniting
all religions. He claims 10,000 followers in
Chicago and Baltimore, in the United States,
who believe that he is the promised Messiah.
Babism is one of the results of the impact of
Christianity upon Islam. It was thought at one
time that the Babists were more open to Christian
teaching than orthodox Mohammedans. So far,
however, they are merely more tolerant and more
ready to seek in the Bible support for their doc-
tres.

91, 207. A Year among the Persians, also, Babists (E. G.), ("Religious Systems of the World"), London.
Kurdistan. It was long the seat of a British resident, and it still ranks very high as a diplomatic post of Great Britain, Russia, and France. Baghdad has been the starting point for the various expeditions to explore the ruins of Babylon on the Euphrates, 100 miles to the southeast of Sin åteship. Since the University of Pennsylvania has been excavating at Niffer, Baghdad has been the seat of an American consulate. Missionary work has been attempted at various times by the ABCFM and the CMS. The intense heat of the climate makes it very trying to Europeans. At present it is occupied as a station by the CMS, with 8 missionaries and 7 native workers, men and women, who have charge of 2 village schools and 1 hospital. There are 35 communicants here.

BAHAVA: A village in the Santal Parganas, Bengal, India; station of the CMS. It is occupied by a missionary and his wife and 41 native workers, men and women. There is 1 high school and 1 dispensary, and there are 545 church members. The name is also written Barhawa.

BAHIA: A city of Brazil, South America, on All Saints Bay, 800 miles northeast of Rio de Janeiro. Population, about 200,000, chiefly Portuguese; religion, Roman Catholic, the city being a bishopric. At Bahia is a mission station of the CA, of which no statistics are available; of the PN, which commenced operations here in 1871; and has 4 missionaries and 1 native worker, men and women, and 1 common school. It is also a station of the SBC, opened in 1882. There are now 3 missionaries and 15 native workers, men and women, with 27 outstations and 516 church members.

BAHIA BLANCA: Seaport in the Argentine Republic; station of the South American Evangelical Mission, with one missionary.

BAHRAICH: A town in the United Provinces, India; station of the ME, founded in 1807. It has 21 native workers, 10 Sunday schools, 3 common schools, and 182 church members.

BAHREIN: The largest island of the Bahrein group in the Persian Gulf, off the coast of El Hasa, in Arabia; station of the RCA Arabian Mission (1892), with one missionary and his wife and a dispensary.

BAHRWAL ATARI: A town in the Amritsar district, Punjab, India; station of the CMS (1889), with (1902) 8 native workers, and 200 baptized Christians, of whom 23 were baptized during 1901. Station also of the CEZMS (1890), with (1902) 9 native women workers, 2 common schools, 1 hospital, 1 dispensary, 700 Zenana visitations and 5 Zenana pupils.

BAHIR. See Behir.

BAJUHA: A region in the district of Benguela, Portuguese West Africa. It lies on the uplands about 200 miles from Benguela, its seaport. The climate is healthy and the temperature, altho hot, is even. A mission station of the ABCFM was opened there in 1881, occupied by 2 missionaries and their wives, 2 missionaries and 2 instructors; there are 9 outstations, with 1 high school and 2 village schools. There are 25 church members. The station has been much harassed by the bad feeling of European traders which has excited the suspicions of the native tribes.

BALASOR: A seaport of Orissa, Bengal, India, 190 miles southwest of Calcutta. Population about 20,000, Hindus and Mohammedans. Language, Uriya, Santali, Hindustani. First mission station occupied by the American Free Baptist Missionary Society in 1838. It has now 2 missionaries and their wives, and 3 missionary women, with 74 native workers, men and women. There are 2 outstations, 8 village schools, 1 high school, kindergarten, 2 orphanages, and 230 church members. Also written Balasore.

BALDWIN, Stephen Livingston: Born at Somerville, N. J., January 11, 1835. His ministerial life covered a period of forty-four years. One half of this time was spent as a missionary in Fuchau, China, and eight years he was pastor of churches in the Newark and New England Conferences, and the last fourteen years of his life were devoted to the work pertaining to the office of Recording Secretary of the Missionary Society of the Methodist Episcopal Church. On October 4, 1855, Mr. and Mrs. Baldwin sailed for China. In 1861 he returned to America, on account of the failing health of Mrs. Baldwin, who died at sea; but the next year he was in Fuchau again, remaining there until 1870, when he was granted a year's furlough at home. The Fuchau Conference appointed him a delegate to the General Conference of 1880; and he was a member of the Ecumenical Conference held in London in 1881. While he was pastor of St. John's Methodist Episcopal Church, Boston, he was elected in June, 1888, Recording Secretary of the Missionary Society of the Methodist Episcopal Church, inwhich he continued until he died in Brooklyn, N. Y., July 28, 1902. Dr. Baldwin rendered important services as General Secretary of the Ecumenical Missionary Conference held in New York City in 1900. Under the strain of the work of organizing this Conference, his health gave way, and that important service to the cause of missions doubtless hastened his death.

BALS: An island situated E. of Java. The people are heathen, but a few Mohammedans and some Christians are found there. The language is allied to the Javaean.

The Utrecht Missionary Society has a station upon this island and seems, after many vicissitudes, to have gained a stable foothold.

BALIGE: A village on Lake Toba in the North Central part of Sumatra, East Indies. Station of the Rhonish Missionary Society, founded in 1881. It is occupied by a missionary and his wife, with 10 native workers, men and women. There are 5 outstations, 4 village schools, and 1,400 communicants.

BALL, Dyer, M.D.: Born at West Boylston, Mass., June 3, 1796; graduated at Union College, 1826; studied theology at New Haven and Andover, ordained, 1833, in Home Missionary Society in Florida. While at the South he was much engaged in labor for the colored population. In 1835-37 he studied medicine with reference to foreign mission work, and received the degree of M.D. from the medical institution in Charleston, S. C., and under the ABCFM, for Singapore. He was stationed there two years, teaching, preaching, healing the sick, and superintending the printing of Chinese books. In June, 1841, he went to Macao, and then to Hongkong. To him it was given to be the pioneer in opening the city of Canton for residence of missionary families, and
to open the way for excursions into the country around. His medical services were of great assistance in making the good-will of the people. His Almanac was for many years a most acceptable publication. He was most laborious in out-of-door work, mingling with the people on the banks of the river or on the ferries, and then extending his visits to the villages and market. In this way he became widely known and more and more respected as his true character and the nature of his labors were understood. In 1854 he visited the United States, returning, in 1857, to Macao. His constitution was much broken, and before his death he was confined to his house four months. During the last seven years of his life, the old man, bowed down by his infirmities, and leaning upon his cane would make his way downstairs and totter out to the little chapel opening on the street, and there, seated in an arm chair, he would distribute tracts or speak to passers who might drop in to look upon his gray hairs; for the Chinese venerate old age. He died March 27, 1866, after twenty-eight years' mission service.

Ballantine, Henry: Born at Schodack Landing, on the Hudson, near Albany, N. Y., March 24, 1824, grandson of a graduate of the University of Ohio, Athens, 1829; entered Theological Seminary, Princeton, but left on account of ill health; resumed his studies at Union Theological Seminary, Virginia; finished at Andover, 1834; ordained at Columbus, O., April, 1835; salved same year as a missionary of the American Board for India. In 1837 he was stationed permanently at Ahmednagar. His health failing, he left, in 1850, for home, but returned in 1852. He labored with great zeal and without interruption as preacher and pastor, and as editor and translator until 1865. During the last five years of his life he gave much time to the theological education of young men. By medical advice he left India with his family, September 4, 1865. An accidental detention of the ship in the Red Sea aggravated his malady, and he died November 9, off the coast of Portugal, and his body was consigned to the ocean. His connection with the mission covered thirty years. An accurate knowledge of the Marathi, added to an acquaintance with Sanskrit, prepared him to become a translator on the Bengal station, and he has left the impress of his idiomatic Marathi on many parts of the sacred volume in that language. He translated or composed some of the best hymns in the Marathi hymn book.

Balrampur: Town in the Gonda district of the United Provinces, India; station of the ME, with 18 native workers, men and women, 9 Sunday schools, 1 village school and 170 church members.

Baluchi Language: Belongs to the Iranian branch of the Aryan family of languages, and is spoken in Baluchistan, by a population of about 1,500,000. It is written with Arabic letters with slight modifications.

Baluchistan: A country of Asia, bounded on the north by Afghanistan, on the east by British India, on the south by the Indian Ocean, and on the west by Persia. Its area is about 130,000 square miles. The population is estimated at 2,000,000. It is divided into two sections, the Baluchis and the Brahuis—people are divided into tribes and again into families. The Baluchis have several points of resemblance to the Tartars and may perhaps have sprung from a commingling of Persian and Tartar stock. The Brahuis seem to have a linguistic affinity with some of the tribes of the Punjab. Mohammedanism is the religion of the greater mass of the population.

Baluchistan is ruled by the Khan of Khelat under the direction of an English resident. For strategic purposes the British authorities have built a railway from India into the country, and an English garrison is maintained at Quetta.

Missionary operations are limited to one station of the CMS at Quetta. There have been a few conversions notwithstanding the fanaticism that would apply the sword to every man who abandons Islam. On the whole, the greatest encouragement is found in the steady circulation of the Scriptures from the Quetta depot.

Baluchistan, Hughes (A. W.), London, 1877.

Banda: The capital of a district of the same name, United Provinces, India. It is situated on the Ken River and has about 24,000 inhabitants. It is a station of the SPG, opened in 1873, and is now occupied by 1 missionary and 2 missionary women with 8 native workers. It has a high school and 3 village schools. There are 32 communicants.

Banda is also a station of the ME with 10 native workers, men and women, and 7 village schools. There are 11 church members.

Bandawe: A town on Lake Nyassa, Central Africa, in the W. Nyasaland Protectorate; station of the UFS, with 7 missionaries and 38 native workers, men and women. It has 22 outstations, 1 high school, 55 village schools, 1 dispensary and 450 church members.

Bandeng: A town in the western part of the island of Java, Dutch East Indies; station of the Netherlands Missionary Union, with 2 missionaries and 4 native workers, a hospital and a theological class. There are 50 communicants. Also written Bandung.

Bangalore: A city of Mysore, India, 175 miles west of Madras. It is on an elevated site, a great resort for invalids; it has considerable trade, and is a military post. Population, 180,000, chiefly Hindus.

It is a station of the LMS (1820) with 7 missionaries and 22 native workers, men and women, 1 theological class, 2 high schools, and 12 village schools. There are 121 church members.

Station of the WMS with 9 missionaries and 174 native workers, men and women. It has a theological seminary, 3 high schools, and 37 village schools. The communicants number 630.

Station of the SPG (1837) with 7 native workers, men and women, 2 village schools and 405 communicants.

Station of the Church of England Zenana Missionary Society, with (1902) 5 women missionaries, 2 of them physicians and 14 native women workers, a dispensary, a hospital, an orphanage, 3 elementary schools, and 6 zenana schools.

Station of the Leipzig Missionary Society, with 7 native workers, 3 high schools and 400 communicants.

Station of the ME, with 3 missionaries and 7 native workers, men and women; it has 2 high schools, and 14 church members.
Station of the American Advent Missionary Society, with 1 missionary, 3 native workers and 50 church members. The village is an instance of the pervasive power of the Gospel of Christ. When it was first occupied, the people were entirely unknown to the outside world and were living in gross darkness of paganism. Their language had never been reduced to writing. It was seven years before a convert came forward for baptism, and he was threatened with death for becoming a Christian. Since that first conversion 2,000 of that Bantu tribe have been baptized; they have the beginnings of a printed literature; the people themselves have taken up the duty of evangelization, and everywhere within a radius of thirty miles of the station the pagans have the Gospel preached to them by their own countrymen.

BANNU: A village in the Riozul district, European Turkey; outstation of the ABCFM, an independent self-supporting church has grown up in connection with the mission, composed of Bulgarians.

BANTING: A town in the district of Sarawak, Borneo; station of the SPG, founded in 1851; it has 1 missionary and 7 native workers, 2 outstations, 13 preaching places and a high school.

BANTU RACE: The preponderating element of the population of Africa from about the fifth degree of north latitude to Cape Colony (excepting the Hottentots, Bushmen and some smaller groups) is the Bantus, and numbers 20,000,000 or more. The name in almost all the languages of this region (Zulu, Abantu; singular Umanu person) means "the people."

Among the members of the Bantu race may be named the Zulus, the Amazoxo or Kafirs the Bechuana, Basuto, and kindred tribes on the south; the Ovaherero, Ovampo, Balunda, Bateke and Mpongwe, on the west; the Congo, Bayansi, Bangala, Babangi, Manyema; the people of Toro and Uganada, the Angoni, and others among the Great Lakes; the Rua, Bemba, Babasa, and other tribes near the Lesser Lakes and on the sources of the Congo; and the Wakamba, Swahili, Wanika, Mahenge, Wakonde, Makua, and other tribes to the number of two hundred or more.

The general kinship of these tribes is seen, to some extent, in their person, their hue, their features, their religious notions, their mental type, and their mode of life; but most of all in their language. Taking their language as our guide and proof, we are left with no doubt that these tribes belong to the same family, between which and all other known families or races there is a manifest and fixed difference. To be sure, the languages of the tribes differ from each other in many respects, especially in many of their words, or in the forms of their words, but the grammar is essentially the same in all.

The more the comparative philologist comes to know of this Bantu family of languages, the more does he find of beauty, compass, flexibility, and plastic power. All the best known dialects whether on the east, south, or west, or in the interior, are found to be soft, pliant, easy flowing, regular and systematic in forms, philosophical in structure and principle, and wonderfully rich in ability to express all the shades of thought and feeling of which the people who speak them have knowledge. And it is especially interesting
to note that this great field of underlying, substantial oneness of speech is the one in which great Christian missions are being extensively planted, and are finding unexpected facilities in the homes of the region where the Bantu languages prevail.

In respect to the origin of the Bantu race, and how, whence, or when they came into the part of Africa they now occupy, the people themselves can tell us nothing. Nor does ancient history throw light on the subject. Yet we are not without some good reasons for opinions in relation to it. Some hold, with plausible show of reasons, that the Hottentots of S. Africa are of the same race as the ancient Egyptians, that the Bantu families were one in origin, and if so, then the fact of their being so widely separated points to the probable incoming of another people, as from the east, by which they were divided, and a portion of them pushed on to the southern extremity of the continent.

Inquirers now to which particular branch of the great families of men such an incursive, immigrating race belonged, we can hardly doubt that it was Hamitic, having its origin probably in some branch of the Cushites. The descendants of this line were numerous, and some of them settled, for a time at least, in Asia. Others settled in Arabia, and doubtless many went at an early date to Africa. Herodotus speaks of two classes of Ethiopians, one in Asia, the other in Africa. Many of the former served as soldiers under Xerxes, to whose home is not easily determined. The historian, however, tells us that the Asiatic Ethiopians were black, like those of Libya, but differed from them in language, and had straight hair; whereas those of Libya had long, woolly hair. Now, heretofore the Bantu tribes and the proper negro race, there is, to a certain extent, just this kind of difference at the present time. To be sure, the Bantu race is not white, and yet their hue is not so dark as that of the Negritian negro, nor is the hair so woolly; and as to their language—that most decisive mark of an affinity or of a difference—there is a wide difference between the Bantu languages and those of the real negro of the Sudan. Taking, then, all these suggestive facts together, we have nothing improbable to explain the immigrants who pushed the Hottentots before them to the southward were from Asia. If this was the case, it is easy to see why the Bantu peoples should be found at this day more robust, taller, of a lighter color, with hair less woolly, with a nose more elevated, of a much greater facial angle, a higher forehead, and altogether of a more intelligent, Caucasian look than their Negritian neighbors. At the same time we see in the whole Bantu race so much of the true negro type that we must come to the conclusion that, if the Bantu family originated in any wise other than the negroes of Nigritia, it mingled with these until it was largely fashioned after their type.

The appearance, color, and customs of the Zulu are like those of the other tribes of the Bantu family that a description of the former will give a good idea of all. The better classes of these tribes, especially the Zo or Zulu and the Kaffir, are somewhat slender, erect, of good stature, and well proportioned; it is easy for them on occasion to be graceful, dignified, commanding. They are made to be agile and swift rather than strong; and yet the women often carry very burdensome loads on their heads for long distances. Their color varies from a reddish copper or light bronze to a pure black. The latter, with just a little tinge of the red, pleases them best. A few have the regular features of the Caucasian; some, the pure negro; but most of them have a mixture of these two. Their black eyes often twinkle with merry humor, their beautifully white teeth are well set, their general expression is pleasant and confiding. Physically considered, the Bantu tribes are a well-built, fine-looking race.

In regard to natural affections, mental traits, and social life, the Bantu family afford an interesting study. Except when provoked to anger by insult or injustice, they are mild, gentle, kind, not wanting in either parental or filial affection; are helpful and sympathetic toward their kind and yet, under a sense of being wronged or in the excitement of war, they can be wild and fierce in the extreme. They are hospitable, fond of visiting, fond of society, cannot bear to work alone or be alone. They are proverbial for possessors of etiquette, which are generally sensible. They are quick to see the difference between right and wrong, ever ready to de cry injustice, and to submit gracefully to the suffering of deserved punishment. During the writer's residence of many years among the Zulus, with almost no lock and key in use, his grain, tools, cattle—everything they most desired—being ever open to access, he was not aware that anything was ever stolen from him. He once thought they had taken a hatchet, but after months had elapsed and the annual burning of the grass had occurred he found it in a field just where he had used and left it. And yet the common, social life of the Zulu is far from perfect. As one has said, "He is far from being as honest in word as he is in acts. He is prone to save very large reservations in his own mind when he is avowedly giving a full account of some occurrence, and manages to disguise and distort facts with exceeding cleverness and skill. A Zulu will excuse a fault with such ready plausibility that he will make an innocent man responsible for an undesigned accident." He expects his hospitality to be reciprocated, his kindness to be rewarded. Indeed he is said to have it for a proverb that "it is better to receive than to give." It is easy for him to get very angry and try to settle his dispute with a club. And yet he can hardly be said to be vindictive in his resentments. If the storm of passion is quick to rise, it is also quick to abate and be forgotten.

It would take a volume to describe the superstitions of these people. Of all their superstitions, none have upon them a stronger or more hurtful hold than their belief in what is called witchcraft. They believe certain evil-minded men, whom they call abatakati, have in their power to hurt, kill, or destroy anybody or anything, by the use of poisonous powder, incantation, or even by the force of mere will or purpose. Of these so-called witches the people have great fear. And so it is that any calamity, sickness, or death is often ascribed to some influence of this kind; whereupon some inyanga, witch doctor, is called to "smell out" the author of the evil. And inasmuch as all the possessions, wives,
children and cattle of the man found guilty are to be confiscated and portioned out the chances are that the sentence will fall upon one of the more wealthy men, especially if he may happen to be unpopular.

The Zulu word *inganga* is a term of wide impot; it is not satisfied with a trade, as a blacksmith, a basket-maker, or any who would be defined as is the business is to help others across a river. Its more proper use is to designate those who are skilled in higher pursuits, as a medical doctor, a witch doctor—i.e., one qualified to find out the cause why a man suffers from evil by communicating with the shades of the departed. A Zulu's belief of preparing himself for one of these higher professions is to go through a long-continued course of rigorous training, by means of fasting self-inflicted sufferings, diving and staying under water, wanderings in wild and weird places, that he may come into contact an amahlozi, or fall into a swoon and have strange visions of the spirits, about which he has been talking and thinking so long. Then he makes his appearance in public, all besmeared, perhaps with white clay, his hands full of snakes, his head covered with feathers, singing, dancing, reciting his visions, and so is prepared to be recognized as having attained to the degree of a medical priest, or a diviner.

The religious views and practices of the Zulus correspond, in a measure, to all the essential elements of the true faith; only on a base basis. They have their divinities, their sense of obligation and dependence, sense of guilt, belief in need of help, need of a Savior, need of sacrifices, even unto blood, need of prayer, the duty of keeping the Sabbath sacred and holy. The belief that the present life is to be followed by another. In their ignorance of the true God and in their search for some kind of divinity, they turn to the spirits of the departed, the shades of their ancestors, especially the ghosts of the great ones of their tribe.

There is an Ancestor-Worship practised. They call these shades by various names, as *si*lozi, plural *amahlozi; itunga, or *isi*tunzi.* Ask them about the end of man, where he goes when he dies, and they say he becomes an *si*lozi and goes off to live somewhere underground, there to build and abide with his ancestral friends. Sometimes they say the dying man becomes an *isi*tunzi (spirit) and reappears from time to time in a smoke; and so it is that they stand in awe of a serpent, and say, when it appears about their houses, that the spirit of their friend has come back to visit them, and see how they fare. Lions and leopards are sometimes looked upon as the embodiment of the spirit of a departed friend. To the shades of the dead, they look for help in time of trouble, confess their sins, pray, and offer sacrifices. Such for substances is the origin, kindred appearance, and such are the religious ideas and superstitions of the many tribes which form the Bantu race of Africa.

**BANTU LANGUAGES:** Among all branches of the Bantu race in Africa, the existence of kinship seems to be shown by the peculiarieties of their language. The resemblances between the speech of widely separated tribes have not as yet been studied and fully interpreted. But enough known to lead to a supposition that the Zulu and the Kafir-Xosa languages may be the oldest and most fully developed of the whole family. The Zulu would seem, also, to have been least affected by abrasion or other modification through contact with other languages, having been developed, fixed, and kept apart by its own isolation, and persistence. Herein lies the distinguishing grammatical features of the entire Bantu family are more manifest and clearly defined in the Zulu than in any other of its branches. In Zulu, the incipient element of the noun, the nominal prefix, is more complete than in most of the Bantu dialects. Thus the prefix um, as in umfana, boy, is simply m, mfana, in some branches. *Mponwe,* the name of a country and tribe in the northwest part of the Bantu field, would be *Umpongwe* in the southeast among the Zulus. The Zulus seem to have borrowed it as in abafana, boys, becomes ba, as ba*fana,* in some dialects. For person, the Zulus have umuntu; another tribe has mantu; another, mutu; another, mutu; another, mundu. For the Zulu plural of this word, abantu, people, some other tribes say *abantu,* some, *amantu,* some, *amu,* *vantu,* some, *watu,* some, *wandu,* and some, *andu.* *Musa* (late king of Uganda) would be *Umtusa* in Zulu, and the Lake Nyanza would be in Zulu, *Inyanza.* On the Luabala, a branch of the Congo, the natives say *nyama,* meat; instead of which the Zulus say *nyama,* most of which are older than the <BR> Zulus. The Zulus *bula amaye* means thresh or break stones. The Congo people called Stanley "Bula Matadi," "the Rock Breaker." The Zulu and Kafr tribal names, *Amazulu,* and *Amazosa,* would be, in some dialects, *Amakwa,* *Maravi,* *Umbiza,* *Mzuma,* *Zumunda.* Among the distinguishing grammatical features of the entire Bantu field of languages, one is what may be called a system of prefixes, or incipient elements in other parts of the Bantu field, such as *Makua,* *Marani,* *Manya,* would begin with *a,* as *Amakwa* among the Zulus.

Among the distinguishing grammatical features of the entire Bantu family of languages, one is what may be called a system of prefixes, or incipient elements in other parts of the Bantu field, such as *Makua,* *Marani,* *Manya,* would begin with *a,* as *Amakwa* among the Zulus.

THE ENCYCLOPEDIA OF MISSIONS

according to the class of the noun possessed; as, umfana woke, his boy; tizwi lake, his word; for the possessive their, referring to persons or to nouns in aba, as, abafana, boy of manu, people; we have wabo, aba, yabo, etc., as, tizwi labo, their word; tinkomo zabo, their cattle. And for the possessive their, referring to nouns in izin, as tinkomo, we have, in like manner, bazo, bazo, lazo, aza, yazo, etc., as, tizwi lazo, their voice; teibaya zazo, their fold; tizimpondo zazo, their herd.

One of the most important points in which the Bantu languages differ from the English and many others is found in the fact that, for the most part, the formative lemmas precede the root; that is, one of the inflections to which a word is subject, are made by changes in the beginning of the word; thus, umfana, boy; abafana, boys; tinkomo, cow; tinkomo, cows; izwi or tizwi, all amazwi, words. So in the class of umfana omkula, large boy; abafana abakula, large boys; tinkomo enkulu, great cow; tizwi etikulu, great word. So in the possessive pronouns: abafana bami, my boys; tinkomo zami, my cows; tizwi lami, my word.

This giving to the nominal incipient so much of molding influence over the pronouns and over the case, it contributes largely to precision and the power of inversion. It is also thought by some to add to the euphony of the language. Indeed, some who at first failed to see that the principle really constitutes a vital feature of the language were wont to regard it as nothing more than a kind of "euphonic alliteration."

From all this it will be seen that the Bantu languages allow great scope and variety in the arrangement of words in a sentence, and with the same time preserve conciseness and precision.

One of the greatest defects of these languages, as might be supposed, is the paucity of words, especially those needed for the expression of moral and religious thoughts. Yet, even here, the case is not so difficult as it might appear. One root will often give a large stem, with a good number of branches, and no small amount of fruit. Thus, from the verb bona, see, we have bonisa, cause to see, show; bonitsa, show clearly; bonela, see for; bonelela, look and learn; imitate; bonana, see each other; bonnea, see one another; bonenea, see each other; bonakala, appear, be visible; bonakalisa, make visible; umboni, a seer; umboneli, a spectator; umbonela, a spectacle; umbonitsa, an overseer; umbonisa, a show; tshibona, a sight; curiosity; tshibonisa, a vision; tshibonakalo, an appearance; tshibonakalisa, a revelation—and all this without going into the passive voice; as, bonua, be seen; bonitsa, cause to be seen; bonisitsa, cause to be clearly seen, etc. Perhaps no other language exceeds the Zulu in the scope and liberty which it gives for the formation of derivative words.

The liberty which it gives for combining two or more words, so as to form a significant compound, is another point worth mentioning. In this way we get impumalanga, east, from two words—puma, eastern, and langa, the sun; tinkomonalanga, west—from chona, sink, and ilanga, sun. So, tankilija, an heir, comes from combining two words which signify "to eat the estate of the deceased;" while inthulahlebe, a bat, signifies "a long-eared animal;" and tholobokkaskat, the jasmine, "queen's eye."

Many of the names which the natives give to persons, places, rivers, mountains, are compound terms; and, whether simple or compound, the most of them are significant.

Perhaps no language can lay a better claim than the Zulu to an exemption from two great faults—on the one hand, the superabundance of vowels and liquids which produces excessive softness; and on the other, that superabundance of consonants which produces excessive harshness.

The happy mean which it has observed in the inter-mixture of mute consonants with vocalic and liquid sounds makes it both pleasing to the ear and easy to speak.

One of the striking peculiarities of several Bantu languages is that sharp, shrill sound called a "click." It constitutes an elementary part of the word in which it occurs, as much as its vowels or consonants is never found in the formative part. Of these clicks there are three kinds, each of which takes its name from the manner in which it is made, as the dental, the palatal, and the lateral. The origin of these peculiar sounds may, doubtless, be found in the onomatopoeic effort to suit the sound of the word to the thing signified.

The indigenous literature of all the Bantu tribes is very scant, since no alphabet exists with which to write out thoughts, folk-lore, songs, royal eulogies, and common law. They have a variety of unwritten, simple songs: evening songs, domestic songs, hunting songs, heroic songs, and religious songs, or songs in which they give expression to a wish or prayer. With the singing of these, accompanied with the gumbu, a musical instrument of one string, they pass many an hour of leisure. Their language abounds in bold, figurative epithets and complimentary terms, of which they make great use in singing the praises of their kings. The royal court, upon grand festal occasions, often takes its turn in the poetry of the field, the rhapsodist or bard to pour forth his poetic imaginings in a most profuse and fervid style, speaking of the king, to his face, as black and beautiful, tall and straight, a majestic elephant, a ravenous hyena, the merciless opponent of every conspiracy, the devourer, without a smasher of all his foes; lovely as a master of resistless might, "like heaven above, raining and shining."

BAPATLA: A town of the Kistna district, Madras, India, 40 miles east of Ongole. Healthful location. Population, chiefly Telugus; station of the ABMU (1883), with 2 missionaries and their wives, 1 missionary woman and 47 native workers, men and women, 20 outstations, 30 Sunday schools, and 2,515 church members.

BAPTIST CONVENTIONS OF CANADA;
Foreign Missionary Work of the: The first foreign missionary work of the Baptists of Canada was done in connection with societies in the United States. As early as 1838 a Society for the Maintenance of Foreign Missions was established at Chester, Nova Scotia. Seven years later the first representative of the Canadian Baptists on the foreign field was sent to Burma and later two others, to labor under the ABMU. The interest in foreign missions was not aroused in Ontario and Quebec till 1866, when a student in Woodstock College desired to go out as a missionary and there selected a way to send him. Dr. Fyfe, the principal, then wrote to the Secretary of the
ABMU. The result was a meeting of six pastors, with Dr. Frye and Dr. Murdock of the ABMU, at the parsonage in Beamville, Ontario, in October of that year. Here the Canadian Aux-
iliaries of the ABMU were formed, and in October, 1867, just one year later, the first two mission-
aries were sent to the Telugu Mission of the ABMU. Two years later the Rev. John Mc-
Laurin, also a graduate of Woodstock College, and his wife were sent out.

Up to 1873 both sections of the Baptists of Canada were in close connection with the ABMU, supporting missionaries in Burma and among the Telugus of India, as well as a number of native helpers. In that year, however, both the eastern and western provinces established independent and separate foreign mission boards, while remaining in cordial sympathy with the ABMU.

The Foreign Mission Board of the Baptist Convention of the Maritime Provinces in 1873 sent out a party of seven missionaries to explore and, if deemed advisable, to establish a mission among the Karens of Siam; but they failed to find suitable circumstances in sufficient numbers to warrant establishing a mission, and the project was abandoned. At this juncture an invitation for them to cooperate with the new organization in the western provinces was accepted, and the mission was transferred to the Telugu country.

The Foreign Mission Board of the Baptist Convention of Ontario and Quebec, in 1873, was 
offered a mission of the ABMU, at Cocanada (Madras, India). The offer was accepted, and the Rev. John McLaurin was released from his connection with the ABMU to take charge of the new mission. He landed at Cocanada with his family in 1874. The following year he was joined by the missionaries of the Maritime Provinces, who were in Siam, and thus in 1875 was formed the Canadian Baptist Telugu Mission. There are two boards in the homeland, but their work in the foreign field is very closely united in interest, in method as well as in terri-
torial relations. The work is carried on along evangelistic, educational and medical lines; a strong native church is steadily pressing toward self-support; Bible women and colporteurs are an especially effective evangelizing agency.

Missions of the Convention of the Maritime Provinces: District of Visagapatam, Madras, 
India; 6 stations, 21 outstations, 21 Canadian missionaries, 49 native helpers, 8 churches, 
495 communicants, 17 day schools, 1 hospital and dispensary.

Missions of the Convention of Ontario and 
Quebec: (1) Godavari and Kistna Districts, 
Madras, India; 6 stations, 111 outstations, 35 Canadian missionaries, 196 native helpers, 38 
churches, 4,963 communicants, 18 day schools, 
1,856 pupils, 9 boarding schools with 304 
students, 4 physicians and 3 hospitals and 
dispensaries. (2) Bolivia, South America; 3 
stations, 7 Canadian missionaries, 2 schools.
The work of the Baptist Foreign Missionary Societies in Canada is The Canadian Missionary Link, monthly, Toronto.

BAPTIST MISSIONARY SOCIETY: The 
Baptist Missionary Society, founded October 
2, 1792, was the first of the many missionary 
organizations which had their being in the 
closing years of the 18th and the opening of the 19th centuries. Since 1781 William 
Carey, the "Northamptonshire Cobbler," had 
been putting forth every effort to arouse his ministerial brethren to something of his own absorbing interest in the question of giving 
the Gospel to the heathen. His paper, "An 
Inquiry into the Obligation of Christians to 
Means of Conversion of the Heathen," 
published in 1792, was a most impassioned 
appeal, and with his two sermons, preached 
before the Baptist Association at Nottingham, 
May 30, and at Kettering, October 2, 1792, 
resulted in the formation of the Baptist Missionary Society. The two pages from the 
text of the latter have since become famous — "Expect great things from God; attempt great things for God." At the conclusion of this sermon twelve of the ministers who had heard it withdrew to a little white house, still 
to be seen from the Mill Road, and passed the 
following resolutions:

"Desirous of making an effort for the propa-
gation of the Gospel among the heathen, agree-
ably to what is recommended in Brother Carey's 
late publication, we whose names appear to the 
following, do hereby solemnly agree to solemnly agree to 
act in society for that purpose.

"As in the present divided state of Christen-
dom it seems that each denomination, by ex-
erting itself separately, is most likely to accom-
plish the great ends of a mission, it is agreed that 
this society be called The Particular (Cal-
vinistic) Baptist Society for Propagating the 
Gospel among the Heathen.

"As such an undertaking must needs be 
attended with expense, we agree immediately to open a subscription for the 
above purpose, and to recommend it to others.

"Every person who shall subscribe £10 at 
one, or 10s 6d annually, shall be a member of the Society.

The twelve ministers present subscribed £13 
2s 6d. These "great things" were ridiculed 
by their fellows, but the event has proved that 
"the greatest things of God have quiet and 
small beginnings."

Carey became the first missionary of the So-
ciety, Andrew Fuller its first secretary, and 
Mr. Ryland, Jr., and Mr. Hogg formed with these two the first committee.

In 1802 and 1803 Carey, in the capacity of com-
mittee, desired to be sent to the heathen, 
but his early death prevented.

Constitution and organization: The organization 
of the Baptist Missionary Society is very simple. 
Its membership comprises pastors of churches 
making an annual contribution; ministers who 
collect annually, and all Christian persons 
concurring in the objects of the Society who are 
contributors of £10 or upward, or subscribers of ten 
shillings annually to its funds.

The affairs of the Society are conducted by a 
committee of forty-eight members, two-thirds 
of whom are residents beyond twelve miles of 
St. Paul's. The committee meets monthly, or 
often, in London, on a fixed day, for the des-
patch of business; seven members make a 
quorum. A public meeting of the Society is 
held annually, when the list of the committee 
is read, the accounts are presented, and the 
accounts of the previous year reported. The 
committee may summon public meetings in 
London, and, when necessary, conduct the 
affairs of the Society.

All honorary and corresponding members of 
the committee, and all ministers who are mem-
A Statement of Missions: India: A mission to Tahiti, in the South Seas, was at first thought of by the Society, but this plan was changed by the accounts received from Mr. and Mrs. Marshman, surgeon in the employ of the East India Company at Bengal, of the great needs of India. Andrew Fuller, in his account of the meeting held to consider the matter, says, "We saw plainly that there was a gold mine in India, but it was as deep as the center of the earth. Who would venture to explore it? I will go down," said Marshman. "I remember that you must hold the rope.; We solemnly engaged to him to do so, while we live shall we desert him.

In March, 1793, Carey and John Thomas sailed for India in a Danish vessel. They landed at Calcutta Nov. 17th. 10. Carey had told his society that he should require from it money sufficient to pay for his passage only, believing that once in India he could support himself. The years that followed were very trying. He found work in an indigo factory, and from his knowledge of the language, wrote a grammar of it, translated the New Testament into it, learned Sanskrit, mastered the botany of the region, corresponded with the German missionaries, Schwartz and Gueircke, in the far south, set up a printing-press, and planned new missions—at his own cost. On his rude press, which, from his great devotion to it, the natives thought was an idol, he printed the New Testament as fast as he translated it. In 1797 Mr. John Fountain was sent out to reinforce Carey, and in 1798 Messrs. Ward, Grant, Brunson, and Marshman reached Calcutta. In this year the indigo factory was given up, and on account of the persistent opposition of the East India Company the little band of missionaries removed to the Danish settlement at Serampur, on the west bank of the Hugli, fourteen miles above Calcutta. Here they purchased house and grounds for church, home, and printing-office. An income for the mission was secured from the boarding schools opened for Eurasian boys and girls, and conducted by Mr. and Mrs. Marshman. In December, 1800, Carey baptized the first Hindu convert, Krishnupal, a Brahman, who became a noted preacher, and from his own funds built the first house of Christian worship in Bengal.

Carey was appointed by Lord Wellesley, then Governor-General, first Bengal, afterward Sanskrit and Marathi, professor in the College of Fort William. The families of the little missionary community lived together, eating at the same table at a cost not much more than £100 a year.

The work of translating the Scriptures, teaching, preaching, printing, and establishing schools went actively on. Before Carey's death (1834) the whole Bible had been translated into forty different languages and dialects, and the sacred books of the Hindus translated into English.

In 1812 the printing press at Serampur was destroyed by fire. The loss from this calamity was great, but the gain was perhaps greater, for the interest and sympathy of Christians at home, of all denominations, was aroused to a degree never felt before. The whole amount of the loss, £10,000, was raised within fifty days and sent to Serampur, where the work was promptly resumed. This was the first instance of really large donations to the cause of missions.

The work extended to other parts of India, and many stations were established. In 1810 these stations were organized into five missions: the Bengal Mission, including Serampur, Calecut, Dinajpur, etc.; the Hindustani Mission (North-India), demanding Patna, Agra, etc., and the Burman, Bhutan, and Orissa Missions. In 1813 there were in all 20 stations, with 63 European and native laborers.

In 1827 the missionaries at Serampur and the Society at home became two distinct and independent missionary bodies, because of the refusal of the former, using in mission service a large amount of property which they had accumulated without the aid of friends at home, to render to the parent Society a strict account of its pecuniary transactions. In 1834 the Serampur Missionary Brotherhood had contributed to the mission £90,000. A friendly separation was therefore agreed upon, which continued for ten years. In 1837 the two bodies were reunited.

There are in Bengal, China, and the United Provinces of India (1892) 195 stations and outstations, 5 missionaries, 26 native workers, 1,033 communicants and 3,196 pupils in schools. The educational work includes the Serampur College, founded by Carey in 1822; Training Institutions at Cuttack and Delhi; besides elementary schools and orphans.

The Society also carries on special work among English speaking students and has a printing press in Calcutta.

Ceylon: The work of the BMS in this field was commenced in 1812 and has been largely educational. There are (1902) 80 stations and outstations, 5 missionaries, 26 native workers, 1,083 communicants and 3,196 pupils in schools.

China: Several attempts were made by the BMS to commence mission work in this country, and since 1827 it has been carried on successfully. In 1902 there were 346 stations and outstations in the provinces of Shantung, Shensi and Shansi, with 43 missionaries, 122 native workers, 4,652 communicants and 1,312 pupils in schools. This mission suffered severely during the Boxer troubles but has rallied well.

The fact that the Rev. Timothy Richard of Shanghai, Secretary of the Society for the Diffusion of Christian Knowledge among the Chinese, is enrolled among the missionaries of this Society is indication of the interest it takes in the supply of Christian literature for that Empire. Palestine: The work of this mission of the BMS has been carried on since 1880, with headquarters at Nablous. There were in 1902, 1 station and 5 outstations, 2 missionaries, 7 native workers, 129 communicants and 90 pupils in the schools.

Africa: From 1842-82 the Society had a most flourishing and hopeful mission on the West Coast of Africa. The West Indian churches, always desirous of sending the gospel to Africa, began, after their emancipation, to carry out their wishes. Generous contributions were made and the Society in England agreed to send the second Emancipation Mission.

Two missionaries from Jamaica were chosen for the new mission the island of Fernando Po, near the mouth of the Kameruna River, in the Gulf of Guinea. Several missionaries from
England, with reinforcements from Jamaica, arrived there in 1842; the mission was firmly established, and soon extended to the coast of what was then known as the Gambia. The literature books were prepared and large portions of the Bible translated into the Dualla language by Mr. Saker, from Jamaica, who had reduced it to writing. The work at Fernando Po had, on account of Roman Catholic opposition, to be given up, and the settlement at Victoria, in the Kameruns, was transferred to the Basel Missionary Society when that region became a German colony.

In 1877 Mr. Robert Arthington, of Leeds, England, offered the committee of the Society £1,000 if they would at once undertake a mission to the Congo country, in Africa. This proposal, and succeeding generous gifts, enabled the Society to begin operations, and missionaries were immediately sent out. Settlements were soon formed on the Upper and Lower Congo. Many deaths have thinned the missionary ranks, but the places of those few were quickly filled and the work goes hopefully forward. In August, 1886, the mission premises at Stanley Pool were destroyed by fire; the missionaries were in great distress; but, as was the case at Sarampur in 1812, the loss was quickly made good by friends of the mission at home. Mr. W. J. Liele, who was one of the missionaries, has done efficient work in reducing the language to writing, and supplying literature.

In the two missions at the Lower Congo, including Matadi, San Salvador, Wathen and Zombo, and the Upper Congo, including Archipielago, Bara, Mbole, etc., there are (1892) 61 stations and outstations, 58 missionaries, 62 native workers, 607 communicants, 3,025 pupils in the schools. Most valuable auxiliaries to the work are the two river steamers, "Peace" and "Pelican.

**West Indies:** About the beginning of the 19th century a colored man from Georgia, U. S. A., P. George Liele, organized congregations of slaves in Jamaica. After his death application was made (1813) to the BMS for assistance and on the 23rd of July, 1814, the government mission was sent out. Others followed, chapels and schools were built, and at the outbreak of the insurrection (1831) there were 14 English missionaries, 24 churches and 10,838 communicants. The insurrection checked the work in the island, but the earnest appeals of the missionaries on their return to England helped much toward the abolition of slavery in the British Dominions. After order had been restored the work was again pressed with success until in 1842 the churches in Jamaica, announced themselves as independent of the Society's funds. In the West Indies, including Jamaica, there are (1902) 286 stations and outstations of the BMS, with 38,345 communicants (of whom 32,208 are in Jamaica). Of the 10 missionaries and 619 native workers, all but two missionaries (in Jamaica) are independent of the Society. The Society also has 4 stations and 61 outstations in Italy and in France. A mission commenced in Japan in 1879 has been given up.

The Baptist Zenana Mission: This woman's organization for mission work is in common with the BMS, and was organized in 1867. It is independent in its officers, committees, and funds. In India it supported, in 1900, 64 missionaries and 200 native workers in 20 stations; had 94 schools with 3,620 pupils, and 6 hospitals and dispensaries where 23,500 patients are treated. In China, it had (1900) 11 missionaries and 20 native workers in 4 stations, and 18 schools, with 180 pupils.

The medical work of the BMS is conducted as a special auxiliary formed in 1901, conjointly with that of the Baptist Zenana Mission.

The Young People's Missionary Association in aid of the Baptist Missionary Society was organized in 1848. The Annual Report of the BMS gives a list of individuals, schools, etc., supported by these various organizations.

**BAPTIST MISSIONARY SOCIETY (German):** See Germany, Missionary Societies in.

**BAPTIST SOUTHERN CONVENTION:** See Southern Baptist Convention.

**BAPUJI APPAJI:** A Brahman of Nasik, Western India. He made a public profession of faith in 1836, and was a pastor for two years of age, and as native pastor at Bombay and missionary among his fellow countrymen he wrought faithfully and successfully. He was a member of the Translation Committee of the CMS, and translated several small books into Marathi, and was the first Baptist preacher at Baroda, in the province of Baroda.

**BARAKA:** A town on the Gaboon River, West Africa. Missionary work was commenced here by missionaries of the ABCFM in 1842. The station was transferred in 1870 to the PN. It now has 2 missionaries, 2 unmarried women missionaries, 8 native workers, men and women, 1 village school, 2 high schools and 226 church members.

**BARAMA:** A town in British Guiana, W. of the Essequibo River; station of the SPG, with 1 missionary, 2 native workers, and 2 village schools.

**BARANAGAR:** A town on the Huggli River near Calcutta, Bengal, India; station of the Church of England Zenana Missionary Society (1891), with (1902) 2 missionary women and 19 native women workers, 1 industrial home for converts, 11 common schools and 35 Zenana pupils. Also written Baranagore.

**BARARETTA.** See Gallaland.

**BARBADOS:** An island of the Caribbean group, W. I., belonging to Great Britain. The population is 182,308, mostly negroes, with a number of Hindus brought there to work in the fields, and a few Chinese. The language is a jargon based on English. Missionary operations have been carried on in this island by the Moravians (since 1765) and by the Seventh Day Adventist Mission Board (U. S.), the Salvation Army, the Brethren (PB), and the African Methodist Episcopal Church (U. S.).

**BARBARY STATES:** A general term designating that portion of North Africa stretching from the western boundary of Egypt to the Atlantic, and from the Mediterranean to the Sahara, and including Tripoli, Tunisia, Algeria, and Morocco. The name is derived from the Berbers, the ancient inhabitants of the region, who still constitute a considerable portion of the population.

**BARDEZAG:** A large village on the hills bordering the Gulf of Nicomedia, S. of the city
of Nicomed, Asiatic Turkey. Its population, about 5,000, is entirely Armenian. The mission station of the ABCFM, formerly at Nicomed, was transferred to this place largely on account of its greater healthiness. There is a large Protestant church and a flourishing boys' school, where, of late years the experiment of manual training has been made with great success. There is also an orphanage for boys whose parents were killed in the massacres of 1895-96. The Turkish name of the place is Bazarjik.

**BARDWAR**: Chief town of the district of the same name, Bengal, India. Population, 35,000. A station of the CMS with 3 missionaries, 1 with his wife, 5 native workers, and 31 communicants, and 1 village school supervised by the Church of England Zenana Missionary Society. Also written Burdwan.

**BARELI**: A city of the United Provinces, India, on a branch of the Ganges, 122 miles southeast of Delhi. Population (1901), 131,208, chiefly Hindus. Station of the ME (1856) with 8 missionaries, men and women, 3 of them medical, 53 native workers, men and women, 1 hospital, 1 theological school, 1 orphanage, 1 high school, 27 village schools, 70 Sunday schools, Young People's Society, and 516 church members. Also written Bareilly.

**BARHAWA**: See Bahawa.

**BARINGA**: A settlement in the Congo Free State situated on the Maringa River, about 200 miles from the Congo; station of the RBMU (1900), with 3 missionaries and 2 missionary workers. All of whom is unmarried; 1 preaching place, a village school and a dispensary.

**BARISAL**: Capital of the district of Bakarganj, Bengal, India. Climate damp, but very healthful, and the coolest in all Bengal. Population, 16,000. Race, Bengali and Mogh. Language, Bengali, Arrakanese, and mixed Hindustani. Station of the BMS (1828), with 4 missionaries and 3 married missionary women, 15 native workers, 28 outstations, 52 Sunday schools, 60 village schools, Young People's Societies, 1,000 church members.

Also of the Baptist Zenana Mission (1871), with 3 unmarried missionary women, 12 native women workers, 3 Sunday schools, 8 village schools and 1 high school.

Also station of the Oxford Mission to Calcutta (1901), with 4 missionaries and a theological school.

Also station of the SPG (1869), with 19 native workers, 10 village schools and 234 communicants. Written also Burial.

**BARKLY WEST**: A town in Bechuanaland, South Africa, near the diamond fields. Mission station of the LMS (1842); 1 missionary and wife.

**BARODA**: Capital of Baroda, a native State in India, 251 miles north of Bombay. Population, 103,790. Formerly the town, which is a fairly well built and pleasant place, was a very important seat of trade and of various industries, and at present, tho its prosperity has declined, it carries a considerable commerce with the surrounding country. Station of the ME, with 3 missionaries and their wives, 2 unmarried missionary women, 122 native workers, men and women, 5 outstations, 68 Sunday schools, 50 common schools, 1 high school, a Young People's Society and 1,550 church members.

**BARTSE TRIBES**: The peoples occupying the valley of the Upper Zambesi, a vast and populous plain, 189 miles long by 30 to 35 broad, subject to periodical inundations and resultant fevers. The Barotse Empire was founded by a Basuto conqueror. The Barotse succeeded in throwing off the foreign yoke, but the kingdom was maintained. It has been described as including 18 large nations subdivided into over 100 tribes. Each tribe speaks its own dialect, but Leauto, the tongue of the exterminated Basuto (Makololo) conquerors, is the common medium of communication. The region occupied by tribes subject to the Barotse kingdom covers an area of about 100,000 square miles, with a population of perhaps 1,000,000. Europeans were long excluded from the country. Grain, vegetables, and cattle abound. The villages are built on artificial mounds for protection against the inundations of the Zambesi. The people worship the sun and the new moon, and observe feasts at the graves of their ancestors. The missions of the French Protestants have been very successful among the Barotse, and the paramount chief is a professing Christian who has visited France and England.

**BAROTSELAND**: See Rhodesia.

**BARRA**: A town NW. of Rio de Janeiro in Brazil; station of the MES (1894), with a native worker, 1 mission station, 1 village school, 1 Sunday school and 171 church members. Also written Barra Mansa.

**BARRACKPUR**: A town and military station in Bengal, India, situated on the Hugli, 15 miles from Calcutta; station of the Church of England Zenana Missionary Society (1871), with (1902) 8 women missionaries and 22 native workers, 11 common schools, 1 training home for converts and 43 Zenana pupils.

Station also of the WMS, with 1 missionary, 14 native workers, men and women, 5 outstations, 1 Sunday school, 1 high school, 2 common schools and 63 church members.

**BARRANQUILLA**: One of the important commercial cities of Colombia, S. America, situated on a cahon of the Magdalena River, about 20 miles from the sea. Population, about 40,000. It is a station of the PN (1888), with 2 missionaries and their wives, 3 unmarried women missionaries, 2 high schools, 1 common school, and 46 church members.

**BARRIPORE**: A town S. W. of Calcutta, Bengal, India; station of the SPG (1829), with 11 native workers, 15 chapel preaching places and 760 communicants.

**BARROW POINT**: See Point Barrow.

**BARROWS LECTURESHIP FOR INDIA**: Lectureship on the Religions of Christianity to Other Religions founded at the University of Chicago, in 1894, by a donation of $20,000 from Mrs. Caroline E. Haskell, of Chicago. The lectures, six or more in number, are required by the terms of the foundation to be delivered in Calcutta, and, if deemed best, in Madras, Bombay, or other important cities of India.

Large numbers of educated Hindus and Muslims are now familiar with the English language. To these scholarly and thoughtful men the lectures are to be directed, setting forth, in a friendly, conciliatory way, the great truths of Christianity, their harmony with truths found in other religions and their claims upon men.

Mrs. Haskell expressed a wish that the Rev.
John Henry Barrows, D.D., the President of the Parliament of Religions, and afterwards President of Wellesley College, showed Dr. Barrows inaugurated the lectureship during the winter of 1896-7, when he delivered more than one hundred lectures and addresses in Hindustan. These lectures were published in book form, both in India and America, under the title: "Christianity, the World Religion." The second lecturer on this foundation was Principal Pauper of Mansfield College, Oxford, who spent the winter of 1898-9 in India and there delivered a series of scholarly lectures afterward incorporated in his "Philosophy of Religion." In the winter of 1902-3, the third series of lectures on this foundation were delivered in India by the Rev. C. C. Hall, D.D., President of Union Theological Seminary, New York. The third series commanded the same respectful, not to say cordial, attention from Hindus and Muslims as the previous lectures. It is the judgment of competent observers that influence of considerable importance and value has been exerted already through this lectureship.

Mrs. Haskell named the lectureship from Dr. Barrows, who at the time of its establishment was her pastor (First Presbyterian Church, Chicago). It is frequently called the "Haskel Lectureship," however, from the giver of the fund which supports it.

BARTELEMY: One of the Leeward Islands, West Indies. Mission station of the Moravians.

BASARUR: A town in S. Kanara, South India; station of the Basel Missionary Society (1876), with 2 missionaries (one of them married), 15 native workers, 3 outstations, 2 common schools and 48 communicants.

BASEL EVANGELICAL MISSIONARY SOCIETY (Evangelische Missionsgesellschaft, Basel): On August 30, 1730, the German Christian Society (Der Deutschen Christenthums Gesellschaft) was founded at Basel through the influence of Dr. Ursperger, who had recently visited England. This society undertook, as a kind of union to collect and impart information far and near respecting the kingdom of God. It corresponded to the London Missionary Society. In 1801 Friedrich Steinkopf, who since 1798 had been secretary of the Basel Society, went to London as preacher to the German Savoy Church, and, in 1802, became a director of the London Missionary Society. In 1804 he took part in founding the British and Foreign Bible Society. He was the connecting link between England and Basel, and largely through his influence the Basel Mission was founded. C. F. Spittler, who had gone to Basel as successor of Friedrich Steinkopf (lay secretary), became so interested in foreign missions that he proposed to go to Berlin and enter a training mission school founded there, in 1800, by Johann Jänicke. Thereupon the Basel Society attempted to induce Jänicke to remove his school to their city. On his declining the offer, it became more and more evident that Basel must begin a work of her own. In May, 1815, just as the city was about to be bombarded from Hünigen, the Rev. Nicolaus Von Brun, at a regular missionary meeting at which this young man presented himself for missionary service, suggested to Spittler that such young men should be educated at Basel and then be recommended to the English societies who sent out men to the field.

Steinkopf arrived at Basel in September, 1815, and induced Spittler to form a special committee for this purpose. On the 25th of the same month this body (Rev. N. Von Brun, President; Rev. Mr. Wenk, Secretary; and a merchant, Mr. Marian-Kuder, Treasurer) held its first meeting as a mission "collegium" in the parsonage of St. Martin's Church. Christian Gottlieb Blumhardt, who from 1803 to 1807 had been the theological secretary of the German Christian Society at Basel, was invited to take up the work of the new venture. After a little delay, in the spring of 1816, Blumhardt went to Basel as "inspector" or manager of the Evangelical Missionary Society, and on August 26 of the same year opened a training school for missionaries. Under the management of Blumhardt, who was a very cautious man, the mission school slowly began to gather headway. For the first few years its students, when ready for service, were handed over to foreign missionary societies, especially to the Rotterdam and the Church Missionary Societies. But as early as 1821 it began to send out missionaries under its own direction. In that year Zaramba and Dittrich were ordained as the first Basel missionaries for Southern Russia.

From 1816 Blumhardt headed the Evangelical Missionary Society, in 1828 founded the Heidentbote, the special organ of the Society; wrote a history of missions in several volumes, and managed the Society so frugally that at his death the mission house (school) was supported by the income of the magazine and the Heidentbote, and the available fund was raised to the amount of 100,000 florins, with a reserve fund of 20,000 florins. The following missions were started during his era: (1) One in South Russia (1821), was suspended by an imperial ukase, and dissolved in 1826. Before the work was stopped, however, the Bible had been translated into Turkish-Tatar and the modern Armenian languages; Armenia and the regions toward Baghdad and Tabriz had been visited, and an evangelical congregation had been established among the Armenians at Shamakhi. (2) Eight men were sent to Liberia in 1827 and 1828, but four soon died, and the remaining four settled in other regions. (3) In 1828 the mission on the Gold Coast was founded, but during the first twelve years as many missionaries died without having seen the fruit of their labor. In 1836 six more were sent, and Lehrer were sent to the west coast of India.

The second "inspector," William Hoffmann (1839-50), set the plan of his work more clearly before the public, and pressed home the obligation that rested on the whole Christian Church. He also provided a more efficient instruction in the seminary for missionary candidates. In ten years the income of the Society almost doubled; the number of stations had increased fivefold; new life was thrown into the mission on the Gold Coast, placing the work in Africa on an assured basis. In 1846 missions work was undertaken in China, at the suggestion of Gützlaff. In 1846-50 attempts were made to establish the work in East Bengal and Assam, but later on these fields were relinquished to other societies.

Under Joseph Josenhans (1850-69), the work of the Society was still further organized; the Missionshaus was erected, schools were established and the industrial work that became so marked a feature of the Society's missions was put in operation. During the term of Otto Schott (1879-84) female and medical missionaries first went out.
Since then Inspector Oehlen, son of the well-known professor, has been a most efficient manager.

Constitution and Organization: The Basel Evangelical Mission Society is strictly undenominational, but associated with no State Church, and having relations with nearly all the Protestant Churches of Central Europe. While essentially German, its location in Switzerland and its general character differentiate it from the German Societies. Its affairs are conducted by a committee of thirteen gentlemen (six clergymen and seven laymen). This committee is self-perpetuating, but manifests its sense of obligation to the public by the completeness of its reports and the care with which it conducts its business.

The Basel Mission House is far more than a mere headquarters for the Society. It contains a training school, a book department, library, refectory, dormitory, hospital and work-shops. The 80-100 students come chiefly from southern Germany and Switzerland and represent every class in life: agriculturists, clerks, mechanics, teachers, surgeons, etc. The general theory is that every man of good character and sincere Christian purpose can be utilized somewhere, and it is the business of the Society to find out where. The course of training covers six years, is thorough, and embraces all the different fields of work. The classics, Bible study, history, science, and the trades, but especially the development of character. The graduates from the theological seminary are ordained, through the courtesy of some church, Reformed, Lutheran, or Free, as the case may be, though the ordination is not for European service. In view of the undenominational character of the Society, there was some question as to what ecclesiastical order should be adopted for the churches on the mission field. Finally the Presbyterian form was adopted and a simple liturgy is used.

Another distinctive feature of the Basel Society is The Industrial and Commercial Commission, first organized by Inspector Josenhans to meet the situation on the Gold Coast. The mission therefore was absolutely dependent upon the help of European commercial and industrial communication with Europe for all the necessaries of life. The native Christians had no method of earning an independent livelihood. The establishment of a depot of supplies and the instruction of the natives in agriculture and the various crafts was the inevitable outcome of any attempt at missionary work. Vessels were purchased by the Society to navigate the various rivers of the territory occupied, and commercial houses sprung up at convenient points. In India the commercial development has been still more extensive, including weaving establishments at Mangalore and in the region about Canaree, large tile manufactories at Mangalore and Calicut and the employment of mechanics and joiners under mission auspices. The net income of the commission in 1890 was all of which was handed over to the Society, was 203,996 francs ($40,799). This department has been a paying investment from the beginning. The total income of the Society amounted in 1902 to 1,626,116 francs ($325,223). Nearly one-half of this came from Southern Germany; one-thirtieth from all parts of Europe, from Asia, Africa, America, and even Australia.

Statement of Missions: Africa: The first effort in Liberia (1827) failed entirely owing to the climate; a second (1828), on the Guinea coast, was almost a failure, but in 1831 a band of missionaries succeeded in maintaining themselves in the higher ground and established the station at Akropong. There was considerable difficulty with the Danish Governor, but the missionaries ultimately overcame and the work placed on a firm foundation. Special attention has been paid to the schools system, from the simplest elementary schools up to the theological seminary. The industrial department, too, has been most successful. With the German occupation of the Kamerun coast in 1884 the Basel Society took over the work of English and American Societies in that colony. On the Gold Coast there are (1902) 12 stations, 177 outstations, 77 missionaries, 270 native workers, 8,265 communicants, and 5,594 pupils in schools; in Kamerun 9 stations, 143 outstations, 55 missionaries, 142 native workers, 2,574 communicants, and 4,073 pupils in schools. India: The Basel fields in India lie in Kanara (Coorg), Malabar, and the South Marathi region. The first station occupied was Mangalore (1834). The work was extended and special attention was paid to education and technical training. In 1902, work was undertaken to introduce a system of mission schools and teachers for the care of the poor and destitute. There are 24 stations, 110 outstations, 148 missionaries, 653 native workers, 8,498 communicants and 11,054 pupils in schools.

China: The Chinese mission of the Basel Society was commenced under advice from Gützlaff in 1846, and with special instructions to make it an "inland mission." Attention was directed to the Hakka people, extending from Canton to the borders of Kiang-si and Fu-kien. The work is divided in two districts, highland and lowland, and is carried on with the same care for education and general industrial training that is characteristic of Basel mission work elsewhere. There were (1902) 15 stations, 75 outstations, 44 missionaries, 157 native workers, 3,622 communicants and 1,646 pupils in the schools.

BASIM: A town in the province of Berar, India. Population, 13,000. Station of the ME, with one missionary and his wife, 13 native workers, men and women, 2 common schools, 6 Sunday schools, a Young People's Society, and 64 church members.

BASRA: Capital of a province of the same name, adjoining the Persian Gulf at the S. E. extremity of Asiatic Turkey. The city is situated on the Euphrates below its junction with the Tigris, and is quite unhealthy. It is a station of the RCA (Arabian Mission), opened in 1891. It now has 4 missionaries, two of them married and one of them a physician, 2 outstations and 1 dispensary. Otherwise written Busrah and Bussora.

BASSA. See Great Bassa.

BASSEIN: The southwestern district of Burma, extending from the Irrawaddy to the Yoma range of mountains, on the west to the main stream of the Irrawady and its principal outlet on the east, and from the Bay of Bengal on the south to the point on the north where the Yomas approach nearest to the great river. It includes four or
five of the larger delta branches of the Irawadi. Area, 6,648 square miles. The soil is rich and fertile. The delta is about 140 miles long and somewhat exceeds 475,000, of which about 175,000 are Karens (Sgaus and Pwos in about equal numbers), over 225,000 Burmans, and the remainder Talaings, Telugus, Chinese and a few English. The district has been the seat of every thriving and successful missions since 1827. The ABM and the CMS are three missions that support the Burman mission, including also the Telugus; a mission to the Sgaw Karens, with about 10,000 communicants and 50,000 adherent population and 85 Christian villages, the largest and most advanced of all the Karen missions in Burma; and a mission to the Pwo Karens, with about 1,375 communicants, and 22 Christian villages, with an adherent population of perhaps 7,000. The Roman Catholics have a flourishing mission among the Pwo Karens in Bassein, but with few converts from the Sgau. The SPG has also a mission in Bassein, which is included in its diocese of Rangoon. Some efforts have been made by other denominations to plant missions here, but with little success. Education has been carried to a greater extent among the Karens of Bassein than in other district in Burma. Storv of the Karen Mission in Bassein, Brocket (L. F.), Philadelphia, 1891; Self-Support in Bassein, Carpenter (C. H.), Boston, 1884.

BASSEIN: Chief town of the district of Bassein, Burma. It is situated on the Bassein River, one of the delta branches of the Irawadi, and has an important trade in rice. Population, 30,000; about 20,000 of the people are Buddhists, and the remainder are Hindus, Mohammedans and Christians.

It has been a station of the ABMU since 1840. It is now operated by 12 missionaries and 30 native workers, men and women. It has 64 outstations, 157 preaching places, 123 village schools and 2 high schools, and there are 12,605 communicants.

BASSETERRE: Capital of the island of St. Kitts, W. I. Population, 9,900. Station of the Moravians (1777), with 1 missionary and his wife. The Toomers (1807) run a small village school and 2 Sunday schools, 3 common schools and 570 communicants.

BASTA: A village in the Bijnaur district, United Provinces, India. Station of the ME, with 13 native workers, men and women, 6 Sunday schools, 3 village schools, a Young People's Society and 475 church members.

BASUTOLAND: A territory belonging to British South Africa, annexed to Cape Colony in 1871, but placed directly under the authority of the crown in 1894; lying between Natal and the Orange River Colony, with Cape Colony on the south. Its area is estimated at 10,298 square miles, with a population estimated in 1901 at 263,500, of whom 7 were Europeans. The country is an elevated plateau, well watered and with a fine climate. The Paris Evangelical Mission Society and the SPG carry on missions in this territory, occupying altogether 17 stations. The influence of these missions upon the people has been beneficent and profound. Norris-Newman, The Basutos and Their Country, London, 1882; Widdicombe, Fourteen Years in Basuto Land, London, 1892; Carpenter, Among Basos and Basutos, London, 1900; Cassalis (Ed.), My Life in Basutoland, 1889.

BATALA: A town in the Punjab, India, 24 miles from Amritsar. Population, 26,000, Hindus, Muslims, Sikhs, etc. Mission station of the CMS (1875), with 3 missionaries (2 missionaries' wives), 10 native workers, 1 high school, 2 common schools and 72 communicants.

Also station of the CEZMS, with (1902) 4 missionary women, one of them being a physician, 7 native women workers, 1 hospital, 1 dispensary, 3 common schools and 70 Zenana pupils.

BATANGA. See Great Batanga.

BATAVIA: Capital of Java, Dutch East Indies. Population (1900) 115,887, of whom about 9,000 are Europeans. Founded in 1519 by the Dutch, it is one of the most magnificent possessions of the crown of the Netherlands. In 1722 there were about 100,000 Christians in and about the city, and in 1728 the Bible was translated into the vernacular tongue, the High-Malayan. But at present the whole native population of the city, with very insignificant exceptions, is Mohammedan. In 1842 the English missionaries were expelled, and only the Roman Catholics were tolerated. Of late, however, a change has taken place. The Java Comité, founded in Batavia in 1851, but since 1855 directed from Amsterdam, has now 18 missionaries, stationed with 3 native workers, 1 common school and 21 communicants. The Salvation Army has also a post here.

BATHURST: A town of 9,000 inhabitants on an island at the mouth of the Gambia River, W. Africa. It is the chief town of the Gambia (British) Colony. Station of the WMS, with 2 missionaries, 34 native workers, men and women, 4 outstations, 4 chapels, 4 common schools and 730 church members.

BATHURST: A village in Cape Colony, South Africa, 20 miles S. E. of Grahamstown; population 1,000; station of the South African Wesleyan Methodist Missionary Society, with 22 native workers, 14 outstations, 6 chapels, 3 common schools, a Young People's Society and 230 church members.

BATHURST: A village south of Freetown, Sierra Leone, W. Africa; station of the CMS (1822), with 6 native workers, men and women, 1 chapel, 1 Sunday school, 2 common schools and 318 communicants.

BATTA LANGUAGE: The Batta belongs to the Malayan family of languages and is spoken by more than three million of the inhabitants of Sumatra. It is written with its own alphabet. The Batta is found in at least three separate dialects. Of these, the Mandailing, or Southern Batta, is used by the more cultured people and is the language most used in literature. The Toba, or Northern Batta, has been printed in Roman letters for missionary purposes.

BATTALAGUNDU: A town northwest of Madura, Madras, India. Language, Tamil, Telugu. Station of the ABCFM (1872), with 1 missionary and his wife, 39 native workers, men and women, 16 outstations, 16 preaching places, 22 Sunday-schools, 19 common schools, 1 high school, a YMCA and 362 church members.

BATTICALOA: A seaport town in the Eastern Province of Ceylon; mission station of the SFP (1846), with 17 native workers, men and women, 3 chapels and 3 Sunday schools, 8 communicants.

BATTLEFORD: A town in the district of Saskatchewan, Canada; station of the CMS (1876), with 2 missionaries, 2 native workers, 2 outstations, 3 common schools and 40 communicants.
BATTLE HARBOUR: A settlement on the eastern extremity of the coast of Labrador; station of the Labrador Medical Missionary Society (1892), with 5 missionaries, men and women (3 of them medical), an outstation and 2 hospitals.

BATTLE RIVER: A settlement in the district of Alberta, Canada; station of the Methodist Church in Canada (1881), with 1 missionary and his wife, 2 outstations, 1 high school, 1 Young People's Society and 135 church members.

BATTYCOTTA: A district in the west part of the peninsula of Jaffna, Ceylon, coincident with one of the parishes anciently formed by the Portuguese Government. There were also churches built in these parishes, which afterward fell into decay, and when (1817) the ABCFM occupied the place as a mission station the remaining buildings were put into their hands by the British Government for mission purposes.

This station now has 1 missionary and his wife, with 98 native workers, men and women, 10 outstations, 8 preaching places, 37 common schools, 1 high school and 450 church members, besides Jaffna College, independently supported but with a missionary at its head.

BAU: A town on the island of Viti Levu, Fiji Islands; station of the Australasian Wesleyan Methodist Missionary Society, with 1 missionary, 476 native workers, 18 outstations, 165 chapels and preaching places, 234 Sunday schools, 347 village schools and 5,146 church members.

BAURO. See Solomon Islands.

BANZA MANTEKE. See Bansa Manteke.

BAVARIAN LUTHERAN MISSIONARY SOCIETY; Neuen Dettesau. See Germany; Missionary Societies in.

BAYAMON: A village in the outskirts of San Juan, Porto Rico; station of the Christian Woman's Board of Missions (Disciples), with 1 unmarried woman and an orphanage.

BAZELA: A town in the eastern part of Cape Colony, S. Africa, situated in a fertile, well-watered and thickly populated tract of land west of Umtata; station of the Moravians, occupied in 1862 on the invitation of the British Government agent for the Hottentots and the native chief of the Bazel tribe. The station was destroyed once by whirlwind and again by the Kafr war of 1851-82, yet the work here has been encouraging.

The present establishment consists of 2 missionaries and their wives, 13 native workers, men and women, 2 Sunday schools, 5 village schools and 98 church members. Also written Baziya.

BEACONSFIELD: A town in the diamond fields, Cape Colony, South Africa. Population, 10,500; mission station of the Berlin Missionary Society (1885), with 1 missionary, 1 unmarried woman missionary, 8 native workers, 1 outstation and 120 communicants. Also a station of the South African Wesleyan Methodist Missionary Society, with 41 native workers, 23 outstations, 3 chapels, 3 Sunday schools, 2 village schools, a Young People's Society and 502 church members.

BEAR'S HILL: A settlement in the northern part of Assiniboia, Canada; station of the Canadian Methodist Church Mission (1887), with 1 missionary and 107 communicants.

BEAUFORT: A village E. of Savanna La Mar, Jamaica, W. I.; station of the Moravian Mission (1834), with 13 native workers, men and women, 1 chapel, 1 village school and 370 communicants.

BEAVER LANGUAGE: Belongs to the central group of the North American family of languages and is spoken by Indian living in Athabasca, Canada. It is traced with syllabic characters.

BEAWAR: A town in Rajputana, India, 300 miles south of Delhi. A pleasant town, well laid out, with broad streets planted with trees; the houses well built of masonry, with tiled roofs. Climate, unusually dry. Population, 21,000, Hindus, Muslims, Jains, Christians, Parsees, etc.

Station of the UFS (1860), with 3 missionaries and their wives and 5 unmarried missionary women, 2 of them medical, 55 native workers, men and women, 10 village schools, 2 high schools, 1 dispensary, 1 hospital and 176 church members.

BECHUANALAND: A territory of Great Britain in Africa, extending east and west through 9 degrees of longitude, from the Transvaal colony and Matabeleland on the east, to German South-West Africa on the west, and bounded on the north by Rhodesia and on the south by Cape Colony. It naturally belongs to the general region called British South Africa. The area is about 213,000 square miles, with an estimated population of 200,000. Until November, 1895, Bechuanaland included the Crown Colony of British Bechuanaland, and the Bechuanaland Protectorate. At that time the Crown Colony was annexed to Cape Colony and the territory was about to be put under the administration of the British South Africa Company. In consequence of Jameson's raid, however, this was not done, and the Protectorate is governed by a resident commissioner, with headquarters at Mafeking. By these changes the boundaries and local sovereignty of the native tribes were altered, and fixed as at present.

These tribes are the Bamangwato, under chief Khama, the Bakgats, under Lenchwe, the Bakwena, under Sabe, the Bangwakete, under Bathoan, the Balamili, under Ikaneng, and some smaller tribes. Each chief rules his own people under the protection of the King. Licenses for the sale of intoxicants are forbidden. There is a native infantry-police.

The town now traverses the Protectorate as far as Bulawayo, and the telegraph line to Fort Salisbury, in Mashonaland. Missionary work is carried on by the LMS, the Hermannsburg Missionary Society and the Missiones of French Switzerland.

The number of stations is seven. The character of the natives near these stations has been greatly modified and they have adopted to a considerable extent European costumes and European style of dwellings.

BEEF, Twenty Years in Khama's Country. London, 1885;

BEERSHEBA: A town east of Rustenburg, Transvaal Colony, S. Africa; station of the Hermannsburg Missionary Society (1873), with 6 missionaries, men and women, 4 native workers, 4 outstations, 5 chapels, 2 village schools, 1 biological station, and 1,170 communicants. Also written Beseba.

BEGORO: A town of the Gold Coast, West Africa, northwest of Akropong. Population, 4,000. Mission station of the Basel Missionary Society (1876); 3 missionaries, 1 missionary's wife, 47 native workers, men and women, 33 out-
stations, 13 village schools (1902), 621 communicants.

BEHAR: A province of Bengal, British India. It lies in the Ganges Valley, being divided into two nearly equal parts by that great river, which runs through it from west to east. For the most part the country is flat; its highest hill is only about 1,600 feet above sea-level. Besides the Ganges itself, several large tributaries of that river flow through the province. The main town is Patna, 44,130 square miles and the population is about 24,000,000. There are small areas near Calcutta where the density of population is greater than in Behar; but, taken as a whole, this is the most densely peopled province in all India. Each square mile of its territory contains on an average 524 inhabitants; the lowest average being found among the hills in the southeastern part, where the population, of 287 to a square mile, consists chiefly of the aboriginal Santala. The highest average, of 809 per square mile, is found in the district of Saran, in the western part of the province. In this latter district, which is wholly agricultural, the density of population in one locality reaches the enormous average of 1,240. The prevailing religion is Hinduism, with a considerable number of Mohammedans. Nearly, or quite, a fifth of the entire population belong to classes that derive their living from the soil, chiefly by way of agriculture or the care of herds.

Few provinces of India possess more historical interest than Behar. Here, for nine hundred years, from the 4th century before Christ to our 5th century, flourished an ancient Hindu kingdom, known as that of Magadha, the rulers of which encouraged the arts and learning, built roads and sent fleets and colonists to islands as far east as Java. To Pataliputra, the ancient capital of this kingdom (now identified with Patna, its chief town of modern days), Seleucus Nicator, one of the immediate successors of the great Alexander, sent his envoy, Megasthenes. At a period still earlier—five or six hundred years before Christ—Gautama Buddha lived as a devout ascetic in Behar, and it was at the spot now known as Budh Gaya, in the southwestern part of the province, that he attained enlightenment, or Buddhahood. A spot so sacred in the estimation of millions could not fail of identification, and in recent years the intelligent care of the Indian Government has conducted researches there which have been rewarded by the discovery of most interesting relics of the early days of Buddhism. Ancient temples, dating back to 250 B.C., have been excavated; stones, jewels, sacred images of Buddha, and other remains have been discovered.

BEIRUT: A town in the Gond region, Central Provinces, India; station of the Balaghat Mission (1898), with 1 missionary and his wife, 1 unmarried missionary woman, 2 native workers, 1 village school, 1 industrial school, 1 dispensary, a hospital, an orphanage and 10 communicants. Also written Baahir.

BEHRENS, Henry William: Born February 13, 1821, in Hermannsburg, Germany; died April 22, 1900, in Transvaal, South Africa. In early youth, through the influence of the village pastor, Ludwig Harms, he determined to be a foreign missionary. Many obstacles preventing, he did not sail for his field of labor in Africa until November 10, 1857, when he was sent out under the Hermannsburg Society.

At Elenzeni, Natal, Behrens labored six years among the Zulu Kafirs. He himself and six Kafirs built church, school, and home. No baptisms occurred, as he preached regularly to three hundred natives.

In 1863 he was sent to work among the Bhechuanas at Linokana (in what is now the Transvaal). After a year of faithful work, he saw no results. He sat weeping one day at his door when a negro inquired the cause of his trouble and begged him to visit his people in Magaliesberg. Mr. Behrens accepted this as a call, went to the region, and found a people ready to hear. Their hearts had been prepared by one of their number who while imprisoned with the Boers had heard the Gospel from an English missionary. Behrens began work there November 29, 1864. He soon founded the Christian village, Bethany, where he spent the rest of his life, preaching, composing hymns, and teaching. He was pastor of a congregation of nearly two hundred negroes. He organized a school for the training of native teachers and established nine schools for children. Besides carrying on the work at Bethany, Mr. Behrens supervised the entire work of the Society among the Bechuanas, and saw the work grow rapidly. Once every two years he visited every one of the twenty-nine stations and twenty-seven missionaries. This he did faithfully for thirty-six years.

BEIRUT: A city situated on the eastern coast of the Mediterranean, capital of the Turkish province of Syria (Suriye). It is the commercial and literary center of Syria, and in its appearance and in the culture of its inhabitants more nearly resembles a European city than any other city in the land.

It is situated on a plain at the foot of the Lebanon, and in beauty of scenery rivals Naples, the shore here describing a graceful curve of several miles' radius, in the bosom of which the city lies, built on rising ground. It is adorned with many elegant buildings, public and private, rising one above another in a gentle slope, with a near background of mulberry, olive, and pine groves, and a more distant background of the terraced and vine-clad sides of Mount Lebanon, whose peaks, nearly 10,000 feet high, are snow crowned for several months of the year.

The climate is tropical. The rainy season is confined principally to the three winter months, when the thermometer rarely sinks below 50° Fahrenheit. A long summer reigns, with unbroken heat day and night, while the thermometer ranges from 80° to 90°, and occasionally rises to 100°.

The population numbers about 100,000, and is composed of Mohammedans, Druses, Christians of various sects, and Jews.

An English company has brought water to it from the mountain in an aqueduct six or eight miles long, and has also lighted its streets with gas.

There are carriage roads in the city and its suburbs, extending to the near points in the Lebanon, and one to Damascus (built by a French company). A railroad also connects Beirut and Damascus.

Mission work, vigorously conducted since 1823, first by the ABCFM, and since 1870 by the PN, has borne fruit not only in direct visible results of educational institutions established,
youth educated and sent forth as teachers, physicians and preachers, books printed, a Protestant community gathered, congregations assembled, and converts enrolled, but indirectly by the uplifting of the practices of the old mission and school, a higher plane of social, intellectual, and moral life.

In self-defense and in rivalry the other religious sects have opened schools and colleges, printing-presses and hospitals. The Mohammedans have even so far run counter to their old principles and practices. In one case, for girls, lest their Fatimas and Zobeides should learn in Christian schools too many verses of the Bible and too many Gospel hymns; and the Greek Church has been compelled to open Sunday schools, in imitation of the Protestants.

The P. N. has at Beirut (opened by the ABCFM in 1823) a station of which the working force consists of 4 missionaries and their wives, with 7 unmarried women and 13 native workers, men and women. There are 3 preaching places, 3 outstations, 1 high grade boarding school for girls, 1 theological school, 5 Sunday schools, a printing house which sends forth its issues wherever the Arabic language is spoken in three continents. It publishes about 25,000,000 of pages annually, about half of these being pages of Scripture. In “the Press” are steam-presses, with types, apparatus for typesetting, electrotyping, lithographing, and binding. From its doors go forth yearly about 60,000 bound volumes of scientific and religious books.

The Syrian Protestant College is auxiliary to the mission, and in closest sympathy with it. It occupies a splendid position on high ground, overlooking the sea. It embraces preparatory, collegiate, medical and commercial departments, and is more fully described in a separate article.

There is also a station of the Kaiserswerth Department at Beirut, established in 1860. It has 26 deaconesses, who conduct a fine hospital, served by the Medical Department of the Syrian Protestant College. It also carries on a high school and 2 village schools.

Miss Taylor’s orphanage, opened in 1868, is carried on by women and 6 native workers, men and women. It has a dispensary.

The Church of Scotland has a mission to the Jews, with a missionary and his wife and 2 common schools.

The Jerusalem and the East Mission Fund also has a station here, but no statistics are given.

The British Syrian schools have a station at Beirut, with 5 women missionaries and 49 native workers, 19 outstations, 1 high school, 1 school for the blind, 1 dispensary and 18 common schools.

The BFBS has a Bible depot here, with 1 agent and 6 native workers.

BEIT MERO: A village in the Lebanon district of Syria; station of the Friends’ Foreign Mission Association (1898), with 1 woman missionary, 2 native workers, 1 chapel, 1 Sunday school and 2 village schools.

BELGAIM: A city in the district of Belgaim, Bombay, India, 80 miles northeast of Goa. Population (including suburbs), 32,000, Hindus, Muslims, Jains, Christians, Parsees, etc.; station of the LMS (1820), with 3 missionaries and their wives, 14 native workers, men and women; 6 outstations, 6 Sunday schools, 8 village schools and 61 church members.

BELIZE: A city of British Honduras, Central America, a place of considerable importance, containing several churches, a hospital, etc. Population, 9,113, including many negroes; station of the WMS (1825), with 3 missionaries, 27 native workers, men and women; 6 chapels, 7 Sunday schools, 7 village schools, 1 high school and 700 church members. Also station of the Jamaica Baptist Missionary Society (1887), with 1 missionary, 6 outstations, 6 chapels, 5 Sunday schools and 310 church members.

BELLA BELLA: A settlement on an island in Milbank Sound, British Columbia; station of the Canadian Methodist Missionary Society (1872), with 1 missionary physician and his wife, a chapel, a Sunday school, a dispensary, a hospital, and 90 church members.

BELLA COOLA: A settlement on Burke Channel, on the coast of British Columbia; station of the Canadian Methodist Missionary Society (1881), with 1 missionary physician and his wife, a Sunday school, a dispensary and 20 church members.

BELLARY: Chief city of the district of the same name, Madras, India. Climate, hot; very dry. Population, 59,467, Hindus, Muslims, Christians. Language, Canarese, Telugu, Hindustani. Social condition, rather poor. Station of the LMS (1840), with 7 missionaries and their wives, men and women, 10 outstations, 10 Sunday schools, 11 village schools, 2 high schools, 1 college, 1 orphanage and 175 church members. Also station of the SPG (1889), with 1 native worker, 1 village school and 162 communicants.

BELLESA: A village near Massaas, Erirnea, N. A. Coast; station of the Swiss National Evangelical Missionary Society (1890), with 3 missionaries and their wives, 3 missionary women (one a physician), 7 native workers, 6 village schools, a dispensary, an orphanage and 71 communicants.

BELombo. See BENTO.

Belochnistan. See BALUCHISTAN.

BENARES: Capital of the Benares Division, United Provinces, India, situated on the northern bank of the Ganges River, at the junction of the Ganges and Jumuna. Population, 300,381, of whom about 155,000 are Hindus and 56,000 Mohammedans. In point of population Benares ranks sixth in India. It manufactures silks and shawls, cloth embroidered with gold and silver, jewelry, brass work, and lacquered toys—the last two being exported to England in considerable quantities.

That which gives to Benares its interest and importance, however, is the fact that it is to-day, and has been for more than twenty-five centuries, the religious capital of India, and the most sacred of all the sacred places of Hinduism. Its origin dates back to the remotest period of Aryan occupation of India. Its early name was Varanasi, whence the modern Varanasi, or Benares. Another name by which it is often called by the people is Kasi. It had been for many years—probably for some centuries—renowned by Hindus for its sanctity, when, in the 6th century. Gautama, then just starting out on his mission of converting India to his new cult of Buddhism, fixed his residence at Sarnath, the site of the ancient Benares, only four miles from the modern city. It remained the headquarters of Buddhism until, after a period of 800 years, the Mahayana Buddhism rose against their younger rival, overwhelmed the strongholds of Buddhism, and after
a long struggle expelled it root and branch from the land. Benares then resumed its preeminence of sanctity in the minds of devout Hindus, which it has never since let slip. During the Mohammedan period, under the Mohammedan Empire (1200-1800) many of the old Hindu buildings were converted to Mohammedan use, while many were destroyed, and the development of Hinduism and its architectural expression seem to have been kept in strict subjection; yet the city is said to contain to-day, besides innumerable smaller shrines, 1,454 Hindu temples, mostly high brick structures which resemble the Ganges observatory, and 272 Mohammedan mosques. The largest of these is the Mosque of Aurangzib, built by the Mogul emperor of that name from the ruins of a Hindu temple. It stands on the high bank of the Ganges, with minarets towering up 147 feet. The cliff which forms the river front, and on which the city now stands, is some level above the water level. Flights of stairs at convenient points lead down to the water's edge. These are known as "ghats," or descending places, and up and down are continually passing Hindu devotees and pilgrims, with their attendant priests, going from the Ganges to the sacred water of the Ganges, which are supposed to be capable of washing away sin. The view of the city from the water is exceedingly imposing, but the streets are narrow and mean, dirty and crowded. Benares is thronged by pilgrims from all parts of India. To bathe in the Ganges here is the hope of every devout Hindu; and to die in its sacred embrace, or, failing that, to have one's bones after death transported thither and flung into the stream, is supposed to ensure the soul a speedy entrance into Paradise. Bottles and jars filled by the pilgrims and carried by them to their homes, in order that their friends who are unable to make the journey in person may be anointed with a few drops of the holy water. Many wealthy Hindus, princes and others, swell the ranks of the pilgrims and send even less wealthy relatives or friends to the ghats in Benares, where they can remain for years, or until their whole hopes of prosperity are exhausted. It is from this pilgrimage trade that the prosperity of the city chiefly arises, as well as from the fees exacted by the Brahmans for the varied religious ceremonies.

At Benares is situated Queen's College, with a number of Hindu students, and a school for Mohammedan students. These are government institutions. An observatory, where Hindu astronomers have pursued the study of astronomy, and which was erected in 1693, overlooks one of the ghats. There is a hospital, a town hall, a library and other literary institutions.

The central position of Benares in the estimation of Hinduism, gives it peculiar importance to the Christian missionary. Blows struck here are aimed at the very heart and center of the Hindu faith. "Humaneely speaking," says the Rev. M. A. Sherrill, "the mission at Benares—"were the city to abandon its idleotrous usages and to embrace the Gospel of Christ, the effect of such a step upon the Hindu community would be as great as was produced on the Roman Empire when Rome adopted the Christian faith. The special sanctity and influence of Benares constitute a gigantic obstacle to all religious changes within it." The effect of education and of the dissemination of Christian ideas has been to modify profoundly the life of the better classes of native society in the city, allho ancient rites and usages are scrupulously maintained.

Missionary effort was commenced in Benares by the BMS in 1816. The city is now a station of the LMS (1820), with 8 missionaries and 28 native workers, men and women, with a high school and 12 common schools and 34 church members.

It is a station also of the CMS (1832), with 11 missionaries and 22 native workers, men and women. It has 3 outstations, 2 high schools, an orphanage and 6 village schools and 175 communicants.

The WMS has here 2 missionaries and 16 active workers among the Hindus, with 6 village schools and 30 church members.

The Baptist Zenana Mission has 3 women missionaries and 3 native women workers, with 119 Zenana pupils.

The Zenana Bible and Medical Mission has 15 women missionaries and 34 native women workers, with 1 hospital, 1 dispensary, 1 high school, 6 village schools and 225 Zenana pupils.

**BENGAL LANGUAGE:** Belongs to the Bantu family of African languages and is spoken in the region of the Gaboon River, French Congo, W. Africa. It is written with Roman letters.

**BENGAL:** One of the Lieutenant-Governorships of British India, lying north of Madras and the Bay of Bengal and east of the Central Provinces and the United Provinces. It comprises (1) the territory often spoken of as Bengal Proper, which is bounded throughout by the Ganges and Brahmaputra rivers; (2) the province of Orissa, which stretches along the coast of the gulf south of the delta; (3) the province of Bihar, to the north-west of Bengal Proper, and (4) the district of Chota-Nagpur, south of Behar and west of Orissa. Its total area is 151,543 square miles and its population numbers (1901) 74,774,866. In no other part of British India is the average density of population so great, the average of 1,470 per square mile. The population of Bengal exhibits great diversity of race, religion, language and civilization. About one-third of the whole population are Mohammedans, nearly two-thirds Hindu, and a residue of about 3,000,000 is composed of the adherents of other religions, chiefly those professing by the half-savage aboriginal hill tribes. The Christian population of Bengal is (1901) 278,366, having increased 44 per cent. during the decade 1891-1901. The increase of population of Bengal during the same period was but little more than 4 per cent.

The prevailing language is the Bengali. In Behar and Chota Nagpur the Hindi is chiefly used, and in Orissa the Oriya is the language of Hindus and Christians. The aboriginal tribes called Kols, Santals and Gonds found in Chota Nagpur and other districts in the northwest part of Bengal are described in separate articles, to which the reader is referred.

The Mohammedans of Bengal are mostly descendants of converts made from the lower castes of Hindu centuries ago, but they still make many converts every year from Hinduism. Behar was once a center of Buddhism.

The missionary history of Bengal, as well as its political history, is one of the utmost interest. While this province was not the seat of the earliest Protestant missionary activity in India—an
honor which belongs to Madras—it is ever associated in the minds of Christian people with the names of Carey, Marshman and Ward, who made Serampur the starting-point of widely diffused over the Bengal of the 18th century. Thomas, who was the pioneer of the work afterward more effectively prosecuted by the Serampur band, and in more recent times with that of Duff, whose educational work at Calcutta and whose immense energy and missionary zeal were the means of lifting the work of Christian instruction to the prominence which it deserves as a factor of missionary success. At the present time Bengal is well occupied by the agents of many Protestant missionary societies. The English Baptists, still preserving the traditions and continuing the work of Thomas, Carey and their early associates, the SPG, the CMS, the CSFM, the UFS, the LMS, the WAI, the ME, the ABMU and many other societies and independent agencies, are conducting missionary operations in Bengal. The missionary societies cooperate with the government and with the people in their efforts to extend education, having many schools and colleges in connection with their work at nearly all mission stations. In the year just mentioned there were within the province 31 vernacular newspapers, 13 being sheets of some importance. Several papers, edited wholly in English, are also issued by natives, besides those conducted by European writers.

Bengal is sometimes called "Lower Bengal," since this term was applied to it when it formed a part of the Bengal Presidency.

BENGALI LANGUAGE: The Bengali belongs to the Indo-Aryan branch of the Aryan family of languages. It is said to approach more nearly to the Sanskrit than any other of the modern languages of India. It is spoken by about 40,000,000 inhabitants of Bengal and Central British India. Among its various dialects the Musulmani Ben- gali is used by some 20,000,000 Mohammedans in lower and eastern Bengal and has been much changed by the introduction of Arabic and Persian words. The Sanskrit letters, with slight modification, are used for writing all or nearly all of the dialects of Bengali.

BENGAL PRESIDENCY: One of the former administrative divisions of British India. It comprised the northwestern provinces, Oudh, Assam, etc., besides the present lieutenant-governorship of Bengal. The name is still used in common language and in army circles, but it is no longer the name of an administrative division. See India.

BENGHAZI: A town of Tripoli, North Africa, on the eastern shore of the Gulf of Sidra. It stands on the verge of a large plain, sandy and barren for nearly a mile from the shore, but beyond that having a fertile but rocky soil to the foot of the Cyrenaic Mountains. Population, 9,000, many of whom are Jews and negro slaves. Chief occupations of the people are agriculture and cattle-raising. No mission work at present.

BENGUELA: A district of Angola, W. Africa, and a town in that district from which a railroad is to be constructed to the E. frontier of the colony, it being the seaport for trade with Bibe and the regions in which missionary stations are established.

BENITO: A town on an island in the San Benito River, in the Spanish Colony of Cape San Juan, W. Africa; station of the PN (1864), with 1 missionary, 3 missionary women, 11 native workers, men and women, 10 outstations, 9 Sunday schools, 3 village schools, 2 high schools and 490 church members. Also mentioned as Belombo.

BENNETT, CEPHAS Born at Homer, N. Y., March 5, 1806; Dr. Botelho, Secretary of the ABMU, advised him to offer himself to the Society to go out as its missionary printer. He was appointed in 1828 and sailed May 22, 1829, reaching Calcutta October 6, and Maulmain, January 14, 1830, with his printing presses. He commenced at once the printing of tracts, for which the demand in the early history of the mission was very great. In 1832 he began to print the Burmese Scriptures, and as superintendent of the mission press in Burma for more than half a century he was permitted to print the Bible in three languages—the Burmese, translated by Dr. Judson and Karen, translated by Dr. Mason, and the Pwo Karen, by Rev. D. L. Brayton, and also the New Testament in the Shan language. From the press under his care were sent forth more than 200,000,000 of Scriptures, tracts, and religious and educational works in all the dialects of Burma. He was not only a printer, but a preacher of the Gospel, having been ordained to the ministry by his brethren of the mission, and in the intervals of his work as a printer he labored as an evangelist.

The year 1834 he spent in Rangoon, then under Burman rule, preaching and distributing tracts. When in Tavoy, whither he went in 1837 to print the Karen Bible, and where he remained till his return in 1857, he spent much of the cold season in the jungles, among the heathen and the primitive Christians. As the tours he visited all the Tavoy and Mergui districts. His deep interest in the educational work of missions led him, in the early part of his residence in Maulmain, to take charge of the government school for two and a half years. To him chiefly is due the establishment of the Karen, Bible and Tract Society, and through his influence its operations were enlarged by the recent vernacular school-book departments. He was also much engaged in the English church in Rangoon. Mr. Bennett was taken seriously ill in July, 1855, but rallied. He died May 1, 1856, and on the 16th he passed away, in the eighty-second year of his age, after fifty-six years of mission service.

DENSONVALE: A town in the Orange River Colony, N. E. of Aliwal North; station of the South African Wesleyan Missionary Society, with 1 missionary, 83 native workers, 33 outstations, 10 village schools, 1 high school, a Young People's Society, and 1,110 church members.

BERAR: A commissionership of Central India, consisting chiefly of a fertile valley lying east and west between the Satpura range on the north and the Ajanta range on the south. Its length from east to west is 150 miles, and its breadth, about 140. It touches the central provinces on the north and southeast, Berar Presidency on the west, and the Nizam's dominions on the north. Area, 17,700 square miles. The population numbers 2,897,491 and is mostly composed of Hindus. Mohammedans, Parsees and Christians are also found in Berar in small numbers. Some aboriginal tribes, such as the Bhils and Gonds, are also found in this region.

The language of the Hindus of Berar is Marathi.
Berar has been entered by the UFS, and the Kurkur and Central India Hill Mission. The Christian and Moslem Association also has, there is some reason to suppose, undertaken evangelistic work in this province. But Berar has not thus far been the scene of missionary operations to the extent which the density of its population and the opportunities which it affords for persistent and successful work would seem to demand.

**BERBER LANGUAGES. See BERBER RACE; also KABYLE.**

**BERBER RACE:** The Berbers are sometimes spoken of as descended from the Libyans, or at least as closely related to them. Arab writers represent them as having come from Canaan previous to the days of Joshua. From their language, customs, and physical type they are adjudged by some as affiliated with the Semites; though others prefer to group them as being originally Hamitic. Where they have come in contact with other races or tongues, they have been more or less affected by them; where they have been in contact with Berber-speaking nomads, such as the oases of the desert, they have remained, in both race and speech, comparatively pure.

The present home of the Berber race has its center in the Barbary States, especially around the Atlas Mountains. Indeed, the Barbary States derive their name from the appellation used in Europe to designate this race. According to Dr. Cust, "The Berber or Amazigh is still at the present day in various shades and degrees of intermixture, ethnological, linguistic, and religious, with Arab and negro, the staple and principal stock of the whole population of North Africa from the Mediterranean to the extreme southern limit of the Sahara." The race may be divided into eight or ten tribes or groups, chiefly according to the shades of difference in the language or dialects they use; the parent of all these dialects, the old Libyan, as known to the Romans among the Numidians and their cognates, no longer exists. The old Guanche Berber, or Libyan as spoken by the original inhabitants of the Canary Islands, is also extinct. The Kabyles of Algeria are Berbers. They comprise a confederation of tribes, each of which have a variety of dialects, are given to agricultural pursuits, and dwell in villages. Those who dwell among the mountains have large flocks of sheep and goats, and because of their seclusion from Arab admixture have the purest dialect. They have, under the French, a sort of republican government. They are a fine race, hospitable and kind. The Mzab Kabyles occupy the extreme south of Algeria, but, having great commercial enterprise, are found everywhere. They are Mohammedan dissenters. The Shamba Kabyles, a predatory tribe, dwell on the confines of the Sahara. The Tuvarik, or Tuarik, and Tuaregs, another group of Berbers, are nomadic in their habits, and extend from Algeria to Bornu and Timbuctu. Twenty years before the Christian era a governor of the Roman province of Africa led an army against this then, as now, unconquered tribe.

The aborigines of Morocco have been divided into the Arab-Berbers and the Shilus, or Shebbohs. The former inhabit the northern parts of the great Atlas range, live in a cheap kind of hut covered with mats, tho' in the plains they build huts of mud and clay, and use, in addition, they live chiefly upon their cattle and sheep, and make use of mules and donkeys. Their complexion is light, the hair of many is fair, the beard scant. They are well-built, strong, active and bold, and are often at war with their neighbors. Those and the Shilus a number about 4,000, forming half the population of the Moroccan Empire. Their dress is scant, consisting chiefly of a jacket and trousers, and sometimes a blanket. The other Moroccan tribe, the Shilus, speaking the Shilha dialect, occupy the southern part of Morocco, together with the regions west of the Atlas range. They are of a smaller size, and darker complexion. They are more civilized and powerful than the northern Berbers. They work at trades and cultivate the land, are patriarchal, hospitable, live in houses made of stone and mortar, and have villages and towns surrounded by walls and towers. They claim to be the aborigines of the country, and call themselves Amazigh.

There is a mixed tribe, Arab-Berber, called the Senegalese, living on the north banks of the Senegal River. They are partly nomadic, partly settled, and make a living by collecting gum for the merchants at marts along the river.

The inhabitants of Ghadamis of Tripoli, at home and by themselves, speak the Ghadamis, a dialect of the Berber; but with the Arabs, the Arabic; with the Tuwantik, the Tamaskheh, and with their negro slaves, the Hausa. Another Berber tribe dwells at Siwah, the oasis of Jupiter Ammon, on the confines of Egypt. That their own home dialect should be found to have a clear affinity with the Berber helps to show how broad is the territory the Berbers have occupied; also how remarkable has been the resistance offered by the Berber language to the pressure of other tongues for more than three thousand years.

As to the origin and import of the name of this ancient North African race there is some diversity of opinion. It is said to have been used by the Arab writers of the 2d century to designate the Libyans of Herodotus. Some suppose it to have been derived from Verves, as found in the ancient Roman geography of Mauritania. By others, with more reason, it is supposed to be a corruption of a Pontic term, Khobbe, a term denoting any one who was, to the Aryan or Greek, a foreigner, speaking a language to them unknown. This accords with the fact that the word Berber is not known to the Berbers as a national appellation. They call themselves Amazigh, the Free.

As to the religion of the Berbers, their pagan faith is nearly extinct. Some of them seem to have accepted the Jewish or the Christian religion in the centuries gone by, at least for a time. But at present they generally profess the Moslem faith, tho' many of them know but little of it. And yet they are not lacking in bigotry and fanaticism, as the bitter opposition and persecution to which converts to the Christian faith are subject afford sad proof.

Missionary effort has not neglected these people. The North African Mission, the Swedish Missionary Society, the Gospel Missionary Union and others have used every means to come into contact with the Berber tribes.

**BEREA:** A settlement in Basutoland, S. Africa, E. of Maseru; station of the Paris Evangelical Mission Society (1843), with 1 missionary and his wife, 17 native workers, 6 outstations, 7 village schools, and 425 communicants. French form of name, Béré.
BEREA: A settlement southwest of Gnadendal, Cape Colony, S. Africa. A station of the Moravians, occupied in 1865, when the overcrowding of Gnadendal made it necessary for some of the people to form a colony. Statistics given in combination with Gnadendal.

BEREN'S RIVER: A settlement on the E. side of Lake Victoria, Uganda, Canada; station of the Canadian Methodist Church (1871), with 1 missionary and his wife, 2 outstations, a chapel, a Young People's Society and 100 church members.

BERHAMPUR: A town in the Ganjam district, Madras, India; the principal town in the district of the same name. Climate, unhealthy. Population, 25,000. Hindus, Mohammedans, Christians. Station of the BMS (1825), with 3 missionaries and their wives, 10 native workers of both sexes, 4 Sunday schools, 3 village schools, and 220 church members. Also station of the Baptist Zenana Mission Society, with 3 women missionaries, 5 native women workers, and a dispensary. Also written Berampore.

BERHAMPUR: A city and military station S. of Murshidabad, Bengal, India. Population (1891) 23,515; climate, unhealthy but improved by military sanitation. Station of the LMS (1832), with 4 missionaries and their wives, 4 women missionaries, 25 native workers, men and women, 9 Sunday schools, 6 village schools, 2 church schools, and 35 church members. Also written Burbampore.

BERLIN: A town east of King Williams Town, Cape Colony, S. Africa; station of the South African Baptist Mission Society (1889), with 2 women missionaries, 3 native workers, 2 outstations, chapel, Sunday school, and 24 church members. Native name Tshabo.

BERLIN JERUSALEM UNION. See Germany, Missions in.

BERLIN MISSIONARY SOCIETY. See Germany, Missionary Societies in.

BERLIN WOMEN'S MISSIONARY SOCIETY for China. See Germany, Missionary Societies in.

BERSABA: A settlement in Surinam, South America, S. of Paramaribo. It is in the center of a district which has always been the darkest corner in Surinam, the stronghold of idolatry and sorcery. Idol temples and places of sacrifice are very numerous. The former are not improving evils, such as are found in India, but small structures only a degree above common pigsties, and located in out-of-the-way corners behind the houses of the village. They are not used for worship, but only as repositories for the idols and their belongings, which are needful for heathen dances and the performance of the sorcerers. Station of the Moravian Missions (1858), with a missionary and his wife, 35 native workers, 3 chapels, 2 Sunday schools, 1 village school, and 190 church members.

BERSEBA. See Beersheba, Transvaal.

BERSHEBA: A station of the Rhenish Mission in Great Namaqualand, German S. W. Africa. Here the missionary Krölein translated the New Testament into Nama. It has 1 missionary, 1 native worker, 1 village school, and 224 communicants.

BERU: One of the Gilbert Is. which has long been occupied by Samoan pastors under the LMS and was made a missionary station by that Society in 1901. There is now (1903) a training institution for evangelistics, and a woman's training institution for Christian workers. The church members number 450.

BETERVERWACHTING: A settlement near Graham's Hall, in British Guiana, South America. Station of the SFG, with a missionary, 2 native workers, and 24 communicants. Also station of the Canadian Presbyterian Mission (1885), with 2 missionaries and their wives, 7 native workers, men and women, 4 Sunday schools, 3 village schools, and 110 church members. Also called Better Hope.

BETGERI. See Betgeri.

BETHABARA: One of the most important of the Moravian mission stations in Jamaica, West Indies (1840) and the center of an extensive field of effort. It is situated in the southern part of the island, on the uneven surface of the lofty range of table-land known as the Manchester Mountains. It has a missionary and his wife, 15 native workers, men and women, 2 Sunday schools, 2 village schools, a Young People's Society, and 345 communicants.

BETHANIE: 1. A town and railway station S. of Bloemfontein, Orange River Colony, S. Africa; station of the Berlin Missionary Society (1834), with 3 missionaries, 17 native workers, 1 outstation, and 930 communicants.

2. A settlement W. of Pretoria, Transvaal Colony, S. Africa; station of the Hermannsburg Missionary Society (1894), with 1 missionary and his wife, 10 native workers, men and women, 3 outstations, 7 village schools, and 2,225 communicants.

BETHANIEN: 1. A settlement in German S. W. Africa; station of the Rhenish Missionary Society, with 1 missionary and his wife, 1 village school and 500 communicants.

2. A village in South Arcot, Madras, India; station of the Danish Missionary Society (1861), with a missionary and his wife, 3 native workers, 2 outstations, 1 village school and 45 communicants.

BETHANY: 1. (India) A village in the Santal Parganas, Bengal; station of the Bethel Santhal Mission (1900), with 1 missionary, 3 native workers, 1 chapel, 1 Sunday school, 1 village school, 1 high school, a dispensary, a hospital, an orphanage and 600 communicants.

2. (West Indies) A village in the Manchester Highlands of Jamaica; station of the Moravian Mission (1835), with 1 missionary and his wife, 15 native workers, men and women, 2 chapels, 2 Sunday schools, 2 village schools, and 370 communicants.

2. A settlement in the Usambara region, German East Africa; station of the German East Africa Mission (1893), with 2 missionaries, 1 missionary's wife, 2 chapels, 1 village school and 20 communicants. Called also New Bethel.

3. A village S. of Bonaberi on the coast of Kamerun, W. Africa; station of the Basel Mis-
isionary Society (1886), with 13 missionaries, men and women, 25 native workers, 22 outstations, 23 school schools, 500 communicants.

4. A settlement in the Lichtenberg district of the Transvaal Colony, S. Africa, about 50 miles S. E. of Mafeking; station of the Hermannsburg Missionary Society (1872), with a missionary and his wife, 2 native workers, 4 outstations, 1 chapel, 1 village school and 1,250 communicants.

5. A settlement, 40 miles S. E. of Vryheid; station of the Hermannsburg Mission (1886), with 1 missionary, 4 native workers, 4 chapels, 4 village schools and 230 communicants. Also station of the Swedish Holiness Union (1894), with 1 missionary and his wife, 3 outstations, 1 village school, 1 training school for women workers, and 90 communicants.

BETHEL (Alaska): A station of the Moravian Mission in S. W. Alaska, situated on the River Kuskokwim (1885), with 2 missionaries and their wives (one a physician), 7 native workers, 1 chapel, 1 Sunday school, and 115 communicants.

BETHEL (India): A village in the Santal Parganas, Bengal, India; station of the Bethel Santhal Mission (1875), with 1 missionary physician, 8 native workers, 5 village schools, 2 high schools, 2 orphanages, 1 dispensary, 1 hospital, and 800 church members.

BETHEL (West Indies): A town in the N. W. of the island of St. Kitts, W. I.; station of the Moravian Missions (1832), with 15 native workers 1 chapel, 1 Sunday school, 1 village school and 130 communicants.

BETHEL TOWN: A village 20 miles S. of Montego Bay, Jamaica, W. I.; station of the Christian (Disciples) Woman's Board of Missions, with 1 missionary, 2 chapels, 2 Sunday schools, 1 village school, 2 Young People's Societies, and 120 church members.

BETHESDA: A village in Jamtara district, Jamtara, Bengal, India, begun in 1875 by Pastor A. Haegert, at his own expense. A mission house was built for a central station and the village which grew up about it was called Bethel. Schools were opened in neighboring sections of the Santal Parganas. Later Pastor Haegert added a hospital and training school to the equipment of the Mission.

There were (1900) 4 stations and 2 outstations, 5 missionaries and 20 native helpers, 1,500 communicants, 1 high school, with 25 students, 7 other schools with 150 pupils, 1 physician, 13 hospitals and dispensaries.

An auxiliary society has been formed in England to collect funds for this Mission and is called The English Council of the Bethel Santhal Mission.

BETHEL SANTHAL MISSION (1875): Evangelistic work among the Santals near Jamtara, Bengal, India, begun in 1875 by Pastor A. Haegert, at his own expense. A mission house was built for a central station and the village which grew up about it was called Bethel. Schools were opened in neighboring sections of the Santal Parganas. Later Pastor Haegert added a hospital and training school to the equipment of the Mission.

There were (1900) 4 stations and 2 outstations, 5 missionaries and 20 native helpers, 1,500 communicants, 1 high school, with 25 students, 7 other schools with 150 pupils, 1 physician, 13 hospitals and dispensaries.

An auxiliary society has been formed in England to collect funds for this Mission and is called The English Council of the Bethel Santhal Mission.

BETHESDA (Africa): 1. A settlement in the S. W. part of Basutoland, S. Africa; station of the Paris Society for Evangelical Missions (1845), with 1 missionary and his wife, 22 native workers, 12 outstations, 11 village schools, and 620 communicants.

2. A village about 40 miles W. of Kokstad, Griqualand, Cape Colony, S. Africa; station of the Moravian Missions (1877), with 2 missionaries and their wives, 16 months, and 1,000 communicants, 2 preaching places, 10 village schools and 390 communicants.

BETHESDA (India): 1. A village S. of Madhupur, Bengal, India; station of the Bethel Santhal Mission (1891), with 1 missionary, 3 native workers, 1 chapel, 1 Sunday school, 1 village school, 1 high school, 1 orphanage, a dispensary, a hospital and 30 communicants.

2. A town in South Arect, Madras, India. See KALLAKURTI.

BETHESDA (West Indies): A village on the E. coast of the island of St. Kitts, W. I.; station of the Moravian Missions (1820), with 16 native workers, men and women, 1 chapel, 1 Sunday school, 1 village school and 400 communicants.

BETHELHEM: 1. A town in Palestine, near Jerusalem. The birthplace of Jesus Christ. Station of the CMS (1899), with 4 missionary women, a village school and a high school. Also station of the Jerusalem Union of Berlin (1861), with 8 missionaries, men and women, 13 native workers, men and women, 3 outstations, 1 chapel, 1 orphanage and 5 village schools.

2. A village in the Santal Parganas, Bengal, India; station of the Bethel Santhal Mission (1884), with 1 missionary woman (physician), 3 native workers, 1 chapel, 1 Sunday school, 1 village school, 1 high school, 1 orphanage, a dispensary, a hospital and 40 communicants.

BETIGERI: A village near Gadag, in the Dharwar district, Bombay, India. Population of Gadag-Betigeri (1891) 23,880. Station of the Basel Missionary Society (1841), with (1902) 2 missionaries and their wives, 20 native workers, men and women, 5 village schools, 1 Sunday school and 177 communicants. Station of the SPG (1888), with 6 native workers, men and women, 3 village schools and 36 communicants. Also written Bettigeri and Betgeri.

BETO: A village in the southern part of Borneo, Malaysia; station of the Rhenish Missionary Society, with 1 missionary and his wife, 2 native workers, 1 Sunday school, 2 village schools, and 70 communicants.

BETTER HOPE. See BETTERVERWAARTUNG.

BETUL: A town in the Central Provinces, India, 50 miles N. E. of Ellichpur. Population, 5,000, chiefly Gonds. Station of the Swedish National Missionary Society (1880), with 5 missionaries, men and woman, 2 native workers, 1 Sunday school, 1 village school and 15 communicants.

BEUSTER, Rev. C.: Missionary of the Berlin MS to Africa. He was the first preacher of the Gospel sent to the Bawendo tribe in North Transvaal, and for twenty-nine years, amid the greatest difficulties, he labored among this benighted people. He rendered the tongue of this tribe into a written language, translated part of the Scriptures and other literature; taught untutored minds in the primary schools, and pursuing his long and tedious journeys on foot, he preached the Gospel to thousands who had never heard the Word of Life. For years he was the victim of the unhealthy climate of the North Transvaal; but without intermission he continued his labors of love until he passed from earth in the year 1901.

BEYROUT. See Beirut.

BEZWADA: A town of 20,000 (1891) inhabitants on the Kistna River, S. W. of Ellore, Madras, India; station of the CMS (1868), with 5 missionaries, men and women, 47 native workers, men and women, 23 village schools, 1 high school and 780 communicants. Also station of the CEZMS (1881), with (1902) 2 missionary and
14 native women workers, 4 elementary schools and 298 zenana pupils.

BHADRASK: A town in the Balasor district, Orissa, Bengal, India; station of the Free Baptist Conference (1893), with 1 woman missionary, 8 native workers, men and women, 1 chapel, 1 Sunday school, 1 village school and 25 church members.

BHAGALPUR: A city in the Bhagalpur district, Bengal, India, situated on the Ganges, with a population (1901) of 75,760, chiefly Hindus and Mohammedans. Station of the CMS (1850), with (1901) 2 missionaries, 1 with his wife, 8 native workers, 11 outstations, 2 elementary schools, 1 high school, 1 dispensary, 1 hospital, 1 orphanage and 288 baptized Christians. Also station of the CEZMS (1882), with (1902) 4 missionary and 14 native women workers, 11 elementary schools and 178 zenana pupils. Also station of the Mission to Lepers in India and the East (1887), with 1 chapel and 1 Leper asylum.

BHAGAYA. See BAGHARA.

BHAIDESI: A town in the Central Provinces, India, N. E. of Ellichpur; station of the Kuruk and Central India Mission (1889), with 2 missionaries and their wives, 3 native workers, 1 chapel, 1 Sunday school, 1 dispensary, 1 orphanage, 1 hospital and 6 church members.

BHAMO: A town and trading center and head of steam navigation on the Irrawadi River, 180 miles north of Mandalay, Burma. Population about 7,000. It is but 40 miles from the Chinese frontier. It is a station of the ABMU, opened in 1877, and occupied by 8 missionaries and 12 native workers, men and women. It has 9 outstations, 10 preaching places and 2 common schools. There are 120 church members.

BHANDARA: A town of 13,000 inhabitants, east of Nagpur in the Central Provinces of India; station of the UFS, with 1 missionary physician, 20 native workers, men and women, 4 village schools, 1 orphanage, a dispensary, a hospital and 30 church members.

BHARTPUR: Chief city of the native state of Bhartpur, Rajputana, India. Population (1891) 68,033, chiefly Hindus. Station of the ME, with 21 native workers, 1 chapel, 15 Sunday schools, a Young Peoples’ Society, 8 village schools and 550 church members.

BHERA: A town of about 17,000 inhabitants situated on the Jhadam River in the Punjab, India; station of the UP (1884), with 1 missionary and his wife, 2 missionary women and 2 outstations.

BHILS: An aboriginal Kolarian race of Central India. One of their typical men is about 5½ feet in stature, with short arms, prominent cheek bones, thick lips, black hair and heavy beard. Together with other Kolarian aborigines they were pushed back by an early Aryan invasion from the plains into the hill country, and are now found scattered over Rajputana, the hills of the Vindhya and Sarpur range, the outlying portions of Indore and Gwalior provinces, the hills and plains of Jhabua, Bonora, and eastward along the Godavari and Wad rivers. Their favorite abode is along the rugged, wooded banks of the Tapti, Mahi and Nerbada Rivers which flow into the Arabian Sea. Their estimated number is 3,000,000. Cruelly treated by the Marathis, they have ed apart, with their own chieftains and councils which settle disputes between individuals and communities, the British authorities maintaining it as difficult a problem. Marauding expeditions into the cultivated country, brigandage, the chase with bow and arrows as weapons, the raising of sheep and goats, some rude agriculture, and some simple manufactures in bamboo have been their means of support. When at home, they dwell in Chris. hamlets, called pals, each homestead, tolerably well built of loose stones and interwoven bamboo, located on a separate hillock so that an enemy may not surprise a whole town at once. Their clothing is meager. They have but few separate language. They are addicted to drink, and when intoxicated are quarrelsome. Polygamy is practiced, but more than two wives is unusual. Women are chaste after marriage.

Their religion is spirit worship, with additions from Hinduism. They are firm believers in ghosts and in witches. The latter they swing head downwards until they die or confess; but upon confession the witch is punished with death or banishment. Siva and other Hindu deities are worshipped and local deities are numerous. Gatamji, their patron saint, occupies a niche in every village house and a house is utterly called in to officiate at the naming of the child and at marriage. The dead are burned and the ashes cast into sacred streams, unless they have such a resting place, their spirits are supposed to trouble surviving relatives.

Missionary work was begun among the Bhils by the Church Missionary Society in 1880. It was at first very difficult to get in touch with this scattered, secluded and suspicious highland folk, but persistent kindness at last won their confidence. The first converts were enrolled in 1889, but in 1900, after twenty years of labor, the mission numbered fourteen baptized and fifteen catechumens. The work of the missionaries in famine relief in 1901–2 proved the turning point in the history of the mission, and since the Gospel has been welcomed, thousands of children have been enrolled in the schools, and in the spring of 1903 fifty-four converts were baptized and the Bhils undertook the building of their own church. The Bhil Mission of the Church Missionary Society occupies four stations in Rajputana; Kherwara, Lusaria, where there is a girls’ boarding school; Baulia, and Bilara, with a boys’ orphanage.

The history of other missions has been similar. The United Free Church of Scotland has an encouraging Bhil Mission in Rajputana with a ‘Bhil Home’ at Udaipur. Amkhut is the field of the vigorous Bhil Mission of the Presbyterian Church of Canada, with educational, medical, orphanage, and industrial departments. The Christian Bhils have proved good mechanics. The baptisms in 1901–2 numbered 105.

The Bhils are at a crisis in their history, and before long will become either Hindus or Christians. Because of the absence of caste, they do not meet the opposition which the Hindus do from their own people when they try to improve their condition. They are now coming to know their need, and at present they seem peculiarly open to the Gospel.

Wild Races of S. E. India, Lewin (T. H.), London, 1870; Brief History of the Indian Peoples, Hunter (W. W.), London.

BHIMPUR: A town lying N. W. of Midnapur, Bengal, India; station of the Free Baptist General
Conference (1874), with 2 missionaries and their wives (physicians), 139 native workers, men and women, 2 outstations, 45 Sunday schools, 45 village schools, 2 orphanages, 1 industrial school, 1 dispensary, 3 Young People's Societies and 270 church members. Also written Bhimrao.

BHINDA: A village N. E. of Bahraich, in the United Provinces, India; station of the ME, with 11 native workers, men and women, 8 Sunday schools, 1 village school, 4 Young People's Societies and 220 church members.

BHIWANI: A city of the Punjab, India, 60 miles W. of Delhi. Population (1891) 35,487. Station of the Baptist Zenana Mission (1857), with 4 missionary women, one a physician, 3 native women workers, 3 Sunday schools, 23 village schools, a dispensary, a hospital and 50 Zenana pupils.

BHOJ: A village in the Almora district, United Provinces, India, situated near Chandag, north of Pithoragarh; station of the ME, with 1 missionary woman (physician), 14 native workers, men and women. Chapel in 2 Sunday schools, 23 village schools, 1 Young People's Society, and 25 church members.

BHUTAN: An independent native state on the southern slope of the eastern part of the Himalayan range, E. of Sikkim and separating British India from the frontier of Tibet. It has an area of about 13,000 sq. miles and a population estimated at about 30,000. The religion of the people is Buddhism of a degraded type. Their language is allied to the Tibetan. The people are called Bhutias.

BIBLE CHRISTIAN HOME AND FOREIGN MISSIONARY SOCIETY: This society was organized in 1821 for the purpose of sending missionaries into unchristianized portions of the United Kingdom and into heathen lands. In 1831 it sent two missionaries to North America, one of whom occupied a station in Canada, and the other in Prince Edward's Island. Their work was eminently successful, and in 1883, when the union of all the Methodist churches in Canada was effected, the membership of this mission was about 7,000.

In 1850 Messrs. James Way and James Rowe were sent to South Australia, and later several other missionaries settled in Victoria, Queensland, and New Zealand. The work here being carried on under favorable circumstances, soon grew independent and self-supporting, and now the principal work done in this mission is the planting of new churches in needy districts.

In 1865 the Society sent two missionaries to Yunnan, China, under the auspices of the China Inland Mission, whose repeated appeals for help had aroused much interest. At present the Society has three stations, Yunnan-fu, Chao-tung-fu, and Tung-Ch'wan-fu, 12 missionaries, 6 native evangelists, 41 church members and 200 scholars. The recent changes have brought large numbers of inquiries. At home the Society has missionaries working among the lowest classes of people in London and other parts of England.

The Woman's Missionary League of the Bible Christian Missionary Society, was organized as an auxiliary to the Society in 1892 with special reference to the work in China.

BIBLE DISTRIBUTION: Its object is to bring knowledge of the Bible within reach of every person. The great Bible societies have adopted the principle that the end which they are to keep in view is not the possession of the Bible, but its proper use, and that any distribution which ignores this distinction is liable to do more harm than good. The different Bible societies have given away large numbers of Scriptures to the crowds that gather at such places as Jerusalem, or at fairs and exhibitions. The object was undoubtedly laudable, but the invariable result has been that the books thrown broadcast in this way have had little or no influence for good, and even inspired a feeling of contempt.

In order to meet the requirement that the Bible shall be placed within the reach of every person, however poor, the societies have adopted the general principle of gauging prices by the ability of the people rather than by the cost of the book. In such lands as the United States, Great Britain and the larger part of the Continent the Bible societies as a rule ask cost price for their publications, reckoning in the cost the expense of printing and binding, but making no allowance of the outlay for editorial work. To this however, there are exceptions in order to meet a special need, an edition, usually of the New Testament, is sometimes placed at a figure even less than the cost, as in the case of the editions designed for use in the schools or for distribution among the poorer laborers.

In the mission fields the day's wage of a laborer is often taken as the gauge, and an edition of the whole Bible, in plain but substantial binding, is issued at such a figure as will be within the reach of the ordinary peasant or artisan. Editions of the New Testament, or of different portions of Scripture such as the Gospels, Psalms, Proverbs, the Pentateuch, etc., are made proportionate in price. Scriptures in finer binding are sold at actual cost, since they are of the nature of luxuries.

If the distributor is satisfied that a person is not able to give the price of the book, and that a copy will be well used, ordinarily a free grant is made. The plan of trying to secure the attention and interest of a person not especially interested in the Bible by the donation of a copy has not, as a rule, been successful. But no iron rule as to free distribution can be laid down. Much must be left to the judgment of the person engaged in the work.

For many years the Bible societies worked as auxiliary to the mission societies in distributing the Bible; making grants of books, giving money to pay colporteurs, etc. As the different denominations entered the field, and in not a few cases covered much the same ground, the work began to individualize, and at last the necessity for providing the Scriptures for many people whom the missionaries could not attempt to reach, led to the appointment of a class of agents quite distinct from those of the missionaries. Thus grew up the system of agencies much like those of any mercantile house. The Bible Society Agent is located at some central point, such as Berlin, Vienna, Constantinople, etc. He keeps informed as to the needs of the territory assigned to him, and seeks to improve every opportunity to increase the circulation of the Scriptures and to add to the popular understanding of their value. In Japan the Bible Society Agent has made a point of sending the Scriptures on railroad trains, with good effect.

As in the case of missionary societies, so with
the Bible societies, disadvantages have arisen from the presence of two or more in the same territory. This has been a powerful action, expense, and has produced more or less of fric-
tion, if not between the Societies or their Agents,
at least between their employees. (See Comity).
The subordinate agencies of distribution are:
1. Bible Depots. These do not serve merely or
even principally as salesrooms of places of
storage, but are centers of influence. The sales
from a Depot seldom equal those by a
colporteur and it has sometimes been a serious
question whether the cost of maintaining them
has been wisely incurred; yet where an effort to
dispose with them has been made, they have been
quickly re-established as an essential feature
of Bible work.
2. Colporteurs. The work of these men is the
mainstay of Bible distribution in the mission
fields. By far the larger part of the Scriptures
sold on mission ground pass through their hands
and colporteurs have done and are doing quietly
and unobtrusively a work unsurpassed in impor-
tance by that of any class of evangelistic laborers,
because it is generally like the work of the
more. Not only the missionary preacher or teacher,
colporteur, combats the false doctrine. They
seem to people out in their homes, their shops, their
fields, and find access to places which no one else
could enter. Having as their aim the placing of
the Bible in the hands of all who will read and
study it, they have to be wiser than serpents.
Their daily labors abound in incidents as thrilling
as any in the history of the Church. They are
commonly men, selected not because of edu-
cation but for their initiative, their tactful methods
of dealing with men, and their knowledge of the
Bible as a practical guide to life rather than as a
storehouse of doctrines. At present there are
few lands where every city and town, or even
every village and hamlet is not within the field
assigned to some colporteur. This of course
demands careful organization, and no one can
read the annual reports of the Bible societies
without realizing how gigantic is the work to
which they are bending every effort.
3. Bible Readers. The work of the Bible
society at the point of distributing the Scriptures
is so nearly the same as that of the missionary
society, that it is not always possible to draw
the line sharply between these respective spheres.
For many years the Bible societies did not con-
sider it within their sphere to do more than ac-
tually distribute the Bible. Holding aloof from
all preaching, they considered that Bible readers
who must inevitably be in a great degree teachers,
were more properly mission employees. Yet in
many cases, when people were unable or unwilling
to read themselves, it was found that the Bible
reader, by arousing an interest in the Bible, be-
came a very important factor in its distribution.
Moreover the missionary societies have
found it simply impossible to provide such
laborers for all outlying regions. It has thus
come about that the Bible societies have accept-
ed the employment of Bible readers as a legiti-
mate part of their work.
Every missionary in the foreign field, whether
non-professional or professional, becomes also
a distributor of the Bible in the ordinary line of daily duty. Travelers, merchants
and officials of many nations and many religious
denominations have often gladly used their oppor-
tunities for giving to others the book which they
most prized for themselves. Many a courier or
dragman in the East shows how through the
New Testament he has been brought into his hands by
the stranger whom he has served. The number of copies of Scriptures distributed in this unre-
corded way is greater than is commonly imagined.
As to the results of Bible distribution, one
might almost say that the history of missions
throughout the world is the history of the won-
derful influence of the Bible upon men of every
race. All missionary literature teems with
incidents illustrating the far-reaching results of
inducing men to read the Bible. Sometimes it
is a robber in the Armenian highlands, who has
stolen the book from a traveler, sometimes it is
a peasant in Mexico who has received it from an
American soldier during the war of 1848; some-
times it is a Hindu peasant who has taken the
book from the doctor who healed his disease, but
the result in each case is the same—changed life
and a desire to tell others of the wonderful book.
Something of the magnitude of this influence of
the Bible, may be judged from the fact that
according to the conclusions of Rev. Dr. James
S. Dennis, after a laborious study of the reports
of the different Bible societies in order to avoid
duplication of the statements of Scripture,
portions or portions of Scripture annually dis-
tributed in foreign mission fields by the Bible soci-
eties, is 3,286,834.

BIBLE HOUSE, CONSTANTINOPLE: One of the
perplexing problems connected with mission
enterprise is that of providing a place for the
transaction of its business affairs. Of course,
many of the qualities of a great business there
is first the financial responsibilities for the differ-
ent departments involving the expenditure of
thousands of dollars annually. There is, too,
and great amount of publication involving a stock
of printed sheets, bound volumes, electrotype
plates, etc. The treasurer must have a safe
deposit for his money. The Bible society or Mis-
sion Publication Department needs storage room
for its books, the more nearly fire proof the better.
This problem early became a most serious one
in Constantinople. That city was the center of
four missions of the American Board, and of the
agencies of the American, and the British and
Foreign Bible Societies, and many other missions
looked to it for the transaction of important
business plans. The only building adequate to
accommodate all the agencies was the famous
khan of the famousdragoman, or master of
languages, in one of the numerous khan; but this was soon
too small. Then a whole building was rented
for all together in the business section of the city,
but that was insufficient. The existence of the
Bible House in New York suggested a similar
building in Constantinople; but when applied to,
the American Bible Society did not feel justified
in doing more than permit its agent, the Rev.
Isaac G. Bliss, D.D., to raise the money for a
Bible House. This he did is 1866 and secured
a number of prominent New York business men
in the enterprise. The building was completed in
1872. The building was complete and ready for
occupancy. It is excellently adapted to its
purpose, providing for the different mission-
ary agencies, office rooms, safe vaults, stor-
room for publication, engine room, and office
room for railway work, as well as office for
Bible revision committees. All these are supplied at a merely
nominal rent. Other rooms are occupied by
printing and binding establishments, and on the
street are stores, the income from which has been
applied to completing the property and to furnishing a Sunday service for the transient crowd always to be found in such a great city. Viewed simply as a business investment for the care of the sectarian part of missionary enterprise, the Bible House has been well worth all that it cost; but it has had another and even greater value, as a proof of the practical character of Protestant missions. It is known all through the city and indeed throughout the Empire as the "American Bible House," the central point of the missionary enterprise, which have done more than all else to arouse ambition for a better life. Enemies have recognized its influence and shaken their fists at it in impotent rage, and many a poor despised Christian has rejoiced in its simple beauty and strength as the token of the power that is yet to redeem the land. If ever there were sermons in stones they have spoken from the walls of the Bible House.

BIBLE LANDS MISSIONS AID SOCIETY: In 1853-4 Rev. C. G. Young, a minister in the North of England, traveling in the East, came into contact with missionaries of the American Board engaged in work among the Armenians in Ossia and other lands, and was deeply impressed by their devotion and zeal. Returning to England he urged that an endeavor should be made to associate Christians of all the churches in an effort to cooperate with those already in the field. Circumstances contributed to awaken interest in the subject. It was just before the Crimean War and the Eastern question was assuming an acute phase. The Sultan was looking to Britain for support against Russia. Sir Stratford Canning (Lord Redcliffe) the astute and able English ambassador at the Porte, had sought to influence the Sultan in the direction of a policy of toleration in religious matters. For several years Christians in Britain had watched with sympathy the converts among the Armenians, who had been grievously persecuted. After one or two public meetings which increased interest in the scheme of an auxiliary agency in England, on the 3d of July, 1854, the Turkish Missions' Aid Society was organized, the Earl of Shaftesbury being elected president. The Society is entirely undenominational, both in its supporters and in the distribution of its funds. The Society's object is "to spread knowledge of the Christian religion among Mohammedans by establishing schools and other means of teaching them to read and write their native language." The object of this Society is not to originate a new mission, but to aid in the extension of gospel work in Bible lands, especially that carried on by the Americans.

The Society has been and is a most valuable helper to many branches of missionary work in Turkey, having furnished funds to the amount of $512,000 to various special objects of importance.

The name of the Society was changed a few years ago by substituting "Bible Lands" for the "Turkish." This change was made not so largely supported as formerly, the Society continues to work on the same lines, making its special province the assistance of Christian work in Greece, Bulgaria, Turkey, Persia, Syria, and Egypt.

The organ of the Society is "The Star in the East," published quarterly.

BIBLE TRANSLATION: "The Day of Pentecost was fully come" and the spirit of God worked great miracles, and the Galilean disciples were enabled to proclaim the gospel in the divergent tongues of the vast heterogeneous crowd of three continents. "We do hear them speak in our tongues the wonderful works of God." What the spirit of God did on the day of Pentecost for a few of his chosen ones is what the translators of the Bible are doing for all the peoples of the world. The end in view is that every man may hear in his own tongue the wonderful works of God. For such a work special gifts, graces, acquisitions, and instruments are needed, and so these we proceed to speak in the following sections.

Qualifications Necessary for a Translator: The translator should be deeply conscious of the gravity of his work as well as of its importance. The man who enters on such work in a frivolous spirit will fail, like the general who enters on a great war with a light heart. Perfection in translation is unattainable, but it should be aimed at. Translation at best bears pretty much the same relation to the original that the wrong side of velvet bears to the right side. In the wrong side of the texture you may have all the material of the original, the warp and woof may be skillfully shot, all the weight and color may be in the piece, but the glossy pile is wanting. In translation the artistic touch which each author gives to his work, independent of the substance matter, can never be caught or transferred by another hand. If this be so in ordinary translation, it is still more applicable to Bible translation.

The original languages of the Bible constitute great difficulties. The Semitic Old Testament is full of perplexities. The language is archaic, the idioms are Oriental, the transitions are abrupt, the allusions are uncertain; the words thrown together in juxtaposition give little cue, by form or relation, to their exact meaning. Many passages are vague, and capable of several interpretations, and all passages have alliteration and gay upon which cannot possibly be reproduced in translation.

The original of the New Testament is Aramaic Greek, and the old Hellenic forms are filled with new ideas, like the new wine in the old bottles. The old Hellenic words had to be emptied of their old bottles before they could be filled with new service, and they are often inadequate expressions of the fresh gospel thought. The translator will have to trace the Hebrew conception in the Greek form.

In both old and New Testaments there are many hands visible. The Holy Ghost, who inspired the men that wrote as they were moved, did not interfere with their individuality or style of expression. Paul does not write like Luke nor John like James. The prophets are distinct from each other in thought and style, and unmeasurably removed from the feeling and form of our exact metallic age. Taking into account the composite character of the book, ranging from simplest narrative to most flowing rhapsody, one cannot but recognize how ill-equipped a modern scholar is for translating right through the Bible. The man who would successfully reproduce this Holy Book must himself be under the influence of the Holy Spirit who inspired and guided the various authors. Purvey, in his prologue to Wickliffe's Bible, says: 'He hath need to live a clean life, and be full of devout prayers, carried away by the Author of wisdom, knowledge, and truth, dress him in his work, and suffer him not to err. . . . By this manner, with good living and great travail, men may come
in their language, without the intrusion of auxiliary words from other languages. Most languages require constant watchfulness and practice approximations may be found. If the language is foreign to the translator, he should employ a trustworthy native to accompany him as much as possible. He should be constantly composing in the language, employing his native assistant to correct his compositions, and he should get by heart a choice specimen of the language daily.

Patience, in abundant measure, is a necessary endowment of a translator. Hasté is the fruitful author of ill-done work. The student in a hurry will translate "We do." The impatient translator will turn out crude and unfinished copy. There will doubtless be many influences drawing and pushing him forward at headlong speed. It may be that he is called to work for a bookless people, who have never had the Scriptures. Or he may be an imperfect version in the hands of the people, and by the help of a presumptuous native he hastens to improve the version, _currente calamo._

Patience is an attribute of strength, and the translator requires firm moral fiber to resist the influences that would hinder patience from having her work perfect.

Bishop Stere of Zanzibar spent five years in completing his version of the Gospel of St. Mark into the Swahili tongue. Only the patient procedure with one Gospel did he acquire facility in translation, and he had the joy of giving the New Testament to that great people before being taken home to his reward. The memorable words of the revisers of the Authorized Version should never be forgotten by the translator: "We do not expect to revise that which we had done, and to bring back to the avul that which we had hammered; but having and using as great helps as were needful, and fearing no reproach for slowness, nor coveting praise for expedition, we have at length, through the good hands of the Lord and our own, brought the work to that pass that you see."

So in the translation of Luther's Bible. The scholars who aided Luther revised with him every line with patient care, and sometimes they returned fourteen successive days to the revision of a single passage.

The English and German translators and revisers were rendering the Scriptures into their mother tongues, but the majority of translators and revisers are called upon to translate into tongues which are foreign to them, and which they are obliged to learn. The wise translator will always work with the assistance of native scholars, and this will necessitate patience in many respects. He will have to bear with the inaccurate and self-satisfied ways of the unmethodical natives. He will not be able to take renderings on trust, but must lead his helper round the idea until the exact point is reached. Sometimes, when engaged on languages which have no literature, and which have never been written, he will have to catch the words alive, and fix them as best he can on paper.

There is nothing, perhaps, which tries a translator's patience so much as having his work revised by others. It is never pleasant to have one's composition found fault with, and every correction made by a reviser assumes imperfect work on the part of the author. If the translator has the grace of patience when he first sees the
work that has cost him so much pulled to pieces, he will soon come to appreciate the suggestions of Vulgate and, in time, to himself. For all these things patience and Christian courtesy are absolutely necessary.

The translator should cultivate a simple, easily understood style. Very often first translations, made into a literary language, are cast in too lofty a style. The native helper is a scholar, generally proud of his native literature, in which he has been educated, and his aim will be to translate the Scriptures in accordance with high classical models. It is not the business of a translator to render a version in a language as the language ought to be, but as the language is. The common plain language of the people as used in commerce and in everyday life shall be the victorious form of speech, and into this form, avoiding all vulgarisms and low expressions, the Scriptures should be translated.

When the proper standard has been reached another question of great difficulty will arise. The translator should strive to convey the meaning while remaining as faithful as possible to the letter of the text. The sense must be given whether the passage be rendered literally or not, but pains should be taken to transfer the sense by giving a weight to every word.

Translators of the Scriptures should, whenever practicable, carry out their work by committees. The general rule of the British and Foreign Bible Society on this subject is as follows: "That whenever it is practicable to obtain a board of competent persons to translate or revise a version of the Scriptures, it is undesirable to accept for publication the work of a single translator or reviser."

The first great version of the Old Testament takes its name, Septuagint, from the supposition that the translation into Greek was the work of seventy scholars. It was certainly the work of a large revision committee—hence its great value and permanence. The revision of the English Bible which resulted in the Authorized Version of 1611 was the work of many scholars. The Dutch version was the production of twelve translators and sixteen revisers. The Manx Old Testament was the work of twenty-four translators and two revisers.

The text to be followed is of primary importance in Bible translation. Up to 1881 the work of translation for the British and Foreign Bible Society was carried on in accordance with the following instructions:

"Whenever practicable, a version should be a direct translation from the Hebrew and Greek originals. For the Hebrew Bible, the edition of Van der Hooght is considered the standard; and in the use of this the translator is at liberty to follow either the ketib or the qere; but not to adopt any rendering which is not sanctioned by the Massoretic vowel-points, or the ketib, or the English Authorized Version, or the marginal readings of this last. In the Greek Testament, the Elzevir edition of the 'Textus Receptus' of 1633, and reprinted by the British and Foreign Bible Society, is considered the standard; but in cases where the Authorized Version differs from this, either in the text or in the marginal reading, the translators are at liberty to follow either that text, or any other which may agree with any one of these three; and if a translator or editor think it better to omit the subscriptions of the epistles, the insertion of these is not required."

As far as the Old Testament is concerned, these instructions still hold good. Hebrew manuscripts of the Old Testament are of no great antiquity, dating only from A.D. 916. No doubt there are manuscript readings not included in versions such as the Septuagint, the Samaritan Pentateuch, the Syriac, and the Latin Vulgate. And there are doubtless previous readings of the Old Hebrew preserved in quotations in the New Testament. Collations of such readings have been made with the Hebrew laboriously and with assurance. Reading has been discovered or done to warrant the Bible Society in adopting a new text.

The case of the New Testament widely differs from that of the Old. Numerous ancient and important Greek manuscripts of the New Testament, "we have given alternative readings in recent years. Enormous learning and pains have been bestowed on the collation and classification of these manuscripts, and on the investigation of early versions and quotations. Sufficient material has been accumulated for the substantial incorporation of the Greek Testament of the fourth century."

Under these circumstances the Committee of the British and Foreign Bible Society in 1881 resolved to authorize missionaries and others engaged on behalf of the Society in the work of translation or revision to adopt such deviations from the "Textus Receptus" as are sanctioned by the text of the Revised English Version of 1881. The careful attention of translators was at the same time invited to the observations of the Company of Revisers on the revision of the Greek text in their preface, and to suggestions expressed by their emphatic words: "Many places still remain in which for the present it would not be safe to accept one reading to the absolute exclusion of others." "In these cases," the revisers add, "we have given alternative readings in margin, whenever they seem to be of sufficient importance or interest to deserve notice." These alternative readings should, therefore, be carefully studied before any change is adopted from the "Textus Receptus"; and, whilst the committee did not desire to control the conscientious judgment of translators or revisers, they suggested that where the marginal note in the English version indicates that ancient authorities support the Elzevir text, there would be safety in adhering to the present to the Elzevir text.

The same regulations substantially have been adopted by the American Bible Society, and thus far the two great societies have proceeded on the same lines in the work of translation and revision.

The Names for the Divine Being require special attention. The difficulty of finding any Supreme Being among the heathen is sometimes very great. Sometimes the gods are so numerous that the difficulty consists in making a proper selection. Sometimes there are no gods at all; but the translator's chief difficulty will be to find any name among the heathen associated with the ideas of reverence or worship. In this matter, in many others the translator will have to do the best he can. In the Septuagint and Greek Testament, Theos is substituted for Elohim, and Lord (Kurios) for Jehovah and Adonai promiscuously. The terms were not equivalents, but apostles and evangelists were content to use the names with caution until they became expressive of the true gospel thoughts now associated with each. Every care should be taken to select the best word, but it must be remembered that in all
countries the truth about God is gathered not so much from the name as from what is taught concerning Him who bears it. The translator in a heathen tongue must select the best term or name he can find. He may be obliged to take the name of a false god, he will find that by degrees, through use, the name disappears, and the true meaning assert itself. It might be possible to transfer the original names of God by transiteration, but in that case the names would, in themselves, be absolutely without significance when first introduced.

Translators will find it difficult to render the word Baptize in a manner satisfactory to all. If translating for a non-denominational society which is supported by all denominations, they can not be expected to translate the word by a term which supports the views of one denomination.

In versions made for the British and Foreign Bible Society the word Baptize and its cognates are translated or transferred, as is done in the English Bible, unless it can be translated by some native word signifying sacred washing, without limiting the form to either dipping or sprinkling. An attempt has been made to get over the difficulty by placing the neutral term in the text, and the denominational term in the margin, with the words "some translate immerse"—which is simply the statement of a fact. Where the version is Baptist, it would be better that the difficulty should be got over by an alternative reading than that a rival version should be issued. These matters require to be dealt with on both sides in a spirit of mutual forbearance.

Translators should be careful to choose the central language in commencing versions, and to resist all pressure to undertake translations in insignificant and dying dialects. Many versions produced in local patois have led to considerable waste of Christian money. At first it may not be possible, with limited experiments, to say which branch of a group of languages is the best vehicle for reaching the most people; but first editions should be tentative and small, and the second editions should be revised into the dominant form. Prince L. L. Bonaparte made versions of the Scriptures into more than a hundred languages, dialects, and patois, for linguistic purposes. These his Highness has handed over to the Bible Society, with permission to revise them for evangelistic purposes; but there are only a few of them on which the Society would be at all justified in spending funds.

The translator should be careful to mark in some distinctive way words inserted to make the sense complete, but which have no equivalents in the originals. Such words are marked in our English Bibles by being printed in italics. This is somewhat unfortunate, as in all other forms of English literature italics are used to give emphasis and prominence to words. The italics should be as few as possible. A great many in the Authorized Version are superfluous. In foreign languages the supplied words, when necessary, should be printed in type similar to the body of the text, but somewhat smaller. In preparing chapter and page headings only simple summaries should be given. In our English Bibles the chapter headings are printed in such small italics that they are seldom consulted, and from an unoccupied line the different chapter and chapter. The British and Foreign Bible Society has long had a paragraph English Bible prepared by Canon Girdlestone, and it has begun to print foreign versions in paragraphs, with sectional headings which simply announce the subjects of the sections. The headings are simple summaries, such as "The Creation," "The Flood," "The Temptation," "The Fall," etc. These versions seem more printed and accompanied by maps, have been published in Italian, Sesuto, Malagasi, French, and Dutch, and they have been well received. In China, too, the committee have agreed to publish summaries, sectional headings, and simple explanations of words and terms not likely to be understood by the Chinese.

The Scriptures can be read much more intelligently in the paragraph form. Much can be done by artistic printing, by proper spacing, and the arrangement of parallelisms to encourage the reading of the Scriptures. Lassere's Gospels in paragraph form are so arranged that every page says "read me"; and Frenchmen, for the first time, read the gospel with pleasure. There are many additional considerations, and necessary conditions, and infinite details, which might be advanced with regard to Bible translation, but these will be best learned in the practical work of translation. As in preparing sermons, writing books, and public speaking, each worker reaches his own style by his own methods, so translators must be left to find out the lines within certain limitations on which they can best accomplish the sacred work entrusted to them; and in the matter of details, common sense and scrupulous conscientiousness will be the best guides.

The list of versions in the Appendix enables one to judge of the immense work already accomplished in Bible translation.

The Bible is the greatest of all the classics, and its importance may be judged in contrast with them. There are, at the present time, over a thousand philologists busied with Bible translation and revision; and wherever the living missionary goes he takes with him the living word. Versions of the classic masterpieces of Greece, Rome, and the Far East are few, and are found on the shelves of libraries and in the homes of learning. The versions of the Bible are for the people, and no one can have the best accomplished from the press than they are taken up in such quantities by the missionaries, by the colporteurs, by the zenana women, and by all who wish the divine message made known, that the average circulation of the British and Foreign Bible Society alone is over four million copies a year. See Bible Distribution.

BIBLE VERSIONS: By far the larger proportion of existing versions of the Bible are used in foreign missionary operations. For the most part, also, they are the fruit of the patient toil of missionaries in the field. The missionary translator, unseen and almost forgotten in the isolation of his life work as he studies the sounds, the structure and the vocabulary of a strange language, and then uses his knowledge in translation of the Scriptures, renders a double service to mankind. He not only sets before savage and illiterate tribes the Book which it is to lift them in the scale of humanity, but at the same time he gives to the people the idea of committing speech to paper, and provides them with the means of doing so. More than this, he has placed in a form accessible to students in the home land the essential data for studying and classifying the language in which he is working. He thus materially aids
the extension of knowledge. As Dr. Cust has remarked, “It is a marvellous surprise to a scholar who has never left Europe to have a translation of a Gospel handed to him, of the genuineness and approximate accuracy of which there can be no doubt, in a language that is unprovided with a literature of its own.”

The list of known languages and dialects continues to grow as the surface of the earth is more fully explored. It has been estimated that the total number of languages now rendering active service exceeds 2,000. Yet it is by no means all the versions of the Bible which we must aim to provide. The list of languages which are dead, and that of other languages which are extinct, show that no version of the complete Bible should be undertaken without careful study of the place and the rank, as permanent or temporary, which that language holds in which the version is to be made. Such a fate as befell John Eliot’s Indian Bible, serving only as a literary curiosity because of the extinction of the language in which it is printed, is a warning on this point.

As at present constructed, the process of publishing a Bible, when once it is generally as follows: The opportunity or need of one being apparent, an arrangement is made between some one of the Bible societies and the missionary society occupying a certain field, by which one or more missionaries especially fitted for the work are instructed to devote either the whole or a part of their time to the preparation of the translation, their support and the incidental expense being, in many cases, assumed by the Bible society. When the translation is completed, preparations are made for publishing, either on the field, if good printing presses and binderies are available, or in America, England, or Continental Europe, according to circumstances. It was formerly the custom to do much of the publishing in London or New York, but since the establishment of the numerous foreign agencies it is very largely done at the great centers of these agencies, as Vienna, Constantinople, Shanghai, Tokio, etc.

The translation thus made is the property of the Bible society that incurred the expense, and, at least there is no regular copyright taken out, the rights of each society are carefully regarded. In the case of the Chinese and Turkish versions, two or more societies have combined to share the expense, and have equal rights of publication. Whenever one society has need of the publications of another the required copies are purchased, cost price rather than selling price being paid, on the principle that one society should not reap financial benefit from the benevolence of another. In certain cases permission is asked, and usually granted, for the use of plates for the reduplication of a version. In general the rule has been for each society to assist every other to the best of its ability, so far as convenience or cautious regard for mutual interest was involved, the aim being not to secure honor or glory to themselves, but to further by every possible means the great aim of the societies.

The number of living and effective versions of the Bible somewhat exceeds 400. All the languages of the “conquering” class now possess versions of the Bible. Substantially the same is true of the “permanent class of languages.” As to the weak languages which cannot hold their ground, and the dialects which cannot all survive the diffusion of education, in general, portions only of Scriptures have been translated into them.

A list of existing Bible Versions, and a list of missionaries who have translated or revised the Bible for the Bible societies, will be found in the Appendix.

BIBLE WOMEN: Mission reports originally employed this term as the simplest expression for Christian service on the part of a native woman. A “Bible Woman” read the Bible to other women, went from neighbor to neighbor, repeating texts and explanations as she had heard them, or, in later detail, she recited memorized passages of Scripture or sang a hymn.

The phrase will always signify those who make the Bible known to others. The Bible woman ingeniously invents opportunity to introduce the Word of God to the heathen. She teaches women to read in order that they may study the Bible; she gathers children about her to teach them Bible verses and stories; she enforces her Bible teaching by the example of her own self-sacrificing, happy Christian life. In the progress of missions, however, the content of the term has expanded until it covers wide and varied activities. What does not the Bible woman do? She is equally ready to join in a husking-bee or a grape-gathering, to help a tired mother with her sewing or in the care of sick children. Groups of women before their doors knitting or spinning, who they sometimes a wife, sometimes a spinster, the Book, more frequently respond to her pleasant greeting with an invitation to stop. In 1901, when people were dying of plague in Bombay at the rate of four hundred daily, the Bible women kept at their posts, visiting neglected homes, and, in the name of Christian charity, ministering to the sick and dying. They move with gentle ministration from one bedside to another in all the women’s wards of mission hospitals in Asia, and conduct services in their waiting rooms for patients. The writer has seen them addressing rooms full of listeners in the Margareteshwaran Mandir, Shanghai, Dr. Benn’s dispensary in Tientsin, teaching convalescents at Canton Hospital. At Tooker Memorial Hospital, Su-chau-fu, patients, especially from the country, often begin to arrive early in the morning, and one of the Bible women has many precious opportunities to perform her services. She sits in the gate-house with her sewing. These women also do a roadside work, conveying the first elementary notions of Christianity to their fellow passengers on the boat, or to the traveler resting, like themselves, in the tea-house or under a wayside tree. Taking advantage of the relations of the kinship or clanship, they penetrate to remote country districts where the foreigner has never gone, and publish the name of Jesus where ear has never heard it. In wet and cold, more often in blazing heat, they thread narrow country lanes and teach the alphabet, perhaps, to the secluded women of India. They are leading spirits in the women’s meetings; they explain the bhajans, they are a right hand to the pastor. It is they who arrange for the sick to be cared for, who advise mothers about their children, urge their education, discourage early marriage, warn against opium. “These Bible women in many ways prove a blessing. The other day, three of them heard a fierce quarrel going on at a village over distribution of the harvest. The women, who were farmers and Mahars in caste, had come to town with God’s blessing. The Bible women became peace-
makers and all the belligerents were soon sitting together, listening to the word of Christ’s love.

“A class has been formed,” (says the report of the leading British and American Women’s Missionary Society), “some of them blind and crippled; a Bible reader teaches them four times a week. The Bible women have been very faithful to the Dorcas Society; many garments have been made for the poor and money gathered for materials.” A staff of sixteen women has also worked in our Bible work (LMS in Calcutta). Men, also, welcome these modest Christian workers who often have an opportunity of delivering the Gospel message to men of rank and position.

The Bible woman is the link between missionary and the people. She is the key to her understanding and interprets each to the other. She supplements the missionary’s halting tongue with her fluent prayers. She is her escort to the high class house where rigorous etiquette must be observed, and she delicately chooses the proper moment in which to introduce her Gospel message. “Our efforts,” wrote a missionary in Travancore, “would amount to comparatively little in such a climate had we not a band of native women to go forth under our direction to labor from door to door. We must report ourselves in our Christian women,” said another.

The superior natural equipment of the Bible woman was well expressed by Miss Ricketts at the Shanghai Conference in 1890:

“She has been in the exact condition of her heart. She knows the depth of ignorance, their habits, temptations, modes of thinking and feeling, and therefore she can appeal to them and carry home her appeal by illustrations drawn from their common life. She has at her command a store of proverbs which give point to what she says, and she knows how to carry up the expectations of them in coming regularly to worship, and can meet objections to keeping the Sabbath. One of our Swatow Bible women can almost always gain and keep the ear of her countrywomen. She carries with her a wholesome, sunny atmosphere which the people enjoy. When they reply her with irrelevant questions she replies, ‘I have only one little mouth and cannot answer so many things. What I am saying is of life and death concern to you.’

All this explains the missionary’s methods, and energy and, to a degree, absorbs her cultivation. Her eyes see what sort of instruction the country class needs and discern the secret of sudden coldness in the church. She is the missionary’s indispensable helper, and, the many times that forbearance which is the price paid by superior endowment and training to less disciplined assistance, missionary and Bible woman mutually depend upon one another, and shut up together as they often are for weeks of intense suffering from hardship and persecution, their relation in numberless cases is that of established trust and friendship. Every reader of missionary magazines will here and there come upon such testimony as the following, in a missionary’s letter from Marsovan, Asia Minor: "Veran-" in whose choice of the Bible woman, closed her lovely and most useful earthly life in November, 1901. Her loss seems irreparable, and was felt as keenly by the missionaries as by the poor people to whom she had so long, so wisely, and so tenderly ministered.”

While the old type of uneducated Bible woman still obtains in places, there is a growing sentiment in favor of training. At least eleven of the leading British and American Women’s Missionary Societies report distinct classes of “Bible Readers” with enrollment of 468 pupils. Thorough courses of Bible instruction characterize these schools, and, in most of them, at least music and physiology are taught, and out-door practice is required. The school of the Women’s Union Society at Yokohama has about two years’ use. Bible women generally work under missionary inspection and render reports. Conferences are occasionally held for their benefit. The women are often of good social position and genteel appearance, but blindness has not prevented some from great usefulness. In this column, is worked by over fifty Bible women. In Madura, Madras Presidency, thirty-one have access to a thousand non-Christian homes of the city where Bible instruction is gladly received, and seventeen other women visit in seventy-two villages and instruct over a thousand pupils. At Ahmednagar, Bombay Presidency, ten classes, including 250 illiterate women, are taught by seventeen Bible women who also have pupils in private houses. Thirty-six women of the Union Society are laboring in and about Yokohama. Foochow, China, has its center, where three missionaries engage in training women for Bible work.

As to the number of Bible women employed in Protestant missions, only a very partial estimate is possible. In 1899 the British and Foreign Bible Society received returns from 552 women under its direction. The London Missionary Society, in 1902, reported a staff of 271 Bible women, the Church of England Zenana Society 242, the American Baptist Union 250, the Presbyterian Board (North) 225, the Congregational Woman’s Board (Boston) over 200. The Zenana, Bible and Medical Society (London) reports 92, and the United Free Church of Scotland 36. The American Marathi Mission employs 109 Bible women as against a total of 84 pastors, preachers and men Bible readers.

Those workers who appear on the pages of reports are only a small fraction of the many, a mission ensures to itself the advantages of consecutiveness and definite hours of labor. The wages of Bible women range from 25 to 50 dollars a year. In addition to this recognized force, there are many voluntary workers, the amount
and value of whose services can never be tabu-
lated. In some of the newer missions, it is
aimed to develop this voluntary corps and to
reduce the number of paid workers to a minimum.
The Mission of the Presbyterian Church (North)
in Korea is a marked example of this aim. Hun-
dreds of Korean women are voluntarily doing the
work of the men who are paid. The writer has seen one effect-
tively preaching of her own free will to a miscel-
naneous crowd on a river bank. These Korean
volunteer Bible women were met, night after
night, in country meetings, where they found the
Scripture passages for the sermon, and set the
example of a quiet and order to the unintiated.
They were heard of, selling Testaments as they
traveled about in the conduct of their own business,
or led meetings with beginners in the
Christian life. Their cleanliness, their pure
language and their Gospel message, all were re-
enforced by the fact that no pecuniary reward
had touched their hands.

BICKNELL, Henry: Missionary of the LMS
to Tahiti, 1796-1820. In 1819 he baptized King
Pomare, and also assisted him in the framing of
a code of laws by means of which good govern-
ment on the island was formally established.
Died at Tahiti, August 7, 1820.

BICKERSTETH, Edward: Died August 5,
1897.
M. A. Fellow Pembroke College, Cambridge.
Ordained deacon in 1873; ordained priest in
1874. Chief station, Delhi, India, from 1877-81.
Transferred to Japan in 1886. Consecrated in
St. Paul's Cathedral in 1886, second English
Bishop in Japan. Son of E. H. Bickersteth, Bishop
of Exeter, and grandson of a former Sec-
retary of the CMS. He was moved by the mis-
sionary Bishop French of Lahore to devote his
life to a missionary career; and, influenced by
French, he planned a brotherhood of Cambridge
men, which should form a strong and concen-
trated mission at some central station, in affilia-
tion with one of the established societies.
Bick-
ersteth's hereditary associations naturally led
him to approach the CMS, but, difficulties arising,
he concluded matters with the SPG, and Delhi
was chosen for the new "Cambridge Mission.

Bishop Bickersteth arrived in Japan April 16,
1886, and at his request he was allowed to
make his residence at Tokio. His great achieve-
ment is spoken of as the formation of the Nippon
Sei-kokwai or "Japan Catholic Church."
He felt
that the peculiarly independent spirit of the Jap-
anese and the tendency toward a latitudinarian
development of Christianity among them, ren-
dered it important that the ecclesiastical organi-
sation, with its doctrines and forms, should be
positively recognized. He soon felt the value
and importance of woman's work in Japan; and
wrote to the Society these urgent words: "I feel
strongly that the policy of working through
clergy only, without the assistance of lady mis-
sionaries, has in the past crippled our Missions."
And since then, Japan has always claimed and
received a good share of SPG women.

In 1887 Bishop Bickersteth, accompanied by
Bishop Scott, of North China, visited Korea, and
their appeal to the Archbishop of Canterbury
resulted in the establishment of the SPG Mission
in this important field. In 1892 the Bishop set
himself to visit every station and outstation of
the Anglican Missions in Japan, and his study
of this large diocese, with its extremities 2,000
miles apart, led him to the conviction that Japan
now needed more bishops. His suggestions
were accepted and acted upon. Bishop Bicker-
steth did much toward consolidating the Japan-
ese Church under American, English and Cana-
dian Episcopal Missions into the Nippon Sei-
kokwai with its synodical organization, and his name will also be remembered as the
founder of the two community missions of
St. Andrew and St. Hilda, the former of which
(for men) renewed its connection with the SPG
in 1900. The Bickersteth Hall, in Delhi, India
(built in 1891) affords a splendid opportunity
for preaching the Gospel in the very heart of
the Mohammedan quarter, and the Bickersteth
Memorial Studentships for the maintenance of
students studying for the ministry at St. Andrew's
Divinity School, Tokio, supply a felt need.

BIHE. See Angela.

BIJAPUR: Chief town of the district of the
same name in the Bombay Presidency, India.
Formerly an imposing city, it now has (1911) about
16,356 inhabitants. Station of the British
Missionary Society (1885), with (1002) mission-
ary and his wife, 9 native workers, 4 village
schools and 53 communicants. Name written by
the Germans Bischlapur.

BIJNAUR: A town in the Rohilkhand division,
United Provinces, India. Population (1891),
16,226.

Station of the ME, with 1 missionary and his
wife, 41 native workers, men and women, 4 chap-
els, 20 Sunday schools, 17 village schools, 1 high
school, 1 Young People's Society and 1,216 pro-
fessing Christians. Also written Bijnour.

BILASPUR: A town and railway station in
the Central Provinces, India. Population (1891),
12,236. Station of the Christian (Disciples)
Woman's Board of Missions (1893), with 7 mis-
sionary women, of whom one is a physician, 1
chapel, 1 Sunday school, 2 village schools, a dis-
persary, a hospital, an orphanage and 70 pro-
fessing Christians.

BILON: Name of a tribe inhabiting a part of
the northern regions of Abyssinia. About
half of the tribe are Roman Catholics, a part are
Mohammedans, and the rest belong to the
Abyssinian Church. The tribe is also called
Bogos.

BILON LANGUAGE. See Bogos.

BILSI: A town in the Rohilkhand division,
Central Provinces, India; station of the ME,
with 23 native workers, men and women, 11
Sunday schools, 7 village schools, a Young
People's Society and 960 professing Christians.

BIMLIPATAM: A town on the coast of the
Vizagapatam district, Madras, India; station of
the BMP (1876), with 2 missionaries and their
wives, 1 missionary woman, 6 native workers,
men and women, 2 outstations, 1 chapel, 1 Sun-
day school, 1 theological seminary and 22 church
members.

BINA: A town and railway station in Central
India, S. W. of Lalitpur; station of the FCMS
(1894), with 1 missionary and his wife, 1 mission-
ary woman, 3 native workers, 1 chapel, 1 Sun-
day school, 1 village school, 1 orphanage and 60
church members.

BINGHAM, Hiram: born at Bennington, Vt.,
October 30, 1789; graduated at Middlebury
College, 1816, at Andover Theological Seminary, 1819. A visit to the foreign mission school at Cornwall, while Henry Oookiah was there awakened in him a desire to carry the Gospel to the Sandwich Islands. He was ordained September 29, 1819; sailed October 23 of the same year as a missionary of the ABCFM and was stationed at Honolulu. His undaunted courage, inflexible will, combined with his good nature and cheerful-ness, fitted him to meet the opposition in that stronghold of wickedness. He returned to the United States in 1841 on account of the ill health of Mrs. Bingham. Six years after his return he published History of the Mission down to 1845, in an octavo volume of 600 pages, a work of great historic value. He died in 1869 after a brief illness.

BING-YAE. See PING-YANG-HSIEN.

BIRD, Rev. William: Died August 30, 1901. On the 17th of August, 1901, Rev. William Bird celebrated the 79th anniversary of his birthday. He had entered on his fiftieth year of service in the China Mission.

He first came to Syria in 1823 as an infant. When his parents and their associates were obliged to flee from Syria, this child became treasurer of the Syria Mission, his bed and pillow being the safe deposit vaults for the cash, thus eluding the keen vigilance of the Turkish officials and the violence of a lawless populace.

Not long after, when he returned a second time, with his parents, to Beirut, the entire Protestant community came in a little boat to meet them. It consisted of two men.

In 1853 Mr. and Mrs. William Bird began their missionary career (under the ABCFM), the last twenty years of which was spent in the service of the Presbyterian Board (North). Having spent his childhod in Syria, the difficult Arabic language was practically his vernacular. His life was full of zeal and earnestness and self-denial. He preached with power and marked effect. He was loved and honored by the people. Wherever he went he was welcomed. He ate with the people and slept as they slept when on his missionary tours, winning their confidence and friendship from humanity. The help of the few missionaries are to do. He was particularly attractive in his school work and enthusiastically welcomed by all children. He was loved and honored by all who knew him, and is deeply mourned by all his associates and acquaintances.

BIRTE: A town in the western part of Manitoba, Canada; station of the PCC (1883), with 1 missionary and his wife, 2 missionary women, and 1 high school.

BISAULI: A village in the Rohilkhand District, United Provinces, India, N. W. of Budaun; station of the ME, with 20 native workers, men and women, 2 chapels, 16 Sunday schools, 6 village schools, 1 Young People’s Society, and 1,290 professing Christians.

BISHNUPUR: A town in Bengal, India, S. E. of Bankura; station of the WMS. Statistics included in those of Bankura. Name also written Biehenpoere.

BISHOP, Artemus: Born at Penpey, N. Y., December 30, 1795; graduated at Union College, 1819, and Princeton Theological Seminary, 1822; sailed as a missionary of the ABCFM in the first reinforcements for the Sandwich Islands, 1822. He was stationed at Kailua, and was associated with Mr. Thurston in the translation of the Bible. After residing twelve years at Kailua, he removed to Ewa, on Oahu, where he labored twenty years with great success. Here he translated Pilgrim’s Progress and many other books. He never left the islands except once, and that as a delegate to the Marquesas Mission, 1858. He died at Honolulu, December 18, 1872.

BISRAMPUR: A town in Chota Nagpur, Bengal, India; station of the German Evangelical Synod Missionary Society, U. S. A. (1869), with 2 missionaries, 1 missionary’s wife, 1 missionary woman (physician), 22 native workers, men and women, 10 outstations, 1 Sunday school, 6 village schools, 1 high school, 1 industrial school, 1 theological seminary, 1 orphanage, a hospital, a dispensary, and 670 communicants.

BISTOPUR: A town E. of Calcutta, Bengal, India; station of the BMS (1844), with 4 native workers, 12 outstations, 14 village schools, 1 high school, 13 Sunday schools, 7 young people’s societies, and 475 church members.

BITHYNIA: In ancient times a section of Asia Minor, bordering on the Sea of Marmora and the Gulf of Nicomedia. There is no present province of that name, but the term is still applied in general to the same region. It includes especially the cities of Brous and Nicomedia, with not very well defined limits either to the north or east.

BITLIS: A city of Eastern Turkey, 150 miles southwest of Erzerum. Climate, healthy, dry. Population, 25,000, Mohammedan Kurds and Turks and Christian Armenians. Its situation among the mountains of Kurdistan is peculiarly beautiful, and surrounded as it is by high peaks, which the air surmounts as easily as it does the Kurds. The rough, turbulent character of the people has often occasioned trouble and even danger; a massacre of Armenians occurred in the city in 1895.

Station of the ABCFM (1859), with 1 missionary and his wife, 3 missionary women, 29 native workers, men and women, 12 outstations, 9 chapels, 3 Sunday schools, 19 village schools, 2 high schools, 1 industrial school, and 250 church members.

BIZERTA: A seaport town and seat of a Roman Catholic bishop, in Tunis, Africa; station of the NAM (1896), with 2 missionary women and 1 Sunday school. Also station of the (Swedish) Women’s Foreign Mission Work (1898), with 2 missionary women.

BLACKFOOT CROSSING: A station of the CMS (1883) on the S. Saskatchewan River, Alberta, Canada, with 3 missionaries (1 a physi- cian), 1 missionary’s wife, 2 native workers, 1 chapel, 1 high school, 1 dispensary and 94 baptiz- ed Christians.

BLACKFOOT LANGUAGE: Belongs to the central group of the North American family of languages. It is spoken by some 7,000 Indians in the Province of Alberta, Canada. It is written with Roman letters.
BLACKLEAD ISLAND: A station of the CMS among the Eskimos, on the W. coast of Cumberland Sound, north of Labrador (1894), with 2 missionaries (1 with his wife), 1 village school, and 50 Indians.

Station of the CSFM (1874), which has had many difficulties to overcome, some due to early inexperience, some to the intrigues of jealous merchants and some to inevitable collisions with Arab slave dealers. The place is now, however, prospering, and in one place after long suffering has opened a school, dispensary, and printing house.

It is a station, also, of the NCB (1889), with 2 missionaries, 3 native workers, 1 chapel, 1 Sunday school, 1 industrial school, and 100 professing Christians.

BLAUBERG: A town in the northern part of the Transvaal Colony, South Africa. Station of the Berlin Evangelical Missionary Society (1868), with 1 missionary, 11 native workers, 3 outstations and 101 communicants.

BLEBY, Rev. Henry: Born in Winchcombe, England, March 16, 1809. Died May 22, 1882. Missionary under the WMS. He was received into the ministry in 1830 and sent out to the Jamaica district in the West Indies, where he rendered valuable services to the Church of God. He was prominent among a noble band of men who, in the midst of deadly persecution, counted not their lives dear to themselves if they could but mitigate the sufferings of their oppressed fellow creatures. On one occasion the enemies of missions to the slaves seized him, daubed his body with pitch, and took a lighted candle to set the pitch on fire. He was only saved by the brave intercession of his wife. The experiment of Wesleyan missions in the West Indies opened the doors of the kingdom, and no hand was so delicate as the hand of Mr. Bleby in the discharge of the difficult duties that devolved upon him.

He was the author of the following works: Death Struggles of Slavery (being a narrative of facts in Jamaica during the two years immediately preceding negro emancipation). Scenes in the Caribbean Sea. Reign of Terror (W. Indies). Romance without Fiction; or, Sketches from the Portfolio of an Old Missionary.

BLIND OF THE FEMALE SEX IN CHINA; German Mission to. See GERMANY; MISSIONARY SOCIETIES IN.

BLIND: Missions to the: This is one of the works of general philanthropy for which non-Christian peoples are indebted to the Christian missions. Pagan, and more especially Mohammedan, peoples give help to the blind as they do to other impotent folk. The emotion of pity is a characteristic of the human race, of which, happily, traces may be found even where self-seeking sometimes seems to have extinguished all other motivations. Christian countries that habit of thought for the welfare of others is lacking which Jesus Christ teaches His followers. As a rule, in such countries the helplessness of the blind is regarded as a natural calamity for which alleviation cannot be imagined, and which therefore separates them from their possible contribution to the alleviation of social life. But in such cases it seems to the pity that has been raised in a small number of instances.

The lot of a sightless one, at the best, if he is one of the common people, is that of a plaintive supplicant who suffers and who is, as it were, urged to continue to suffer until death releases him. Schemers for easy gain take advantage of the calamity in some of the Asiatic countries. A blind child is taken in hand and cared for, as a business investment by men who clutch as their due the proceeds of the beggar's appeal to the pitiful. In Turkey, then make it their profession to scour the country in search of such impotent folk in order to hire or buy them from their relatives, and then to exploit their miserable condition on the streets of the cities. In China, it was in past years generally, and in some places still, the custom of beggars to gather up blind girls and house and feed and clothe them in order to make money by thrusting them into a life of debauchery. In such lands the best that can happen to a blind person who is of the poorer classes is to be left alone, and hence the beggars may pass by the blind and pass by on the other side. But let the Gospel enter such a land and the missionary who is charged to make it known cannot rest until he has devised means of giving the blind the power to read, to earn a living, and to feel, by means of this knowledge which appreciates his deeper needs, the love of Jesus Christ for outcasts.

The work of missionaries for the blind cannot here be catalogued in detail. But it is a work which should not be passed by without reference. In China an unusually large percentage of the population become blind through small-pox, leprosy, and ophthalmia. For neither disease is any same medical treatment provided by the natives. Filthy and immoral habits, and the brutality of parents who wilfully blind their children through greed of gain, are also factors in China. As far back as 1857 the mission of the Protestant Episcopal Church (U. S.) at Shanghai established a school for the blind. In the northern part of the empire efforts to help the blind took a new development when William Murray, then a colporter of the National Bible Society of Scotland, succeeded in applying the Braille system of raised dots to the Chinese characters. His Christian sympathy for the wretched Chinese blind drew the whole power of his mind to their relief, with the result that he solved the problem of enabling them to read books.

The system which Mr. Murray arranged is so simple that even Chinese who can see have found the Braille alphabet of dots more easy to master and use than the quaint but perplexing characters written by their own ancient scribes. Mr. Murray readily obtained money to open a school for the blind at Peking in 1881, which has not only taught blind beggars to read and write and to work for their own support, but has transformed some of these hopelessly dependent creatures into active missionary agents, as Scripture readers and colporters in the Christian chapels. The amazement of the natives on seeing a blind child read with his fingers arouses the deepest interest, and becomes a
meanings of turning men's minds to study of the reasons for the intelligent humanity of the followers of Christ.

The Braille system has been adopted by some of the missionary societies, and as the children in the blind schools are thus prepared, a stock of Bible verses and other useful matter which, once committed to paper, they can read again and again. The Bible societies have made this the Moon system the means of publishing, in the Mandarin and three local dialects of Christian Gospels or other parts of Scripture for the blind.

What Mr. Murray did for the Chinese of the Peking region was done for the people of a good part of Turkey by the late Rev. Elias Riggs, D.D., aided by Mr. G. W. Moon. Some of the Gospels have been prepared for the blind in Arabic, and one of the other of these two systems has been adopted for the uses of the blind in Arabic, in seven of the languages of India, in Burmese, in Sinhalese, in the Toba language of Sumatra, and in the language of Uganda, in Africa. Thus it has been found that the country which could not be visited by their nearest friends as beyond human aid, have been taken at hand for Christ's sake by strangers from beyond the seas and have been caused to see the light.

There are now 12 institutions for the blind in China, maintained by the PNG, the CMS, the PE, the CIM, the WMS, the PCE, the Berlin Ladies' Missionary Association, and the German Mission to the Chinese Blind, besides the Murray Mission and another independent mission expressly to the blind. In such institutions are carried on by the CMS, the CSM, the CEZ, the CP, and the ABCFM. In Japan there are 4 missionary institutions for the blind established by the CMS, the MCC, and an independent mission. Another independent organization for the blind in Korea. The PCE has an outdoor mission to the blind in Formosa, and cooperates with the Japanese Government in giving permanent asylum to those who need it. The British Syrian Schools Committee has opened three schools for the blind in Syria, one of them on the ruins of Tyre—that ancient queen of the Mediterranean. In nearly all of these institutions there is provision to endow the pupils with simple industries which will give them occupation and support. But the number of asylums and schools for the blind does not represent the work of missions for these wrecked lives. In every mission field where no such schools exist, individual missionaries teach, and elevate, and comfort, and make happy individuals who but for them would never know the meaning of sympathy. Moreover, this humanitarian work has stirred non-Christians to imitate or support so far-reaching a charity. Even in Turkey, Mohammedans have been led in recent years to copy this part of the teaching of the Christians.

There is no point of comparison between the non-Christian and Christian. In both Christian and non-Christian ways reveals a sharper contrast than their idea of what constitutes kindly care for the helpless and helpless. The man who does not know Christ may probably feel pity, but his religion does not direct his pity to reach its proper goal. So he gives the sufferer the sympathy he uses himself. But the man who has learned from Jesus Christ cannot leave the blind man when he has given him bread. He sees the profounder needs belonging to manhood—the needs of heart and soul and mind. He has to supply these needs by a continual and unflinching sacrifice of himself. But in doing it, he becomes the means of revolutionizing a hopeless and useless life by bringing it within the life of eternal world. This work for the blind of non-Christian lands would not be done if it were not done by Christian missions.

BLISS, Edwin Elisha: Born at Putney, Vt., April 12, 1817; died at Constantinople, Turkey, December 20, 1892. Graduated at Amherst College in 1837, having for his college mates Henry Ward Beecher, Roswell D. Hitchcock, and Richard S. Storrs. Graduated at Andover Theological Seminary in 1842; sailed for Turkey March 1, 1843, as a missionary of the ABCFM assigned to the Nestorians living in the mountain region along the frontier of Persia. The Turkish Government having refused, on account of the disturbed state of the country, to let an American go to the Nestorian district, Mr. Bliss was temporarily assigned to Trebizond. The demands of other fields proving pressing, he never reached the field to which he was first assigned. Mr. Bliss learned both the Persian and Turkish languages. In 1851 he was sent to open a new station at Marsovan, in the eastern extremity of the province of Sivas, and through ignorance of the country and devotion to his duty he exposed himself to malaria, becoming subject to attacks of intermittent fever, from which he could not count himself free to the very end of his life. After having worked with great success in the Marsovan field, Mr. Bliss, in 1856, was transferred to Constantinople for literary work in the Armenian language. During thirty-six years he was occupied in the department of publication, part of the time in editing the Avedaper newspaper, and later in the preparation of books and tracts, many of which have been daily food to the Evangelical Churches of Turkey. During his whole missionary life he esteemed it a privilege and duty to preach when opportunity offered, and for a victim of ague, and working during the week like a slave of the printing-press. Dr. Bliss' influence in mission councils and in native churches alike was extraordinary. The simplicity and piety of his private life, the certainty with which his mission was identified by 'the devotion, patience, and justice which characterized his discussions of important matters,' caused it to be remarked that while other missionaries of renowned power were at Constantinople at the same time with him they all recognized in Dr. Bliss a peer. Probably all admitted that for uniform soundness of judgment at times of crisis he stood first in the mission. Dr. Bliss preferred to spend time in doing his work rather than in calling attention to it. Hence he was not widely known outside of mission circles, altho his services in Turkey continued nearly fifty years.

BLISS, Isaac Grotius: Born at Springfield, Mass., July 5, 1822; graduated at Amherst College, 1844, and studied at Andover and New Haven Theological Seminaries. He married Eunice B. Day, of West Springfield, and in 1847 was ordained a missionary of the ABCFM. Stationed at Erzerum, Eastern Turkey, he was a pioneer in opening up the valley of the Euphrates to missionary influence. Uninterrupted labor and
continued traveling, at that time far more dangerous and fatiguing than now, broke down a naturally fine constitution, and in 1852 he was obliged to resign, and in 1859, after resignation, he resigned his connection with the Board. Scarcely a year after his resignation an invitation came to him from the American Bible Society to go to Constantinople as agent for the Levant. The work being less confining, in the winter of 1857–58 he entered upon it with enthusiasm.

He found the agency without any organization at all. There were almost no rules as to the distribution of Bibles, and the greater part of the funds received from their sale was applied to general missionary work. With great tact and patience, and inimitable will, he set to work to bring order out of confusion. His field was very large, covering the whole Turkish Empire (including Egypt, Syria, and Mesopotamia), Persia and Greece. Located at Constantinople, the port by which most missionaries to those lands entered into their fields, and where for many years the annual meetings of the whole missionary force were held, his house was always open, and there were few of those who passed through that did not enjoy its hospitality. He traveled some, too, not as much as he felt essential, but doing almost the entire work from the little office he had; he was the treasurer of the mission of the ABCFM at Constantinople. Their cramped and unhealthy quarters were a constant trial, and at last the resolution was formed to build a Bible House for Constantinople corresponding to that in New York. Called home in 1860 to attend the Jubilee of the Bible Society, he pressed the need of such a building. The Society was unwilling to take it up, but allowed him his time to raise the needed money, and in 1867 he returned with the requisite funds. The securing of a site and the erection of the building met with the most determined opposition, but in 1872 the edifice was complete and universally recognized as the handsomest business building in the city. It has since been enlarged as the work has grown. See Bible House, Constantinople.

While in the midst of superintending the erection of the Bible House, Dr. Bliss took the time, in 1870, to make a hurried visit to America, and secured the transference to Beirut of the great work of electrotyping and printing the Arabic Bible. This had hitherto been done at the Bible House in New York, and the change seemed to many hazardous, yet by dint of most earnest appeals he secured the endorsement by the Society of a step since recognized to be one of the most important in its history.

Then came the question of the Turkish versions. There were at that time three, in the Arabic, the Armenian, and the Greek characters, all made by different men, and with differences of meaning as well as of idiom. This had long been felt to be most unfortunate, yet there seemed to be no help for it. Dr. Bliss believed that the difficulty could be overcome, and even at the risk of offending some, he pressed for a union of the forces that were revising each version. At last he carried the day, and the Turkish version of to-day is scarcely less a monument to the men who made it than to him whose earnest purpose made it possible for them to make it.

Meanwhile, he pressed colportage unceasingly. From 2,500 copies during the first year, the circulation ran up to 56,628 in the twenty-fifth year of the agency.

The winter of 1858–59 was a trying one, and he sought relief in the warmer climate of Egypt, and in July, 1859, he passed a month in Assiout, Upper Egypt. He was buried by the side of a lifelong friend and fellow-laborer, Rev. John Hogg, D.D., at the very outpost of his agency, whence it had been his desire to push on the Bible work into the heart of Darker Africa.

BLODGET, Rev. Henry: Born in Bucksport, Me., July 25, 1825. Died in Bridgeport, Conn., May 23, 1903. For forty years a missionary of the ABCFM in China, and for eight years a Corporate Member of the Board. He graduated from Yale College in the class of 1848, and was tutor there from 1850 to 1853. He studied in New Haven and Andover Theological Seminaries, and was ordained as missionary in January, 1854, sailing that same year for China. He arrived at Shanghai in September, 1854, and began to preach in the Chinese language a year later. Dr. Bloidget came to America in 1857–58, but in 1864 he located at Peking where he remained until 1894, when, owing to the increasing infirmities of old age, he returned to America. He had a wide influence in Peking being universally respected by representatives of the Government, no Mission, and the Chinese Christians. For the last thirty years of his life in Peking Dr. Bloidget gave his time largely to literary work. He gave his best strength for nearly ten years, with a company of five, to the translation of the New Testament into the Mandarin Colloquial of Peking. He translated 194 hymns and six doxologies, and besides the New Testament and these hymns, Dr. Bloidget translated several lesser works, as Thomas à Kempis, The Reformed Church Catechism, by Philip Schaff; President Edward Consecration, and Henry and His Bearer. He also carried from Shanghai a Catechism and Trimetrical Classic, which he rendered into Pekingese Colloquial, and which has been widely distributed in North China. But Dr. Bloidget, while giving en masse to literary work, possessed strongly the evangelistic spirit. Every morning he had a Bible class for helpers and inquirers, and he gave time to preaching in the street chapel in the afternoons. Once or twice in the year he made a tour into the country, and for fifty miles south of Peking these visits exerted great influence for good. His life and labors were a permanent contribution to the cause of missions.

BLOEMFONTEIN: Capital of the Orange River Colony, S. Africa. Population (1890), 3,459. Mission station of the Berlin Evangelical Mission Society (1875), with 2 missionaries, 19 native workers, men and women, and 370 communicants. Also station of the SPG (1850), with 1 missionary woman. Also station of the South African Wesleyan Methodist Missionary Society, with 71 native workers, 1 Sunday school, 1 village school, 1 Young People's Society and 1,550 professing Christians.

BLORA: A town E. of Samarang, Java, Dutch E. Indies; station of the Neu Kirchen Missionary Society (1891), with 1 missionary and wife, 7 native workers, 1 chapel and 2 village school.

BLUEFIELDS: A town of 2,000 inhabitants on the Mosquito coast, Nicaragua, Central America.
Station of the Moravian Missions (1848), with 3 missionaries and their wives, 14 native workers, 2 chapels, 2 Sunday schools and 300 communicants.

BLYTHWOOD: A town in the Transkei district of Cape Colony, S. Africa; station of the UFS, with 5 missionaries, 2 of them with their wives, 4 missionary women, 5 native workers, men and women, 4 village schools and 1 theological seminary. Also written Blythswood.

BOARDMAN, George Dana: Born at Livermore, Me., February 8, 1801. In April, 1823, he offered his services to the Board of Missions, and was accepted. In June of that year he entered Andover Theological Seminary, where he remained two years, sailing for Calcutta July 16, 1825. Because of the Burmese war he remained in the vicinity of Calcutta, occupied with study of Burmese and Li, 1827, when he removed to Maulmain, which became the seat also of the mission in Burma. Sir Archibald Campbell offered Mr. Boardman a fine, large spot of ground for a mission establishment. On this he built a bamboo house costing about $100. The mission in the neighborhood of the house a hundred ruffians, 1740, in Mr. Boardman's absence. So much encouraged was he by his readiness to listen to the truth he taught. Mr. Boardman resolved to visit the Karens in the jungle, and on February 28, 1828, he set out on his first tour, accompanied by Ko-Thah-Byu and another Karen, a professed believer in Christ. So much encouraged was he by the readiness of the people to receive him and give attention to his instructions, that he determined to pursue a course of itinerant preaching among their villages. In these tours he was generally accompanied by Ko-Thah-Byu or some other convert, and some boys from the schools. He usually visited three or four villages a week, preaching in zayats or from house to house, and talking with those he met by the way. Some of his journeys were long and dangerous, and often on foot. He also made tours in the mission boat on the river. These labors were continued for three years in great physical debility, to which he was reduced by pulmonary disease. The unwilling to slacken his labors on account of his own health, he was obliged by Mrs. Boardman's very critical illness to leave his station and to return to Maulmain. Soon after return to Tavoy, Mr. F. Mason joined him as an associate, and on the 31st of January, 1831, they set out together on a visit to the Karens. They reached their destination on the third day, where they found a bamboo chapel erected on a beautiful spot. More than a hundred persons assembled, more than half of the inhabitants for baptism. Having lost strength, Mrs. Boardman advised her husband to return to Tavoy, but he replied, "The cause of God is of more importance than my health, and if I return now our whole object will be defeated. I want to see the work of the Lord go on." When, however, it was evident he could not live long, and it was thought best to return, he told them that the candidates were baptized that evening, to return the day following. So just before sunset he was carried out in his bed to the water-side, and in his presence Mr. Mason baptized thirty-four persons. While being conveyed to the boat from the shore, he was thrown into the sea, but the boat which had sheltered them for the night, he died, February 11, 1831. He was buried on the mission premises, the funeral being attended by all the European gentlemen and officers of the station, with many natives. But thirty years of age and but three years in the service, he had accomplished a great work. Within the last two months of his life 57 had been baptized, all Karens, and at the time of his death the mission church at Tavoy had 70 members.

KING (A.), George Dana Boardman, Boston, 1875.

BOBBILI: A town of 15,000 inhabitants N. of Visianagram, Madras, India; station of the BMP (1865), with 1 missionary, 6 native workers, 3 chapels, 16 village schools and 50 church members.

BOCAS DEL TORO: A town on the N. coast of the isthmus of Panama, belonging to Panama, and situated at one of the entrances to the lagoon of Chiriqui. Population, 3,000.

Mission station of the UMFC (1865), with 1 missionary, 6 native workers, 3 chapels, 3 Sunday schools, 3 village schools, and 300 professing Christians. Also station of the Jamaican Baptist Missionary Society (1894), with 1 missionary and his wife, 1 village school and 161 church members.

BOCHABELO: A village in the Middelburg district of the Transvaal Colony, S. Africa, lying east of Pretoria; station of the Berlin Missionary Society (1865), with 5 missionaries, 26 native workers, and 1,800 baptized Christians. Also written Botschabelo.

BODINAYAKANUR: A village in the western part of the Madura district, Madras, India; station of the Leipzig Missionary Society (1892), with 13 native workers, 4 village schools, 1 high school, and 300 communicants.

BOELOEH HAWAR: A village S. of Medan, Sumatra, Dutch East Indies; station of the Netherlands Missionary Society (1890), with 3 missionaries and their wives, 6 native workers, 4 village schools and 15 communicants.

BOENISCH, Frederick: A missionary of the Moravians to Greenland (1734). A man of great courage and zeal, his arrival at a time of great discouragement was most opportune. After five years of privation and labor one Greenlander named Kiiarnak received the Gospel, and took up his residence among the missionaries, but was driven away for a time by a band of ruffians, afterward proving his steadfastness by returning. In 1740 Mr. Boenisch married one of them. Their children and children's children have served as missionaries during 160 years, a sixth generation of the family having now entered upon missionary service. It was during Mr. Boenisch's term of service that the brethren ceased to preach the attributes of God, the fall of man, and the
demands of the Law, and instead began to preach Jesus Christ. This change was what awakened the consciences of the benighted people, leading them to become true followers of Jesus.

BOGADJIM: A settlement in German New Guinea; station of the Rhenish Missionary Society, with a missionary physician and his wife.

BOGOS LANGUAGE: Belongs to the Hamitic family of languages and is spoken by the Bilin tribe in the North of Abyssinia. It is written with the Amharic letters.

BOGOTA: Capital of the republic of Colombia, on a picturesque and fertile plateau 9,000 feet above the sea. Climate, temperate. Population (1891), 100,000. Mission station of the PN (1856), with 3 missionaries and their wives, 1 missionary woman, 1 native woman worker, 1 village school, 1 high school, and 90 church members.

BOGUTU LANGUAGE: Belongs to the Mela-nesian family of languages and is spoken in some of the Solomon Islands. It is written with Roman letters, and is also called the Isabel Island language.

BOKHARA: A Russian vassal state in Central Asia, lying between north latitude 41° and 37°, and between east longitude 62° and 72°, bounded on the north by the Russian province of Turkestan, on the east by the Pamir, on the south by Afghanistan, and on the west by the Kara Kum Desert. The modern state was founded by the Usbegs in the 15th century, after the power of the Golden Horde had been destroyed by Tamerlane. The dynasty of the Manguts, to which the present ruler belongs, dates back to the beginning of the last century. The Emir of Bokhara, in 1866, proclaimed a holy war against the Russians, who thereupon invaded his dominions and forced him to send a treaty ceding the territory now forming the Russian district of Syr Daria and to permit Russian trade. In 1873 a further treaty was signed, in virtue of which no foreigner was to be admitted without a Russian passport, and the state became practically a Russian dependency.

The Russian Trans-Caspian Railway runs through Bokhara from Chargi on the Oxus to a station within a few miles of the capital, and thence to Stambul and India.

The area of the country is about 92,000 square miles and the population is about 1,250,000, belonging mainly to various Turkish tribes. The religion is Mohammedanism, and missions are strictly forbidden, excepting those of the Russian (Greek Orthodox) Church.

BOHEMIA: A country of Central Europe, formerly an independent kingdom, now a part of the Austro-Hungarian Empire. It has a population of nearly 6,000,000, of whom about two-thirds are Bohemians (Czechs), the remainder being chiefly Germans. The capital and chief city is Prague. The language of the majority is Czech, one of the principal dialects of the western branch of the Slavic languages. Its alphabet is the Latin, and it bears a closer resemblance to the Polish than to any other Slavic language. Agitation for the official recognition of this autonomy by the country, has been long-continued and disturbing. The religion is Roman Catholic, but the number of Protestants is increasing.

Mission work is carried on by the ABCFM among the Roman Catholics, and by the UFCS among the Jews.

BOHEMIANS: The Bohemians, or, as they call themselves, Czechs (Tchekhs), form one of the principal tribes of the Slavic race. They occupy the country of Bohemia in Austria, and number about four millions. They are all Catholics, with the exception of 150,000, who belong to the Protestant Reformed and Lutheran Confession. The first germs of Christianity were planted among them by Cyril and Methodius, missionaries to the Slavs in the 9th century, and the Bohemian Prince Henry was baptised a Methodist in 873-74. But Orthodox or Greek Christianity was unable to maintain itself long in Bohemia, and was soon supplanted by Catholicism. With the introduction of Catholic Christianity, Bohemia came under the influence of German civilization and feudalism, and gradually the German element grew stronger and stronger. Beginning with the year 1253 this German influence spread rapidly, so that the Bohemians were in danger of being entirely Germanized. The reign of Charles IV., Emperor of the Holy Roman Empire, is considered one of the brightest periods of Bohemian history. He founded the University of Prague in 1348, and thus helped to make the capital of Bohemia the center of a great intellectual and educational movement, and most important periods of Bohems, however, is undoubtedly the time of John Huss and the reformatory movement which he began. Born in 1385 in an obscure village of Bohemia, and educated at the University of Prague, Huss raised his voice against the corruption and depravity of the Roman Church, and to this effect he was burned at the stake in 1415; but his death was the signal for the beginning of the terrible Hussite wars, which lasted for eighteen years, and the effects of which were felt through the succeeding generations, until 1620, when Bohemia lost her political independence and fell under the dominion of the Hapsburg dynasty of Austria. The Hussite movement in Bohemia cannot be satisfactorily explained by merely regarding it as a religious movement. To understand its full bearing, one ought to bear in mind that it was also a national movement directed against the encroachment of Germanism that threatened Bohemia. The religious element of Hussism did not give all the fruit that might have been expected from it. After the death of Huss his supporters split into two parties, the Taborites and the Utraquists, or Extremes. The former, which may be considered as the extreme party, carried the principle of the free interpretation of the Scriptures to extremes. The Utraquists, forming the so-called moderate party, were not disinclined to come to terms with the Catholic Church. To Hussism in 1414 a movement was formed for the Society of the Bohemian Brothers, known subsequently by the name of Moravian Brothers, distinguished for its piety, its good works, and the writers it contributed to Bohemian literature.

BOHTAN: A district of Eastern Turkey, S. W.
of Lake Van. It is inhabited chiefly by Kurde, Armenians, and Nestorians, and is a wild region, both in its physical aspects and the character of the people. Mission work is carried on chiefly by the ABCFM, the sometimes preachers from the Nestorian mission of the Presbyterian Church (North) come among the Syriac-speaking Nestorians.

BOLENGE: A settlement in the Congo Free State, Africa; station of the FCMS (1893), with 2 missionaries and their wives, one of them a physician, 1 Sunday school, 1 village school, 1 dispensary.

BOLIVAR, Ciudad: Capital of the State of Bolivar, in Venezuela, situated on the Orinoco. Population (1891), 11,686. Station of the South America Evangelical Mission, with 1 missionary. Also station of the Venezuela Mission, with 1 missionary and his wife.

BOLIVIA, Republic of: One of the South American republics, lying just north of Chile and the Argentine Republic. Its constitution was adopted August 25, 1836. By the treaty of peace with Chile, in 1890, all the coast territory was lost, and the entire island, with its total area of 567,431 square miles. Including 1,000,000 Indians, the population numbers 2,300,000, of whom 500,000 are Mestizos, or half-breeds, and 500,000 whites. La Paz, the capital, has about 65,000 inhabitants. Education is at a low ebb. The nominal religion is Roman Catholic, but the mass of the Indians are pagans. It is the least developed of the South American republics.

The Baptist Convention of Ontario and Quebec has established mission stations at Ororo and La Paz (1899), and the Plymouth Brethren have a station at Sucre.

BOLLOHPUR: A village in the Nadiya district, Bengal, India; station of the CMS (1849), with 2 missionaries, one with his wife, 21 native workers, men and women, 1 chapel, 3 village schools and 130 communicants.

BOLOBO: A city in the Congo Free State, situated on the Congo River about 125 miles above Stanley Pool. Climate, tropical; population, 20,000; race, Bantu; language, Kibangi. Moral condition, low, owing to belief in witchcraft and to the practise of human sacrifice. There are 40 shops, 5 of them with their wives, 1 missionary woman, 10 native workers, 1 Sunday school, 1 village school, 1 dispensary, 1 printing house, 31 church members.

BOLONDRON: A town of 2,500 inhabitants in the province of Matanzas, Cuba; station of the American Church Missionary Society (1899), with 1 missionary and his wife, 3 native workers, 1 chapel, 1 Sunday school, 1 village school.

BOLPUR: A town S. E. of Suri, Bengal, India; station of the ME, with 1 missionary and his wife, 6 native workers, men and women, 6 Sunday schools, 9 village schools, 1 orphanage, and 30 professing Christians.

BOMA: Capital of the Congo Free State, Africa, situated on the right bank of the Congo River, about 70 miles from its mouth. Formerly it was the advance post of the Dutch and Portuguese traders in the Congo region; station of the CA, of which no statistics are obtainable.

BOMBAY: The capital of the presidency of the same name, and the chief seaport in India. It is situated on the Indian Ocean, at the southern end of the island of Salsette, which stretches along the shore of the continent for a distance of twenty miles. At its southern extremity there was formerly a group of quite small islands, separated from each other and from the larger island by narrow channels. Upon these Bombay has been gradually built up, and now, by filling in the channels between the separate islands, these have all been consolidated with one another and with the larger island of Salsete itself. The harbor, which is the safest and most spacious in all India, and one of the finest in the world, lies between the city and the mainland. In 1661, the Portuguese, whose dominion was then undisputed all along the western coast of India, ceded the island of Bombay to England as a part of the dowry of the Portuguese princess, Catherine, when she became queen. The population was then supposed to be 10,000. Soon after, Charles II. gave it over to the East India Company for an annual rental of £10. In 1673 its population was reported as 60,000—"a mixture of most of the neighboring countries, mostly rogues and vagabonds." The mixture of races thus presented by its population has continued to be a feature of its life ever since. In 1773 Bombay became subject to the Governor-General of India, whose capital was at Calcutta, where it has continued to be ever since, tho the local presidency government was still retained. The growth of the city has been rapid and continuous. Its magnificent harbor has attracted the commerce of the world, and merchants and traders from all the parts of the East haveflocked to its bazaars. A series of wise and farseeing statesmen have guided its destinies, under whose direction the city has been adorned with buildings and buildings sanctuaries, and since 1850 by rail, with all parts of the Indian Empire, furnished with docks, and raised to a position of undisputed preeminence as the chief port of entry and commercial center for all India. Steamers daily bring the city into close connection with Liverpool for London, and the Mediterranean ports. The mails between India and Europe arrive at and depart from Bombay. Steamers sail hence to all parts of the East, and sailing ships seek its harbor from all over the world. It presents more of the appearance of a large European city than of any other city in the other city of the East. Here the proverbial conservatism and leisurely slowness of Orientals seem to have given place to the quicker and more energetic movements of Western nations.

In population Bombay ranks first of all Indian cities, and among those belonging to the British Empire is exceeded only by London itself. The census of 1901 gave a population of 776,006 souls—Buddhists and Jains, 17,387; Hindus (of all castes and races), 502,851; Mohammedans, 158,713; Parsees, 48,597; Jews, 3,321; Christians, 42,927. The European population by itself, which is mostly British, numbered nearly 10,500. This classification by religion is comparatively simple, but that by race and language is vastly more complex. It is said that Bombay probably contains among its population representatives from a larger number of nationalities than any other city. It is easy to believe this to be true. Nearly every Asiatic race has contributed its quota to the census; the diversity of race and language among the inhabitants of India alone is very great, and among the dwellers in Bombay
are individuals from all parts of India, speaking all of the principal tongues which are used anywhere within the limits of the Bombay Presidency, and many others of very different tongues, a single one of which is printed there. In the matter of intellectual activity it is easily outranked by Calcutta; nor is it, like Benares, the chief point of a vast religious development. Its life is commercial, and the intensity of its business energy somewhat detracts from the vigor which otherwise its people might give to the intellectual or religious matters.

Bombay has been the scene of Christian missions ever since 1813, in which year Messrs. Gordon Hall and Samuel Nott (joined soon afterward by Samuel Newell) began the first permanent mission in that city, and also the first mission of the ABCFM Parsee Church Missionary Society began work in 1820, the Scottish Missionary Society in 1823; but in 1835 the work of this organization was transferred to the Established Church of Scotland. In 1843, after the disruption, the missionaries of the Society establishment threw in their lot with the Free Church, leaving the mission property in the hands of the old Church. From that time there have been two Scottish missions in the city. The Society for the Propagation of the Gospel began in 1856, and the American Missionaries in 1871, the latter chiefly among Europeans and Eurasians (persons of mixed European and Indian parentage), of whom there are many in Bombay. The Bombay auxiliary to the British and Foreign Bible Society was founded in 1815, and the Bombay Tract and Book Society in 1827. Both of these societies have rendered inestimable aid to the cause of evangelism. The two Scottish missions from the first devoted their strength to educational efforts. Each of these missions has long sustained a collegiate institution; hundreds of Hindu, Mohammedan, Parsee, and Christian young men have received within the walls of these colleges a good secular education combined with biblical and religious training. The whole force of these various societies now at work in the city, including the Zenana Bible Mission and the BFBS, is 95 missionaries and 201 native workers, men and women, and the aggregate of native communicants reported by the different missions is 1,579.

BOMBAY PRESIDENCY: One of the chief administrative divisions of British India, of which the capital is the city of Bombay. Its territory lies in the western part of India, and its boundaries are on the northwestern province of the Punjab, on the northwest the province of Khelat; on the north, the Punjab; on the northeast, the native states of Rajputana; on the east, the native states of Central India, the Central Provinces, West Berar, and the dominions of the Nizam of Haiderabad; on the south, the Presidency of Madras and the provinces of Mysore, and on the west the Indian Ocean. It includes 24 districts in India, besides the little district of Aden, in Arabia, having altogether an area of 124,123 square miles, with a population (1901) of 18,509,661; within the territorial limits of the presidency are a number of native states under the general supervision of the Bombay Government. These include an additional area of 65,761 square miles, with a population of (1901) 6,908,645. The surface of the presidency presents three well marked types of physical appearance. In the northern part the ranges of the Sahyadri and Sindh, with the peninsulas of Kathiawar and Cutch, are for the most part flat, and in their northern and western portions merge into sandy and arid deserts. South of the Narbada River,
and for the most part about thirty miles from the sea, stretches the range of mountains known as the Western Ghats. Between them and the sea the narrow strip of land is known as the Konkan, and consists largely of detached ranges of hills, with fertile valleys between, through which flow numerous tidal creeks. East of the moun-
tains is the great plateau of the Deccan, nearly 2,000 feet above the level of the sea at its western edge, where it is buttressed by the Ghats. The prevailing religions are Hinduism and Mohammedanism. Christians and Parsees and a few Jews make up together hardly more than two per cent of the population. It is worthy of note, how-
ever, that while during the decade 1891-1901 the whole population of the presidency decreased by 318,755 souls through famine and plague, the Christian population increased by 50,000—from 170,000 to 220,000.

The languages in use in the province of Bom-
bay are Marathi, which is used by nearly one-half of the population; Hindustani or Urdu, used by the Mohammedans; Gujarathi, Kanarese, and Sindhi, which taken together are the speech of more than one-third of the population.

The missionary societies carrying on opera-
tions within the borders of this presidency are the following, named as far as possible in the order of their entrance into the province: ABCFM (1813); LMS (1820); CMS (1820); CSFM (1825); UPS (1845); Basel Missionary Society (1837); SPG (1825); CI (1842); PN (1870); ME (1872); Poona and Village mission; the Christian and Missionary Alliance; the Rama-
abal Association; the Mission to Lepers; the Kurk and Central India Hill Mission; the Indus-
trial Mission; the Zenana Bible and Medical Mission, the Salvation Army, and some others which do not publish statistics.

**BOMBE:** A settlement about 20 miles N. of the seat of government of the Kamerun Colony, W. Africa; station of the Basel Missionary Society (1897), with 3 missionaries, one with his wife, 24 native workers, 15 outstations, 16 village schools, and (1902) 161 communicants.

**BONABERI:** A settlement near the mouth of the Kamerun River in the German Colony of Kamerun, W. Africa; station of the Basel Mis-
sionary Society (1859), with 5 missionaries, two of them having wives, 24 native workers, 23 village schools, and (1902) 540 communicants.

**BONACA ISLAND:** The easternmost of the Bay Islands, lying off the coast of Honduras, Central America; station of the SDA (1886), with 3 mis-
sionaries and their wives, 3 missionary women, 2 native workers, 10 outstations, 4 chapels, 10 Sunday schools, 3 village schools, and 126 church members.

**BONAKU:** A settlement on the Kamerun River in the German colony of Kamerun; station of the German Baptist Missionary Society (1891), with 2 missionaries, one with his wife, 1 missionary woman, 5 chapels, 1 village school, 1 industri-
trial school, 1 dispensary and a YMCA. Station also of the Basel Missionary Society, with (1902) 21 outstations, 23 common schools, and 783 com-
municants.

**BOND, Rev. Elias:** Born, Hollowell, Maine; graduated at Bowdoin College, 1837; Bangor Seminary, 1840; arrived at Honolulu, May 21, 1841, and labored unremittingly at Mohalu, Hawaii, until his death July 24, 1896. He labored under the Hawa-
ian Evangelical Associa-
tion. Mr. Bond was distinguished for his suc-
cessful establishment in Kohala of training schools for Hawaiian boys and girls, and for the personal interest he manifested in the educational, social, commercial, as well as moral and spiritual, life of this people. By a fortunate real estate investment, he was enabled to make munificent donations to missionary boards, and pursue somewhat independently his missionary and edu-
cational work.

**BONDE LANGUAGE:** Belongs to the Bantu family of African languages, and is spoken by an unknown number of people in the Usambara region in the northern part of German East Africa. It is written with Roman letters.

**BONDOWOSO:** A village in the eastern part of Java, Dutch East Indies, lying S. E. of Surabaya; station of the Java Committee, with 1 missionary and his wife and 1 common school.

**BONGAUNDANGA:** A settlement in the Congo Free State, W. Africa, situated on the Lopori River S. W. of Upoto; station of the RBMU (1889), with 1 missionary, 1 missionary woman, 2 native workers, 1 chapel, 1 Sunday school, 1 village school, and I dispen-
sary.

**BONGINDA:** A settlement in the Congo Free State, W. Africa, situated on the Lopori River; station of the RBMU (1889), with 3 missionaries, 1 with his wife, 1 native worker, 1 chapel, 1 Sun-
day school and 1 dispensary.

**BONGU:** A settlement on the E. coast of Ger-
man New Guinea; station of the Rhenish Mis-
sionary Society, with 1 missionary and his wife, and 1 village school.

**BONNY:** A town and seaport at one of the mouths of the Niger, in British Nigeria, Africa; station of the CMS (1865), with 3 native workers. Climate, very unhealthy, due to the surrounding country being so flat and swampy. Population, 12,000. Race and language, Ibo, Ido, Kwa.

**BONTHE:** A town on Sherbro Island, off the coast of Sierra Leone, W. Africa; station of the CMS (1820), with 10 native workers, 3 missionaries, 1 missionar
y woman, 3 outstations, 1 chapel, 1 Sunday school, 4 village schools, and 270 communicants. Also station of the UB (1855), with 3 native workers, 1 chapel, 1 Sunday school, 1 village school and a Young People's Society.

**BOOK AND TRACT SOCIETY OF CHINA. See Christian Literature Society for China.**

**BOONE, William Jones:** Born in South Caro-
olina, July 1, 1805; graduated at the University of South Carolina; studied law under Chancellor de Sausserre; pursued a theological course at the Seminary of the Protestant Episcopal Church at Alexandria, Va., and having studied medicine with reference to the medical profession, devoted himself to the Board of Missions; was appointed and sailed July 8, 1837, reaching Batavis October 22. Here he studied the Chinese lan-
guage, held an English service, distributed tracts, established schools and found his medical know-
ledge of great use. Consecrated missionary bishop to China, 1844. In 1846 Bishop Boone
began the translation of the Prayer-Book, and engaged in the revision of the New Testament. In 1847 he was chosen one of the committees of delegates from the several missions to revise the translation of the Bible. His ability as a scholar
was highly appreciated. He died at Shanghai, July 17, 1864.

Stevens (Bo.), Memorial Sermon on W. J. Boone, Philadelphia, 1865.

BORABA: One of the Society Islands N. W. of Raiatea; station of the Paris Evangelical Missionary Society, with 1 native worker, 1 chapel, 1 Sunday school and 315 professing Christians.

BORDA: A village S. of Hoshangabad, Central Provinces, India; station of the Swedish National Missionary Society (1894), with 1 missionary and his wife, 1 native worker, 1 Sunday school and 17 Christians. Also written Bordhai.

BORNEO: The largest island of the East Indian Archipelago, situated directly on the Equator. Area, 272,920 square miles, divided as follows: 1. Under British rule, North Borneo, 31,106; Brun- nei, 3,000; Sarawak, 35,000; total 69,106 square miles. 2. Under Dutch rule, West Coast, 58,926; South and East districts, 144,788; total, 203,714 square miles. Population: 1. British, 475,000; 2. Dutch, 1,078,289; total, 1,548,289. Of this about one-half—that covering the South and East districts—is mere conjecture. The climate is remarkably healthy for an equatorial island. The surface of a large part of the island is mountainious and well irrigated by rivers. The inhabitants of North Borneo are chiefly Mohammedan settlers; of Sarawak and the Dutch possessions, Malay, Javanese and Chinese settlers and aboriginal tribes, mostly Dyaks, of the Malay race. The Portuguese gained a temporary foothold in the 16th century, but were superseded by the Dutch, who have held permanent control. British North Borneo is under the jurisdiction of the British North Borneo Company, being held under a grant from the Sultans of Brunei and Sulu.

Dutch Borneo was administered by the Dutch East India Company until its dissolution in 1798, since which time it is governed by a representative of the home government. Mission work is carried on in British Borneo by the SPG in 9 stations, connected with which are 49 workers, both native and foreign, and 15 schools and a Christian magazine. The society support about 5,000, of whom 1,250 are communicants. In Dutch Borneo the Rhenish Missionary Society has 8 stations, with 45 workers of both sexes, 23 schools and about 1,000 communicants.

BORSAD: A town in Gujarat, Bombay, India, N. W. of Baroda; station of the PCI (1860), with 2 missionaries, 3 missionary women, 1 of them a physician, 80 native workers, men and women, 5 outstations, 4 chapels, 44 Sunday schools, 37 village schools, 1 high school, 3 orphanages, 1 dispensary and 191 church members.

BOTTLENOSE: A settlement on the W. coast of the island of Fernando Po, in the Bight of Biafra, West Africa; station of the Primitive Methodist Missionary Society, with 1 missionary, 1 chapel, 1 Sunday school, 1 village school and 10 communicants.

BOWEN, George: Born at Middlebury, Vt., April 30, 1816.

His conversion occurred in the spring of 1844. The May anniversaries of the great missionary societies just at the time, introduced him, as it were, into a new world of Christian enterprise. He at once devoted his life to this missionary work. He studied in the Union Theological Seminary of New York, was ordained by the

Presbytery, July 4, 1847, and sailed soon after for India, under appointment of the ABCFM. In January, 1848, he arrived in Bombay, which was the scene of his labors, interrupted only by occasional short periods of missionary service in other parts of India.

The social gap separating natives from missionaries led him to decline receiving a salary, and he supported himself, living in a simple way among the natives. Living a life of habitual self-denegation, he was singularly free from worldliness, and altho uncompromising in his views of Christian principle, he was welcomed in the houses of high and low. It was by his personal ministry that he became known, at first despised and ridiculed, and then esteemed among the people of India. He became secretary of the Bombay Tract Society and editor of the Bombay Guardian, acquiring wide influence by the eminent ability and spirituality of his writings, selections from which have been published in America and Great Britain in three volumes severally entitled, Selections and Christian Invitations, Love Revealed, and the Aims of Christ.

After a brief illness, early on Sabbath morning, February 5, 1888, apparently while peacefully sleeping, he was not, for God took him. His death produced a deep sensation in Bombay and Western India. Those most completely to form a judgment concur in the estimate that he exhibited a degree of self-sacrificing devotion to which there is perhaps no existing parallel in the whole field of missionary labor.

BRADLEY, Dan Beach: Born at Marcellus, N. Y., July 18, 1894; graduated from a medical college in Medford, N. Y., 1833; sailed July 2, 1834, as medical missionary of the ABCFM; arrived at Bangkok, Siam, July 18, 1835; was ordained by the members of the mission in Siam, November 5, 1838. In consequence of more hopeful calls elsewhere it was decided by the Board, in 1846, to withdraw its mission in Siam. Dr. Bradley and Rev. Jesse Caswell, unwilling to give up the work in which they had engaged, sought maintenance elsewhere. Dr. Bradley returned to the United States in 1847, and was released from the service of the Board, and went out in 1852 in connection with the AMA. He was the first educated physician and surgeon who had visited Siam, and his skill in the healing art seemed to the natives little less than miraculous. His mastery of Siamese was surprisingly accurate, and his translations of the Scriptures were of high value. His published writings, both in English and Siamese, were voluminous. Those relating to Siam and the Siamese, published in the Bangkok Calendar for successive years, form the mine whence much of the material of more recent books and articles upon Siam has been extracted. He died at Bangkok, June 23, 1893.

BRAHMANBARIA: A town on the borders of Assam, in Bengal, India. Population (1891) 18,006; station of the New Zealand Baptist Missionary Society (1891), with 1 missionary and his wife, 1 missionary woman, 2 native workers, man and woman, 1 chapel, 1 Sunday school, 1 village school and 7 communicants.

BRAHMO SOMAJ: A modern, reforming, Theistic sect in India, originated by Rammohun Roy, a high caste Brahman of character and scholarship, who from his youth declared that idolatry was contrary to the practice of the
ancestors and who proposed to bring his people back to the monotheism of the ancient Vedas. He became so far interested in Christianity that he made a visit to the Mission of the English College at Calcutta. The Brahmo Somaj (1830-1847) was formed with the object of bringing all religions closer together, and in 1833 the Somaj languished for some years until Debendranath Tagore, who had received a good English education, joined it in 1841, and proved an efficient leader and organizer. In 1844 he and twenty others signed the initiatory covenant he had prepared, pledging themselves to abstain from idolatry; to worship no created thing, but only the one God; to lead holy lives and to seek forgiveness through abandonment of sin. This organization, which came to be called the Adi (First) Brahmo Somaj, had by 1847 enrolled 367 covenant members, and by 1850 the establishment of branches in other provinces had begun.

With the increase in numbers, marked differences of opinion were developed, especially in regard to the authority of the Vedas. This arose out of the happiness which was secured by the new statement by Debendranath called Brahma Dharma (The Theistic Religion). It stated the Four Fundamental Principles of Indian Theism as:

1. In the beginning before this universe was, the one Supreme Being (Brahma) was; nothing else existed. He created all this universe.

2. He is eternal, intelligent, infinite, blissful, self-dependent, formless, one without a second, all pervading, all governing, omnipotent, omnipresent, perfect, without parallel.

3. By worship of Him alone can happiness be secured in this world and the next.

4. Love toward Him, and performing the works he loves constitute his worship.

Subscription to these principles admitted to membership. It was further declared that intuition and the book of nature are the original basis of the Brahman's creed, but divine truth is to be gratefully received from any portion of the Hindu Scriptures or other good book containing it; God is the Heavenly Father, exercising providence and hearing prayer; repentance is the only way of salvation; good works, charity, knowledge, contemplation and devotion are the only religious rites; penance and pilgrimages are useless; the only sacrifice is that of self; there is no distinction of castes, no transmigration; the mission of the Brahoma Somaj is to purify the old religion, not to destroy it.

The concessions made did not satisfy the more progressive element, who found a new leader in Keshab Chandar Sen (1838-1884). His faith in the Hindu superstition taught him in childhood had been shattered by a thorough English education in an English College, and in 1858 he joined the Brahmo Somaj, but were long outstripped Debendranath in advocacy of radical reform. He urged the abolition of all caste distinctions, including the sacred thread, the distinguishing badge of Brahmans. This Debendranath found for himself, but determined to impose upon others. Under his leadership rites for deceased ancestors and cremation were remodeled, and steps were taken toward the education and elevation of women, who were admitted to membership in the Society. Marriage reform, including the abandonment of polygamy, of child marriage, and of the permanence of widowhood, was advocated, and in a measure practised. He did not have a large number of the younger members who seceded and in 1866 organized a new Theistic Society called The Brahmo Somaj of India, the purpose being to affiliate with all other Somajs, a plan which was never fulfilled. The creed of this Somaj included belief in God, the first cause; the immortality of the soul; the two-fold Scripture, nature and intuition; rejection of the incarnation of God, but belief in divinity dwelling in every man, and displayed more vividly in some, as in Moses, Jesus, Mohammed, and other great teachers; admission that the worship of Brahma is the essence of all religions. It declares the brotherhood of man, prescribes duties toward God, self, others, and the lower animals, proclaims the retribution of evil deeds in this world and the next, and urges the pursuit of holiness by worship, subjugation of the passions, repentance, study, good companionship and contemplation, describing salvation as the deliverance from the root of corruption, and unending growth in purity and happiness. Him who is the fount of infinite holiness and joy. A simple form of service was prepared, consisting of prayer, hymns, reading from Hindu or other Scripture, and a sermon.

For some time the Adi Brahmo Somaj, led by Debendranath and Raj Narain Bose, secretary, and the Brahma Somaj of India, under Keshab Chandar Sen and his cousin, Pratrap Chandar Mozoomdar, as Secretary, with "The Indian Mirror" as its organ, continued in not unfriendly rivalry. But the latter society was much perturbed by Keshab Chandar Sen's increasing mysticism, his assertion of his own special inspiration and authority, and finally by the marriage of his daughter of fourteen to a youthful Maharaja, contrary to the principles of the marriage reform and the Native Marriage Act of 1872, which he had championed. A considerable portion of the Brahma Somaj in 1879 seceded at Calcutta the Sadharana (General) Brahmo Somaj, with Ananda Bose as president. After an effort to lead the Somaj movement Mozoomdar gave up the attempt and went into retirement.

As an organized movement the Brahma Somaj was at its height about 1880, when 149 Somajes were reported throughout India. Latterly it has been much less in evidence. Its result is thus summed up by Gustav Warneck: The movement originated from an apprehension of religious truth, but it degenerated more and more, either to an ordinary rationalistic liberalism, or to a mysticism rich in phrases and ceremonies, and spending its whole energy in words. The influence of the movement has been very limited. It has not in the whole proved a bridge to Christianity, nor has it exerted any noteworthy reformatory influence in heathenism. Nevertheless it is a characteristic symptom of the religious ferment which the Christian mission, along with Western education, has begun to stir among the Hindus. Williams, J. D., Brahmanism and Hinduism; Hopkins (E. W.), The Religions of India; Bose (Ram Chandra), Brahmoism, New York, 1884 (Pund & Wagnalls).
as well as religious people. He himself was inclined from early childhood to take an interest in religious matters, but he considered that he did not really commit the guidance of his life to Jesus Christ until he was 20 years old. This once decided he was wholly and permanently committed to life for his Master. He felt the duty of teaching Christianity to the Indians, and went to Long Island for that purpose. But later (1742) he was appointed, on behalf of the Scottish Society for the Promotion of Christian Knowledge, to work among the Indians of his native Stockbridge, N. Y. As Brainerd wrote, he "had none to converse with but rude and ignorant Indians," except when he found himself obliged to plead the cause of the Indians against the avarice of conscienceless whites who wished to brutalize and rob them. But he found a reward in seeing remarkable instances of change in lives produced by the power of the Holy Spirit among his Indian friends. He was more than content with his life, and worked on in increasing feebleness—often prostrated by sickness, but giving up only when his life was left to him. Then he painfully made his way back to New England to die. The end came October 9, 1747, at Northampton, Mass., when Brainerd was 29 years old.

This young missionary was not remarkable for the title Miraculous. His great and widespread results in the field which he had chosen. But his journals are full of life and power to this day. They are a true record of a simple life—a "human document" which shows mistakes, shortcomings and bitter regrets as faithfully as blessings for a high life, learning from God, and a долгую, desire to glorify God by winning the souls of the savages to a godly life. So the man's character impres the reader; his lofty principles and aims, his saintliness, his loyalty to Jesus Christ; and does not fail to arouse desires to follow his example. It is through this quality of his journals that Brainerd's greatest achievement is the lasting impression made by his character upon the Church in America and Europe. It was Brainerd's character which made Jonathan Edwards a missionary to the Indians of Stockbridge; it was to Brainerd's memoirs to which Henry Martyn traced his decision to become a missionary; to those simple records of a godly life, too, William Carey was indebted for much of that inspiration which shaped his decision to be a missionary tho he had to go alone. Brainerd was a true, noble man and a Christian hero of that small class of heroes whose lives seem to shape history.

David Brainerd, Wesley (J.), Bristol, 1768; Edwards (J.), revised by Dwight (S.), New Haven, 1822, and New York, 1846; Smith (J.), New York, 1847.

BRASS: A district in the Niger delta on the coast of W. Africa. The region is flat and touring can be done in the dry season only, the missionaries wearing long water boots and trampling through the thick black mud of the mangrove swamps. The people are fetish worshipers, paying chief worship to the great serpents which abound. The CMS has carried on two stations since 1868, called Brass Tuwon and Brass Nimbi. The missionaries are men and women of the native type. They build schools with an industrial department, a dispensary, and about 600 avowed Christians in the district, of whom 51 are communicants.

BRASS NIMBI. See Nimbi.

BRAYTON, Rev. Durlin L., D.D.: In the year 1837 Mr. Brayton went to Burma under the ABMU, and he labored in the Pwo Karen Mission until the year 1900, visiting America but twice during this long period of service. As the oldest missionary in Burma, and the leading missionary among the Pwo Kares for many years, and as the translator of the Bible into the Pwo Karen dialect, he was widely known and greatly honored on the mission field. During his service a missionary, he labored in the province of little importance to the most populous province in India; and he lived to see the dominion of Great Britain increase from detached possessions to the control of the entire territory of the Hindus, and he heard the Queen of Great Britain and Ireland proclaim the "Empress of India." Twice the degree of Doctor of Divinity was conferred upon him. Shortly before his death the Pwo Karen Association was held in Rangoon, in the compound of which he lived; and to his fellow workers this Father in Israel spoke this touching valedictory: "It has been my highest pleasure to seek first His Kingdom and do His Will. By His grace I have been enabled to fight the good fight and keep the faith. But when it shall please the loving Father He will call me to Himself to be with Christ forever. I know there is a crown of glory laid up for me that fadeth not away." He died at Rangoon April 23, 1900.

BRAZIL: The United States of Brazil lie between the 4th degree of north and the 33d of south latitude, and the 35th and 72d west longitude, including about two-fifths of the whole South American Continent. This youngest born of the American republics measures from north to south 2,000 miles, and from east to west 2,500 miles, thus covering an area of about 3,200,000 square miles, but little less than the whole continent of Europe. It borders upon all the South American countries except Chile and from the vast extent of its territory and the immense value of its undeveloped natural resources is bound to play an important part in the history of the New World. The surface of the republic may be roughly divided into three great basins—one at the north, formed by the Amazon and its tributaries; another at the south, formed by the streams which united produce the Parana, one of the principal branches of the Rio de la Plata, and, lying between the two, the section drained by the Sao Francisco, the third river in size in South America.

Climate: In so vast a territory, with such great differences of altitude, there are, of course, many varieties of climate. On the whole, however, with the exception of some of the towns along the seacoast and the valley of the "Amazon, the
country in general is salubrious; even in the seacoast towns the mortality is not above, rather below, that of the larger cities of Europe. In the greater part of the country the considerable rains of the rainy season, which lasts for three or four months, when, although the days of continuous rain are few, the afternoon showers fall with great regularity, lasting from ten minutes to an hour or two; and, thus, lowering the temperature and refreshing the atmosphere.

The most prevalent diseases are pulmonary consumption, intermittent fevers, and rheumatism. Leprosy and goiter are common. Epidemics of yellow fever occur at intervals in some of the seacoast towns. The population, according to the last official census (1890), was 14,333,915, of whom 6,302,198 were whites, 4,638,495 of mixed blood, 2,097,426 negroes, and 1,295,796 Indians. The Indian element predominates in the northern states. A census was taken in 1900, but was rejected as tainted with error.

History: Brazil was discovered about the year 1500, and was soon after taken possession of by the Portuguese and continued to be a colony of Portugal till 1822, when its independence was proclaimed by the son of the King of Portugal, Pedro I., who was acting as prince-regent. He assumed the title of Pedro I., Emperor of Brazil, and in 1824 the country a constitution which in its main features was considered liberal. In 1821 he abdicated in favor of his son, the late Dom Pedro II., who was at that time only five years old. The government was by regents from that date till 1840, when the emperor's majority was proclaimed, although he was but fourteen years of age. Dom Pedro II., after having occupied the throne for a half century, less one year, was deposed in November of 1889, when the republic was proclaimed. As a natural result of its history the language of the country is Portuguese. It is a beautiful language, compact, expressive, and well adapted for oratory and literature. The literature is principally rich in fiction and poetry, the few scientific works being mostly translations from the French. As French is considered a necessary part of a liberal education, all the professional men read it, and generally more than half the books on their shelves are in that language, while French novels of all sorts form the staple literary diet of the ladies of the wealthier classes.

The established religion of the empire was Roman Catholic. Under the republic, equality between all forms of religion has been declared, but the government continues to provide for the maintenance of existing functionaries of the Roman Catholic Church.

Qualities of the People: The Brazilian people are, in general, hospitable, generous, charitable, gay, courteous, communicative, quick at learning, rather of the laboring class, but sound, conspicuous, and proud, rather inclined to look down upon labor and laborers, but with a remarkable suavity and a native politeness which is, in general, the lowest in the highest classes. They are not as excitable as the Spanish, there is still a strong exhibit of their own character, and a tendency to vindictiveness which gives rise to many homicides in the course of a year, the crimes against property are much fewer than in most European countries.

The race as it exists to-day is the result of a combination of widely diverse ethnical elements, molded in a great degree by ecclesiastical influences. The typical Brazilian is small of stature, with elegantly diminutive features, and slight, with light, golden-colored hair, with a yellow and bilious complexion, and a generally anemic and wornout look—evidently wanting in the strength and energy to cope with the difficulties to be encountered in developing a new country.

The bloodless revolution in Brazil, by which a country nearly as large as the whole of Europe passed from a monarchical to a republican form of government, with no interruption of the function of government, no injury to its commerce, no interference with the regular march of business, no loss of fighting, emphasized certain peculiarities of Brazilian character which merit attention on the part of those who expect to engage in missionary labor among them.

One element of Brazilian character which unquestionably had a great deal to do with the quiet advent of the republic, was the prevalent intellectual sluggishness, which indisposes the people in general to take the trouble to think out and decide any matter for themselves. In the great majority of cases the readiness with which they accept the decisions of the government, or the government itself, proves them to be without desire to use the want of fidelity to political convictions, as to the total absence of convictions on the subject.

The lower classes have been accustomed for so many centuries to leaving their consciences in the hands of the priests, and yielding them an unreasoning obedience, that the habit of blindly following their leaders has become a second nature to them; so when the republic came they did what was most natural, accepted it, because those whom they had been accustomed to follow accepted it.

Even among the educated classes there is an intellectual apathy which shows itself in all departments of intellectual activity—science, philosophy, politics, and religion—and this is nothing more than the natural result of the policy pursued by the Church of Rome to repress speculation and original thought, and to allow its votaries free exercise of their intellectual powers only along two lines of activity—money-making and amusement.

In view of these intellectual conditions of the rising generations in Brazil, the great importance of educational work there becomes evident. While confessedly an indirect evangelizing agency, it is, perhaps, one of the most important in the present crisis. There is almost no positive opposition to the Gospel; it is simply ignored by many who admit that it is a very good thing, but who are unwilling to make the intellectual effort necessary to investigate its claims, and to think the matter out for themselves.

The change of government, by throwing upon the people the management of their own affairs, will gradually force the people to think for themselves. It is of the first importance, therefore, that measures be taken at once to turn the newly awakened intellectual activity in the right direction, as well as to make accessible to the people the materials for a right judgment in science and religion.

The prominent moral characteristic of the Brazilian people is a very great lack of conscientiousness, an almost complete absence of the feeling that everything must give way to right and duty. The result of this has been referred
to in speaking of their physical characteristics. It has also been prominent in their political history. One of the first measures of republican government was a general decree that all office-holders from their earliest infancy for many successive generations, until the habit of looking backward seems to have become ingrained into the Brazilian nature, leading them to hold on with an almost religious pertinacity to old-fashioned business methods, antiquated modes of transportation and farming (solid-wheeled ox carts and packmules compete with railroads in some parts of the country, and not one farmer in a thousand has ever seen a plow), and the most unhygienic ways of living and eating. The unparalleled progress of the United States is, doubtless, largely owing to the fact that every man seeks to improve upon the methods of his father, and eagerly experiments with any proposed change which promises to be an improvement. The average Brazilian, however, regards any innovation with suspicion, simply because it is an innovation, and is very apt to receive suggested improvements with a smile of half-scornful superiority, and to say: “Your implements and methods are very good for you and your country, but the ways of our fathers, who have been working here for generations, are more adapted to the development of agriculture in our country.” This difference of mental attitude is of itself enough largely to account for the difference between the two countries, and for it the Church of Rome is largely, if not wholly, responsible.

It is suggestive that even the roads through the country are only cared for as they have to do with the selling and buying of goods. At the close of an appointed day, all landholders are required to present themselves at their respective parish churches carrying hees, brush hooks, or axes. Then all start together for their homes, cleaning and repairing the roads as they go; dividing as they successively reach the turning leading to their homes, and leaving a wide hedge of bushes from each house to the parish church. These roads were formerly called sacramental roads, as, in order to incite to the prompt and faithful performance of this task, the priests used to refuse to carry the sacrament to the dying except over a well-prepared road of the regulation width. There are no road inspectors and no provision made for the care of crossroads, even the leading to a railroad station. So all over the country there has been a constant effort to make everything in the Church.

The doing things for show and effect is a prominent Brazilian characteristic. “Para Inglezer,” for the English to see, is an expression applied originally to parliamentary measures which it was known at the time would have a good effect upon outsiders, especially upon investors in that land whose ready money has done so much to develop the resources of this country; but it has passed into proverbial phrase to indicate whatever is done for show or effect.

The tendency which this phrase characterizes, and of which the late emperor was thought to have been an illustrious example, is evident in all departments of the social, political, and business life of the Brazilian people. Their style of dressing and building, their business and professional methods, their school system and newspaper articles, public speeches and private entertainments, all reflect the soulless externality which is characteristic of their religious life.

Education: So-called religious instruction occupies the principal place in the public schools, hours being spent in learning by heart the prayers and liturgies of the Church in an unknown tongue, and another considerable part of the time in memorizing the Catechism, which, being learned parrot-like without explanation, is almost equally unintelligible to the pupils. As a result it is not at all unusual to find Brazilian children who have been at the public schools for two or three years, but can barely spell through a sentence, and are ignorant of the simplest rules of arithmetic. In the rural districts one often comes across children who, having learned out of books copied by the teachers, are quite familiar with handwriting, but cannot read print at all.

Following the system of rote teaching, which is the only one admissible in their religious instruction, the sole aim of the teacher, even in the higher schools, seems to be to store the memory; change is never sought or desired. Once to develop the reasoning powers or to encourage original thought or investigation. The child’s head is stuffed with lists of names, numbers and rules, without any attempt to explain principles or verify or apply them in practice. Mathematics are taught most superficially, while the generally received idea of the people is that the relation of the pupil to his teacher is the same as that of a slave to a master. The teacher has the right to dominate his pupil under the idea that the teacher is superior to the pupil. This is the natural tendency of the Brazilian people to be ruled by an absolute monarch, which is in line with the religious doctrine that the ruler on earth is the direct representative of the emperor, in heaven, over all earthly powers. The ruler is therefore divine, to be obeyed in his earthly duties, and not to question the truth or right of his conduct, however cruel and tyrannical he may be. The Child’s head is filled with the idea that the emperor is the center of the world and the soul of all the world’s actions. As a consequence, the laws and customs of the fatherland are always, and the laws of the land are frequently, violated by the people, who are kept in ignorance of their duties as citizens by not being taught to read and write, and therefore unable to read the decrees of the government.
thing that is tolerably well taught is Latin, and
that only because it is an essential part of the
priestly education.
Under such circumstances it is not surprising
that the Roman Catholic Church, which is the cent.
of the population is returned as illiterate. Yet the land has been
under the care of the Church for 250 years, and
when William Penn made his treaty with the
Indians the Archbishop of Brazil already had a
splendid cathedral and all its appurtenances at
Rio de Janeiro.
Early Attempts at Evangelization: It is a very
deply interesting fact that the very first effort
of the Christian Church after the Reformation to
engage in foreign missions was that of the church
at Geneva to send the Gospel to the inhabitants
of Brazil. Coignet, the great French Huguenot,
and other friends of the truth conceived the idea
of establishing a Protestant colony in South
America as a place of refuge for their persecuted
brethren.
In 1555 an expedition, consisting of three small
vessels, under the command of one Villegagnon,
a distinguished French naval officer, sailed from
Havre de Grace to what is now the harbor of
Rio de Janeiro, where they established them-
selves on an island, called to this day Villegagnon,
in honor of the leader, and, as afterward proved to be,
thoroughly destroyer of the expedition. Their joyful reception by the natives, who were
at war with the Portuguese, and other circum-
stances seemed to warrant high hopes of success.
On the return of the vessels to Europe great
interest was awakened for the establishment of the
reformed religion in those remote parts; and
the church at Geneva, under Calvin and his col-
leagues, sent two ministers and fourteen students to
accompany the second expedition. How-
ever, soon after these new colonists reached their
destination, the real and villainous character of
Villegagnon revealed itself in a series of annoy-
ances and persecutions against the faithful
Huguenots, who, having gone thither with the
hope of enjoying full liberty of conscience, found
their condition worse than before. The ruin of the
colony was soon consummated. Many of the
colonists returned to Europe. Of those who
remained, three were put to death by their
infamous persecutor, and others fled to the
Indians and Portuguese. Among the latter was
one named John Bole, who, as Latour noted, even in the
annals of the Jesuits, as a man of considerable
learning, being well versed in both Greek and
Hebrew. Escaping from Villegagnon, John
Boles went to St. Vincente, near the present site
of Santos, the earliest Portuguese settlement in
the interior of the country, when the Jesuits had a
colony of Indians catechized according to their
mode. According to the Jesuit chroniclers them-
seives, the Huguenot minister preached with such
boldness, eloquence and erudition that he was
likely to pervert great numbers of their adepts.
Unable to withstand him and his arguments, they
caused him to be arrested, with several of his
companions. John Bole was taken to Bahia,
about a thousand miles distant, where he lay in
prison eight years. When, in 1567, the Portu-
guese finally succeeded in expelling the French
from Bahia, a corresponding decree of the govern-
ment sent for the Huguenot prisoner to punish him
by a death on the present site of the city of Rio de
Janeiro, in order, it was said, to terrify his
countrymen, if any of them should be lurking in
those parts.

The Dutch attempted to establish themselves
at different points in the northern part of the
country, from Bahia to Maranhão, during more
or less of the second quarter of the 17th
century. Dutch pastors accompanied their ex-
peditions and preached a pure Gospel in their
settlements. But this can hardly be classed as
missionary effort for the permanent dwellers of
the land; and all truce of their labors seems to
have passed away with the language and author-
ity of the bold invaders, except the mention by
Southey, in his History of Brazil, that they had
prepared a catechism in the language of the
Indians and other books of an evangelical char-
acter in Portuguese.
The ABS and the BFBS were the first societies
to attempt in recent times the evangelization of
the Brazilians. Several individuals went to
Brazil as missionaries about the same time, but
their aim was to benefit seamen and others of
their own countrymen. Of such were Messrs.
Spalding and Kidder, of the ME Church, who
labored in Rio de Janeiro between 1836 and 1842.
A missionary of the American and For-
egn Christian Union followed these pioneers with
the same purpose in view. The first evangelistic
mission in Brazil conducted in the Portuguese
language which began that carried on from 1855 to 1876 at his own expense by Dr.
Kelley, formerly of Madeira.
In 1859 the PN commenced its mission in Rio
de Janeiro. There are now in Brazil 28 mission
stations maintained by 13 different societies in
America and Great Britain, and manned by about
60 missionaries of both sexes. The extent of
this missionary effort is less striking when it is
realized to be the only evangelistic effort made
for fourteen million of people. For the spiritual
wants of 140,000 Protestant foreign residents,
twice this number of chaplains and pastors have
been provided.

(J. C. and D. F.), New York, 1896.

BREATH, Edward: Born in New York, Janu-
ary 22, 1822. Highly recommended as a Chris-
tian and "an accurate, neat, ingenious, and every
way competent printer," he was appointed by
the ABCFM, and sailed July 21, 1839, for
Urma, Persia. In 1847 he visited the United
States, was married, and reembarked, 1849. He
cut the matrices and cast for the mission beautiful
fonts of Syriac type with a hand before unprac-
tised in that art, but which made a rare and
complete success. He thus saved thousands
of dollars to the American Board. Through the
press under his charge he issued more than 50,000
volumes, including several editions of the Scrip-
tures in modern Syriac, thus giving to the people
about 16,000,000 pages in a language never
before printed. He died of cholera in 1861 at
Seir, near Urma, Persia.

Gospel among the Heathen. See Morav-
IAN MISSIONS.

BRIDGETOWN: Capital of the island of Bar-
bados, West Indies, on a large open roadstead,
Carlsile Bay. Population (1891), 20,000, among
whom are many white people. Station of the
Moravian Missions (1829), with 1 missionary and his wife, 29 native workers, men and women, 2 chapels, 3 Sunday schools, 5 village schools, and 605 professing Christians. Also station of the SDA (1890), with 4 missionaries and their wives, 9 native workers, 2 chapels, 10 Sunday schools, 1 village school, 1 book depot, and 605 professing Christians. Also station of the Salvation Army.

BRIDGMAN, Elijah Colman: Born at Belcher-town, Mass., April 22, 1801, of Protestant ancestry. Was converted in a revival before he was twelve years of age. He graduated at Amherst College, 1826, and at Andover Theological Seminary, 1829. The ABCFM proposed to him while in the seminary to go to China as its missionary. He preceded, and was ordained October 6, 1829, sailed on the 14th, and reached Canton, February 25, 1830.

In May, 1832, Mr. Bridgman was chosen editor of the Chinese Repository and continued to edit it for nearly twenty years. In 1839 the measures taken by the Chinese to suppress the opium traffic resulted in war with England, which interrupted the operations of the mission at Canton. In 1842 the war terminated, and by the treaty of Nanking five ports were opened, and Hong-kong ceded to the English. Thither Mr. Bridgman returned the same year, and prepared the Chinese Chreotomathy, a volume of 750 pages. In 1844 he was secretary of legation to Mr. Cushing, sent by the United States Government on a special mission to China, and of his services Mr. Cushing spoke in high terms. After the conclusion of this enterprise Mr. Bridgman’s time was divided between the Repository, the revision of the Scriptures, preaching at the hospital, and the instruction of a Bible class. In 1847 he removed to Shanghai to aid in the revision of the Scriptures. Early in 1852, after an absence of twenty-three years, he visited the United States for his health. In 1854 through him a new mission was commenced in Shanghai, of which he was the senior member till his death in 1861.

His great work was that of translation, he distributed tracts and religious books, and prepared for or compiled in strange towns and villages wherever he could gather them. He was interested also in whatever could in any way promote the welfare of China, and was always ready to perform his part for that object. When the plenipotentiaries of the four great treaty powers—England, France, Russia and the United States—were conducting their negotiations which resulted in the Tientsin Treaty of 1858, he was consulted by them, and frequently translated official documents for them. In his thirty-two years in China he was more intimately connected with and known by the foreign community at Shanghai and Canton than any other missionary, and by all was highly esteemed.

BRINDABAN: A town situated on the Jumna River near Muttra, in the United Provinces, India; station of the ME, with 2 missionary women, one of them a physician, 29 native workers, 20 Sunday schools, 6 village schools, 1 high school, a Young People’s Society and 500 professing Christians.

BRITISH AND FOREIGN BIBLE SOCIETY: About the middle of the 18th century, during the revival that spread over England, interest was aroused in the various means for the promotion of religious knowledge, both at home and abroad, and several societies were formed which made the Bible distribution one part of their aim, or their sole object within restricted bounds. Among these were the Society for the Propagation of the Gospel in Wales, established about 1662; the Society for Promoting Christian knowledge, 1698; the Society for the Propagation of the Gospel in Foreign Parts, 1701; the Book Society for Promoting Christian Knowledge among the Poor of London, 1734; the Religious Tract Society (London), 1779; the Bible Society, 1780, restricted to labors among soldiers and seamen, and afterward called the Naval and Military Society; the Dublin Association, 1792, and the French Bible Society (London), 1792, for circulating the Bible among the Catholics of France. The French Revolution cutting off communication between the two countries, the funds were turned to the distribution of the Scriptures among “poor Catholics and others in the United Kingdom of Great Britain and Ireland.” None of these societies contemplated printing the Scriptures, nor indeed contemplated or admitted the cooperation of the different parties and sections of evangelical Christendom.

The Rev. Thomas Charles, of Bala, Wales, aroused by the dearth of Bibles in that section, and the difficulty of securing Bibles, started several from existing organizations, visited London in 1802 and conferred with Rev. Jos. Hughes, William Wilberforce, Charles Grant and others. The result was a conference, on a general plan drawn up by Samuel J. Mills, on March 7, 1804, at the London Tavern. About three hundred persons, representing different denominations, were present. Granville Sharp was elected chairman, and the Rev. Mr. Owen (afterward clerical secretary), deeply stirred by the altogether novel spectacle of different denominations met in union to promote one glorious cause, moved the resolutions embodying the name and general form and constitution of the British and Foreign Bible Society. These were “adopted with unanimous demonstrations of cordiality and joy,” and more than 2500 was immediately subscribed. The committee appointed at this meeting afterward proceeded to adjust the machinery of the Society. Rev. Josiah Pratt, secretary of the CMS, to represent the Church of England, Rev. J. Hughes, the Dissenters, and Rev. Mr. Mills himself (afterward J. Owen), foreign Christian Churches, were chosen secretaries. A prospectus was then prepared and widely distributed. Lord Teignmouth became the first president. Among the first vice-presidents were the bishops of London, Durham and Exeter, and William Wilberforce.

The new society was heartily received. The Presbytery of Glasgow, the Synod of Glasgow and Ayr, and other ecclesiastical bodies directed contributions to be received for it from all the churches and chapels within the bounds. Wales, stimulated by Mr. Charles, of Bala, sent a contribution the first year of about $9,500, mostly from the poorer classes. Germany, Switzerland and other European countries hailed the society with delight. Nuremberg was the seat of its first foreign chapter. It began its career with such general support as was a prophecy of its worldwide usefulness.

Organization. The conduct of the business of the Society is entrusted to a committee of 36 laymen, of whom six are foreigners, resident in London or vicinity, 18 are members of the Church of England, and 15 belong to other denominations.
of Christians. Thirty of these who shall have most frequently attended the meetings, are eligible for re-election. This committee appoints all officers except the treasurer. The president, vice-president, and members of the committee ex officio, as also the secretaries for the time being, no other person deriving any emolument from the Society having that privilege. Subscribers of various amounts are annual or life members or governors, and every clergyman of the Church of England and every presenting minister, who is a member, is entitled to attend and to vote at all meetings of the Committee.

The executive staff of the Society includes two secretaries, four superintendents of the editorial, literary, home and publishing departments, two assistant secretaries, fourteen district secretaries in England and Wales, six secretaries in India and South Africa, and twenty-four foreign agents in different parts of the world.

The first auxiliary was formed in 1809, and in ten years six auxiliaries had been formed in Great Britain. The Society now has over 7,900 auxiliaries, branches and associations, of which over 5,800 are in England and Wales. These meet their own expenditures, including in some cases colportage, etc., and remit the balance of their funds to the headquarters of the Society. The Society also has about 250 trade depots in the London metropolitan district, aside from those in other parts of the United Kingdom.

Development of Work: Immediately upon the organization of the Society steps were taken to obtain large supplies of the Welsh Scriptures, and subsequently the Irish, Gaelic, Manx, and, for the Channel islands, the French. Stereotype printing had just come into use, and the committee decided to countenance it, and ordered stereotype plates in several languages. The first New Testament printed expressly for the Society, brought out in September, 1805, was in English, and was printed from stereotype plates, the first instance of the use of that process in the printing of the Scriptures. Editions in Spanish and French were printed for the 40,000 prisoners of war at that time in the country, and other editions for resident foreigners, notably Germans.

In 1812 the demand for English Scriptures became so great that the two universities (Oxford and Cambridge) added to the number of their press hands, and his Majesty's printers were induced to engage in the work as their patent permitted. It is from these three (the only authorized) sources that the supply of English Scriptures is obtained by the Society.

In connexion with the abolition of slavery throughout the British colonies (August 1, 1833) a special fund of £16,249 5s. 9d. was raised amid great enthusiasm to put a copy of the New Testament into the hands of every freedman who could read or was the head of a family. The treasurer was ultimately accomplished, August 1, 1836, when 100,000 copies were thus disposed of. Other similar special exigencies have been met in the same liberal manner. From its earliest history the Society has had to meet considerable and at times bitter opposition. An element in the Established Church looked on its enterprise with distrust and disfavour; and tried to have it print the Prayer Book as well as the Bible; its willingness to assist continental societies that used the Apocrypha also raised much opposition, and occasioned the withdrawal of the Scotch Association and the subsequent organization of the National Bible Society of Scotland, altho in 1827 such assistance was forbidden. Later an attempt to impose a trinitarian text on the members of the committee led to the formation of the Presbyterian Bible Society, and the controversy over the word “baptize” resulted in the Bible Translation Society of the Baptists.

Of specific interest are the publishing of the first penny Testament in 1834 and of Scriptures for the blind in 1837; the lowering of the price of Bibles in 1839 through the cessation of the monopoly of the King's printer in Scotland, the introduction of colportage into Great Britain in 1844, and the acceptance for circulation of the Revised Version of the Bible in 1901.

Immediately on the formation of the Society correspondence was commenced through a subcommittee with foreign lands, with a view to learn both the needs and the best methods of work in those lands. The first grant made was one of £100 to an auxiliary forming a society in Nuremberg, in May, 1804. One of the earliest foreign correspondents was a Roman Catholic clergyman in Swabia, to whom 1,000 German New Testaments were granted for distribution. The first foreign edition of the Scriptures was the Hebrew-Greek Testament in John's Gospel (2,000 copies) in Mohawk and English.

Various grants were made to encourage the printing of new editions of the Scriptures and for the establishment of auxiliary societies on the Continent. In 1812 a Bible committee was formed in Paris. Auxiliaries were formed in Zurich (1812), St. Gall (1813), Wurtemberg (1813), Frankfort and other places (1812), Presburg in Hungary (1812). Leander Van Ees, a Catholic priest and professor in the University of Marburg, made a translation of the New Testament; £260 was granted him to enable him distribute 3,000 copies. The Berlin Auxiliary was formed in 1805 and soon printed 20,000 copies of the Scriptures in the Bohemian and Polish tongues. In 1807 means were taken to supply the need in Iceland, and in 1829 it was reported that there was not a family without the Scriptures. An auxiliary was founded in Copenhagen in 1814. In Russia an auxiliary for Finland was organized in 1812, with the approval of the Czar, Alexander I., and in 1813 one for Russia at St. Petersburg. Prince Gasztin became its first president, and members of the Russian Greek and the Armenian churches were present at the inauguration of the work. The Czar donated 25,000 roubles, and became an annual subscriber to the amount of 10,000. Auxiliaries were formed, various translations in other languages, and a great impulse given to Bible distribution and study. Nearly one hundred editions in thirty languages were published, and hundreds of thousands of Scriptures distributed. Alexander’s successor, Nicholas, suppressed the Society in 1826, but permitted the formation of a new Society for supplying Protestants with the Bible. In 1830 an association was formed in Stockholm through which Lapland also was reached. In 1814 the Netherlands Bible Society was instituted at Amsterdam. It was found that, while the majority of the adherents of the Reformed Church had Bibles, the Lutherans generally were not provided, and the Catholics had very few copies among them. Societies were rapidly multiplied to supply the need, and generous grants were made to
them. Efforts made by the pope to check the work in Poland and Russia failed. Austria refused to permit the work in her territories, and the Hungarian Bible Society was suppressed; and yet many eminent Roman Catholics heartily assisted the Society in its work.

The Societies, in the modern Asia, regard the purpose of the Society to encourage foreign countries to institute societies of their own, on its principle of circulating the Scriptures without note or comment. This aim was remarkably successful. Holland, Germany, Poland, Russia, Switzerland, France, Hungary, Sweden, Norway, Iceland, were aroused in a remarkable degree to provide the people with the Bible. In the Lutheran and Reformed Churches the various Protestant translations were distributed, while among the Roman Catholics, versions of their own, but without note or comment, were adopted for distribution by the Society. On account of the position taken in regard to the Apocalypse, many of the continental societies withdrew, and latterly the British and Foreign Bible Society has carried forward its work in Europe by means of its own immediate control.

The Society completed one hundred years of arduous service March 6, 1904. That day, falling on Sunday, was observed in all Protestant countries as a day for setting forth in the pulpits the debt which the world owes to the Bible, and for commemorating the services of the Bible societies to mankind.

The growth of the Society's work is indicated by the following figures as to its issues and receipts: Up to March 31, 1808, its issues were 81,157 volumes, of which 63,113 were New Testaments. The next year showed 77,372 with 40,862 New Testaments and 35,910 Bibles. From that time the growth has been constant, until in 1902 the total issues were 5,067,421, including 939,706 Bibles, 1,364,116 New Testaments, 2,763,599 portions. The total issues up to March 31, 1902, were 175,038,965.

The income of the Society has grown from £691 10s. 2d. in its first year to £241,143 2s. 11d. in 1902.

Bible Women: The Society has of late years made a special feature of the employment of Bible women; and by the end of 1903 there was a large force of 23,600 Bibles and 6,140,862 New Testaments and 5,866,610 Bibles, in India, Ceylon and Egypt to read. Editorial Work: An idea of this branch of the Society's work is furnished by the statement that, during the year ending March 31, 1902, the Editorial Committee considered matters bearing on versions of Scripture in 151 languages and dialects, of which 33 belong to Europe, 55 to Asia, 43 to Africa, 61 to America and 14 to Oceania. Negotiations have been conducted with the owners of the Revised Version in English, with a view to issuing it in forms suited to schools and the cottages of the poor. Among items of special interest are a German Bible in Latin characters, a pocket Bible in Persian, a Revised Testament in Tibetan, a new whole Bible in the Ningpo dialect of China, plans for a Union version in Nyasa, etc.

Agencies: Of the 24 foreign agents of the Society seven are located in Europe, at Paris, Berlin, Florence, Madrid, St. Petersburg, Ekaterinburg and Constantinople; four are in Africa, at Alexandria, Algiers, Tangier and Sierra Leone; six are in Asia, at Bushiro, Rangoon, Singapore, Shanghai, Seoul and Yokohama; one is at Manila, one in New Zealand; three are in South America, at Buenos Aires, Rio de Janeiro and Callao; one at Belfast, British Honduras, Jamaica. There are also five secretaries in India, at Madras, Bombay, Calcutta, Allahabad, and Lahore; and one at Cape Town in South Africa.

Agencies in Europe: The work of the Society in Europe is carried on by colportage, through Bible depots, and by grants to existing local organizations. In France there were in 1902, 43 colporteurs; in Belgium 8, Germany 26, Austria-Hungary 45, Italy 36, Spain 22, Portugal 10, Russia 72, Turkey and Greece 28. The last two include some work in Asia. New methods are adopted as needed, instanced by the use of a colportage motor-car and the appointment of women as colporteurs in France; work in the railway shops of Belgium, among the soldiers of Germany, the emigrants from Italy, and the convicts of Sicily. Germany, Austria, and France, has been also taking over the Roman Catholic priesthood, but the evangelical movement among the priests in France, the "away from Rome" impulse in Austria, the independent ambitions of Hungary, and the influx of new ideas into Italy and Spain, all affect the work of the Bible Society and are manifest in increased sales. How much is accomplished is indicated by the following figures of sales by colporteurs, not including those in depots or to other Bible societies: France 55,524, Belgium 7,391, Germany 97,892, Austria-Hungary 72,940, Italy 60,413, Spain 29,934, Portugal 6,062, Russia 217,212, Turkey and Greece 25,095. In some countries, notably Germany and Russia, there are also large sales in the depots; Germany 205,495, and Russia 244,952 copies.

The agent at Constantinople has care of the work of the Society in that city, in Western Asia Minor, chiefly near the coast; in the islands of the Egean, in Bulgaria north of the Balkans, in Albania and in Greece. By arrangement with the American and Scottish Bible societies duplication of labors is avoided and the chief difficulty that has arisen from the opposition of the Greek Church to the circulation of the New Testament in modern Greek.

Egyptian Agency: This includes, besides Egypt and the Sudan, Syria, Palestine, Cyprus, Malta, Arabia and Abyssinia, with the East Central Africa sub-agency at Zanzibar. In Syria, Egypt, and a portion of the Sudan, the American Bible Society also works; elsewhere the British Society occupies the field alone; thus it covers the most important part of the Arabian speaking world. The headquarters are at Alexandria, and during 1901 fourteen colporteurs were employed, who sold 13,640 copies of the Scriptures. Almost an equal number were sold to various missionary organizations, and still more granted to missionaries, etc., so that the entire circulation was 29,980 copies. Among the special features of the work are efforts to reach the sailors who pass through the Suez Canal and the pilgrims at Jerusalem; a cordial letter from King Menelek of Abyssinia; colportage on the Nile steamers and among the non-African population, Indian, African, in the European colonies and in North Africa. The two agencies, one for Algeria, with Tunis and Tripoli, and one for Morocco, are
among the most difficult fields of the Society; illustrating its principle of going into regions that are deemed almost impossible, not withstanding the form of sales. With four colporteurs in Algeria selling 7,218 copies (1902) and three in Morocco selling 5,959 copies, it is easy to understand that the work has many perplexities. The French are scornful, the Mohammedans hostile, and, especially in Morocco, the national spirit is very bitter. The Society works in close relation with the North African Mission, the London Jews' Society and the Geneva Evangelical Society.

West Africa: This agency covers the territory from the Gambia to the Congo. The agent, who resides at Freetown, Sierra Leone, works chiefly through local auxiliaries and the missions of the CMS, the WMS and the Basel Missionary Society.

South Africa, including Cape Colony, Natal, Orange River Colony and the Transvaal, is under the general supervision of the South African Auxiliary (founded in 1840), whose secretary resides at Cape Town. The recent war closed a number of the depots, yet the work has gone on with considerable success, both among the English and the Dutch, as well as the natives, the sales and grants amounting, in 1902, to about 30,000. Madagascar and Mauritius are both provided with auxiliary societies, the sales being about 20,000 in Malagasi and 2,000 in Mauritian.

Persia and Turkish Arabia: The agent at Bushire, on the Persian Gulf, has charge of this section, including all but the part of Persia north of the Caspian, which is occupied by the American Bible Society. The sales by 10 colporteurs were (1901) about 6,000 copies, while the total circulation was 15,548. The agency is in three divisions: 1. the provinces of the Persian Gulf, with Bushire as center; 2. South Central and Eastern Persia, with center at Julfa, near Isphahan, and sub-depots at Sultanabad, Yezd and Shiraz; 3. Turkish Arabia, with center at Baghdad, and including Kermanshah in Western Persia. A considerable portion of the work is among Armenians.

India: The Society's work here has from the first been organized under separate auxiliaries, six in number: Calcutta, Bombay, Madras, Bangalore, North India and Punjab. On the respective committees, the various missionary societies are largely represented and their committees fix prices, grants to auxiliaries and other purchasers. The Society's colporteurs and depots always work in close harmony with these missions. The 138 colporteurs employed in 1901-2 sold 181,743 copies of the Scriptures, while the total circulation was 577,035, the highest figures reached in any year. One feature of the work is the employment of 406 native Bible women.

The three auxiliaries in charge of Bible work in Ceylon, at Colombo, Jaffna and Kandy, report 10 colporteurs, 9,847 copies sold and a total circulation of 61,939 copies.

Burma is under a special agent located at Rangoon, who reports eight colporteurs and total sales of 15,179 copies.

Malaysia is divided into North and South, with headquarters at Manila and Singapore. In the Philippines the work is shared with the American Bible Society, the London Missionary Society, the German Bible Society, the Roman Catholic Church and the Bible Union, and the 10 colporteurs reporting (1901) 35,638 copies sold, of which over 26,000 were in the Philippine dialects and the great majority were portions, those in Spanish and Chinese each amounting to about 3,600 copies. From Singapore the agent superintends work in the Straits Settlements and native states, Sumatra, Java, Borneo, Celebes, Moluccas, and Lesser Dutch East Indies. 28 colporteurs selling 43,305 copies, very nearly the entire circulation. Here Chinese takes the lead among the languages, next coming Malay, Javanese and Tamil.

China: This large agency, covering China proper, Manchuria, Mongolia, Sinkiang and Tibet, is superintended by an agent resident at Shanghai, with 11 sub-agents in the different provinces. There are 15 principal depots and 8 others under the superintendence of missionaries. There were 153 native colporteurs at work during the year, and the sales were 392,036 copies, the total circulation being 431,446 against 604,462 in 1900 and 556,156 in 1899. A significant feature is the large number of complete Bibles called for, the largest in any one year of the agency. The decrease, due to the Boxer troubles, has been chiefly in the colportage, the sales from the depots having materially lessened. This agency also includes the work in Formosa, which has shown steady development, the circulation (1901) being 25,763 copies.

Korea has an agent resident at Seoul, who reports the circulation of 6,000 copies, against 38,086 in 1900, 46,121 in 1899 and 34,813 in 1898. This decrease is explained by the severe drought, which has raised prices, and the fact that in 1900 the native church members supplied themselves with the newly issued Testament.

Japan is worked by a joint committee representing the British, American and Scotch societies.

Bible work in Australia is conducted by 43 auxiliaries with 476 branches, and in New Zealand by 61 auxiliaries and branches, which not only care for their own fields, among the Maoris, sailors, etc., but also supply liberally to the parent society. In Oceania the Society assists the various missionary societies with grants, but has no special organized work.

South America: In this continent are three agencies: the Argentine, including Argentina, Uruguay, Paraguay, Bolivariana, Brazil, and a new one called the Republics of the Andes, including Colombia, Ecuador and Peru, the work of the Society in Chile being limited to assisting the Valparaiso Bible Society. In all, 16 colporteurs have sold 24,758 copies. This is somewhat of a falling off compared with the sales of previous years.

The five Republics of Costa Rica, Nicaragua, Salvador, Guatemala and Honduras are worked by an agent resident at Belize, British Honduras. Seven colporteurs in that region sold 9,135 copies, almost the entire circulation.

The West Indian Agency, including Dutch, French and British Guiana, the West Indian Islands and Bermudas, with its center at Kingston, Jamaica, has the credit of a larger proportion of Bibles sold (27,911 out of a total circulation of 53,900) than any other foreign agency of the Society. Some of the West Indias and Bermudas are supplied direct from London, so that the above does not represent the entire work done.

British North America is thoroughly organized with 12 auxiliaries and over 1,100 branch societies, the auxiliary for Upper Canada, with its headquarters at Toronto, being the largest and most influential of all those in British Colonies. It covers the entire territory from the Great Lakes to the Pacific Coast.

Periodicals: The Bible Society Reporter, London; Bible Society German Church Year Book; History of the Bible Society (from 1804 to 1854), London 2 vols.
BRITISH EAST AFRICA: A large territory bordering on the east coast of Africa and extending into the heart of the continent, comprising the East African Protectorate, the Uganda Protectorate, and the Zanzibar Protectorate. The territory is bounded on the west by the Congo Free State and lies between the Sudan, Abyssinia and Italian Somaliland on the north and German East Africa on the south. The entire area of this part of the British territory in Africa is estimated to exceed 1,000,000 square miles.

The East African Protectorate proper includes the whole of the coast from the Umba to the Juba River, extending inland as far as Uganda and merging to northward into the Egyptian Sudan, with an area of about 350,000 square miles and a population of about 4,000,000. Arabs and Swahilis inhabit the coast territories, while farther inland are found tribes of Bantus, and in the northern part the Masai, Somalis and Gallas. The territory is governed by the Foreign Office through a Commissioner and a Consul General with their subordinates. The capital is Mombasa, a town of 27,000 inhabitants, situated on an island of the same name. A railway runs from Mombasa to Uganda at the Victoria Nyanza.

The missionary societies established in this region are the CMS, the United Methodist Free Churches, the Africa Inland Mission, the Scandinavian Alliance, the Leipzig Missionary Society and the Neukirchen Missionary Society. These societies occupy 17 stations altogether, the most of which are under the CMS.

BRITISH SYRIAN MISSION SCHOOLS and Bible Work (1860): In the year 1860 the Druses rose against the Maronites and Greeks in Damascus and the region of the Lebanon and Anti-Lebanon, and fearful massacres resulted. The condition of the 20,000 widows and orphans who were left aroused the sympathy of Mrs. Bowen Thompson of England, who had spent many years in Syria as the wife of a physician, and was thoroughly acquainted with the country and its people.

She went to Beirut and opened an industrial refuge, where 200 women and children gathered the first week. Schools were established and a training institution opened in Beirut. Within a few years the work spread to other towns and villages in Syria, and schools were attended not only by the children of the Christian denominations, but by Jews, Muslims and Druses. Mrs. Bowen Thompson was soon joined by her sisters, Miss Lloyd, Mrs. Smith and Mr. and Mrs. Mott. With their aid and that of a small staff of native Bible women the work was well organized before Mrs. Thompson's death in 1869.

The schools of the mission extend from Damascus to Tyre. There is a night school of special benefit to Syrian soldiers, day schools for boys, for East African pupils of both sexes, the Muslim girls and for Jewesses. In all, instruction is given in the Bible. Special classes are held for women, both on week days and on Sundays, and are largely attended.

In 1889 the corner-stone of a memorial school building at Beirut, which has been established in the same city. A quarterly paper, Daughters of Syria, is published in England in the interest of the schools.

There are 4 stations and 19 outstations, 21 English missionaries and 128 native workers, 51 day schools, 3,743 pupils and 3 dispensaries. The organ of this Society is a quarterly paper, Daughters of Syria.

BROACH: Capital of the district of Broach, Bombay, India, situated on the Nerbuda, 30 miles from its mouth. Population (1891), 40,168—Hindus, Muslims, Parsees. Language, Gujarathi. Station of the PCI (1887), with 2 missionaries and their wives, 2 mission women, 9 native workers, men and women, 5 Sunday schools, 7 large schools, 1 orphanage and 21 church members.

BROHEAD, Augustus: Born at Milford, Pa., May 13, 1831; graduated at Union College, 1855, and Princeton Theological Seminary, 1858; ordained May 4 same year; sailed for India, November 7, as a missionary of the P.N., reaching Calcutta April 4, 1859. At Mainpurie and Fatehgah he spent nearly twelve years. In 1872 he was transferred to Allahabad. Dr. Brohead took a prominent part in the theological training school of the Synod of India, wrote and published valuable treatises in sacred and church history, edited the mission magazine published for a long time by the Indian Christian Mission, and assisted in preparing a hymn book for the church and Sunday school, for which he wrote and translated several hymns; took an active part in the North Indian Bible and Tract Societies, and the Christian Vernacular Education Society. A succession of severe attacks of ill health compelled him to return home. Died at Bridgeton, N. J., August, 1887.

BROOKE, Graham Wilmot: Born at Aldershot, England, in 1866. He was preparing to enter the military academy at Woolwich when he became interested in the Mohammedans of North Africa and the seeming impossibility of informing them of the Gospel of Jesus Christ. He gradually reached a deliberate conclusion that it was his duty to try to reach the Mohammedans of the Sudan, who were then showing the fiercest fanaticism in connection with the outbreak of Mahdism in the region about Khartum, and to teach them how to walk in the light. He studied medicine at St. Thomas' Hospital and went as an independent missionary to Africa, but failed in every attempt to reach the Sudan. He then returned to England and was appointed the same year, December, 1889, as an honorary lay missionary of the CMS, in order to be, with the Rev. J. A. Robinson, joint leader of the new Sudan and Upper Niger mission. In May, 1890, the expedition went to Africa and by way of the Niger into the Western Sudan. He was principally at Lokoja. There he acquired the Hausa language, and labored with energy in preaching, until he was smitten with fever and died at Lokoja, March 5, 1892, in the 26th year of his age.

Mr. Brooke was a hero in his calm, steadfast devotion to his mission. He felt called to preach in the Sudan, then one of the darkest regions of the earth. "But," as has been said of his determined attempt to obey the call of his Master, "the land was not easy of access. He tried to reach it by way of North Africa and failed. He tried to enter it by way of the Congo. Following the course of the great river, far into the interior, beyond where foot of missionary had yet trod, past large and populous towns unheard of by the civilized world, among nations whose atrocities equaled those of the South Sea cannibals.
bals, through untold risks and dangers, he pushed his way onward. But in vain. The Sudan was still barred to him. Finally he discovered that a door of entrance might be found by way of the Niger, and that he could best avail himself of it by joining the Church Missionary Society.

"How, arrayed in the native dress, which proved so commodious, he and the friends who with him started the Upper Niger Mission went about among the people of Lokolo and the country round, how quickly he obtained a mastery of the language, how he won favor among the Mohammedans as well as heathen, and found ready listeners for the Gospel story—all this has been told in detail in his journals and leaflets, and forms a most deeply interesting and instructive narrative. In spite of the many trials which came upon the mission, he was able to record at the end of 1891 that the Word of God had been fully preached over an area equal to that of Hertfordshire, Middlesex, Kent, Surrey, and Hants, and not merely preached, but understood."

Mr. Brooke, besides preaching, found time to translate several tracts into Hausa. But his life was much like that of David Brainerd, in that the remembrance of its high qualities is the chief legacy which he left to the Church. He was a case where "the highest mental and moral gifts, the prime of life with its vigor and its opportunities, were laid simply and wholly upon the altar of Christ, and this, not as a sacrifice, but as a matter of course."

BROUSA: Capital of the province of the same name, Asiatic Turkey, about 60 miles from Constantinople. Population, about 75,000, Mohammedans, Armenians, Greeks, etc. It is finely located at the base of the Bithynian Olympus. Has some mineral springs and is a health resort from Constantinople. It was the capital of the first Sultans of the Ottoman Empire, and the tombs built in their honor are well worthy of a visit.

Station of the ABCFM (1848), with 1 missionary and his wife, 1 missionary woman, 15 native workers, 12 chapels, 12 Sunday schools, 13 common schools, 2 high schools, 1 orphanage and 250 orphans and members.

BROWN, Nathaniel: Born at New Ipswich, N. H., June 22, 1807; graduated at Williams College, 1827. While in college he composed the beautiful poem, The Missionary's Call, commencing, "My soul is not at rest." After studying theology in Newton Seminary he was ordained at Rutland, and embarked for Burma, December 22, 1829, under appointment by the Baptist Triennial Convention. Having spent two years in Burma, he was appointed by his brethren to commence with Mr. Cutter a new mission in Assam. After a four months' perilous journey through the Hugli, Ganges and Brahmaputra they reached Sadiya, about 45 miles N. E. of the present mission station of Digbagan. Here among savage tribes he began to learn the language without grammar or dictionary. He soon commenced the work of translation, tracts and books were distributed, schools were established and zayats built, where the Gospel was preached by the way-side. In 1839 Sadiya was attacked by the hill tribes, and many of the people and soldiery were massacred. Dr. Brown and his wife fled in a canoe in the darkness of the night with their two infant children, and at daybreak found pro-

tection in the stockade, still in possession of the British troops. Many natives of Sadiya having been killed or dispersed, the mission was removed to Jeyphur, and in 1841 to the densely populated district of Hugli, where the missionaries had great success. Reenforcements arriving, new stations were established and churches organized. But Dr. Brown's great work was the translation of the Scriptures. In 1848 he completed the Assamese version of the New Testament. In 1855, when health greatly impaired by twenty-two years of toil and sufferings, he returned to his native land.

In view of the wonderful openings in Japan and the urgent calls for missionaries, Dr. Brown felt strongly drawn to that empire as a field for his native labors, and in 1872, under appoint-ment from the American Baptist Missionary Union, he set sail for Japan with his second wife, reaching Yokohama, February, 1873. The sixty-five years of age, he entered upon the study of the language with ardor, and in 1879 his transla-
tion of the Assamese language, characteristically Japanese, was completed. He strongly recommended the adoption of the Roman alphabet in place of the Chinese characters in writing the Japanese language, a reform which has since been zealously urged, not only in China, but in many other countries. During his six years' residence in Japan Dr. Brown received 179 to his church at Yokohama, was permitted to welcome other laborers, and to see seven churches established containing between 300 and 400 members.

Dr. Brown was not only a translator of the Scriptures and a preacher, he was also the author and translator of hymns in the languages of Burma, Assam and Japan. His last work was the Japanese hymn-book. When no longer able to use the pen he dictated as he lay on his bed to his native laborers, and the Orumùdöi, an illustrated monthly magazine.

BROWN, Samuel R.: Born at East Windsor, Conn., June 16, 1810; removed to Munson in early childhood; graduated at Williams College, and sailed as a missionary of the ABCFM for China in 1838. His great work was education and translation. He it was who first induced Chinese youth to come to the United States for an education, and hundreds of young men from China—some from the highest families of the empire—found through him homes in towns and cities of the United States. On going to Japan in 1859 (under the RCA), he induced the government to send some of its princes to America for education, and he was active in securing Christian homes for them. His last services were in connection with the translation of the New Testament into Japanese, a labor of many years, in which he was associated with a committee from several denominations. This great work was just completed at the time of his death. He returned home in 1879 and died, June 20, 1880, in Munson, Mass.

BRUMANA: A village on Mount Lebanon,
Syria, a few miles east of Beirut. Station of the Friends' Foreign Mission Association (1875), with 20 native workers, 2 schools, 1 dispensary, 2 hospitals, and 1500 attending. Brides: Station, 1890, 23,000, with 10 missionaries, 5 native workers, 12 village schools, 1 dispensary, 3 hospitals, and 500 attending.

BUCHANAN: A city in Grecian East, China, Colony, S. Africa, situated about ten miles S. W. of Matungula. Mission station of the U.S. Missionary Society, with 1 missionary, 8 native workers, 70 village schools, 1 dispensary, and 1,200 attending.

BUCARAMANGA: A city of 20,000 inhabitants in the district of Santander, Colombia, South America; station of the American Bible Society, with an agent and his wife and a book depot.

BUCHAREST: Capital of the kingdom of Rumania; at the mouth of the Danube, and the site of the capitol of the Roman Empire. Population (1890), 600,000. Mission station of the London Missionary Society for Propagating the Gospel among the Jews (1848), with 10 missionaries, 9 native workers, 10 village schools, 1 school, and 200 church members.

BUDAI: A city of S. W. of Bareilly, in the Rohilkhand district, United Provinces, India. Population, about 35,000. Station of the ME, with 4 missionaries and 38 native workers, men and women. It has 24 village schools, a high school, and 630 church members.

BUDDHISM: In discussing Buddhism it must be borne in mind that many systems known by that name have appeared in different ages and in different lands. No other faith or philosophy has undergone so many and so great changes in the course of its development. The widely different opinions, therefore, which have been expressed as to its teachings, may each have found a degree of support in some particular phase or stage of the manifold system.

Another point to be settled is its relation to Hinduism. Was it a new and distinct system setting out in the first instance as a protest against the teachings of the Brahman, or was it a later development in the mind of Gautama occurring after six years of ascetic life—a discovery or conclusion finally reached as he sat under the Bo tree? Professor Beall is undoubtedly correct in the opinion that Buddhism was an afterthought and not an original aim when Gautama left his palace. He broke with Brahmanism on its religious side; most of its philosophies he retained. He protested against the outrageous assumptions of the Brahmans, their intense sacerdotalism and imposture, their exaggerated doctrine of sacrifice, and their rigorous system of caste. He repudiated the absolute authority of the Vedas and the superstition, or ultra-religiousness, of the whole Brahmanical cult. But he drew to the opposite extreme of atheism, or, at least, a pronounced agnosticism. Yet, at the same time, he cherished a sort of reverence for the high Brahmins or rishis. He tacitly maintained many of the speculations of the Upanishads. He cherished, with unabated ardor, the old Brahmanical theory that the connection of soul with matter is the source of all evil, and that self-mortification, through a series of transmigrations, can alone secure deliverance. Of the nature of the soul he held peculiar views, as will appear further on. These views have been more or less modified in succeeding ages.

A clear distinction must be made at the outset between the credulous history of Gautama and the extravagant legends which sprang up in various lands long after his death. It has virtually been settled by the consensus of the best scholars that these accounts are nothing more than the wildest, which were authorized by the earliest councils, which have the concurrent testimony of both the Northern and the Southern literatures, and which are credible in themselves shall be accepted as the probable history of Gautama.

Briefly, the accounts thus recognized are these: Gautama, otherwise known in his youth as Siddartha, was the son of Suddodana, a rajah of the Aryan tribe of Sakyas, occupying a tract of country north by northwest of Benares.

It is believed that at Kapilavastu probably about 600 B.C., and was left motherless by the death of the Rani Maya Devi shortly after he had given him birth. The earliest accounts represent him as having been born by natural generation, and without the miraculous incidents of the later legends.

There are apparent evidences of a melancholy and more or less morbid turn of mind even in his youth, and of painstaking efforts on the part of his father to cheer his despondency by the allurements of a voluptuous oriental court.

In spite of all this, sages were born, which were authorized by the earliest councils, which have the concurrent testimony of both the Northern and the Southern literatures, and which are credible in themselves shall be accepted as the probable history of Gautama.

Leaving his palace by night, attended by a faithful servant, he hastened to the open country, where he entwined his horse, and exchanging garments with a peasant, he proceeded on foot to a forest retreat, where he entered upon a life of self-mortification. He stated that the idea which has been so skillfully represented by Sir Edwin Arnold, that Gautama then and there set out to become a savior of men, has no foundation in fact. It is rendered impossible by the early traditions; he was simply fleeing from sorrow and distress, and seeking some way of peace.

Leaving his palace by night, attended by a faithful servant, he hastened to the open country, where he entwined his horse, and exchanging garments with a peasant, he proceeded on foot to a forest retreat, where he entered upon a life of self-mortification. He stated that the idea which has been so skillfully represented by Sir Edwin Arnold, that Gautama then and there set out to become a savior of men, has no foundation in fact. It is rendered impossible by the early traditions; he was simply fleeing from sorrow and distress, and seeking some way of peace.

It is rendered impossible by the early traditions; he was simply fleeing from sorrow and distress, and seeking some way of peace.

Leaving his palace by night, attended by a faithful servant, he hastened to the open country, where he entwined his horse, and exchanging garments with a peasant, he proceeded on foot to a forest retreat, where he entered upon a life of self-mortification. He stated that the idea which has been so skillfully represented by Sir Edwin Arnold, that Gautama then and there set out to become a savior of men, has no foundation in fact. It is rendered impossible by the early traditions; he was simply fleeing from sorrow and distress, and seeking some way of peace.
This step cost him the loss of all his influence; his disciples forsaketh him as an apostate and a failure; he was in extreme perplexity and distress. Should he return to the hitherto unquenched fires of his wounded pride by proclaiming that all religion was a sham? The temptation was strong, yet neither had his former possessions given him peace. Very real and very great were his temptations. Fierce were his struggles with the world, or, the one and, and with conviction and pride on the other, as he sat alone under the shade of the Bo tree.

All candid men must acknowledge that the decision which Gautama reached, and the victory over self which he won, were sublime. Greater self-control has seldom if ever been attained by men, altho the power of the human will has sometimes found remarkable exemplifications.

John Foster, in his essay on Decision of Character, cites the case of a spendthrift who, after having exhausted a splendid fortune, had gone to the seashore with the purpose of destroying his life. But after a long period of reflection he sprang to his feet with an all absorbing resolve to retrieve his fortune, walked rapidly back to the city, engaged at once in the humblest occupations, and a persistent miser actually accomplished his end.

With equal force of will, and in a far nobler cause, Gautama rose up from his reveries to become one of the most powerful leaders of mankind. He is supposed to have been at this time about thirty-five years of age. The passions of youth were not dead with him, worldly ambition may be supposed to have been still in force, but he chose the part of a missionary to his fellowmen, and there is no evidence that he ever swerved from his purpose. He had won a great victory over himself, and that fact constituted a secret of power.

He began at once the career which he had marked out. He sought, first of all, the disaffected disciples who had abandoned him, and who, doubtless, had proclaimed his fall. It is a strong power derived from the possession of some of the conquests that he speedily succeeded in winning them to his new standard.

It was just here that Buddhism began its career. It had still an ascetic element; it aimed to keep the body under for the sake of purity and power, but not as a matter of merit. In the place of idleness and repose for its own sake it substituted a life of beneficence.

Buddhism was a missionary religion from the outset; more aggressively so in that early age than in the later centuries, when it had lapsed into the monastic spirit of the original Brahmanism.

Gautama soon gathered a band of about sixty followers, whom, after five months of instruction, he sent out to proclaim the "Law." He himself preached continuously for forty-five years, and long before his death he was surrounded by a numerous order of mendicants, who received his word as law, and to whom he stood in the place of God. The gentleness of his bearing and the consistency of his life, as well as precepts, won men of high and of low degree with remarkable facility.

During the more favorable seasons it was his custom to preach as an itinerant, wherever he found the most favorable openings, but in the hot and rainy months he gathered his mendicants about him in some shady grove or on a breezy mountain summit like the "Vulture's Peak." He died at the advanced age of fourscore years from an acute attack of fever. The announcement of his last hours in the Great Decease is full of pathos. He passed away like Socrates, in the full use of his faculties, and discoursing tenderly with his disciples to the end.

If we now turn from credible history to the later legends of the Buddha, we enter upon a story of the greatest extravagance.

The legends divide his life into three periods: (1) that of his preexistent states through several hundred transmigrations; (2) that of his earthly life before attaining Buddhahood; and (3) that of his ministry after he had become "enlightened." The preexistent states are set forth in the Jataka or "birth stories" of Ceylon, which represent him as having been born 530 times after he became a Bodisat (a predestined Buddha).

As a specimen of his varied experience while becoming fitted for Buddhahood, we read that he was born 83 times as an ascetic, 58 as a monarch, 43 as a deva, 24 as a Brahman, 18 as an ape, as a deer 10, an elephant 6, a lion 10, and at least once each as a thief, a gambler, a frog, a hare, and a horse. He was also embodied in a tree. But as a Bodisat he could not be born in hell, nor as vermin, nor as a woman. He could descend no lower than a snipe.

The legends represent the Buddha as having "incarnated" for the purpose of bringing relief to a distracted world. He was miraculously conceived, entering his mother's side in the form of a white elephant. All nature manifested its joy on the occasion. The ocean bloomed with flowers, all beings from many worlds showed their wonder and sympathy. Many miracles were wrought even during his childhood, and every part of his career was filled with marvels.

At his temptation under the Bo tree Mara (Satan) came to him mounted on an elephant sixteen miles high and surrounded by an encircling army of demons eleven miles deep. Finding Buddha proof against blandishments, Mara had seduced a retreat of fifteen years whereupon he assailed him with fire and smoke and ashes and filth, all of which became as zephyrs upon his cheeks or as presents of fragrant flowers. Last of all, Mara sent his three daughters to seduce Buddha.

In the Northern Buddhist literature, especially in the Lalita Vistara of Nepal, many incidents of Buddha's childhood are given which show a remarkable coincidence with the life of Christ. It is claimed that his birth was heralded by angelic hosts, that an aged sage received him into his arms and blessed him, that he was taken to the temple for consecration, that a jealous ruler sought to destroy him, that he disputed with learned doctors; that he was baptized, tempted, transfigured, and translated. These seeming parallels will be noticed further on.

The Literatures of Buddhism: The teachings of Gautama were gathered up by his disciples in the form of belief aphorisms or sutras, and were orally transmitted for several generations before being committed to writing. They had various classifications, like the following: (1) The Four Truths, (2) the Sixteenพระs, viz. the lists of sorrows, the removal of sorrow, and the means by which this is to be done. The fourth was ramified into
it, the bootless extremes of asceticism on the other. (3) The Ten Fetter—viz.: (a) Delusion of Self; (b) Doubt; (c) Dependence on Rites; (d) Aversion to the lot of a Man; (e) Hatred of Life; (f) Desire for Life in Earth; (g) Desire for Life in Heaven; (h) Pride; (i) Self-Righteousness; (j) Ignorance. (4) The Ten Prohibitions, sometimes called the Ten Commandments. One should not kill, should not lie, should not steal, should not lie, nor get drunk, nor commit adultery. These five were for all men. Five others were, the religious tenets of these should not violate certain strict rules relating to food, nor wear ornaments, nor use perfumes, nor sleep on a soft bed, nor indulge in amusements, nor possess silver and gold.

These prohibitions have often been compared with the Mosaic Decalog, but it will be observed that all the Godward precepts of the latter are wanting in the Buddhist code; even the parental relation is unnoticed, and the reference to the deeper principle of covetousness in the Hebrew Decalog is also wanting. Only the outward violations of these commandments in common life is forbidden in the laity, and five frivolous injunctions are added for the religious order.

It is fair to say, however, that reverence for parents was inculcated in other sutras ascribed to the Buddha; that the restriction and abuse heaped upon woman by the laws of Manu were mitigated, and that, in general, benevolence toward all men and all living things was enjoined.

In the teachings of Gautama and his immediate disciples are found many precepts which compare favorably with those of the New Testament. They are, however, purely ethical, and can scarcely be said to have a religious import.

Of the collections of Buddhist literature there are two great divisions, known as the Little Vehide (Hinayana) of Ceylon and other southern lands, and the Great Vehide (Mahayana) of Nepal, Kashmir, and Tibet, China and Japan received translations from both, the principally from the Great Vehide of the North. The Pali text of the Little Vehide was adopted by the council called by King Ashoka about 250 b. c., and was known as the Tripitaka (Three Baskets). This is the oldest and most authentic body of history and doctrine, is justly considered the Buddhist canon.

It is a strong point in favor of the authenticity of the Tripitaka, that it was borne into Ceylon by Mahinda, a son of Ashoka, soon after the council of Patna. He was received by Tissa, King of Ceylon, with great favor, and the faith, as it was preserved in his memory and that of his monks, was implicitly received in Ceylon. Mahinda soon after translated the Tripitaka from the Pali into the Sinhalese language, and from that time to the present day the two versions have corroborated each other.

Later teachings hold the same relation to the Tripitaka that the traditions and decrees of the Roman Catholic Church hold to the Canon of the New Testament.

The Mahayana or Great Vehide, consists of nine books, of which the two most important are the Lalita Vistara and the Lotus of the True Law. The former of these is a life of Gautama down to the time of his enlightenment. It was written partly in poetry and partly in prose, and evidently at different times. As above stated, it is in this poetic and exaggerated biography that those legends are chiefly found which resemble the life of Christ.

In the course of centuries important Buddhist works of greater or less merit appeared in the southern literature, mostly commentaries on the alleged teachings of the "Exalted One." Of these the most important are the Dhammapada, the Sutta Nipata, the Great Decease, etc. The Dhammapada, or "Path of Holiness," was written by Buddhagosa, an Indian monk, who went to Ceylon about 430.

The book is a sort of encyclopedia and commentary combined. It is a compendium in Pali of all the commentaries which till his time had been preserved in Sinhalese only. The Dhammapada contains the best things of Buddhism, as the Bhagavad Gita sums up the choicest teachings of Hinduism. How far it represents the veritable words of Gautama and how far it embodies the sentiments of his followers can never be known, as it was written seven centuries after the adoption of the canon.

The Doctrines of Buddhism: These are (1) its peculiar conception of the soul; (2) its doctrine of Karma; (3) its theory of Nirvana.

The soul is said to consist of five skandhas. These in their interaction constitute what all others than Buddhists regard as the soul. They are (a) material properties, (b) the senses, (c) abstract ideas, (d) tendencies, (e) mental powers. The soul is the result of the combined action of these, as the flame of a candle proceeds from the combustion of its constituent elements. The flame is never the same for two consecutive moments. It seems to have a perpetual identity, but that is only an illusion, and the same unreality pertains to the soul; it is only a succession of thoughts, emotions, and conscious experiences. We are not the same that we were an hour ago. In fact, there is no such thing as being, there is only a constant becoming. We are ever passing from one point to another throughout our life, and this is true of all beings and all things in the universe. How it is that the succession of experience is treasured up in memory is not made clear.

This is a most subtle doctrine, and it has many points of modern speculation, with various speculations of modern times. It has also a plausible side when viewed in the light of experience, but its gaps and inconsistencies are fatal, as must be seen when it is thoroughly examined.

Trishna is the second of the cardinal doctrines. Trishna is that inborn element of desire whose tendency is to lead men into evil. So far it is a misfortune, or a form of original sin. Whatever it may have of the nature of guilt hangs upon the issues of a previous life. Upadana is only a further stage in the same development. It is Trishna ripened into intense craving by our own choice and our own action. It then becomes incontrollable, and is clearly a matter of guilt. Now the momentum of this Upadana is such that it cannot be arrested by death. Like the demons of Gadara, it must again become incarnate, even tho it should enter the body of a brute.

Karma: This transitional something, this restless moral or immoral force which must work out its natural results somehow and somewhere, and that in embodied form, projects into future being a residue of past action. It is known, however, it means the "doing." It is a man's record,
involving the consequences and liabilities of his acts. It is a score which must be settled.

A question naturally arises, How the record of a soul can survive when the soul itself has been "blown out," as karma and rebirth would have people believe? If that can be done, it does not quite meet the case. If the flame were something which, when blown out, immediately seized upon some other substance in which the work of combustion proceeded, it would come nearer to a parallel. One candle may light another before itself is extinguished, but it does not do it by an inherent necessity. But this flame of the soul, this Karma, must enter some other body of god, or man, or beast, or inanimate thing.

Again the question comes, How can responsibility be transferred from one to another? How can the heavy load of a man's sin be laid upon some newborn infant, while the departing sinner himself has no further concern in his evil karma, but sinks into non-existence the moment his "conformations" are touched with dissolution? Buddhism acknowledges a mystery here; no real explanation can be given, and none seems to have been attempted by Buddhist writers. To be consistent, Gautama, in denying the existence of God and of the soul as an entity, should have taught the materialistic doctrine of annihilation. The Buddha had not a deep-rooted idea of transmigration which had taken entire possession of the Hindu mind. He was compelled, therefore, to bridge a most illogical chasm as best he could. Karma without a soul to cling to is something in the air. It alights like some winged seed upon a newborn set of skandas with its luckless boon of ill desert, and it involves the fatal inconsistency of investing with permanent character that which is itself impermanent.

The question may be asked, Do we not admit a similar principle when we speak of a man's influence as something that survives him? We answer, "No." Influence is a simple radiation of impressions. A man may leave an influence which men are free to accept or not, but it is quite a different thing from one who assumes the moral liabilities of a bankrupt character. Gautama's own Karma, for example, ceased to exist upon his entering Nirvana; there was no rebirth, but his influence lives forever, and has extended to millions of his fellowmen.

The injustice involved in the doctrine of Karma is startling. The newborn soul that inherits its unsettled score has no memory or consciousness that connects it with himself; it is not heredity, it is not his father's character that invests him. This Karma may have crossed the ocean from the deathbed of some unknown man of another race. The doctrine is the more astonishing when we consider that no Supreme Being is recognized as claiming this retribution. There is no God; it is a vague law of eternal justice, a law without a lawgiver or a judge. There can therefore be no pardon, no commutation of sentence, no such thing as divine pity or help. The only way in which one can disentangle himself is by breaking the connection between spirit and matter which binds him with the shackles of conscious being.

**Doctrine of Nirvana:**

No doctrine of Buddhism has been so much in dispute as this thing, as divine pity or help. The only way in which one can disentangle himself is by breaking the connection between spirit and matter which binds him with the shackles of conscious being.

(1) It has been widely maintained that Nirvana means extinction. (2) Prof. T. W. Rhys Davids and others have held that it is the destruction of passion, malice, and delusion, and that it may be attained in this life—that Gautama reached Nirvana forty-five years before his death. They claim, however, that as much as it cuts off karma and rebirth, it involves extinction upon the dissolution of the body. This is maintained by others that Nirvana is a return to the original and all-pervading Boddi essence. This theory, which is really a concession to the Brahmanical doctrine of absorption into the infinite Brah, has a wide following among modern Buddhists in China and Japan. It is a form of Buddhist pantheism.

As to the teachings of Gautama on this subject, Professor Max Muller, while admitting that the metaphysicians who followed the great teacher plainly taught that the entire personal entity of an arhat (an enlightened one) would become extinct upon the death of the body, yet reasons in his lecture on "Buddhistic Nihilism" that the Buddha himself could not have taught a doctrine so disheartening. At the same time he quotes the learned and judicial Bishop Bright as declaring, after years of study and observation in Burma, that such is the doctrine ascribed to the great teacher by his own disciples. Gautama himself is quoted as closing one of his sermons in these words: "Mendicants, that which binds the teacher to existence is cut off, but his life and influence remain. When Buddha is no more, the Buddha has not ceased to exist. It is not that you shall be seen by gods and men; but after the termination of life, upon the dissolution of the body, neither gods nor men shall see him."

Prof. Rhys Davids expresses the doctrine tersely when he says: "Utter death with no new life to follow is then a result of, but it is not, Nirvana."

Professor Oldenberg suggests with much plausibility that the Buddha was more reticent in regard to the doctrine of final extinction in the later periods of his life; that the doctrine had been found a stumbling-block, and he came to assume an agnostic position on the question whether the ego should permanently survive.

The question, What is Nirvana? has been the object of a larger inquiry than its importance demanded. Professor Millner has shown that questions are not concerned in the question. They find no attraction in either view. They desire neither extinction nor unconscious absorption into the Boddi essence (or Brah). What they anticipate is an improved transmigration, a better birth. The more devout may indulge the hope that their next life will be spent in one of the Buddhist heavens. Others may aspire to be men of high position and influence. A man of low tastes may forecast his next life in accordance with those tastes. The Buddhist holds even more strictly than the Christian that every man shall reap as he has sown, for in his view no interposing grace can change the result. It is wholly erroneous, then, to represent the system as presenting nothing more attractive to men than the prospect of extinction. However metaphysicians and Orientalists may settle the question of the last estate of those who become "enlightened," the multitudes care little for a goal which, according to Buddhist tradition, less than a dozen followers of Gautama have ever reached. "The laymen could attain Nirvana," says Professor Rhys Davids; "laymen and householders are told of only one or two instances of their having done so; and, therefore, it was more possible for members of the Buddhist order of mendicants, we only hear after the time of Gautama of one or two who did so. No one
now hears of such an occurrence." It is safe, therefore, to conclude that the hope of Nirvana has practically no influence on Buddhist minds. It lies at an infinite distance and is shadowy at best, when compared with the existence lies between. That is the hope of hope and inspiration.

The Migrations of Buddhism: It is common to speak of Buddhism as a "missionary religion," and such it was in its earlier career. Gautama from the first and both by precept and example taught the duty of proclaiming the "Law." The fact that a son and a daughter, Ashoka, became missionaries in Ceylon must be accepted as evidence of the earnestness of the missionary spirit of their time. Other influences helped the movement, however. Ashoka made Buddhism the religion of the state, and, as we have seen, the political treaties formed between the Lamas of Tibet and the Chinese emperors extended the system even to Mongolia. In many instances Chinese travelers in India carried home with them the Buddhist system and became its advocates. But for several centuries real missionaries or "Bodhisattas" visited other lands for the promulgation of the Law. Buddhism was transmitted to Ceylon about 230 B.C., to Kashmir at the beginning of the Christian era, to China about 67, to Burma in the 5th century, to Japan in 552, and to Siam and Cambodia in the 7th century.

The Development of Northern Buddhism: In Ceylon, Burma and Siam there has been little change from the time-honored doctrine of the Pitakas, but in Nepal, Tibet, and among all branches of the Mongolian race there have been wide variations. Closely connected with the legendary teachings which at length came to be associated with the history of Gautama was the theory that successive Buddhas have visited the world, and at intervals of five thousand years will continue to appear. When Gautama died, those who had learned to look upon him with a sort of worship felt the loss of a divine sympathy and help. The Buddha was dead, and according to his own teachings there was "nothing left of which it could be said I am." But the next Buddha was in the Saha of the Buddhas, in the Saha of the Bodhisattvas, and perhaps could even now hear the voice of human prayer. Thus the Bodhisat "Maitreyeh" (future Buddha of kindness) came to be recognized even in Ceylon as a hopeful resource and a hearer of prayer.

But it was in the Northern Buddhism particularly that the evolution of a sort of semi-theism advanced from generation to generation. Professor Rhys Davids maintains that the "keynote" of the Mahayana (Great Vehicle) was its change from the idea and aim of Arhatship, as taught in the south, to that of Bodhisattva. In other words, a living Buddha to come was thought to be of more practical value to mankind than a dead Buddha of the past, however wise and saintly.

There was that felt demand of humanity, witnessed in all ages and races, for a divine helper. By the 4th century there were worshiped in Nepal two Bodisats named Manjusri and Avalokitesvara. The first was the personification of wisdom; the second represented power, and was the merciful protector of the world. These mythical personages were presented in the "Lotus of the True Law," one of the nine books of the Great Vehicle. At a somewhat later period these two had become three, with a somewhat modified distribution of functions.

Vajrapani represented power; Manjusri, the spiritualization of wisdom; while Avalokitesvara was the spirit of the Bodhisat. In each triad the first person was known as a dhyana or celestial Buddha; the second was the spirit of Buddhism in the church; and the third was the incarnate Buddha on earth. The trinity for our world consisted of the dhyana Amitaba, whom we shall notice farther on; Avalokitesvara, who also becomes important, and Gautama, who was our incarnate Buddha.

In the 10th century the Tibetans advanced a step further, and proclaimed the Supreme or Adi-Buddha. From him, the One and Absolute, from the "Oneness" and the "Radiance" of the Buddha whom the Bodisats evoked, while from them sprung the Bodisats, and from each Bodisatwa was evolved a kosmos or material world. Thus Buddhism had become essentially polytheistic.

Meanwhile the system had become exceedingly corrupt through a union with the Hindu doctrine of Saktism, or the worship of the female principle of Siva, and even in Tibet the hideous idols representing the gods and goddesses of Hinduism were everywhere present. By a subsequent reformation the Buddhism of Tibet was restored measurably to its original purity.

Lamaism or Lamism: The available functions of Avalokitesvara had rendered him exceedingly popular. To him all real supplications were offered. The chief abbot of Tibet, who was also temporal ruler, solidified and established his power by claiming to be an incarnation of this all-pervading Bodisat. At his death the indwelling one immediately became incarnate in some newly born infant who should succeed to the theocratic throne. To the great advantage of this supposed divinity was added an alliance with Rablai, or Bon, and a number of influential prelates, which, in exchange for political fealty to the Chinese Emperor, the Great Lama of Tibet was constituted the high priest of Buddhism over China and Mongolia. Subsequently a disputed title to the Lamaship was settled by the inauguration of two Lamas, and for this purpose another indwelling Bodisat was found, viz.: Amitaba.

The Worship of Quan Yin: In China a different use was made of the ever available and popular Bodisat Avalokitesvara. He became impersonated in "Quan Yin," the well-known goddess of mercy. That Quan Yin was regarded as a female finds its explanation in the influence of the Indian Saktism, which had not become quite extinct even in Tibet. Some of the abbes of the Tibetan monasteries were regarded as incarnations of the wives of Siva. Quan Yin on the same principle was an impersonation of Avalokitesvara on the female side of his nature. Moreover, in this, as in some forms of historic Christianity, the notion that women's sympathy and compassion are most tender had, perhaps, some weight. In both China and Japan Quan Yin is one of the most popular and beneficent of deities. She is represented as having attained Nirvana, but as having voluntarily sub-
The Buddhist Doctrine of Salvation by Faith: We have seen that the celestial or Dhyanu Buddha of our world system was Amitaba. This mystical being has become in the Yodo and the Shin sects of Japan a complete savior. By the grace of the Buddha, in the course of millions of ages he is able to save, vicariously and to the uttermost, all who in true faith call upon his name. By the Shin sect the doctrine is most fully developed. They claim that a single act of faith and trust in Amitaba will save the soul for ever, complete the institution or transfer of righteousness from the savior to the sinner. There is an abandonment of the notion of self-merit and self-help. Endless transmigration gives place to an immediate and lasting enjoyment of heaven beyond the setting sun. Asceticism is rejected as unnecessary. The doctrine of self-merit is "as superfluous as furs in summer." Yet this faith is said to work by love, and good deeds are performed out of gratitude to Amitaba.

It is very remarkable that Buddhism, beginning in sheer atheism, should finally have reached the very threshold of Christianity. Without the Christ, there has never appeared a more clever and complete counterfeit. No other false system has ever paid so marked a tribute, the involuntary, to the fundamental doctrines of Christianity.

The Present Buddhisms: We have seen how the system has been developed in different lands. In Ceylon and Burma it is still a mere ethical cult, while the religious aspirations of men are largely met by the worship of spirits. In Siam it is buttressed by an intimate relation to the government of the State. In India it has been virtually extinct since the 9th century. In Tibet, as has already been shown, it is a virtual theocracy under the name of Lamism. In China there are thirteen Buddhist sects, but the system as a whole has become an essential part of the triangular system known as the Sankia, or "The Three Religions," Confucianism, Taouism, and Buddhism. They are so united that each supplements the other. The Chinese Buddhism has borrowed from Confucianism its reverence for ancestors and for the State, and from Taouism its demi-gods and its geomantic superstitions. The Chinese are in turn Confucians, Buddhists, or Taouists, as exigencies may arise.

The Buddhism of Mongolia has borrowed largely the Tibetan type, though it has multiplied its Lamas almost indefinitely. Any distinguished Buddhist monk may come to be regarded as an incarnation of some holy Buddha, and through this open pathway of ambitious sainthood, fraud and corruption have entered. The Mongolian Buddhism is of a darker and more gloomy type than that of other lands.

The Buddhism of Japan has been greatly influenced by a union with Shintoism. It has embraced many of its popular superstitions, and as from Taouism in China, so from Shintoism in Japan it has adopted the national heroes and demi-gods and enshrined them in its temples. For a thousand years there was a mutual agreement that Shinto priests should solemnize all marriages and Buddhist priests officiate at all funerals. This relation was finally abolished by imperial edict.

The Alleged Coincidences between the Life of Gautama and that of Christ: We have already alluded to the incidents of Buddha's birth and early life, as set forth in the legends, particularly in the Lalita Vistara of Nepal. Great use has been made of these by the apologists of Buddhism. The inference which is generally drawn from them is that the Gospel narrative is largely borrowed from the life of Gautama. Abundant refutations of this assumption have been presented by Eitel, Kuenen, Kellogg, Rhys Davids, and others.

1. "There is," says Rhys Davids, "no evidence whatever of any actual and direct communication of these ideas common to Buddhism and Christianity from the East to the West."

2. Many of the coincidences are merely accidental. The events in both cases are those which might naturally occur independently of any connection; such as the fact that both infants were welcomed with joy by friends as well as by kindred, or that they were both consecrated in temple or that both were tempted to turn aside from their great missions, or that both were credited with precocious wisdom.

3. The fact has already been shown that the Sutra Vyasa, which gives the life of the legions of Gautama's childhood, cannot be proved to have existed earlier than the 6th century. While there is no evidence of communication of the ideas common to Buddhism and Christianity from the East to the West, evidence is abundant that Christianity had been preached and had gained a foothold in India and Central Asia long before that date.

4. It is intrinsically improbable, not to say impossible, that a circle of disciples which embraced the mother and brethren of Jesus could have undertaken to palm off a false or borrowed history.

5. It is still more improbable that the disciples, whose whole aim was to show that Christ's advent was a fulfilment of Jewish prophecy and vitally connected with the Old Testament, should have clumsily copied a mass of heathen legends. Considering the Jewish horror of heathenism, no policy could have been more fatal.

6. The disciples of Christ taught a pure theism, in which supernatural elements appeared in an evidence of their own Godhead. They have the story of one claiming to be the Son of God on the biography of a Gentile atheist?

7. Many of the coincidences are rather contrats. Christ's preexistence was that of a Divine Being, Buddha's was merely a series of transmigrations. Christ had shared the equality of the Father; Buddha had been a soldier, a thief, an elephant, a tiger, a snake, a frog; Christ's baptism was a religious rite, that of Gautama a bath in a river. Christ's miracles were sensible and useful, those of Buddha objectless, childish, grotesque.

The Alleged Humanity of Buddhism as Compared with Christianity: There has been great effort on the part of opponents of the Christian faith to exalt Buddhism as a superior system. It has been especially urged that the "Light of Asia" was the teacher of a gospel of peace, strangely contrasting with the belligerent doctrines and history of the Christian Church. In reply to this claim it should be said, in the outset, that in all comparisons between Asiatic faiths and those of Europe, differences of climate and race characteristics should be borne in mind. Between the soft and puny tribes of Southern
India or Ceylon and the Norsemen of the Baltic there are physical contrasts which no faith could wholly efface. But considering that Scandinavia was the terror of Europe and one of the most peaceful of men, we may point to the influences which Christianity has exerted upon them as among the highest triumphs of any religious faith. Moreover, northern races of Buddhists are by no means distinguished for a gentle and pacific spirit.

There is scarcely any country in which the life of a stranger is more imperiled than in Mongolia. The famous conqueror, Kublai Khan, was converted to Buddhism, but, as Ebrard has well shown, no change was wrought in his nature or his ambitious plans. The Japanese, too, the Buddhists for thirteen centuries, have been a warlike race, and their temples are often crowded with the images of bloodthirsty heroes.

It is admitted that Gautama disowned the destruction of life, whether of man or of beast. Even insects were spared with punctilious care. But this was no new precept. Brahmans had long before taught the same, and the sect known as the Jains are most absurdly scrupulous of all. This sacredness of life is based on the doctrine of transmigration, which is common to the religions of the Eastern Asiatic. The meanest beast or reptile may be an incarnation of a human spirit. But the real humanities of Buddhism are infinitely inferior to those of Christianity. Ostentatious care of brutes is often seen side by side with utter disregard of human suffering. In Canton one may see a sacred asylum for women, but he would look in vain for a home for the orphan or the blind. A missionary board in our day has been asked to provide some place in Bangkok for the insane, because such an asylum had never been imagined, so that all that could be done was to lodge him like a criminal in jail.

The alleged instances of benevolence in the history of Gautama are chiefly found, not like those of Christ, in his earthly life, but in the birth stories of his former existences. Once as a hare he gave himself for a dinner to hungry wolves. In another, he laid his children to a demon who desired to eat them, and as their blood streamed from the monster's mouth he simply said, "By the merit of this deed may rays of light emanate from me."

The attitude of Buddhism toward woman has been greatly improved in recent years by its special advocates in Christian lands. That it mitigated many of the wrongs which had been visited upon the female sex by the Brahmins will be conceded.

It was a great and important step when the Buddha, not on his own impulse, but by the persuasions of his kinsman and disciple, Ananda, admitted women to the privileges of the Samgha or holy order. The principle involved carried with it many social ameliorations. Yet the position of Gautama and the whole leadership of the Buddhist Church in this respect was far below the standards of the New Testament. In the outset his example in forsaking his wife and child to become a recluse cannot be commended. Paul taught that a man might remain single for the sake of the kingdom, but to break away from the moral obligations of married life is not without consent, must be adjudged a crime.

The baneful influence of this example, like that of Mohammed's immorality, has brought forth its evil fruit abundantly. In Burma any man desiring to be rid of his wife has only to enter a monastery and remain a year or even a month, and that his sanctities behind him and marry another wife.

Logically, Buddhism is opposed to all marriages, to all love for wife or children. The principle that human relationships are fraught with pain, and that to get rid of pain one must abandon an institution which is tantamount to absurd indifferense, would break all society. This tendency was pointed out to Gautama, and he accordingly divided his followers into two classes, the monks and the laity. It was an illogical but necessary concession.

Buddhist monasticism rests upon a much more radical principle than that of the Roman and Greek churches. These, while maintaining that celibacy is conducive to the highest sanctity, nevertheless honor marriage, and make it a sacrament for the masses of men. Not so with Buddhism. It puts no honor upon the relation; it regards it as an evil. Many utterances are quoted from Buddha which cast reproach upon woman as woman.

Thus in the Dhammakha Sutta, "A wise man should avoid married life as if it were a burning pit of live coals." Again, "That which is named woman is sin. On another occasion Buddha is said: "Any woman whatever, if she has a proper opportunity and can do it in secret, and if she be not so disposed, will do that which is wrong, however ugly the paramour may be." No foul slander in the Laws of Manu can exceed this.

Two great precepts of Buddhism will suffice to show the cartoon which it puts upon woman. First, Gautama taught that, altho she could enter upon a holy life as a nun, she could not attain Nirvana without first being born as a man; and, second, it was held that, altho a Bodhisattva in his preexistent life might be a wolf, a snipe, or a frog, she could never become a woman. Quite in accord with these ideas, the female sex has remained in general degradation in all Buddhist lands.

The fact that a low grade of morality exists in countries wholly under the influence of this system, that profligacy is unbridled in Mongolia, that thousands of children were sold for prostitution in Japan, that the vile custom of polyandry prevails unchecked in Tibet, will doubtless be set down to other causes by Buddhist apologists. But when we turn to the canonical books of the system and find passages so vile that the translators have not dared to translate them, it is not such excuses can be accepted. The Bishop of Colombo, in the Ninteenth Century of July, 1888, called attention to the fact that the translators and publishers of the Pitakas of Ceylon had omitted some portions which were absolutely vile. He did not complain that the omission had been made, but that no mention was made of the fact—that the English readers of the Sacred Books of the East have been led to suppose that the cult of Buddha was considered unfit for the English translation, but such notice is wanting in Professor Oldenberg's translation of the Pitakas, where especially such omissions should be explained, since Buddhism
par excellence is paraded as a model of purity. Lest we may seem to do injustice to the Buddhist sacred canon of Ceylon, it should be said that the omitted passages are not positive recommendations, but mere prohibitions; but the very prohibitions delite the mind.

The aim seems to have been to draw out the opinion of "The Blessed One" in regard to every vice and crime that the basest imagination conceive of. Cases were stated, therefore, in which the sinner had fallen into every species of sin.

The minutiae, the sickening details, the pruri Kant particularity of the recitals were such that the Bishop of Colombo concludes that the authors must have transcended the possibilities of actual sin, and in some instances drawn upon a depraved imagination in order to illustrate the wisdom of the Buddha.

Contrasts with Christianity: There is no space for even a brief allusion to the admixture of Buddhism with lower forms of superstition which it has encountered and absorbed in many lands, such as the wide-spread spirit-worship, serpent-worship, and even fetishism. But a few of the many points of contrast between Buddhism and Christianity may be presented. We have admitted the probable sincerity of Gautama as a re-former and the great victory which he gained over his own evil propensities, also the general tone of benevolence which appeared in his teachings; but the system must be judged as a whole and in the broad perspective of its influence. It is thus that Christianity is judged.

Buddhism contrasts with Christianity in respect to God. The one, at least in its original form, is agnostic if not atheistic, and therefore derives no motives of action from any higher source than man himself or some blind law of moral cause and effect. The other makes God, real, personal, and supreme—the source of all highest inspiration and help, the Author of every blessing present or future, the Arbiter of the human conscience, and the Rewarder of all who seek Him.

2. There is a marked contrast with respect to the soul. Buddhism recognizes no permanent entity to the soul beside the body. The one is only the inter-action of physical properties and mental powers. At death only the Karma, or the good or evil desert remains. Christianity recognizes the soul as created in the image of God, as conscious and spiritual, a distinct and permanent being, destined to live hereafter, and capable of loving God and enjoying Him forever.

3. While Christianity represents sin as an offense against God and centers in Him the bond of all moral obligation, Buddhism sees only a personal inconvenience, an accumulation of consequences. The motive even in beneficent action is utterly selfish, as it aims at merit. Thus when the preexistent Buddha gave his children to be devoured by a demon, as stated above, he thought not of their suffering, or of his wrong toward them, but only of his own great merit. All laws of moral right and wrong seem distorted by such a conception.

4. Buddhism has no Savior. When Sir Edwin Arnold represents him as coming to save the world, he simply reads into Buddhism his own conceptions borrowed from the New Testament and Christianity. The main idea, namely, that sinners wholly on himself and he taught all men to do the same. In later ages Buddhists in various lands have expressed a felt want of humanity by adopting various types of quasi theism, and have conceived of supernatural beings as divine helpers, but they have so far departed from real Buddhism. The term salvation is wholly out of place in Buddhism, while, on the other hand, Christianity is in its whole aim and its whole nature a system of divine redemption from sin and death.

5. Buddhism lays stress on self and self-interest. Its self-denials are for purely selfish ends and it cares nothing for the needs of mankind. In Christianity the ideal man denies himself for the good of the whole body of which he is a member, and subordinates self-will and self-interest to the welfare of mankind.

6. Buddhism has shown itself incapable of regenerating society. It was founded by one who had turned his back on all social life. It was very natural that the system should discount woman and the home, for its author was an ascetic, and the monastic spirit pervades all his teachings. Homelessness, mendicancy, suppression of all social and domestic instincts, destruction of love and desire, even the desire of future life, silence as of "a broken gong," and "solitude as of a rhinoceros"—these were the goal of the true Buddhist.

7. Buddhism is a system of pessimism, Christianity, a revelation of cheerful and immortal hope. Gautama aimed at "the death of death." Christ brought life and immortality to life.

The whole assumption upon which the "Great Renunciation" was made was to rest that the universe is out of order, that all life is a burden, that there is no beneficent creativity, no kind providence, and no salvation. Whoever may have been responsible for such a world, it is one of universal misery and distress. Man and beast make common cause against it, and Buddha is the one great sympathizer. When he preached at Kapilavastu before his father's court the whole animal creation was there.

"Catching the opening of his lips I learn
That wisdom which hath made our Asia mild."

It appears to have been a grand indignation meeting of man and beast, the first and last ever held of Comradeship, a gathering in which Buddha voiced the common protest against the order of nature, and pointed out the way of escape from the sad nexus of existence.

"took the promise of his piteous speech,
So that their lives, prisoned in the shape of ape,
Tiger or deer, shagged bear, jackal or wolf,
Foul feeding kite, pearled dove or peacock gowned.
Squat toad or speckled serpent, lizard, bat,
Yea, or fish flaving the river waves,
Launched meekly at the skirts of brotherhood,
With man who hath less innocence than these:
And in mute gladness knew their bondage broke
Whilst Buddha spoke these things before the king."

There was no mention of sin, but only of universal misfortune! As Sir Monier Williams remarks, the problem to which Christianity leads a man is: What shall I do to be saved? But that pressed upon men by Buddhism is: What shall I do to be extinguished?

In connection with the deep shadows of a brooding and all-embracing pessimism like this, we need only to hint at that glow of hope and joy with which the Sun of Righteousness has flooded
the world, the fatherly love and compassion with which the Old Testament and the New are replete, the divine plan of redemption, the great sacrifice, the superabounding grace, the brotherhood of man, and the eternal fellowship with God.

Special difficulties await the Christian missionary who attempts to convince educated Buddhists of the unique quality of the truths taught by Jesus Christ. He meets with men whose intellect is perverted by persistent violations of logic. It is easy for the mind trained by Buddhism to believe mutually exclusive propositions. Such a mind "feels no obstacle in believing that there is white blackness, slow swiftness, square roundness, or crooked uprightness." The real vitality occasionally seen in Buddhism is another difficulty which the missionary has to face. In Japan, the claim of championship of the highest morality and of love to the race is made by Buddhists with sharp arrayment of Christianity in these directions. In Ceylon the Buddhist clergy have adopted Christian methods of instruction of children in Sunday schools, of tracts and religious periodicals to control the minds of the people, and of revivalist tours to stir their emotions.

What the missionary encounters in Buddhism is a religion founded upon a life, fortified by a literature, and witnessed to by the experience of multitudes. He must therefore study it profusely, for this ancient system is not to be lightly regarded or quickly overthrown.

**BUEA:** A town in the mountain region of the German Colony of the Kamerun, of which it is the seat of the colonial government. Station of the Basel Missionary Society (1896), with 3 missionaries and their wives, 6 native workers, 4 outstations, 7 village schools and (1902) 91 communicants.

**BUENOS AIRES:** Capital of the Argentine Republic, on the estuary of the Rio de la Plata. The most important city in South America, it differs little in its character from American and European seaboard cities. Population (1895) 663,878.

Station of the ME (1836), with 2 missionaries and their wives, 1 missionary woman, 16 native workers, men and women, 5 chapels, 3 village schools, 1 high school, a printing house and 851 professing Christians. Station also of the SDA (1891), with 5 missionaries, 4 of them with their wives, 1 missionary woman, 8 native workers, 14 outstations and 386 professing Christians. Station also of the South America Missionary Society (1898), with 1 missionary and his wife, 11 native workers, men and women, 1 chapel, 2 village schools. Station also of the PB, with 1 missionary and his wife, 3 missionary women and 1 printing house. Station also of the Missionary Fenc Association (1901), with 4 missionaries; also of the International Medical and Benevolent Association, with 1 missionary and his wife; also of the MCA (1901), with 1 missionary and his wife; also of the BFBS, with 5 native workers and 1 book depot.

**BUFF BAY:** A town on the northern coast of Jamaica, West Indies; station of the CWBM, with 1 missionary and his wife, 2 chapels, 2 Sunday schools, 2 village schools, 4 young people's societies and 135 professing Christians. Also station of the Western Annual Conference of the Wesleyan Church in the West Indies, with 1 missionary.

**BUGHI LANGUAGE:** This belongs to the Malayan family and is spoken by above one million of its inhabitants (the Kelud of Celebes). It is written with its own alphabet.

**BUITENZORG:** A station of the Dutch Missionary Society in Western Java, founded in 1890. It has 1 missionary, 5 native workers, and 165 communicants.

**BUKALEBA:** A settlement in the Usoga district of Uganda, Central Africa, situated near the extreme south of the Victoria Nyanza; station of the CMS (1891), with 1 missionary and his wife, 57 native workers, men and women and 92 communicants.

**BUKASA:** A settlement on one of the Sese Islands in the Victoria Nyanza, Uganda, Central Africa; station of the CMS (1895), with 1 missionary and his wife, 143 native workers, men and women, 1 Sunday school, 3 village schools and 480 communicants.

**BULANDSCHAH:** A city in the United Provinces, India, situated S. E. of Delhi; a station of the ME, with 13 native workers, men and women, 7 chapels, 16 Sunday schools, 12 village schools, 14 young people's societies and 631 professing Christians. Also station of the ZBM, with 3 missionaries, 7 native women workers, 3 village schools and 155 Zenana pupils.

**BULAWAYO:** A town and railroad station in southern Rhodesia, Africa; station of the WMS, with 3 native workers, 2 chapels, 1 Sunday school, 1 village school and 145 professing Christians. Station also of the SPG (1893), with 3 missionaries, 1 native worker and 66 communicants. Station also of the SDA (1895), with 6 missionaries, 4 of them with their wives (1 a physician), 2 Sunday schools, 2 village schools, 1 orphanage, 1 dispensary. Also written Buluwayo.

**BULGARIA:** A country of the Balkan Peninsula, forming an autonomous principality under the suzerainty of the Sultan of Turkey. It is bounded on the north by Rumania, on the east by the Black Sea, on the south by European Turkey, and on the west by Servia. It is divided by the Balkan Mountains into two parts: Bulgaria proper on the north and South Bulgaria or Eastern Rumelia on the south of that range. Area of the whole, 38,080 square miles.

Except along the Balkan Mountains, which traverse the whole principality from east to west, the country is a vast plain. The climate is temperate. The plains are hot in summer, and along the Danube there is much malaria, but the highlands are healthy. The higher mountains have snow on their peaks the greater part of the year.

The census of 1900 gives a total population of 3,733,189.

The Bulgarians are descendants of the Slavs who inhabited the Balkan Peninsula in the 7th century. In the second half of the 9th century (860-64) Christianity was introduced in Bulgaria, and with it an alphabet was formed and the Scriptures were translated. This was due to SS. Cyril and Methodius, who
are honored even to this day as patron saints by the Bulgarian Church.

The Bulgarians belong to the Greek (Orthodox) branch of the Slavic Church. Their spiritual head is the Exarch, who resides in Constantinople and has the jurisdiction over the twelve bishoprics into which Bulgaria is divided. In 1893 the members of the (Orthodox) Greek Church numbered 2,606,786, the Mohammedans in the Principal number 643,238, the Jews, 28,307, the Roman Catholics, 22,617; the Armenians, 6,643; and the Protestants, 2,384. Of the Mohammedans about 200,000 are Bulgarians in race, language and customs and are known by the distinctive name of Pomaks.

The modern Bulgarian language has receded more than any other Slavic dialect from the ancient Slavonic or the ancient Bulgarian. While the latter belongs to the synthetic class of languages and is rich in cases and other grammatical forms, the modern Bulgarian has lost nearly all the inflections of its ancient form and has become almost purely analytic, expressing the relations of cases by prepositions, as in English. The use of the article, which is placed after and not before the word, chiefly distinguishes it from the ancient language and from its cognate Slavonic dialects.

Specific for the Bulgarians was the work of the ABCFM which has since conducted missionary operations in that part of Bulgaria lying N. of the Balkans (which was at that time a province of European Turkey). The field was organized into a Mission Conference in 1892. It now has as a working force 1 missionary and his wife, 2 unmarried women, and 11 ordained native preachers. Work is carried on in 12 places and the number of church members reported is 234. It also has a high school with 57 students.

The ABCFM about the same time commenced work for the Bulgarians on the S. of the Balkans. It now has in Bulgaria a working force of 18 missionaries, men and women, and 16 ordained native preachers. Its operations extend to 50 places within the borders of Bulgaria and are reported at 900. A college institute, a theological school, a boarding and high school for girls and a publishing house are maintained at Samokov.

The BFBS and ABS have provided Bibles for the region and employ colporteurs for their dissemination.

BULGARIAN LANGUAGE: This language belongs to the Slavic branch of the Arvan family. It is spoken by more than four million people, chiefly found in Bulgaria and the adjoining districts of European Turkey. The alphabet used is substantially the same as the one invented by the bishop Cyril, in the 9th century, and now commonly called the Russian alphabet.

Old Bulgarian literature is written in the Slavic language and is not understood by the common people. A considerable modern literature in Bulgarian has sprung up since the Crimean War of 1853-56. To this growth of modern Bulgarian literature American missionaries have given a notable stimulus. The modern Bulgarian language, in fact, has been strongly and permanently affected by the translation of the Bible made by Dr. Riggs and Dr. Long and published by the Bible societies.

BULILIMA: A settlement in Bechuanaland, Africa, S. W. of Bulawayo; station of the LMS (1895), with 1 missionary, 1 native worker, 5 Sunday schools and 5 village schools.

BULL BAY: A town on the S. coast of Jamaica, W. I., about 12 miles E. of Kingston; station of the CW FM (1859), with 1 missionary and his wife, 4 chapels, 3 Sunday schools, 2 village schools, 2 young people's societies and 224 professing Christians.

BULLOM: A district of Sierra Leone, W. Africa, lying north of the Sierra Leone River; occupied by the CMS (1861) and now in charge of the S. W. African Church Missionary Society, with 10 native workers, men and women, 1 chapel 1 Sunday school, 6 village schools and 296 baptized Christians.

BULLOM LANGUAGE: The Bulom belongs to the negro group of African languages, and is spoken in the region of Sierra Leone, W. Africa, by a limited number of people. It has adopted some English words and is written with Roman letters.

BULONGOA: A settlement near the northern end of Lake Nyasa, in German East Africa; station of the Berlin Missionary Society (1895), with 1 missionary and 9 communicants.

BULRAMPUR. See Balrampur.

BULUWAYO. See Bulawayo.

BUMBULI: A settlement in German East Africa, situated in the Usambara country in the northeastern part of the Colony; station of the German Evangelical Society for Missions in East Africa (1899), with 3 missionaries (one having his wife), 1 chapel, and 1 village school.

BUNGABONDAR: A settlement in the Toba district of Sumatra, Dutch East Indies, situated near Sipirok; station of the Rhenish Missionary Society, with 1 missionary and his wife, 17 native workers, men and women, 1 Sunday school, 13 village schools and 921 communicants, the most of them converted Mohammedans.

BUNGU: A settlement in German East Africa, situated in the Usambara region about 50 miles N. W. of Vuga; station of the German East Africa Missionary Society (1901), with 1 missionary and his wife.

BURLISAL. See Barisal.

BUONA VISTA. See Galle.

Burdwan. See Bardowan.

BURHANPUR. A town in the Nimar district, Central Province, India; station of the ME, with 4 native workers, 3 Sunday schools, 1 village school, and 220 professing Christians.

BURHERSDORP: A town in the northern part of Cape Colony, S. Africa; station of the South African Wesleyan Missionary Society, with 24 native workers, 2 chapels, 2 Sunday schools, 3 village schools and 164 professing Christians.

BURJU: A district in the Lohardaga section of Chota Nagpur, British India; field of the Gossner Missionary Society, with 3 missionaries, 71 native workers, 38 chapels, 38 Sunday schools, 2 village schools, 1 high school, a book depot and 8,886 professing Christians. Also written Burju.

BURMA: Within the past seventy-five years the political map of South-Eastern Asia, and especially that part lying between Tibet and Yunnan on the north and the Bay of Bengal on the south, eastern Bengal on the west and the Mekong River on the east, has been materially changed three times. At present, and for missionary purposes,
Burma may be considered as composed of Upper and Lower Burma, Upper Burma comprising the late kingdom or empire of Burma, and Lower Burma all that portion of the country below the 20th degree of north latitude, as well as the Tenasserim provinces and the present mission stations in Arakan and Shan-land in the East, the Arakanese provinces being the most eastern portion of the British Indian Empire.

Burma is drained by three great rivers and their numerous affluents: the Irawadi, with a great and increasing commerce, about 1,400 miles in length from its sources in one or more of the great lakes in the lofty Himalayas, and navigable for 1,000 miles or more by large steamers; the Sittang, of inferior length, and having, at certain seasons of tide and southwest winds, a bore at its mouth, which renders the entrance very difficult; it bears on its bosom a constantly increasing commerce, steering for Rangoon, Maulmain, Thayet-myo, and Taung-angu; the Salwen, a long and navigable river, rising in the mountains of Yunnan, China, and pursuing a course almost parallel to that of the Irawadi. These rivers are separated in their upper courses by ranges of mountains varying from 4,000 to 6,000 feet in height, but as they approach the Bay of Bengal or the Gulf of Martaban these mountains subside into broad and fertile plains, and the rivers enter the bay or the gulf by many mouths, forming rich and extensive deltas, each of a very rich soil, but often covered with a dense jungle which makes the climate sickly. The valleys of these rivers are of considerable breadth, and being well watered by their smaller affluents, are productive.

The beasts of prey are of great size and ferocity. The elephants of Burma attain a greater size than those of any other country in the world. The lion, tiger, leopard, of several species, and rhinoceros are all very destructive. The buffalo and the Brahmanee bull are trained, as are many of the elephants, as beasts of burden. Horses are few and are rarely used for draught purposes, the ox or buffalo taking their place. The rodent tribes exist in large numbers and are great pests, often destroying the rice crop in large districts. Pythons, boas, and other serpents, and especially venemous snakes, like the cobra de capello, are abundant. Lizards of all kinds are found everywhere. The birds are numerous and many of them beautiful. The insect tribes are annoying and many of them dangerous.

Burma has an area of 236,738 square miles (including Lower Burma, conquered in 1852, and Upper Burma, annexed on the overthrow of the tyrant Thebaw in 1885). Its population (1901) is 10,490,624.

There are said to be forty-two different races in Burma, but they are mainly divisible into four distinct peoples, of whom the first two are almost entirely Buddhist in religion. These are: 1. The Burmans, under which general name are included the Burmans proper, the ruling race, and the Arakanese. 2. The Talaings, or Peguans, once the lords of the country, but now greatly diminished in numbers. 3. The Shans, a generally nomadic race, but of different affinities, as Chinese, Siamese, and Burman Shans. Their national name is Tai. They occupy the eastern region of Burma, and extend into Northern Siam. 4. The Monese, or Karen, is the fourth race, the Karens, of whom there are more than thirty tribes, differing, in many respects, from each other in language, form, and habits, but all worshipers of Nats or demons. The Karens of Lower Burma readily received the Gospel, and those of them who were under Burmese rule bore courageously bitter and cruel persecution from the Burmans for its sake. The Sgau and Two tribes, who inhabit the provinces of Tenasserim and the Karens, have been largely converted to Christianity. The highland tribes of Central Burma, the Bghais, Pakus, Gecko, Toungthuis, and Red Karens, became converts at a later date.

Other tribes having few affinities with the Karens, yet, like them, worshiping demons from motives of fear, are found in Northern Burma and along the Arakan border, and are moving down the Irawadi into the vicinity of Mandalay and below, and toward Sandoway in Arakan. The largest and best known of these tribes are the Nats, who inhabit the Chins. The Negroes are said to be the fiercest and most warlike tribe in Burma. No Burman soldier dares to set foot in one of their villages, which are always situated at the summit of high hills. They are supposed to be identical with the Singphos of Assam. Yet there is no tribe to which are ascribed so considerable numbers to the power of the Gospel. It is worth noting here that in all Burman cities there is a considerable Chinese population engaged in trade, which they control.

Protestant Missions: The first attempt to plant a Protestant mission in Burma was made at Rangoon, in 1807, by Messrs. Chater and Mardon, English Baptists. Felix Carey, the eldest son of Dr. William Carey, of Serampur, joined them soon after, but Mr. Mardon left in a few months and Mr. Chater at the end of four years. The London Missionary Society sent two missionaries to Rangoon in 1808, but one died and the other removed in a year. Mr. Chater during his four years' stay translated Matthew's Gospel into Burmese, which was printed at Serampur. Mr. Carey reconstituted the mission in 1814, and then, having received an appointment and title from the Burmese emperor, he went to Ava to reside. There had been no attempt at missionary work except this translation of Matthew, and no Burman had heard that there was an eternal God. Mr. Carey's mission house stood about two miles out of the city. Rangoon was at that time a miserable, dirty town of 8,000 or 10,000 inhabitants, with houses built of bamboo and teak planks and having thatched roofs. Its only importance lay in the fact that it was the capital of a rich and extensive province, governed by a viceroy, an official of the highest rank, who was a favorite of Bhodua Phra, the most bloodthirsty and brutal tyrant and the most bigoted Buddhist who had yet sat on the Burman throne. The viceroy at Rangoon was almost as brutal, but his which occupied Phra and the Tenasserim provinces, has been largely converted to Christianity. The highland tribes of Central Burma, the Bghais, Pakus, Gecko, Toungthuis, and Red Karens, became converts at a later date.

On July 13, 1813, Rev. Adoniram Judson and wife arrived at Rangoon to open a Protestant mission there. He was a man who endured all things that he might find access to a people sunk in morasses of evil. It was not until 1819 that he was able to preach and teach religion in his zayat and receive inquirers there. June 27, 1819, he baptized the first Burman convert to Christianity, Moung Nau. In this year Bhodua Phra, the viceroy, was murdered and succeeded by his grandson, Phagyi-dau, a ruler in
equally arrogant, brutal and bloodthirsty with his grandfather, but with much less ability. His arrogance and tyranny brought on the first Burman War of 1825-26, and led to the cession to Great Britain of the lower Irrawaddy Valley and the provinces, Arakan, and Chittagong. In 1852, the second war with the English took place, and Rangoon, Pegu, and all Southern Burma became British territory. In 1853 Rangoon became again a station of the American Baptist Missionary Union, and Burrup, Rückelli, and the Society has had great success in all parts of the land. Rangoon was also the first station (established 1859) of the Burma mission conducted by the SPG. The educational work of this Society has been a high order and wide influence. The SPG is also laboring successfully among the Karens.

The ME Society has also carried on a mission in Burma since 1878, laboring especially for European colonists and Eurasians.

The WMS established a station at Mandalay in 1889, and is doing a remarkable educational work for women. It has also given attention to the lepers, maintaining an asylum which is not only a refuge but a portal to a new life to these wretched sufferers.

The TMCA and the CWCA have stations in Burma; so the Mission to Lepers, the Missionary Pension Association, the Leipzig Missionary Society; and the China Inland Mission has a single station at Bhamo, on the northern border.

It should be borne in mind that while many Burmese have been converted, the simple, more approachable Hill tribes have furnished the larger part of the Christians now found in Burma.

BURMESE LANGUAGE: The Burmese, which is spoken throughout the Burmese Empire and Arakan, belongs to the Tibeto-Burman group of the non-Aryan languages of Asia. It is used by about six million people, and, being one of the aggressive languages, it is constantly increasing the area in which it is written with its own peculiar Burmese character.

BURNS, William C.: Born in the Parish of Dun, Scotland, April 1, 1815. Graduated at Aberdeen in 1834; studied theology at Glasgow, and after a period of successful labor in Ireland and among the French in Canada, was sent out by the E. P. Synod, in 1847, as its first missionary to China. On the voyage he began the study of Chinese with the only book found in London, Williams' English and Chinese vocabulary, and a volume of Matthew's Gospel.

After spending a year or two at Hongkong and Canton, in 1851 he removed to Amoy, where and at Swatow he did a great work. Later he spent three years in Peking, and in 1867 he went to Newchwang to prepare the way for a mission in Manchuria. In a small room at an inn at that city, destitute of every comfort, he died on the 4th of April, 1868.

While Mr. Burns never interrupted his work of preaching, he accomplished important literary work. Of this we may mention a translation of the Pilgrim's Progress, and a collection of hymns in the Amoy dialect. With the aid of native preachers he put some of the hymns used at Amoy and Swatow into the spoken dialect of Fu-chau-fu. These first printed in sheet form, and used them in street and chapel preaching, and then published them in book form.

Later, in the year 1867, he published a volume of fifty hymns in the Mandarin dialect, chiefly translations of home hymns, or hymns used in the south of China. Next he put in the dialect of Peking the Pilgrim's Progress complete in two volumes. Some copies were illustrated with wood-cuts. A translation of the Psalms from Hebrew was published in 1867.

BURNSHILL: A town northwest of King-William's Town, Cape Colony, S. Africa. Station of the UFS, with 1 missionary and his wife, 2 missionary women, 29 native workers, 16 outstations, 1 chapel, 16 village schools and 1,420 church members.

BUSI: A station of the CMS in Uganda, Central Africa, situated on the Victoria Nyanza, with 63 native workers, men and women, and 184 communicants.

BUTRAH. See BASRA.

BUTARITARI. See GILBERT ISLANDS.

BUTLER, William: Born in Dublin, Ireland, January 30, 1818. Died August 18, 1899. Soon after his conversion he entered the Hardwick Street Missionary Institute and Training School, in Dublin, and afterward Didsbury College, near Manchester, where he studied theology under the venerable Dr. Hannah. After preaching several years in the Irish Conference, he came to the United States, and labored for some time in the New England Conference. In the spring of 1855 he was deeply impressed by an article published by Dr. Durbin entitled "The Crisis," urging the needs of the India Mission on the heart of the Church, and in the following autumn he offered himself as missionary to this field. He was appointed superintendent of the mission, and he sailed with his wife and two children in April, 1856. The provinces of Bellary, the Deccan, Rajputana and others were brought to the attention of Mr. Butler as especially needy on his arrival in India; but after spending several weeks in Calcutta he went to the northwest to consider the opening in Oudh and Rohilkhand. These provinces, covering an area nearly as large as England and containing a population of 20,000,000 of unevangelized people, presented an attractive field to the heroic missionary; and in Oudh, in the very stronghold of the enemy, the Mission of the Methodist Church was established. The capital of Oudh, Lucknow, had three times the population of Boston; and this city was soon to be the storm center of the dreadful mutiny. Mr. Butler, with his family, settled at Bareilly, a city of 200,000 inhabitants; but soon his work was interrupted by the rumblings of the approaching outbreak. Within ten weeks of the establishment of his work, Mr. Butler was obliged to flee for his life; and ten months passed before it was possible for him to return to his station. Khan Bahadur, who, during the mutiny, assumed the title of the Nawab of Rohilkhand, put a price on the head of each of the refugees, and, as a writer puts it, "Mr. Butler's being listed at five hundred rupees." The first meeting of Mr. Butler's mission was held at Bareilly on June 2, 1858. Three missionaries, one European helper and two natives answered the roll. Yet to this missionary was given the joy of living until he could see
one hundred thousand of the people of India accepting Christ as Lord, brought into this new life through the agency of the Methodist Missions. Returning to the United States, Mr. Butler took charge of several churches in New England, and afterward he was called to the secretarship of the American and Foreign Christian Union, an organization devoted to work in Papal lands. About this time Mr. Butler wrote The Land of the Vedas, which had a large circulation.

Seventeen years after Mr. Butler was commissioned by his church to go to India to found a mission, he was called to perform a like service in Mexico. In 1873 he entered the Aztec land, and soon his influence was felt in the City of Mexico and throughout the surrounding country. President Diaz received him personally on several occasions, and the government of Mexico gave him full protection in laying the foundation of a mission that has prospered through the years. It was the pleasure of this venerated missionary, in 1883, to return to India, and after twenty-six years he gave thanks to God at Bareilly for the growth and power of the mission that was founded in the dark days of the mutiny. He spent his last days at Newton Centre, Mass.

Butler (Miss C.), William Butler, the Founder of Two Missions, in the New York.

BUTTERWORTH: A town in the Transkei District of Cape Colony, S. Africa; station of the SPG (1853), with 1 missionary, 21 native workers, 21 outstations, and 760 professing Christians. Also station of the South African Wesleyan Missionary Society, with 1 missionary, 113 native workers (in the field of the station), 24 chapels, 14 Sunday schools, 24 village schools, 1 high school, 1 dispensary and 1,115 professing Christians.

BUXTON: A settlement in the Klondike region of the Yukon Territory, Canada; station of the CMS (1857), with 3 missionaries and their wives, 1 village school and 20 communicants.

BUYERS, William: Born in 1804, at Dundee, Scotland; studied at the Mississauga College, Hoxton; sailed June 13, 1831, as a missionary of the LMS for India; was stationed at Benares from 1832 till 1840, when failure of health required his return to England. He died at Unchadek, near Allahabad, October 4, 1865. Mr. Buyers was an able missionary, and highly esteemed as a scholar and worker. His published Letters on India and Recollections of Northern India are very valuable.

BUZACOTT, Aaron: Born March 4, 1800, at South Molton, Devon, England; studied at Hoxton Academy; sailed as a missionary of the LMS, March 13, 1827, for the South Seas; stationed first at Tahiti, afterward at Rataronga. On May 24, 1836, he and Mrs. Buzacott accompanied a band of missionaries to Samoa, to aid them in their settlement, returning to Rataronga May, 1837. Mr. Buzacott was an accomplished linguist, and much of his time was spent, in conjunction with Messrs. Williams and Pitman, in translating the Scriptures into the language of Rataronga. He contributed also largely to the preparation of a native literature. In 1846 he sailed for England, and while there he, at the request of the Bible Society, revised and superintended the printing of the entire Ratarongan Scriptures. In 1851 he returned with Mrs. Buzacott to India. In 1857 failure of health compelled him to retire from active service. Leaving Rataronga in November of that year, he went to Sydney, stopping on the way at Samoa. In July, 1860, he was appointed the agent of the Society in the Australian Colonies. He died at Sydney, September 20, 1864.

BWEMBA: A settlement on the Congo River, S. of Bolobo; station of the ABMU (1889), with 1 missionary and his wife, 18 native workers, 10 places of worship and 16 communicants.

BYINGTON, Theodore L.: Born at Johnstown, N. J., March 15, 1831; graduated at Princeton College, 1849; spent four years in the study and practise of law; graduated at Union Theological Seminary, 1857; ordained at Bloomfield, N. J., June 4, 1858, and sailed as a missionary of the ABCFM for Turkey; commenced a station at Eaki-zaghra, European Turkey, in 1859; returned to the United States in 1867 on account of ill health, and was released from his connection with the Board. He was reappointed missionary to the Board in 1874 and stationed in Constantinople as editor of the Bulgarian family weekly, Zornitsa, and as member of the Mission Committee of Publication. Failing in health, he returned to the U. S. in 1885, and died in Philadelphia, June 15, 1888. He was a preacher of impressive earnestness and excelld as an extemporaneous speaker. His largest volume in Bulgarian was on the Evidences of Christianity, which has had a wide circulation. It is probable that the Zornitsa while edited by Dr. Byington contributed as much as any other instrumentality toward the development of those characteristics that have been so prominent among the Bulgarians in their long struggle for national independence.

CABACABURI: A settlement in British Guiana north of Queenstown; station of the SPG (1835), with 1 missionary, 2 outstations and 500 professing Christians.

CAEBUANG. See Talaut Islands.

CACADU: A settlement about 20 miles N. E. of Queenstown, Cape Colony, S. Africa; station of the South Africa Baptist Missionary Society, with 2 women missionaries.

CACALOTENANGO: A town in Mexico, situated about 50 miles E. of Mexico City; station of the Mexican Mission Board, with 2 native workers, man and woman, 22 outstations, 1 chapel, 5 Sunday schools, 1 village school, a young people's society, and 175 evangelical Christians.

CACAUDROVE: A village in the northern part of the island of Vanua Levu, Fiji Islands; station of the Australian Wesleyan Methodist Missionary Society, with 1 missionary and his wife, 22 outstations, 12 chapels, 30 Sunday schools, 169 village schools, and 2,329 professing Christians.

CACHOEIRA: A town in the Province of Bahia,
Brazil, situated on the Paraguay River, 45 miles W. of Bahia de Todos os Santos. Station of the PN (1873) formerly known as St. Felix from the fact that the missionaries lived in a place of that name on the opposite bank of the river. In 1903 the station had 1 missionary, 2 nurses, 2 leprosaries with 116 patients, 4 organized churches, 2 boarding schools, 2 day schools and 153 church members.

CACONDA. See KAKONDA.

CAFRE. See KAFIR.

CAFFRA. A part of the eastern section of Cape Colony, S. Africa. Also called Kafirland.

CAIRO: A city of Egypt, situated about nine miles south of the apex of the delta, where the Nile divides into the eastern, or Damietta, branch and the western, or Rosetta, branch. The city extends from the edge of the desert at the base of the Mokattam Hills on the east to the river on the west, and southward until it joins Old Cairo (Misor Atika) on the site of the ancient city Festat. This was the site of New Babylon, said to have been founded by the Babylonians after the burning of Nineveh in 626 B.C. The new city, Cairo, was founded by Johar, the general of the Fatimite Caliph Muhammad. It was called Misr el Kahira because it is said that at the precise time when the foundation of the walls was being laid, the planet Mars, which by the Arabs is called Kahir, crossed the easternmost of the new city, and Mu'izz accordingly named it from this event. The city grew rapidly because of its position and the facility with which building material was found. It has become the largest city on the continent of Africa, and the second in the Turkish Empire, having a population of from 400,000 to 500,000.

Cairo was made the capital of Egypt in 973, and has continued to enjoy this preeminence during the many vicissitudes of 917 years. So strong was the temptation of the Ottoman Sultan Selim I. entered the city in triumph, until July 22, 1798, when, after the battle of the Pyramids, Napoleon I. entered the city, nothing of sufficient importance seems to have occurred to merit a place in history. And it was not until after Mehemet Ali was established as Viceroy of Egypt that the city began anew to enjoy prosperity. Isma'il Pasha while Khedive made great and important improvements in and around the capital, such as extending the city so as to form the new part called for him Ismaïlyeh, improving the Esbeikiah public gardens, planting trees in and about the city, and uniting Cairo with the western bank of the river by a magnificent iron bridge. Since the British occupation of Egypt, in 1882, the city has been very much improved and many handsome buildings have been erected. Among interests to the missionary, besides the Boulak Museum, is Jama-el-Azhar, which was changed from its original use as a mosque to a "university" by Caliph Aiz Billah on the suggestion of his vizier, Abu'l Fatag Yakub, in the year 378 of the Hegira, and has become the most important Mohammedan institution of learning in the world.

There is nothing imposing in the appearance of the buildings, which have an old and dilapidated aspect. They occupy a large piece of ground, and consist of an open court with colonnades on the north and south sides, which are set apart for students from West Africa. East Africa, Syria, Lower Egypt, Upper Egypt, the Sudan, and other parts of the Mohammedan world. On the east of the court is the Liwane Juma, or sanctuary, which covers an area of about 3,600 square yards, and has a low ceiling supported by 380 columns of granite and marble, but not uniformly arranged. There are 5 outstations, 15 chapels, 8 Sunday schools, 13 village schools, a Young People's Society and 740 professing Christians. Also station of the Episcopal Church in Scotland (1859), with 1 missionary, 3 missionary women, 10 native workers, 6 outstations, 88 baths, 5 village schools, 1 high school, 380 professing Christians.

CALCUTTA: Capital of British India. It stands on the east bank of the Hugli River, one
of the channels through which the Ganges reaches the Bay of Bengal, about 50 miles from the mouth of the river. The earliest mention of the name occurs in a revenue paper of the Megul emperors, in 1596, where Kalikata (Kali-Ghat, shrine of the goddess Kali) indicated a small Bengali village on the site of the modern metropolis. In 1686 the English merchants connected with the East India Company, owing to difficulties with the Mohammedan authorities, found it necessary to leave their settlement at Hugli and seek another site. Under Job Charnock, then the president of the little settlement or factory, they hit upon this site, Anglicizing the name into Calcutta. The growth of the place has continued almost unchecked to the present day; the hamlet on the eastern bank of the Hugli has thus, under the fostering care of English power, developed into one of the great political and commercial centers of the world. That portion of the city occupied by the English lies along the river front, and is adorned with palatial residences, imposing public buildings, churches of different denominations, and wealthy and well-stocked business houses. Back from the river, north and east of the English quarters, stretches the native part of the city, a mass of low, mean, and wretched huts, intersected by narrow and filthy streets, so that the saying has become current that Calcutta is a city of palaces in front and a city of pigsties in the rear.

The population of Calcutta, with its suburbs, is (1901) 1,125,400. Nearly two-thirds of the population are Hindus and nearly one-third Mohammedans, and there is a sprinkling of Buddhists, Jains, Parsees, Jews, etc.

Calcutta has been in the control of the English from the moment that Job Charnock and his associates settled there in 1686 until the present time, with the exception of a few months in the year 1756. In June of that year the city was attacked by the Mussulman ruler, or Nawab, of Bengal—Suraj-ud Daula—one of the worst specimens ever known of that class of brutal despots which is popularly supposed to thrive in the Orient. At that time the tragedy of the famous "Black Hole" of Calcutta was enacted. The wretched prisoners were thrut—146 in number—into a cell hardly 20 feet square, ventilated only by two small windows. In the morning only 23 persons were found alive. Calcutta was recaptured in January, 1757, by General Watson and Lord (then Colonel) Clive. In the same year, at the battle of Plassey, the Nawab's army was defeated by a little force under Clive, and the question of English supremacy in Bengal and throughout India was virtually settled.

The history of missionary operations in Calcutta goes back to the year 1758, just after the rebuilding of Calcutta and the establishment in Bengal of English power. In that year Rev. Mr. Kiermander, a Danish missionary, whose successful labors both of Madras, at Cuddalore and v complicated, had been interrupted by hostilities between the English and French, arrived in Calcutta, seeking a field for his missionary activity. The Calcutta Government encouraged him. He started a school and gathered 200 pupils within a year. He preached to the natives at the Serampur Baptist Mission. His baptisms at the end of the first year of work numbered 15; at the end of ten years there were 189 converts. Afterward he built a mission church chiefly at his own expense. Rev. M. A. Sherring's history of Protestant missions in India sums up his work by saying that "the seeds of Protestant missions in Bengal were sown by him, and the first fruits gathered in. He baptized hundreds of converts; he established important mission schools; he proclaimed the Gospel to the people, both European and native; he built a spacious church, and by these and other labors proved the earnestness and efficiency with which his career was begun, now a large and successful institution. The earliest direct efforts in behalf of female education were attempted in 1821. A society for promoting female education was formed in
1824 and did efficient service. The Society for the Propagation of the Gospel began operations in 1820, taking charge in that year of Bishop's College, an institution for higher Christian education projected by Dr. Middleton, first bishop of Calcutta. Then the Scotch Missionary Society, which in 1830 sent Dr. Duff to Calcutta. His energy and devotion gave an impetus to the missionary spirit in the home churches, was felt on all mission fields in India, and especially gave point and direction to educational efforts as a legitimate form of missionary work. Several schools were started in school which soon grew into a large college. In 1844, following the disruption in the Scotch Church, Dr. Duff and his associates threw in their lot with the Free Church and carried their work over into the hands of the new body. The old kirk, however, started a new mission in Calcutta, with a college of its own. In 1865 the CMS founded a college known as the Cathedral College.

Thus nearly every one of the great societies laboring in Calcutta came in time to have its institution or college for the higher education of its members. The English Church, under the influence of Christianity. The London Missionary Society early established a press, which since has passed into the hands of the Baptist Mission, and has done excellent service. The latter mission has also been fortunate in securing and wise in retaining the services of several learned and scholarly men who have devoted almost all their time to the translation of the Scriptures, and the revision and printing of successive editions. The duty of vernacular preaching both in the city itself and through the surrounding districts has been faithfully attended to, and among those who have been especially successful in this branch of work may be mentioned Lacroix, one of the ablest and most devoted of the London Society's laborers.

The American Methodist Church began work in Calcutta in 1872 under the leadership of Rev. William Taylor, afterward missionary bishop of his church in Africa. The work of this mission has been largely among Europeans unreached by the labors of other churches, those, as time has gone on, increasingly among natives also.

The transferring of books in the vernacular languages is cared for by a tract society auxiliary to the Religious Tract Society of London, while an auxiliary of the British and Foreign Bible Society provides an ample supply of Bibles in the various languages used in the city and surrounding regions.

Calcutta is thus seen to be a center of no small amount of religious and intellectual activity. Under the influence of the several agencies above enumerated, it is natural that a strong and intelligent body of Bengali Christians should have grown up in Calcutta. The influence of the native Christian community of the metropolis has been, as was fitting, metropolitan in its character. Members of this community have been found in all ranks of life—among the lawyers, merchants, writers, editors, scholars, and preachers of the country. They have established and conducted with ability a newspaper printed in English, devoted especially to the needs of the native church of Bengal and of India, and in many ways have exerted an influence on the development of Christianity which has been widely felt.

In the last thirty years society formed for sale of 11 others are carrying on enterprises in Calcutta or its suburbs: the WMS, the SDA, the Medical and Benevolent Association affiliated with the SDA, the local Bengali Mission, the Oxford Mission to Calcutta, the British and Foreign Unitarian Association, the YMCA, and, of the women's missionary societies, the Church of Scotland Woman's Missionary Association, the Baptist Missionary Association, the Baptist Zenana Mission, the CWBM, and the YWCA.

The aggregate number of missionaries of all these societies in the city and suburbs is 184 men and women, with 586 native workers, men and women. The enterprises of these missions include besides the colleges already mentioned, 86 Sunday schools, 130 common schools, 14 high schools, 5 orphanages, 3 theological schools, 2 training schools for women mission workers, 2 industrial schools and 1 hostel for native students.

The BFES maintains an agent in Calcutta and a book depot. There are 8 young people's societies, besides the YMCA and the YWCA. The professing Christians reported by these missions as connected with their churches form an aggregate of 2,783.

Caldwell, Robert: Born May 7, 1814, Died April 26, 1891. The University of Glasgow conferred upon him the degree of LL.D. He was missionary of the LMS from 1838-41, arriving in Madras, January 8, 1838. Joined the SFG and ordained deacon in Church of England, 1841, and priest in 1842 at Madras; consecrated Assistant Bishop of Madras March 11, 1877. Over forty years of Mr. Caldwell's missionary life was spent in Idayiugandi, situated in the extreme south of Tinneveli. In the early years of the 19th century the inhabitants of many villages in this district embraced themselves under Christian instruction, and large numbers were received into the church by Gericke and Sattianadan; but Caldwell found only the wreck of these congregations, which soon felt his masterful influence. In less than three years he had formed 21 congregations and 9 schools; he received converts in 31 villages, and altogether 2,000 persons were brought under regular Christian instruction. A church building society was formed at Idayiugandi in 1844, and so well did the interest of the society develop the congregations that in 1846 it was reported that the Idayiugandi Christians "could be hardly surpassed in Christian liberality by the inhabitants of any country in similar worldly circumstances." During the years 1845-7 eleven churches and fourteen schools were built in the district; and at this time Mr. Caldwell reported the proportion of inhabitants of Tinneveli who had embraced Christianity was larger than that of any other province in India. In many places entire villages renounced their idols and the movement in favor of Christianity extended from caste to caste and village to village. This description included the operations of the CMS and in 1850 the natives in Tinneveli who, largely under the influence of the SFG and the CMS, led by Caldwell and his associates, had embraced the Christian religion, in number about forty thousand persons, forwarded an address to Queen Victoria expressing thanks to God for the blessings of his grace. As missionary Mr. Caldwell had to fulfill the various offices of pastor, doctor, magistrate, and general counselor. In 1875, when the Prince of Wales visited India, he was entertained by 10,000 persons, and the address was presented to him by Mr. Caldwell.
In 1880 Bishop Caldwell consecrated a church on which he had labored with his own hands from time to time for thirty-three years; in 1883 he removed his headquarters to Tuticorin, the chief seaport in Tinnevelly, and here during this year he confirmed 585 natives in one day; and in 1887 he celebrated the jubilee of his mission at Tuticorin. Bishop Caldwell, on the death of Bishop Sargent, assumed the entire episcopal oversight of Tinnevelly. He was the author of "Companion of the Holy Communion" and of several pamphlets.

CALHOUN, Simeon Howard: Born August 15, 1804, at Boston, Mass.; graduated at Williams College, 1829; studied theology with Dr. Griffin and Dr. Mark Hopkins; ordained in 1830; left the United States the following November for the Levant as an agent of the American Bible Society; received appointment to be a missionary of the ABCFM in 1843; joined the Syrian mission in 1844 for the purpose of taking charge of the mission seminary at Abelin, on Mount Lebanon. To this he devoted his entire life. By him were trained most of the preachers and teachers now employed in the Syrian mission of the PN, besides several engaged by other societies in Syria, Palestine, and Egypt. He was also pastor of the church in Mount Lebanon. He was thoroughly versed in the Arabic and Turkish languages, and assisted Dr. Goodell in his first translations of the Bible into Turkish. He prepared and published text-books in philosophy, astronomy, and theology. He visited the United States in 1847, returning to Syria in 1849; again in 1856, returning the same year. He made his final visit to the United States in impaired health in 1875, but addressed the General Assembly on the subject of missions with great power. He expressed the hope that he should rest on Mount Lebanon, he died in Buffalo, December 14, 1875. His wife and three children were with him.

Dr. Calhoun's influence in Syria was great among all classes. Natives, whether Mohammedan or Christian, often went to him for counsel. While in college Dr. Calhoun was a sceptic and a most irreligious character, but, upon his conversion, in 1831, and up to the end of his life, he was noted for the ardor and the simplicity of his piety. His delight in the Scriptures was exceptional. Hence he was powerful in explaining them to others.

Station of the Basel Missionary Society (1842), with 8 missionaries, 5 of whom are accompanied by their wives, 71 native workers, both men and women, 6 outstations, 1 Sunday school, 5 village schools, 1 industrial school and 1,073 professing Christians. Also station of the Mission to Lepers in India and the East, with 1 home for the untainted children of lepers.

CALLOA: A city of Peru, South America, which is an important seaport, although its population has latterly become reduced to 16,000. Station of the ME, with 1 missionary and his wife, 11 native workers, men and women, 2 Sunday schools, 3 village schools and 180 professing evangelical Christians.

CALMUCKS. See Mongols.

CALVERT, James: Born January 3, 1513. Died March 8, 1592. The birthplace of Mr. Calvert was Pickering, York, England; and at his education at Malton, he was apprenticed for seven years to a printer, bookbinder and stationer. After his appointment by the Wesleyan Missionary Society he was married in March, 1838, and Mr. and Mrs. Calvert embarked for Fiji, October of the same year, with John Hunt and T. J. Jagger as associates in their courageous work. During the following December they reached Lakemba, and six months later Mr. Calvert was in charge of a wide circuit, including thirteen towns, connected by no roads, besides twenty-four surrounding islands, some of which were over one hundred miles distant, with barely a seaworthy canoe available by which to reach the savage inhabitants. He and Mrs. Calvert soon mastered the language, and they showed remarkable tact, perseverance and courage in their work among the Fijians. A printing press was sent out with this missionary party, and Mr. Calvert's thorough knowledge of printing and book-binding was now of great use to him. Soon a vocabulary and a grammar in the Lakemban dialect were ready for use. This press was moved from one island to another, and from it were issued thousands of helpful papers, while in 1847 a complete and well bound New Testament was ready for the natives. On the island of Oneata the work accomplished great good; a church and school were established, and, encouraged by the king of Naya, many of the inhabitants renounced their heathen worship and embraced Christianity. Some of these endured persecution, exile, torture, and even death rather than compromise their principles. The conversion of the daughter of the king had great influence among the natives. Mr. Calvert did much toward the abolition of killing and eating human beings, and on April 30, 1854, the chief ordered that the death-drum be hereafter used to call the people together to worship the true God. In 1857, Thakombau, the king, after dismissing his many wives and all his children, and in the name of Christ, openly accepted Christ as his Savior. One of his last acts as king was to send Fiji to the Queen of Great Britain, October, 1874. After seventeen years of labor in Fiji, Mr. Calvert returned to England, where, in 1856, he settled at Woodbridge, revising the Old Testament translation for the British and Foreign Bible Society; but the death of the ablest worker at Fiji caused him to return to his former post, where his power for good was greater than ever. In 1865 Mr. Calvert was again in England; October, 1872, he went to the South African diamond fields, where he did effective missionary work. Mr. Calvert attended the Jubilee of Christianity in Fiji in 1885. At this time there was not an avowed heathen in all Fiji. He founded 1,300 churches, 10 white missionaries, 65 native missionaries, over 1,000 hundred members, over 42,000 pupils in nearly 2,000 schools, and 104,585 church attendants, out of a population of 116,000. Largely through his personal service he saw this people abolish heathen customs and accept the true God.
CAMBODIA: A kingdom of farther India, under the protectorate of France, and forming a part of French Indo-China. It lies southeast of Siam, and includes principally the valley and delta of the Cambodian River, one of the most fertile regions of southeastern Asia. Area, 37,400 square miles. Population, 1,103,000, chiefly composed of several indigenous races, with about 40,000 Malays and 250,000 Chinese and Annamites. The chief towns are Phnom- Penh, the capital, and Kampot, the only seaport.

The early history is obscure. Toward the close of the 17th century the Annamese set apart the southern portion for Chinese who had fled from their own homes for political reasons, and were a source of disturbance to the government. This became Cochin-China. In 1787 the king of Cochin-China was converted to Christianity through French missionaries. With the aid of France he then conquered Cambodia and Annam, combining all in the empire of Annam. He favored Christianity, and allowed the French missionaries many privileges. Under his successor, however, quarrels arose with France, which occupied Cochin-China and in 1863 established a protectorate over Cambodia. Roman Catholic missions, only operated in that country.

CAMPINAS: A city of Brazil, situated at an altitude of 2,300 feet, in the sugar growing district, 60 miles north of Sao Paulo. Population, 20,000. The climate is mild and semi-tropical.

Station of the PS (1869), with (1902) 1 missionary and his wife, 2 native workers, 3 outstations, 1 school and 57 church members. Station also of the SBC, with (1902) 1 missionary and his wife, 1 native worker, 1 theological class, and 27 church members.

CAMPOS: A town in the district of Rio de Janeiro, Brazil, about 150 miles northeast of the city.

Station of the SBC (1890), with (1902) 1 missionary and his wife, 5 native workers, 10 outstations, 10 preaching places, and 702 professing evangelical Christians.

CANA: A settlement in Basutoland, about 10 miles from the boundary of the Orange River Colony; station of the Paris Association for Evangelical Missions (1873), with (1901) 1 missionary and his wife, 16 native workers, 9 outstations, 8 schools, and 725 communicants, with 360 candidates for admission.

CANADA; Baptist Missionary Societies of. See Baptist Conventions of Canada.

CANADA CONGREGATIONAL FOREIGN MISSIONARY SOCIETY: While the earlier efforts of the Congregational Churches of Canada were directed chiefly to home evangelization, a number of the stronger ones contributed to foreign missions through the LMS and the ABCFM, whose secretaries or agents appeared at the meetings of the Congregational Union, or preached by invitation in Montreal. Interest was also much excited in the foreign work by a visit, in 1870, of Rev. Dr. Mullens, Foreign Secretary of the LMS, and again, in 1874, when the first foreign missionary, Mr. Wilberforce Lee, was appointed. Mr. Lee's wife, went out, under the auspices of the ABCFM, to Constanti-

But it was not until 1881 that the claims of the heathen world upon the Canadian churches were sufficiently felt to lead to the organization of a separate Foreign Missionary Society. This society, while largely indebted to the ABCFM for advice in regard to the choice of its field, and working mainly through its channels, is yet entirely independent of the older society, holding its annual meeting at the same time and place as the Congregational Union of Ontario and Quebec, and being wholly subject to the control of its own board of directors. For the first three years it contributed through the ABCFM toward the support of the Canadian Foreign missionaries already in the field, viz. Rev. C. H. Brooks and wife, in Constanti

nople, which was the same as the Canadian Mission. Mr. Currie having been duly ordained and set apart to his work, sailed with his bride for Africa in June, 1886, but they had scarcely reached the station to which he had been appointed before she sickened and died. A memorial of her has since been erected in the form of a mission schoolhouse, known as the "Clara Wilkes Currie School," for which the necessary funds were collected by the Canadian Woman's Board. Mr. Currie afterward commenced a new station at Chisamba, and Mr. Wilberforce Lee, another alumnus of the same college as Mr. Currie, was ordained and sent out to assist him (1889). Others have since joined them and the station is recognized by the ABCFM as the special field of the Canadian Society.

There were (1902) 3 missionaries with their wives and 3 female missionaries, 9 in all. There are important schools, with an attendance of 274, more than a third of them girls; a hospital, with 4 buildings. The general evangelistic work is very prosperous.

In addition to this work in Africa a number of missionaries have gone from Canada to other fields: Turkey, China, India and Japan. The Canada Congregational Woman's Board of Missions was organized June 10, 1886, in the house of the pastor of the church in Ottawa, Ont. Its beginnings were small, but in response to circulars sent out by the president, Mrs. Macallum, requesting the churches to form auxiliaries, several existing societies sent in their adhesion, and a national auxiliary and mission boards were organized. The latter of the death of Mr. Currie greatly quickened the general interest in the mission to which she had given her life, and nearly one thousand dollars were promptly contributed for the erection of the school to her memory before referred to. Almost every church has now its auxiliary or mission band, many of them having both.

CANADA; Presbyterian Church in. See Presbyterian Church in Canada.

CANARESE LANGUAGE: Belongs to the Dravidian family of languages and is spoken by about 9,500,000 people in S.W. India. Its alphabet somewhat resembles the Tamil. It is also called Karnataka.

CANDAWU. See Tonga Islands.

CANDIA. See Crete.

CANNANORE: A city on the coast of Malabar, S. W. India, situated about 50 miles northwest.
of Calicut. It is a military post and it is remarkable for the number of its mosques, two of which are of special fame. Station of the Basel Missionary Society (1841), with (1900) 10 missionaries, men and women, and a very valuable and well-equipped church. The area of the station covers evangelistic and educational work, and connected with it are 650 baptized Christians.

CANTON: Capital of Kwang-tung Province, China, on the north bank of the Pearl, or Canton, River, 90 miles from the sea. The Chinese name for the city is Kwang-chau-fu; the foreign name is supposed to be a corruption of Kwang-tung as pronounced by the early Portuguese visitors. It is also called Yeung-sheng, the “City of Rams,” by the Chinese, in reference to a legend connected with its founding. The city proper is quadrilateral in shape, the side next to the river being a little less than two miles in length. It is surrounded by a wall of an average height of twenty-five feet, and from fifteen to twenty feet thick, in a good state of preservation, built of brick, with stone foundation. It is a universal custom in Chinese cities that the cardinal points of the compass are indicated by the principal gates. In Canton these are found to be utterly insufficient for the needs of traffic, and there are eight other gates, some of them as large and important in fact, tho not in name. The city is divided into two parts, the old and the new. In the old city are the Tatar garrison, their parade-grounds, the residences and grounds of the Governor-General and Governor, the examination hall, with its rows of low cells for the competing students, and many fine temples and pagodas. Around the city proper are the suburbs, where the business of the city is carried on, especially on the west side, which is noted for its manufactures, its business, and its wonderful stores. Along the river front, junks and boats of every description and size find wharfage and landing places, and the vast carrying trade of the West and North rivers is conducted. The streets are narrow and closed by gates, which are shut at an early hour in the evening.

The stores are usually low buildings of a story in front and two behind, the whole front of the store being thrown open to the street. The principal and some of the exceptions, public buildings, are the fine eating houses and the pawn shops, which serve also as safe-deposit vaults. The streets are well paved with slabs of granite, beneath which is a sewer. As all the night soil is removed from the city to be used on the fields, this deficient drainage does not cause epidemics. In comparison with other cities of the East, Canton is clean. The houses are built of brick of a slate color, and the ground floor is of tiles. The water supply of the city is derived either from the river or the canals which pass through the city, or from wells, whose flow is affected by the tide, which filters through the sandy soil. Pure spring water can be obtained from the hills to the north of the city. The natives never drink water unboiled, and this custom has doubtless preserved the health of the people.

No far from the walls of the city is the tomb of a so-called uncle of Mohammed, with a Mohammedan burying ground and place of worship. Opposite the city is the island of Honam, for a long time the residence of foreigners, when permission to live on the north shore was denied them.

The population is (1901) 850,000, its distinctive feature being that 300,000 people live in boats, rarely spending a night on shore. The river bank and the various canals are lined with boats of every variety and description. The landing stage is connected by a narrow bridge to the large ornamental hotel boat. These boats furnish to a great extent the means of communication. There are no horses used for that purpose, nor are the streets of the native city wide enough to permit the use of the cart of North China. The landing chair is the only means of conveyance on land, and the facilities offered by the boats are largely utilized by the missionaries, whose residences, with few exceptions, are on the river front. Opposite the western suburbs, and separated from them by a canal, is a foreign settlement on ground made over a small island by surrounding it with a retaining wall, and filling in the space enclosed. Shamien, as it is called, is laid out in fine streets with overhanging trees, bordered by beautiful lawns, and covered with the fine residences of the European merchants. Shamien is one of the most beautiful European settlements in China, and it is believed to be the site of the original foundation of the Protestant mission in the city.

The people of Canton are the most highly civilized of China, and the luxury of the city is proverbial. The shrewdness and ability of the Cantoneese as merchants has procured for them the nickname of the Yankees of China, and Canton, or one from the Canton province, compose nearly the entire number of the immigrants to the various parts of the world where the Chinese are found.

The climate is more temperate than that of any other city in a like latitude. The heat in summer averages about 92°, and the minimum winter is usually 42°. Ice rarely forms, and snow is almost never seen. April, May, and June are the rainy season; July, August, and September are the months for the southwest monsoons, which, with frequent thunder-showers, mitigate the heat. During the fall and winter the northern monsoon blows, and clear weather is continuous.

Canton, according to native annals, has existed four thousand years, and traces of its existence have been found since 1200 B.C. Its first intercourse with foreigners was in the 16th century with the Portuguese, and since then the history of Canton has been the history of China, as many important events in modern Chinese history occurred at, or were connected with, this city. The Protestant missionary enterprises at Canton are many and important. The LMS made the city one of its earliest stations by sending the Rev. Robert Morrison there in 1807. It was followed by the PN in 1844, the SBC in 1845, and the Berlin Missionary Society in 1867. The other societies now operating in the city are the WMS, the ABCFM, the UB Women’s Missionary Association, and the Scandinavian American Free Mission. These societies have in Canton and suburbs an aggregate of 55 missionaries, men and women, 196 native workers, men and women, 84 preaching places, 24 Sunday schools, 82 village schools, 4 high schools, 5 theological or other special training schools, 1 hospital, 4 dispensaries, and 1 printing house. The total number of professing Christians at Canton connected with these missions is 4,727.

CAPE COAST CASTLE: A town and fort of the Gold Coast Colony, West Africa. Until 1745 it was a Portuguese military station. Population, 10,000. The town is regularly built in a well-
wooded but poorly watered district, and has a damp, unhealthy climate. Station of the WMS, with 3 missionaries, 34 native workers, 4 common schools, and 1,240 professing Christians.

CAPE COLONY: A British possession comprising the extreme southern portion of Africa, extending northward to the boundaries of German Southwest Africa, the Bechuanaland Protectorate, the Orange River Colony, Basutoland, and Natal. It has an ocean coast line of about 1,100 miles and an area with dependencies of 221,311 square miles. The population is (1891) 1,527,224. No census was taken in 1901, but the population is estimated at 2,433,000, the European population numbering 376,987 for the whole territory. About two-thirds of the colony consists of arid plains (called Karroos) presenting many depressions, containing rich soil, which only requires irrigation to make it productive.

Included in the south temperate zone, the climate presents many varieties, but in its general character is mild and very salubrious; epidemic seldom serious, and the rainfall is equitably distributed. The basin of the Lower Orange and Great Karroo plain and the Kalahari Desert receives occasional torrential downpours, but springs are rare. Wells are sunk and a system of irrigation is necessary. The farm is the chest in the world. Vineyards produce abundantly; cereals give a fair return. The forests are confined to the margins of the colony; one-third of the population is said to engage in stock breeding. There are about 10,000,000 sheep in the country. The animals are driven north beyond the boundaries of the colony.

People: Malays were introduced by the Dutch as slaves, and are found chiefly in the seaports. The Griquas are half-castes, active, vigorous, enterprising and courageous, and superior to the aborigines in strength and stature, and number among them some of the best and some of the most desperate characters. Bushmen inhabit the western section of Cape Colony. They are remnants of the San races, are diminutive in stature, and have light, yellowish brown complexion, and are, perhaps, related to the Hottentots. They have made but little progress in civilization, and have no tribal organization. Scattered in various districts, they number, perhaps, 50,000 in South Africa. Hottentots, northerners in the western part of Cape Colony, amount to about 100,000. They resemble the Bushmen, except in stature and degree of culture. They occupy kraals, wear leather aprons and a sheepskin cloak. Tribal organization is preserved only among those beyond the boundaries of the European possessions.

By the census of 1891 there were in the Colony 732,047 Protestants, of whom 306,320 belonged to the Dutch Reformed communion, 139,055 to the Church of England, 37,102 were Presbyterian, 69,992 Independents, 106,132 Wesleyan, with Methodists, Lutherans, Moravians, Baptists and others. The Roman Catholics number 17,275, the Jews 3,000, Mohammedans 15,099. Pagan religions have over 750,000 adherents. Government grants for the support of religious worship are being gradually withdrawn.

Cape Colony having so many European residents, the missionary enterprise there is carried on by the local churches, as well as by the missionary societies from abroad. Of these missionary societies the following carry on work in the colony: The Moravians, LMS, SPG, PB, Berlin Missionary Society, Rhenish Missionary Society, Hannover Missionary Society, International Medical Association, Mildmay Mission to the Jews, National Baptist Convention, U.S.A., African Methodist Episcopal Church (U. S. A.), Episcopal Church of Scotland, Primitive Methodist Missionary Society and the Society of St. John. The whole number of places occupied as stations by these societies is 75.

CAPE MOUNT: A station of the American Protestant Episcopal Church in Liberia, West Africa (1877), with 5 missionaries, men and women, 1 native worker, 2 Sunday schools, and 8 communicants.

CAPE PALMAS: A district and town on the coast of Liberia, Africa. Seat of a missionary bishop of the PE, with schools and churches at Harper and Monrovia. On Cape Mountain, 60 miles of the ME, with 7 missionaries, men and women, 12 native workers, 11 Sunday schools, 1 high school and 645 professing Christians.

CAPE PRINCE OF WALES: A settlement in the W. of Alaska, situated on Bering Strait; station of the American Missionary Association (1890), with 1 missionary and his wife, 2 native workers, and 1 Sunday school.

CAPE TOWN: The capital of Cape Colony, S. Africa, situated at the foot of Table Mountain, on Table Bay. It was founded by the Dutch in 1651. It has a very fine harbor. The climate is moderate in temperature. Population (1891), 51,250. Station of the Moravians (1857), the South African Missionary, Wesleyan Missionary, and the Baptist Association, the National Baptist Convention, the International Medical Missions and Benevolent Association, the Salvation Army, and the PB, with an aggregate of 10 missionaries, men and women, 57 native workers, men and women, 25 places of worship, 22 Sunday schools, 18 common schools, orphanage, 1 hospital, 1 dispensary, 1 medical training class, 3 young people’s societies, and 2,971 professing Christians. The BFBS also has an agency and a Bible depot here.

CAPE HAITIEN: A seaport in the northern part of the island of Haiti. It is the second town for size in the Republic, with a population of about 29,000. It has a good harbor, leavened in by hills. Station of the Jamaica Baptist Missionary Society (1875), with 1 missionary and his wife and 48 professing Christians. The Wesleyan Western Annual Conference of the West Indies also has a missionary here. Also called Cape Haytien, or Cape Hayti.

CARACAS: The capital of Venezuela, S. Amer-
ica, founded in 1567; situated at an altitude of 3,000 feet, 8 miles (or by railway 23 miles) from La Guayra, its seaport. Population, about 70,000. Climate, very healthful. Station of the PN (1897), with 1,100,000 square miles. Also station of the CA and of the PB.

CARAITES. See CARAITES.

CARAMANLIJA: The Turkish language as spoken by the Greeks of the interior of Asia Minor, who have lost the use of their own language. Retaining, however, the Greek in their church services, they have taught the Greek alphabet to their children and are employed for writing Turkish, and have brought into that language Greek theological and ecclesiastical terms. The effect has been to produce a dialect which is named from the district of Caraman, where it has been most largely used. See Turkish Language.

CARDENAS: A seaport on the northern coast of Cuba, W. I., 25 miles E. of Matanzas, with an important trade in sugar. Population (1899), 21,940. Station of the PS (1899), with 7 missionaries, men and women, 1 school, and 45 professing Christians.

CAREY, William: Born Paulerspur, Northamptonshire, England, August 17, 1761. In his youth he worked with his father, who was a weaver, but at the age of sixteen he was apprenticed to a shoemaker at Hackleton, working at the trade for twelve years. At the age of eighteen he was led through the influence of a pious fellow-apprentice to the faith in Christ, became an earnest seeker after truth, and entered upon the study of languages. In 1786 he became pastor of the Baptist Church at Moulton, having previously preached at Paulerspur, his early home, and at Barton. His income being too small for the support of his family, he kept school by day, made or cobbled shoes by night, and preached on Sunday. At Moulton he was deeply impressed with the idea of a mission to the heathen, and frequently conversed with ministers on its practicability and importance, and of his willingness to engage in it. Andrew Fuller relates that once on entering Carey's shop he found hanging up against the wall a large map composed of several pieces of paper pasted together, on which Carey had drawn with a pen every known country, with memoranda of what he had read as to their population, religion, etc. At a very early age he had an intense desire for knowledge, eagerly "devouring books, especially of science, history, voyages," etc., and, notwithstanding his poverty, he learned Latin, Greek, Hebrew, Dutch, French, and acquired a good amount of general useful knowledge. But his heart was chiefly set on a mission to the heathen. From his ministerial brethren he received no sympathy. While at Moulton he wrote and published "An Inquiry into the Obligation of Christians to Use Means for the Conversion of the Heathen." In 1789 he became pastor of the church at Wellesley. At a meeting of the Ministers' Association at Nottingham, May 31, 1792, he preached from "Enlarge the place of thy tent" (Isa. liv. 2, 3), laying down these two propositions: "Expect great things from God" and "Attempt great things for God." The discourse produced a great impression, and the result was through the special cooperation of Fuller, Pearce, and the younger Ryland, the formation, at Kettering, October 2, 1792, of the Baptist Missionary Society. Carey's first wish was to work in Tahiti or Western Africa, but he offered to go wherever the Society might appoint him. India was selected for its first mission, and he was appointed with Mr. John Thomas, a surgeon, who had resided in the East Indies and was veteran in mission work. They embarked on an English vessel, but, on account of the objections made against missionaries by the East India Company, the commander of the ship was forbidden to take them, and they returned to land. After waiting four weeks for sail they sailed in a Danish brig from Copenhagen to Serampur, and reached Calcutta November 11, 1793. Having sailed in a foreign vessel cleared at a foreign port, he landed unobserved. Believing it to be the duty of a missionary, after receiving some help at first, to pursue his work, he bought a small house for Rs. 800, and India, relinquishing his salary, and he and his family were reduced to serious straits. Leaving Calcutta, he walked fifteen miles in the sun, passing through salt rivers and a large lake, to the Sunderbunds, a "tract scantily populated, and most of the inhabitants living on the land or in the water." He bought a piece of land, intending to farm the land and instruct the people. Here he was found by Mr. Udney, of the Company's service, a pious man and a friend of missions, who offered him the superintendency of his indigo factory. As he would have not only a large opportunity for the advancement of the gospel, but also a regular congregation of natives connected with the factory, he accepted the offer. The factory was at Mudnabatty, in the district of Malda, and this became the mission station. During the five years he spent in the factory and on the New Testament into Bengali, held daily religious services with the thousand workmen in the factory, itinerated regularly through the district, twenty miles square and containing 200 villages. His first convert was Ignatius Fernandez, of Portuguese descent, who built a church in 1797, and preached and labored as a missionary until his death, in 1829, when he left all his property to the mission. In 1799 the factory was closed in consequence of an inundation. While perplexed as to what he should do, Mr. Carey heard that four missionaries had arrived at Serampur, and that the Danish governor had proposed that they establish a mission there, promising him protection. They urged him to leave Malda. He assented, and removed to Serampur. In 1801 the Bengali translation of the New Testament was printed by Mr. Ward, and a copy presented to the Marquis of Wellesley, the governor-general, who expressed his great gratification at this result of missionary work. About this time Fort William College was established at Calcutta, and Mr. Carey was appointed by the Marquis tutor of Serampur, Bengali, and Marathi. This position he held for thirty years, and taught these languages. He wrote articles on the natural history and botany of India for the Asiatic Society, to which he was elected in 1805. The publication of the entire Bible in Bengali was completed in 1809. That which gave Carey his fame was the translation of the Bible in whole or in part into twenty-four Indian languages or dialects. The Serampur press, under his direction, rendered the Bible accessible to more than three hundred millions of human beings. He prepared also numerous philological works, consisting of grammars and dictionaries in the Sanskrit, Marathi, Bengali, Punjabi and Telugu dialects. His Sanskrit dictionary was destroyed by fire in the printing establishment. He contribu-
uted also several papers on grammar and East Indian matters to the *Journal of the Geographical Society*, in London. Carey had for years sought through Lord Wellesley the abolition of the widow's delay.

In 1829 it was abolished, and the proclamation declaring it punishable as homicide was sent to Dr. Carey to be translated into Bengali. The order reached him as he was preparing for public worship on Sunday. Throwing off his black coat, he exclaimed, "If I delay an hour to translate and publish this, many a widow's life may be sacrificed." Resigning his pulpit to another, he completed with his pundit the translation by sunset.

Dr. Carey's work was now finished. After forty years of toil he passed away at the age of seventy-three, June 9, 1834. He was buried the next morning in the mission burying ground.

He, who was ridiculed and satirized by the witty Sydney Smith in the *Edinburgh Review* of 1808 as the "consecrated cobbler" and "maniac," accomplished a work for which he is held, and will be forever held, in high honor as the true friend and benefactor of India.

**CARISBROOK**: A station of the Moravians in Jamaica, West Indies (1885), situated in the parish of St. Elizabeth in a somewhat hilly and pleasant part of the island. The station has 13 native workers, men and women. 3 places of worship, 3 Sunday schools, and 151 communicants.

**CARMEL**: A station of the Moravian Missions (1887) in Western Alaska, near Fort Alexander. It now has 6 missionaries, men and women, 3 chapels, 1 common school, and 107 communicants.

**CARNARVON**: A town of 1,700 inhabitants in Cape Colony, S. Africa, situated in a mountainous district about 325 miles N. E. of Cape Town. It is occupied as a station by the Rhinish Missionary Society. The working force consists of 1 missionary and his wife and 3 native workers. These serve as instructors to a body of 666 baptized Christians in the town and neighboring regions. 300 communicants.

**CAROLINE ISLANDS**: A group of islands in the Pacific, northeast of New Guinea and west of the Marshall and Gilbert groups. A few of them differ from the great majority of the islands of Micronesia in that they are of basaltic formation, while the rest are coral reefs. Kusaie and Ponapi have mountains two to three thousand feet high. Ruk is an immense lagoon 100 miles long, containing 10 large islands and many islets. Yap is also one of the high islands. The climate is perpetual summer, the thermometer ranging from 72° to 90°. On the coral islands the chief products are the coconut palm, often growing to a height of 80 feet, the breadfruit tree, the pandanus tree or screw pine, bearing a large bunch of juicy fruit, and an edible root called taro. On the high islands, especially Kusaie and Ponapi, there is a much larger range of products, including more than a dozen kinds of bananas. Various tropical fruits are introduced, and also some domestic animals, as pigs, chickens, and goats.

The inhabitants are of the brown Polynesian race, having straight hair. As no census has ever been taken, estimates of population vary greatly. Ponapi has a population of 5,000, the Mortlocks and Ruk about 14,000, Molik and Beelap about 8,000, and the other islands 10,000.

The languages of different parts of the group are quite distinct but with affinities pointing to a common origin. They are not easily reduced to writing because of the shading of vowel sounds. This has been done, however, so that introduction of Christian ideas has meant resuscitation to the language and new life to the people.

Spirits of ancestors and other spirits were worshiped, but no idols. The people were very superstitious, but had no conception of a Supreme God, and had no idea of sacrifice. Certain places regarded as the abode of spirits were not crossed. Some islands had priests, who in times of sickness and on special occasions practised their incantations, pretending to converse with the dead.

Missionary effort began on Ponapi and Kusaie in 1852 by the ABCFM. Twenty years later there were 250 church members on Ponapi and 226 on Kusaie. From the first a missionary spirit was cultivated in the converts, and when the evangelistic effort was to be pushed westward to other islands, native missionaries from Ponapi were the agents used, furnishing one of the most interesting chapters in mission annals.

Political changes have hindered the progress of evangelization in these islands. Many of the islands have chiefs, whose authority is hereditary. On Ponapi there are several tribes, each having an independent king or chieftain. But in 1885 Spain laid claim to the whole group, and Germany had done to the Marshall Islands, and in the summer of 1886 took possession of Ponapi and later expelled the missionaries. In 1899 Germany purchased the Caroline Islands from Spain. In 1900 the missionaries returned to Ponapi. But these political changes have introduced to the people new types of white men, and the islanders have not been benefited by the acquaintance.

At present the force of workers consists of 24 missionaries, men and women (nine of them unmarried women), and 135 native workers (nine married and 126 unmarried). The missionaries live upon Kusaie, Ruk and Ponapi, but their work takes in many other islands of this group. There are 57 outstations, with 99 schools, 2 printing houses, 2 dispensaries and 5,500 communicants in the various churches.

**CARSHUNI**: See SYRIA.

**CARTAGO**: A town of 9-10,000 inhabitants, 13 miles E. of San José, Costa Rica, Central America. It was founded in 1553 and is situated in a fine valley at the base of Mt. Irazú, an active volcano. Station of the Jamaica Baptist Missionary Society (1901), with 1 missionary.

**CARTHEN, Rev. Thomas H.**: Was a Cornishman, born in 1856, and died in November, 1896. His boyhood was spent in the country of Durham, and when a very young man he entered the Christian ministry, pursuing a college course near his native place. In 1883 he united with the Free Methodist Church, and, after a brief stay at Oxford, he was appointed as missionary to Sierra Leone. After four consecutive years in a most promising work, he returned to England in 1887; but soon after his return he learned of the great need of Christian work in East Africa, and without waiting for a formal appointment to this field, he entered it with characteristic zeal and enthusiasm. Here he labored for ten years.
He was a man of strong individuality, and while oftentimes acting independently of the Mission Board at home, he always commended himself by his faithful and untiring efforts. Soemming in the midst of a useful career he closed his earthly labors in 1896.

**CasaBlanca**: A small seaport on the N. W. coast of Morocco, 56 miles S. W. of Rabat. Station of the NAM (1890), with a hospital in charge of 7 missionaries, men and women. The local market is Dar al Beida.

**Cashmir.** See Kashmir.

**Cashmir Language.** See Kashmir.

**Cassa**: An island off the coast of French Guiana, W. Africa; station of the Pongas Mission (1882), with 1 missionary and his wife, 2 native workers, man and woman, 2 chapels and 2 high schools.

**Cassergode**: A town on the coast of South Kanara, India, 28 miles south of Mangalore. Population, 6,400. Station of the Basel Missionary Society (1856), with (1902) 2 missionaries and their wives, 42 native workers, men and women; 103 converts and 11 common schools with 727 pupils.

**Castleton**: A town in the island of Jamaica, W. I.; station of the CBWM, with 1 missionary and his wife, 1 common school, 1 Young People's Society and 430 baptized Christians.

**Catharina Sophia**: A village in Surinam, South America. Its climate is damp and rather unhealthy, the rainfall during the year averaging 79 inches. About the year 1849 the missionaries of the Moravian Church obtained permission to visit the plantations on the lower Savannah. A work of itineracy was at once commenced, and the labors of the brethren were greatly blessed. The managers of the Catharina Sophia Plantation, which at that time belonged to the government, were kindly disposed toward the missionary and assisted him in every way. In 1855 the government offered to hand over to the Moravian Church authorities a chapel and a dwelling house for a missionary, which had been built of pitch-pine in Holland, and brought out to Surinam. 220 Chinese of emigrants, most of whom had left the place. The offer was thankfully accepted, and the chapel was consecrated July 22, 1855. The congregation here consists of negroes, Chinese and East India coolies; there are now 1 missionary and his wife, 27 native workers, and 383 communicants.

**Catorce**: A mining town in Mexico, situated at an altitude of 8,800 feet, 120 miles north of San Luis Potosi. Station of the AFFM (1898), with 1 missionary physician and his wife, 2 native women workers, 1 common school and 1 Young People's Society.

**Cato Ridge**: A settlement in the northern part of Cape Colony, S. Africa; station of the South African Wesleyan Methodist Missionary Society, with 35 native workers, 6 places of worship, 2 common schools, 1 Young People's Society, and 385 baptized Christians. Also station of the Netherlands Missionary Society, with 2 missionary women and 1 common school.

**Caucasia**: A province of southeastern Russia, bounded on the north by the provinces of southern Russia and Astrakhan, on the east by the Caspian, on the south by Persia and Turkey, on the west by the Black Sea and the Sea of Azof. It is divided into two sections by the Caucasus range of mountains, that on the north being called Northern Caucasus, and that on the south Trans-Caucasia. Area, North Caucasus, 86,658; Trans-Caucasia, 95,799; total, 182,457 square miles. The population in 1897 was 9,723,523. It is composed of very heterogeneous elements. The languages found in the Caucasus are numerous. The Russian government is making efforts to increase the use of the Russian language. Ararat Armenian and Azerbaijan Turkish are extensively used in the southern part of the region. As to religion many dissenters of the Russian Orthodox Church are found in Trans-Caucasia, which has been used as a place of exile for such. The Armenian Church has a large body of adherents there, and there is also a large Mohammedan population. There are small Protestant congregations at several points in the southern provinces.

Mission work has been attempted at various times in Trans-Caucasia by the Basel Missionary Society, the German Baptists and the missionaries of the ABCFM and PN, whose headquarters were in Persia and Turkey. Since the opening of the railroad between Batum and Baku, and the extension of the Caspian at Baku, missionaries have found that route most convenient for access to Persia. They have thus come in contact with a Nestorian colony at Tiflis, and the Armenians at Tiflis, Erivan, Schemachi, Shusha and Baku. The British and Foreign, and American Bible societies have done a good deal of Bible work from Tiflis as a center. Protestant influence has been most powerful among the Armenians.

**Cavalla**: A settlement in the county of Cape Palmas, Liberia, W. Africa; station of the PE (1839). It was formerly the headquarters of the PE mission in the county. During the irruption of the heathen tribes (1887-1896) the station was broken up, the settlement devastated and the mission buildings destroyed. It is now (1901) occupied by 1 missionary and 3 native workers. There is 1 primary school, 1 place of worship and 116 communicants.

**Cawnpur**: A city in the United Provinces, India; entirely a British creation. It lies on the right bank of the Ganges, 130 miles above the junction of that stream with the Jumna. A body of English troops was stationed near this point something more than a hundred years ago; it being then on the frontier of the English territory. Around the camp, as its nucleus, a city sprang into being. It is now of great importance both as a railroad center and a manufacturing place; leather and cotton goods — especially the former — are produced here in large quantities. The chief historic interest centers about the memorial gardens, which occupy the site of the entrenchments within which a body of about 1,000 English (only 400 of whom were capable of bearing arms) took refuge from the native troops under Nana Sahib during the mutiny of 1857. The exact spot of the entrenchments is occupied by the memorial church; and the place of the well into which some 200 bodies were thrown, mostly women and children — the victims of Nana Sahib's massacre — is marked by a marble angel.
and a suitable inscription. Population (1901), 197,170, of whom about 125,000 are Hindus.

CAYMAN BRAC: One of the Cayman Islands, off the N.W. coast of Jamaica, W. 1. It has a large export trade in coconuts. Station of the Jamaica Baptist Missionary Society (1887), with 1 missionary and his wife, 6 places of worship, 330 communicants.

CEDARHALL: A station of the Moravian Missions, in the western part of the island of Anti-
gua, W.I., established in 1822. At present (1900) under care of 1 missionary and his wife, with 14 native workers, men and women, 2 ele-

matory schools, and 358 communicants.

CEDAR LAKE: A settlement in the territory of Saskatchewan, Dominion of Canada; station of the CMS, with 1 missionary, an elementary school, and 62 communicants.

CEDRAL: A village near Catorce in the state of San Luis Potosi, Mexico; station of the American Friends Foreign Mission Association (1805). The working force is 1 missionary and his wife, 1 missionary woman and 3 native workers, with 1 chapel, 2 Sunday schools, a Young People's Society and 33 professing Christians.

CELEBES: An island of the Malay Archipelago, under the control of the Dutch, situated east of Borneo, and, like it, crossed by the equator. Area, 71,150 square miles. The interior is elev-
ated and generally mountainous; the coast is low and exceedingly rugged in its outline. The island is well watered by small streams, and crossed by a narrow river, the Kapuas, which is estimated at 1,500,000. They are true Malays for the most part, Mohammedans in religion, and speak the Bughi and Macassar languages, for which they have two different written characters. The Bughists are wild and savage in appearance, but of a quiet and peaceable disposition. The abor-

igines of North Celebes are classed with the savage Malayis, and so the civilization influence of the Dutch has greatly promoted their advance-

ment. They make obedient servants, are gentle and industrious, and readily assume the manners and habits of civilized life. The island was prob-

ably discovered in 1525 by the Portuguese. The first intercourse with the Dutch was in 1607; in 1627 they established a station for 70 years. The district of Minahassa, where the Dutch Government Mission of the 17th century had made some converts, has been entirely Christianized. There are about 150,000 Chris-
tians in the island, 35,000 of them being communi-
cants. This whole district has now been given up by the missionary Society, its Christian
institutions being supported by the Colonial State Church as a government charge.

CENTENNIAL: A station of the LMS (1897) in Rhodesia, Africa, about 90 miles west of Bulawayo, with (1901) 1 missionary, 2 native workers and 2 elementary schools.

CENTRAL AFRICA PROTECTORATE. See NYASALAND.

CENTRAL PROVINCES of India: This chief commissionship lies, as its name implies, at the very heart of India. Its limits of north latitude are 17° 50' and 24° 27', of east longitude, 76° and 85° 15'. Its greatest length is 600 miles, from east to west, while its longest north and south line measures 500 miles. The population is chiefly (94 per cent.) rural. Only six towns have a population exceeding 20,000. The most interesting fact regarding the Central Provinces is that it is a large area of which the old, and especially the northern frontier, provided the refuge to which many of the aboriginal tribes resorted when too severely pressed upon by the later Aryan immigrants. These aboriginal tribes were largely of the Gond stock, and before the present political divisions came into existence, a large part of what is now known as the Central Provinces was called, after the name of this great family of tribes, Gondwana. Yet of the entire population of the Central Provinces, these aborigines form but a comparatively small element, consisting only of those who have embraced Hindooism as well as those still persisting in the old worship of their people; the last (1901) census enumerated only 7,744,556. Hindus number 9,745,579, Mohammedans 307,202 and Jains 18,183. It is worthy of note that while in this province Hindus, Mohammedans, Spirit Wor-

shipers, Jains, and Buddhists all fell off in number in the decade 1891-1901, the Christians increased in the same time from 13,308 to 25,591, or 99 per cent.

The first mission was planted at Nagpur by the Free Church of Scotland in 1844. The country was then governed by a dynasty, and the native rajah claimed to have absolute authority over his subjects, which in his opinion involved the right to prevent the baptism of Christian converts. The supreme government of India was appealed to by the missionaries, and public opinion interceded; but public opinion became so aroused that the Nagpur prince finally receded from his position. The Church Missionary Society began work at Jabalpur in 1854, and it has since occupied
other stations. The German Evangelical Synod (US), the Swedish National Missionary Society, the FFMA, and the ME also have important work in this province. Altogether 12 Protestant missionary societies occupy 29 stations in the Central Provinces, with 142 missionaries, men and women. In 1866 a colporteur, in a journey of 200 miles, entered many large villages and saw but two schools, with hardly 40 pupils. In 1901 the schools conducted in connection with these mission stations alone number 116 of all grades.

CERRITOS: A village near Guadalacara, in the State of San Luis Potosi, Mexico; station of the Associate Reformed Presbyterian Church of the South (1901), with 2 missionaries (one a physician), 1 missionary's wife, and a dispensary.

CESAREA. See KAIARIYEH.

CEYLON: The island of Ceylon lies between 5° 53' and 9° 51' north latitude, and 79° 41' and 81° 55' east longitude. It is somewhat smaller than Ireland, being 270 miles long and 140 wide, and containing 25,333 square miles.

The greater portion of the island consists of great plains, for the most part heavily wooded. They occupy the northern half of the island and reach south on each side of the mountains, completely encircling them with a plain of from 30 to 70 miles in width. At the extreme north lies a group of small coral built islands commonly called the peninsula of Jaffna, which have an importance as one of the centers of population and of mission work. The southern central part is occupied by a group of mountains rising to the height of over 8,000 feet. Adam's Peak, the most prominent of these, 7,352 feet high, has on its top a mark said by Hindus to be a footprint of Siva; by Buddhists, of Buddha; by Moham medans, of Adam.

The Climate is very hot on the coast, but cooler in the mountain region. Owing to the surrounding sea, the temperature is extremely uniform, and the climate is not considered unhealthy for Europeans. The seasons are two—a wet and a dry, whose time is governed by the two mon soons. The northwest monsoon blows from October to May, the southwest from May to October. The rainfall in the north and south is small, but in the mountain region, especially on the southwest slope, it is large.

Ceylon is an English crown colony, ruled by a governor, aided by executive and legislative councils. Most of the higher officials are English, but the natives who are fitted for it are admitted to office.

The Singhalese are said to have emigrated from Oude in 543 n. c. A kingdom was founded, records of which, as minute and as dry as the Saxon chronicles, were carefully kept. In 538 the Tamils, who had frequently invaded Ceylon, established a kingdom in Jaffna. In 1505 the Portuguese first landed in Ceylon, and in 1518 acquired possessions in it. In 1658 their territory passed into the hands of the Dutch. The English gained possession of the island in 1796, and in 1815 the Kandian kingdom, the last vestige of native rule in Ceylon, fell into their hands. The population of Ceylon (1901) is 5,576,900, divided into two, 2,334,817; Tamil, 925,237; Moormen (Mohammedans, mostly descendants of old Arab traders), 224,719; Veddas, 3,215; European descendants, 23,312; Europeans, 9,583. The great centers of population are the western coast, from Negombo southward to Point de Galle; certain portions of the mountain region, and the northern extremity, Jaffna.

The two principal races of the island, Singhalese and Tamil, differ widely from each other, not only in language and religion, but in vigor, intelligence, and personal characteristics. The Tamil is very industrious, and enterprising, so far as that word can be applied to any tropical race. Besides inhabiting exclusively the northern part of the island, the Tamils form the bulk of the laboring population in the cities, while the same race from South India supply the tea estates of Central Ceylon with almost their entire force of labor. The Tamils of the overcrowded peninsula of Jaffna push into other parts of the island in search of employment. Often they have a fair knowledge of English, and sometimes rise to honorable positions.

The Hinduism of the Tamils in Ceylon differs but little from Hinduism in South India. Like all the Dravidian races who have adopted the creed of Brahmanism, the Tamils retained much of their old worship of demons and nature. Devil trees and devil temples are common, and popular folklore consists largely of stories of the freaks of these demons. There is less of caste in North Ceylon than on the continent of India, tho even here it is the most difficult thing for Christianity to overcome. The Brahmans have here less influence than in India.

The Singhalese, occupying the southern and western parts of the island, are far less vigorous and energetic than the Tamils. Probably few races on the globe possessed of any degree of civilization have greater listlessness and indifference, greater torpidity of intellect and conscience, than the Singhalese. The religion of the Singhalese is Buddhism of the 'Lesser Vehicle,' and more akin to that of Siam and Burma than to that of Tibet and Eastern Asia. It has borrowed from its neighbor, Hinduism, so that temples to Hindu gods exist in some places by the side of temples to Buddha. The Singhalese have also, like their Tamil neighbors, retained the lower forms of superstition which Buddhism nominally displaced, so that demon-worship is still practised among them. In recent years the Buddhist clergy of Ceylon have shown considerable energy in moving the people to resist the progress of the 'Lesser Vehicle.' There have also been writings and polemic address a feature of their enterprise, aided in this by western enemies of the Gospel doctrine. They have also issued tracts and undertaken to teach the children religious dogma.

Ceylon has been mission ground for nearly 400 years, and has been the victim of some of the most remarkable experiments in Christianization that the world can anywhere show. Its missionary history may be divided into three epochs, corres ponding to the governments which held it: the Portuguese, the Dutch, and the English.

Soon after the arrival of the Portuguese, Franciscan monks followed, and Colombo was made the seat of a bishopric. In 1544 St. Francis Xavier preached among the Tamil fishermen of Mannar, in the kingdom of Jaffna, and baptized between 1,500 and 2,000 of them.

Perhaps the chief means used by the Portuguese in Christianizing the Ceylonese is hinted at by the old historian, who says that many became Christians "for the sake of Portuguese gold." It is certain that bap-
tism was made the gate to profersion, and was regarded by the people as a political rather than a religious ceremony. To this day Catholic processes, which have a suspicious resemblance to those of Hindoism, are perpetuated in Jaffna.

With the conquest of the Dutch the palmy days of Roman Catholic Hindoism were banished. The priests were expelled, Roman Catholic rites forbidden on pain of death, and the people were commanded to become Protestants. No unconverted person was allowed to hold office or to own land, while Roman Catholics were placed under greater disabilities than the Buddhists of the south. The priests to the Protestant Church were numbered by the thousands. Again the Hindus of the north accepted the government religion with more readiness than the Buddhists of the south. But before long it was found that the converts were only Christians in name, and still held the beliefs and practised the rites of their old religions. Indeed, little was or could be done for their instruction. This state of things called forth the condemnation of the Classis of Amsterdam. Before the close of the Dutch period, the number of the Christians dwindled, and the ministers themselves plainly saw the uselessness of the course of compulsion taken by their government. No sooner had Dutch governors been driven from Ceylon than everywhere, except in a few large towns, the whole system collapsed, temples were rebuilt, and the people gladly laid aside the last remnants of "government Christianity."

After the occupation of Ceylon by the English the BMS was the first Protestant missionary society to enter that field (in 1812). Its work is mainly among the Singhalese. The WMS sent its first missionary to Ceylon in 1814, and it soon took up work in the north and the extreme south of the island in order to reach both Tamils and Singhalese. The ABCFM entered Ceylon, concentrating effort at Jaffna, when its missionary, Newell, was excluded from Bombay in 1813. The CMS mission for both Tamils and Singhalese was commenced in 1818 in Jaffna, in Kandy, and in Galle. The SPG took up work in Ceylon in 1838, laboring in connection with the Bishop of Colombo. In 1856 the Salvation Army established itself in Ceylon, with a tent mission in Colombo, and mission stations in most of the large towns. The YMCA and YWCA each have representatives in the island. The total number of Christians connected with the various missions is not far from 30,000. The total of Christians of all denominations shown by the census (1891) is 302,127.

Mission work has had peculiar difficulties to encounter in Ceylon. In addition to the abominations of Hindoism in the north, the fatalism of Buddhism in the south, and the torpidity of the tropics in both parts, there were the false impressions of nearly three centuries of "Government Christianity" to be rooted out before the seeds of a spiritual conception of Christianity could take root. This, however, has been done. While there is still much to be desired in the churches, there are many illustrations of pure, firm Christian life. The seldom obliged to leave their homes and villages, as often in India, the converts have endured tests not less strong, in the daily influence of those about them. That so many of the Christians have, under these adverse circumstances, held their profession unsnatched, is a matter of wonder. A good proportion of the churches support their own pastors and teachers. In Christian families there is a beautiful custom of taking a handful of rice from that to be prepared for each meal and setting it aside to be given to the Lord; and it is no uncommon thing for a man to pledge a month's salary for some special object in the church.

In comparison with either Hindoism or Buddhism, Christianity still appears very weak. But its growth cannot be counted by numbers alone. It is confessed, even by those opposed to Christianity, that the strength of the native religions is being sapped, and that the ultimate triumph of Christianity is only a matter of time.

CHAIJABA: Chief town of Singhbhum district, Bengal, India. Population (1891), 6,900, of whom 4,000 are Hindus and the most of the remainder are Mohammedans. A large fair is held annually, and is attended by the Mohammedans at Christmas time. Station of the Gossner Missionary Society of Germany, with 1 missionary, 38 native workers, 16 schools, and 1,312 baptized Christians.

CHAINPUR: A town in the Shahabad district of Bengal, India; situated about 120 miles S.W. of Patna, near the western border of the province. Station of the Gossner Missionary Society (Germany), with (1900) 2 missionaries, 34 native workers, 20 schools, 2 elementary and 1 high school, and 3,124 baptized Christians.

CHAKA: A settlement on the W. side of Penja I., off the eastern coast of German East Africa; station of the Anti-Slavery Committee of the Society of Friends (England), with 2 missionaries, 2 missionary women, 1 elementary school, 1 orphanage and a dispensary.

CHAKRADHARPUR: A town situated 20 miles N. W. of Chaibasa, in the Singhbhum district of Chota Nagpur, India. Station of the Gossner Missionary Society, Germany, with 18 native workers, 18 baptized Christians.

CHALDAIC LANGUAGE: A dialect of the Modern Syriac.

CHALDEAN CHURCH: Name taken by those Nestorians of Mesopotamia who seceded from their own church in 1786 and accepted the supremacy of the Pope of Rome. This secession was led by the Nestorian Patriarch of Mossul, whose hereditary and official name was Mar Elias. The conditions on which these Nestorians submitted to Rome included the recognition of the orders of their clergy, and the privilege of using their ancient liturgy. The jurisdiction of the province was continued under the title of Patriarch of Babylon, but it soon ceased to be hereditary in the family of Mar Elias. The liturgy has been gradually modified in some respects, and at present the Chaldean Church is quite fanatically opposed to all forms of Christian rationalism. The Nestorians for whose preservation their fathers stipulated. The number of Chaldeans hardly exceeds 75,000.

Laurie (T.), Dr. Grant and the Mountain Nestorians, New York.
CHALMERS, James: Born August 4, 1841. Died April 8, 1912. At the age of fourteen he entered a law office at Inverness, and it is said about this time that his great interest in foreign missions was aroused by a letter from a missionary in the Fiji Islands. So powerful was the impression made upon him by this letter that, in his way home from the religious service he attended on that day, he stopped and, kneeling on the floor, prayed that God might make him a missionary to the heathen. After his conversion he spent three years in study, during which time he was engaged in mission work, and then he was accepted as a candidate by the London Missionary Society, entering Cheshunt College where about twenty-one to prepare for the foreign field. Leaving Cheshunt at the end of his second year, he completed his training in the institution at Highgate conducted by the London Missionary Society. In January, 1866, he and his bride set sail for Raratonga, and arrived there in the Cook group in the Southern Pacific. After a series of mishaps their ship became a total wreck on the reef at Savage Island (Niut), and they finally arrived at Raratonga in the ship of the piratical Captain Hayes, one year and four months after leaving England. When Chalmers arrived at Raratonga he found that the natives had been raised from a condition of fierce savagery to a state of semi-civilization through the efforts of John Williams (1823) and Pitman and Buzacott; but immorality, especially drunkenness, still was rife. His time was largely occupied by his classes for the training of native teachers and by visiting the different stations on the island on preaching tours; but he considered his work at Raratonga as a course of preparation for missionary labors in New Guinea, where heathenism and savagery were rampant. In May, 1877, under the London Missionary Society, he and his wife sailed for their new field. Their first settlement was made at a point on the bay lying between South Cape and Suau. By his remarkable tact and personal magnetism, he soon disarmed the suspicions of the people; a house of worship was erected in a short time, and at the end of two years the work at Suau was sufficiently advanced to be left in the care of a teacher. His time was spent in constant journeys to new fields, and one of the most important of these trips was his visit to the natives of Motumotu, a district on the coast some distance west of Port Moresby, where the people were especially fierce and bloodthirsty. His numberless perils by land and sea he referred to simply as “the pepper and salt” which gave zest to his further and greater efforts. And his associate, W. G. Lawes, worked well together, the one discovering and opening new fields, the other mastering and reducing to working form the language, and training teachers for the work on those fields. In 1882, after making a visit to his old station, Chalmers was able to write: “For over two years there have been no cannibal ovens, no feasts, no human flesh, no desire for skulls. Tribes that could not formerly meet, except to fight, now meet as friends and sit down side by side in the same house, worshiping the true God. Chalmers was able to write: “For over two years there have been no cannibal ovens, no feasts, no human flesh, no desire for skulls. Tribes that could not formerly meet, except to fight, now meet as friends and sit down side by side in the same house, worshiping the true God.”

CHAMBRA: A town in the Punjab, India, at the foot of the Himalayas, 75 miles E. of Jammu. Population, 6,000, of whom 4,700 are Hindus and 1,200 Mohammedans. Station of the Church of Scotland Foreign Mission Committee (1863), with 5 missionaries, men and women (of whom 3 are physicians), 11 native workers, 6 common schools, 1 dispensary, and 33 communicants.
beyond what usually falls to the lot of those who serve Him in mission fields, a man to whom was revealed the secret of touching men's hearts.

Young Chamberlain first went to Brazil for his health. He had no idea of remaining, but was soon infected by Mr. Simonton's enthusiasm, and returned home to Brazil for Christ with all the enthusiasm of an impetuous, ardent nature. Wife, children, friends, means, all the energy of his nature, were swept into the campaign.

The story of his life, when written, will make an inspiring book and will cover the essentials of the history of the Presbyterian Mission in Brazil. In Rio, São Paulo, Parana, Bahia, Sergipe and parts of Minas he is the best known of American missionaries, and the indelible evidences of his work are found all over this vast area. He may justly claim to be the builder of churches and the founder of their ministry.

Of great courage, matchless enthusiasm and tireless energy, he traversed the dangerous regions of the interior, on mule back, before the days of railways, and, the repeatedly stoned, driven from the towns and threatened with death, he invariably returned and delivered the message, won hearts, and churches grew up in his wake. He was a peerless evangelist, pioneer and pathfinder.

CHAMBERLAIN, John: Sailed for India as a missionary of the English Baptist Missionary Society in May, 1802, reaching Serampur January 27, 1803. He had great aptitude for acquiring languages, and his progress in Bengali was so rapid that in a year he could speak it with an accuracy equal to that of many of the older missionaries. In January, 1804, he visited Saugur Island, where thousands were gathered at the annual religious festival. To these people he and his associates preached the Gospel and gave books and tracts. In the spring of this year he was stationed at Cutwa, 75 miles north of Calcutta. In reviewing his labors he says: "It is now five years since Providence fixed my lot here. Millions have heard of saving grace through the glorious report, either from preaching or from the distribution of upward of a hundred thousand tracts and many hundreds of the Scriptures." In addition to this work he had a school of 40 pupils, for whose benefit he translated Dr. Watts' catechism and a few hymns. He also made several visits to Berhampur, a military station 45 miles from Calcutta, preaching the Gospel to the soldiers, among whom he gathered a church of 24 members. On account of his facility in acquiring languages, his knowledge of the original Scripture, an excellent knowledge of the languages connected with the Hebrew, and his zeal and experience in missionary work, he was sent in 1809 to Agra to establish a new mission. His health having failed, he sailed for England in 1827, but died on the passage.

CHANDA: Chief town of the Chanda district, Nagpur division, Central Provinces, India. It is surrounded by charming scenery, but is subject to many fevers. In the autumnward tropical fair is held here in April. Population, 16,200, of which number 14,600 are Hindus. Station of the Episcopal Church in Scotland (1898), with 2 missionaries, 5 native workers, an orphanage, and a hospital.

CHANDAG: A village in the Kumaon district, United Provinces, India, situated among the lower spurs of the Himalayas not far from the boundaries of Kashmir. It has been the scene of the brave and effective work among lepers of Mary Reed, of the Methodist Episcopal (U. S.) Mission. A station of the Mission to Lepers in India and the East was opened here in 1883, and now has a chapel and a leper asylum.

CHANDAUSI: A city in the United Provinces, India, situated in the district of Moradabad, 40 miles W. of Bareilly. Population, 28,000, including 20,000 Hindus and 7,700 Mohammedans. Station of the ME (1881), with 16 native workers, 4 chapels, 16 Sunday schools, 16 elementary schools, a Young People's Society and 446 professing Christians.

CHANDBALI: A town in Orissa, Bengal, India, 8 miles from the sea and 60 miles N. E. of Cuttack. The climate is hot, not malarial, being tempered by sea breezes. The population is about 5,000, chiefly Hindus, with some Mohammedans. The Telugu language and the Bengali and Hindustani here come into rivalry with the Urdu. The General Convention of Free Baptists meets here in the fall of the year. The present force of workers consists of 1 missionary and his wife, with 26 natives, men and women; 11 elementary schools are conducted in the town and its dependencies and a church of 25 members has been organized.

CHANDKURI: Station of the German Evangelical (Synod) Missionary Society (U. S.) in the Central Provinces, India, 25 miles S. W. of Bilaspur. The station has a force of 2 missionaries and their wives, with 24 native workers, men and women. There are 7 elementary schools, an orphanage, a dispensary, a book depot, 8 places of worship in the town and its vicinity, and the number of baptized Christians is 520. The Mission to Lepers in India and the East also has a station here, opened in 1896, and maintains a chapel, leper asylum and a home for the untainted children of lepers.

CHANDPUR: A town in the United Provinces, India, 30 miles east of Meerut. Population, 12,800, sixty per cent, are Mohammedans. Station of the New Zealand Baptist Missionary Society (1898), with 1 missionary physician and his wife, a missionary woman, 4 native workers, men and women, 1 elementary school and a hospital.

CHANG-CHAU-FU: A city in the province of Po-kien, China, situated about 25 miles W. of Amoy, and possessing an important trade in silk and some iron works. Population, about 500,000. The LMS opened a station here in 1862, which is now occupied by 7 missionaries, men and women (one of them a physician), and 20 native workers, men and women. Connected with the station are a college, a hospital, 8 elementary schools, and a body of 351 professing Christians. The RCA also has a station here (1895), with 2 missionary women, 17 native workers, men and women, 3 elementary schools, a high school, and 14 places of worship in the city and surrounding regions. The number of professing Christians connected with the station is 312.

CHANGOMBE: One of the villages on the main
land near Mombasa, British East Africa. The CMS opened a station here in 1898, which has at present 4 missionaries, men and women, 7 native workers, men and women, 5 schools, a dispensary, and 16 communicants.

CHANG-KIA-KAU: A city lying 110 miles N. W. of Peking, China, and commonly called Kal- gan. It lies at an altitude of 2,555 feet, and is an important depot of Russian trade. Population, 75,000. Station of the ABCFM (1865), with 5 missionaries, men and women, 13 native workers, 9 places of worship, 9 Sunday schools, 1 elementary school, 2 high schools, 1 hospital, 1 dispensary, a book depot and 236 church members.

CHANG-PU-HSIEN: A town in the province of Fo-kien, China, about 100 miles S. W. of Amoy; occupied as a station by the Presbyterian Church of England in 1874, and now having a force of 9 missionaries, men and women (of whom two are physicians), who carry on a hospital, a dispensary and a medical school.

CHANG-SHAN-HSIEN: A town in the province of Che-kiang, China, about 30 miles W. S. W. of Kun-yang. The CIM (1865), of which a missionary and his wife, 1 missionary woman and 6 native workers, men and women. In the town and its neighborhood are 5 preaching places, and there are 41 professing Christians.

CHANG-SHU: 1. A village in the province of Kiang-si, China, situated near the Kan River, and occupied in 1895 as a station by the CIM. The present force is 1 missionary and his wife and 2 native workers. The number of baptized Christians is 10.

2. A town in the southern part of the province of Kiang-su, China. The MES occupied it as a station in 1890 and now have there 1 missionary and 2 native workers, with 3 preaching places and a hospital. The number of professing Christians is 112.

CHANG-TE-FU: A city in the northern part of the province of China, Honan; occupied in 1896 as a missionary station by the Presbyterian Church in Canada. The force now working there consists of 9 missionaries, men and women (of whom 3 are physicians), and 12 native workers. Besides a chapel, they maintain a hospital and dispensary. It is also a station of the Cumberland Presbyterian Missionary Board, with 5 missionaries, men and women, 1 native worker and a dispensary.

CHAO-CHANG-FU: A city of about 200,000 inhabitants in the province of Kwang-tung, China, situated about 20 miles north of Swatow. It is the prefectural city of an agricultural district, containing over ten million inhabitants; occupied as a mission central station by the Presbyterian Church of England in 1890. This mission now has there (1901) 2 missionaries (one a physician), 1 missionary's wife, 1 missionary woman, not married, 5 outstations, 1 hospital, 1 dispensary, 1 medical class. There is also a fine church building. The number of communicants reported from Chao-chau-fu jointly with Swatow is 2,140. Also a station of the ABMU (1894), with a missionary and his wife and 4 native workers, who have 3 places of worship in the district and 80 church members.

CHAO-CHENG: A town in the province of Shan-si, China, situated 30 miles N. N. E. of Ping-yang-fu. Station of the CIM (1901), with 2 missionaries.

CHAO-TUNG-FU: A city in the N. E. part of the province of Yunnan, China, which has important lead and silver mines. Population, about 50,000. Station of the Bible Christian Missionary Society (1888), with 4 missionaries, men and women, a native worker, an elementary school and a dispensary.

CHAO-TUNG-HSIEN: A town in the northern part of China, beyond the great wall and near the western border of Manchuria, lying about 120 miles N. W. of New-chwang. It was occupied as a station by the LMS in 1887, and in 1902 was transferred to the PCI, the LMS having decided to withdraw from Mongolia. A school has been opened and the number of church members is 217.

CHARLOTTENBURG: A station of the Moravian Missions (1855) in Surinam, South America, and was the first plantation opened to the Moravians for the preaching of the Gospel, fifty years after the missionaries began their labors in Surinam. It lies on a curve of the river Commewyne, about 50 miles E. of Paramaribo. The banks of the stream are lined with fresh, green woods, among which here and there pretty hamlets may be seen. At present the missionary force consists of 1 missionary and his wife, with 12 native workers, men and women. There is a chapel and a school and the number of communicants is 255.

CHAU-KIA-KAU: A town in the province of Ho-nan, China, about 30 miles west of Chenchau-fu. Station of the CIM (1884), with a force of 12 missionaries, men and women (one of whom is a physician), and 14 native workers, men and women. The town and its neighborhood there are 9 preaching centers and 290 communicants.

CHAVAKACHERI: A town in the southern part of the Jaffna Peninsula, Ceylon, situated 11 miles E. of the town of Jaffna. Station of the ABCFM (1834), temporarily vacant and under care of missionaries at Udupitti. It has (1900) 69 native workers, men and women, 26 elementary schools and a dispensary. The number of church members is 258.

CHEFOO. See CHI-FU.

CHEMULPO: The most important of the treaty ports of Korea. The climate is temperate. It has about 2,000 foreign residents, most of whom are Japanese. Station of the ME, with 1 missionary and his wife, 5 native workers, 15 chapels, 2 elementary schools, 1 theological class, 10 Sunday schools and 1,081 professing Christians. Station also of the SPG (1890), with 2 missionaries, 1 native worker, 1 elementary school and 10 communicants.

CHENCHAUFU: A city and district headquarters in the eastern part of the province of Ho-nan, China. Station of the CIM (1895), with (1900) 1 missionary and his wife, 3 missionary women (of whom one is a physician), 2 native workers, 1 chapel and 23 professing Christians.

CHENGALPAT: A town and district head-quarters in the southern part of the province of Madras, India. Population, 6,200, mostly Hindus. Station of the Welsh, with 1 missionary and his wife, 1 missionary woman, 62 native workers, men and women, 20 elementary schools, 3 high schools, a YMCA and 125 church members. Also station of the Leipzig Missionary Society (1893), with 2 missionaries, 1 missionary’s wife, 6 native workers, 4 chapels,
4 elementary schools and 357 professing Christians.

CHENG-KU-HSIEN: A town in the province of Shen-si, China; situated about 15 miles west by north of Han-chung. Station of the CIM, with (1899) 2 missionaries, one of them married, 7 native workers, 1 dispensary, a school, a dispensary and 87 professing Christians.

CHENG-TU-FU: Capital of the province of Sze-chuan, China. It is one of the finest cities in China, situated in the middle of a fertile and well-watered plain, surrounded by graceful hills. The people are reputed to be among the most polished in the empire. Population (1887) estimated at 500,000. Station of the CIM (1881), with 3 missionaries (two of them married), 9 native workers, men and women, 6 chapels, 3 elementary schools and 251 communicants. Also station of the Methodist Church of Canada (1891), with 5 missionaries (one a physician), 2 chapels, 1 elementary school, 1 high school, a hospital, a dispensary, a printing house, 2 book depots and 17 communicants. Also station of the Woman's Missionary Society of the Methodist Church in Canada (1893), with 8 missionary women (two of them physicians), 1 high school, 1 dispensary and a hospital. Also station of the ME, with 3 missionaries and their wives, 5 native workers, men and women, 2 chapels, 4 elementary schools, 1 high school and 64 professing Christians.

CHENG-YANG-KWAN: A town in the province of Ngan-hwei, China; station of the CIM (1857), with (1900) 3 missionaries, 2 native workers, and 1 church.

CHEN-KIANG-FU: A city in the province of Kiang-su, China; situated about 40 miles west of Nan-king on the right bank of the Yangtsze River. Population (1901) 140,000. The place is a commercial center of importance. Its climate is damp, subject to sudden changes of temperature, but not unhealthy. Station of the ME, with (1901) 1 missionary and his wife, 4 missionary women (two of them medical), 2 native workers, 2 preaching places, 1 elementary and 1 high school and 79 professing Christians. Also station of the PS (1853), with (1901) 3 missionaries and their wives, 4 preaching places, 2 outstations. Also station of the CIM (1888), with 5 missionaries, men and women (two of them physicians), 1 native worker, 1 chapel, a hospital, and 11 communicants. Station also of the SIC, with (1902) 3 missionaries (one of them a physician), 2 wives of missionaries, 2 women missionaries, 3 native workers, 3 chapels, 3 schools and 35 church members. The National Bible Society of Scotland also has a station here under care of agent who supervises a depot and 25 native workers. In the missionary and commercial reports the name is written Chinkiang.

CHEN-YUEN-HSIEN: Town in the province of Kan-su, China, about 35 miles N. E. of Ping-liang-fu. Station of the CIM (1897), with (1900) 3 women missionaries, 3 native workers, 1 chapel, 1 high school and 1 refuge for opium eaters.

CHERIBON: A seaport on the north coast of Java, 125 miles east southeast of Batavia. It is the residence of a Dutch governor and a place of considerable trade. Population, 52,000, including about 600 Europeans. Station of the Netherlands Missionary Society (1865), with 1 mission and 59 communicants.

CHERRA PUNJI: A village in the Khiasa Hills, Assam, India, lying 25 miles S. W. of Shillong, at an altitude of 4,455 feet. The rainfall here is the heaviest known, the mean annual amount being 116 inches. The population is somewhat over 5,000. Station of the Welsh Calvinistic Methodist Missionary Society, with 1 missionary and his wife, 25 native workers, men and women, 16 elementary schools, 1 theological seminary, 22 preaching stations, 14 Sunday schools and 482 church members.

CHESTER, Rev. Edward, M.D.: Born in New York City, July 12, 1828; graduated from Union Theological Seminary in 1857 and entered upon his work in the Madura Mission, India, under the ABCFM in the spring of 1859. He spent nearly forty-two years on the foreign field, and in pursuing the duties of a faithful missionary of the Cross, his influence as an educator and a physician was deeply felt throughout the region of his labors. Altogether, leaving America he prepared himself for medical practice in India, he spent a year at Madras, studying the forms of eruption of the disease prevailing in the neighborhood. After one year in charge of the Madura hospital and dispensary, he completely transformed the methods of these institutions and the mission, and the patients increased from 3,100 to 51,000 annually. To these thousands the Gospel was daily preached, and a leaflet, which served also as a dispensary ticket, was given, containing the ten commandments, the Lord's Prayer and a brief statement of saving truth. Dr. Chester established the local missionary dispensary and medical service, and through his consecrated energy the district of Madura was better provided with a medical service for combating epidemics and common tropical diseases than any other district of South India. In addition to his extensive medical work, Dr. Chester during all these years, had charge of a mission station, with a large number of pastors, preachers, teachers and Bible women under his supervision, and also a number of schools and separate classes received his personal attention. He laid down his burden and entered into rest at Madura, January 4, 1892.

CHEUNG MAI: A city in the Laos country of Siam, 900 miles N. by W. of Bangkok. Charmingly situated among hills on the Mah Ping River. Population, 100,000. Station of the PN (1867), with (1901) 16 missionaries, men and women (one of them a physician), 4 native workers, 7 elementary schools, 2 high schools, 1 theological school, a hospital, 2 dispensaries, a printing house and 1,906 church members.

CHEUNG RAI: A city in the Laos country, Siam, about 100 miles N. E. of Cheung Mai. Station of the PN (1897), for some years known in the reports as Cheung Hai. The force occupying it (1901) consists of 2 missionaries (one of them a physician) and their wives, with 1 native worker. There are in this field 1 elementary school, 1 hospital, a dispensary, a Young People's Society and 312 church members. The field is nearly 200 miles long from north to south and nearly as wide from east to west. Within its limits there are three organized church districts.

CHHINDWARA: Chief town of a district in the Narbada division, Central Provinces, India. It is situated on a well-watered table land, 64 miles N. E. of Nagpur. The population is about
9,000, two-thirds of the people being Hindus. It was occupied as a station by the Swedish National Missionary Society in 1885. The present force there consists of 8 missionaries, men and women (one being a physician), and 16 native workers, men and women. The various enterprises of the station are 3 elementary schools, an orphanage, and a dispensary and theological school, besides the usual preaching services. There are 83 professing Christians connected with the station. It is also a circuit of the ME, with 3 native workers and 97 professing Christians.

CHUNG-JU: A town in Korea, 55 miles S. E. of Seoul; station of the PS (1896), with 7 missionaries, men and women (one a physician), 3 preaching places and 10 communicants.

CHING-CHIU. See CHANG-CHAU-FU.

CHING HOA: Town on the west coast of the island of Formosa, about 5 miles S. W. of Taichu. Station of the PCE (1889), with (1901) 2 missionaries (one a physician), 1 dispensary, 1 hospital and 23 preaching places (in district). The communicants connected with the central stations of Taian and Chiang Hoa jointly are 2,190. (The Chiang Hoa held is spoken of by the missionaries as the Taichu field very frequently.)

CHICOACO: A town in the district of Gamgam, Madras, India; situated on the Nagavalli River, 10 miles from the sea. Population (1891) 18,200, almost all Hindus. The BOM opened a station here in 1875, which now has 1 missionary and his wife, 2 women missionaries, 8 native workers, men and women, 1 high school, a hospital, a book depot and 45 church members. The name is also written Cicacole.

CHI-CHAU-FU: A city in the province of Ngan-hwei, China, situated on the right bank of the Yangtse River. Station of the CIM, with a missionary and his wife, 2 missionary women, 4 native workers, an elementary school and 21 professing Christians.

CHICHIJOLI: Town in the Nabarada division, Central Provinces, India; station of the Episcopa- pal Church in Scotland (1894), with (1900) 2 missionaries and their wives, 1 missionary woman, 4 native workers, an elementary school and 21 communicants.

CHI-CHOW. See KI-CHAU.

CHIN-TOONG. See KENG-TUNG.

CHI-FU: A city and seaport in the province of Shan-tung, China. It is a commercial center for goods of foreign manufacture. The population is about 120,000. The climate is more agreeable to Europeans than that of any other open port in China, and the place is visited as a sanatorium by many invalids in the south of the empire. It was occupied as a station by the PN in 1862, which now has a force there of 9 missionaries, men and women, 94 native workers, men and women (in the city and in 50 outstations). There are 39 preaching places, 40 elementary and 4 high schools, a dispensary, and 1,445 communicants. It is a station also of the SPG (1874), with 2 missionaries and 1 missionary’s wife; also station of the CIM (1879), with 30 missionaries, men and women (one a physician), 4 native workers, 1 chapel, 5 schools, a hospital, a dispensary and 50 professing Christians.

CHIHUAHUA: Capital of the State of Chihuahua, Mexico; situated at the base of the Sierra Madre Mountains, 225 miles south of El Paso, Tex.; founded in 1706. The climate is dry, mild and healthful. It is a center for trade to neighboring gold and silver mines, and quite a number of citizens of the United States reside there. It was occupied as a station by the ABCFM in 1882, and the force now there is 1 missionary and his wife, 1 dispensary and 8 native workers, men and women. There are 2 elementary schools, a high school, a book depot, 17 outstations, 2 young people’s societies, and 291 communicants. Station also of the Woman’s Board of the MES (1890), with 3 missionary women.

CHIKALDA: A village in the district of Elichpur, Burar, India; situated 43 miles N. W. of Amrakot, in the midst of beautiful scenery, at an altitude of 3,656 feet. Population about 5,000. Station of the Kurku India Hill Mission (1894), with (1901) 3 missionary women, 1 native worker, 1 orphanage, and 1 school, with industrial department.

CHIKBALLAPUR: Town in the Kolar district of Mysore, India, situated 36 miles N. E. of Bangalore. Population about 11,500. Station of the BMS (1872), with 2 missionaries, 15 native workers, men and women, 7 schools, and 30 church members.

CHIKORE: A settlement in the Molsetter district of Rhodesia, near the frontier of Portugese, East Africa, and 170 miles W. by S. from Beira. Station of the ABCFM (1897), with (1901) 1 missionary physician and his wife, 2 native workers, 1 dispensary, an elementary school, 4 preaching places and 1 dispensary.

CHILAMBARAM: Town in South Arcot, Madras, India, situated 21 miles S. by W. of Cuddalore. Its temples to Siva are held in great reverence in S. India and Ceylon. Population, 18,600, of whom 17,000 are Hindus. Station of the Leipsig Missionary Society (1866), with (1900) 1 missionary and his wife, 15 native workers, 10 preaching places, 9 elementary and 1 high school, and 847 baptized Christians.

CHILDREN’S SPECIAL SERVICE MISSION (1868): The aim of this organization is to supplement the work of the Church, Sunday school, and home among children by its various publications, evangelistic services, and the Scripture Unions, which was organized in 1879. Open air services are held, and by means of caravan and tent workers go from village to village, holding services and distributing Christian literature among the children. A Foreign Fund is used for the issue of such literature in 51 different languages, which is freely given to missionaries of all denominations, and grants are made to anyone visiting foreign countries who will make use of them. The Scripture Union Fund pays for itself through the contribution of one penny per annum from the members of the Union, and from the sale of its literature. Besides the publication of books, leaflets, etc., an illustrated penny monthly, Our Own Magazine, is issued, with a circulation of 120,000. Our Boys’ Magazine is published, with special reference to school boys. The Scripture Union Fund supplies a Script & Union Almanac and the monthly Letters, which are also translated into French, Dutch, Danish and Swedish, and issued in the Tamil monthly magazine. The greater part of the expenses for administration of the work of the mission is covered by the profits transferred to the General Fund, so that
contributions are used directly for the work. Income (1902), General Fund, £5,205 16s; Foreign Fund, £799 2s; Scripture Union Fund, £3,033 18s.

Headquarters, 13a Warwick Lane, Paternoster Row, London.

CHILE, Republic of: Lies on the western coast of the South American continent, between the crest of the Andes and the ocean, from the Camarones River to Cape Horn. Its population is about 2,700,000, chiefly of Spanish descent, but including 50,000 Indians. The language is Spanish, and the religion of the state is Roman Catholic, other religions are tolerated by law. The climate is that of the temperate zone, the temperature being modified, however, by the high mountains and by proximity to the sea.

While the Andes wall in Chile on the east, they are being pierced by a railroad which will soon open open communication with the Argentine Republic.

Mission work is carried on by the Presbyterian Church (North), the ME, and the SAMS. The last-named Society is gaining a hold upon the Araucanian Indians.

CHILLAN: Capital of the province of Nuble, Chile; situated about 70 miles N. W. of Concepción. Population (1901, estimated), 35,506. Station of the last-named Society. There is a missionary and his wife, 1 native worker, 1 elementary school and 130 church members.

CHILPANCINGO: A town in the State of Guerrero, Mexico; situated about 65 miles N. E. of Acapulco, at an altitude of 4,800 feet. Station of the FN (1894), with (1901) 2 missionaries and their wives, 11 native workers, 3 schools, 8 outstations.

CHINA: By the name China is designated the possessions of the Chinese Empire in its widest sense, the it is used more correctly and narrowly to name the eighteen provinces which constitute China proper. This immense country comprises one-third of Asia, one-tenth of the inhabited globe, and is divided politically into China proper, Manchuria, Mongolia, Chinese Turkestan and Tibet.

The eighteen provinces, and usually one of the provinces of Manchuria (Sheng Ching) in addition, form that part of the empire which is distinctively known as China, and are inhabited by Chinese. The area of China is variously estimated from 1,348,870 to 2,000,000 square miles, since its western boundary is unsettled. Its greatest length in 1,474 miles and its breadth 1,555 miles. "It contains almost as much territory as is comprised in the states lying east of the Mississippi River, with the addition of Texas, Arkansas, Missouri, and Iowa."

Physical Features: In the northeast is a great plain, and the remainder of China is divided into three basins, separated by mountain ranges which run from east to west, and drained by three great rivers and their tributaries. In general, all that part of the country lying west of the meridian of 113° is mountainous; from that line down to the coast, south of the Yangtse-kiang (Yangtze River), is found hilly country alternating with the river valleys.

The Great Plain extends from the Great Wall north of Peking to the junction of the Yangtse River with the Poyang Lake, and is 700 miles in length. It has an average breadth of 200 miles north of latitude 35° north, and covers an area of 70,000 square miles; while in the parallel of the Yellow River it increases in breadth to 300 miles, until it reaches the Yangtse River, where it stretches 400 miles inland, covering 140,000 square miles in this southern portion, making a total of 210,000 square miles. This basin supports a population of 177,000,000, and is more densely populated than any other part of the world of equal size. 

Rivers: Of the many rivers which flow from west to east across China the principal ones are the Hwang Ho (Yellow River), the Yangtse-kiang (Yangtze River) and the Chu-kiang (Pearl River). The Yellow River is of very little use for navigation, owing to the great difference in its depth during summer and winter. On account of its habit of overflowing it has been justly called "China's sorrow." In a direct line its distance from source to mouth is 1,290 miles, but its numerous windings make its length double that distance.

The Yangtse River is deep and affords passage for ocean steamers for 200 miles from its mouth, and with the aid of modern engineering it would be possible for steam vessels to ascend 3,000 miles. The basin is 33,506 square miles, and in the amount of water it discharges, the system of tributaries belonging to it, and the means of communication which it affords, it ranks with the great rivers of the world.

The Chu-kiang is formed at Canton by the union of the North, East, and West rivers, of which the latter is by far the largest. They drain the southwestern part of China, an area of 130,000 square miles, and, being intersected by numerous tributaries, form a perfect network of streams which afford the means of communication between the three southwestern provinces.

Lakes: There are few large lakes in China. Tung Ting Lake, in Hunan is the largest one. In Kiangsi is found the picturesque Poyang Lake, having important fisheries. There are smaller lakes in Chihli, Shantung and Yunnan, which support aquatic populations.

Provinces: In the division of the provinces made a hundred years ago, eighteen provinces were defined. The cities in the different provinces have a suffix added to the name, which denotes the rank of the city and the grade of the district of which it is the chief town. These suffixes are fu, chau, and hsien, and in general may be rendered "department," or prefecture, "primary district," and "secondary district," respectively.

Climate: The eighteen provinces occupy the same relative position on the continent of Asia as the United States occupy on the continent of North America, and the variations of temperature are similar. The average temperature of China is lower than that of any other country in the same latitude. The heat, especially in the south, is relatively greater than countries in like latitudes, and, consequently, the heat is harder to bear. The excessive heat causes the prevalence of typhoons during July, August and September.

History: Chinese history may be divided into five periods: the Mythological, the Legendary, the Ancient, the Medieval, and the Modern. 1. The Mythological period comprises all the time antecedent to the accession of Fu Hsi, b.c. 2852, and native writers assign to it myriads of years. Pan Ku is described as having formed the world during this time. With chisel and
mallet he cut out the earth; the sun, moon, and stars are his works; his head became mountains; his breath, wind and clouds; his voice, thunder; from various parts of his body came fields, rivers, and trees, and finally from the insects on his body came man. After this, the ancient Chinese became a trinity of powers who ruled for thousands of years, and to them are ascribed many of the inventions of the ancient time. 2. The Legendary period ends with the accession of Yu in 2205. Eight monarchs in all reigned during this time, and the tales that are related of their prowess resemble the legend of other ancient nations.

It was during this period, about the year 2200 B.C., that the Chinese settled around the bend of the Yellow River, and from this time on the records are more reliable, the legendary in places.

3. Under the division of Ancient History may be included the dynasties commencing with the Hsia and ending with the Eastern Han, in 221, six in all. Of these six dynasties the most important and the longest recorded in history was that of Chau, which commenced with Wu Wang in 1122 B.C. and lasted till 255 B.C. China was then a loose system of feudal states, and the power of the emperor was often merely nominal. The originator of the Chin dynasty, who gave the name to China by which it was known to the ancients, was the Napoleon of China. He divided his empire into thirty-six provinces, with two or more in each. After this, the Great Wall, which stupendous work was completed in 204 B.C. after ten years of labor. If the wall made this emperor famous, his vanity made him infamous, for he wished to be considered the first emperor of the Chinese, and ordered the destruction of all books and records which related his reign, and slaughtered 500 of the literati. Many of the writings of Confucius and Mencius were thus destroyed, and many records were lost which might throw more light on the past. During the reign of the Emperor Ping (Peace) was born in Nazareth that King who came to bring peace to the world. The founder of the Han dynasty instituted the system of competitive examinations, and under his successors literature, commerce, arts, and good government flourished.

4. Under Medieval History may be placed the seventeen dynasties which ruled China after the overthrow of the Chau dynasty and the accession of the first monarch of the Ming dynasty, in 1368. During the first dynasty of this period the country was divided into three principalities, and the wars that ensued between the various princes gave rise to the Chinese historical novel, The Three Kingdoms, which portrays the conditions of society at that time. During the Eastern Chin dynasty, 323-419, Nanking was the capital, Buddhism was the chief religion, and the doctrines of Confucius were coming into universal favor. During the Tang dynasty, 618-906, China was the most civilized country on the face of the globe. It was the golden age of China, and to this day the natives in the south call themselves Tang-jeu, men of Tang, for during that time they were civilized and amalgamated with the Chinese race. Arab travelers visited China during this period, and to them we owe much of the information possessed in regard to their civilization. During the reign of the Emperor Tai Tsung (627-40), the Nestorian missionaries presented themselves at court and were received with respect. The Yuen dynasty, 1230 to 1368, was a Mongol dynasty, inaugurated by the great Kublai Khan, whose exploits are related by Marco Polo. The expulsion of the Mongols and the restoration of native rule brings us to a period which is comparatively modern.

5. Of the last native dynasty was called Ming, or "bright," and lasted from 1364, with six sovereigns, in all. The Portuguese came to China in 1516, and the Jesuits gained an entrance in the country about 1580. The Manchus finally attacked the imperial forces, and, aided by native rebels in various parts of the empire, finally overthrew the dynasty, and Shun Chih took the throne in 1644, of six Manchu emperors. "China pure," dynasty has been in power, the Chinese submitting peacefully to its rule. The Manchu conquerors imposed their mode of wearing the hair in a queue upon the Chinese. Kang Hsi, who reigned sixty-one years from 1662, was one of the ablest rulers of China. He ordered a survey of the empire by the Roman missionaries, and superintended the publication of a great thesaurus, in addition to devoting himself with unwearying care to the solidifying of the country, the unifying of his people, and the encouragement of arts. He was able to make his nation happy and prosperous. His grandson, Chien Lung, reigned sixty years, which were characterized by the peace and prosperity of the country. Embassies from the Dutch, Russians, and English were received by him. The Emperor Tao Kuang, 1821-51, was a wise, able ruler. He waged bitter strife against the traffic in opium, and brought on the war with England and the consequent opening of his country to foreign intercourse. The Taiping rebellion broke out at his death and lasted the greater part of the life of his successor, Hien Lung. The minority reign of Tung Hsi ended just as he was taking charge of the government, and he was succeeded by the present emperor, Kuang Hsi, who attained his majority in 1889. On September 23, 1888, however, an imperial edict transferred the direction of affairs to the Empress Dowager, who has since (1904) retained power. The following chronological table is taken from Williams' Middle Kingdom, and gives the accepted dates in Chinese history:

Opening of the Country to Foreigners: Until the early part of the last century China was practically closed to foreigners, for, tho the Portuguese had made trading voyages there, and tho the East India Company had sent out its ships to Canton, foreigners had no treaty rights until after the wars with Great Britain and France. The first war with Great Britain is called the opium war; it was precipitated by the seizure on the part of the Chinese Government of 20,000 chests of opium, which they claimed were being smuggled into the empire. The war commenced with the bombardment of Ting-hai on July 5, 1841, and was continued until the ratification of the Nanking Treaty, on September 15, 1842. Canton, Amoy, Ting-hai, Shanghai, Ningpo and Chin-kiang were captured by British arms. Nanking was invested and would have been destroyed unless the Chinese had consented to pay the $2,000,000 demanded in 1839 and this time the commissioners from the emperor were willing to sue for peace, and agreed to the terms of the famous Treaty of Nanking, including the opening of the five ports, Canton, Amoy, Fu-chau, Ningpo, and Shanghai, to British traders and missionaries. On October 8, the following year a supplementary treaty was signed, which gave all foreigners the same rights at treaty ports as the British had been given. The United States sent Caleb Cushing as plenipotentiary to conclude a treaty of peace with China, and this treaty was signed at Wanghsia, a suburb of Macao, on July 3, 1844. At this time the Tai Ping rebellion broke out. Its leader, Hung, professed to be commissioned by God to accomplish the overthrow of the existing dynasty. He and his fellow-rebel, Jih-ho, knew the principles of the Christian religion, assumed to be a Christian, and claimed to be led by visions and warnings from Heaven. However sincere he may have been in his convictions, he failed to comprehend the spiritual nature of Christianity, and when Pope Gregory, Cardinal Dollier captured over fifty cities from the insurgents, and ended the rebellion in 1855, when the rebel pretender was taken prisoner and killed. The Manchu dynasty was once more supreme after fourteen years of war which shook the government to its foundations, devastated some of the fairest lands and cities of the empire, and caused the death of millions of its subjects.

The second war with Great Britain was brought on by the Chinese authorities at Canton boarding the lurcha "Arrow" and seizing some of her crew. The war was called by the treaties at Tientsin, in 1858, between China and the envoys of Russia, France, England, and America. "The toleration of Christianity, the residence of foreign ministers at Peking, and the freedom to travel through the land were avenues heretofore closed against the welfare and progress of China which the treaty opened, and through which she has made more real advances than ever before in her history." The Chinese did not observe the requirements of the treaty, and it was not until Peking had been occupied by the allied forces and the Summer Palace of the emperor destroyed that the treaties of Tientsin were finally ratified, October 24, 1860.

During the last forty years China has been a storm center; but out of all this disturbance there have arisen conditions that have encouraged new and better life for the whole empire. Mr. Burlingame's mission, which seemed to mark a new era in China's relations with the United States and with Europe, left Peking in 1867; but in 1871 a popular outbreak against foreigners occurred at Tientsin, resulting in a deplorable massacre. Altho the local authorities were exiled, and fifteen of the rioters were executed and a large indemnity was paid for the destruction of property and for the families of those who had perished, other similar wars have since occurred. Such are these disturbances interrupted but slightly the determination of foreigners to influence more and more the destinies of the Middle Kingdom. The catastrophe of 1900 was foreshadowed by the troubles with Japan, the entanglements with Russia and Great Britain, and the seizure of Kia-chau, in Eastern Shantung, by the Germans. In recent years China has helplessly watched significant inroads made into her possessions; and her most strategic points, like Port Arthur and Wei-hai-wei, have been taken by Western nations. Germany has pressed her way into the province of Confucius and Mencius; Great Britain, not satisfied with the ownership of Hong-kong, has extended her invasion to the adjacent mainland; France having secured a foothold, must possess more Chinese territory; Italy, by putting her claim for San-mên Bay, shows plainly that she wants to be in the game; and China's next door neighbor, Japan, plans to shape the future of the empire. The young emperor was soon convinced either that his people would speedily lose all their possessions or else there would be a division of the country into spheres of influence. He imbibed the views of the reformer, K'ang Yü-wei; he read a large number of books prepared by missionaries, and actually began the study of the English language. Just at this time the Empress Dowager put forth her strong arm, and expressed, in no uncertain words, her strong mind. The Emperor's edicts of reform were mostly rescinded, and everything was turned in the other direction. The Boxer outbreak is familiar to all. "Starting as the work of secret sects, which have for centuries been a source of terror to the Empire, bands of men in the province of Shantung began to practise a rude sort of gymnastics, combined with an equally crude form of hypnotism, supposed to render the Boxers invulnerable." Hopping with such allies as these that she could drive out all foreigners, the Dowager Empress issued a secret edict against the foreigners, ending with this statement: "Let no one think of making peace, but let each strive to preserve from destruction or spoliation his ancestral home and graves from the ruthless hand of the invading hordes." It soon became apparent that the officials, sympathizing with the Dowager Empress, were opposed to the reform movement of the Emperor, the rise of German influence in Shantung, the constant discussion by foreign papers in Chinese ports of Chinese reactions against the Boxers, and the Roman Catholic interference in the difficulties between the Boxers and native Christians. Altho the Boxers commenced their attack on the Roman Catholics, and followed it by persecution of native Protestant Christians, they soon announced that they intended to drive out all foreigners and foreign influence from the
country. When they began to loot villages, burn churches, and destroy homes, the hoodlum element, with the prospect of gain, joined their ranks; and their influence over the superstitious and ignorant masses increased when it was announced that they possessed supernatural power. During the "Boxer Movement," 1899-1900, missionaries of the following societies suffered martyrdom:

To this list of missionary martyrs must be added the 16,000 native converts, very many of whom might have saved their lives and property by denying their Lord and renouncing their faith. The siege of Peking by the great Powers of the Occident and the events preceding and following this historic fact, seem to be blessings in disguise, and God is already making the wrath of man to praise Him. The following declaration, made by the Chinese Court after its defeat by the Western Powers, and relating to the establishment of a new Council of State, is not without significance:

"Where native methods come short, Western methods are to be used to supplement them. With a view to this the translations of foreign books are to be collected and compared, and our Ministers to Japan and other countries are to be called on for reports on the state and progress of those nations. For us the example of Japan is of special interest—not only as belonging to Asia, but for having in a short time risen to a place of power and influence." In his analysis of the Emperor's later Reform Edict, Sir Robert Hart's words are encouraging and suggestive: "The Empress Dowager has decided to push on reform, and, as a preliminary, sets aside such hampering distinctions as ancient and modern, native and foreign. Whatever is good for the State or for the people, no matter what its origin, is to be adopted; whatever is bad is to be cast out, no matter what it is antiquity. Our national fault is that we have got into a rut, hard to get out of, and are fettered by red tape just as difficult to untie. Bookworms are too numerous, practical men too scarce; incompetent red-tapists grow fat on mere forms, and officials think that to pen a neat dispatch is to dispose of business. Oldfosses are continued too long in office and offices are blocked for men possessing the talents and qualifications the times require. One word accounts for the weakness of the Government—selfishness; and another for the decadence of the Empire—precedence. All this must be changed. Those who have studied Western methods have so far accomplished something of a nature, something about manufactures, a little about armaments; but these are merely the skin and hair; they do not touch the secret of Western superiority. . . . What must be insisted on as a principle is that self shall be nothing and public duty everything. We ourselves and the Empress Dowager have long cherished these ideas; and now the time has come to put them in force. The aim of the State is to be safe, not great. . . . Whether or not we shall be powerful or feeble, depends on this." The fact is apparent that, since the disasters of 1899 and 1900, the Emperor's anxiety for reform has greatly increased and we may hope that his interest in Christianity is sufficient to ensure great blessings for his country.

The events of recent years have not only strengthened the reform movement in China, but they have added to the influence of Protestant missions throughout the Empire. The heroic conduct of the missionaries during the appalling crises through which China has passed has earned the admiration and elicited the sympathy of many of the people; the deep-felt need for a radical change in State methods and the recognition of the bitter fruit of ignorance and superstition, have given a wide extension to Western ideas of education; and the blood of the martyrs has already proven to be the seed of the Church. The four lines of Christian mission work—literary, educational, medical, and evangelistic—have taken upon themselves new life and power in China; new societies for the introduction of the religion of Christ are opening; all civilized lands are recognizing, as never before, the practical utility of missions among this "thougesthiefbered, sturdiest, most vertebrate of the nations of the East;" the dark shadows of yesterday are giving place to the light, we may well hope, of a new day for China.

**Government:** The head of the government of China is the emperor. On ascending the throne the emperor takes a name or style by which his reign is known; the present emperor is called Kuang Hu'i, "Illustrious Succession." He was born August 14, 1871, and began to reign in 1875. The theory of the government of China is the patriarchal; the emperor is, the Son of Heaven and the father of his people. Beneath him the superior in age or rank is the Prime Minister and inferior or "Infantric." While the will of the Son of Heaven is supreme, and his power is said to be absolute, it is not unlimited, as one would think. He is bound by no constitution, no Magna Charta dictated by powerful barons limits his sway, but the accumulated force of centuries of tradition and law holds him to right and justice with an irresistible grasp. He must follow the behests of Heaven, or else the people will exercise the divine right of rebellion which they cling to, and which Confucius, and especially Mencius, defined with utmost boldness. When floods or famine, fire or pestilence come, the people look upon it as a judgment on the emperor, and he immediately offers sacrifices to Heaven to appease its wrath. He is the high-priest of his people, and theoretically has their welfare at heart. Practically the earth is subdivided into provinces, each province has a governor for the promotion of trade and industry, and rarely trouble themselves about the government in general, tho they may complain of the exactions of the local officers. Liberty is unknown. In the administration of the affairs of State the emperor is assisted by a Cabinet, a Council of State, and a number of boards. Under these boards are a multitude of office-holders. These officials are selected in accord-
ance with the civil-service system, which is based upon literary merit, and is one of the institutions of China challenging the admiration of other nations. Theoretically, any one who does not belong to the proscribed classes may compete in the literary examinations for the highest degrees, no matter how poor or ignoble he may be; practically, these honors are open only to those who have wealth, since many years of preliminary study are necessary. The great defect in the system is that the officers are not paid enough to live as their stations require; that corruption and bribery are widespread, and extortion universal. Another great source of corruption is the selling of degrees and the favor shown to those who purchase them. In spite of this corruption and the abuses of power which can be seen, the officers of the government will compare favorably with those of other nations for talent and industry.

The Chinese People: The people of China have lived for so many centuries in their river basins, separated from the rest of the world, that their origin is shrouded in mist. Obliquely-set eyes, yellow complexion, and obliquely-set eyes. The men are noticeable for an absence of beards, a thin mustache or a peaked goatee, being the most hair that is seen on their faces. They have great endurance and are a strong, sturdy race, with unusual physical force. They have a great love of art, and are practical and industrious. They have a love of unvarying monotony for long hours at a time, without wearily or displaying that nervousness which is seen in European races; absence of nerves is one of their principal characteristics. They have a wonderful vitality, which seems to be unaffected by such lack of sanitary conditions as would be sure death to an American. Their skulls are thick, and they have never squatted, so their bodies are never subject to consumption, skin diseases, and diseases of the eyes. They endure suffering so well, and recover so quickly from the shock and wounds of surgical operations, as to give credit to the theory that their nervous organization is not so highly developed or so sensitive as that of European races.

Qualities of the People: The Chinese are essentially an agricultural race. They are manual laborers, who possess industry, patience, and dogged determination in a great degree. While they are not aggressive, when aroused they have no mean foes, and when well officered, with men of daring and courage to lead the way, they will follow to the death with great stoicism. They work like automatons, and excel in manufactures which require a fine tactile sense. They have no regard for truth in the strict sense. They have great mental power, especially in memory, but are lacking in the imaginative and artistic temperaments. Logic and reasoning they are well skilled in, and they have a sense of humor which is of a quick kind. They are a slow, methodical, conservative, staid, phlegmatic people, and do not show much emotion; this is due as much to education as to nature, for they are taught to repress their feelings. They are more sudden than quick-tempered, more underhand than given to roughness. They have a great respect for learning, and reverence their superiors to the extreme, but are arrogant and conceited when learned themselves. When their anger is aroused they are more likely to vent it in words and imprecations than in blows, and street fights offend the ears oftener than they break the bones. In general, they are the finest of the Asiatic races, and their habits of domesticity, reverence of parents, submission to constituted authority, quiet industry, frugality, and temperance make them worthy of respect. In their manufactures they show a lack of inventive skill, but they possess a wonderful amount of imitatively. Attention to detail and laborious minuteness is characteristic of their works of art. They show very little interest in the condition of any who are without their immediate circle of relations, but within that circle a subject that concerns the individual is discussed and commented upon by the many ad nauseam. They have little idea of privacy, and lack refinement in matters pertaining to man's physical nature and its needs and appetites. The laboring men are often (usually in the south) bare to the waist, but the women are modest in dress and require the wearing of two or three cloths, except among the poor peasantry, who labor in the field with the men.
Classe of Society: There is no caste in China, but there is a well defined distinction between the classes—a distinction which is without certain attainments and official position or on age. The old division of the people defined only four classes—the scholar, the farmer, the artisan, and the trader—and they ranked in the order named.

The reverence which is paid to the scholar still exceeds that which is paid to the illiterate rich man. Filial duty is at the root of this division, for the scholar reflects credit on his parentage; the farmer is able to stay on his paternal acres and look after his family; the artisan is more often required to leave his home, and the necessities of a trading life impel the merchant to go to the city. Officials are distinguished from the common people by the dress which they are entitled to wear. The most noticeable feature of their dress is the button on the top of the hat. These buttons are of nine kinds, corresponding to the nine grades of rank. As the administration of the law is absolutely in the hands of the magistrates, we find no lawyers, in the Western sense of the term. The professions which sprang from the invention of steam, the use of electricity, and improved machinery have, until recent years, been wanting. The various religious orders that have the hand in keeping the contact with the common people and the influence on their daily life that the clergy do in Christian countries; neither are they respected. There are now a goodly number of the editorial profession. Doctors there are, but the science of medicine is yet in its infancy. The superstitions of China do not permit dissection, and their knowledge of anatomy is vague and ridiculous. The body is thought to be a mass of flesh supported on the framework of the bones, without that intimate connection of the joints and tendons. The circulation of the blood is unknown, so far as its continuous course is concerned. The seat of the breath is supposed to be in the stomach, and that also is the seat of learning. Health and sickness depend on the preservation of the just proportions between the five elements—fire, earth, water, metal, and wood. They are due to the influence of evil spirits. There are no laws in regard to necessary qualifications for practising medicine, and most Chinese doctors are those who have much shrewd knowledge of human nature and some empirical knowledge of drugs. They use the best concoctions as medicines; some of the ingredients are scorpions, snakes, centipedes, lizards, chamois horn, bear's gall, and vegetable wax. Surgery is unknown; their superstitions prevent them from mutilating the human body, as such mutilation is supposed to endure throughout the future world. Acupuncture has been practised among them for centuries, and massage and blood letting by cupping or by leeches are well known to them. Within recent years the government has recognised the advantages to be gained from Western medicinal knowledge, and has encouraged the study of it so far as to employ Chinese graduates from medical schools taught by foreigners. The occupation of agriculture is considered an honorable occupation, tho a lowly one. Probably half the soil of China is owned by those who till it. To the ease and comfort of the richer classes, the aristocracy save that of brains, it is as homogeneous as possible, and is essentially democratic. Arrogance and conceit characterize the learned class, who think no knowledge of value except that in their classics, and no man wise except him who is well acquainted with their sages and books is beyond the ken of the people.

Status of Woman: The classical teachings in regard to woman are: 1. Woman is different from man as earth is from heaven. 2. Dualism in nature, consisting of the yang and the yin principle (the good and the bad, or the negative and the positive), is found here; woman is the yin; man is the yang. 3. Women are human beings, but they are of lower state than man, and can never attain to full equality with him. 4. Death and evils have their origin in the yin principle, but prosperity and life follow the subjection of the yin to the yang; therefore woman must be kept under the power of man, and must not be allowed any mind of her own. 5. The education of woman must aim at perfect submission, not at development or cultivation of the mind. 6. Woman has no happiness of her own; she must live and work for man. 7. As the mother of a son in the direct line of the family, she may escape from her degradation and become in a measure equal to her husband, but that only in affairs of the household and in the ancestral hall. 8. Her bondage does not end in this world, it is the same in the future world; she belongs to the same house and the same family. 9. The development for the bond¬ness upon the sacrifices offered by her descendants. Such is the theory, but the condition of woman in China is not as miserable as it would be if the letter of the law were carried out. Woman is kept in subjection; she is practically immured, among the higher classes, with no education to engage her mind, no employment but household duties, fancy work, or gossip and gaming, and her one object in life is to be the mother of a son. As a wife she has more or less influence over her husband, but when she becomes a mother her influence over her children is great, and disobedience to her commands is one of the great sins. A son is not exempt from his mother's authority until her death, and then her spirit demands his reverence. Daughters are despised by the Chinese, since they pass entirely out of the family on marriage. When married, they lose the rights of their labor and service are all rendered to the mother-in-law; whereas the son supports his parents, brings home a wife who is practically an upper servant to his mother, and, greatest fact of all, he can offer the sacrifices to the ancestral tablets insuring their future happiness. So little are girls esteemed that in some parts of China infanticide is not uncommon on account of poverty. The fact that the empire has been governed during the life of the present emperor by a woman is proof enough of the high position which woman can hold it China. The exclusion in which they are kept is not as absolute as in India, while it is a safeguard of their morals. That the women are not lacking in mental power, but only require opportunity to develop it, is shown by the rapid progress made in study by the pupils in the mission schools. As a rule the girls are not sent to school, the noteworthy exceptions of literary women are recorded by Chinese writers. Among the poorer classes, women work in the fields and do various kinds of manual labor along with the men; they are then more of a commonality with the men, and are not secluded from them.

Social Etiquette: Ceremonial observances in accordance with the strict laws of etiquette are reserved for formal or special occasions. The
ordinary intercourse of the Chinese with each other is similar to that of other nations, with the exceptions hereinafter mentioned—sexual separation of the sexes. Introductions can be made by the parties themselves, one asking the other his "honorable surname," after which ensues a formal exchange of question and answer until the surname, age and condition, married or single, of each is brought out. Courtesy demands that refreshment be offered when calls are made, even to the be a cup of poor tea. Self-deprecation is characteristic of Chinese polite phrases, and exaggerated importance must be attached to all that concerns others.

Diet: When the seat of learning is assigned to the stomach, and an enlarged abdomen is the sign of a giant intellect, it may easily be understood that the Chinese are epicures. The poor live on rice or millet, with merely a relish of fish or pork; but the diet is more generous in direct proportion to the wealth of the person. Pork, poultry, and fish of all kinds abound. Fruit is found in abundance; no one with the money to procure it need famish for lack of palatable food. Dogs, cats, and rats, while occasionally, in some parts of China, figuring as table dishes, are by no means a necessary or desirable supplement to a manly diet. Wine-drinking occurs mainly at feasts, and drinking wine apart from eating is not a native custom. Their wine is a liquor distilled from rice, like weak brandy. It is an intoxicating drink, but it is used sparingly, and drunken men are rarely seen. Tobacco is used almost universally, and by the women as well as the men.

Dress: The men wear a tunic and trousers, and for special dress a long gown of bright colors, and short topped boots over the trousers. Their costume is rich and varied in color; and silks, satins, furs, and fine woolen goods are the materials used. The Chinese costume has been adopted by missionaries when it is of advantage to escape conspicuousness, and it is comparatively cheap and comfortable. The dress of the women differs little from that of the men. An embrodered skirt is worn over the trousers; the tunic is longer and the gown is absent. Bound feet, caused by the early compression of the feet with long strips of cloth, is a native institution; it is not countenanced by the reigning dynasty—the empress is a large-footed Manchu—but as a matter of course, it is permitted to the custom, tho' it is discouraged by the missionaries, and Christian sentiment is being educated against it. Within the past few years there has been a very strong effort made by the Chinese themselves to do away with foot-binding. Some of the strongest native writers have issued tracts against the custom, and societies, both those established by missionaries and by non-Christians, have done much to discourage the custom.

Religion: There is no one system of religion which is believed in by the Chinese to such an extent as to dignify it exclusively as the religion of the people. They are liberal in matters of belief so far as to share their worship among the three different systems of Confucianism, Taoism, and Buddhism. The proportion belonging to each is not hard to estimate, for Chinese does in religious matters as a shrewd Yankee does in business ventures—takes a share in each—and if the three systems be regarded as the counterpart of the life insurance companies of the present day, the motive of the Chinaman in taking out a policy in each and paying the premium will be readily recognized. Whichever of these religious systems has given him the best reason why he that most appeals to his heart is Ancestor worship.

At the same time the superstition which most strongly sways him is Fung Shui. This Chinese term signifies, "wind and water," and geomancy is its nearest English equivalent. It has influenced the science, religion, and custom of the Chinese to a large extent, and is responsible for a majority of their superstitions. The way in which their welfare is influenced is not always understood by themselves, and the laws which govern the so-called science are hard to define or detect. It was first systematized in the 12th century, and its influence has spread until it involves all the natural events and actions of life. It is founded upon the dual principle which pervades all nature, the male and female, the positive and the negative, the good and the bad. These must be kept in a state of equilibrium or else grave evil will result. The amount, position, and influence of each is determined by the geomancers, and houses must be built in accordance with Fung Shui, cities must be located, and especially must the graves be laid out in accordance with the favorable or unfavorable directions of a hill. This will follow the living even as they return from the tomb. In obedience to its requirements, pagodas have been built to correct the proportion of high and low ground; streets are laid out crooked in deference to superstitions connected with it, and high buildings are few, unless of a public nature. As it now exists it is a gigantic system of extortion carried on by Buddhist and Taoist priests alike, who call to their help all of their small knowledge of sciences, and keep up the myriad delusions it gives rise to, that they may be employed to perform useless acts for useful fees. Every phenomenon of nature, simple as it is to those who are familiar with the sciences, has its effect on the ignorant Chinese, and the disturbance of the existing equipoise between the hills and valleys, and especially the encroachment upon the hill-side graves, form the chief obstacles to the building of railroad and telegraph lines in China—obstacles which cannot be thoroughly overcome until the light of science shall chase away the fogs of Fung Shui.

Mohammedanism: Early in the 7th and 8th centuries the Mohammedans were heard of, and in 793 AD a large Mohammedan embassy visited the Chinese capital with a view to settling a trade treaty. From this time onward there has been a steady increase in the Mohammedan population of China, and the number of Mohammedan missionaries, who have largely followed the Arabian traders, rose to Canton and Fu-chau along with the Arabian traders, who then made many voyages to China. Since that time the disciples of the false prophet have been found in China, and in some districts late observers claim that they will eventually take the place of Buddhists and Taoists. They have preserved the belief in one true God, and are known among the Chinese as the sect that will not eat pork. Their chief strength is in the northern provinces. In Peking they are estimated at 200,000. In Canton there is a plain tower said to have been erected by them during the Tang dynasty, and there is a mosque and the tomb of the maternal uncle of Mohammed not far from the wall of the city on the northeast.

The stronghold of the religion is in Hang-chau-fu, and in some places its disciples form a third of the population, their entire number being estimated at 200,000 in the region north of the Yangtse alone.

Judaism: Jews have been found in China, but information in regard to them is scanty. They claim to have come to China during the Han
dynasty. In the last three centuries they have lived solely in Kaifung, the capital of Honan. The Chinese name for them is Tiao-Chin-Chiao, "the sect that takes out the sinew." At present they do not number more than a few hundred persons, and are too poor to possess a synagogue.

The attitude of government toward Christianity in China in missions has been, in the past, simple indifference. The Chinese authorities simply tolerate the missionary. At the same time protection is given. If it is denied, the refusal is due to the private whim of some subordinate official, in which he is not supported by the government. Damage to missionary property has been paid for when the matter has been brought to the attention of the high officials. It can easily happen that local feeling against the missionaries may be stirred up by violent men until the local authorities are unable to protect the foreigner, but such conduct is repudiated by the government, and the official is liable to punishment. When the treaties of 1858 were signed the rights of missionaries were defined. In the American treaty it was stipulated that "those who quietly profess and teach these doctrines shall not be harassed or persecuted on account of their faith." Any Chinese citizen of the United States or Chinese convert, who, according to these tenets, peaceably teaches and practices the principles of Christianity, shall in no case be interfered with or molested. The Russian, the British, and the French treaties contain similar stipulations.

Early Christian Missions in China: There is no doubt that Christian truths were taught in China at an early period of the Christian era. The first authentic account of early missionary effort is given in the tablet which was discovered in Hsien-nan-fu in 1625. The Nestorian missionaries arrived in China as early as 505 A.D., and the date of the tablet is 781. From this time on till the travels of Marco Polo there is no doubt that the Nestorians had many converts; but from the time of the Yuen dynasty the records give no satisfactory account of their condition or fate.

The efforts of the Roman Catholic Church may be divided into epochs. The first epoch was in the 13th century, when John Corvino was sent to China in 1292, and was successful in establishing a mission, and from that time on till the expulsion of the Manchus, in 1668, many missionaries came, and there formed not only many Christian communities. The second period is one of 150 years, from the time when Matteo Ricci established himself in Shang-hing till the edict of expulsion by the Emperor Yung Ching, in 1736. Francis Xavier was one of the faithful men who strove to preach to the Chinese, but was detained by the governor of Malacca and died without reaching his field, tho he was buried on Chinese soil. Michael Ruggiero, of the Jesuits, finally arrived at Macao in 1580, where he was joined by Matteo Ricci, and the era of successful missions commenced. Twenty-one years later Ricci reached Peking and made a favorable impression on the court. From this time on Roman Catholicism was more or less successful in China. When the Manchus came in power the knowledge of astronomy which the fathers possessed from the favor of the court was used, and their labors were aided by noble and influential friends. Churches were built, new missions were established, and they numbered their converts by the thousands. At length the priests mingled with different parties in affairs of State, and the various political interests with which they were concerned led to an edict against them in 1665, and Schaal, their principal man, was disgraced and degraded from the high offices he held, and died soon after of grief. The accession of Kang Hsi brought them again in favor, and by their knowledge of astronomy and surveying they were given important positions, and both tolerance and toleration were shown to their missionary efforts. During the latter part of the 17th century strife arose among the Jesuits and Dominicans in regard to the attitude of the Church toward the worship of Confucius, deceased ancestors, and the worship of heaven. Innocent X. issued a decree in 1645 in which this worship was declared to be idolatrous and not to be tolerated. As the Jesuits had held that it was merely political in its nature, they strove to have this decree vitiated, and in 1656 Alexander VII. approved their course and decided that the rites were civil in their nature, and could be tolerated by the missionaries. The emperor Kang Hsi was appealed to for a decision of the question, and in 1700 he answered to the effect that the worship of _tien_, heaven, was the worship of the true God, and that the other rites were merely civil. This answer was sent to the pope. Clement XI. finally reached a decision, and decreed that _tien_ did not mean the true God, and that the rites were idolatrous, after which the emperor Kang Hsi refused to countenance such missions as did not follow the Jesuitical opinions and favor the retention of the sacrifices to ancestors and to Confucius. The first fifteen years of the 18th century were years in which Roman missions attained their greatest prosperity. There were 1,100 churches in Kiang-nan and Kiangsi alone, and 100,000 converts were claimed. Soon after this time Kang Hsi began to see into the true nature of the propaganda, and his faith in the missionaries was lessened by their internal strife. In 1618 he banished all missionaries except those who would follow the teachings of Ricci. Yung Ching followed his father with a decree forbidding the propagation of the Tien Chu Chiao, as Roman Catholicism has been called ever since, and during the remainder of his life and that of Chien Lung, the Catholics were persecuted and lost much of the ground they ever occupied. Never entirely extinguished, their missions varied in success from that time till the treaties of 1858 brought toleration to them, as well as to all other sects.

Early Protestant Missions: The London Missionary Society very soon after its organization, in 1795, had its attention turned to China through the discovery in the British Museum of an ancient Chinese manuscript, but the East India Company, which had at Canton an important commercial center, was antagonistic to all missionary effort, and the Chinese themselves strongly objected to the coming of religious teachers, and it was only through the kindly interest of an American mercantile house, Oliphant & Company, of New York, that the LMS was at length, in 1806, enabled to send its first missionary to China. Robert Horsfield sailed from London to China, in an American sailing vessel, reaching Canton on September 7, 1807, and was for a time allowed to reside in the narrow space allotted to the factories of the East India Company outside the walls of Canton, but was soon obliged,
with other English residents, to retire to Macao, which belonged to the Portuguese Government, and afforded a home to many of the early missionaries, and it is the home of the American clergymen in China, until China itself should be opened to the Gospel. Other places from which the missionaries found access to the strange people whom they wished to reach were Malacca, Batavia, Singapore, Borneo, and Bangkok, where there were great numbers of Chinese emigrants, and the LMS, the ABMU, the ABCFM, and other societies, established missions among them in anticipation of the time when the door of entrance to the empire should be opened.

The first associate of Morrison, William Milne, arrived in Canton, July, 1813, and in the following year sailed for the Indian Archipelago, taking with him a large number of New Testaments and tracts from Morrison's press. He proceeded to Java and thence to Malacca, returning afterward to Canton, but finding it difficult to prosecute missionary labor there returned to Malacca, where he remained until his death in 1822. William H. Medhurst, the third missionary sent by the LMS to China, was in 1822 sent to reinforce the mission to the Chinese at Batavia, in Java. In 1829 the American Board of Commissioners for Foreign Missions sent to Canton its first missionary to China, the Rev. E. C. Bridgman. Mr. Bridgman was accompanied by the Rev. David Abel, who had been sent out by the American Seamen's Friend Society, but who soon transferred his services to the ABCFM. They were received by Olyphant & Company, and a printing press was sent out for their use by the church in New York of which Mr. Olyphant was a member. In 1833 S. Wells Williams, then in his twentieth year, was sent out to take charge of it, and it remained at Canton until 1836, when it was removed to Macao, where Mr. Williams might have the benefit of the types of the East India Company's presses.

In 1834 Dr. Peter Parker joined the mission, and his medical skill added a new factor of the highest value to the mission's efforts to win the hearts of the people. The American Baptist Missionary Society, formed at Canton by the joint efforts of the missionaries and the large-hearted ministers residing in the city, was the result of Dr. Parker's success in starting medical work.

The American Baptist Missionary Union established its first missionary work for the Chinese at Bangkok in 1833, looking forward to the time when it should be able to enter China; and in 1838 the American Presbyterians began their first mission to the Chinese at Singapore. At all the various points, occupied in unremitting devotion, to the study of the language, to the work of translation, and to the mission presses, the missionaries had accomplished a great work of preparation, when in 1842, at the close of the first opium war between England and China, five of the chief ports of China were opened to foreign residents, and the island of Hongkong was ceded to the British. At once taking advantage of the opening, the LMS appointed a conference at Hongkong of all its missionaries then resident at Macao, Malaca, Batavia, etc., and as a result the Anglo-Chinese Mission was formed by Dr. Morrison. The great city, whose people were removed from Malacca, and the Society's printing establishment and medical work from Macao to Hongkong.

At the same time Mr. Abel, of the ABCFM, and Rev. J. N. Boone, of the Protestant Episcopal Church, entered Amoy, and work for the Chinese in the Far East began.

From this time on the number of missionary societies laboring in China rapidly increased. The opening of nine additional ports by the treaties of Tientsin increased the opportunities, and the travels of Dr. Gutzlaff aroused new interest, until no obstacle to any societies is represented in that great empire.

Obstacles to Missions: 1. Dislike of Foreigners: The feeling is general that whatever is strange and different from the native is uncanny. For this reason the most common name for the foreigner is junkuet, which is usually rendered "foreign devil," but it does not mean devil so much as it does something that is weird, strange, uncanny, and therefore to be feared. The missionary is an object of suspicion on account of his appearance, his actions, and his speech. If he wanders along the hillsides for recreation, he is supposed to be searching into the secrets of the hills with eyes that can see through the rocks. If he picks a flower, it is to be used for medicine or as a charm. Everything that he does is susceptible of some wrong interpretation.—2. The Presence of a Missionary. It is a significant fact that at the utmost very few Chu-tei (B.A.) and Chu-chen (M.A.) have been known to profess Christianity. The literati form the most difficult class to reach, and are the most bitter opponents of Christianity; for they are so puffed up with their knowledge, and so firmly convinced that whatever is Confucian and according to tradition is right, that they will not listen to or heed the religious teachings of the foreigner. The Mohammediens are also hard to reach.—3. Superstitions. When every little event of life is bound up in some way or other with their multiple superstitions, the teachings of the Gospel are choked by these thorns of error. 4. Ancestor Worship. By opposing the worship of parents, Christians are regarded as unfaithful, and the doctrine which refuses the rites of worship to father and mother is viewed with dislike and scorn.—5. Opium. This is the most serious obstacle to the evangelization of the Chinese people that some detail is necessary to make its gravity apparent. Previous to the 15th century opium was used in China only in small quantities as a medicine. Till 1767 the trade with India was through the Portuguese, who imported annually about three hundred chests weighing 140 lbs. Even as late as 1830 a large city like Hanchau had no opium dens. Now it has 2,000. The rapid growth of the evil dates from 1773, when the East India Company entered on the business. In 1790, 4,054 chests were imported; in 1799, 5,000; in 1826, 9,000; in 1830, 16,800. In 1834 the East India Company closed its factory, but British officials continued the traffic, bringing 34,000 chests in 1836. After that, piculs of 133½ lbs. each were substituted for chests, and in 1850, 52,925 piculs were imported, the number steadily increasing to 75,308 in 1860; in 1887 it reached 96,746 piculs, thus increasing from 12 tons in 1767 to 5,312 tons in 1887. The value of the opium imported into China in 1901 was $23,199,500.

Up to 1860 opium was smuggled into China. In 1789 (because they could not take it on shore) it was stored in Macao vessels, and thence taken in charge by Chinese smugglers. The Abbé Raynal (Tract i., p. 424) writes
in 1770: "The Chinese emperors have condemned to the flames every vessel that imports it." It was prohibited in 1796, 1799, 1809, 1820, 1836, and 1837, and always on moral grounds. In 1828 the severity of the laws almost destroyed the trade. In 1831 and 1834 England sent men-of-war to Canton and armed the lorcha of the smugglers. In 1830 strangling was the penalty for selling the drug, and an offender was thus executed at Macao in 1832, in the presence of a crowd of foreigners. Still Chinese prohibition did not prohibit.

A crisis came in 1839. The imperial commissioner, Lin, wrote to Queen Victoria, imploring her to put an end to the traffic, and in twenty days committed to the flames 20,283 chests of opium, thus destroying $10,000,000 worth of the drug, which was British property. This brought on the war of 1840, and at its close, besides ceding the island of Hongkong, China paid $12,000,000 for the expenses of the war, besides the price of the opium. But when Sir Henry Pottinger demanded the legalisation of the drug, the Chinese peremptorily said to him: "True, I cannot prevent the introduction of the poison, but nothing will induce me to raise a revenue from the vice and misery of my people." It would seem as the a Christian nation would have thanked God for such words from a heathen monarch, and rallied to his aid. But the usual hold until, in 1857, a smuggler bearing the British flag was fired on by the Chinese authorities at Canton, and its crew were held as prisoners. The refusal of the Chinese to make any reparation for an act which violated the treaty was punished by the bombardment of Canton. France joined with England in the enterprise of securing respect for solemn treaties. The allies continued their advance toward Peking. The Emperor was forced to grant new facilities to foreign commerce, besides paying $10,500,000 to England and $6,000,000 to France as indemnity. But the effect of the new treaty was to legalize the opium trade by teaching the Chinese that their bungling and technically illegal interference with it could but be punished. After 1860 the Chinese government made few efforts to discourage the cultivation of the poppy, if, indeed, they preferred not to enrich those who had so persistently fastened the plague upon the country. In the province of Sze-chuan, government interference with raising opium ceased in 1865. It was not long before the efforts of the government were directed toward securing the largest possible revenue from the opium trade.

An eminent British subject, Archdeacon Monle, of Shanghai, said in summing up the relations of Great Britain to the opium trade: "British authorities in India, well aware of the attitude of the Chinese Government, deliberately prepared to send opium to China, with only two years' intermission, for sixty years."

The terrible results upon the Chinese people of having opium placed within their reach quickly attracted attention. The Shanghai Conference of 1877 said emphatically: "We know that opium is a curse, both physically and morally, to the Chinese. We must appeal to the great heart of England, and when her heart beats warmly on this question this foul blot on her fair name will be wiped away."

Mr. Alexander Wylie, of the British and Foreign Bible Society, wrote about the same time: "Unless some means be found to check the practice, it bids fair to accomplish the utter destruction of that great empire."

Ten years later, Rev. J. Hudson Taylor wrote: "In China are tens of thousands of villages with small trade outside influence, but hardly a hamlet where the opium pipe does not reign. It does more harm in a week than all our missionaries are doing good in a year. The slave-trade was bad, the drink is bad, but the opium traffic is the sum of villainies. It debauches more families than drink, and it makes more slaves than the slave-trade." Such testimonies might be multiplied. The opium habit, encouraged by those members of a Christian nation who are interested in developing the revenues of India through poppy-culture, is a direct barrier to the progress of Christianity in China. Now terribly true this is can be seen by noting the effects produced by the immense amount of opium consumed in China.

The opium-smoker may be detected in a crowd by his hollow eyes, sunken cheeks, emaciated frame, and pallor and meagre form, as he heaves deep breaths for hours a day to inhale the drug, and then he cannot work more than two hours before he must repeat the dose. If he has not time for his rice and opium, he chooses the last. If he has not money enough for both, he buys only opium. If he has no money he pawns his clothes. If they are already pawned, he steals. He even sells his children into slavery, or his daughters to a life of shame, that his accursed appetite may be fed. Often wives are sold that the husband may have his opium. If he cannot get the drug, water flows from his eyes, his throat burns, his extremities are cold, and he dies in agony. One missionary reports that in three years he was called to attend thirty-six attempts at suicide caused by opium.

The opium habit has, furthermore, an indirect result in obstructing missions, because the Chinese who see its evil ascribe its prevalence to Christendom, holding all foreigners alike responsible for the defeat of the attempts of the authorities to break up the trade. An opium-smoker came to a missionary from a distant city to be cured of his habit. At once he became so sick that a missionary feared he would die, and told him so. He thought it all over, and said, "Teacher, I take the responsibility: live or die, do for me what you can;" and, by the blessing of God, on the means employed the poor wretch was brought back from the very gates of death. A Chinese is apt to be very obtuse respecting vicious practices. But as to the evil and degrading tendency of the opium habit, he is of one mind with the missionary, who would quite as soon receive to the Church a burglar as an opium-smoker. The effect of this feeling upon the attitude of a considerable class of Chinese toward Christendom and its missionaries is illustrated by incidents like the following: A missionary in preaching happened to mention hell. "Yes," replied a respectable elderly man in the audience, "since you foreigners came, China has become hell."
578 untrained men, 772 missionaries' wives and 835 other missionary women; and among these there are 162 male physicians and 79 women physicians. The number of native workers of both sexes was 6,388, and the roll of native evangelical Christians includes 112,808 names. The missionary organizations laboring in the Empire, including their social, educational and medical work, have been listed under the heading of foreign workers on the field, number sixty-seven. The seaboard provinces of China contain by far the largest number of Christians, the missionaries are widely distributed over the eighteen provinces. The leading boards doing agricultural work are the Presbyterian Society of China, the China Inland Society, the Lutheran China Mission; in Kiang-su, the PS, the CIM, the PN, the CMS; and the German General Mission Society; in Che-kiang, the CIM, the CMS, the ABMU, and the PS; in Fo-kien, the CMS, the ME, the ABCFM and the Presbyterian Church of England; in Kwang-si, the Basel Missionary Society, the Presbyterian Church in China, the Russian Missionary Society, the Russian Missionary Society of England, the Russian Missionary Society of China, the ABMU, the CMS, the SBC, and the PN; the Berlin Women's Society for China, the German Mission to the Chinese Blind, and the Kiel Mission to China; in Kwang-si, the CA, the WMS, and the CMS; in Yuen-nan, the CIM; in Sze-chuan, the CIM, the CMS, the ABMU, Friends' Foreign Missionary Association, the Barmen (Germany) China Alliance, and the Canadian Methodists; in Kan-su, the CIM, and the St. Chrischona Mission; in Shen-si, the CIM and the BMS; in Shansi, the CIM, the BMS, and the ABCFM; in Mongolia, the LMS, the CA, and the Scandinavian Mission Alliance of North America; in Ho-nan, the CIM, and the CP; in Nang-hwei, the CIM, the FCMS, the PE, and the St. Chrischona Mission; in Hu-pei, the LMS, the CIM, the WMS, the PE, and the Scandinavian Mission Alliance of North America; in Kiang-nan, the CIM, the ME, the SBC, and the Barmen (German) China Alliance; in Hu-nan, the LMS, the CIM, the PN, the PE, and the CP; and in Kwai-chau, the CIM. The American, the British and Foreign Bible society, and the National Bible Society in London, together with the Society for the Diffusion of Christian and General Knowledge among the Chinese, and the various tract societies, have exerted great influences for good in different parts of the Empire. At present, the forms of Christian work that are most effective among the Chinese are:

**Medical Institutions:** Many doors have been opened for effective Christian work by means of the practises of medicine among the natives. Dispensaries and hospitals are being established in many parts of the land, the number now existing (1900) being 259; and the 246 medical missionaries are recognized more and more as a power for righteousness in the whole field.

**Educational Work:** In the day schools hundreds of pupils are taught the rudiments of a Western education, and by means of the Bible, the truths of the Gospel are imparted to them. The pupils are brought into close association with the missionaries in the boarding-schools; and, also the numbers are comparatively few in these institutions, most effective results have been accomplished. There are 170 of the higher educational institutions in the missions in China. In our sense of the term, the highest education may not yet be imparted by the missionary universities, colleges and other such establishments, but practical education for Christian service through the station classes, and the faithful instruction that is being given in the theological schools serve an important purpose in intellectual and spiritual development. In the matter of equipment of the native teachers and preachers.

**Literature:** The Chinese are preeminently a literary people, and much attention has appropriately been given to literature in Chinese missions. The preparation of educational works, the translation of the Bible, and the several on revised versions have been almost entirely the labors of missionaries; and through the mighty agency of the pen the coming of the Kingdom in the Middle Kingdom has been hastened.

**Evangelism:** Chapel services, street preaching, and house to house visitation at 953 stations and 2,476 out-stations along the seacoast and through the inland provinces, have, as in apostolic times, proved to be divine means for the conversion of souls. The present outlook for the cause of Christ in China is most hopeful from every point of view. The testing season of 1899 and 1900 has not been without its trials, yet those have been far less than the enemies of the cross; and the evidential care shown in dire distress—all these evidences of the divine grace have done much toward clearing the track for the chariot of our King. *China for Christ* should be the watchword for this generation. Amen.

**CHINA INLAND MISSION (1865):** The founder of the China Inland Mission, the Rev. J. Hudson Taylor, went to China as a missionary in 1853, under the Chinese Evangelization Society. Conscientious difficulties soon afterward led to a friendly separation, and until 1869, when failing health compelled him to return to England, he worked independently. In 1862 Mr. and Mrs. Meadows went to take up the work he had laid down in the province of Che-kiang, followed in 1864 by four others.

In the meantime constant thought and prayer brought to Mr. Taylor the conviction that something ought to be done for the people of China; none of the existing societies seeming prepared to make the attempt. How to inaugurate such a work was a problem in itself. How to do it without diverting men and money from existing societies was another problem, for Mr.
Taylor determined that the new undertaking must "aid all and injure none." The result was the adoption of certain principles which rule the CIM: (1) It was foreseen that to meet the vast needs of inland China all the volunteers obtainable from every branch of the Christian Church would be required; nor was there felt any insuperable difficulty in working in the mission field with members of various denominations. The new work was therefore made interdenominational and international. (2) The workers have no guaranteed salary, but trust in the Lord whom they serve to supply their needs. (3) No personal solicitation or collection of funds is made or authorized by the mission, voluntary contributions alone being received.

Development: It is worth while here to note instances of the working of the third principle of the CIM. The needs of China were made known in a little book, China's Spiritual Need and Claim, as well as by public meetings, and volunteers were called for who should be willing to go to China with no guaranteed salary, in reliance on God to supply their needs in answer to prayer. Not long afterward the first missionary party was selected, and, as the time for their departure drew near, contributions began to pour in. A prayer-meeting was commenced on February 6, 1866, to pray for from £1,500 to £2,000, as might be needful, to cover the cost of outfits, passages, etc. On March 21, that is after a month and six days, it was found that £1,874 5s. 11d. had been contributed in answer to daily prayer. Later on, a survey of the needs of the mission led its senior members, on November 25, 1851, to offer prayer for seventy new workers in the years 1852-3. In the years 1852-3-4, seventy-six new members reached the field of the CIM. The proportions, however, of men and women were not those that had been asked for. The Lord of the harvest reversed the proportions, sending only thirty men and more than forty women, thus anticipating the remarkable and unexpected developments of women's work, which will be noted farther on.

It need scarcely be said that, together with the prayer for seventy, the necessary funds to send them out were also asked from God. Special prayers were asked for these funds on January 31, or February 1, 1852. On February 2, a report was published of £3,600 received at the office of the mission in London for this very object. On September 1, 1884, the same donor sent £1,000 for the same fund. The contributions from the commencement up to May 25, 1870, amounted to £51,918 11s. 2d., a sum which had covered all the needs and left a small balance of general funds with which to commence the second decade, besides £3,700 specially contributed for work in new provinces. These funds were without solicitation, in answer to prayer.

In the second decade arrangements were made for the formation of a China Council of Senior missionaries to superintend the work in various provinces. The first session of this council (now meeting quarterly at Shanghai) took place in Nangan-King in November, 1886, and one of the most important votes adopted at that session was the appeal for a hundred new workers for the CIM to come out in the following year. Prayer was made for them. The £10,000 necessary to cover the expenses of this movement were also asked from God, with the particular request that this might be specially given in large sums, and in addition to the ordinary income of the mission. The annual report of the China Mission for 1888 contained as its frontispiece the photos of the hundred who left England in 1887; and the report of the annual meeting held in London on May 29, 1888, records that the income of the year 1887 had been raised from £22,000 to £35,700, of which £10,000 had been received in one contribution, varying from £500 to £2,500 in amount. Once more, in 1890, the newly erected premises at Shanghai were occupied by the mission, the whole cost of site, building, furnishing and removing having been supplied for this purpose, in answer to prayer, without cost to the mission.

All the operations of the mission are in accordance with one general and comprehensive plan for the evangelization of the whole of China. In occupying a new province, the first step is to open up stations in the chief prefectures, then in subordinate ones, leaving as a rule places less important to be occupied later on.

In carrying out the plan of the mission it was necessary to explore China anew, from the missionary standpoint, but in the meantime the spread, evangelistic and colportage work was done in nearly all the provinces, and also in parts of Manchuria, Mongolia, Ssu-kiang, as far west as Kulja, Eastern Tibet and Upper Burma. Following this up stations were opened on the more promising lines of the fifteen provinces, in which the CIM has work, as well as in subordinate cities. The report dated May 26, 1878, told of the missionary journeys of twenty pioneers, and contained a large map showing the routes each had taken, which covered an aggregate of 50,000 English miles.

One of the most noteworthy extensions of the second decade, and one fraught with far-reaching issues, was that of women's work in the interior of China. In January, 1876, when Miss Wilson, or Kendall, said at her farewell expense, that there was only one unmarried CIM lady in the field, Miss E. Turner. A good many others followed Miss Wilson, and not only were stations opened for women's work in the interior of the nearer provinces, but within the short space of three years. In October, 1878, women had been able to enter and settle in six of the inland provinces, besides bringing the Gospel to hundreds of women in Ho-nan and Hu-nan, where permanent residence was then unattainable. Only those who know the difficulties and trials of life in the heart of China and the dangers and hardships of long journeys in such a land can fully appreciate all that these facts mean; only those who have experienced continued loneliness, isolation and peril among the heathen, can know what those pioneer women endured who, under such circumstances, have faced sickness, far from any medical aid, acute suffering, and even death itself, can understand what the sacrifice involved that was sealed by the first missionary graves in far-off Shen-si and Yun-nan.

A far-reaching issue from the first session of the Mission Council at Shanghai was the formation of training homes for newly arrived missionaries, the preparation of a series of books to aid in the study of the Chinese language, and the drawing up of a course of study in six sections to be pursued until satisfactory examinations had been
passed in each. Ngan-king was chosen as a suitable place for the Men's Training Home and Yang-chau. The latter was selected for the Women's Training Home.

The work whose development has thus been summarized has occupied nearly 40 years, for the embryo mission was organized in England in 1863, the first CIM party only reached Hankow about the end of 1866. Each of the four decades has its own distinctive feature. In the first decade the mission struck its roots in China, and gained experience by opening and beginning to work stations in previously unoccupied districts of nearer provinces. The second decade was the one of widespread mission, and exploration of the more distant provinces, during which the first stations were opened in all the unoccupied provinces except Kwang-si. The third decade was marked by development and consolidation. Widespread itineration was extended to all the districts around established centers, in many of which churches were organized, and in others the fruit is beginning to appear. During the fourth decade the mission has gone through the severe test of the riotous outbreak against the undertakings of the CIM.

Organization: During the first six years the home department of the CIM was administered by W. T. Berger, Esq., who became the first Honorary Home Secretary of the Mission. Failing health compelling him to lay down the work, in 1873 the London Council of the CIM was formed, and for two or three years two of its members acted as honorary secretaries, but the increasing needs of the work demanding additional help, a resident secretary was appointed, and further additions to the personnel have been made from time to time. This council meets weekly for the transaction of business. Auxiliaries have been formed in different countries as the work has grown, cooperating with the London Council in the selection and training of candidates and in the management of the mission. These funds are remitted to the treasurer in China and he supplies the needs of all those not otherwise supported, the funds being distributed pro rata.

In 1903 Mr. Hudson Taylor appointed Mr. D. E. P. Young, one of the Cambridge Seven, as General Director, thus relieving himself from the heavy duties of active leadership, while retaining the office of Consulting Director. Up to the year 1889, British candidates had been received and entertained by the General Secretary and his wife, but as the mission grew this was no longer possible. In that year an auxiliary council was formed in Scotland, to deal in an initial way with any Scotch candidates who were applying; a council of ladies was also formed in London and premises were taken as a home for lady candidates. Each of these two adjoining houses have since been added. Inglesby House, Newington Green, London, was acquired by the mission as a home for men candidates, and mission premises were erected in 1894 on a site behind this house.

Organization in the field: The direction of work in the field is not by a committee at home, but by a Missionary Director, assisted by a council of senior and experienced missionaries, who as superintendents of the work in the different provinces help and guide those who have less experience.

New workers on arrival in the field as probationers usually go to one of the training homes established by the mission. There, for about six months, they receive the English or Chinese teachers careful instruction in the language, and are taught besides much that will be helpful to them as to the geography, government and etiquette of the country, the phases of religious thought, and the best method of communicating the Gospel to the people. Then they commonly proceed to some of the inland stations of the mission and continue their studies, assisting, as able, in the work, under the supervision of senior missionaries. A definite course of study is pursued, divided into six sections, and periodical examinations from time to time test the progress of the student. If his progress has been satisfactory, and there is promise of permanent and useful work, the probationer is accepted as a junior missionary, the end of two years, and assists one of the senior missionaries in his district. If at the end of five years he has done well, and has passed all his prescribed examinations, he becomes one of the senior missionaries, taking full responsibility for the work of a station, the district surrounding it, and such of the younger workers as are placed under his supervision. Over a number of these stations as a superintendent, it is probable he has probably been in the country from ten to twenty years. The senior missionaries can be called together when necessary to act as a council and confer with the superintendent about the whole work of his provincial district. All the superintendents are members of the general council of the mission in China. From the extent of the country it is not possible for the whole number to meet together frequently, but a sufficient number of them are able to attend the quarterly meetings, at which the director and deputy director concerning matters that affect the whole work of the mission in China. The work of the mission being interdenominational, it is found helpful to cluster together workers whose views of church government are similar, and to work and travel together. When a number of natives have been converted, and the time comes to organize a church, the senior missionary who is responsible for the conduct of the work is perfectly free and unfettered, and will organize the church according to his own conscience and conviction. When a church has once been formed on any definite lines, those who afterward superintend the work do so on condition of carrying it on as it was commenced. The mission embraces Episcopalians, Presbyterians, Congregationalists, Baptists, Methodists, and a few independent workers, all recognize each other as fellow-servants of the same Master, happily meet when occasion requires at the table of the Lord, and recognize each other's converts, however or by whomsoever admitted to the privilege of church fellowship, provided they are pious and consistently before God and their fellow countrymen.

Mission: The Lammermuir party, consisting of Mr. Taylor, seventeen adults and four children, arrived in China in the fall of 1866, to find that the inland China was open for travel, it was not for residence. Efforts to obtain quarters in various cities and towns between Shanghai and Hanchau having failed, promises were finally secured in the latter city, and a fourth station was established in the province of Che-kiang; Ning-po, Shao-hsing and Pung-hwa having previously been occupied. During 1867, three more
stations were opened in Che-kiang, and the first CIM station established in Kiang-su. Su-chau and Yang-chau were occupied in 1868 and additional stations gained in Che-kiang. In 1869 Neuroth, till 1874, when the Ngn-hwei province, was occupied, and for many years the CIM was the only Protestant society in this field. The same year work was begun in Kiu-kiang, in the northern edge of Kiang-si, from which place over 100 towns and cities in the province of Kiang-si were reached by itinerations. No other province was entered till 1874, when Wu-tung. The capital of the Hu-pei province, was occupied with a view to entering the nine interior provinces, wholly untouched by Protestant missionaries. In 1875 a station was opened at Bhamo in Upper Burma, a site having been granted for this purpose by the King of Burma. The same year itinerating work was begun in the province of Hu-nan, and about the same time a first visit was made to the anti-foreign province of Hsueh-nan. By this time the CIM had 36 missionaries and 75 native helpers, occupying more than 50 stations and outstations; 28 churches were already formed, and there were baptisms and inquirers in many places, all of which had been largely pioneering. In 1876, the signing of the Chi-fu Convention enabled the CIM missionaries to visit remote provinces, and in this and the following year Shan-si, Shen-si, Kan-su, Sze-chuan and Kwei-chou and Hing-nan were occupied. During the next few years a more thorough survey was made of the parts of China unoccupied or less occupied by missionaries. Thus information essential to future work was gained, portions of the Scripture and tracts were distributed, and the Gospel was preached from the border of Korea to Ji-yang and Bat'ang in Eastern Tibet, and from Kan-su to Hai-nan. In 1897 extensive enlargements were made in the mission's schools at Chi-fu for the education of the children of missionaries and other foreign residents, and in 1898 a forward movement began, which was cut short by the Boxer uprising of 1900. In this terrible outbreak of fanaticism the CIM suffered heavier losses than any other society, fifty-eight missionaries and twenty-one children of missionaries having been put to death. In 1902 two more of its missionaries suffered martyrdom. Their names and the circumstances of their death are recorded in the mission's Annual Report. A new movement for the protection of life and property called forth one of the most remarkable government proclamations ever issued in China, and has done not a little to secure the good will of the officials and people.

*Forces in the Field: There are now (1903) 509 stations and outstations in 18 provinces, 15,823 missionaries, men and women; 541 native workers, and 9,000 communicants in the field of the CIM.*

Branches: Australian Council (1890), Melbourne; Finnish Auxiliary (1890), Helsingfors; Hamburg Branch (1898), Hamburg, Germany; North American Council (1888), Philadelphia; Norwegian Branch (1890), Christiania; St. Chrischona Branch (1895), Basel, Switzerland; Scottish Council (1889), Glasgow; Swedish Branch (1887), Stockholm.

*Associate Missions: A number of independent organizations in various countries work in harmony and coöperation with the CIM, while not organically connected with it. These are:*

**CHI-NAN-FU.** See TSI-NAN-FU.

**CHINESE BLIND, Mission to the.** See *BLIND, Missions to.*

**CHINESE LANGUAGE:** Belongs to the monosyllabic class of languages, and is considered by some to show affinity with the ancient Accadian of Babylonia. Whatever its origin, it is the oldest spoken language in existence, and, along with the Egyptian and cuneiform, the oldest written language. It is monosyllabic, without inflexion or agglutination; its nouns have no declensions, its verbs are not to be conjugated. A mythical personage, who is said to have flourished about the year 2700 B.C., is the reputed author of the characters. The earliest form of writing was similar to the Egyptian hieroglyphics, and in the main the structure of their characters is that of an ideogram. These characters are divided into six classes: 1. Imitative symbols; 2. Thought symbols; 3. Combined ideas; 4. Inverted significations; 5. Borrowed uses, and 6. Sound symbols, or phonetics. In general the characters are formed by the use of 214 radicals. Some of these are simply strokes, but most of them are combinations—combined with primitives, as they are called, which in reality are no older than the radicals, but denote simply the part of the character which is not a radical, or a combination of radicals. The number of characters given in Kanghi's Dictionary is 44,449, but the total of really different characters is much less, probably about 25,000, and for a good working knowledge Chinese 10,000 will suffice. In the dictionaries the characters are found by looking up the radical; if there is more than one radical in the character the most prominent one is looked for first; then the number of strokes in the character, exclusive of the radical, is the guide to the place under its given radical where it may be found. The characters are the same throughout the eighteen provinces, and one who can write Chinese can be understood by it means anywhere. In writing the language six forms of characters are met with in common use, the symbol and art of the Chinese have devised many other forms, just as new types and fancy lettering are indulged in by printers and penmen in other countries. Of all these styles, the pattern style and the running style are the ones in most common use, and the foreign student may well be satisfied to master one—the pattern style. The Chinese language has no inflexion, no conjugations, neither has it marks for the number and gender of nouns. This poverty of language is compensated for by the tones. The correct use of tones, and the ability to distinguish them when heard and to utter them correctly, is the hardest task in the acquisition of the language. Not only does the language become unintelligible when a wrong tone is used, but in Fu-chau, Amoy and Canton the misunderstanding may be very serious.

Grammar: As there are no case endings, position shows the case of the words. In general the subject stands first, then the verb; modifiers precede the word modified. Often the change of tone changes a noun to a verb. There
are no articles; a man is spoken of as one man, and that takes the place of the. To form the plural of nouns a particle is added, as wo, "I;" wo mun, "we;" or the noun is duplicated, yin, man; yin yin, all men. Moods and tenses are denoted by inflections, the various dialects of time are especially difficult to express in Chinese. The imperative, optative and potential moods are formed by the addition of the appropriate words. Pronouns are few and their use is avoided. In writing no distinction is made between a Chinese and a proper noun, the often one line drawn alongside the character denotes the name of a person, and two lines that of a place. Capitalization, which is exceptional, is produced by placing the character above the ordinary line level.

Diabets: There are in China numerous dialects, some of which are so different from the others and are spoken by so many people that they may well be termed languages. The principal dialects are:

1. The Mandarin or court language. Pekingese is the standard of this tongue, which is spoken with more or less local variation in the north-eastern provinces. It is the Latin of China, as most learned men, and especially office-holders, are versed in it, and in all the provinces some are found who can converse in it.

2. The Cantonese. This is the standard for the province of Canton, the there are several other dialects spoken in the Canton province. The Cantonese differs from the Pekingese in its idioms, in the multiplicity of its tones and in the number of consonantal endings.

3. The Amoy dialect differs still more from the Pekingese, and is also unintelligible to a Cantonese.

4. The Fu-chau dialect has much the same difficulties as the Amoy tongue, and is also different from the others. In addition to the principal dialects, there are variations of each and local patois in endless variety.

Book Language: A sharp distinction is drawn in Chinese between what is spoken and the same thoughts as written. The Chinese writer who would express himself in the every-day language of the people would be considered ignorant of the first principles of composition. We find, therefore, a book style, Wen-li, which is terse, concise, at times obscure, and so lofty in its expression that when read aloud to the uneducated man it is not understood. It is understood by the scholar, whether he be a native of Peking or Canton. There is also a modification of the Wen-li called the Easy Wen-li, which, as its name implies, is not so concise and is more intelligible than the strictly classical Wen-li. The fact that this written language is intelligible throughout the Empire binds the people together and is an efficient aid to the dissemination of Christianity, as books can be distributed, read, and understood where the distributor may be perfectly helpless, owing to the difference in the spoken language. In opposition to the Wen-li, books have been translated into the different colloquial styles, and while they are sneered at by the literati as being fit only for women, they are read and understood by those who possess only a limited knowledge of characters and no great literary ability. In many instances attempts have been made by the missionaries to promulgate the various dialects, with such success as to receive the endorsement of the Missionary Conferences.

Methods of study: The degree of difficulty in mastering the Chinese language depends, as in all other languages, upon individual ability. To learn the spoken language the best way is to go right among the people; what seems jargon may be understood to be a language, and once mastered on the ear, while a vocabulary will be acquired at the same time. Unless his destination is definitely settled, it is practically useless for the missionary volunteer to commence the study of the language before reaching his field; but if the destination is known, some of the books in that particular dialect, which have the English and Chinese side by side, will be found of use for the general idea of the structure of the language and the idioms. In studying the written language the best way is to take up the study of the character separately, in order to recognize its form and to distinguish between those which differ in minute details. Writing Chinese is best learned by using the Chinese method of copying the characters, by writing on thin paper over a copy. Chinese is written in perpendicular columns from right to left.

Those who know the Chinese language best, while recognizing its deficiencies, can truthfully say with Dr. Morrison that "Chinese fine writing darts upon the mind with a vivid flash, a force, and a beauty of which alphabetical language is incapable."

CHING-CHOW-FU (Shantung). See Tsing-Chau-Fu.

CHIN-KIANG. See Chen-Kiang-Fu.

CHIOLE: A station of the Zambesi Industrial Mission, in Nyassaland, British Central Africa, situated about 100 miles N. W. of Blantyre. It has (1902) 2 missionaries, 1 missionary's wife, 1 woman missionary physician, 28 native workers, 10 elementary schools, 1 high school, with industrial department; 1 hospital, 1 dispensary and 169 communicants. By the use of native volunteers there is preaching in 40 neighboring villages every Sunday.

CHIPPEWAY LANGUAGE: Belongs to the central group of the N. American family of languages. It is spoken by Indians of Athabasca, Canada. It is written with syllabic characters.

CHISAMBA: A station of the ABCFM in Angola, W. Africa, situated about 50 miles N. E. of Balunda, with (1902) 3 missionaries (one a physician) and their wives, 3 missionary women, 8 native workers, 6 elementary schools, 1 high school, 1 industrial school, 1 dispensary and 50 church members.

CHITTAPETTA: A town in the Godavari division, Madras, India, situated about 20 miles W. of Rajamahendri. Station of the PB, with 1 missionary and his wife and 2 missionary women.

CHITTAGONG: A town and seaport in Bengal, India, 212 miles east of Calcutta. It has considerable commercial importance. Climate, wet and unhealthy, diseases arising from impure water and imperfect drainage are very prevalent. Population (1891) 24,100, of whom nearly 75 per cent. are Mohammedans. Mission station of the BMS (1881), with 2 missionaries and their wives, 5 native workers, a school and 57 professing Christians.
CHITTUR: Capital of the district of North Arcot, Madras, India, 80 miles west of Madras City. Population, 5,809, Hindus, Muslims, Christians. Station of the RCA (1854), with 1 missionary and his wife, 43 native workers, 19 outstations, 18 elementary schools, 2 high schools, 21 Sunday schools, 6 young people's societies and 74 preaching Christians.

CHIVILCOY: A town in the Argentine Republic, South America; situated 109 miles W. of Buenos Aires. Population, about 11,000, of whom many are Italians. It is on a missionary circuit of the ME, with 1 native worker, 1 place of worship and 74 professing Christians.

CHOLCHOL: A town in the province of Arauco, Peru, situated about 100 miles south of the city of Arauco. Station of the South American Missionary Society (1896), with (1900) 1 missionary and his wife, a hospital and a dispensary.

CHOMBALA: A town in Malabar, W. India, situated about 25 miles N. W. of Calicut. Station of the Basel Missionary Society (1849), with (1902) 2 missionaries and their wives, 35 native workers, 6 outstations, 5 common schools, 1 high school and 219 Christians.

CHOTA-NAGPUR (little Nagpur): One of the four great districts which make up the province of Bengal. It lies west of Bengal Proper; Behar adjoins it on the north and Orissa on the southeast. Its western boundary is the native State of Rewa, and on the southwest it touches the Central Provinces. Its area is 26,963 square miles, and its population (1901) 4,900,429. Of these a little over 3,850,000 are reckoned as Hindus and about a quarter of a million as Mohammedans. Aboriginal tribes furnish nearly 500,000 of the population, but many of these included religiously under the term "Hindus" are connected by race with these tribes, the members of which are continually adopting more and more of Hindu practise, and merging by degrees into the body of Hinduism. The tribes belong principally to the Kol and Santal families, who had no education and no writing until Christian missions came among them.

The missionary work was commenced in Chota-Nagpur in 1845 by the German Gossner Missionary Society. Its task was to carry light to those Kols sunk in ignorance, to whom even Hindism was somewhat of an advance beyond their ancient worship of demons. The mission enterprise had great success from the first. The SFG came into the field to take part in the work, and now the Christian movement seems to affect the people in mass, whole villages coming forward for instruction at once. The number of Christian Kols in Chota-Nagpur is about 80,000.

CHRISTIAN CHURCH: Mission Board of the: For many years the Christian denomination in the United States and Canada conducted its missionary operations under two separate organizations, as departments of the American Christian Convention, the ecclesiastical body of the denomination. The Foreign Mission Department was organized in 1886 and commenced work in Japan in 1887. More recently these separated bodies have been reunited as one and incorporated under the above title.

The affairs of the Board are conducted by a Mission Board of nine (1903) members, elected quadrennially by the American Christian Convention and a Mission Council of five members, the Secretary of the Missionary Department of the Convention acting as President of the Board. There are also two Women's Boards, one for Home and one for Foreign Missions, both auxiliary to the Mission Board.

The foreign work of the Board is in Japan and Porto Rico (so considered by the Board). In Japan two missions are conducted, Tokio and Madu, and there are 18 outstations. There are 7 missionaries, 10 native workers, 7 organized churches, with 382 church members and 795 Sunday school scholars. In Porto Rico the headquarters are at Ponce, with work at Salinas and 18 outstations; there are 14 missionaries, 1 native preacher, 1 organized church and 5 Sunday schools. The receipts for foreign work for the year closing October, 1902, were $10,329.40.

CHRISTIAN FAITH, Society for Advancing the: The Hon. Robert Boyle, distinguished for his learning and interest in the extension of Christianity, who was one of the governors of the "Corporation for the Propagation of the Gospel in New England" (1690) and the founder of the East India Company, not only contributed largely to various missionary enterprises, especially in the line of publications, but left a considerable sum in his will which formed the basis of a society organized after his death, in 1691, by his executors, who were the "Christian Faith Society." Afterward the "Society for Advancing the Christian Faith," was designed for general charitable purposes, but the executors were directed to use the greater part for the advancement of the Christian religion amongst infidels. The funds have been well invested and cared for and the grants have been of great value, many undertakings having been fostered which without this aid would never have succeeded. For many years grants were made to William and Mary College, in Virginia, for the education of Indian youth. Then attention was turned to the negro slaves in the West Indies and to Mauritius and other dependencies of the British Government.

CHRISTIAN AND MISSIONARY ALLIANCE: I. History: In the summer of 1887 the Christian Alliance and the International Missionary Alliance were formed at Old Orchard, Me., "for the purpose of uniting in a purely fraternal alliance, members of evangelical churches who believe in the Lord Jesus as Savior, Sanctifier, Healer and coming Lord, and also of uniting their effort in the special aggressive work of world-wide evangelization."

The Christian Alliance was formed upon the special basis of this "Fourfold Gospel." It is not an ecclesiastical body, does not organize distinct churches, but aims at spreading abroad the truths on which it is based. Its chief methods of work are through local conventions and its printed publications. An important branch of its work at home is the formation of Rescue Missions.

The International Missionary Alliance had for its object "the immediate evangelization of the whole world by sending missionaries to unoccupied and neglected fields. The movement went quietly, and at the end of the eight years of its work were established in India, Africa, China and Palestine. These two societies were united into the Christian and Missionary Alliance in 1897. "The Christian Alliance formed the sustaining constituency of the missionary work, and the Missionary Alliance was the natural outlet of
the faith, love and activity of the Christian Alliance."

II. Organization: A central board of managers meets regularly for the transaction of business and has the oversight of the entire work. It consists of 24 members, elected triennially, one-third retiring every year.

The officers include a President, General Secretary, Superintendent of the Home Field, Superintendent of Missions, Treasurer, Financial Secretary and "various other executive officers." Annual conventions are held under a strong State Committee, with a State or District Superintendent in charge of the field, while in each locality there are local branches under the care of a Committee and Superintendent as far as possible. The work is promoted by means of numerous conventions held in all parts of the country, the largest being at Old Orchard, Me.; Nyack, N. Y., and New York City. The work is sustained through voluntary contributions.

III. Institutional Work: The Gospel Tabernacle, New York City, is an independent church, incorporated by special charter under the laws of the State of New York, and intimately connected with the Alliance, organized in 1881. The New York Missionary Training Institute, founded in 1882, in connection with the Gospel Tabernacle, removed in 1897, to South Nyack, N. Y. It is a coeducational school for the training of young men and women, who, with little or no education, consider themselves called of God to missionary work. Special attention is paid to the equipment of foreign missionaries and securing their adaptability to their various fields of labor.

The Beulah Park Summer School is maintained from June to September, the course of study being similar to that of the Nyack Institute.

The Berachah Home, established in 1884 for the purpose of offering a place of rest and instruction with reference to physical and spiritual life, with particular attention to divine healing, which is a principal tenet of the Christian Alliance, is now located at Nyack, N. Y., while the house in New York is continued as the "Alliance Home."

IV. Missions:

(1) Palestine: A station was established at Jaffa, Palestine, in 1890 by Miss Lucy Dunn, who for a year carried on evangelistic work among the Jews. Renewances were sent out and Jaffa was occupied and the work extended to the Arab tribes near the town. In 1895, a mission was established at Safed in Galilee, chiefly for Mohammedans. In 1898 a training school was opened at Jaffa for the training of Bible women and teachers. Village work is carried on from Hebron as a center. There are (1902) 3 stations and 5 missionaries.

(2) India: There are four principal centers of work, with headquarters at Bombay. The oldest station is at Akola, in the Berar Province, where the CA took up the "Faith Mission" established in 1886 by the Rev. M. B. Fuller; there are now 8 stations and 25 workers. Khandesh has 4 stations and 8 workers; Gujarat, 5 stations and 20 workers.

The work consists of preaching services, evangelistic tours, and house to house visitation. Schools, orphanages and widows' homes have been established and churches organized.

There are (1902) 22 stations and 53 missionaries.

(3) China: The first station was opened at Wu-hu, in Central China, in 1890. Now there are 8 stations in and around Wu-hu, 1 at Wu-chang. In 1897 a station was established in Hunan and in 1899 Nan-ling-h'sien was occupied and a training school for women opened. Western China was occupied in 1896, and has 4 stations, one being within the confines of Tibet. In 1898 the Tibet station was destroyed by a mob, but was again opened. The Swedish China and Mongolia Mission was opened in 1893 at Kwei-h'wa as headquarters. This mission forms a chain of stations near the great Chinese wall from Kalgan in the east, several hundred miles westward in North China, and includes the Mongolian Mission, with headquarters at Kalgan City. The North China Mission has in Peking the strongest part of its work among women. Evangelistic work is carried on, and schools have been established.

At Tientsin work has been begun among the English-speaking Chinese, and a native church of young men has been organized; a missionary society has been formed, which supports native workers in all the provinces of China and in foreign lands. South China was entered in 1892, with Canton as headquarters. Two years later Macao was occupied. In 1895 the first opening was made in a humble village across the river from what is now Tung-tsung station. In 1896 Lo-ting was occupied, and the following year stations were organized at Wu-chow and Kwai-peng. In 1898 Nan-wing was occupied and a ladies' station opened at Tung-uen. Village and girls' schools have been established and a training school opened.

There are (1902) 18 stations and 41 missionaries.

(4) Africa; Sudan Mission: There are 5 stations: Freetown, the capital of the British Colony of Sierra Leone; Magbele, in the same colony, 55 miles inland; Ro Bethel, in the same colony, 20 miles farther inland; Makomp, also in Sierra Leone, 125 miles inland, and Tubabudugo, 225 miles inland, among the Kuranko tribe in the N. E. border of the colony. The Kuranko people have been evangelized to a great extent from the last station and portions of the Scriptures have been translated into their language. Village and school work is carried on and a systematic itineracy established, which includes about 40 towns.

Congo: There are 4 principal stations and 3 outstations. Boma, the receiving and transport station, has many coast people, and services are held in English, while a school is established for their children. The other three stations are also on the lower Congo. School and station work is carried on by the natives under instruction, and evangelistic and medical work by the missionaries.

There are (1902) 11 stations and 39 missionaries.

(5) South America: The headquarters for the CA work are in Argentina, with its 4,000,000 people. Other stations are at Caracas, Venezuela, where native agents are employed in the outlying districts. Brazil has 1 station and 1 missionary; Chile, 2 stations and 4 missionaries; 2 stations are in Ecuador, where the Roman Catholic influence is very corrupt. In Bolivia, a single missionary is making evangelistic tours throughout the country. The principal work in all the Alliance missions is evangelistic. Books, papers and tracts are sold and distributed.

There are in South America (1902) 6 stations and 18 missionaries.
(6) Japan: Work was begun in a quiet manner about 1894. Since then the mission has had many vicissitudes, but is now reported as taking on new and more vigorous life. The headquarters are at Hiroshima. There are (1902) 4 stations and 3 missionaries.

(7) The West India Islands: Work has been begun in three of the West India Islands: in Jamaica (at Devon), in Haiti, and in San Domingo. An independent Alliance work has grown up in the city of San Juan, Porto Rico.

Steps are now being taken by the CA toward work in the Philippine Islands.

The first publication of the Society was the Gospel in All Lands. Afterward the Word, Work and World was established, which was later merged into the present organ, the Christian and Missionary Alliance Weekly.

Another important publication is the Alliance Colportage Library of books setting forth the teachings of the Alliance, principally on Divine Healing and the Second Coming of Christ.

The Alliance has its own printing establishment at Nyaas, N. Y.

CHRISTIAN LITERATURE SOCIETY FOR CHINA (Society for the Diffusion of Christian and General Knowledge among the Chinese, 1887): The founder of this Society was the Rev. Alexander Williamson, LL.D., of the United Presbyterian Church, in China. He was a man of exceptional abilities, who went to China in the 50's and died in 1890.

In 1887 the Society was formally organized in Shanghai, by the missionaries, its object being the publication and circulation among the Chinese of "literature based on Christian principles." The Christian Literature Society for China was formed in Glasgow and Edinburgh in 1892, chiefly with the view of supporting this diffusion society. The two societies are thus practically one, and for convenience are generally spoken of as such. Its workers belong to all the leading missionary societies of England and America. Its editorial staff is composed of six men, representing the American M. E. (South), the English Wesleyans, Canadian Presbyterian, Church of England, German Evangelical, and the English Baptist Missions. All these workers are devoting all or most of their time to the work of translating or preparing original work in the Chinese language. The chief magazine of the Society is The Review of the Times. It also publishes the Chinese Lessons for EZtation.

The great reform movement of China in 1895-98 was largely due to the influence of the publications of this Society, which were read by the Emperor and the leading ministers and viceroys of the Emperor. It was largely through the influence of the General Secretary, the Rev. Timothy Richard, D.D., LL.D., that a college for Western learning was founded in the capital of Shan-si. In 1900, in consultation with the Educational Association of China, Dr. Richard drew up a general scheme of education for China, which is drawing to the Chinese among the leading viceroys and governors. To the wisdom and ability of its secretary no little of the success of the Society is due.

In 1902, besides making free grants of smaller pamphlets to the value of $2,400 (Mexican) for distribution, but is now reported as taking on new and more vigorous life. The headquarters are at Hiroshima. There are (1902) 4 stations and 3 missionaries.

The members of the editorial staff are supported by the missionary societies which they represent.

CHRISTIAN LITERATURE SOCIETY FOR INDIA (formerly Christian Vernacular Education Society for India, 1858): The need of evangelical literature for the converts of India, Ceylon and Burma led to the formation of this Society in 1858. Its object is to train native teachers, instruct heathen children and publish Christian literature, the latter being its principal work.

The publications of the Society fall under two heads: school books and general Christian literature.

They have in the various languages 264 school books cataloged, some of which are so widely used that there is a steady demand for over 1000 copies per annum, and are used in the schools of over forty missionary societies.

In supplying these school books the Society not only puts the thin edge of the Christian wedge into the secular schools of India, but receives from sales of the books a considerable profit which helps in the other branches of its work. For many years the Society has published annually, in the various languages of India, more books than all other societies put together. Since its foundation, the Society has issued in eighteen languages 2,601 publications, averaging 131 pages, and of these, 26,417,000 copies have been circulated, and for some years the output has steadily increased.

In 1859 the Madras Auxiliary was organized, and no one man has had so much to do with the development of a Christian literature for all classes of people as its veteran secretary, John Murdoch, LL.D. In 1860 a second auxiliary was organized in Ceylon and a woman's auxiliary in 1896. There are (1901) 3 stations and 27 outstations, 5 missionaries, and 80 native helpers, g high school, with 80 students, 135 day schools, with 8,110 pupils.

CHRISTIAN MISSIONS, England (1827): The mission work of the denomination commonly known as Plymouth Brethren, but in its own preference called simply "The Brethren," was begun in 1827, the main object being "to spread the Gospel and build up churches." Missions have been established in Europe as well as in non-Christian mission fields as follows: (1903) Europe: Belgium, 2 stations and 4 missionaries; France, 3 stations and 5 missionaries; Austria, 1 station and 2 missionaries; Rumania, 1 station and 4 missionaries; Spain, 17 stations and 51 missionaries; Italy, 5 stations and 11 missionaries.

Asia: Indi (1836), 21 stations and 74 missionaries; Straits Settlements (1866) and Malay Peninsula (1900), 6 stations and 37 missionaries; Laos (1866), 1 station and 2 missionaries; Borneo, 1 station and 2 missionaries; China (1885), 14 stations and 55 missionaries; Japan (1888), 1 station and 2 missionaries.

Africa: Algeria, 4 stations and 10 missionaries; Morocco, 1 station and 2 missionaries; Central Africa (1881), 7 stations and 39 missionaries; South Africa, 2 stations and 4 missionaries; America: Mexico (1890), 2 stations and 4 missionaries; British Guiana, 3 stations and 15 missionaries; West Indies, 4 stations and 10 missionaries; Guatemala, 1 station and 2 missionaries; Venezuela, 2 stations and 3 missionaries; Ecua-
dor, 2 stations and 3 missionaries; Argentina, 4 stations and 16 missionaries; Chinese in U.S.A., 1 station and 2 missionaries.

One of the oldest known branches of the Christian Mission is the Garenzange Mission in Central Africa, which was established as an independent work by Mr. F. S. Arnot in 1881, and subsequently taken over by the Brethren.

Interested in Africa through the words of Livingstone when very young, a strong desire to go to Africa became a reality in 1881, when he sailed from London with Donald Graham. The latter remained at Natal because of failing health, but Mr. Arnot proceeded to Maritzburg.

After years of hard travel through the Zambesi and Botarise districts, finding a suitable place for Europeans, he established several stations. Other missionaries went out and an evangelistic work is thoroughly established in the region of the upper Zambesi. There are (1903) 5 mission stations from Bihé in Angola to Lake Mweru in the Congo Free State, with 15 missionaries.

Organ: Missionary Fidele, monthly.

CHRISTIANSBOURG: A town in the Gold Coast Colony, W. Africa, 4 miles E. of Accra. The place was formerly a Dutch possession. In 1843 a Christian negro colony was transplanted thither from the West Indies. In 1850 the place was sold to the English, and that change gave occasion, in 1853, to some unfortunate disturbances. The climate is unhealthy. Station of the Basel Missionary Society (1858), with (1902) 12 missionaries, men and women; 22 native workers, men and women; 6 outstations, 3 Sunday schools, 5 elementary schools, 1 high school and 1,221 professing Christians.

CHRISTIANAGARAM: A village in Tinneveli, S. India, situated about 25 miles and a suitable Station of the SPG, with (1901) 31 native workers, 12 places of worship, 10 elementary schools and 1,448 baptized adult Christians.

CHRISTIANENBURG: A settlement in Natal, S. Africa, situated W. of Durban and about 9 miles S. of Botha's Hill station on the railway. Station of the Berlin Missionary Society (1854), with (1900) 5 missionaries, 21 native workers, 3 preaching places in the neighborhood and 465 baptized Christians.

CHRISTIAN VERNACULAR EDUCATION SOCIETY, for India. See Christian Literature Society for India.

CHRISTIAN WOMAN'S BOARD OF MISIONS (Disciples of Christ): Organized in 1874 in Indianapolis, where its headquarters have been located. The connected with the Church of the Disciples of Christ it is quite independent and unconnected with the Foreign Christian Missionary Association.

The first work of this Society was the revival of the mission in Jamaica, W. I., which had been practically abandoned. There are now connected with the Jamaica Association 21 churches, with 1,709 communicants and 480 day schools.

India: Work was begun at Bilaspur in 1885, in cooperation with the Foreign Christian Missionary Society; in 1886 a station was opened at Deoghar; at Bina in 1894; and Pendra, north of Bina in 1900. The same year work was begun in the city of Calcutta.

Evangelistic, medical and educational work is carried on, zenanas are visited, lepers cared for and orphanages established. There are (1902) 5 stations and 10 outstations, 43 missionaries and assistant missionaries, 4 churches, with 287 communicants; 10 schools, 3 hospitals and dispensaries and 3 managers.

Mexico: A station was established at Monterey, Mexico, in 1897. The work is educational and evangelistic. Day and evening schools have been established and a church organized, with a Sunday school and Christian Endeavor Society.

In Porto Rico the Bayamon school for girls was established in 1900 and a similar institution is being established for boys. The Board also carried on work throughout the United States.

Organ: Missionary Tidings, monthly, Indianapolis.

CHUANA LANGUAGE. See SECHUANA.

CHU-CHAU: A city in Nangan-hwei province, China, about 25 miles N. W. of Nanking. Station of the FCMS (1889), with (1900) 2 missionaries (one a physician) and their wives, 3 native workers, 1 denominational school, 1 training school for men workers, 2 dispensary, a book depot and 93 baptized Christians.

CHU-CHAU-FU: A town in the province of Che-kiang, China, 43 miles N. W. of Wenchow. Station of the CIM (1875), with (1900) 1 missionary and his wife, 1 missionary woman, 15 native workers, 1 school and 30 communicants.

CHU-CHI-HSIEN: A town in the province of Shen-si, China, situated about 35 miles west of Hsi-nan-fu. Station of the CIM (1893), with (1900) 4 missionaries, one of them accompanied by his wife; 1 native worker, 1 preaching place, 1 high school, 1 oipium victims' refuge.

CHUDDERGAUT: A suburb of Haidarabad, the capital of the dominions of the Nizam.

CHU-KI-HSIEN: A town in the province of Che-kiang, China, lying about 50 miles W. of Ning-po. Station of the CMS (1894), of which the buildings and other property were destroyed by rioters in July, 1900. At last reports, up to the end of 1901 no missionary had gone there to reside. There were, however, remnants of the Christian society, of not very active, (in the district) and these were regularly visited by missionaries and native pastors from other stations. Before the Boxer outbreak there were 6 missionaries, men and women, and 9 native workers here, with 8 schools in the town and district.

CHUNDICULLY: A station of the CMS in the Jaffna district, Ceylon (1818). It now has (1900) 2 missionaries, 1 missionary's wife, 1 unmarried missionary woman, 2 native workers, 1 chapel, 1 high school and a college.

CHUNG-KING-FU: A city and important river port in the province of Sze-chwan, China. It stands on a rocky promontory at the confluence of the Kiuling and the Yangtse Rivers, 1,400 miles from the sea. A British commercial agent is located here and a customs service established. Population (1901), 300,000, or, with the suburbs, 700,000. Station of the CIM (1877), with (1900) 8 missionaries, men and women; 5 native workers, 2 schools and 34 communicants. Station no. 20 of the Friends' Foreign Missions Association (1890), has (1900) 2 missionaries (one a physician) and their wives, 3 missionary women, 10 native workers, men and women; 2 elementary and 1 high school and 1 dispensary. Station
also of the LMS (1888), with (1900) 3 missionaries (one a physician), 2 missionaries’ wives, 5 native workers, 5 elementary schools, an orphanage, a hospital and 72 church members. Also stations of the ME, with 15 missionaries, men and women, in different places; 17 native workers, men and women; 9 elementary and 2 high schools, 7 preaching places and 273 professing Christians. The National Bible Society of Scotland also has a book depot here, with an agent and his wife and 17 native workers.

CHUNG-PA: Town in the northern part of the province of Sze-chuan, China; station of the CMS (1894) which was broken up by the Boxer uprising. One of the missionaries returned to his station in 1901, but the reappearance of the Boxer effervescence in the province made missionary effort nearly impossible up to the beginning of 1903.

CHUNG-YANG-HSIEN: A town in the province of Hu-pe, China, situated about 70 miles S. W. of Wu-chang. Station of the WMS, with (1901) 2 missionaries, 4 native workers, 1 school, 1 chapel and 30 professing Christians.

CHUPRA: A town in the Nadiya district, Bengal, India, situated about 20 miles N. of Krishnagar. Station of the CMS (1845), with (1900) 1366 native workers, 1 place of worship, 1 school, 1 high school, an industrial enterprise for boys and 137 communicants.

CHURCH OF ENGLAND ZENANA MISSIONARY SOCIETY (1880): Upon the separation of the Zenana workers from the Indian Female Normal School and Instruction Society in 1880, the Church of England Zenana Missionary Society was formed to cooperate with the CMS, while retaining its independence of administration. It undertook the existing work in 17 stations with 31 missionaries in India. In 1883, in response to an urgent appeal from China and from the CMS, a missionary was sent to Puchau, and in consequence of the liberal support given to the special fund for China, the Society has been able to occupy 13 stations in the Foo-kien Province. In 1889, through the efforts of Rev. and Mrs. J. Ireland Jones, late of Kandy, 2 stations were also established in Ceylon.

The Society has a “Home Workers’ Band” of more than 800 women, who are kept in touch with the central workers by about 100 association secretaries and deputations from the home and foreign field. The “Daybreak Workers’ Union” has a membership of about 150 bands, with a total membership of over 3,000 young people. The “Indian Widows’ Union” is formed of British widows who unite with CEZ missionaries in work for Indian widows. Other women than widows are associate members.

A few stations of the CEZ have been formed in Canada and Australia.

The missionaries of the Society are all women, but their work embraces every department of the mission service. They make evangelistic tours among the Hindu, Mohammedan, Singhalese and Chinese villages; they teach them how to make their homes a shelter for their children; they provide medicine and conduct hospitals and dispensaries; they train Christian women as assistant missionaries, Bible women, dispensers, nurses and teachers; they provide homes and classes for widows and destitute women in India and China; they provide orphanages for the foundlings and famine orphans and give assist-

ance to the deaf and dumb, the blind and the leper.

Missions (1903): 1. North India (1851): 19 stations, 41 missionaries, 250 native workers, 3 boarding and high schools, with 57 students, 75 Boarding and high schools, with 177 students, 58 other schools, with 3,017 pupils, 3,139 pupils, 11,170 Zenana pupils, 1 orphanage, with 134 children, 1 hospital and 4 dispensaries.

2. South India (1876): 16 stations, 42 missionaries, 318 native workers, 5 boarding and high schools, with 177 students, 58 other schools, with 3,017 pupils, 3,139 pupils, 11,170 Zenana pupils, 1 orphanage, with 134 children, 1 hospital and 2 dispensaries.

3. Punjab and Sindh (1872): 24 stations, 69 missionaries, 144 native workers, 7 boarding and high schools, with 201 students, 51 elementary schools, with 2,353 pupils, 741 Zenana pupils, 5 orphanages, with 66 children, 9 hospitals and 22 dispensaries.

4. Ceylon (1889): 2 stations, 5 missionaries, 27 native workers, 1 boarding school, with 54 students, 15 other schools, with 461 pupils, and 1 dispensary.

5. Transvaal and Cochin (1862): 7 stations, 1 missionary, 92 native workers, 1 boarding school, with 299 students, 14 other schools, with 717 pupils, 21 Zenana pupils, 1 orphanage, with 44 children, 1 hospital and 2 dispensaries.

6. China (1884): 12 stations, 38 missionaries, 115 native workers, 12 boarding and high schools, with 360 students, 46 other schools, with 597 pupils, 45 Zenana pupils, 1 orphanage, with 41 children, 4 hospitals and 4 dispensaries.

7. Singapore (1900): 1 station, 3 missionaries, 2 native workers, 1 boarding school, with 70 students.

The organ of the Society is India’s Women and China’s Daughters, monthly, London. It also publishes each quarter, Daybreak, for girl students, and Little Torch-bearers, for children. For Medical work: Barnes (Irene H.), Between Life and Death, London, 1899; For work in India: Barnes, (I. H.), Behind the Parda, London, 1899; Hull (S. C.), Vignettes of Kashmir, London, 1899.

CHURCH MISSIONARY SOCIETY for Africa and the East (1799): In the year 1786 twelve events occurred which led to an awakening of the missionary spirit in Great Britain. Of these twelve events, the principal were the three following: (a) Wilberforce dedicated himself to the abolition of the slave trade; (b) the Grotto Bible; (c) the first plan to settle the liberated slaves at Sierra Leone, and the Eclectic Society (founded in 1753 for mutual improvement by a few evangelical clergy and laymen of the Church of England), discussed foreign missions for the first time. In 1789 this Society again discussed foreign missions, but no marked advance was made. In 1791 Charles Simeon again brought the subject before the Eclectic Society. Only two or three out of the seventeen members present (presumably Simeon, Thomas Scott and Basil Wood) were favorable to a definite attempt at foreign missions, but long afterward Wood wrote across his notes of that meeting “this conversation proved the foundation of the Church Missionary Society.”

In February, 1799, the matter was again brought before the Eclectic Society by the Rev. John Venn, who at this meeting laid down what afterward became essential and unchanging principles of the CMS:

“It is the right of Christian men who sympathize with one another to combine for a common object.

“Spiritual work must be done by spiritual men.”
“The mission must be founded on the Church principle, but not the high-Church principle.”

“If clergymen cannot be found, send laymen.”

_History_: At this time the SPCK and the SPG were at the lowest point of energy and efficiency, and the question of their action not only to cooperate with each other, hence the necessity for a new missionary society. On the 12th of April, 1799, a public meeting was held at the Castle and Falcon in London, the same hotel in which, four years previously, the LMS was formed. Sixteen clergymen and missionaries met in an “upper room,” the Rev. John Venn in the chair. Resolutions were adopted, stating, that “as the SPCK and SPG confined their labors to the British plantations in America and to the West Indies, there seems to be still wanting in the established Church a society for sending missionaries to the continent of Africa and other parts of the heathen world.”

Therefore, “the persons present at this meeting do form a Society for that purpose;” and that “a deputation be sent to the Archbishop of Canterbury and the Bishop of London as Diocesan and the Bishop of Durham as Chairman of the Missionary Committee of the SPCK, with a copy of the rules of the Society and a respectful letter.”

In this time no name was given the Society, but six weeks later a second meeting was held which chose the name “The Society for Missions to Africa and the East.” This name never came into practical use, and the present full name was not formally adopted until 1812.

Not until 1813, fourteen years after the foundation of the Society, did two bishops consent to ordain two of its candidates “for temporary work at home.”

In 1819 an Act of Parliament gave the Archbishops of Canterbury and York and the Bishop of London power to ordain men for “His Majesty’s Colonies and Foreign Possessions,” under certain restrictions, and a technical objection which formed one of the early difficulties of the Society was thus entirely removed.

In 1841 two Archbishops and several Bishops joined the Society. In 1845 a proposition was made to unite the seven principal societies of the Church of England into a Church Union. The CMS committee deemed the action unwise, and it was therefore denounced in some quarters as “not the true way.” The cry was raised that all missions should be worked “by the Church in the corporate capacity.” This led to the famous defense of Henry Venn, known as the Appendix to the Thirty-ninth Report. The paper states that the CMS “may be regarded as an institution for discharging the temporal and lay offices necessary for the preaching of the Gospel among the heathen.”

“The secretary of the CMS requests, by letter, the Bishop of London to ordain, in conformity with the provisions of the Act of Parliament, such persons as the Society is willing to support in some foreign station. The Bishop, by the imposition of hands, gives them authority to preach the Gospel, with a view to their foreign mission; and the Society undertake not only the support of the station, but to provide as far as may be necessary for the salaries of the missionaries, and for the station, paying the passage money, and agreeing to provide the salary—to call these acts a sending forth of preachers in an ecclesiastical sense is to confound names with things and to lose sight of all true Church principles.”

In 1822 the Society was observed and was marked by a special fund, amounting to £55,322, to be used in assisting disabled missionaries; in providing a boarding school for missionaries’ children; to assist native churches in raising endowments, and for mission buildings.

In 1882 the subject of medical missions was brought under consideration and an auxiliary committee was appointed to prepare for an extension of work in this direction. The medical department of the CMS was fully organized in 1894, and its influence has been immeasurable in full mission lands.

The direct employment of women missionaries by the Society began to be canvassed about 1882, although long before single women had rendered efficient service in educational work. The Women’s Department of the Society was fully organized in 1895.

The centenary celebration of the CMS was held in 1899 after three years of preparation through the distribution of special missionary literature, the holding of special meetings, and united action in making the Society a subject for special prayer. The centenary celebration was a solemn, joyful and most impressive occasion in which the congregations throughout the immense field of the Society participated by special services.

The report of 1902 shows that the CMS has 1,276 missionaries, 5,290 native workers, 2,274 schools and educational institutions of all grades, with an attendance of 116,552 pupils. There are also 79,586 communicants in the aggregate on its church rolls.

The year 1841-1842 brought to the Society an alarming financial crisis, while opportunities of increase of work were greater than ever before. At this point the committee appealed to the country for help, on the distinct ground that they “looked for the Divine blessing upon the faithful, plain and full maintenance of the great principles of the truth as it is in Jesus, by all the agents and missionaries of the Society, without compromise and without reserve. It is the sustentation of that Scriptural, Protestant and Evangelical tone throughout all their ministrations, it is the upholding of the Bible and the Bible alone, as the foundation and rule of faith upon which the blessing of God has rested, does rest and ever will rest.”

“Upon these principles the committee took their stand in a season of jeopardy, and made their appeal for special assistance. The result was that in May, 1843, they were able to report a larger income than up to that time had been received by any missionary society. Nearly all indebtedness was cleared off and a good beginning was made in the formation of a capital fund. At this time a finance committee of four bankers had been appointed to consider the possibilities and they laid down the rule that, altho the Society is ‘called upon to occupy diligently with the talents committed to it, it is not to aim at occupying
with more talents than God in His wisdom has been pleased to dispense." On receiving this enunciation from the finance committee the stand was taken by the general committee of the Society that the "talents" which God gives a missionary society are men, not money, and if He sends the men it is reasonable to believe that He will provide for them their sustenance. In 1853 this "Policy of Faith" of the CMS was clearly enunciated before a general meeting as follows: "The committee state in the presence of this vast meeting and before the Church at large, their willingness to accept any number of true men in answer to prayer found in any walk of life who will call upon God to the work. They will send out any number, trusting to the Lord of the harvest, Whose is the silver and the gold, to supply their treasury with the funds for this blessed and glorious undertaking."

In 1871-72 the low water mark was reached in the supply of candidates; a Day of Intercession was for the first time observed with reference to the situation on December 20, 1872, and a circular was issued, asking the constituency of the Society to pray for missionary candidates. Twelve months later, in May, 1874, at the end of the first complete financial year since this call to prayer for men went out, the Society was startled to learn that the receipts exceeded a quarter of a million. The ordinary income had advanced in one year £40,000.

In 1880 the finances again fell below par and a special joint committee of finance and estimates was appointed; their strong conviction was that "no religious society ought to run ahead of Divine Providence; that the Divine will is indicated by the amount of funds committed to the Society's administration, and, that while it is right to use every talent given to us, we are not responsible for talents not given to us."

This was the same position as that taken by the Special Finance Committee of 1841-42, which led the committee of the CMS to declare that God's will is indicated by the coming forward of men, not by money.

Following this declaration of a policy of retribution the report of 1881 showed a clear balance sheet, and men who had been kept at home were promptly sent out. But in 1887 the Estimates Committee warned the Society that the number of candidates was increasing more rapidly than the funds, and argued that expansion of the work should be limited by the funds at the Society's disposal. To this the Society answered that the candidates were unmistakably men sent by God, and it was reasonable to assume that He would provide the means to maintain them.

Ultimately it was determined to refuse no candidate merely on financial grounds. The Society (heavenly) reverted to the policy of 1852-53.

In 1893 the financial outlook was so serious that the President issued a letter headed "Ask the Lord and tell His people." It was proposed to abandon the "Policy of Faith," but on review of the seven years that the policy had been in operation it was found that the missionary staff had just doubled; the whole of their expenses had been paid, and in addition to all ordinary expenditure a mortgage of £20,000 on the Children's Home had been paid off. Thus the "Policy of Faith" enunciated in 1883, afterward forgotten; abandoned entirely in 1885, with the result of seven years' famine; partially acted upon in 1874-76, and dropped in 1877, with financial difficulties resulting; adopted as a new thing in 1887, and persevered in for seven years, had been honored of God beyond all anticipation. The resolution reaffirming the policy was carried nem. con. and at the annual meeting of 1902 the "Policy of Faith" was again reaffirmed.

Organized and Constitution. The Society is conducted by a Patron, always a member of the Royal Family; a Vice-Patron, the Archbishop of Canterbury; a President, who must be a layman; Vice-Presidents, usually clerical; a Committee and such officers as may be deemed necessary, all being members of the Church of England or Ireland. The general body of the Society includes members and governors who have made certain subscriptions to the funds of the Society or have rendered special service in its work. The Committee consists of 24 laymen and of the clergy, numbering also members of the Society. Of the 24 lay members, 18 are reappointed each year from the existing Committee, the rest being elected from the general body of the Society.

The official staff of the Society is more complete than that of any other missionary organization. Aside from two Honorary Clerical Secretaries there are 20 secretaries and assistant secretaries, divided among seven departments: Candidates, Foreign, Home organization, Editorial, Lay, Women's, and Medical. There are 19 Association Secretaries in England, 3 in Ireland and 2 in the Scottish Auxiliary, while 5 clergymen are employed in missionary meetings and special deputation work. Aside from these there is a large number of honorary district secretaries. The result is seen in the thoroughness with which the field is covered, the accuracy and completeness of the reports and the variety and attractiveness of the publications. The Society's annual report is facile princeps among reports, as are its monthly Church Missionary Intelligencer and Gleaner, and other periodicals. Similarly its income is larger than that of any other missionary society, in 1902 being, for the general purposes of the Society, £327,000 (£1,635,000).

A feature of the organization of the CMS is its use of auxiliary societies. These have been formed among those of all ages and stations in life. Prominent among these agencies for keeping the people informed and interested are the "Missionary Leaves Association," the Gleaners' Union and the Savers' Band. Of a similar nature are the Lay Workers' Union and the Young Clergy Union. It has been the policy of the Society to form auxiliary committees in the colonies wherever the English community is strong enough to give practical aid to the work of the Society in its midst.

Development of Missions: With William Wilberforce as one of the charter members of the new society, and the prominence given the slave trade in Africa through his efforts and those of Granville Sharp, the attention of the CMS was at once directed to West Africa, the center of the slave trade on the coast of Africa, and especially in view of the fact that neither the Society for the Promotion of Christian Knowledge nor the SPG were working in that country. Its first missionaries were sent to the Sisu tribe on the Rio Pongas in 1804, the mission headquarters afterward being at ממ at the mouth of the Black Volta River. Among its missionary work in 1818, the United Prov-
ines (formerly North West Provinces) Mission was begun at Agra by Abdul Masih, Henry Martyn's solitary convert from Mohammedanism, under the direction of Daniel Corrie, one of the famous "five chaplains" of India. The second mission of the Society was to the Maoris of New Zealand in 1814, at the invitation of Samuel Marsden, New South Wales. The same year the South India Mission was opened at Madras by the first two clergymen of the Church of England to be sent as missionaries to India.

The Bengal Mission was established in 1816, and the same year work was begun in the Travancore and Cochin Native State, at the invitation of the British resident. In 1817 work was begun among the Singhalese and Tamils in Ceylon.

The Western India Mission was inaugurated at Bombay in 1820. Two years later, in 1822, the North West Canada Mission began among the scattered Red Indian tribes. The treaty of Nanking in 1842 rendered China accessible, and in 1844 the Mid-China Mission was begun.

The following year the missions in Africa were extended and work was begun in East and West Equatorial Africa. In 1850 the Fe-rien Mission was established at Fu-chau.

In 1851, on invitation of Bishop Gobat, the Palestine Mission was opened, "beginning at Jerusalem." This year also the Punjab and Sind Mission was begun, soon after the annexation of the province to British India. In 1856 Bullom, Prevost, R. N., called the attention of the CMS to the Indians of British Columbia, and a young schoolmaster was sent to them. A mission was also begun the same year on the island of Mauritius. In 1852 work was begun in South China. In 1869 the first CMS missionary began work in Japan, and the Rev. R. Bruce of the CMS visited Persia and began a mission which was formally adopted by the Society in 1875. In 1876 the work in Africa was further extended and the Uganda Mission organized. In 1882 the Missions to Egypt and Turkish Arabia were begun, and in 1892 the West China Mission was started in the Province of Sze-chuan.

The Missions. I. Africa. (1) Sierra Leone Mission (1816): The first two missionaries of the CMS were sent in 1804 to the Susu tribes on the Rio Pongas. A few years later a station was opened at Yongro for the Bulom tribe, by Nylander, who labored for 19 years in Africa, dying at his post in 1825, never having returned home. In 1817, at the instigation of the slave dealers, the mission buildings were destroyed by fire, and opposition to their work became so formidable that the missionaries were compelled to take refuge in Sierra Leone, the depot for negroes rescued from slave ships by British cruisers. Here the missionaries remained. Great success attended their labors, and in 1822 nearly 2,000 of the freed slaves were in the mission schools, and some hundreds had become sincere Christians. The work continued to prosper, but at great cost. Fifty-three missionaries and missionaries' wives died in this field between 1804 and 1824, and great mortality revealed the necessity for native agency, and in 1827 the Fourah Bay College was opened. Port Lokkoh in the Timne country was occupied from 1840 to 1850 and reoccupied in 1875. In 1840 the native Christians voluntarily established a Church Missionary Auxiliary, and undertook the support of the native schools in the various parishes. In 1862 the Bishopric of Sierra Leone was founded and ten years later the Sierra Leone Church was organized on an independent basis, and undertook the support of its own pastors, churches and schools, aided by a small grant from the CMS. In 1876 the Sierra Leone Church Missionary Society took over 3,000 pupils. More than 100 African clergymen have been ordained on the West Coast of Africa in connection with this and the Yoruba Mission. Several of them are government chaplains.

(2) Western Equatorial Africa Mission (1848): A large portion of the freed slaves gathered at Sierra Leone had been taken from the Yoruba country, a thousand miles to the eastward. About 1840 many of these natives, some of whom had become Christians, returned to their own people, and petitioned that a missionary be sent to them. In 1839 Mr. E. E. Balfour, on a preliminary visit to Abeokuta and returned to Sierra Leone and to England with a favorable report. He and Mr. Gollmer with Samuel Crowther, a native of Yoruba and a liberated slave, reached Abeokuta in 1845, where they received a hearty welcome. Gradually the work extended to other towns and villages in the interior, and in 1857 Mr. Crowther accompanied a commercial expedition up the Niger River and laid the foundation of the Niger Mission by establishing stations at Onitsha, Gbebe and Iddaa.

In 1858 the CMS began to explore the interior to locate at Lokoko, on the Upper Niger, and thence to try to reach the Mohammedan Hausa States. The climate proved fatal to the expedition, however. A subsequent attempt met with better success, and itinerations have been made in the direction of Sokoto and an effort has been made toward permanent work in the Hausa country.

There are (1902) 43 stations, 55 European missionaries and 202 native workers, 4,749 communicants and 80 schools, with 4,721 pupils.

(3) Eastern Equatorial Africa Mission (1844): The mission was begun by Dr. J. L. Krapf, who went to Mombasa after being expelled from Abyssinia. In 1846 he was joined by the Rev. John Rebman, who opened the station at Kisutuini and labored on the coast 29 years. Their remarkable journeys into the interior opened the way for subsequent geographical and missionary enterprises in East Africa. In 1874 the Rev. W. S. Price, formerly in charge of the asylum for rescued slaves at Nasik, Western India, was sent out; land was purchased for an industrial colony on the mainland near Mombasa; some 200 African Christians from among the freed slaves formed the nucleus of the colony and the new settlement was named Freretown, in honor of Sir Bartle Frere. To this place other rescued slaves were sent for care and training. Stations were opened in 1883 in the Taita country to the westward, and at Taveta under the shadow of the snow-capped Kilima Njaro, and in 1890 in the jilore region, to northward of Mombasa, when in 1876 missionaries were sent by the Zanzibar route to establish the Uganda Mission. Intermediate stations were established at Mpwapa in 1876, at Mambaa in 1879, and at Nassa, at the south end of the Victoria Nyanza, in 1888. For
these missions a new bishopric was established in 1884, the Rev. John Hannington being consecrated the first bishop. He was murdered by order of King Mwanga of Uganda in October, 1885.

There are (1902) 18 stations, 77 European missionaries and 91 native workers, 842 communicants and 49 schools, with 2,316 pupils.

(4) Uganda Mission (1876): In November, 1875, Stanley sent word to England that Mtesa, King of Uganda, would welcome missionaries. Shortly after this the CMS received two enormous gifts of £5,000 each for work in Uganda, and in June, 1876, seven months later, the first missionaries for Uganda were at Zanzibar preparing for the march to the Victoria Nyanza, Rubaga, the capital of Uganda, was reached by two of the party. Lieut. Smith and Rev. C. T. Wilson, in June, 1877, who were warmly welcomed by Mtesa. Mr. T. O'Neill afterward joined them, but the temerity of this enterprise became evident in December, 1877, when Messrs. Smith and O'Neill were killed in a quarrel between a native chief and an Arab trader. Wilson was thus left alone in the middle of Africa. It was only after some months that he was joined by Mr. A. M. Mackay, who had been detained on the coast by illness for more than a year. In 1884 King Mtesa died, and Mwanga, his son, turned against the missionaries, and a period of danger and bloodshed followed the murder of Bishop Hannington and several native Christians. This many times threatened the existence of the mission, until finally in 1894 a British Protectorate was established over Uganda and within three or four years prosperity dawned for the State and for the mission. See Uganda.

There are (1902) 33 stations, 76 European missionaries and 2,435 native workers, 9,866 communicants, 5 schools, with 248 pupils and 12,117 others receiving instruction.

The more notable characteristic of this mission is the advance of the native Christians in intelligence and their acceptance of the duty of evangelizing neighboring regions. Busoga, Toro and Bunyoro have thus been opened to the missionaries.

(5) Egypt (resumed 1882): As far back as 1802 it was suggested to the CMS that it attempt the revival of evangelical religion in the Greek Church. In 1811 came a letter (which ultimately led to the Society's enterprises in the Mediterranean) from a Roman Catholic priest in Malta, Dr. Roux, volunteering the services of Mohammedans and Christians in the Levant and the duty of the CMS to relieve such needs.

In 1815 the Rev. William Jowett was sent to Malta "to survey the religious horizon," and begin work, followed soon afterward by Messrs. Cowan and Wood. In 1825 five men were sent to Egypt, among them Samuel Gobat. The work was carried on for more than 30 years, chiefly by J. R. T. Lieder, who died at Cairo in 1865. He and his brethren itinerated in the Nile Delta, into the Fayum and southward into Nubia. The missionaries could not work directly for Mohammedans and sought to stir up native Christians to life. The Coptic clergy were generally friendly, while those of the Greek Church were not. Schools were started and a boys' boarding school was established at Cairo, which in 1855 was changed into a theological seminary for Coptic clergy. The visible results of the work were small and no new recruits were sent out.

In 1862 the mission was dropped. In 1882 the British occupation of the Nile Valley took place. At once thank-offerings began to be sent to the CMS for an Egyptian Mission. This led to a mission which was taken over by the CMS among the Mohammedans. Dr. F. A. Klein of the Palestine Mission was sent to Cairo. Later on, medical work was begun at Cairo by Dr. Harpur. Cairo was regarded as a stepping stone to Khartoum and the Sudan. But the timidity of the British Government respecting the effect of Christianity and the supremacy of Islam was in conflict with the execution of this design. The most urgent request of the CMS, presented in 1901, for permission to station missionaries at Khartoum, received a courteous but firm refusal from the Secretary of State for Foreign Affairs, which concluded with the words: "It appears to me to be at present impossible to indicate any time when the restrictions now in force on the labors of missionaries in the Sudan could with safety be removed, but the matter will receive the most careful attention." Nevertheless, in 1903 British Turkey and the Sudan were permitted to establish CMS stations in the S. districts of the Sudan, and permitted the CMS to open a school for Muslims in Khartoum.

There are (1902) in Egypt, 4 stations of the CMS, 28 European missionaries, 25 native workers, 54 communicants and 4 schools, with 291 pupils.

II. Palestine (1851): When Samuel Gobat, for many years associated with the work of the CMS in the Levant, was appointed to the bishopric in Jerusalem, he appealed to the committee to begin work among the Jews. One result of this was the opening of the Palestine Mission by the Rev. F. A. Klein and Dr. Sandrecki, at Jerusalem.

The ultimate purpose of the Society in undertaking the work in this, as in their other Levant missions, was the evangelization of the Mohammedans. Several stations were successively occupied and other missionaries were added to the staff. In 1861, however, Jerusalem and Nazareth were the only stations in occupation, and for many years the work was on a reduced scale. Bishop Gobat had established mission stations at Nablus and Es Salt, besides 25 schools throughout the country. In 1873 this work was transferred to the care of the CMS and the occupation of other towns followed. In 1899 the CMS took over the work of the Female Education Society at Jerusalem and Shefamer.

There are now (1902) in the Palestine Mission 19 stations, 71 European missionaries and 127 native workers, 802 communicants and 59 schools with 3,609 pupils.

III. Turkish Arabia (1882): Baghdad was first occupied as an outpost of the Persia Mission, with the view of reaching Persian pilgrims who sought to fathom Shi'ah shrines near the city. The first missionaries were the Rev. T. R. Hodgson of the Indian Mission and Mr. Maimon, a convert of Trieste. A good deal of their early work was among the Jews, the Persian pilgrims not being found very accessible. Medical work was begun in 1886 by Dr. Sutton. In 1898 the work was separated from the Persia Mission and continued as the "Turkish Arabian Mission." In 1900 Mosul was occupied by agreement with the PN, which had taken over that station from the ABCFM.

There are (1902) 2 stations, 7 European missionaries, 13 native workers, 61 communicants and 4 schools, with 148 pupils.
IV. Persia (1875): In 1869 the Rev. R. Bruce, of the CMS, visited Persia, when returning from England to India, and began work at Isphahan. In 1875 the Society formally adopted his work as one of its missions. In 1879 medical work was begun. Since that time doors have opened rapidly, and the Persians generally have been attracted through the medical services of the missionaries.

There are (1902) 5 stations, 35 European missionaries, 41 native workers, 100 communicants, and 6 schools, with 497 pupils.

(1) United (formerly North West) Provinces: The Society's first agent in India was Abdul Mash, Henry Martyn's solitary convert from Mohammedanism, who was sent to Agra in 1813 under the direction of the chaplain of the forces at that station. In 1815 Meerut was occupied by a converted Brahman. In 1817 Daniel Corrie from Agra was appointed chaplain at Benares, and work was begun there.

By 1854, 4 other stations had been occupied. In 1857 occurred the terrible Sepoy rebellion, which concentrated intense interest upon India and incidentally upon its mission work. The CMS raised a special fund to replace buildings and apparatus destroyed and for a general expansion of the work. The most important event following the meeting was the occupation of Lucknow in 1858, immediately after its reconciliation. Some years later a special work was begun among the Gonds (1879), and the Bhils (1880).

There are (1902) 27 stations, 131 European missionaries and 429 native workers, 2,146 communicants, 134 schools, with 10,359 pupils; native contributions, Rs. 7,742.

(2) South India (1814): The first two clergymen of the Church of England to go to India were sent to Madras by the CMS in 1814. A corresponding committee of the Society was organized to attend to them.

The Tinnevelly Mission was begun in 1820, at the request of the chaplain at Palamcottta. In 1838 the Madras Theological Seminary was established.

The Telugu Mission was begun in 1841 by Robert Napier, who established the famous English school at Masulipatam. The Henry Fox, who began a series of preaching tours which resulted in the foundation of an increasing Telugu native Church.

In 1870 work was begun among the Tamils and the people of the Nilgiri hills, with Utakamund as a center.

There are (1902) 82 stations, 62 European missionaries and 1,410 native workers, 18,223 communicants and 715 schools, with 23,764 pupils.

(3) Bengal Mission (1816): The CMS had an important part in the establishment of the Bishopric of Calcutta in 1814, and before missionaries were allowed in India a CMS Corresponding Committee was organized in Calcutta. When, in 1816, two CMS missionaries were sent out to open a station, the administration of the new work was placed under the care of this local committee.

The following year (1817) Burdwan was occupied and an effort was made to establish a National System of Education. Nadiya was occupied in 1831, and seven years later witnessed a remarkable revival, and in 1857 the mission to South Bengal has been so poor to be considered. In 1865 the Cathedral Mission College was established, but discontinued in 1880, the buildings being used for the CMS Divinity School for Bengal.

There are (1902) 28 stations, 71 European missionaries and 302 native workers, 1,200 communicants and 115 schools, with 4,432 scholars.

(4) Travanore and Cochin (1816): Work was begun in the Cochin States in 1816, at the request of the British resident, and continued for twenty years, largely in the hope of stimulating reform of the ancient Syrian Church of Malabar. Since 1837 the missionaries have worked independently of this church and with better results. In 1873 a native station was occupied which resulted in the organization of a native church which continues steadily to grow.

There are (1902) 38 stations and 25 European missionaries, 612 native workers, 12,196 communicants and 265 schools, with 12,148 pupils.

(5) Western India (1820): In 1818 a Corresponding Committee of the CMS was formed in Bombay and two years later missionary work was formally inaugurated. In 1832 a new station was opened at Nasik, an important center of Brahman influence. At Bombay the Robert Money School, established in 1836, was handed over to the CMS. In 1854 the Rev. W. S. Price founded the agricultural and industrial settlement of Sharanpur, Nasik, which afterward became for a time a refuge for liberated African slaves.

Poona was occupied in 1882, and here there was established the CMS Divinity School for West India. Special efforts were made to reach the Mohammedans and Parsees.

There are (1902) 9 stations, 22 European missionaries, 182 native workers, 1,449 communicants and 59 schools, with 2,578 pupils.

(5) Punjab and Sind (1850): As early as 1840 some English officers and civilians at Simla raised a fund for evangelistic work among the natives and applied to the CMS for a missionary. None being sent, they began an independent work at Kolurg in 1843 which was taken over by the Society in 1848. In 1850 it began the Sind Mission at the commercial port of Karachi and the following year work was begun in the Punjab proper by establishing a station at Amritsar, the most important event in the history of the mission was the remarkable revival of 1850-51, the most important advance was made in 1855, when Peshawar, the military post on the Afghan frontier, was occupied. Lahore, the capital of the Punjab, became a station in 1867, and here the Divinity School was founded three years later.

There are in this mission (1902) 32 stations, 106 European missionaries, 180 native workers, 1,299 communicants and 42 schools, with 6,537 scholars.

V. Ceylon (1817): Work was begun among both Singhalese and Tamils in 1815, the two races having distinct languages. Evangelistic, educational and pastoral work has been carried on, but the strongest influence of the mission has been exerted through the schools. During the first years the reports from the missionaries were almost uniformly depressing; while favorable impressions of its influence were given by the government officials. Two features of special interest in Ceylon are the Kandyam itinerancy, begun in 1853, and the Tamil Cooke Mission, established in 1855.

Much indirect good came from a great Buddhist revival in 1892-4, and from that time both
the Singhalese and Tamil Missions began to look more promising. There are (1902) 22 stations, 53 European missionaries, 681 native workers, 3,525 communicants and 283 schools, with 17,914 pupils.

VII. Mauritius (1856): Early in 1854 Mauritius was visited by two CMS missionaries from Tinnevelly, who found a little band of Tamil coolies, Christians from India, for whom Mr. A. Taylor of the Madras Auxiliary Bible Society was caring. The need of the field was reported to the CMS, and in 1856 it began work among the coolies. From the first there was much encouragement. An interesting development of the mission occurred in 1860, when the Government established an orphan asylum and industrial school, placing them in the care of the CMS missionaries. In 1875, in connection with Mauritius, work was begun in the Seychelles Islands, among the liberated African slaves, an industrial school settlement being established on the Capucin Mountains.

There are (1902) 10 stations, 10 European missionaries, 67 native workers, 365 communicants and 21 schools with 1,549 pupils.

VIII. China (1845): (1) Mid China Mission: About the treaty of 1842 a friend of the CMS, calling himself “less than a least,” gave the Society £6,000, as the nucleus of a China fund. Two clergymen were at once sent out, with instructions to visit the treaty ports and Hong-kong, and report upon the best place for locating the new mission. Shanghai and Ningpo were selected and occupied (1845-1848). In 1875 the Ningpo College was founded and has been a valuable agency in the work. The mission was gradually extended to Hang-chau and other places. In 1901, a Native Church Missionary Society was formed for further aggressive work.

There are (1902) 12 stations and 50 European missionaries, 105 native workers, 1,240 communicants and 61 schools, with 738 pupils.

(2) Fo-ken (1850): The city of Fu-chau was occupied in 1850, but for ten years the work was bad. In 1860 medical work was commenced and a helpful agency. In 1864-5 other large cities were occupied by native evangelists and rapid progress was made in spite of severe persecution. In August, 1895, occurred the terrible Ku-cheng massacre. Since then the country has made advance. During the years 1900-1901 Boxer bands made trouble in various places.

There are (1902) 18 stations, 77 European missionaries, 415 native workers, 4,464 communicants and 185 schools, with 2,633 pupils.

(3) South China (1862): St. Paul’s College in Hongkong had for some time been assisted by the CMS, but regular work was not begun until a mission was organized in 1862. Several outstations were later established in the Kwang-tung Province, with Canton as a central station.

There are (1901) 6 stations, 38 European missionaries, 58 native workers, 360 communicants and 30 schools with 1,490 pupils.

(4) West China (1891): The most important CMS movement in China in recent years was the work in the province of Shansi, which began by Rev. J. H. Horsburgh in 1891, who planned the work on very simple lines, the missionaries to “identify themselves as much as they could with the people, and spend as little money as possible.” They went into the province after correspondence and an understanding with the CIM, whose missionaries already on the field became good assistants. They began to itinerate, this seeming the best method of work. By 1894 five cities were definitely occupied. In 1895 serious riots occurred in the province, but the CMS mission suffered small loss.

There were (1900) 10 stations, 41 European missionaries, 33 communicants and 1 school, with 15 pupils.

IX. Japan (1869): In 1867 the CMS received an anonymous gift of £4,000 for a mission in Japan. In 1868 came the revolution which restored the Mikado to the throne and in 1869 the first CMS mission was sent. The first work was carried on with difficulty, but in 1872 religious liberty was practically proclaimed and by 1875 four important centers were occupied. The new constitution proclaimed in 1890 gave increased religious liberty and made possible further extension of work.

There are (1901) 23 stations, 102 European missionaries, 156 native workers, 2,408 communicants and 15 schools with 559 pupils.

X. New Zealand (1814): The mission to the Maoris of New Zealand, the second of the Society’s missions in order of time, was undertaken in 1814, when Samuel Marsden, with three laevmen, sent out as pioneers, landed on the northern island. Other missionaries followed whose lives were entirely in the power of the ferocious cannibals, and were frequently in imminent danger. For eleven years no results whatever were seen. In 1825 the first conversion took place, and no other natives were baptized for five years. Then began the marvelous movement which resulted in almost the whole Maori nation being brought to the Christian faith. About this time missionary influence, and which led Bishop Selwyn, on his arrival in his new diocese in 1842, to write: “We see here a whole nation of pagans converted to the faith, . . . Where will you find more signal manifestations of the presence of the Spirit, or more living evidences of the kingdom of Christ?” In 1840 New Zealand was made a British colony, and immigration on a large scale ensued, introducing the vices as well as the benefits of civilization. The inevitable conflicts of race began and the continual disputes about the sale and possession of land led to prolonged and bitter wars, which shook the native church to its foundations and caused serious defections.

In 1883 a local CMS mission board was established to administer the Society’s grants, which diminished annually and ceased in 1902.

There are (1902) 48 stations, 18 European missionaries, 346 native workers, 2,508 communicants and 7 schools with 295 pupils.

XI. Northwest Canada (1822): The work of the CMS among the Indian tribes scattered over what was formerly the Hudson Bay territory, was begun by the Rev. John West in 1822 at a little trading station on the Red River.

The first step in extending the mission was made in 1840, when a native teacher was sent to open a station at Devon. Now this district is the spiritual home of Manitoba, and a large part of the CMS work has developed into the ministrations of the Church in the colony; one of its churches having even become the Cathedral of the Diocese of Rupert’s Land.

The Ecclesiastical Province of Rupert’s Land, the area of which probably exceeds that of the
Chinese Empire, is divided into eight dioceses, viz., Rupert's Land, Mooseonee, Mackenzie River, Athabasca, Saskatchewan, Calgary, Qu'Appelle and Keewatin. In all these dioceses, the Society for the Diffusion of Useful Knowledge, the Bible and Prayer-book exist in Red River Creek, and considerable portions, with hymn-books, etc., in Moose Creek, Ojibbeway, Soto, Slave, Chipewyan and Tukudah.

A plan for the gradual withdrawal of the CMS financial aid to these dioceses, similar to that adopted in New Zealand, is to become effective as soon as practicable.

There are (1901) 60 stations, 73 missionaries, 31 native workers, 2,852 communicants and 76 schools with 2,300 pupils.

Ministry before 1856: In 1856 Capt. Prevost, R.N., drew the Society's attention to the savage state of the Tsimshian Indians on the coast of British Columbia, and a young schoolmaster, Mr. W. Duncan, was sent out. A great blessing was vouchsafed to his labors, and in 1862 the Christian settlement of Metlakatla was founded. In 1881, Mr. Duncan, refusing to work on the lines of the Church of England, ceased to be a missionary of the Church Missionary Society. In 1887 he removed, with some hundreds of Indians, to a place 70 miles distant, within the territory of Alaska, renouncing allegiance to the Queen of England and coming under the protection of the United States, and the station at Metlakatla was put in the charge of other missionaries sent out by the Society.

Other missionary settlements are at Kincloth on the Peace River, among the Kitikeheans of the interior, the Hydals of Queen Charlotte's Islands and the Kwa-gul Indians of Fort Rupert, all of which zealous work is being carried on.

There are (1901) 10 stations, 25 missionaries, 37 native workers, 4,077 communicants and 14 schools with 427 pupils.

The Church Missionary Society carried on missions at Antigua, Jamaica, Trinidad and at various points in British Guiana for many years with considerable success.

Periodicals: Church Missionary Journal; The Church Missionary Gazette; Mission Advocate (for larger stations); The Missionary Register; The Missionary Magazine for Children. The above are all published monthly. Quarterly papers for the use of collectors among Indian tribes are Pocket Book and Missionary and Extracts from Annual Reports of Missionaries are also published. Stock (E.), History of the Church Missionary Society, 3 vol., London; Hole(C.), Early History of the Church Missionary Society (to 1814); London: Church Missionary Atlas, London.

CHURCH IN THE MISSION FIELD:

When the missionaries, or evangelists, have felt the joy of leading men to accept Jesus Christ, the fact comes to light that the converts have to be taught the necessity of growth as the well as the means of growth. Each individual has to be established in the faith, to be taught to recognize and resist temptation, the idea of which is new to him, and to be guided and encouraged as he tries to throw off old evil habits of thought and action. He cannot otherwise become an aggressive worker to win others to allegiance to Christ. Moreover, the new converts cannot stand alone. For their own good, and the interest of all, mutual support, and to maintain their position in an unfriendly and often actively hostile community they need organization. Only through becoming members of an organic body can the converts take the place in the community and the nation where their influence will tell in support of the principles which they profess.

The church, then, must be established early in the mission field as a permanent institution for the work of Christ. It must be organized in all its different departments, placed on a firm foundation of faith, self-support, activity; be provided with the various means essential to its continued existence and growth. The Christian community is to be federated with Christian ideas, its social life freed from its evil associations, brought into accordance with the spirit of the Gospel, its customs purified, its aims enlightened, its national life made to include a genuine and true patriotism. And so on in all the endless lines that open to the church. The great blessing of the Christian Church, united in the establishment of the kingdom of God upon earth.

It is a mighty task, more perplexing even than the corresponding undertaking at home. And retrospect only makes its difficulties stand out more prominently. Now, can travel in the Levant, over the roads where Paul led the way in Christian work, recall the story of those first centuries of growth, remember the subsequent centuries of stagnation and decay, and not wonder whether the story is to be repeated in the churches now gathering in every city and town, and almost in every village. Modern Christians are no more sincere or devoted than those of earlier ages; modern missionaries no more earnest or skilled than the apostles and fathers.

The question of the need of new church organization has come up with some sharpness in connection with work among the Oriental churches and in Papal lands. When missions were commenced in the Levant among the Armenians, Nestorians, Greeks, etc., there was no plan for a separate church organization. The old one, it was thought, was good enough, and it was far better to utilize that, introducing whatever of reform was necessary or practicable, but not severing historic associations, especially in view of the fact recognized by all, that the churches these old churches were essentially in accord with those of the more modern bodies. This, however, was found to be impracticable, and as a matter of fact Protestant church organizations have been formed wherever evangelical missionaries have gone where these conditions prevailed.

The need to organize the Church on the mission field being admitted, the duty of doing this work falls upon the missionary. We expect the missionary to be fully occupied in winning converts. In actual fact, however, in every successful field, it speedily comes to pass that the greater part of the converts are won by the efforts and the explanations and the pure lives of the native Christians. This the native believers can do. But that which they cannot do for a long time is to bear the burden of culture and nourishing those whom they have been the means of winning to Christ. This duty falls upon the missionary.

The problem of the missionary is one of securing growth and permanency. The question he is constantly striving to solve is that of how to hold the vantage-ground gained, and make it the point of departure. Men's needs are so great, and the essentials must be kept in mind: 1. The development and growth of the individual church and community must be natural, not forced. The genius of the people must be studied, and that line of development found which will bring out
the best that is in them. South Sea Islanders cannot be transformed into Europeans or Americans, and every effort so to transform them results in harm. At the same time they must be something different from what they have been. While it is doubtless true that the Asiatic must remain an Asiatic, it is also true that the Christian Asiatic may be different from the Hindu or Mohammedan Asiatic as the modern Englishman is from his Norman-Saxon progenitors. 2. The element of time is very essential. Occasionally a sudden transformation will come; but this is the exception rather than the rule, and he who expects it may be disillusioned. He has to admit that the growth of Christian character is a slow process. 3. The methods adopted must be primarily constructive, not destructive. Their object is to build up rather than to tear down. They do not attack systems, but seek to help individuals. It is not that Islam, Hinduism, Shintoism, or Fetishism is to be overthrown, but that individual Muslims, Hindus, Japanese, Africans, are to be guided and assisted into a higher life.

It is not only natural but inevitable that that organization should take the form to which the missionary himself has been accustomed; and thus it happens that the mission church, in most cases, seems to be an extension of the denominational differences of the home lands. It is, however, to be said that those differences are seldom if ever as sharply defined in foreign lands as at home; and, except in case of divisions resulting from unworthy rivalry, the members look upon them as formal rather than substantial. There are some cases where the form of church organization has been left almost entirely to the choice of the native community, with the result of an occasional departure from the denominational usage of the missionary. This is especially true of missions conducted by the Congregational Churches of England and the United States. As a rule, however, the policy preferred by the missionary has prevailed, not because he has felt tied to it, but because in it he can work to better advantage for the best growth of the Church.

More perplexing and difficult than any question of form is that of the material to be used in organizing the new church. Men who apply to be baptized are disposed of by different motives, not necessarily from hypocrisy so much as from sheer inability to comprehend the insistence of Christianity upon moral purity. The duty of discovering who are sincerely and steadfastly taking the way that leads upward is a very weighty responsibility to be thrown upon a foreigner who has been but a few years among the people of the field.

In this connection the fixing of conditions upon which candidates may be admitted to baptism of course seems to be as different from the home church as may arise in every field which has been known in many, where the tide turns in favor of Christianity and men come in crowds asking to be baptized. Sometimes the conversion of a leading man may bring a whole village in seeming unity to ask for admission into the Church. It is often argued that baptism cannot be refused to those who declare their faith in Jesus Christ. It is even urged that to take such applicants when they are in the mood to be received is the wisest course; since after they are committed to Christianity their instruction of development is facilitated. The fact that some of those received in this manner and in this expectation fall away and continue evil practices, bringing discredit upon the name of Christ because they have been classed as Christians by their neighbors, seems to be a conclusive reason for avoiding haste in receiving such candidates.

For the good of the Church it seems to be a duty to make careful choice of those people giving instruction, and to be slow in coming to conclusions as to the principles of the new converts. Far better is it to watch such in order to be sure that the vitality of growth is in them. Intelligence, progress in education, intellectual championship of Christian doctrine may not be treated as advantages in admitting converts to the Church. A living faith in Jesus Christ, which has kindled in the heart a sincere purpose to live in Him and for Him, must be the condition of admission, or the Church will be uncertain in its growth educated for a Christ or the Vedas of the hostile powers of pagan lands. A reasonable certainty that the applicant has made the choice to turn from the low and self-seeking life to which he has been accustomed, with earnest desire to live for the higher things that belong to God's kingdom, must exist before the candidate can be safely acknowledged as a follower of Jesus Christ. At this point practical proof of faith, through the life and its trend, should outweigh the most glib proficiency in expression of doctrinal soundness. The Christian is to be a temple of the Holy Spirit, and the best choice has been made which opens a way for the Spirit to enter the heart as a dwelling, it is dangerous to hope that membership in the Church will serve as an incentive to an ultimate self-renunciation thus belittled at the outset.

Another peril for which confronts a missionary who would organize a group of converts in a newly fruitful field, is the choice of those who are to be office bearers in the Church. Some may be prominent through education. But a convert highly educated in Cicero or the Vedas of the hostile powers of pagan lands. A reasonable certainty that the applicant has made the choice to turn from the low and self-seeking life to which he has been accustomed, with earnest desire to live for the higher things that belong to God's kingdom, must exist before the candidate can be safely acknowledged as a follower of Jesus Christ. At this point practical proof of faith, through the life and its trend, should outweigh the most glib proficiency in expression of doctrinal soundness. The Christian is to be a temple of the Holy Spirit, and the best choice has been made which opens a way for the Spirit to enter the heart as a dwelling, it is dangerous to hope that membership in the Church will serve as an incentive to an ultimate self-renunciation thus belittled at the outset.

Many of these will be men who have had influence in the heathen community because of wealth or rank may not be the best men to carry responsibilities in the Church. The tendency of Asians to suffer themselves to be led by such will, perhaps, add to the difficulty of placing the most spiritual men in places where their influence will be widely felt. But happily the missionary, by careful study, can hope to reach a clear understanding of the ideas and motives of those who make up the material for the new church. Furthermore, the wise missionary will take counsel with the native evangelist who has had dealings with the people, and who understands the people as the missionary cannot hope he do. Much means selection of men must be made upon whom so much of the growth and the strength of the Church will depend.

The question of securing a right basis for church membership opens to the whole problem of discipline in the new churches. Perplexing peculiarities are thrown about this part of the education of converts from non-Christian peoples by the difference between the missionary and his spiritual children in mere matters of ordinary civilization. In this matter missionaries are constantly faced, and this involves that the ideal African convert, for instance, should not be
a mere apé-licence caricature of an English or American Christian. The real difficulties arising from the circumstances of the newly converted Christian are due to the learner's erroneous conception of artificial ones. Such a man is surrounded by untoward influences which long experience alone will fit a foreigner to appreciate. Ties of family or clan have a strength which we cannot easily gauge; usages suspiciously like pagan usages are to deal the learner a hammer blow for patriotism or nationality; superstitious reverence for witchcraft is inbred; feudal subservience to the will of the chief or the lord of the manor in respect to observances and feasts is not easily thrown off; caste affects not only the vision but the tenor of the wrong he. The missionary teacher of the newly developing church needs direct guidance from on high if he is wisely to separate in his own mind those points of unaccustomed conduct which may be tolerated from those which must be attacked, while the influences which lead to them are resisted with flintlike immobility.

It should here be noted again that the missionary unaided cannot hope to train men by church discipline. He must work with, and as far as possible through, fellow workers born in that atmosphere, knowing the impulses and ideas of the people living in it.

The difficulties which surround the question of church discipline on the mission field cannot be better illustrated than by the case of those converts who have been brought up to polygamy. It is not to be supposed that a polygamist may not be admitted to church-membership unless he first ceases to be such by putting away all but one wife. Yet some missionaries have been led to take the ground that each case must be judged by itself. It will be observed that the wives under a fixed rule which takes no account of their rights and their feelings. In some cases one of the wives of an unbelieving and polygamous husband has become an humble and sincere believer in Jesus Christ. To admit her to the church will be to relax the fiber of the whole body in its stand against polygamy. To refuse her admission will be to deprive her of privileges and gracious influences which she has forfeited not by any act of her own. To insist on her leaving her husband as a condition of admission to the Church will be to emrte her in her most tender human affections, as the in punishment for having followed in ignorance the current of usage, without conscious and willful wrongdoing. Such a situation is one that demands the highest wisdom in dealing with its complications.

The one principle that has to be followed in teaching the young churches to maintain discipline is to preach—and repeat—and root in the hearts of the Christians who make up the church-membership the fact that their witness for Christ is to be a positive witness, and that it cannot have this aggressive quality unless each member of the church is a living epistle, known and read of all men. As the members of the Church grow into understanding of the nature of Christian purity, and grasp withal the idea that purity, conservative, even the spurius will not be quarried by spots has no power to witness for Jesus Christ, they themselves will find solutions for many problems of discipline with which the missionary could not cope.

This sense of responsibility to witness for Christ has another bearing so self-evident that it need only be alluded to here. From the very beginning the members of the church come to feel that duty to their Redeemer requires them to tell others how great things the Lord has done for them. It is easy for the missionary to delay this teaching through sense of the slender knowledge of the best of the new believers. But delay here is fatal. Newcomers who have learned to try to follow Jesus Christ, that they have no light to give their neighbors. In pagan lands a glimmer of light is precious to those who live in darkness profound and eternal. Moreover, the convert who begins with regarding his Christian privileges as given by their own happiness for he will find it hard ever to shake off that heresy. Without recognition of responsibility to take up the very work which Jesus Christ did when upon earth, the Church will lack the first elements of strength and stability. The members of the Church must gladly surrender others the loving service that released them and awakened their desire for right living, or the Church will slowly die. The condition of life in the Church everywhere is that it must be constantly winning others to allegiance to its great Head.

The Church must not only learn from the very first to be exemplary in pure and honest living, and in eagerness to give to others the good which itself enjoys, but it must also learn from the first to give generously for the support of its own institutions that it may stand upon its own feet. This is no place to enter upon any discussion of the doctrine of "self-support" as it is technically called on the field. The principle is now universally admitted that the newly constituted church-members must be taught to give for the support of their church institutions and of other expenses of the church life. But missionaries often err in delaying to press this duty home upon the minds of converts at the very beginning. This is partly due to lack of understanding of the fact that the Church, which has learned to expect subsidy, will fall into confusion the moment that released and his subsidies are taken away. It is more often due to sloth. The missionary sees that the sums required are very small and feels that it is far easier to give them himself than to extract them from the pockets of people who live far away from him, and who probably are poor. There should never be a day's delay in teaching the converts their duty to set aside, as the Lord has prospered them, funds for His uses.

The Church on pagan soil which has grown to the point of being what it can be among the forces of reform; able to stand without aid and incentive from foreign lands; to govern itself, to maintain itself, and to use with eager initiative every opportunity to advance the interests of the Kingdom, is thereafter the leaven hid in the mass, performing the part falling to it in its Master's plan. It has become a center whence Divine influences will radiate with beneficent results while life continues. And there is no earthly joy greater than that of the missionary in a land of thick darkness, who has served as an instrument in the hand of God to lead converts during their early efforts that they may, as the spurted; to bring them into a church and to train them to fruitful activity in carrying on the work of Christ for the world. That missionary has had to eflace himself, to cast himself upon his Leader for guidance in many a perplexing crisis; but he has
had a share in a work of eternal duration, and whose pervasive influence none can measure. For such, a living church is the very body of Jesus Christ, precious in itself, and beyond price in its worth to the nation which is blessed by its presence.

CIENG BAU: A town in the province of Fokien, China, situated about 10 miles S. by E. of Kien-ning. Station of the CEZMS (1897), with (1902) 3 missionary women, 2 native women helpers, 1 elementary school, 1 high school and 8 converts brought in for baptism during the year.

CIUDAD DEL MAIZ: A town in the State of San Luis Potosi, Mexico, about 70 miles E. of the capital of the State. Station of the Associate Reformed Presbyterian Synod of the South, with 1 missionary and his wife, 1 missionary woman, 6 native workers, men and women, 2 places of worship, 2 elementary schools, 1 Sunday school, a Young People’s Society and 54 church members.

CITY MISSIONS: This term designates, in current usage, those agencies and methods of work in cities, which are chiefly concerned with the material and spiritual needs of the laboring classes and of the poor in the great towns and cities of Christian lands. It includes all efforts of Christian love for the ingathering and instruction of neglected children, the evangelization of the masses, the relief of the poor and wretched, or the rescue and reforming of the depraved and the vicious.

Great cities in all circumstances require work of this sort; its spirit and the model may be studied in the attitude held by our Savior toward Jerusalem. A large population, inevitably includes a considerable proportion of poor people who need from their more prosperous neighbors the helping hand. The poor are compelled by the exigencies of their condition to inhabit the less desirable parts of the town. There is also certain to be a criminal or vicious element in every large town, for town life offers peculiar opportunities for escaping the restraints of public opinion, for evil companionship, and for vice and crime. It is therefore especially alluring to the profligate and the dishonest. Thus the vicious also tend to herd together; and since poverty promotes vice and vice begets poverty and crime, all three are frequently found together in regions which are by choice as far as possible from the churches and good and helpful influences. Such places unless subject to the patient and vigorous application of moral disinfectants become hotbeds and nurseries of every sort of evil.

But the amount and importance of the missionary effort which cities demand has been immeasurably increased by those social and industrial changes which modern times have brought to all civilized nations. The discovery of the steam-engine, its application to the industries, the development of machinery, with thousands of attendant discoveries and inventions, have together resulted in the transfer of a great share of the world’s work from the rural districts to the towns, whether the world’s workers have followed it. This immense development of manufactures and consequent increase of traffic caused cities in all civilized lands to grow with amazing rapidity throughout the 19th century, and especially during its latter years. It would be difficult to parallel in all history, in a city of the same size, the growth, for example, of Chicago, which in 1880 numbered 503,185 souls, in 1896, 1,098,576, and in 1900 had reached 1,698,575.

If the city churches had nothing more to do than to keep pace with the expanding population, their task would be one of no small magnitude; but other churches have entered into the problem which very seriously enhance these difficulties. The steady flow of the human stream into the great towns has crowded them to an oppressive and truly terrible degree. Such overcrowding has had a twofold evil effect upon the artisan; it has progressively increased his rent, plunged him into so much the deeper poverty; it has driven him into narrow, and more narrow quarters, until it has stripped him of every semblance of a home.

The census of 1880 reported one-third of the families in Glasgow as living in a single room, and another third as occupying but two rooms. Less than one family in ten in the Scottish metropolis enjoyed so many as four rooms for its home. Health and morality seem alike impossible to children brought up under such conditions. There is even more straitly crowded than any of the old World cities, two-thirds of its people living twenty to each dwelling house, while London has but nine and is steadily increasing the space for housing the poor. Out of this overcrowding has sprung the tenement system, a system by which several families, usually not less than six or eight, sometimes as many as twenty-five, have been huddled together under a single roof, with common entries and halls, narrow rooms, and dark bedrooms. This plan of housing the working people is the one that generally prevails in American cities, although there are some marked exceptions, like Philadelphia. Fully one-half of New York’s population of 3,437,202 souls are at present living in her tenement-houses.

The ordinary city tenement offers to its unfortunate inhabitants the poorest conceivable apology for a home. Its atmosphere is both physically and morally unwholesome to a degree, and fairly poisonous, notwithstanding the efforts constantly made in London and New York to remedy these conditions. The saloon is at the center, the drunkard paddles on the common stairs; the shouts of countless rude, neglected children fill the air with shrill profanity; the discordant notes of the neighbors’ quarrels and the wail of sickly babes pierce the thin partitions. There is no quiet day or night, no privacy, no chance for the development of healthy family life. From the midst of such environments the city missionary must glean his scanty harvest.

The problem of city evangelization is further complicated by the fact that in their growth the great towns have a tendency to remove those portions of society whose influence would naturally be conservative and helpful from those who most need their help. The dwellings of rich and poor are more and more widely separated from one another. The most flourishing and able churches are farthest away from the fields that most urgently require their aid. The suburban movement, like a great eddy, draws off into the beautiful park-like villages about the town great multitudes of the middle-class folk—the bone and sinew of the churches’ strength.

In addition to these difficulties, religious effort in the cities of the United States meets with an even more serious obstacle in the complex and
confusing, mingling of nationalities in the population which it seeks to win. The immigrants constantly pouring into our land settle for the most part, or at least so far as the more ignorant and undesirable classes of them are concerned, in the towns. They and their children it is that people the tenements to-day. Seventy-six per cent of the inhabitants of New York city, the largest in our metropolis; but among the tenements, at least, there is no American quarter. Being of many races and speaking divergent languages, having very few and meager conceptions of religion, and being opposed by habit to the fundamental ideas of the Protestant religious system, these denizens of the tenements have proven exceedingly difficult to reach, and have rarely been gathered in great numbers into the churches of our fathers. The latter have depended largely for their increase on converts from families of American stock; but such families being only a small proportion of the population of most of the great cities. This explains the fact that while in the country at large more than one-fifth of the people are members of evangelical churches, in the large cities the proportion varies from one-tenth to one-twentieth. The reason also appears for the fact that while church-membership in the whole country has increased much faster than the population, in great cities it has fallen behind the population.

Notwithstanding these obstacles and difficulties, largely, perhaps, because of them, the work of city missions has been making wonderful advances in recent years. The broadening and deepening of public interest in its problems, and the increased amount of wealth and talent devoted to its aims, have marvelously enlarged the field and the scope of city missions.

The following are some of the most marked characteristics of the new development:

1. The aim of city missions has enlisted for its various forms of work, men and women of fine culture and large abilities in unparaleled numbers.

2. It has been adopted as a rule that Christianity should minister to all the necessities of the helpless and ignorant and degraded, not only caring for their spiritual needs but for their physical and intellectual needs also, and to do this by personal contact of individual with individual.

3. It is seen that alms-giving is rarely a benefit or a remedy, and a scientific treatment is applied to poverty, pauperism, and crime.

4. The mission Sunday school is extended to include week-day meetings and classes for the general instruction of people of all ages, and the children of the tenements are given, as far as possible, a substitute for their lack of home-life, through societies, clubs, reading-rooms, evening classes, industrial instruction, and the like.

5. “People’s churches” are substituted for mission chapels, and are equipped by the employment of pastors, missionaries, and other helpers; and the work is made more intensive and their influence more far reaching by establishing “parish houses,” with reading-rooms, club-rooms, class-rooms, gymnasiums, etc.

6. A deepening interest is seen among religious people in the needs of the poor which cannot be met by a tract or gift of money.

7. There is a strong movement toward cooperation between denominations, and between congregations in any one denomination. This is manifested in three ways: first, by churches in prosperous communities combining to sustain and enlarge the work of the church; second, by churches of different denominations uniting in schemes of general evangelization, including the canvass of the whole congested district of a city; and third, by the multiplication of strictly undenominational religious enterprises in the largest cities independently of the initiative of the churches.

8. Christian literature is deemed a most effective means of influencing the people who are drawn into relations with the city missionary. The Bible societies do an effective work with cheap editions of the Scriptures or parts of Scripture, and the London Tract Society, the American Tract Society, and similar organizations provide attractive tracts and leaflets in all languages. These are not only granted freely for the use of city missionaries, but are very extensively circulated by the colporteurs of the societies themselves.

Every city of consequence in Great Britain, the United States and Canada, and many on the continent of Europe is the field of some sort of city mission work. With local variations the same problems are everywhere met, and the same general method prevails, and the same tendencies are observable. The general plan adopted is first to minister to the immediate physical wants of the poor, then to help the unemployed to find work. Missionaries in the service of that church go from house to house, from room to room, learning needs, helping sufferers to seek and find relief, and preaching the Word; not one apartment is left unvisited, and weekly reports are made, at personal interviews with the pastor. Money is not given to the needy except in special cases, tickets being used upon which the orders are given. Provision is made for the care of orphans, for securing change of scene and rest for the exhausted and for convalescents, besides clubs, societies, meetings, and classes. Great vigor of life is a mark of the work in its efforts to give these instructions, and the work is spasmodic, for the people are lifted by degrees. They are first touched by the missionary in their homes, are then persuaded to visit the mission chapels, and thus are lifted a step higher. By degrees they learn to enjoy the prayer-meetings and are finally brought into the regular services of the Lord’s house. Under this system there is no hopeless class, however abandoned the people may have been.

As an illustration of the practical operation of the modern theory of city missions the following list is given of works for the poor and ignorant maintained by a single church in New York: Besides the regular religious services of the church, there are maintained services, in three different localities, in English and three foreign languages. The church also maintains a course of lectures for women and girls; a course of stereopticon lectures for men and women; a charitable bureau to aid the needy; an employment bureau; a loan association; a penny provident fund; a Chinese protection society to prevent imposition upon the Asiatics; a medical clinic, a surgical clinic, an eye and ear dispensary, a girls’ club.
with club-room, baths, mutual benefit fund, and regular classes in sewing, dressmaking, typewriting, stenography, etc.; a girls' club house, where members can reside temporarily when out of work, they being paid $3.50 or $4.50 per week for board; men's club, with reading rooms, billiards, gymnasium, baths, classes in gymnastics, bookkeeping, drawing and modeling; boys' club, with club-rooms, baths, military drill, and classes in typewriting, bookkeeping, drawing, etc. In a well managed club of this class the boys take a strong interest both in the work that they are doing at home, and come in contact with those Christian workers only, who understand and sympathize with their impulses and their needs.

Another of the religious agencies working among the congested districts of the city is a class of interdenominational enterprises, of which the New York City Mission and Tract Society (1829) may be taken as a type. The objects of this corporation are to promote morality and religion among the poor and destitute of the City of New York, by the diffusion of evangelical reading and the Sacred Scriptures, by the establishment of Sabbath schools, mission stations, and chapels for the preaching of the Gospel and for the ordinance of divine worship. The business affairs and the estate of the corporation are managed by a board of fifty directors, which are chosen from different religious denominations.

The Society has erected churchy buildings, has organized independent congregations on the principles of Christian union and cooperation, with the Apostles' Creed as the symbol of faith, and with a simple form of church government. The ministers in charge are regularly ordained by some one or other of the evangelical denominations, and associated with them for counsel and help are church officers chosen by the people. These missions are constituted on the basis of the Evangelical Alliance and their places of worship are called "churches for the people." Some of these edifices are large, spacious, elaborate in their accommodations and of architectural cleverness, combining beauty without and comfort within.

The methods adopted by the London City Mission are much the same as those which are pursued in other great cities for the relief and evangelization of the destitute and vicious classes. Each missionary visits once a month about 500 families, or 2,000 persons. Their work is to act as pioneers in places where the faithful pastor may in due time follow. They read the Scriptures, pray with and exhort the people, give them tracts, see that the children go to school, and that every family is possessed of a copy of the Word of God. While the Society's missionaries are forbidden to give money or to so deport themselves as to be looked upon as mere charity agents, they render most effective service in bringing relief to those whose destitution demands immediate attention; but their constant aim is, through Gospel instrumentalities, to reach and renovate the character, and thus transform the personal and family life. When this end is attained the family is at once found to be lifted permanently above the level of vice and want.

The field in London is so vast that it may be rightly termed unparalleled, imperial and national in its proportions. In order to come into effective touch with this vast urban field, the Society divides and apporrons its laborers to different districts, classes, and trades, and encourages the use of every means which experience has proved to be effective in reaching and rescuing the fallen.

The field of Labor is consisted of the departments of labor: House-to-house Visitations; Mission Halls; Open-air Work; Special Missions to Bakers, Day and Night Cabmen, Canal Boatmen, Chelsea Pensioners, Coachmen, Grooms and Hostlers, etc.; to the Docks, to Drivers in Islington, to the Fire Brigade, to the Police, to the Paris, French, to the Germans, Italians, Spaniards, Asiatists, Africans, Jews, and Foreign Sailors; to Hospitals; to Navies; to Omnibus and Tramcar Men, Railway Men; to Post-Office Employees, Telegraph Boys, City Police, Metropolitan Police, Public-houses, Common Lodging-houses and Coffee shops; to Hotels and Clubs; to Builders on Public Works; to Soldiers in London and Woolwich; to Theater Employes; to the Welsh; to Workhouses and Infirmaries; and to Gypsies.

The magnitude, severity, and difficulty of the work will more clearly appear from the following citations, selected from a vast number which have been published in the past in connection with the Society's reports: "I have paid," says one missionary, "during the past year 5,691 visits and calls, in which I read the Scriptures 4,671 times, besides offering prayer. To the sick and dying I paid 556 visits. I have given away 10,165 religious tracts and periodicals, and 12 copies of the Scriptures; 32 persons were induced to attend public worship, of whom 9 became communicants; 23 families were induced to establish family prayer; 14 confirmed drunkards were led to abstain; 5 backsliders were restored; and 3 couples living together unwed were induced to marry.

One appointed to work in the "Angel Gardens" because he was young and strong, found the "Gardens" were filthy courts of tumble-down houses, whose population of several thousands (in a space of 250 by 160 yards) were vagrants and criminals, many of the houses being dens of thieves, robbers, and murderers. "I had not been many hours at work," he reports, "when I was accused of being a policeman in disguise. At once I was hounded out by a depraved mob of thieves and outcasts. Upon my return home I was so cast down as to be able to gain relief only in tears and prayer. Very cautiously I went to work next day; but upon ascending a very steep, rickety staircase, a woman with hob-nail boots came on to the landing and declared with bitter oaths, if I came a step higher she would kick my eyes out; so I retreated. Desperate efforts to gain a footing were continued for several months, and so hard was the conflict that I have sometimes stood at an entrance to the district in silent prayer for a quarter of an hour before I dared venture down. This perseverance, however, with the Word of the Living God, was effective, and constant, brutal opposition was overcome, the for long years I was subjected to low abuse and occasional acts of violence. No Christian but myself dared venture into Angel Gardens; and I was therefore called to visit the sick and dying at all hours of the day and night, and many a strange scene I witnessed. In full day I saw a gentleman, who had ventured down the place, surrounded, his coat taken off and run away with. One morning I saw two women dragging a 'slave' to the street, with hair and all.

They were found beaten to death in
the yard. At another time I saw two women fighting, when one who had fallen dragged the other down by the long hair of her head, then bit pieces of meat out of her flesh; and the one who had got the worst of it spat it out of her mouth. One Sunday, going out early, I saw a woman on the ground with the blade of a knife sticking out of the chest-bone. She had robbed a sailor of all his money, and he had stabbed her. I also witnessed a murder when a Spaniard killed a girl named Norah with a dagger, and before I could prevent it, he blew half his head off with a pistol. After I had succeeded in opening a room for meetings, and a ragged-school in the center of my district, I was often stopped in the service by cries of murder and by fights.

"After many years of unceasing effort I gained entrance into many rooms, and into most of the dens. My care for the sick and the children disarmed opposition; then, in room after room, attention was secured to the reading of the Bible. Friendship on the part of many took the place of hostility, and I have been rescued from a band of roughs by a powerful and savage Irish woman, who on that very evening was arrested for robbery, and was transported for five years.

The work went on; people listen to the ragged school; and the interest of the poor increased. A few attended; soul after soul was brought under conviction, and many were gathered into the fold of Christ. The neighborhood was opened up to the clergy and consecrated lay-workers; sanitary and other improvements were made; and so, through the hearing in of the Gospel, the district changed its character to that of a far more respectable place."

Another class of these religious agencies may be encountered in some of the cities of Europe, where they have sprung from the kindly interest of a single individual, like the old Belleville mission in Paris. A lady named Miss De Broen, a worker in the Mildmay Mission, London, being in Paris, just after the outbreak of the Commune, visited Père la Chaise. Only the night before 500 communists had been shot there, and the long ditch into which they fell one by one became their common grave. A crowd of women and children surrounded the spot; their grief and despair were terrible to see; and Miss De Broen longed to do something for their relief. Every man engaged in the Commune was shot, transported, or had to flee the country. Thousands of women were thus left destitute and unable to obtain work. Even the priests and Sisters of Mercy shunned them. No one cared for them. Miss De Broen raised money by personal solicitation, engaged a room, and, passing to and fro in the streets of Belleville, which had been the center of the Commune, she spoke to the poor women, saying that she knew of their distress, and that if they would come to her room they would receive five pence for three hours of needlework; at the spaces out of her life that her chief object was to tell them of the Lord Jesus. The kind invitation sounded strangely in their ears, the greater number hardly understood it, and the first time only three were present. Eight came to the next meeting, and from that time the numbers steadily increased. The ignorance of these people was told upon their faces at first; they were rough and sullen. Many had seen their own little ones pine in the cold and hunger of the siege; others had lost all—husbands, sons, and brothers—in the war and in those last awful days of the Commune; all had known the agony of lengthened starvation, buoyed by false hopes and cruel treachery. Goaded on by pangs of hunger, by fear of the enemy, and by the thought of their clothing, and had attacked the soldiers unawares; worse than this, in their frenzy, they had done. But after only a few months in the sewing-classes a great change had come over the poor creatures; no fereeness and no sullenness now, but an earnest, even softened, expression appeared on many a face. In addition to the sewing-classes and Gospel meetings at La Villette, night-schools were soon opened for the benefit of many men who had been imprisoned, at the time of the Commune, but who, no charge having been found against them, were liberated after a few weeks. They could not read or write, and were glad to be taught. The McAll Mission in France is another instance of similar work.

The Salvation Army has proved a most effectual agency for mission work in cities. Its methods and style of presenting religious truth, and the language used by its members, arrest and secure attention. It has been called a mission "from the lower classes, by the lower classes, to the lower classes." Whether this characterization is just or not, its members never forget that a large part of the population of city, and of the reach will not listen to those who have not warm sympathy of feeling for them, and that they can receive impressions and ideas through the simple, perhaps rough, but picturesque language, only, which the common people use. Besides its regular religious services in its own halls or "barracks," in almost every city, even to the ends of the earth, which permits the practicé, it holds street meetings where they are most needed—near the resorts of the vicious. Its groups of "slum sisters' seek out the sick and needy, and comfort or otherwise help the despairing. It also maintains labor bureaus; various simple industries where the unemployed, however unskilled, can earn a living; lodging houses for men; inquiry bureaus; day nurseries for the small children of working women; shelter houses for homeless women; missions for the rescue of women who have gone astray, and homes for such use as a means to reform, etc. The Volunteers of America do a similar work in several American cities, and have found a way to lay hands upon criminals in prison in order to lead them to honest ways upon their release. Whatever may be said, justly, in the way of criticism, the Salvation Army and its offshoots or imitators have certainly had great influence in stirring up the churches to an appreciation of the needs of the poor, and especially of the power of direct contact to win and elevate the outcast.

One of the earliest steps taken by Mr. Hogg, the boy-loving merchant of London, when he decided that street Arabs must be saved, was to become a partner himself for six months, that he might know the boys, their needs, and their thoughts. As Dr. Josiah Strong has said, such persons "are in their own persons a revelation of God, and are demonstrating to us what has been demonstrated to every generation since Christ, that His love and sacrifice can be shown by the way they meet and comfort the poor. His followers to the most ignorant, hardened, and vicious, and that with saving power." This readiness to give self for others must underlie any successful city-mission work. Its instances
are made conspicuous, not alone in work like that of the Salvation Army, but in the work of the Young Men's Christian Association and especially of the University Settlements in the great cities. It is through watching such methods that we see and realize that no poor and ignorant person is ever treated as Jesus would treat him when he met a Samaritan with a mere gift of money.

The Boys' Club, House, not connected with any church but exercising a strong uplift both moral and spiritual through bringing neglected boys into touch with those who have not been neglected, is an institution already developed into a power in many cities. New York has a number, of which the largest, with a membership counted by thousands, is the one built by Mr. Harriman at the corner of 10th Street and Avenue A. The type of this class of institutions can best perhaps be seen in the Polytechnic in London. This institution began when Mr. Quentin Hogg, at the age of 18, one evening in 1863 sat down under an archway in a London street, with a candle stuck in a bottle for light, to teach two street Arabs to read the Bible. It is now a vast enterprise equipped to win and develop and transform into useful and trustworthy men, the boys of the slums. And the boys to whom poverty permits no respite for improvement. There are ten thousand members, and its graduates all over the world loyally help on its work. Such clubs are of priceless value, both in what they prevent and in what they secure.

While these religious agencies may be encountered in almost all cities in England, the United States and Germany, and while they are carried on by all denominations, including Roman Catholics and Hebrews; and while in Roman Catholic countries the various religious and social conduct city-mission work on very similar lines, such religious agencies are not by any means the only ones working for that general uplift of the poor which we have described as a part of the object of city missions.

This purpose is concerned in beneficent care for their poor and their laborers, many municipalities do true city mission work by applying disinfectants to the hotbeds of vice and restoring home and family life destroyed by the congestion of cities. The work of Glasgow in reforming its tenement houses permits no respite for improvement. There are ten thousand members, and its graduates all over the world loyally help on its work. Such clubs are of priceless value, both in what they prevent and in what they secure.

While these religious agencies may be encountered in almost all cities in England, the United States and Germany, and while they are carried on by all denominations, including Roman Catholics and Hebrews; and while in Roman Catholic countries the various religious and social conduct city-mission work on very similar lines, such religious agencies are not by any means the only ones working for that general uplift of the poor which we have described as a part of the object of city missions.

As a result of all these evangelizing and humanizing instrumentalities there is less drunkenness, less pauperism, less crime, in the great cities today than 50 years ago. The same is true in the foreign missions.

Informers, and incites all who would aid in any way in bearing the burdens of the ignorant and helpless.

One of the benevolent independent bodies aiding the poor in New York is the Legal Aid Society, which comes to the aid of the poor in any case where deserving persons are unjustly treated by employer or landlord. Another is the Samaritan Aid Society, which sees to it that the requirements of the Board of Health as to tenement houses are obeyed. The number of the boys' clubs which are fostered on unsectarian lines is considerable in all the cities. Furthermore, besides the hospitals, there are dietary kithens for the sick poor, burial societies that provide for the needs of the dead, and many other enterprises aimed by kindly sympathy toward the help of those who need help. One of the most touching of such kindly undertakings is what is known as the Little Mothers' Aid Association, which has for its object the securing of needed rest for girls of from 10 to 14 years old, who have the care of younger brothers and sisters during working hours when the mother is away. It takes such girls to its Holiday House for a day's, or a week's rest and entertains them at Christmas or at Easter. Of the same class are the Fresh Air enterprises founded in every city, which aim to give summer outings and country life to mothers and children from the tenement house region. The money for the regular support of such agencies comes sometimes as thank-offerings, and often in large sums unsolicited; but the means are never wanting.

As a result of all these evangelizing and humanizing instrumentalities there is less drunkenness, less pauperism, less crime, in the great cities today than 50 years ago. The same is true in the foreign missions.

CIUDAD VICTORIA: Capital of the State of Tamaulipas, Mexico, situated about 125 miles N. W. of Tampico, at the foot of the Sierra Madre Mountains. Station of the PS (1880), with (1902) 1 missionary woman. 2 native workers, 5 outstations, 1 Sunday school, 1 elementary school and 31 church members. Station also of the American Friends' Foreign Mission Association (1837), with (1900) 1 missionary, 2 missionary women, 15 native workers, men and women, 3 outstations, 1 printing house and a depot and 540 professing Christians.

CLANWILLIAM: Town in Cape Colony, South Africa, 140 miles N. by E. of Cape Town. Population, about 7,000. Climate, temperate and healthy. Station of the SFG (1898), with (1901) 1 missionary and 175 professing Christians.
CLARENDO: A town in the island of Jamaica, W. I., circuit of the United Methodist Free Churches (1855), with (1901) 1 missionary, 37 native workers, 4 places of worship, 1 Sunday school, 3 day schools, and 250 professing Christians.

CLARK, Ephraim W.: Born Haverhill, N. H., April 25, 1799; graduated at Dartmouth College, 1824; Andover Theological Seminary, 1827; ordained at Brandon, Vt.; sailed as a missionary of the ABCFM, November 3, 1827, for the Sandwich Islands, preaching Honolulu, 1829-1831. In 1852 he went with the first company of American and Hawaiian laborers to assist in commencing the mission in Micronesia. In this duty he represented the Hawaiian Missionary Society. In 1863, having been for fifteen years pastor of the large First Church at Honolulu, he resigned the pastorate, partly because of insufficient strength, but mainly that he might engage more fully in Bible revision. Having spent a year on that work at the islands, he was sent to New York in 1864 by the mission to superintend the printing of the Hawaiian Bible and by the American Bible Society, reading proofs, preparing references, etc. This was followed by the translation and printing of the Tract Society's Bible Dictionary, and several other books and tracts. The last work completed was a hymn and a song-book for the mission, now in print.

CLARK, Robert: Born 1825, at Harrington Vicarage, Lincolnshire. He took his degree as twenty-eighth wrangler at Trinity College, Cambridge, and was at once ordained to be his father's curate. In 1851 he offered himself to the CMS, and was sent to the Punjab Mission. He was one of the first two missionaries of the CMS to the Punjab, being stationed at Amritsar. In 1854 he was one of the first two CMS missionaries to Peshawar, and went there at a time when many believed that preaching the Gospel would be followed by assassination of the preacher. In most of the important stations in these provinces he did pioneer work. The most of his missionary life, however, centered at Amritsar. As secretary of the Punjab Bible and Religious Book Societies, he did much to provide and diffuse Christian vernacular literature. He was a good organizer, keen writer, and very much of a man of work. In 1877 he organized the Punjab Native Church Council, and in the following year he established the Alexandria Christian Girls' School at Amritsar. After the publication of his Commentaries on the Gospels of St. Matthew, St. John, and the Acts of the Apostles, he received a Lambeth degree of Doctor of Divinity. Dr. Clark retained the office of Chairman of the Church Council for nearly ten years, the secretarship of the CMS Mission till 1897, and the honorary secretarship of the CEZ for a longer time. In 1900, the seventy-fifth year of his age and the forty-ninth of his missionary career, he entered his rest at Kasauli, in the Himalayas.

CLARKABAD: A Christian village in the district of Lahore, Punjab, India, situated about 45 miles S. W. of the city of Lahore. Station of the CMS (1869), with (1901) 2 women missionaries, 9 native workers, men and women, 1 chapel, 2 Sunday schools, 19 communicants. Also station of the CEZMS (1882), with (1901) 1 woman missionary, and 1 orphanage with an industrial department.

CLARKEBURY: A town in the northeastern part of Cape Colony, S. Africa, lying about 22 miles S. W. of Umtata. Station of the South Africa Wesleyan Methodist Missionary Society, with (1901) 1 mission, 37 native workers, 9 preaching places, 8 Sunday schools, 2 high schools, 1 industrial school, and 600 professing Christians.

CLARKSON: Station of the Moravian Missions (1839) on the southern coast of Cape Colony, S. Africa. It is pleasantly situated on a mountain slope, about 50 miles W. of Port Elizabeth. The name of the settlement is that of a philanthropist who contributed largely toward the expense of the station's establishment. The present force at this station consists of 1 missionary and his wife, and 27 native workers, men and women, with 3 places of worship, 2 schools, and 214 communicants.

CLAY ASHLAND: A town on the western shore of Vancouver Island, British Columbia; station of the Methodist Missionary Society (1882), with (1901) 1 missionary, 18 native workers, 8 places of worship, 6 elementary schools, and 533 communicants.

CLYDESDALE: A town in Cape Colony, S. Africa (Griqualand East), situated 60 miles S. W. of Pietermaritzburg. Station of the SPG (1871), with (1901) 1 missionary, 18 native workers, 8 places of worship, 6 elementary schools, and 533 communicants.

COAN, Titus: Born at Killingworth, Conn., February 1, 1801; died at Hilo, Hawaii, December 1, 1882. In August, 1833, under the direction of the American Board, Coan sailed on a mission of exploration to Patagonia, and with Rev. Mr. Arms he was set ashore among the savages of Gregory Bay. For several months Coan and Arms lived among the ferocious nomads of the eastern coast of Patagonia; but the savages becoming suspicious of their motives, they escaped, returning to New London in May, 1834. Mr. and Mrs. Coan arrived at Honolulu, June 6, 1835, and the following month they reached Hilo. Upon his arrival Coan found that some leaven of the Gospel had already been cast into the lump of heathenism; missionaries had resided here for brief periods; schools had been established; one-fourth of the natives could read; and there was a church of thirty members. In three months' time he began to speak in the native tongue; and before the year closed he had made the circuit of the island by canoe and on foot, a trip of three hundred miles. He was incessant in his labors. He preached forty-three times in eight days, examined twenty schools and more than 1,200 pupils, conversed personally with multitudes, and ministered to many sick persons during a tour of thirty days through the island. On a tour made in the latter part of 1835, signs could be seen of the coming Pentecost. Multitudes thronged to hear the Word; and so eager were the people to hear the message of salvation that one morning he was constrained.
to preach three times before breakfast, which he took at ten o'clock. In 1837 the great revival commenced. Nearly the whole of the population of Hilo and Puna attended religious services; the growth of the Church. The utmost care was taken in selecting, examining, watching, and teaching the candidates. The first day of July, 1838, occurred the greatest accession to the Church; 1,705 took upon themselves the vows of God that afternoon; and 2,400 communicants sat down together at the table of the Lord. During the five years ending June, 1841, 7,557 were received into the Church at Hilo; and these composed about three-fourths of the adult population of the parish. To show the abiding result of this wonderful work of grace, about one in sixty came under discipline; the greatest part of these were restored, and the very few that were finally cut off. Under the most careful training the people became more and more settled in faith and morals; and probably to-day the ratio of people in New England who cannot read and write is greater than among the Hawaiians in Hilo and Puna.

In 1867 a girls' school was divided into seven local churches, six of them with native pastors. Mr. Coan's two books, Adventures in Patagonia and Life in Hawaii, are of great interest.

Coan (Mrs. L. B.), Titus Coan, Chicago, 1885.

COCANADA: A city in the Godavari district, Madras, India, situated 86 miles S. W. of Visagapatam; navigable canals connect it with the Godavari River. Population (1891) 40,800, of whom 90 per cent. are Hindus. Station of the BOQ (1874), with (1902) 9 missionaries, men and women (two of them physicians), 19 native workers, men and women, 3 chapels, 25 Sunday schools, 9 elementary schools, 1 high school, 1 training school for girls, 1 industrial school, a dispensary, a printing-house and 234 communicants.

COCHIN: A native state on the W. coast of India, between the Western Ghats and the sea, and north of Travancore. It has an area of 1,362 square miles and a population (1901) of 812,025. The prevailing religion is Hinduism. There are, however, some groups of the ancient Syrian Christians of the Jacobite church still remaining in this region.

The CMS commenced mission work in Cochín in 1817, at first in association with the Syrian Church. Since 1847 it has worked separately, and the reform party in the Syrian Church aid its ministers in evangelistic effort. The CMS has 2 stations in Cochín with which 143 Christians are connected and with 1,144 pupils in the mission schools.

COCHIN-CHINA: A province of French Indo-China, lying along the coast to the south and east of Cambodia. It has an area of about 22,000 miles and a population of (1901) 2,968,529. The population is composed chiefly of Annamites, Cambodians and Chinese, with a certain number of Malays, Indians and Europeans. The religion of the people is for the most part Buddhism, with a considerable number of demon-worshipers, a few Mohammedans and about 75,000 Roman Catholics. The chief production of the country is rice, of which large quantities are exported to China. A considerable portion of the trade of Cambodia reaches the sea through the ports of Cochín-China, of which Saigon and Hanoi are the most important. Saigon until 1902 was capital of French Indo-China and the residence of the Governor-General, who now resides at Hanoi in Tonking. Protestant missions do not exist in Cochín-China, but the Roman Catholic missions are pressed with vigor and success.

COCHRAN, Joseph G.: Born in Springfield, N. Y., 1817; graduated Amherst College, 1842, and Union Theological Seminary, 1847; sailed the same year as a missionary of the ABCFM for the Nestorians. He took the place of Dr. Stoddard as principal of the male seminary at Süré, and with that school his life's work was identified. From 1851 till the death of Dr. Stoddard, in 1857, the two were associated in the conduct of the seminary. Mr. Cochran then became principal and conducted it much till 1865. During those seventeen years it is said that he did more than any other man to educate and equip teachers and preachers for the Nestorians and for Persia. When he took charge there was no congregation or Sabbath-school; before the close of his life several churches were organized and a presbytery formed, embracing twenty-five congregations. He was a voluminous author and translator in the Syriac. He prepared a very complete Bible Geography and History, and several school-books, as Algebra, Astronomy, Natural Philosophy, and later, a valuable work on Pastoral Theology and Homiletics. He died November 21, 1871, after an illness of thirty days.

CODACAL. See Kodacal.

COIBAMATORE: Capital of the Coimbatore district, Madras, India, situated at an altitude of 1,348 feet in a hilly country, 84 miles S. E. of Calicut. The climate is cool and healthy, the malaria infects the regions at the foot of the hills. Population (1901) 53,680. Station of the LMS (1830), with (1901) 6 missionaries, 72 native workers, 103 native workers, men and women, 29 Sunday schools, 52 village schools, 1 high school, 1 home for boys and 1 for girls pupils and 279 church members. Also station of the Leipzig Missionary Society (1866), with (1900) 1 missionary and his wife, 1 missionary woman, 34 native workers, men and women, 108 pupils, 12 schools and 984 professing Christians. Station also of the SPG (1895), with (1901) 13 native workers, 1 chapel, 2 schools and 187 adult baptized Christians. The P.B. also has 1 missionary and his wife there.

COKE, Thomas, LL.D.: A clergyman of the Church of England and a graduate of Oxford. In 1778 he became the intimate friend of John Wesley, and entered heartily into his plans for the spread of the Gospel. He worked with Wesley for 15 years as superintendent of his work. In 1786 he set sail from England to begin a mission in Nova Scotia under the WMS. Returned to England in 1838 and funds for the WMS mission in the West Indies. In the course of ten years Dr. Coke made four voyages for that mission, and also visited the United States at the formation of
the Methodist Episcopal Church. He superintended the work on the West India Islands, and under his wise guidance the mission prospered exceedingly. He now turned his attention to Ceylon and India. He was so anxious to commence this mission for the WMS that he offered to defray all the expenses himself, amounting to £6,000, and to go with the missionaries. His friends tried to dissuade him from this long voyage, but he said, "If you will not let me go with you, you may take my heart." He sailed from Spithead in company with six others. On the ship he was taken ill; a shock of paralysis followed, and he was found dead in his cabin. He was buried at sea June 1, 1814.

COLAR. See Kolar.

COLLEGAL: A town in the Coimbatore district, Madras, India, 34 miles E. S. E. of Mysores. Population (1891) 9,900, for the most part Hindus. Station of the PB, with (1900) 1 missionary and his wife, 4 missionary women and 1 orphanage. The name is also written Kollegal.

COMBO: Capital and chief seaport of the island of Ceylon; situated on a peninsula on the W. coast. It resembles a European town. Population (1901) 158,225, Tamil, Singhalese, Europeans and Eurasians. It is an important missionary center. The BMS established a station there in 1812, which now has 1 missionary and his wife, 1 missionary woman, 1 native worker and a high school. Also a station of the WMS, with 10 missionaries, men and women, 99 native workers, men and women, 7 outstations, 17 elementary schools, 2 high schools, 1 college and 552 communicants. Also a station of the CMS (1852), with 14 missionaries, men and women, 143 native workers, men and women, 67 elementary schools, 3 high schools and 608 communicants. Also a station of the SFG, with 1 missionary, 13 missionaries, 1 missionary school, 1 high school and 1 college. The Christian Literature Society for India has a missionary and his wife there with 8 native workers, a printing-house and a book depot. The YMCA (1896) also has a missionary and his wife there; the YWCA has a woman missionary, and the Salvation Army a post, of which the statistics are not published.

COLOMBIA: A republic of South America, occupying the northwestern corner of the continent, adjoining the Isthmus of Panama, and bounded on the east by Venezuela and on the south by Ecuador. The whole of that section gained its independence from Spain in 1819, being officially constituted December 27, 1819, but soon split up into Venezuela, Ecuador and the Republic of New Granada. In November, 1903, the state of Panama drove out the Colombian officials and declared itself an independent republic. The language is Spanish and the religion Roman Catholic, the other religions are permitted so long as their exercise is "not contrary to Christian morals nor to the law."

The ABS has an agency at Bucaramanga and the PN has 3 mission stations with 18 workers, men and women, and 6 schools.

COLON: Town of 4,000 inhabitants in the Republic of Panama, situated on the N. side of the Isthmus of Panama. Station of the Wesleyan Methodist Western Conference of the West Indies. The working force in 1900 was 1 missionary.

COLONIAL AND CONTINENTAL MISSIONS: These are missions established by the different churches of England, Scotland and Ireland, primarily for work among the English residents of the colonies and on the continent of Europe, and secondarily, to assist various evangelical churches in Europe in their own home work. They carry on their work by sending out special missionaries, appointing chaplains, assisting in the erection of chapels, giving grants in aid to local churches and organizations, assisting in schools, providing for divine service at army and navy stations, etc. One of their most important lines of work is that of supplying services at the various resorts of summer and winter visitors on the continent of Europe. Almost every prominent resort of tourists has one or more chapels, where there is a minister, with the Sabbath by a minister, who on hand also through the week to render assistance such as a pastor can give in case of need. These stations are in some degree, sometimes entirely, supported by the gifts of those who attend. But it is the rule that some one of these societies is the actual supporter of the services without which the Sabbath of the traveler would give no opportunity for congenial worship. Another line of work scarcely less important than the so-called regular foreign missionary work is that of supporting those evangelical churches that, under great discouragements and amid much opposition, in Belgium, France, Italy, Spain, Bohemia, and Moravia, are seeking to stem the tide of priestly domination and preach a pure Gospel. Many of them would be not only weakened, but crippled and even overpowered, but for the timely aid received by them from the Christians of Great Britain, largely through the medium of these societies.

Many of the foreign missionary societies carry on a colonial and continental work of the above description in connection with their work for heathen and heathenish communities. Among these are the Society for the Propagation of the Gospel in the South American Missionary Society, the Methodist and Baptist Societies.

COLUMBA: A settlement in the Transkei district, Cape Colony, S. Africa; situated about 18 miles S. E. of Butterworth. Station of the UFS (1875), with (1902) 1 missionary and his wife, 27 native workers, 18 schools, and 363 communicants.

COMBAISONUM: The most sacred town in Madras, India; situated 22 miles N. E. of Tanjore in the most fertile part of the Cauvery River delta. Population (1901), 59,673, ninety-five per cent., of whom are Hindus. Station of the Leipzig Missionary Society (1858), with (1900) 1 missionary and his wife, 12 native workers, 10 chapels, 7 elementary schools, 1 high school, and 664 professing Christians.

COMBE. See Paramaribo, of which it is part, for joint statistics.

COMITY OF MISSIONS: Comity implies courtesy and kindly consideration and sympathy shown
to others. The comity of nations is defined in the dictionaries as "that friendly and mutual courtesy under which various beneficial acts and mutual recognitions are performed between nations." A certain self-restraint or even self-denial accompanying such kindly courtesy is suggested by this definition. Since Christians do not feel self-denial in doing kindly deeds for fellow Christians, we must modify the definition slightly in this plan. Intermingled with the comity of missionaries, or comity of missions, is that friendly and mutual courtesy under which various beneficial acts and recognitions take place between missionary societies or missionaries of different organizations because they are working for one purpose under the one Master and Lord, Jesus Christ.

In the presence of the principle of love to all men explained and enforced by Jesus Christ, there is hardly need to point out other reasons why missionaries struggling with a gigantic task in an unsympathetic multitude should be kindly and courteous to one another. Yet other elementary factors enter into the obligation to cultivate comity in the enterprise of missions. These are underlying truths such as God's unswerving purpose that His word shall be as the rain which watereth the whole earth, making it to bud and bring forth, and give seed to the sower and bread to the eater. Because of that eternal purpose the work of disseminating knowledge of the Gospel is one and indivisible. Again, the effect of agency in this work is God's word and man's deductions from it. Hence the resulting fruitfulness of barren lands shall be to Jehovah—not to the men who are used as God's instruments in the work, but to Jehovah—for a name. Another of these elementary factors is the aim of missions. This aim is not to publish a human philosophy of the plan of salvation. It is to make Jesus Christ known to those who know Him not, in order that they may yield allegiance to Him and follow Him. In such a work all evangelical missions are united, becoming branches of a single, vast enterprise in which self-will of men must be subordinate to the King. This implies that the mission field must be subordinate to the King. This implies that the mission field must be divided in such a way that there shall be no overlapping. If there is overlapping, there will be differences of interpretation and outward practice which cannot be eradicated.

The conclusion is irresistible that Warneck has struck a right note in urging upon all the leaders of missions the point that when evangelical denominations are admitted to "possess such a measure of truth as is sufficient to show a sinner the way of salvation," believing that salvation is not by any church but by the Lord Jesus Christ, comity of missions is the logical consequence. All those who, in love to Jesus Christ, labor for the extension of His kingdom are fellow workers in the one undertaking that is directed by the Divine purpose.

Comity of Missions, then, implies on the part of the missionary: 1. A truly affectionate sympathy for all others who seek to advance the Kingdom; 2. Readiness to aid such fellow workers in their problems and difficulties; and 3. Readiness not to profit at the expense of other Christian laborers. In other words, Comity of Missions is the application of the Golden Rule throughout interdenominational relations. It is the exhibition by missionary workers of those very principles of love for God and man which they seek to commend to others. In the copious phrase of the mission reports this practical result of comity to the lonely worker in a heathen land is a mass of kindly sympathy, of experience, and of fraternal support from fellow workers of other names and nations; for those who are cut off by their calling from home influences it provides a spiritual environment; it placed the resources of every mission at the service of all, and it so unites the missionary interests in any heathen land that they cannot be attacked with impunity nor disregarded with temerity. While a lack of comity produces distrust, anxiety, resentment over injuries, and waste of strength, the practice of comity brings to all missionaries in any land a quiet confidence, a mutual support in prayer, a mutual trust, and a courage strengthened by the sense that the great aim is being furthered by many instead of by few. The truth has been gradually receiving emphasis in the mission field that comity is a necessity.

Asia and Africa are not to be taught to copy the customs and dress and manners of Europe and America. Little by little this rule will be extended until it also deprecates the teaching of the forms and customs of merely European or American philanthropy. The enterprise of missions requires subordination to the interests of the Kingdom of Christ. The demand of this great interest is similar in kind to current demands for the subordination of personal or denominational interests to the general interests of the Kingdom of Jesus Christ. The demand of this great interest is similar in kind to current demands for the subordination of personal or denominational interests to the general interests of the Kingdom of Jesus Christ. The demand of this great interest is similar in kind to current demands for the subordination of personal or denominational interests to the general interests of the Kingdom of Jesus Christ. The demand of this great interest is similar in kind to current demands for the subordination of personal or denominational interests to the general interests of the Kingdom of Jesus Christ. The demand of this great interest is similar in kind to current demands for the subordination of personal or denominational interests to the general interests of the Kingdom of Jesus Christ.

Dr. W. Newton Clark has said: "It is the work of foreign laborers in the East to bring into existence a native evangelizing force and a body of Christians that can permanently maintain Christianity in all the future." But when this object is reached, the mission field that continues in progress, if another denomination another church, even another race shall place a claim to a mission to preach some denominational peculiarity of observance, it not only throws despite on the whole teaching of the earlier missionaries in the field, but, by supplying the people with numerous foreign preachers, it tends to destroy the possibility of growth of infant churches into self-reliant and permanent aggressiveness for the Kingdom. To a layman, accustomed to consider the claims of courtesy in dealing with strangers and even with rivals, it may seem incredible that Christians engaged in this struggle for a new race type in the midst of hostile masses of people are not always able to suppress personal tastes for the sake of such a cause. But lack of the spirit of comity can sometimes be detected even in the periodicals which represent the missionary societies. These sometimes declare that a territory as large as New York State depends for light upon a single missionary. In actual fact a dozen missionaries are in the district besides the one referred to, but they are not within the circle of influence of the writer, because they belong to another denomination. Of course, one may read the report of a missionary who accompanies his list of the year's additions to his church with the naive explanation that the number would
have been more, had not all been won from the church of another denomination—since it takes twice as much effort to convert one who is already in the wilderness as he is in the heathen." Such peculiarities of missionary literature suggest the direction of the selfish discourtesy and unkindness sometimes practised by missionaries toward those of another denomination. Many instances might be cited of the entrance of some narrow enthusiast into the mission field of another evangelical denomination to play the church members with objections to some detail of the teaching by which they have been brought to Christ, and to present with feverish industry enticements to enter a different fold. Then some veteran missionary, aghast at such intrusion, writes home in humiliation, "Men whom I baptized in infancy thirty years ago, and whom I have lovingly nurtured into Christian manhood, are now being invited by these newcomers, who have neither called on me nor seen me, to canvass the question whether or not I am a true disciple of Christ." Moved by such a spirit of discourteous rivalry, the intruding missionary gathers up native workers who have been dismissed for cause, and church members who are under discipline, and lavishes upon them sympathy for the hardships in which they have been placed. The case has happened more than once that a rival enterprise, entering a field long cultivated, has taken up and trusted a native helper dismissed for grave misconduct. The act causes scandal in the older church and double scandal when the unrepentant sinner, thus encouraged to be bold, repeats his misconduct in his new position. Such intrusions work farreaching harm to the general cause of the Kingdom. A clear-headed missionary, grieved in soul at the short-sightedness of those who can see no field so attractive as one which is already occupied, says: "China can never be Christianized on the principle of putting half a dozen denominations together in one town. It is too big and too hard-headed." This contempt of comity causes what the late Dr. A. C. Thompson called "evangelical anarchy." It affects not believers but Christian denominations. It is an utter waste of forces, and it impairs the welfare of the Church as a whole. This blind and heartless proceeding is an outrage which, by contrast, throws emphasis upon both the meaning and the beauty of comity of missions. Happily, discourtesy is not the rule of evangelical denominations on the mission field. Brotherly love is the rule. To quote Dr. A. C. Thompson again: "In general, Christian brotherhood is nowhere so warmly felt as among laborers from different sections of the Church, toiling in the same great harvest-fields of heathendom." The veteran expert on mission theory and practice, Warneck, says: "The concord between missionaries of the different societies is greater than the discord; the esteem shown on all sides is stronger than the distrust, and respect for one another's bounds is more general than infraction of them." When infringements of comity occur through inadvertence or insufficient information, kindly negotiations may often save the day; as, for instance, when a few years ago the Reformed Church in America had its Ararat field in India entered for a sectarian raid by another zealous denomination. The Society calmly explained to the intruder's superiors the effects of such intrusion, and these wise and Christian men at home promptly ordered the indiscreet agent to leave the Ararat field and to save his energies for enlightenment of the heathen.

From the beginning of modern missions attempts have been made to secure full practical application on the mission field of the principle of comity of missions. A favorite experiment has been to attempt delimitation of fields or spheres of influence. The natural feeling underlying such efforts led the Baptist (U. S.) Triennial Convention, as long ago as 1835, when contemplating an enlargement of their enterprise of foreign missions, to authorize the board of managers to establish new missions in every unoccupied field. The theory of territorial delimitation has generally suggested that in fields already occupied missionaries be instructed to keep out of the districts where others are laboring, and that in new fields missionary societies arrange among themselves bounds within which each will conduct operations. It is then assumed that priority of occupation must bar other denominations from entering territories so assigned. The action of Abraham and Lot in dividing Canaan is often urged as a model to be followed by missionary societies. Rev. Dr. Alexander Duff, on visiting the mission field of the Church of England, urged his colleagues toward a prosperous field occupied by another society, said: "I would as soon leap into the Ganges as to think of going to Timnevelli except as a brother to see the good work that is going on." A striking instance of a similar comity was seen a few years ago in the Island of Fernando Po. The island was once occupied by the Baptist Missionary Society (England), until it was expelled by the Spanish Government. After many years people in one part of the island asked the Primitive Methodists (England) to send missionaries for their instruction. People in another part of the island asked the Baptist Missionary Society to send missionaries. About the same time Bishop Crowther, of the CMS, hearing that there was now toleration in the island, went there with a view to opening missionary work. Residents in the island immediately began to send money, and a committee was formed and put into his hands $1,000 toward the expense of building a chapel. But when the Baptists, who had a claim of former occupancy, and the Bishop, who had a claim of present readiness, heard that missionaries of the Primitive Methodist Society were already on the way, they withdrew; the $1,000 was given back to its donors, and when the Methodists arrived they found a clear field. Similar cases abound of territorial divisions and of spheres of influence respected by the different societies. Recent action respecting mission fields in Porto Rico and the Philippines, taken in conference together by the several American missionary societies, seems to show that this method of securing the fruit of comity is practical and effective. Dr. J. C. Gibson, of Swatow (in Mission Problems and Mission Methods), has published a diagram showing in a very telling way the waste of legitimate influence by the missionary enterprise through crowding centers of influence too closely together. Yet, notwithstanding all that can be said in favor of the plan of territorial lines which aim to secure the best advantage of keeping men and money apart, the result is often satisfactory. Where a missionary society is laboring among people of which some clans branch off into a region inhabi-
ted by people of another race and language, and already occupied by another society, it claims the right to follow up the people, disregarding merely territorial divisions. The passing of boundaries is conscientiously defended as necessary in cases like that of the Reformed Churches, some missionary societies, and the Jews. Such a principle is found only in the practice of the Jews in the Old Testament, but it seems to have found its way almost everywhere, among the nomad tribes, to China, Japan, and Cilicia, of the missionaries of the Methodist Episcopal Church among low caste people of the Nerbada Valley in India, and of missionaries to the Jews everywhere. Furthermore, with the increase of emigration, the principle of comity is applied in such a way that missionary work is extended to include territory which is part of the British Empire. Moreover, aside from these cases of objection to the theory of setting off districts and spheres of influence, the plan is not entirely effective in practice. The real end sought through such divisions of territory, besides avoidance of overlapping and wastefulness, is relief from injury through disregard of the principle of comity. But those who will not regard the principle of comity will certainly not regard territorial limitations that exist on paper only.

A source of many violations of comity on the missionary field is discontent of native workers with the mission, and especially those tending to develop self-support in the churches. It sometimes happens that such malcontents offer to transfer their service to missionaries of another denomination. It requires both coolness and common sense to refuse such applicants. And yet to accept them without close scrutiny will be unkind and unwise. In 1838 native workers of the Church Missionary Society in India, having been dismissed for cause, offered themselves, together with the field and its equipment, to the London Missionary Society. Of course the offer was refused. At a later period an able native minister in the employ of the ABCFM in Turkey became dissatisfied and appealed to the Church Missionary Society, offering to convey his whole congregation to the Anglican Church if a missionary could only be sent to him. The CMS refused to enter the field of the ABCFM, and after a time the party, which had vainly hoped to profit by sectarian feeling, returned to its former connection. Many attempts have been made to secure a general adoption by the missionary societies of rules looking to the erection of barriers which will prevent one denomination from becoming a house of refuge for church members under discipline in another, and salary from becoming a lodestone to draw men from their posts. The case has even arisen where enactments have been sought preventing adherents from applying to missionary societies to the adherents of another mission. As a means of settling such grievances, the establishment of "boards of conciliation" by the different missions has often been proposed. The proposal has never met with general favor. For all such troubles of the missionary a sincere adoption of the principle of comity would be a sufficient remedy, securing the same ends as a cumbersome board of conciliation.

Discussions of these various plans for securing mutual regard among missionaries and missionary societies have proved the value of regular conferences between missionaries of different denominations. Such conferences are a regular event in India, China, Japan, South Africa, etc., and similar conferences are established between the officers of missionary societies in Germany, Holland, and countries of Scandinavia, Britain, and the North American Continent. These Interdenominational Conferences have proved potent agencies for fostering comity of missions. It now seems that what territorial limitations and detailed rules as to the minutaee of missionary practice have so far failed to secure in the way of mutual confidence and consideration is in a fair way to be secured through acquaintance and face to face conferences. It is now clear that, when missionaries of different denominations become acquainted with each other, they see that the aim of all is the same, and the spirit of all, the spirit of the Master. One of the more recent results of this mutual fellowship between missions of different denominations is the discovery that various forms of cooperation between societies are possible, and also advantageous to all. An example of such cooperation may be seen in the Madras Christian Convent, founded ago by the Church Missionary Society, and now unified by the Church Missionary Society and the Wesleyan Missionary Society, and patronized by all societies, so that it has become the great representative of Christian higher education in South India. A similar cooperative institution at Feling, China, seems likely to be the ultimate result of the destruction of Methodist, Presbyterian and Congregationalist colleges there during the Boxer troubles of 1900. In Japan, in Mexico, and in other fields the presses of different denominations cooperate in producing literature that all can, and do, use in evangelistic work. In several countries the different branches of the Presbyterian Church have secured a degree of cooperation amounting to organic union between their missions. And in Japan the world has seen the thrilling spectacle of all evangelical Christian churches cooperating in repeated evangelistic campaigns through a union of Christian hearts and abilities which did not originate so much with the missionaries as with the native Christians who demanded and would have it. When a stage of development is reached that makes such things possible, the history of discussions respecting practical applications of the comity of missions seems to be near its close.

There may be advantage, however, in summarizing, before leaving the subject, the points which seem to be now settled as to the practical applications of the principles of comity in the broad field of the missions of Protestant Christendom. There seems to be general agreement that:

1. Careless overlapping of mission forces and needless reduplications of apparatus and plant is not only a sin against comity but against the Lord of all missions. Whose resources are thus wasted.

2. All evangelical denominations have rights which must be respected on the mission field; and these rights are equal.

3. The presentation to pagans or Mohammedans of an impression of division in the Christian ranks must be avoided by all possible means. Hence (a) Every society will abstain from efforts to draw converts from other societies or to prove to the public its own superiority to other societies; (b) In choosing fields of action each society should select places where it will come in contact with persons not reached by other societies; (d)
Missionaries of different denominations should meet together, at stated times, wherever possible, for prayer and mutual encouragement and stimulus, and should hold general conferences for exchanging views on missionary problems at regular intervals.

4. Financial or other stringency has taught all that cooperation between evangelical missionary societies must be so extended as to make needless the reduplication of publishing houses, hospitals, and training colleges for higher education.

5. For the better cultivation of interdenomina
tional comity missionary candidates should receive instruction on the subject, and official organs of missionary societies should give the public, besides information respecting their own work, ample descriptions of important results gained by others.

Realization of the meaning and the basis of comity of missions carries the mind to a fuller grasp of the fact that in the many-sided missionary enterprises of the various denominations we have a series of movements resembling the march of the different columns of a great army, each independent and differently circum
casted, but all moving under the orders of one Chief, upon a single strategic point, with the certainty that at the critical moment all will be there, all ready for action, and all glad harmoniously to apply their whole power to the one object sought by the great Commander. It is the victorious march of the armies of Jesus Christ which we watch as we see this steady development of closer relations between its units, as the ancient nations, once at war with one another, are now engaged in the struggle with antichrist. Or, to adopt the figure and language of Rev. Canon Edmonds, of Exeter, "As we look at the work of missions we are watching the coming down from God, out of heaven, of the city of God." Let there be no trifling at such a supreme moment of history! Report of the Centenary Missionary Conference, London, 1888; Report of the Ecumenical Missionary Conference, New York, 1893; Conference of Foreign Missionary Boards of the United States and Canada, New York, 1893-1895; Report of a Conference of the Foreign Mission Boards of Great Britain, Berlin, 1900.

COMMERCED AND MISSIONS: Commerce is the exchange of goods, commodities or other valuable property between different peoples. It is perfectly proper to give extension to the meaning of the word, so that it shall include the interchange of scientific and ethical and social ideas between nations, since this is an inseparable adjunct of that intercourse whose object is barter and trade. But in this article the relation to missions of commerce in its narrower meaning will be briefly discussed in order to suggest (1) What Missions owe to Commerce, and (2) What Missions have suffered from Commerce, and (3) What Missions have done for Commerce.

(1) Missions owe to commerce the means of transportation and of communication. The earliest missionaries were enabled to reach India and China by the preaching of St. Thomas and the absorption of India by those means of transportation which commerce had already provided. If the London Missionary Society sent its first missionaries to the South Seas in a vessel especially fitted out by the Society, it was still as a commercial venture that a missionary was sent. It may be stated, "the good which was through trade that its expenses were paid. In our own day missionaries use, as they would use the natural productions of the earth, the great steamships, the railroads, the telegraphs and the postal facilities which commerce has provided for its own uses. Merely to suggest these things is to show the greatness of the debt to the enterprise of commerce under which missions must lie much cost to the means of reaching the ends of the earth.

To commerce, again, missions are indebted for security of abode in many lands. Bitterly as the East India Company opposed the entrance of missionaries into the field of its operations, this powerful commercial corporation finally became the protector of missionaries in India during many years. Not only in India, but in China, in Turkey and in Persia, missionaries have owed their safety and their opportunity of access to the people, to those laws and treaties which were designed to secure liberty and security for traders. Missionary enterprises in all of these countries have been carried forward with great freedom because missionaries had a right to claim and to enjoy the same privileges of safe conduct which governments had secured for the merchants of the world.

(2) Nevertheless, commerce has often hampered and sometimes vehemently opposed the beneficent undertakings of missions. There is nothing contrary to any law of God or man in buying a commodity where it is abundant, in order to sell it at a profit where it is scarce and in demand. But no law, human or divine, can justify a commerce which takes advantage of the ignorant and defenseless or selects for its traffic articles that injure, degrade or destroy. The African slave trade was a notable example of such conscienceless commerce which long blocked the progress of missions on the western coast of Africa. Dr. Paton's indignant appeals against the infamies of the liquor traffic in Polynesia, supported by a long series of similar facts from other parts of the world, show how commerce has sometimes set itself to uproot the beginnings of moral training among child-like races who cannot discriminate between the benevolent missionary and the unprincipled trader. One shameful particular of this is; a complaint against commerce may best be set forth in the form of incidents of actual history, which are, unhappily, typical of facts which may be duplicated in many places.

In October, 1825, Rev. W. Richards and family labored alone on Maui, one of the Hawaiian islands. Richards died in the English navy, "Daniel!" Captain Buckle, because the native women did not visit the ship as formerly, complained to the missionary. Mr. Richards tried to reason with them, but they replied with threats of burning his house and butchering his family. The missionary replied to him, "Oh, it cannot undo the work of God.

Next day the captain promised peace on condition that their demands were complied with. He himself kept a native woman on board, for whom he paid $160;
and when, the day after, the sailors came with a black flag, knives and pistols, and, like their predecessors in Sodom, pressed toward the missionary's door, the clubs of indignant natives drove the cowards away. Through night and day a guard was needed to protect the missionary from Christian sailors. Two years later the British commodore clothed, with this same Captain Buckley and several foreign merchants, demanded of King Kaahumanu that Mr. Richards be punished for writing an account of these things to the American Board.

On another occasion Lieutenant John Perceval, of H.M.S. "Dolphin," took ground in Honolulu against the law that indorsed the seventh commandment, and on Sabbath, February 26, sent a detachment to the chief demanding its repeal. They were driven out after they had broken the windows, and only the prompt rally of natives saved the missionary. As certain local traders were UScvn from violence, because an officer of the navy of the United States of America vowed that the law should be repealed.

History is full of wrongs inflicted by civilized traders in the name of commerce upon trustful and ignorant peoples. More than one missionary has been killed because simple islanders thought in that way to punish the traders who had stolen men from the islands of the Pacific in order to place them as laborers in plantations on the other side of the globe. More than one desolate war has been waged in Africa because the brutal voracity of commercial agents was discovered and resented by its victims. Only when men shall carry on commercial enterprises in non-Christian lands with that regard for right and honesty and justice to which they are forced to bow when at home will commerce help, not hinder, the kindly purpose of missions.

(3) As to that which missions have done for commerce, it constitutes a debt as easily overlooked as the debt which missions owe to commerce. The missionary commercial development is first, by becoming intimately acquainted with the people of a backward race, through learning their language and living among them, and second, by cultivating higher tastes and aspirations among them. Missionaries stand between the backward and the civilized, teaching them the fruits of their hands. No sooner has the Gospel entered the heart than those same men wake up to the possibilities of development, and the demand for the supply of new wants at once necessitates the supplies of commerce. This leads them not only to procure decent clothing, but also comfortable dwellings and convenient furniture in place of their unfurnished huts, for good clothing calls for clothes presses. At Hilo have been a corresponding advance in all directions. John Williams found that in the South Seas savages did not care for civilization until the Gospel woke them to a new life. European houses stood for years in Tahiti and no native thought of copying them. Missionaries were civilized clothing, but no Tahitian women felt the need of a dress till the power of a new life led them to desire to dress like Christians.

Sir Bartle Frere, familiar with heathenism both in India and South Africa, says, "Civilization cannot precede Christianity. The only successful way of dealing with all races is to teach them the Gospel."
Sewing-machines abound. Cups and saucers, plates and dishes, lamps, knives and forks, and clocks are in nearly all the houses. The islands furnish a good market for European goods. These material benefits follow, they did not precede, the Gospel. An aged Maunganui said recently: "I think the Gospel all these beautiful clothes in which I stand upright;" but the uprightness of the man was more beautiful than his clothes.

The entire cost of the mission of the ABCFM to Hawaii up to 1899 was $1,315,000. But none can deny the money used in civilizing the islands and opening them to intercourse with the world was well spent on seeing that in 1901 the imports of the Hawaiian Islands from the United States alone were valued at $21,750,000. Similar results of missions may be seen throughout Micronesia and Polynesia, for room has been made for commerce by taming and elevating the people through the Gospel.

Rev. Dr. F. F. Ellwood writes of the relation of missions to commerce:

There are three things that have been found almost universally true:

I. The Gospel has always elevated the character and established the power of our civilization in whatever lands it has been planted. More than this, it has been found that England could scarcely have retained her Indian possessions but for the preventive influence of those who go everywhere with the Gospel, to both counteract injustice while they promoted intelligence and loyalty.

II. The first contacts of commerce are for the most part evil. Whether adventurers precede or follow the missionary, they blight society. Whalers in the South Seas, convicts in Tasmania, slave traders in Congo, kidnappers in Micronesia, opium dealers in China, and liquor sellers among the Indians and in Africa—all have received a curse.

There was a time in San Francisco when the courts were paralyzed, and true-hearted citizens felt driven to send to Hawaii for help to come back and establish a church at home. Even saloon keepers joined in the call, alleging that without Christian institutions no man's life was safe.

III. Improvement generally follows. Christian homes are established, and the missionary is supported instead of oppressed. Dark as Africa now is, civilization there fifty years hence will be full of life and light. But we should hasten to allow equal rights natural to the humblest native; and the Christian missionary might not make right, but weaker nations should receive the same treatment as the strongest. Treaties should not be made merely for the convenience or profit of the great powers of Europe, and commerce should be so regulated by the golden rule of love as to bless and not curse the nations with whom we have to do.

Thus commerce receives lasting benefits from the service of the missionary in changing the motives and elevating the aims of savages through instruction in the Gospel of Christ. Such a case as that of Henry Nanpei, the Christian Chief of Kusuaie, in Micronesia, is a type, with the help which he gave to perplexed German officials by his sane, statesmanlike influence over his people, when the foreigners came to take possession of the land. A case like that of Kekela, the native missionary to the Marquesas, is a type, again, of the help of missions to commerce in another direction. Peruvian "Cookie Pirates" had stolen many of the islanders to carry them into slavery. A chief whose son had been carried off vowed to kill and eat the first white man that fell into his hands. Mr. Whalon, first mate of an American whaler, was that man; and Kekela, a native missionary, went to the angry heathen with a new six-oared boat that he had just received from Boston. Abraham Lincoln heard of it, and sent him a valuable present. Kekela wrote in his reply: "As to this friendly deed of mine, its seed was brought from your own land. You have done people better by elevating their love of God. It was planted in Hawaii, and I brought it here that these dark regions might receive the root of all which is good and true, and that is love. How shall I repay your great kindness? This is my only payment—that which I have received of the Lord—love."

To quote the words of the late Rev. Dr. R. S. Storrs of Brooklyn: "Missions always assist commerce, and commerce, if controlled by Christian principles, will aid missions, but it is a work which goes on with the propagation of the Gospel over all the earth. For commerce and the Gospel are in harmony in this, at least, that the aim of each is cosmic, is earth-embracing. There is no trade so recent or so dormant, no trade to which so long or so degraded as the Gospel does not seek it, or that commerce will not reach out far for access to it. They go together. The home of commerce is on the liquid bands that separate and yet unite and encompass the continents; the horizon of commerce is the rim of the planet and nothing less; and so commerce and Christianity go together. Christianity helping commerce. Not that our missionaries go out for that purpose—they do not barter life for gold. But, wherever their errand is, and wherever their teaching is felt, there the way is opened for a widening commerce. Intensity of conviction carries them where the commercial agent gladly follows, but would not lead."

CONCEPCIÓN: Capital of the province of Concepcion, Chile, S. America. Station of the ME, with (1902) 13 missionaries, men and women, 7 native workers, 7 places of worship, 13 Sunday schools, 1 elementary school, 1 high school, 1 college for girls, 1 orphanage, a Young People's Society, and 417 professing Christians (in the district).

CONCORDIA: A town of the Argentine Republic, S. America, situated on the Uruguay River, in the Argentine Mesopotamia. Population, about 11,500. Station of the ME, with 1 missionary and his wife, 1 native worker, 1 elementary school, and 57 professing Christians.

CONCORDIA MINE: A settlement in the northeastern portion of Cape Colony, S. Africa, situated 7 miles N. E. of the Ookiep railway terminus. Station of the Rhenish Missionary Society, with (1900) 1 missionary and his wife, 5 native workers, 1 school, 1 Sunday school, and 252 baptized Christians.

CONFERENCES ON MISSIONS (Interdenominational): When the revival of missions commenced at the close of the last century, the great effort at home was to find enough of those interested in the work to justify making a beginning, and the great aim abroad was to find a field where missionaries could labor un molested. The whole undertaking was then so novel that those engaged in it had not yet begun to know their ignorance. For to carry on the work of missions with success requires not merely a spirit of obedience to Christ, but some knowledge of the difficulties to be met and the best method of overcoming them, and only an actual advance could indicate the points on which they needed light. The missionaries found, moreover, that the more they advanced, the more questions multiplied. Even success only furnished new problems to be solved, that had not occurred to the pioneers before. For the whole of these, the first, of all, to the Lord Jesus, and then, as in apostolic times, when an unlooked-for emergency arose, "the
apostles and elders were gathered together to con-
sider the matter". (Acts xv. 6), so now in the
constantly recurring inquiries, "How can we
remove this evil and sinfulness?" a group of laborers felt the need of counsel from oth-
ers who encountered similar obstacles. Hence
missionary conferences came into existence nat-
urally and unavoidably. From the first they were
often interdenominational in character, and,
therefore, precious examples of the Comity of
Societies; such missionary conferences consisted of
two classes: 1st, Conferences of the missionary
societies; and 2d, Conferences of missionaries of
the various denominations.

1. Conferences of the Missionary Societies:
The first union missionary conference between British
or American societies was held in the United
States May 4, 1854, the various missionary
societies being moved by the presence of the cele-
brated Dr. Alexander Duff among them to pro-
pose such a convention in order to manifest the
real unity of Christians, increase interest in the
work, and secure more intelligent cooperation in
churches, the field, and society. So 11 missionaries, 18 officers
of missionary societies, and 150 persons in all, met in the chapel of Dr. Alexander's church in
New York, and continued together a day and a
half. They considered the comparative advan-
tages of concentration and diffusion in missionary
work on the field, and came to the conclusion that
the best policy was to equip commanding centers
thoroughly, and then operate from those centers by itinerating in the regions round about.

They expressed their satisfaction also that so
little interference with each other had occurred
among different societies, and recommended an
agreement that as soon as an evangelical society
had occupied any field, it should be left in undis-
turbed possession.

The next interdenominational missionary con-
ference met that same year in London, October
12 and 13, and was somewhat limited in the
range of its discussions, for unfortunately only a
few secretaries of missionary societies were able to
be present.

Next in order came the conference on missions at
Exeter Hall, June 19 to 23, 1856, where twenty-five British societies were represented by
their officers. Two missionaries from America
were present, and nearly one hundred other mem-
bers took part in the proceedings. Two sessions of
three and a half hours each were held daily,
preceded by a meeting for prayer in the morning,
and followed by a soirée in the evening. The
whole ended in a large public meeting in Phil-
harmonic Hall. Two stenographers reported the
discussions, and the whole proceedings were pub-
lished in an octavo of 428 pages; of these the
index alone is 35.

Eighteen years passed away after the confer-
ence at Liverpool before another was held in
England, in the large hall of Mildmay Park, on
the north side of London, October 21 to 26,
1878. The conference at Liverpool represented
only 25 British societies, but this one 37 in all—
26 British, 6 American, and 5 from the continent of
Europe. This one not only dealt more thor-
oughly with particular fields, but also viewed
each in its relations to the whole world, noting
what had been accomplished, and searching to
see what might be brought to pass in the near
future. The case histories of each congrega-
tion were men who had been on the ground, and
could speak from personal observation. The
conference closed with a general meeting in
Exeter Hall, which seemed to gather into a focus
the interest and energy that had been steadily
increasing during the last several years. The Centenary Conference
devoted fifty sessions to a searching scrutiny of
every department of missionary work, and to the
public record of the results. The great object
was to encourage the churches to press forward in
obedience to the last command of Christ by
setting forth the experience of evangelical mis-
sions during one hundred years, and to confer
on those numerous questions which the large
expansion of the work had brought into the fore-
ground. The Conference made no attempt to
legislate for the churches, nor to stir up tempo-
rary excitement, but to encourage the churches
by the spread of information concerning the prin-
ciples of that kingdom and the facts connected
with its progress in the past.

The great number of men and women that the
Centenary Conference drew together from all
parts of the world was a testimony to the advance
that had taken place in the work. In 1860 about
129 met together; in 1878 about 158; and in
1888, 1,576—nearly ten times as many. In 1860
there is not one name of a woman in the entire
list, and in 1878 only two appear, the more than
that number (five) took part in the proceedings;
but in 1888 the names of 429 women appear on
the roll—much more than the entire membership
of previous conferences. In 1860 none were
present from the United States. In 1878 one
attended from the United States and one from
Canada. In 1888, 183 names appear from the
United States and 30 from Canada.

The number of missionary societies represented
in the conference was 139; of these, 57 belonged
to the United States, 9 to Canada, 18 to the con-
tenins of Europe, and 2 to the colonies, leaving
82 to the mission agencies of the Church of
England.

Many topics discussed at previous conferences
were also discussed at this, but with much greater
thoroughness: e. g., Missionary Comity was the
subject of two papers, and a prolonged discussion
filled fifty-nine pages.

The Alliance of Reformed Churches holding
the Presbyterian system at its meeting in Toronto
in 1892, arranged to invite the officers or representa-
tives of the foreign missionary boards of the
United States and Canada to come together for
conference in New York in 1893. Twenty-one
missionary boards and committees, besides the
ABS and the YMCA, sent representatives to the
meeting held in response to this invitation.
While the sessions were not private in any sense
they were attended in the main by secretaries, and
members, and missionaries of the various boards.
The Conference sought a more complete mutual
representation and a more thorough unity of
action along all lines of missionary policy. Its
deliberations were found so full of mutual advan-
tage by the societies participating that a con-
ference has assembled every year since under the
name of the Alliance of Reformed Churches
Foreign Missionary Boards and Societies in
the United States and Canada. A similar conference
between missionary societies in Great Britain and
Ireland has been held in London of late years with very satisfactory results.

On the initiative of the annual Conference of North American Foreign Missionary Boards, the "Ecumenical Missionary Conference" was convened at New York in April, 1900. It met in Carnegie Hall and continued in session during ten days. The late Hon. Benjamin Harrison, ex-President of the United States, presided, and representatives of more than 200 missionary societies were present from Canada and the United States, Great Britain, Germany, France, Switzerland, the Netherlands, Sweden, Norway, Finland, Asia, Africa, and South America. The first day of the assembly the President of the United States and the Governor of the State of New York made addresses of welcome to the Conference, and from the first day to the last public interest in the meetings was unabated. Meetings were held in neighboring churches for such as could not attend in Carnegie Hall, and it is estimated that during the ten days nearly 200,000 persons attended the various sessions.

In greater degree than any of its predecessors the Ecumenical Conference was "a demonstration of the missionary character of Christianity." It is not very accurate to say with certainty that it was more truly a Christian council than one of the many ecclesiastical councils of the past, and at the same time it demonstrated the essential unity of the evangelical churches. This in and its diffusion of the matured fruits of experience among all engaged in the practical work of missions, this conference was epoch-making in its character.

Upon the continent of Europe the practise of holding conferences of the various missionary bodies has been thoroughly tried and its practical value clearly understood. Such conferences exist in Holland and in Scandinavia. A conference of German and German-Swiss missionary societies is held at Bremen once in four years which has had an important influence in fostering uniformity of mission policy and methods. The world would find the societies and their work of a clear mutual understanding on such questions is so well understood that a periodical (Allgemeine Missions Zeitschrift) has been established for the express purpose of discussing mission methods and mission problems.

The Conference of Protestant Missionaries on the field which are interdenominational in character, commenced in a tentative way with the Calcutta Conference of 1855. They are now held at regular intervals in India, China, Japan, Mexico, various parts of Africa and South America, and in Syria. These conferences of workers in the field, dealing with practical problems which confront the missionary enterprise, are of immense value in working toward the establishment of what has been called a Science of Missions, while at the same time they have a strong influence in promoting harmonious relations between the various denominations and in showing to all the practical unity of all the evangelical bodies.

General Conference of the Protestant Missionaries of Japan, Yokohama, 1883; General Conference of the Protestant Foreign Missionaries in China, Shanghai, 1878; Ditto (Conferences held in London and Amsterdam, 1880, 1882, 1883); International Missionary Conference (1893), Shanghai, 1894; Ditto (1898), Shanghai, 1899.

CONFUCIANISM: Confucius was one of a constellation of great names which appeared in the world 500 B.C. to 200 B.C. Of these were his own countryman, Lao-tse; Gautama of India (See Buddhism), Pythagoras of Greece, and, in the opinion of Sir Monier Williams and some others, Zoroaster of Persia. They were all nearly contemporary with the Hebrew prophets, though Josiah, the late prophet, accurately, Confucius, or Kung-futze, was born, according to Chinese records, in the year 551 B.C. Lao-tse, the contemporary, was born fifty years earlier. They both appeared in a degenerate age of Chinese history, and both aimed at what seemed almost hopeless reform. The ancient religion of China, which is still thought to be represented by the Temple of Heaven in Peking, had greatly declined, and a superstitious nature worship, with endless polytheistic manifestations, occupied the minds of the people. The people knew that the emperors, with whom the empire were more or less independent, and were often at war. Princes were corrupt and tyrannical, and their subjects were disheartened, reckless, and debased. Mencius, the commentator of Confucius, says of the times in which his great teacher arose: "The world had fallen into decay, and right principles were disregarded. Ministers murdered their princes and sons their fathers. Confucius was frightened at what he saw, and undertook the work of reform."

These environments and this one great aim will go far to explain the character and teachings of Confucius and the history of his life. It was no part of his purpose to establish a religion, and as such his system cannot be considered. He was a political reformer, and with that end in view he became a teacher of general ethics. The State was the supreme object of his effort, but to secure the highest welfare of the state the family must be considered, and all the minor relations of mankind. It has been common among ancient monarchs and lawgivers to regard the state, or rather its rulers, as of supreme importance, while its subjects, mere slaves, and little regard was had for the family. Confucius was wiser. He looked upon human society as a pyramid, and saw clearly that whatever entered into the lowest foundations concerned the whole structure. Both he and Lao-tse, even in that early age, taught that kings existed for the good of the people, and had no right to employ them merely as the means of furthering their own ambitious designs.

Confucianism emphasizes the worship of parents and ancestors, tho if strict definitions be observed, it might be difficult to draw any very clear distinction between the reverence to be paid to the dead and that which was due to those who were still living. In both cases reverence to parents, extending however many generations back, was supposed to prove a salutary influence in maintaining the perpetuity of the family. The worship of trees, mountains, rivers, and countless other objects is a part of Taoism or of the old nature worship. Both Confucianism and Taoism honor heroes, tho their images are generally found only in the Taoist and the Buddhist temples.
The Life of Confucius: The incidents given of the life of Confucius are simple and have not, as in the case of Lao-tze, been overlaid with absurd legends. The sage was the son of an old man, and was left fatherless at three years of age. At fifteen he evinced remarkable intellectual powers, and at twenty-two he was already instructing a class of disciples in the principles of government. At twenty-four he lost his mother, for whom he held a high regard. The conical tumulus which he raised over her grave is said to have been the pattern from which the circular grave-mounds of North China originated.

The earliest public recognition which Confucius received was his appointment, when he was about thirty years old, to the tutorship of two young princes of the Marquisate of Lu. At the dying request of their father they were taught political economy and the art of government. In accompanying his wards to the capital of the country, Confucius met Lao-tze. He is said to have sought instruction from the old sage, but he very soon found that there could be no agreement between them. Lao-tze was already suffering from keen disappointment which embittered his last days, and which Confucius himself at first shared. Lao-tze rejected Confucius and received the young teacher with critical disdain. He considered him a noisy and pretentious reformer, all of whose roseate theories were yet to be tested. For himself, Lao-tze was too proud and self-sufficient to be a successful leader of men. He was utterly destitute of pragmatism and repelled where he should have striven to win. He was much more of a philosopher than Confucius, but was far less practical. He gloried in reticence, and thought that the zealous remonstrances of his rival against the public vices only advertised them.

On the other hand, Confucius confessed himself puzzled by the character of Lao-tze, and could only compare him to the incomprehensible ways of the dragon.

After two rather unsuccessful attempts as councillor of different provincial rulers, Confucius gave up political life, and devoted himself for fifteen years to teaching. He had been disgusted with the profligacy of those who had employed him, and despaired of the princes of his time. He came short of a practical appreciation of his high standards of either private or political virtue. As a teacher he met better success. He is said to have had not less than three thousand disciples—a fact which reflects great credit not only upon him, but upon the intellectual activity of his generation. Five hundred of these pupils became mandarins, and over seventy are said to have been distinguished scholars.

The last effort of Confucius as privy councillor was with the Marquis of Lu—supposedly his former pupil, he was now fifty-two years old. For a time this prince by steady devotion to his public duties greatly prospered. He was becoming powerful, and to the neighboring princes formidable. The ruler of a rival province or chief city seeing this, sought to break the power of Confucius, and lead him into vice. A band of beautiful young dancing-girls were sent to him as a present, and with the desired effect. He soon became indifferent to the counsels of Confucius, and, giving himself up to pleasure, he crippled his power. The disappointed sage sought other similar engagements, but in vain. Many would gladly have employed him, but he would not follow his high standards.

In the course of that ambition and life he met with constant disappointment, and his political career he considered a failure. But, although not practically a statesman, he was one of the most successful political theorists that the world has known. Probably no other man ever expressed with so much influence and insight the institutions of his country as Confucius. No other has ever influenced so many millions of mankind, and contributed such marvelous stability and perpetuity to the government of a nation.

Confucius cannot be ranked among philosophers, but was a great practical man. He was a philosopher in the fullest sense, and his reasonings are often as profound as they are practical. He was a great moralist, and his sayings are profound moral sayings. He was a great sociologist. He was a great statesman, and his sayings on politics are as profound as his sayings on ethics. He was a great educator, and his sayings on education are as profound as his sayings on politics. He was a great conscience, and his sayings on ethics are as profound as his sayings on education. He was a great jurist, and his sayings on law are as profound as his sayings on ethics. He was a great poet, and his sayings on poetry are as profound as his sayings on law. He was a great historian, and his sayings on history are as profound as his sayings on poetry. He was a great diplomatist, and his sayings on diplomacy are as profound as his sayings on history. He was a great statesman, and his sayings on statesmanship are as profound as his sayings on diplomacy. He was a great jurist, and his sayings on jurisprudence are as profound as his sayings on statesmanship. He was a great poet, and his sayings on literature are as profound as his sayings on jurisprudence. He was a great historian, and his sayings on historiography are as profound as his sayings on literature. He was a great statesman, and his sayings on politics are as profound as his sayings on historiography. He was a great jurist, and his sayings on law are as profound as his sayings on politics. He was a great poet, and his sayings on poetry are as profound as his sayings on law. He was a great sociologist, and his sayings on sociology are as profound as his sayings on politics.
His other works, the Shoo King or "Book of History," the She King or "Book of Odes," were only compilations, with the exception of the "Great Yik King" or "Book of Changes," had existed before his time, and in his revisions or abridgments they suffered at his hands. The Shoo King, especially, he cut down from about 3,000 paragraphs or verses, to less than 400. What may be called his "conscience" in this work he almost entirely eliminated, reserving only those practical teachings which suited his theories of society and the government of the state.

Those remains of the Confucian ethics which are the highly valued by the Chinese are certain collections known as the Lun Yu or "Confucian Analects," the Ta Hee or "Great Learning," and the Chung Yang or "Doctrine of the Mean." The last two of these are supposed to have been edited by Tsze-ær, a grandson of the sage. They claim to reproduce the teachings of Confucius, especially the "Analects."

The monopoly of Chinese wisdom was given to Confucius by a singular circumstance. About 220 B.C. the Emperor Che Hwang-te ordered all books to be burned, with the exception of the Zoon Ti King of Laotze. The execution of the order was very sweeping, but the works of Confucius were afterwards restored piecemeal, some from fragments, some from oral tradition; while the great body of literature from which he had made his compilations was almost entirely lost.

The wisdom of the ages, therefore, was represented almost exclusively by the works of Confucius. Mencius and others added comments, but the foundation was that received from one great sage. Thus Confucianism became a monopoly, and was made canonical by the decrees of emperors and the common consent of the people. The national literature thus settled once for all was embodied in five classics, viz.: the Yi King or "Book of Changes," the She King or "Book of Poetry," the Shoo King or "Book of History," the Le Ke or "Book of Rites," and the Chun-tsew or "Spring and Autumn Annals." These were in whole or in part compiled by Confucius. There are besides what are known as "classic" books, such as "Book of the Learning," the "Doctrine of the Mean," the "Confucian Analects," and the "Works of Mencius." These books have for ages constituted the text-books in Chinese education; they are also the basis of the competitive examination for public office. That so narrow a field of study—only so destitute of science or general history, one which is in every respect so far behind the spirit and movement of the age—should be supposed to supply all knowledge requisite for the intelligent performance of all possible duties of statesmanship and diplomacy, is a marvel. Such a standard cannot be maintained for many generations longer.

When we consider the low and corrupt state in which Confucius found the religion of his country, we are not greatly surprised that he received little support from the fabric with he hoped to rear, and depended on social and political ethics merely. He was not an atheist, nor, in the strictest modern sense, was he an agnostic. According to the conclusions of Martin, Legge, Douglass, and Max Muller, he really believed in a "higher Being," known as "Shangte," or the God of Heaven. He believed also in unseen spirits, and he taught his disciples to "respect the gods." He had, however, no moral sense of duty toward "the gods" or of reverence for the consciousness of any special dependence on them. "Treat them with respect," he said to his disciples, "but keep them at a distance," or rather, as Dr. Martin renders it, "keep out of their way."

The same author speaks of Confucianism as "the leading religion of the empire." Its objects of worship he divides into three classes—the powers of nature, ancestors, and heroes; and he adds: "Originally recognizing the existence of a supreme personal deity, it has degenerated into a pantheistic medley, and renders worship to an impersonal family god the leading forms of visible nature. Besides the concrete universe, separate honors are paid to the sun, moon, and stars, mountains, rivers, and lakes."

The Confucianism recognizes these objects, the system so far overlaps the pantheon of modern Taoism.

The teachings of Confucius must be acknowledged to have embodied many noble precepts. His political ethics were above the average of those practised by the most enlightened nations. The great and recommendable to rulers was not their own gratification or glory, but the good of the people; and no teacher ever insisted more strenuously upon the duty of example. Princes were constantly reminded that public virtue could not be enforced in the face of royal vice and wickedness.

Reciprocity was one of Confucius' favorite expressions for social and political virtue. This, in the broad sense in which he employed the term, was nothing less than a practical application of the Golden Rule. Thus a father in exacting reverence from his son cannot, without being himself worthy of reverence or glory, but the good of the people; and no teacher ever insisted more strenuously upon the duty of example. Princes were constantly reminded that public virtue could not be enforced in the face of royal vice and wickedness.

Loyalty was another broad expression used by the sage. It included all duty, not only to a father or a prince, but to every interest of society. "Let the superior man," he said, "never fail to order his conduct, and let him be respectful to others, and by the observance of propriety; then all within the four seas will be his brethren."

Faithfulness was enjoined, as having, if possible, even a more sacred character than loyalty. "Hold faithfulness and sincerity as first principles," said the sage; "do not see how a man is to get on without faithfulness." He maintained that while the subordinate must in all cases be faithful to his ruler, the latter must be equally faithful to his word and to his assumed character as the father of his people.

In the cultivation of social and political sincerity, Confucius taught that the very first step in the reform of a corrupt state was "The Rectification of Names." No vice or dishonesty should be allowed to take shelter under specious titles. The sign of faith or dishonor or incapacity should be exposed. Everything should be brought to light, and should be stamped accordingly. Men should be rated at their true value.

One great principle, which has doubtless had great influence in China, is known as the "Doctrine of the Mean." Confucianism assumes that many
evils flow from extreme opinions. There is always another side, and the balanced truth generally lies between. Every virtue should be held in poise by some other. For a very early exemplar, a minister of the Great Emperor Shun, was asked what are the nine virtues, replied: "Affability combined with dignity; mildness combined with firmness; bluntness combined with respectfulness; aptness for government combined with reverence; docility combined with boldness; straightforwardness combined with gentleness; docility combined with discrimination; vigor combined with sincerity, and value combined with righteousness."

It is but just to say that while reverence for sovereignty is so strongly enjoined, yet that reverence is coupled with discrimination. No history of any country deals more severely with the memory of unjust rulers than that of China, and in many instances tyrants have been overthrown.

It is perhaps due to the "Doctrine of the Mean" and to the conscious dignity of moderation, that the Chinese Government has often shown so much self-poise amid the exasperations of foreign diplomacy.

But the character and teachings of Confucius are far enough from perfect. It has already been shown that his ideal virtues were distorted to promote his theories of society. Reverence to parents was pushed to such extremes as to destroy that reciprocity which he made a test of highest character. The authority of the parent is not duly balanced by parental consideration, and the worst of tyrannies is often seen in the Chinese home. Practically, there is no such symmetry of the domestic virtues as that found in Paul's Epistles. Confucius was no model in respect to the rights of woman. He gave seven grounds of divorce, on some one of which he divorced his own wife. His code of morals, the above the morality current in his age, was not high. He spoke slightingly of what he called the "small fidelity" which binds a husband to one wife, and he imposed a stricter virtue on the one sex than on the other. Polygamy was to be avoided as a hardship of his code and therefore never a crime. The marital license allowed to the sovereign is of itself sufficient not only to ruin the royal line, but by the influence of high example to promote general immorality among the people.

The Confucius enjoined humility, he did not hesitate late in life to claim perfection. "At fifteen," he said, "my mind was bent on learning. At thirty, I stood firm; at forty, I had no doubts; at fifty I knew the decrees of heaven; at sixty, my ear was an object seen in for the reception of truth; at seventy, I could follow whatever my heart desired without transgressing what was right." Unfortunately his character showed to the least advantage in his old age.

Professor Douglass, in speaking of the later political life of the sage, remarks: "It is impossible to study this portion of Confucius' career without feeling that a great change had come over his conduct. There was no longer that lofty love of truth and of virtue which had distinguished the commencement of his life, and that was the commencement of his life. After the customary stiffness of his back had made him pliable. He who had formerly refused money which he had not earned, was now willing to take pay for no other service than the presentation of courtier-like advice on occasions when Duke Ling desired to have his opinion in support of his own; and in defiance of his oft-repeated denunciation of rebels, he was now ready to go over to the court of a rebel chief in the hope possibly of being permitted "to establish," as he said on another occasion, "an eastern Chow." His friend Tze-ze-loo expostulated with him upon his inconsistency, but he justified himself with a lame excuse.

Confucius evinced great weakness at the last, but by being plain and courtier-like moved more readily for his own good name than for the welfare of his country. When seized by a presentiment of death he said: "The course of my doctrine is run, and I am unknown." "Never does a superior man pass away without leaving a name behind him. But my principles make no progress, and I — how shall I be viewed in future ages?"

The Relation of Confucianism to the Ancient Worship of China: The sage had been peculiarly reticent in regard to a supreme deity and to the future life. "We do not know life," he said; "how can we know death?" Yet when his life-work was done he gathered his books, and, ascending a hill where the worship of Shangte was observed, he laid the books upon the altar, and then kneeling before them he gave thanks that he had been permitted to live to see their completion. There is a difference of opinion as to whether he believed in a supreme being, whom he saw fit to pass in silence for a purpose, or whether he was utterly agnostic. His teachings incline to general skepticism, but whatever may have been his personal view there is scarcely room for a difference on the question of whether a religious faith more or less monotheistic preceded Confucius. The best Chinese scholars agree so far. Real Chinese history can be traced no farther back than the reign of Yaou, 2556 B.C., and there we find clear and distinct traces of a worship of the supreme god Shangte. Yaou shared his throne with Shun, who succeeded him. Both have been looked upon in all succeeding ages as perfect models of sovereigns. Yaou was the King Alfred of China, who by his wise administration united all the warring states into one empire. He encouraged astronomical researches and all useful science. We are told that when he died the virtues of his colleague Shun "were heard on high," and he was therefore appointed to the throne.

One of his first acts after coming to full power was to sacrifice to Shangte, the supreme god. "Thereafter," we are told, "he sacrificed specially, but with the ordinary forms, to Shangte; sacrificed with purity and reverence to the Six Honorable Ones, offered appropriate sacrifices to the hills and rivers, and extended his worship to the hosts of spirits." "This," says R. K. Douglass, Professor of Chinese in King's College, London, "is the first mention we have in Chinese history of religious worship, the expressions "sacrifice" and "worship" there being used with the personal signification, which implies that the worship of Shangte at least had previously existed. It is to this supreme being that all the highest forms of worship have been offered in all ages. By his decrees kings were made and rulers executed judgment. . . . In all probability there was a time when the worship of Shangte was the expression of a pure monotheistic faith of the Chinese. By degrees, however, corruption crept in, and, the Shangte always remained the supreme object of venera-
tion, they saw no disloyalty to him in rendering homage to the powers of nature which they learned to personify, and to the spirits of their dead, to whom they dedicated their "souls," and watch over in a subordinate manner the welfare of their descendants."

Professor Legge of Oxford, in "The Religions of China," has illustrated this distinction by quoting the prayers of an emperor of the Ming dynasty, which were offered in the Temple of Heaven in the year 1538 A.D., in which he first invokes the spirits of the mountains and the hills, and asks their intercession with the supreme God, whose name he proposes slightly to change, that the change may be acceptable to Him. He then proceeds to pray directly to the God of heaven, whom he addresses as the creator and upholder and ruler of all things. These prayers show how, in spite of the teachings of Confucius, the old monotheism which he ignored still survived, and they show also what great truths underlie the worship offered in the Temple of Heaven in Peking.

In his prayer to the spirits he says: "Beforehand we inform you, all ye celestial and all ye terrestrial spirits, and will trouble you in our behalf, to exert your spiritual power and display your wisdom in communicating our poor desire to Shangte, and praying him graciously to grant us his acceptance and regard, and to be pleased with the title which we shall reverently present."

"This prayer shows," says Professor Legge, "how there had grown up around the primitive monotheism of China the recognition and worship of a multitude of celestial and terrestrial spirits, and yet the monotheism remained." How differently does the Emperor proceed when, having thus invoked the intervening spirits, he approaches Shangte directly. He begins: "Of old, in the beginning, there was the great chaos, without form and dark. The five elements had not begun to revolve nor the sun and moon to shine. In the midst thereof there presented itself neither form nor sound. Thou, O spirit of the Second Heaven, camest forth in thy presidency, and first didst divide the greater parts from the purer. Thou madest heaven; thou madest earth; thou madest man; all things got their being with their producing power." After stating the title which he proposes to give to Shangte, he adds: "Thou didst produce, O spirit! the sun and moon and five planets; and pure and beautiful was their light. The vault of heaven was spread out like a curtain, and the square earth supported all on it, and all creatures were happy. I thy servant presume reverently to thank thee." Farther he says: "All living things are indebted to thy goodness, but who knows whence his blessings come to him? It is Thou alone, O Lord, who art the parent of all things."

The temple-worship of Shangte (for real personality is still recognized, tho' the name be changed for Tien, heaven) has always been associated with the Confucian system. There is no evidence that it was ever suspended, even temporarily, after Confucius came; and here, in the prayers of the Ming emperor, two thousand years after his time, we find the old name Shangte reasserted. No more impressive account has been given of this surviving monotheistic worship in Peking than the following from the pen of Dr. Wm. A. P. Martin, D.D.: "Within the gates of the southern division of the capital, and surrounded by a sacred grove so extensive that the silence of its dense shade is broken only by the voice of the busy world, stands the Temple of Heaven. It consists of a single tower, whose tiling of resplendent azure is intended to represent the form and color of the aerial vault. It contains no altar, and the solemn rites are not performed within the tower. But on a marble altar which stands before it a bullock is offered once a year as a burnt-sacrifice, while the master of the empire prostrates himself in adoration of the spirit of the universe. This is the high place of Chinese devotion, and the thoughtful visitor feels that he ought to tread the place with unsanctified feet. For no vulgar idolatry has entered here; this mountain top still stands above the waves of corruption, and on this solitary altar still rests a faint ray of the primeval faith. The tablet which represents the invisible deity is inscribed with the name of Shangte, the supreme Ruler; and as we contemplate the majesty of the empire prostrate before it while the smoke ascends from his burning sacrifice, our thoughts are irresistibly carried back to the time when the King of Salem officiated as 'Priest of the Most High God.'"

Professor Douglass charges Confucius with having promoted the spread of polytheism by attempting to suppress the knowledge of the supreme God. He substituted for Shangte (god), Tien (heaven); and that change has survived. But the people, feeling a need of something less vague, have fallen into the worship of countless other objects, and particularly the worship of ancestors. "But," says the professor, "in spite of the silence of Confucius on the subject of Shangte, his worship has been maintained, not perhaps in its original purity, but with works of reverence which place its object on the highest pinnacle of the Chinese Pantheon. At the present day the imperial worship of Shangte on the round hillock to the south of the city of Peking is surrounded with all the solemnity of which such an occasion is capable."

"There is no need," says Dr. Martin, "for extended argument to establish the fact that the early Chinese were by no means destitute of the knowledge of God. They did not, indeed, know him as the Creator (evidently the prayer of the Ming emperor recognized him as such), but they recognized him as supreme in providence, and without beginning or end. Whence came this conception? Was it the mature result of ages of speculation, or was it brought down from remote antiquity on the stream of patriarchal tradition? The latter, we think, is the only probable hypothesis."

There has been a long and earnest discussion among missionaries as to how far the identity of Shangte with the true God once made known to men may be traced. Certainly if there be a real succession many attributes have been lost and the conception in any Chinese mind is very dim. Yet is there not at least an important reminiscence, and may not the earnest missionary have the same grounds that Paul had for saying, "If any man knoweth ye ignorantly worship, declare I unto you?"

The missionary has to meet in the Confucian that self-centered temper and that inclination to evil which is familiar enough in Christian lands.
Men of the non-Christian races do not escape such irreligion by being without knowledge of Jesus. Indeed, what the missionaries meet among the followers of Confucius is an imperfect code of morals that he must make his ally wherever possible rather than his enemy. Confucianism does not perfectly repel influences from outside. The lesson of the Boxer outbreak of 1900 is that the people of China need a new moral code, one that Christian principles are the ones to give them this energy, making full use, for the purpose, of their knowledge of the maxims and the aims of Confucius.

Congo Free State: The exploration of the Congo by Stanley in 1876-77 opened a new door of entrance into the interior of Africa, and led to contact. They are mostly of the Bang race.

This is an independent state under the sovereignty of Leopold II., of Belgium. It lies between French Congo and the Egyptian Sudan on the north, and Rhodesia and Portuguese W. Africa on the south, reaching from the Atlantic Ocean, which it touches only by its western coast, to the upper Tanganika and German E. Africa on the east. It is drained chiefly by the Congo and its tributaries. Its rich flora, vast forests and fertile soil make it a tropical garden of great agricultural possibilities, while its mineral wealth, mostly unknown, may be also of great importance. A commerce amounting annually to an exchange in imports and exports of about $16,000,000 has already been established (1903).

The lands of the Free State are divided into three classes: First, those in the actual occupation of the natives, who do not recognize private property in the soil, but hold their lands as long as they choose to cultivate them, but have no permanent title to them. The second class is composed of lands now occupied by foreigners, who hold by a government title. All these titles are registered, and there is no difficulty in the sale of the lands. The third class consists of lands as yet unoccupied. These to the extent of 25 acres can be occupied by a foreigner, if he comes to an understanding with the natives about them; but he cannot cut timber or open mines without a concession from the government.

The native population is difficult to estimate, more or less of it being nomadic, and but a small percentage sufficiently established in known localities to make calculation reliable. The estimates vary from fourteen millions to double that number. There are Azandes in the northeast and scattered tribes of pigmies in various sections. The religion is mostly a revolting fetishism, and cannibalism is not uncommon. Scurers and wizards are found everywhere, and exercise a predominant influence over the superstitious natives. Belief in evil spirits is universal and the religious ceremonies for the most part are grotesque and barbarous. Polygamy and slavery are an integral part of the social fabric and of family life. Many parts of the country remain unoccupied, and those that the missionary also visits, while in some of the eastern districts the inhabitants are still terrified by the raids of Arab slave traders. At the same time there appears to be indisputable evidence that a terror of the Belgian officials is depopulating some districts as effectually as in former days the terror of the Arab slave traders.

Protestant missionary enterprises are carried on in the Congo Free State by the ABMU, the BMS, the FCMS, the RBMU, the PS, the PB, and the Swedish Missionary Society. These societies have established stations at 23 different places in the State, and much improved by the

According to official estimates there are 120 Protestant, and 180 Roman Catholic missionaries in the Congo Free State. Of the Roman Catholic missions there are four each under different organizations:

1. The Mission du Saint Esperit, at Banana and Boma. There are 4 priests and 2 lay brethren at these stations, and some small schools which give industrial training to the children.

2. The Belgian Mission: Established in 1888 at Kwa-mouth on the Upper Congo, with a second center projected at Luilaburg on the Lula River, a little west of the Konia, just on the southern boundary line of the Congo Free State.

3. A New Mission at Bangola, on the northern bank of the Upper Congo, about 125 miles above Equatorville. This is under the care of the Jesuits. The Catholic mission at Bemba, Leo XIII., is plying on the Upper Congo.

4. The Mission of the Pères d'Algérie (Algerian priests), on Lake Tanganika, in the southeastern part of the Free State. They have 2 stations, Kibangan on Burton Gulf, and Mpala at the mouth of the Lofruit, both on the lake. They are laboring among the Urus tribe, but do not report much success.

Congo, French. See French Congo.

Constantine: Capital of a department of the same name in Algeria, N. Africa. It was the ancient Cirta, and stands on a detached rocky height, surrounded by ravines crossed by bridges. Its altitude above the sea is 2,105 feet and its population, (1901), 41,139. The overwhelming majority are Mohammedans. It is a station of the North African Mission (1886), with (1900) 6 missionaries, men and women, and a book depot.

Constantinople: Capital of the Turkish Empire, is located at the confluence of the Bosphorus and the Sea of Marmora and stands partly in Europe and partly in Asia. It is the natural center toward which converge the lines of interest, of trade, and population, of Southeastern Europe and Western Asia. Because it is partly in Europe and partly in Asia, it partakes of the character of both continents to such a degree that the name of each is claimed for it. In it. The beauty of its scenery is scarcely more marked than are the characteristics that make it a healthy residence at every season of the year, and a center whose influences make itself felt in every portion of the empire. The value of its location has been much impaired by the restrictions upon trade of absurd custom-house regulations, and that jealousy of purely foreign investments that has characterized the Turkish Government. Produce that was formerly
brought from the ports of the Black Sea and reshipped at the Golden Horn for Europe, now goes direct from Odessa, Varna, Poti and Trebizond.

Topographically the city is divided into three parts: 1. Stamboul, or the city proper, between the Marmora and the Golden Horn, occupying the site of the old city. 2. Galata and Pera, which extends to the Southern boundary of the city, and is occupied by commercial interests. 3. The shores of the Bosphorus, the islands, and Marmora suburbs. The city stands on several hills, so that there is the best of natural drainage. The climate is, in general, mild through the whole year, the winter being tempered by south winds, while in the summer the prevailing winds are from the north. There is usually some snow, but it does not lie long, and there is rarely much ice. In the summer the thermometer very rarely rises above 90°. The chief drawback to residence is the heavy winds, which are hard for delicate throats and lungs to bear. The spring months, April, May and June, are the most favorable for visiting the city.

The buildings were formerly almost entirely frame houses, poorly put together, which burned like tinder when a conflagration was once started. Successive disasters of this kind have resulted in the use of brick and stone in a great degree, though that appears to be brick is really only stucco.

In its political relations Constantinople is the very key to the "Eastern Question," but, aside from this wider international importance, its political influence is a most important element in its national life.

It is the seat of all government for the empire. Every official, from Adrianople to Bagdad, from Trebizond to Tepedelen, feels the influence that binds him to the capital, and this in more ways than the mere reference to responsible chiefs there. The sovereign keeps his eye not narrowly on this, but, the heart of the empire is the heart of the nation, and no one, from the highest to the lowest, can tell when he may be called upon to account for some act that it would be supposed was left entirely to his discretion. Hence if any disturbance occurs among the Armenians, the chief city and half the empire must be set at rest, and at the capital of the empire (vilyet), but at Constantinople. The absolute centralization of the Turkish government in Constantinople is almost more marked than that of Russia in St. Petersburg.

The same thing is true of the various hierarchical influences. The Armenian Patriarch resides in Constantinople is subordinate spiritually to the Catholics at Etchmiadzin (in the Caucasus), but politically he is the head of the Armenian nation, and the supremacy of the Patriarchate is maintained in much the same way as that of the Pope. So with the Greeks and other Christian communities.

So, again, Constantinople as the seat of the foreign embassies is the center for those foreign influences which permeate the empire to a degree almost inconceivable to any one not acquainted with the country.

Thus Constantinople is the center of all interests of the remotest sections of the empire.

The population of Constantinople is variously estimated at from 800,000 to 1,100,000 souls, of which considerably more than half are Mohammedans. The Armenians and Greeks number perhaps 80,000 each, the Jews, 70,000, while the remaining comprise almost every race of Europe and Western Asia, for the thousands who come up from the villages of all Western Asia, spend a few years, and then having amassed a little money, return to their homes. The number of these it is impossible to estimate at all accurately. They make up by far the majority of the laboring class, the porters, boatmen, carpenters, and even the petty tradesmen. In former times each religious sect occupied a distinct quarter of the city. Stamboul had its Mohammedan, Armenian, Greek and Jewish quarters, while the Europeans were found chiefly in Pera in social intercourse (retro), and agency of different creeds was almost unknown. Of later years this has changed in a great degree; districts have encroached on each other until in some cases boundary-lines have been practically obliterated.

The languages are as varied as the races. The official court language is Turkish, Greek, Italian, English and German are almost essential to any one whose business relations are extensive, while the language of diplomacy, and the common language which every educated person of any race or nation is assumed to know, is French. Armenian is used only among Armenians, but, however, all speak Turkish, while many of them write it. Besides these one hears a perfect jargon of sounds—Bulgarian, Russian, Arabic, Persian, Spanish, etc.—as he passes through the streets or stops at a restaurant or cafe.

4. Mission Work: The above statements will readily explain the importance that has always been attached to the occupation of Constantinople as a center for missionary operations. The British and Foreign Bible Society occupied it as a post in social intercourse (retro), and agency and a depot with 17 colporteurs and Bible women. The American Bible Society established an agency there in 1856, and now has an agent and a book depot and 10 colporteurs and Bible women. Both of these societies, together with the mission of the ABCFM, have publications and editorial offices, besides book storage depots and salesrooms in the Constantinople Bible House.

The ABCFM (1831) was the first Society to establish missionaries in the city. It now (1902) has there 17 missionaries, of whom 13 are women, and the city and half the empire, the neighboring districts, 31 native workers, men and women, 13 preaching centers, 6 elementary schools, 1 publishing house and 390 church-members. The American College for Girls is also connected with this Society. Robert College (1869), an offshoot from this mission, is not in any way connected with it, but is under its own Board of Trustees in New York.

Missions to the Jews were the next to be established in Constantinople, beginning with that of the London Society for the Evangelization of the Jews (1835), followed by that of the Free Church of Scotland (1842) and the Established Church of Scotland. These Societies now (1900) have in the city, 11 missionaries, men and women (one a physician), 25 native workers, 3 preaching centers, 2 orphanages, 4 elementary schools, 1 high school and 1 dispensary.

The Kaiserswerth deaconesses also have a station here (1852) with a hospital and a kindergarten school, with 17 deaconesses in charge of these institutions.

Later enterprises are the FCMS (1879) and the Seventh Day Adventists' Mission (1887), which
have both together 10 missionaries, men and women, and in the city and their 27 outstations in different parts of Asia Minor, 4 native workers, 6 preaching centers, 4 elementary schools and 462 professing Christians.

The political relations of the representatives of these various missionary bodies in a center of influence like Constantinople is a phase of missionary life which is found to be of no small difficulty, but of great importance. The missionaries themselves often have cases affecting their rights as citizens which must be carried to the embassy; and there are innumerable instances which draw on the missionaries behalf of people who have been for one cause or another imprisoned or persecuted in every part of the empire. This work requires time, tact, patience, and an intimate knowledge of the country and its people, their laws and customs.

While there is much valuable missionary work done in Constantinople, its chief importance after all is as a strategic point. To withdraw or even weaken the force there would be to court disaster in the whole empire. If Constantinople can be held, the Levant will certainly be evangelized.

A. Constantine, New York, 1880; Grosvener (E. A.), Constantinople, 2 vols., Boston, 1895; Dwight (H. O.), Constantinople and Its Problems, New York, 1901; Fossey (E.), Forty Years in the Turkish Empire, New York, 1875.

CONSTDERINE, Rev. Charles: Born at Littleborough, Lancashire, September 15, 1869. From the time of his conversion at the age of fourteen he manifested the liveliest interest in Christian work, and in 1895 he was appointed by the Free Methodist Church, England, to Newton Abbott, in the Exeter Circuit, as pastor. As his heart was turned to the mission field, he soon offered his services to the Missionary Committee for East Africa, and, altho just before he sailed, the news reached him of the death of one with whom he hoped to be associated in his African work, which put new emphasis upon the malarial climate of British East Africa, he was heard to exclaim: "I am ready for a service of sacrifice." He first settled at Ribe, near Mombasa, British East Africa; but soon after he was in Peking, 1897, he became the colleague of Mr. Ormerod at Golbanti, farther inland, and it was there that he spent the remainder of his days. Soon after reaching the foreign field he impressed his associates by his intense zeal and enthusiasm; and his warm affection for the people among whom he lived and labored gained for him a remarkable influence with all classes. His self-forgetfulness led him to sacrifice himself, and, altho he was repeatedly urged to return to England for the restoration of his health, he would answer: "No, no! I have thought sometimes that I must return, but not now!" On Thursday, January 23, 1902, a second attack of fever, followed by other and worse symptoms, brought his consecrated service to an end, and on the following Sunday evening he peacefully passed out of the shadows into the light.

CONVA: A town in the western part of the island of Trinidad, W. I. Station of the PCC (1874), with (1900) 1 missionary and his wife, 1 missionary woman, 17 native workers, men and women, 2 preaching centers, 20 Sunday schools, 11 elementary schools and 100 church members.

CONVERTS IN MISSION FIELDS: The grace of God will do in India, in China, and in Africa, and unto the uttermost parts of the earth, what His grace will do in the United States.

In all mission fields large numbers of converts to Christianity prove their sincerity by their readiness to follow the light at any cost to themselves; and their stability is proved by the strong front which they oppose to temptations and per- turbations, and only right leadership is needed to keep the "Count of Constantinople" in Spiritual affairs. In this article reference is made to instances in China, both as familiar to the writer and as particularly typical of the world-wide field.

In heathen countries the sincerity of a convert is subjected to severe testing at the outset. The demands of a Christian life bring the convert at once into antagonism with the social customs of his people. If he meets the demands he becomes a peculiar member of the family and of the community, and separation follows.

Separation, ridicule and ostracism are difficult to bear anywhere, possibly nowhere more difficult than in China. Nevertheless, all this the Chinese converts bear cheerfully; not only so, but they often, by their zeal, invite attention to the fact that they are Christians.

The writer once had under his supervision a newly organized church in China, which had met with much opposition from the community in which it was located. The chapels of Chinese Christians usually have, over the door, signs announcing that they are places of worship. The members of this church were advised to omit the sign and to proceed cautiously, seeking to quietly win over the community. Returning to the locality some months after our former visit, I found over the door of the little meeting place the usual sign, in large Chinese characters, "The Church of Jesus." The members said that they were acting within their legal rights in organizing the church and they wished to announce their place of worship for the help of all.

In countries where the Sabbath has not been known the sincerity of the native Christian is tested by the demand for Christian observance. It is a struggle for life in these crowded Oriental sections. The Christian is expected to work seven days a week with men who work seven days a week. All do not meet the test equally, but the church in mission fields affords numerous illustrations of loyalty to conviction and sincerity of purpose. Mr. Sun, a venerable man, was a cloth seller with a stand on the street in Canton. He became interested in the Bible, read it, pondered it, conversed about it with Christians, and was converted. His stand was well known, his patrons numerous. As a Christian he decided he must close his stand on Sunday. His patrons knew nothing about Sunday, and, finding why and when then when they came to make purchases that the stand was closed and the proprietor absent, began to transfer their patronage to others. This was a testing time for Mr. Sun, for a large family depended upon him. But he was loyal to his conviction, and held true until death, influence being a power for good in the Peking community.

There are young men, trained in our mission colleges in Western science, mathematics and English, who are entering the Christian ministry and Christian educational work, at salaries not more than one fifth of the salaried employment. The writer knows of a young man who graduated from college and
was accepted by the Imperial Maritime Customs, and was to be assigned to a position that would have paved the way for a successful financial career. He wished to enter the customs service in order to help his father in the support of a large family. After accepting the position he said to himself, "The conflict between desire and conviction, and the following morning reported that he must abandon his intention of a mercantile life, and give himself wholly to the work of the Church in saving others. To-day he is one of the most useful men in China. Every young graduate from mission colleges are manifesting the sincerity of their profession by turning aside from fine worldly positions to take up a life of toil, with small pay, for Christ's sake.

**Stability.** There may be sincerity of purpose, and yet purpose may fail under unusual strain. The report of 1900 in North China was calculated to test to the utmost the stability of the converts.

Hundreds died in the persecution who, by burning incense and bowing the knee to idols, might have saved their lives. In the London Missionary Society's Field Book, a missionary called upon by the Boxers to recant. He refused. He was carried into an open lot, a hole was dug of a depth so that when he was dropped into it his head was below the level of the surface. The loose earth was filled in up to his knees and he was crouched down. Up to the waist; he refused. Up to the chin as he stood erect, and again he was called upon to recant and save his life. Once more he refused and the loose earth was filled up over his head, burying him and the Boxers.

A student, a young man twenty-one years of age, a senior in college, was caught by the Boxers and called upon to recant. He told them he could not. They discussed his case and agreed to compromise—to let him recant by proxy, one of a classmate. The student was called upon by the Boxers to recant. He refused. He was carried into an open lot, a hole was dug of a depth so that when he was dropped into it his head was below the level of the surface. The loose earth was filled in up to his knees and he was crouched down. Up to the waist; he refused. Up to the chin as he stood erect, and again he was called upon to recant and save his life. Once more he refused and the loose earth was filled up over his head, burying him and the Boxers.

A student, a young man twenty-one years of age, a senior in college, was caught by the Boxers and called upon to recant. He told them he could not. They discussed his case and agreed to compromise—to let him recant by proxy, one of a classmate. The student was called upon by the Boxers to recant. He refused. He was carried into an open lot, a hole was dug of a depth so that when he was dropped into it his head was below the level of the surface. The loose earth was filled in up to his knees and he was crouched down. Up to the waist; he refused. Up to the chin as he stood erect, and again he was called upon to recant and save his life. Once more he refused and the loose earth was filled up over his head, burying him and the Boxers.

One young man, a preacher, whose father, mother, sister and brother were massacred by the Boxers, when asked by the magistrate what he wanted by way of indemnity, replied that he asked only that he might have the privilege of preaching the Gospel to those who had put his family to death. One of the leading British merchants of Tientsin, in a letter to the Peking office of the *Times*, a secular paper published in Tientsin, called attention, shortly after the siege of Peking, to the fidelity and stability of the native Christians, which, he said, had come as a revelation to himself and to many of his friends of the business world.

**Activity.** Converts on the mission field are earnestly active in attendance on public worship and in the performance of outward duties pertaining to their personal salvation, as they conceive it, while at the same time they are slow to apprehend their personal responsibility for the saving of their fellow-countrymen. This was the case with a certain preacher who spoke in a Methodist class meeting and announced that he had thought of visiting a distant village to tell the Gospel story to relatives there whom he had not seen since his conversion; "but," he added, "they will be so busy, all the time that I am there, trying to get money out of me that they will have no ears for the Gospel. Since they are so busy, I will save money and send it, and I will not visit them." Yet this man steadily preached the Gospel, and lived a life so exemplary that he was the trusted partner of the missionaries, and he finally gave his life for the Gospel's sake and now rests in a martyr's grave.

The Boxers put the clergy, teachers, Bible workers and colporteurs; and special work in the schools and in connection with evangelistic meetings, is developing an ever-widening and deepening sense of personal responsibility; and, year by year, an ever-increasing number of men and women are taking arduous paths, enduring hardship and persecution cheerfully, and exercising strong faith and offering prevailing prayers in behalf of their countrymen. Converts from Hawaii are the evangelists of Micronesia; converted Samoans have a noble record as pioneers in work for the salvation of Melanesia; Fiji Christians are now devoting their lives to the evangelization of New Guinea; a converted Muslim from Turkey has been laboring among Mohammedans in Chinese Turkestan.

And the church members are more and more taking active parts in the work of soul-saving. They bring to the work a direct faith that is honored in inspiring results—as, for instance, when a group of church members united in prayer for the salvation of a girl sold into a haunt of vice and contaminated by five years' contact with the life there. Not knowing what to do, they prayed. They got the girl away from her vile keepers, and then did not know what to do with her; they prayed. A prodigal young man, recently converted, said, "Let us begin the pure life together." They worked hard and from thenceforth went in and out among the church members, honored and happy. They were to the membership a revelation of the possibilities of faith, and their presence was, therefore, a blessing to the church, and those who had prayed in such perplexity spoke with bated breath, and math and reverently, as if feeling the Master near.

The Student Federation of the Young Men's Christian Association is enlarging the horizon of young men on mission fields and the ringing call of their motto, 'The Evangelization of the World in this Generation,' is awakening many young converts to splendid service.

In Peking the Christian young men have assumed responsibility for the street chapels, where they render effective service by their fervid testimony. They have also given themselves ungrudgingly to the distribution of Christian literature at the great examinations held in Peking, one of which, the Triennial Examination, calls together from ten to fifteen thousand students from all parts of the empire. This work calls for fortitude and forbearance and the efforts are not always well received. The Chinese have shown aggressiveness in mercantile life and in stretching out to adjoining lands. We find them in Japan, the Philippines, the Straits Settlements, and in many other lands, and there is every reason to believe that when the Gospel is more widely diffused and has become more the dominant force in their lives, they will be equally strong in spiritual matters. They are essentially the dom-
inart race of the East, and as goes China so goes the great Eastern world.

These leaders are not yet producing men who are capable of independent leadership. The leaders must come from among those who are born to the perspective and wide horizon, the traditions and teachings of Christian lands.

Such leaders, with faith to hope all things and believe all things concerning the character and possibilities of the converts on mission fields, will find comrades there, talented and possessed of a singularly direct faith, quick to apprehend, apt at suggestion, skilful in affairs, who will follow anywhere, dare any danger, bear any hardship, stand true before the persecutor, and all sincere, steadfast and active in the service of the Great Captain to the last.

COOK ISLANDS. See HERVEY ISLANDS.

COOKE, Miss M. A.: In 1820 Miss Cooke was sent to India by the British and Foreign School Society, at the request of a local educational body at Calcutta, with a view of starting a school for Hindu girls. Female education had already been successfully begun at Serampur by Mrs. Marshman of the Baptist Mission; and Miss Cooke was invited to join an attempt in the East India Company's territory. After a few months the local body found itself without funds to continue, and Miss Cooke was transferred to the CMS. While she was still studying Bengali, and wondering in what way she might presently begin to work, an incident occurred which gave her an unlooked for opening. On January 25, 1822, Miss Cooke visited one of the boys' schools in order to observe the pronunciation of the language. Because of her presence a number of the natives gathered round the school door; and in the crowd was a little girl, whom the native teacher drove away, telling Miss Cooke that the child had for three months been disturbing them by begging to be allowed to learn to read with the boys. Miss Cooke immediately determined to return next day and begin to teach her as well as the other children. The second day she went again, accompanied by an Englishwoman who spoke the Bengali well; and they found fifteen girls assembled, with their mothers. This was the beginning of a work that has produced great results; and when Miss Cooke sent her first report to England, she could tell of fifteen schools and nearly four hundred girls in attendance. Miss Cooke suggested that girls' schools throughout England should be invited to contribute specially to this work; and the Calcutta Committee opened a special fund which speedily reached 3,000 rupees. After this, Miss Cooke was married to Rev. Isaac Wilson of the CMS, but she continued her labours zealously both during her married life and long after she became a widow in 1828. In 1824 a Ladies' Female Education Society was founded at Calcutta which, with the assistance of grants of £300 from the CMS, had established a Central School, with Mrs. Wilson at the head of it. In 1836 she was released from this Central School; and she was enabled to carry out the desire of her heart by establishing a female orphanage at Agarpara. In 1842 she herself united with the Phoenix Female Brotherhood, but she transferred her institution to the Society under which she had worked, and Agarpara became a CMS station. In the Missionary Register (1838), the Bishop wrote these words of Mrs. Wilson: "She is carrying on the greatest undertaking yet witnessed in India."

COOPER, Rev. David James: Born at Belfast, Ireland, in 1873; died at Fez, Morocco, October 17, 1902. After a short mercantile career, he was led to devote his life to missions; and in November, 1896, he was sent by the NAM to Tripoli, in Barbary, where he pursued his Arabic studies, and worked successfully in a medical mission. The lamentable death of Mr. R. W. Wilson, of Fez, in the spring of 1899, made it necessary to find some one to take up the work; and it was evident that a man was needed who would combine sympathy, tact, good sense, and marked spirituality. Mr. Cooper was chosen for the work, and went to Morocco in the spring of 1900. He spent a short time at Tiznit; in the autumn of the same year he entered upon his work at Fez. The work was interesting, but for various reasons by no means easy. Mr. Cooper, by God's grace, succeeded beyond the expectations of his best friends; and not only did the work grow in solidity and strength, but some new Muslim converts were numbered among the Christians. Notwithstanding the fact that the country was rather disturbed on account of native dissatisfaction with the Sultan's pro-conservative measures. On October 17 he went on the streets with two of the colporteurs, and while he was standing near the principal mosque, a Mohammedan fanatic shot him in the back. Altho the best of medical care was given him, he died within two hours after the fatal shot was fired. Within less than an hour after the death of Mr. Cooper, by order of the Sultan, his murderer was put to death; and the Sultan, after expressing his abhorrence of the crime, granted Mrs. Cooper £1,000 as an expression of his sympathy in her bereavement.

COORG: A small native state in Southern India, lying chiefly among the mountains of the Western Ghats. The name is derived from that of a fine, hardy race of mountaineers who once dominated the region, and whose descendants still form a noticeable element in the population. The dimensions of the territory are about 60 miles north and south, and 40 east and west. The population is 178,302, composed chiefly of Hindus. There are only about 27,000 left of the original tribes of the Coorogs. Mohammedans contribute only seven per cent. of the total. The chief town is Merkara, with a population of between eight and nine thousand. The Basel Evangelical Missionary Society has a mission in Coorg. The family of native chiefs who once ruled Coorg was deposed by the supreme government of India in 1834, and has since become extinct. The territory is directly under the supervision of the viceroy, and is administered by the British Resident at Mysore, who is also chief commissioner of Coorg.

COPAY: A station of the CMS in the Jaffna district of Ceylon, with (1901) 2 missionary women, native workers and a training school for teachers. The statistics are included under Jaffna.

COPIAPO: Capital of the Department of Atacama, Chile, situated on the Copiapó River, 50
miles from its seaport of Caldera, and at an altitude of 1,300 feet. It is the center of a mining district and has extensive silver refiners. The population (1900) is 9,301. Station of the FN (1870) with (1901) 1 missionary and his wife, 3 native workers, 1 chapel, 6 Sunday schools, 2 common schools, 4 chief outstations and 300 professing Christians.

COPTIC CHURCH: The relic of a once powerful and progressive Egyptian Christianity, dating from the 1st century. According to its traditions St. Mark was its founder and first Patriarch. Its ritual appears to be a close reproduction of early Christian originals. Its doctrine is of the Jacobite class, defending the Monophysite heresy, and its relations to all other Christian bodies have been bitterly explosive.

The Coptic Church was a missionary and aggressive body up to the 4th century, carrying its missions into Abyssinia and beyond, almost to the equator. It is now sunk in ignorance, altho beginning to give some small signs of intellectual awakening through the influence upon the common people of American (U. P.) and English missionaries. Several priests and one bishop of this Church were educated in the CMS seminary, formerly conducted at Cairo.

The dioceses consist of monks, deacons, priests, arch-priests, bishops and metropolitan; the whole hierarchy being under the direction of the Coptic Patriarch of Alexandria. The Patriarch has the right to appoint the metropolitan of Abyssinia, and even the privilege of issuing the religious authorization when occasion falls for the coronation of a king of Abyssinia.

The prelates of the Church as well as the monks are required to observe celibacy, but on the other hand marriage is an absolute condition precedent to ordination of a priest.

COPTIC LANGUAGE: Belongs to the Hamitic family of languages. It was once the vernacular tongue of Egypt, but it was superseded by the Greek, more especially by the Arabic, and is now a merely literary language cultivated by Biblical scholars and by few of the Coptic priests.

There are three principal dialects in Coptic, viz., the Memphitic, Sahidic and Bashmuric. The Memphitic, found in the neighborhood of Memphis, is the least pure of the three; the Sahidic or Thebaisic, found in Upper Egypt, is more purely Egyptian and the Bashmuric, found in the Delta, differs from the others chiefly by certain changes in the vowels and in some of the consonants. The Coptic alphabet is a slightly modified form of the Greek.

COPTS: A people of Egypt, numbering about 600,000 and supposed to be a survival from the Egyptians of the Pharaohs. The name Copt is a religious rather than an ethnic term. Since it is applied to Christians only, while the Moham medan Fellahin of Egypt are of the same stock and race.

The Copts are, however, far more intelligent and enterprising than their kinsmen who did not accept Christianity. Nevertheless when compared with other Oriental Christians, as Greeks and Armenians, or with Jews, they are seen to lack initiative. Wherever found the Copts are gentle and submissive to control; in lower Egypt and Tripoli they are clerks and traders, shrewd business men and able when under guidance. In upper Egypt they are more frequently industrious agriculturists.

American (UP) and English (CMS) Missions have done much toward stimulating the Copts into a new intellectual growth; and now the Copts have about 1,000 elementary schools which they seek to conduct somewhat upon Western principles. In these schools they now make it a point to teach the ancient Coptic language. About one-half of the males in the Coptic community can read and write. See also Coptic Church.

Lane (E. W.), An Account of the Modern Egyptians, 2 vols., London, 1871; Poole (S. Lane), Cairo, London, 1897; Fowler (M.), Christian Egypt, London, 1900.

COQUIMBO: A seaport town in the Department of the same name, Chile, S. America; situated on Coquimbo Bay, about 200 miles N. of Valparaiso. Population about 9,000. Station of the ME, with (1902) 2 native workers, 2 Sunday schools, and 69 professing Christians.

COREA. See KOREA.

CORDOVA: Capital of the province of Cordova, Argentina, S. America; situated near the center of the republic. It was formerly the ecclesiastical metropolis of South America. It has still somewhat of that character, having an important university and only very few of the city being in which the clergy and their nearest adherents reside. It is also an important commercial and railway center. Its population (1901) is about 50,000. Station of the SAEM, with 1 missionary and his wife and of the PE, with 2 missionaries and their wives. Name also written Cordoba.

COROZAL: A town in British Honduras, situated 62 miles N. of Belize. Population 5,000. Station of the WMS, with (1901) 1 missionary, 7 native workers, 5 preaching centers, 1 Sunday school, 1 common school and 45 professing Christians.

COSTA RICA: A republic of Central America. Area, 22,000 square miles. Population, 243,205, chiefly mestizos, negroes and Indians. Language, Spanish. Religion, Roman Catholic. The capital is San José, in a beautiful valley in the central part of Costa Rica. Punta Arenas is the seaport of San José, situated on the Gulf of Nicoya, and the principal port of entry on the Pacific coast. The main range of the Andes, entering Costa Rica from the southeast, traverses its entire territory, widening toward the northwest, and forming a table land, on which are situated the principal towns and centers of population. The rivers of Costa Rica, although numerous, are of considerable size, the San Juan, which serves as a boundary between it and Nicaragua, being the only one navigable for steamers. It has no lakes of any great importance, but numerous small ones at the foot of the mountain ranges. Costa Rica lies in a volcanic belt and is therefore subject to frequent earthquakes. The soil is very productive, and, though less rich in minerals than some of the neighboring countries, it contains some rich gold-mines. The climate is mild and delightful in the uplands, hot on the plains, but everywhere healthful, except along the lagoons on the western coast.

Costa Rica has been a republic since 1821, and is governed under a constitution promulgated in 1859, but modified frequently since that date. Commerce is carried on with the United King-
dom, the United States and Germany. The exports are chiefly bananas, coffee and hides.

The BFBS has a Bible depot and an agent at San José and the Central America Mission Society has an agency at Tampico, and the American Baptist Missionary Society and the West Indies Wesleyan Annual Conference have stations at Port Limon and Cartago.

COTTA. See KOTTA.

COTTAYAM. See KOTTAYAM.

COVENANTERS; Missions of the. See PRESBYTERIAN, REFORMED.

COWICHAN: A town on the eastern coast of Vancouver Island, British Columbia, situated on the Cowichan River. Population, about 1,500. Station of the MCC (1900), with 1 missionary and his wife, 1 Sunday school and 1 place of worship.

CRADOCK: Capital of a district in Cape Colony, S. Africa, situated on the railway, 56 miles S. E. of Middelburg, and at an altitude of 2,850 feet. Population, about 5,000. Circuit of the South Africa Wesleyan Methodist Missionary Society, with native wandering chapels, 12 outstations, 1 Sunday school, 1 elementary school, and 163 professing Christians.

CREE LANGUAGE: Belongs to the central group of the N. American family of languages. It is spoken by some 40,000 Indians found to the S. and W. of Hudson Bay. It is written with Roman letters and syllabic characters.

CREEK LANGUAGE: Belongs to the central group of the N. American family of languages. It is spoken by the Creek and Seminole Indians in the Indian Territory, and is written with Roman letters.

CREEKTON: A town in Southern Nigeria, W. Africa, situated on the Cross River 70 miles above its mouth. Climate, tropical. The population is composed mainly of the Ibo and Ewe tribes of negroes. Station of the UFS (1846), with (1902) 10 missionaries, men and women (one a physician), 5 native workers, 5 outstations, 5 schools, a hospital, dispensary, and 303 church-members.

CREIGHTON-GINSBURG, Rev. J. B.: When a young man, and with several of his confreres, he saved up money to go to London in order to learn more about a Jewish sect—Protestant Christians, who they heard rejected the Talmud and strictly adhered to the Bible. This project was prevented. For the next five years he continued preparing for the office of a rabbi. After his father's death he wandered about from city to city, conversing with learned Jews, in hopes of finding peace. On returning home, his prejudice against the Talmud and his appreciation of the Bible became known, and so, to avoid discussion, he went into a Jewish house of learning, and for six weeks, he relates, "I never went to bed, never sat down, never uttered one word after the manner of the Pharisees. The only meals I partook were bread and water once a day, just to maintain strength; and the little sleep I enjoyed was standing, leaning on the desk with my head on my clenched fists; my time was employed in reading the Talmud and the Psalms, setting my heart to seek the Lord." This retirement satisfied the Jews, but his soul was not at rest. In the course of a long period of struggle, he got to know Dr. Biesenthal and Mr. Schwartz, both Hebrew Christian missionaries, who instructed him in the truth and gave him a New Testament in Hebrew, and a copy of "Old Paths." Other missionaries of the London Society for the Jews opened his eyes still further, but Mr. Goldberg was the final means of his being brought to the truth. After ten months' instruction, on May 16, 1847, he was baptized. In 1856 he became one of the Society's missionaries, laboring for thirty years at Mulhausen, Constantine, Algiers and Mogador. He finally was stationed at Constantinople, where for fourteen years, until his death in 1898, he worked most faithfully, having won many Jews to know Christ as Savior.

The only missionary work is that done by the colporteurs of the British and Foreign Bible Society. This work has increased during the last few years, with some evidences of encouragement.

CROATIAN LANGUAGE: Belongs to the Slavonic branch of the Aryan language family, and, like the Servian, is spoken throughout Servia, Bosnia, Herzegovina, Montenegro, Croatia, Slavonia, Dalmatia, etc. The difference between the Servian and Croatian is largely in the written character, the Croats writing their language with Roman letters.

CROATS: To the Servian branch of the Slav race belong also the Croats, who inhabit Dalmatia, Slavonia, Croatia, and the western part of Bosnia, numbering hardly a million and a half of souls. The linguistic differences between the Servians and the Croats are insignificant; their chief distinction lies in their religious confession and in their alphabets. The Servians belong to the Eastern or Orthodox branch of the Christian Church, while the Croats are almost all Roman Catholics, and use the Latin alphabet in their literature. This distinction has led to a great deal of coolness and even hatred between the two peoples.

The Croats appeared on the Balkan Peninsula almost simultaneously with the Servians, and, like them, they received Christianity first from Rome, and then, in the second half of the ninth century, from Byzantium; but, unlike the Servians, they soon fell under the dominion of the Roman Church. Politically, the Croats remained independent till 1102 A.D., when they united themselves to Hungary and shared in the vicissitudes of Hungarian history. This union was a free and spontaneous union on the part of the Croats, and the Hungarian kings were styled kings of Croatia, Dalmatia, and Slavonia. The Croatians had a constitution of their own, and the country was ruled over by royal commissioners or bans. But in the present century the claims of the Hungarians to dominion over the Croats led to dissensions between the two nationalities, and to the bloody conflicts in 1848-50, since when the relations between them have been strained. The Dalmatian Croats, especially in the little republic of Ragusa, attained in the latter part of the 15th, the 16th, and 17th centuries a great literary development. A number of writers, especially poets, flourished in Ragusa,
who were educated and trained under the influence of the Italian Renaissance, and who produced some very important poetical works. (2) Missionaries continued to be active among the Croats, and in 1839, a member of the American Board of Innovation, born in Ragusa, was the archeologist, Banduri, the mathematicians Boschovitch, Ghetaldit, etc.

Aside from the work of the Bible societies in distributing the Scriptures, no regular missionary work had been opened among the Croats.

CROWSTAND: A station of the Presbyterian Church in Canada, situated in 1877 and situated on Swan River in the N. E. part of Assiniboia, Canada. It has 1 missionary, 3 women missionaries, a chapel, a school, and 30 church-members.

CREOLE: Name applied to people born in or near the West Indies of foreign, and especially of Spanish or French, ancestry. When applied to negroes the term means that they are born in the country, as distinguished from those imported from Africa. The European Creoles are generally tall but not proportionally robust. They are distinguished for the suppleness of their joints, which enables them to move with ease, agility, and grace. From the same cause they excel in penmanship, and in everything requiring flexibility of the body. The women are generally beautiful, and of fine figure. The Creole negroes present a marked distinction from those imported from Africa, being more slender, agile, and graceful, tho not less strong or capable of labor, with quicker perceptions and more volatile dispositions. The dialects which have sprung up in the W. I. and adjacent regions, formed by the corruption of Spanish, French, and English, are generally called Creole dialects.

CRETE, or CANDIA: An island in the Mediterranean Sea, belonging to Turkey. It is very irregular in form, about 160 miles long, and varying in breadth from 6 to 35 miles, with a total area of 3,326 square miles. Its population is (1900) 303,543. The predominating religion is that of the Greek Church (Orthodox). About ten per cent. of the population are Mohammedans and there are a few Jews in the island. The language is Greek (modern). The EPBS has an agent on the island, but there are no other Protestant missions there. Until the year 1899 Crete was a province of the Turkish Empire. At that date four European powers intervened to end a continuous state of insurrection and made the island an autonomous state under a high commissioner of the powers, altho nominally still subject to the suzerainty of the Sultan.

CRIM-TURKISH: A dialect of the Nogai Turkish language spoken by the Tartars of the Crimea. See Turkish.

CRITICISM OF MISSIONS: See Objections to the Missionary Enterprise.

CROWTHINTER, Samuel Adjai: A native of the Yoruba Country; rescued from slavery in boyhood, was taken to the Hudson's Bay Company, of a Portuguese slaver to Sierra Leone he begged a half-penny to buy an alphabet card for himself; within six months he could read the New Testament; and after five years he was admitted the first on the roll of students of Fourah Bay College, of which a few months later he was a tutor. June 29, 1864, he was consecrated Missionary Bishop of the Niger Territory by the Archbishop of Canterbury, in Canterbury Cathedral; and in the same year the University of Oxford conferred on him the degree of Doctor of Divinity. He was the first native bishop; and in 1841 he accompanied the first party from the Royal Geographical Society, in 1880, awarded him a gold watch for his travels and researches on the Niger. With the assistance of Rev. T. King, he translated part of the Bible and Book of Common Prayer into Yoruba; and his Yoruba Vocabulary and work on the Nupe and Ibo languages also earned him a real and substantial reputation. He was eminently successful as a missionary; and, as one of his associates points out, in dealing with the masses of the people, with heathen chiefs and with the astute followers of Mohammed, his directness and transparent simplicity of purpose won their confidence and conciliated their blind bigotry of opposition. Even more marked than his tact and wisdom was Bishop Crowther's humility. His lowliness of mind seemed to increase with his exaltation in office and in the esteem of the Christian world. He died at Lagos, December 31st, 1891.

CUBA: The largest island of the West Indies, formerly ruled by Spain; is now under its own government. It contains an area of 45,372 square miles; a coast line of 2,000 miles; and has a population (1899) of about 1,575,000, of whom 500,000 are negroes and 15,000 are Chinese. The island is principally inhabited by the same British Catholic influences; not 50,000 of the population attend school; and only twenty-four per cent. of the adults have formed legitimate marriages. Previous to the American occupation Dr. Alberto J. Diaz, a converted Romanist, labored successfully under the auspices of the Southern Baptist Home Mission Board, amidst great difficulties; and during the last four years, in the new atmosphere of religious freedom, encouraging work has been maintained by a number of societies. The following societies are now engaged in missionary labors in the island: American Baptist Home Mission Society; American Bible Society; American Church Missionary Society; American Friends' Board of Foreign Missions; African Methodist Episcopal Society; Independent Baptist Missionary Movement; Methodist Episcopal Church (South) Board; Foreign Missions of the Presbyterian Church in the United States (Southern); Foreign Christian Missionary Society.

CUDALLORE: Capital of the district of South Arcot, Madras, India, situated on the sea coast, 65 miles N. of Negapatanam. Climate, moderate and healthy. Population (1901) 52,216, chiefly Hindu. A station of the Danish-Halle Mission was opened here in 1728, but was afterwards given up. The town is now occupied as a station by the SPG (1823), with (1901) 18 native workers, men and women, 6 places of worship, 13 outstations, 5 day schools, 2 boarding schools and 325 baptized Christians. Station also of the Leipzig Missionary Society (1856), with (1900) 1 missionary and his wife, 8 native workers, 3 outstations, 5 chapels, 2 elementary schools, 2 high schools and 413 baptized Christians.

CUDDAPAH: Capital of the district of the same name, situated about 120 miles by rail from Madras city. Population (1891) 17,400, of whom 9,400 are Hindus and 7,700 are Mohammedans. The climate is one of the hottest in the district, unhealthy, malarious; mean tempera-
ture in summer 97° F. The town is badly built and squalid in appearance. Station of the LMS (1824), with (1901) Jamulamaduggu included 10 missionaries, men and women, 160 native workers, men and women, and 160 mission type schools and 1,182 church-members.

CULBERTSON, Michael Simpson: Born Chambersburg, Pa., January 18th, 1819; graduated at the Military Academy, West Point, 1839, standing high in character and scholarship; was Assistant Professor of Mathematics in the Academy 1839-40; served 1840-41, with the rank of lieutenant, during the Canada border disturbances. Resigning his commission in the army, he entered the Theological Seminary at Princeton, N. J., graduating in 1843. He was regarded by Dr. Hodge as “among the foremost members of the institution.” He sailed for China in 1844 as a missionary, and in 1852 of the Presbyterian Board was stationed at Ningpo 1845-51, and at Shanghai, 1851-62. He visited the United States for his health in 1856. Dr. Culbertson’s main work for several years was in connection with the translation of the Scriptures into Chinese. During his stay in this country he published a work entitled: Darkness in the Flowery Kingdom; or, Religious Notions and Superstitions in North China. He died of cholera at Shanghai, 1862.

CULEBRA: A town near Colon on the Isthmus of Panama, Station of the Jamaica Baptist Missionary Union (1900), with 1 missionary, 2 preaching centers and 2 Sunday schools.

CUMBERLAND PRESBYTERIAN Board of Missions and Church Extension: As early as 1818 the Cumberland Presbyterian Church sent evangelists among the Chinkassaw Indians, which resulted in a mission being established among them in 1820. In 1845 a board was organized for carrying on the Home Missionary work of the Church and in 1852 a similar organization was formed for the foreign work.

In 1857 the Rev. Edmund Weir was sent to Liberia, where he remained for ten years. Work in Turkey was undertaken in 1860, and the Rev. J. C. Armstrong was sent to Constantinople, but owing to troubles at home arising from the civil war, he was recalled.

In 1873 work was commenced on the island of Trinidad, and was continued for several years. The Board now carries on work as follows: 1. China: There is one station, Chan-te-fu, in the province of Hunan. Medical work has recently been begun in connection with this mission. There are 5 American missionaries.
2. Japan: There are 5 stations, Osaka, Wakahama, Tsu Ise, Tanabe and Shingu. There are 13 American missionaries, of whom 2 are physicians.
3. Mexico: There is 1 station, Aguascalientes, and 4 American missionaries. The mission gives increased promise of permanency. The 3 schools are doing well and an industrial department has been added to the boys’ school.

The Woman’s Board of Missions of the Cumberland Presbyterian Church was organized in 1880 for the purpose of cooperating with the general Board. Nine American missionaries are supported by it in Japan, 1 in China and 2 in Mexico. They are principally engaged in school work.

CUMBUM: A town in the Carnul district, Madras, South India. Population (1891) 5,700, of whom 3,000 are Hindus and 2,300 Mohamedans. The place is noteworthy for an irrigation reservoir of 15 square miles area, built as a precaution against famine. The place is very unhealthy, the inhabitants expect an early death, and the water is low in this reservoir. Station of the ABMU (1882), with (1901) 2 missionaries and their wives, 75 native workers, men and women, 30 places of regular preaching, 31 Sunday schools, 30 common schools, 2 boarding schools and 3,002 church-members.

CUNNINGHAM: A town in the Transkei region, Cape Colony, S. Africa, situated about 15 miles S. W. of Butterworth. Station of the UFS (1856), with (1902) 1 missionary and his wife, 45 native workers, men and women, 16 outstations, 16 schools and 1,546 church-members.

CUPANG: Capital of the western, Dutch part of the island of Timor, East Indies. The Netherlands Missionary Society maintained a station here from 1819 to 1858, and gathered in 860 baptized converts. After the work was passed over to the Dutch Government the number of Christians increased to 2,700; but, as Warneck has said, they seem to lack sufficient oversight and to be on a rather low moral and religious level.

CUTBICA: Capital of the state of Paraná, Brazil, S. America; situated in a pleasant open plain, where Europeans have settled, many of them French. A railway connects it with the seaport of Paraguay, about 80 miles distant. Population about 6,000. Station of the BN (1856), with (1901) 1 missionary and his wife, 2 missionary women, 7 native workers, of whom 6 are women, 1 common and 1 high school and 1 Young People’s Society.

CUTCH. See KATCHEE.

CUTCHI LANGUAGE: This is a dialect of the Sindi; belongs to the Indic branch of the Aryan family of languages, and is spoken in the district of Cutch, W. India.

CUTTACK: Capital of the district of Cuttack, Orissa division, Bengal, India; situated in the delta of the Mahansai River at the head of its canal system. Population (1901) 51,364, of whom 75 per cent. are Hindus. Station of the BMS (1822), with 9 missionaries, men and women, 19 native workers, 6 outstations, 16 common schools, 1 English school, 1 high school, 16 mission seminaries, 2 orphanages, a printing-house and 1,037 communicants. Also station of the Baptist Zenana Missionary Society (1891), with 4 missionary women, 11 native women workers, 6 schools and 100 Zenana pupils.

CUZCO: Capital of the Department of Cuzco, Peru, and secondly the capital of the empire of the Incas; situated at an altitude of 11,380 feet, 350 miles S. E. of Callao. Station of the RBMU (1897), with (1902) 2 missionaries and their wives.

CWENWENI: A settlement in the Transkei district, Cape Colony, S. Africa, situated about 15 miles S. W. of Umtata. Station of the South Africa Wesleyan Methodist Missionary Society, with (1900) 19 native workers, 8 outstations, 5 preaching centers, 3 schools, 4 Sunday schools and 290 professing Christians.

CYPRUS: An island, the third largest in the Mediterranean, 60 miles from the coast of Asia Minor and 41 miles from the coast of Syria. It is almost 140 miles long and 56 miles broad, with an area of 3,584 square miles. The greater part
of the island is mountainous, a range 7,000 feet high running the whole length of the island.

Cyprus was placed under British control by a special treaty in 1878, although it is still nominally Turkish territory. It is open to missionary operations because of the perfect security and religious liberty which British rule produces.

The population of the island (1901) is 237,022. Of these, 182,739 are members of the Greek (Orthodox) Church and 51,309 are Mohammedans. There are also a few Armenians and some Syrians of the Maronite Church. The prevailing language is Greek, but Turkish is much used in business and knowledge of English is increasing.

Mission work is carried on in Cyprus by the RP (U.S.A.), which has stationed at Larnaca a missionary and his wife and 1 native worker. A dispensary and primary school are conducted and 22 hundred native workers have been used in the mission church. The BFBS has a Bible depot at Larnaca.

CZECHS. See Bohemians.

DACCA: A town in Bengal, India, situated on the "old Ganges," 150 miles northeast of Calcutta. Formerly capital of Bengal, and a most populous and brilliant city. It now retains none of its former elegance. Population (1891), 90,542, of whom about half are Hindus and a little more than half Mohammedans. Station of the BMS (1810), with (1900) 3 missionaries and their wives, 10 native workers, 3 outstations, 2 schools, and 74 church-members. Station also of the Baptist Zenana Mission (1870), with 3 missionary women, 8 native women helpers, 8 elementary schools and 50 Zenana pupils.

DAGEHESTAN: Name applied to that part of Caucasus lying on the eastern slope of the Caucasus toward the Caspian Sea. Parts of the country are very mountainous, with deep valleys, numerous lakes, streams and glaciers. Western Daghestan is the chief abode of the Lashghians, a powerful tribe, chiefly Mohammedans. Further north live Tatar tribes, all of whom Mohammedans, more or less nomadic, living principally by the raising of cattle and horses. Most of them are peaceable Russian subjects. The few large towns, among them Derbent, the capital, are situated on the Caspian coast. There is no direct missionary work among them. The British and Foreign Bible Society has published the Gospel of Matthew in Kumuki.

DAHANA: A station of the Rhenish Missionary Society (1873) on the eastern coast of Nias, an island near the west coast of Sumatra, East Indies. It was partly on account of Mohammedan intrigues among the pagans of the place that the Dahana station was established. It now has (1900) 1 missionary and his wife, 3 native workers, 2 schools and 302 professing Christians.

DAHOMEY: Formerly an independent negro kingdom, now a colony of France, situated on the Gulf of Guinea, between Togoland on the west and Lagos and Nigeria on the east. In 1900 the boundaries were extended on the north to join the French military territories in the Western Sudan. It comprises about 60,000 square miles and has a population roughly estimated at 1,000,000, mostly negroes of the Ewe family. The climate is very unhealthy, the soil remarkably fertile. Kotonu, the best harbor on the coast, has been chosen as the terminus of a railway now being constructed to open up the interior. The chief coast town is Whydah, formerly a slave port, now exporting great quantities of palm oil. Abome, the capital, is 65 miles inland, and connected with Whydah by a road which continues to the Mahi country, 30 miles farther north. The religion of the natives is mostly the lowest grade of fetishism, and wholesale human sacrifices have been one of its characteristics.

The WMS has a station at Porto Novo, under charge of a French missionary and his wife, with some 20 outstations, at whose places of worship the average attendance is 2,200. The total of professing Christians is about 350 (1902).

DAKA: Settlement in Rhodesia, S. Central Africa, lying N. W. of Bulawayo. Station of the National Baptist Convention (1900), with 1 missionary and 20 professing Christians.

DAKHANI LANGUAGE: This language belongs to the Indic branch of the Aryan family, being a dialect of the Hindu. It is used by the Mohammedans of Madras, is written in Arabic characters, and is sometimes called Southern Hindustani. It is spoken chiefly in bravery from the Urdu or Northern Hindustani.

DAKURA: A settlement in the northern part of the Mosquito coast, Nicaragua, Central America. Station of the Moravian Missions (1893), with 1 missionary and his wife, 16 native workers, men and women; 1 school, 1 Sunday school, 1 chapel and 107 professing Christians.

DALHOUISIE: A sanitary hill station for the Punjab established in a portion of the Gurdaaspur district which is detached and lies within the native state of Chamba, on the borders of Kashmir. The station lies at an altitude of 7,700 feet and has a population of about 2,000. The CEZ has a sanitarium here, with 1 missionary woman in charge.

DALMATIA: One of the provinces of the Austrian Empire; it occupies a narrow strip along the eastern shore of the Adriatic, between Croatia on the north and Albania on the south. Herzegovina and Montenegro bound it on the east. With its adjacent islands it is the most southern crown-land of the Austrian Empire. Area, 4,940 square miles. The coast is steep and rocky, but numerous bays afford good harbors and ports. Spurs from the Dinaric Alps cross the interior, reaching an elevation of 6,000 feet in Mount
The population is (1891) 11,800, of whom 9,000 are Hindus. Station of the FCMS (1894), with 11 missionaries, men and women (one of them medical); 12 native workers, men and women; 2 dispensaries, a hospital, 1 elementary school, 1 industrial school, a Young People's Society and 60 professing Christians.

**DANG-SENG:** A town in the Fo-kien province of China, lying about 50 miles south of Fu-chau. Station of the CEZ (1893), with (1901) 2 missionary women, 3 native women helpers and 2 boarding schools.

**Danish Missions:** To King Frederic IV. of Denmark belongs the honor of having initiated foreign missions in the Buddhist, or Reformed, Church. As Crown Prince he manifested much interest in the condition of the colonies, which since 1620 had been part of the Danish Kingdom, and when he came to the throne, with the cordial assistance of the court chaplain, Dr. Lütken, he arranged to send Bartholomew Schwartz, and Henrik Plutschau to India, where they founded, in 1705, the "Danish-Tamil," or "Danish Halle," Mission in Tranquebar. Until the death of Christian Frederick Schwartz, in 1798, this mission continued to receive partial support from the Danish Government, men of material being furnished by the SPCK. The Royal College of Missions, founded in Copenhagen in 1714, did good work both for the Tamil Mission, that of Hans Egede in Greenland, and Von Westens Finmark Mission; but the Rationalist influences, however, were strong and after the death of Schwartz interest declined. The English gained control of Hindustan, the missionaries received their support from the SPG, and in 1847 the church buildings and remaining interests were handed over to the British Missionary Society.

Meanwhile much work was done by Danish missionaries in the service of foreign societies, most of them among the Moravians. Ten were sent to Surinam, fourteen to Tranquebar, eleven to Labrador, of whom two had in Greenland; seven to Danish East Indies, nine to English West Indies, one to North America, three to South Africa, one to the Mosquito coast, one to Australia. Altogether 53 Danish missionaries have been in the Moravian missions, among them the General Missionary John Haven.

In 1843 the "Northern Schleswig Mission" was founded to help the Moravians in the Danish West Indies, alto later Southern Jylland was separated from Denmark. This Society still has its branches in Jylland, from which it received donations as late as 1888.

**Danish Missionary Society (Danske Missionselskab):** Headquarters, Fredericia, Denmark. It is a general society of all the Danish Church people, and is conducted by a committee. Its own particular work is among the Tamils in India, but it works harmoniously with other missions. Its own missionaries are all ordained, and those who have been on mission ground for three years direct the affairs of the Society on the mission field. A yearly report must be sent to the home committee in Denmark. This Society is the Fins list Danish Mission, the Danish Malay Mission, New Danish Tamil Mission, and Northern Santal Mission. It has also assisted the Lovethal Mission.

The mission movement in the beginning of the 19th century reached Denmark also, and inspired Peter R. Ronne to found the "Danish Mission Society." June 17, 1821. Its motto
was, "Do not fearful; only believe" (Mark 5:15). The Society seemed to him a necessity, for the Mission College was not kind, and the strength of the free workers was very great. In 1823, on a journey to Fyen, Ronne had asked many of the priests to hang up boxes in the parsonage for free gifts to the mission. Bishop Flundt indeed gave in his own box, but with his continued support was rebuked. The ministers had to take down their boxes, and Ronne was thankful for such slight punishment. The Danish Mission Society began to help the Greenland Mission by books, letters, and donations, but the acts of the Mission College became more oppressive. They denied the mission in many ways, and would not allow the missionaries to write to any one else but the college about their work.

The Society supported for a little while from 1827 J. W. Cappelen, a Norwegian, in the Basel Mission. He returned, and founded, and left with it help to P. P. Jæger and Andreas Riis, were sent out from Basel, and in 1832 arrived at Ussu, near Christiansborg, in what was then a Danish possession and is now the British Gold Coast Colony in W. Africa. Jæger soon died, but Riis worked for 13 years, at first at Akra and later at Akpong, and for four years the only missionary at this station. After the sale of the Danish possessions in Africa to England the work of the Society was somewhat feeble. Later, attempts were made to continue the work in Smyrna, Turkey, but without great success.

In June, 1860, at a meeting held in Nyburg, it was decided that the Danish Society should become the leader in all mission work in Denmark, and that Unions should be formed, and that the bishops issue a call to the missionaries to interest themselves in the matter. Two years later a mission school was founded. In 1863 a delegate was sent from Germany to inquire if the Society would take the independent mission at Bethanien in South India, which Missionary Ochs had founded. The missionaries of the Bethanien Society on account of a difference between himself and the missionaries on the question of caste. Ochs was at that time in Europe, and came to Denmark, when the Danish Missionary Society promised to help him in India with gifts and work.

This was the beginning of the New Danish Tamil Mission. In 1864 a large number of Danish missionary friends interested themselves in other mission work. A Greek-Danish Missionary Society was founded by Victor Bloch in 1865, with a plan to unite with the Greek (Orthodox) Church, and with this do a work among the Mohammedans, but the Danish Missionary Society would not consider it. In 1867 Pastor Bloch went to Athens, and the next year the mission was given up. In 1872 the first scholar of the Danish Missionary Society, Loventhal and H. Jensen, went to Vellur in India. They worked together till 1874, when Jensen went into the Danish Missionary Society's service, Loventhal carrying on an independent mission.

On the 21st of May, 1872, Hans Egede, a minister of Vaagen, sailed for Greenland from Copenhagen. His interest in that country had been aroused by the report of the degradation of the people, brought by a brother-in-law, and he had for several years tried to arouse the Danish Church to do something. At last, with the help of 18,000 kroners subscribed by friends and 600 kroners of his own money, he started, accompanied by his wife and four children and a company of colonists. The enterprise met with great difficulties. It took him three years to acquire the language; the inhospitable climate was a heavy strain on his health; the support granted by King Frederick IV. was denied by Christian VI., the afterward partially restored; an epidemic of small-pox swept through the community, leaving only three families out of 200; his wife died and the brave man was compelled to return to Denmark. Through his influence the king founded a seminary for the education of teachers and missionaries, and Egede was appointed superintend-ent. In 1874 he was made Missionary, and the director for all the work in Greenland, but was greatly distressed at the lack of care in choosing missionaries, resulting in injury to the work. The lack of concord between Egede and the Missionary College increasing, he retired to his own country in 1879.

A New Missionary Society: After the cast difficulties with the Leipzig Society, Missionary Ochs visited Denmark, and made an agreement with the Danish Missionary Society for aid in the New Danish Tamil Mission. He then went to Pattamaram, and founded stations at Bethanien and Siloam, with a mission house and a school building, which was turned into a church. About 1882 they purchased some school property of the Baptists at Tiruvanamalai, and a few years later extended their work into Arcot, Ranipet and Salsette. There were (1887) 7 stations, 12 out-stations, 20 missionaries, 18 native workers, 277 communicants, and 178 pupils in schools. For five years a mission was conducted among the Malays of India, at Assamur and neighboring villages, and another among the Red Karens at Pobja, Burma, but both were given up. A mission has more recently been established in Manchuria (1896), and the reports in 1900 showed 4 stations, 1 outstation, 13 missionaries, 2 native workers, 26 communicants and 12 pupils in the schools. Special attention seems to be paid to medical missionary work, as there were 4 hospitals and dispensaries, with 1,000 patients.

The Danish Missionary Society also renders assistance to the organization known as the Indian Home Mission to the Santals.

Loventhal's Mission: Founded 1872 by Loventhal and J. W. Cappelen (see above). The committee has nine members (all men of the Grundvigs belief), with three head directors. The foundation of the Society is Baptism, its motto "Be born again," and it is a mission to the common people. The directors simply raise money, and do not give advice or instructions to the missionaries, who work independently. Loventhal and Jensen went out to India in 1872, and founded a station at Vellur. Loventhal's desire is to have converts retain their manners and customs as much as possible. He has no schools, and travels from place to place. He has 8 Hindu assistants, ordained by Jensen in 1880. His prin-
principal aim is to baptize the natives, whom he accepts if they seem honest in their desire to believe as the missionaries do. But one station, the missionaries and 3 native workers were reported in 1902.

The Utakamund Danish Evangelistic Mission: Known also as the Emilies Minde (memorial), or Koefoed's Mission, is a small organization for voluntary work in Madras, India. The missionaries are two natives.

DIAPOLI: A town in the Ratnagiri district, Bombay, India; situated a few miles from the sea and about 70 miles S. W. of Poona. Population a little over 5,000. It is one of the healthiest places in the Bombay Presidency. Station of the SPG (1878), with (1901) 1 missionary, 2 missionary women, 20 native workers, men and women; 1 place of worship, 2 boarding schools and 20 baptized adult Christians.

DARAPURAM. See Dharapuram.

DARBHANGAH: Chief town of the district of the same name in Bengal, India; situated about 56 miles N. E. of Patna. Population (1901), 66,244. It was originally a purely Mohammedan city, but the Hindus now outnumber the Moham- medans, almost four to one. Station of the Zenana Bible and Medical Missionary Society, with (1903) 2 women missionaries, 3 native workers and 1 school. Also a circuit of the ME, with (1902) 4 native workers, 2 Sunday schools and 240 professing Christians.

DAR ES SALAAM: A seaport town of German East Africa, lying about 40 miles S. of the island of Zanzibar. Population, about 13,800, Arabs, Indians and Bantu negroes. The town gives access to the interior of the province by well-made roads, and a concession has been issued for a railway which is expected ultimately to be extended to the southern end of the Victoria Nyanza. Station of the Berlin Mission to East Africa (1887), with (1900) 2 missionaries (one with his wife), 1 native worker, 1 chapel, 1 school and 12 professing Christians.

DARFUR. See Sudan.

DARJILING: A town in the district of the same name, Bengal, India, 360 miles from Calcutta by rail. It is a hill station (7,000 feet) and sanitarium, which is very popular. Population (1901), 14,114, of whom 8,600 are Hindus and 3,700 Buddhists. It is a place of many languages, Nepali and the Bhutia here meeting the Bengali and Hindi. The climate is good, but the rainfall is somewhat excessive. Station of the Church of Scotland Foreign Missions (1870), with 40 outstations, 5 missionaries, men and women; 73 native workers, men and women; 14 Sunday schools, 58 common schools, a dispensary and 306 professing Christians. Also station of the Church of Scotland Woman's Missionary Society (1856), with 4 missionary women, 9 native women helpers, 2 elementary schools, 1 high school, 1 industrial school and 38 Zenana pupils.

DARING, David: Born 1790; sent by London Missionary Society to the South Seas in 1816. Stationed at Eimeo and Tahiti, making various missionary tours from Bunamania. In 1834 he went to Marquesas to commence a mission on the largest of those islands, the Hiva Oa. He assisted in translating the Scriptures into the Marquesan language. Returning from a visit to England, 1852, he made his home in Tahiti till 1859, when he retired from active service and settled at Sydney, where he died December 6, 1867.

DARSI: A town in the Kistna district, Madras, India, situated about 25 miles N. W. of Ongole. Station of the ABMU (1894), but not occupied (1901), the work there being under care of the missionaries residing at Ongole and the statistics being summed with those of Ongole. The native Christian communicants at Darsi and its dependencies number about 3,250.

DASKA: A town in the district of Sialkot, Punjab, India, situated about 50 miles N. of Lahore. Population somewhat over 5,000. Station of the Church of Scotland Foreign Missions (1857), with (1900) 44 outstations, 1 missionary and his wife, 24 native workers, 1 chapel, 20 elementary schools, 1 high school, 1 theological seminary and 133 professing Christians.

DATAGANJ: Town in the Rohilkhand district of the United Provinces, situated about 20 miles S. W. of Budaun. Station of the ME, with (1901) 14 native workers, 16 Sunday schools, 2 common schools, a Young People's Society and 580 professing Christians.

DAVAO: A town and seaport on the island of Mindanao, P. L., situated on Davao Bay in the eastern part of the island and at the foot of the volcano of Apo. Station of the ABCFM (1902), with 1 missionary and his wife.

DAVID, CHRISTIAN: Born in Moravia early in the 18th century, his father a Bohemian, his mother a German. He was a zealous Roman Catholic, but was converted to the Moravian views early in life and became a leader in the great Moravian emigration to Count Zinzendorf's estates. Of this, Zinzendorf writes: "Christian David was so intent on the Moravian emigra- tion, that, when he was engaged in wainscoting the saloon of my house at Berthelsdorf in 1723, and had about finished his work, he left his tools, and set off, without hat, on a journey of nearly 200 miles, to Moravia, to lead back emigrants. He made eleven or twelve journeys in all, and, the often in the most imminent danger from the officers of justice who rode in search of him, he was pursued by or protected from them in the most wonderful manner." The removal to Berthelsdorf began in 1722 with ten persons, and within seven years 300 others had joined the little company and built the town called Herrnhut. In 1733 Christian David accompanied the first Moravian missionaries to Greenland. After various journeys in the service of the church and another voyage to Greenland, he in 1748 accompanied the great mission- ary colony to Pennsylvania. In August, 1749, after revisiting Greenland, he made another visit to America, and assisted in building the chapel-house at Nazareth, Penn. He died at Herrnhut, 1750.

DAY, SAMUEL STEARNS: Born Ontario, Canada, May 13, 1808; graduated Hamilton Literary and Theological Institute; sailed as a missionary of the ABMU to India, September 20, 1835. He was stationed first at Vizagapatam, then at Chicoole, and in 1837 at Madras. In Madras he spent three years preaching in Telugu and Eng- lish, and in 1840 organized an English church, of which he was the pastor. Having made several tours into the Telugu country, he fixed upon Nellore as the most suitable place for a mission, and in
1840 removed thither with his family. Mr. Day was the founder of the Telugu Mission. Amid many discouragements and obstacles he continued work, and in 1860 he returned to India, and in 1865 he secured the appointment of a European missionary to the Telugu people. Mr. Day died peacefully in his 81st year, after a period of illness, on September 17, 1871.

**DAYAK LANGUAGE**: This language is found in the island of Borneo in two main dialects and belongs to the family of the Malayan family. Missionaries of the Rhenish Missionary Society reduced the language to writing, using Roman letters, and have done some literary work in it. In German works on Borneo the name is spelled Dajak.

**DEACONESSES**: 1. History: Almost from the day of the birth of the Christian Church there was a two-fold ministry—the Ministry of the Word (διακόνος του λόγου), instituted by Christ Himself for the preaching of the Gospel and the administration of the sacraments (Matt. xxviii: 19, 20; Mark xvi: 15; John xx: 21), and the Ministry of Mercy (διακονίας ἐκ ἑαυτοῦ) or the Diaconate (Acts 6:1-6). But, as a matter of fact, the direct outgrowth of the former was the Diaccons. At first the apostles, like their Divine Master, combined both ministries in their own activity. But when the number of the disciples was multiplied, and the Grecians in the congregation at Jerusalem began to murmur against the Hebrews, because their widows were neglected in the daily ministration, the apostles, in order to secure such a systematic administration of the alms as their own growing duties of another kind made impossible, called the multitude of the disciples unto them and said: "It is not right that we should leave the word of God, and serve tables. Wherefore, brethren, look ye out among you seven men of honest report, full of the Holy Ghost and wisdom, whom we may appoint over this business. But we will give ourselves continually to prayer and to the ministry of the word." The apostles assigned to them this new office, and chose seven men having the required qualifications, set them before the apostles, and these, "when they had prayed, laid their hands on them," i.e., ordained them to this newly-created office in the Church.

To this ministry was committed the care of the poor and sick, under the supervision of the ministry of the Word. The Stephen preached (Acts vii: 8-10; vii: 1-53), and Philip both preached and baptized (Acts viii: 3, 38), the deacons were not primarily meant to be evangelists, but dispensers of charity and the more immediate overseers of the Church's temporal affairs. Thus they became the most direct and efficient "helps" of the ministry of the Word; and how beneficial this arrangement proved is evident from the further statement that the "word of God increased; and the number of disciples multiplied in Jerusalem greatly.”

To this ministry of mercy women were also admitted at a very early date. The necessity for this evidently made itself felt almost at once, inasmuch as the strict seclusion of the female members of the Church made it impossible for women to feed the spiritual wants of the women and children of the converts. The fact that the deaconesses were called "sisters of the new covenant" (Acts xx: 35), the fact that they were custodians of the eucharistic elements, and the fact that they were the "sisters of the congregation of men" (Dean Stanley). That women deacons were already found in the Apostolic Church is manifest from Rom. xvi: 1, 2. In this passage Paul speaks of one Phebe, "our sister, which is a servant (Gr. διακόνος) of the church which is at Cenchreae." He indicates the character of her service as caring for the poor and distribution of alms, and charges that she had been a succourer of many, and of himself also. For this very reason he commends her to the Christians at Rome, to whom she probably transmitted his letter, and admonishes them to "receive her in the Lord, as becometh saints," and to assist her in whatever business she had need of them. If, furthermore, the passage 1 Tim. iii: 11 refers, not to wives of the deacons, but to women deacons, as many able commentators contend, then the evidence is still more conclusive that the Female Diacconate was an established office in the Christian Church long before the close of the 1st century.

The office seems to have spread with the growth of the Church. At the beginning of the 2d century we find an undoubted reference to deaconesses in Asia Minor in the well-known letter of Pliny the Younger, Governor of Bithynia, to the Emperor Trajan. He writes: "In order to get at the truth of the matter (i.e., concerning the life and customs of the Christians) I deemed it necessary to put to the rack two maids, who are called ministrae. But, beyond a most corrupt and boundless superstition, I could extort nothing from them."

The Female Diacconate reached its highest development in the 4th century, and in the Church of the East. At this time the reference to it is frequent, and many women of noble birth were found in its ranks. Very complete information regarding it is contained in that body of ecclesiastical writings known as the "Apostolic Constitutions." This document enjoins that faithful and holy women be set apart as deaconesses, because the Church had need of them for many things; directs that they shall be induced into their office by the bishop, with prayer and the imposition of hands, in the presence of the presbyters, deacons and deaconesses; and even prescribes the prayer to be used at the service of consecration. It also defines the duties of the deaconesses. They were to instruct the catechumens, give the necessary external assistance at their baptism, visit and relieve the sick, the afflicted and the distressed of their own sex, minister to the confessors in prison, prepare the bodies of women for burial, serve as doorkeepers at the women's entrances to the churches, assign women their places at worship, facilitate communication between the bishop or presbyter and the female members of his congregation, and in general engage in all those helpful services from which heathen sentiment excluded the deacons.

After the 4th century the Female Diacconate began to decline. The causes of this are to be sought partly in changed conditions, but chiefly in the growing belief that God could be better served in a quiet, ascetic life than by a life of activity devoted to the good of others, and the consequent growth of monastic orders. The convent now became the retreat for pious unmarried women; and, by the 9th century in the Church of the West, and the 13th in the Church of the East, the Female Diacconate had practically disappeared. Only among the Albigenses and Waldenses, before the Reformation, and in some Mennonite congregations of Germany and Holland after the Reformation were traces of it left until its revival in the
first half of the last century by the Rev. Theodore Fliedner, at Kaiserswerth-on-the-Rhine.

Fliedner became pastor of the small Protestant congregation at Kaiserswerth in 1822. On a collecting tour through England and belief of his poverty-stricken church he became acquainted with numerous institutions of Christian mercy. These awakened in him the desire to undertake similar work himself. He began by making regular pastoral visits to the prisoners in the penitentiary at Düsseldorf. In 1826 he founded the Rhinisch-Westphalian Deaconess Society, the first of the kind on the Continent. In September, 1833, the little summer house of the parsonage garden temporarily sheltered the first discharged female convict, and became the cradle of the Kaiserswerth institutions. Three years later he inaugurated the work with which his name will always be associated. Among the Mennonites of Holland he had found deaconesses. Others before him (Kloenne, von Stein, Amalia Sieveking and von der Recke-Volmarstein) had advocated the restoration of the ancient and had found a practical way of doing so. He himself had become persuaded that no one was by nature and grace so well fitted for the work of ministering love as a devout Christian woman, and to his mind the solution of the problem lay in establishing institutions for the special training of unmarried women in the various branches of charitable work, and in associating these in a close community. Accordingly, in the spring of 1836, with no money but with a large measure of faith, he bought the largest and finest house in Kaiserswerth, organized the Rhinisch-Westphalian Deaconess Society, and on the 14th October of the same year opened the Kaiserswerth Deaconess Motherhouse. Eight days later, Gertrude Reichardt, the daughter of a physician, became the first probationer. Now began a marvelous development. The number of sisters multiplied rapidly; one institution after the other was added at Kaiserswerth; outside "stations!" were undertaken; Motherhouses were established at other places, and when Fliedner died in 1864 there were already 31 Motherhouses, with a total of 1,593 sisters engaged in 406 stations, the Kaiserswerth Motherhouse alone having 426 sisters working in four continents, or stations. In 1861 the Motherhouses organized on the Kaiserswerth model formed a Union or General Conference, which meets every three years at Kaiserswerth. In 1901 the number of houses belonging to the Union was 75, with 14,501 sisters in active service, and an annual income and outlay of $3,375,000. Forty-eight of these houses are in Germany, 7 in Holland, 7 in Russia, 4 in Switzerland, 2 in France, 2 in Austria-Hungary, 1 each in Denmark, Sweden and Norway, and 2 in the United States. One house in Germany, 2 in Holland and 1 in the United States have been received into the Union since 1901. Fifteen German houses have no connection with the Union.

The first effort to transplant the deaconess work to the United States was made in 1849, when, at the earnest request of the Rev. Dr. Passavant of the Lutheran Church, Fliedner himself brought over four deaconesses to become the nucleus of a Motherhouse at Pittsburgh. For various reasons this first venture proved a failure. In 1854 another colony of seven German sisters was installed in the German Hospital, Philadel-

phia, where the work became firmly established in the splendid Mary J. Drexel Home and Philadelphia Motherhouse of Deaconesses, built, supported and endowed by Mr. J. D. Lankenau (died 1901). Its organization, similar to that of this house, in 1884 all American Deaconess houses most closely resembles the European type. Additional Lutheran Motherhouses are now (1903) found in Baltimore, Omaha, Milwaukee, Minneapolis, Chicago and Brooklyn. Since 1896 the American Lutheran houses have held four General Convocations. Each of these was followed by the formation of a Union or General Conference of the various Motherhouses, which meets every three years at various places in the United States.

2. The Motherhouse: In the early Church the deaconess office was a congregational office. Those who were set apart to it were chosen from the congregation in which they were to serve, and beyond having the qualifications required by the apostles for the Diaconate in general (Acts vi: 3; 1 Tim. iii: 8-11), they received no special training for their work. This is not the case to-day. The deaconess of the present is prepared for her calling in an institution that makes this its special object, and to this institution, known as a "Deaconess Motherhouse," she is usually immediately attached. By the Motherhouse she is assigned her field of labor, and from the Motherhouse she gets her support. Not an office-bearer in the congregation in the sense of the early deaconess, she is nevertheless, by virtue of her consecration, and viewed from the point of view of her practical activity, as truly a servant of the Church in her sphere as the minister of the Word is in his. As the whole method of preparing and calling men for the ministry of the Word to-day differs in many particulars from that of the early Church, so, owing to totally changed conditions, the restoration of the Female Diaconate could take place only by adapting the method for doing so to these conditions. Hence the present institutional form of the work, which practical experience has so far shown to he not only the best, but the only possible form for securing abiding results; and in this particular only is an essential difference to be noted between the deaconess office of the early Church and the same calling to-day.

The internal management of the Motherhouse is committed to a Pastor and a Sister Superior. Candidates for admission must be between 18 and 36 (in some Motherhouses, 40) years of age, of unblemished Christian character, intelligent, unmarried and in good health. The appealing motive is beautifully expressed by Lobe, who puts these words into the mouth of the intending deaconess: "What is it my purpose to do? I will serve. Whom will I serve? The Lord Jesus in the persons of His suffering and needy brethren. What shall be my reward? I will serve neither for reward nor thanks, but out of a grateful and loving heart. My reward is that I am permitted to do so. And if I perish? 'If I perish, I perish,' said Esther, who knew not Him for Whom I would perish, but Who will not let me perish. And if I grow old in the service? Then must I to the Lord take my rest, and the Lord will satisfy me with grace and mercy. I go forth in peace and fear naught.'" The instruction, in which a so-called Training Sister (Probemeisterin) takes a prominent part, is of a kind designed to lead to the highest development of Christian character and practical ability.

The period of probation the candidate makes no vows, but only promises faithfulness in her call-
ing. She retains her evangelical liberty to relinquish it when once conscientiously convinced that she ought to do so, tho this does not often occur after one has been consecrated. Summarizing the advantages of the modern Motherhouse they may be stated as follows: It gives those who expect to devote their life to the work of Christianity the largest measure of intellectual and practical training for it such as they could get in no other way, and at no other place; it affords the best possible opportunities for utilizing the special gifts of each one, and the gifts of all in common for the accomplishment of the largest measure of good; by the beauty of its worship, the frequency and variety of its services, the abundant preaching and teaching of the Word, the special pastoral care given each sister, and the healthful influence that comes from being closely associated with common aims in a common work, it is a most potent means for developing in children Christian character and personal holiness; while, finally, it also serves as an outward protection and support by lifting the sister above the cares, frivolities and temptations of the world, providing for all her material necessities, sheltering her when disabled and offering her a decent burial when in death she goes to her rest in the Lord.

3. Fields of Labor: A deaconess of the Kaiserswerth type is not a female evangelist. Tho she embraces many an opportunity to speak the Word of instruction and comfort in private, and particularly in her work with the young has extraordinary advantages for religious teaching, she is nevertheless not called to the ministry of the Word, but, in accordance with Matth. v: 16, is rather to demonstrate the saving power of the Word by what she is and does. Nor is she only a nursery teacher, tho the largest masses are thus engaged in hundreds of institutions. Besides the nursing of the sick, her work embraces the care of the aged and infirm, the insane, the feeble-minded and the epileptic; the care and instruction of children in Day Nurseries, Orphans' Homes and Lis; in Children's Schools, kindergartens and Industrial Schools, Servants' Training Schools and Girls' High Schools; the recovery of the fallen in reformatories, prisons and Magdalen asylums; the protection of the impoverished in working girls' homes and hosspices; and above all, and as the essential work among the poor, to the sick, to the bereaved, the ignorant and the needy of every kind in parishes, under the direct oversight of the pastor.

According to the statistics of the General Conference of 1901, a total of 98 deaconesses were then stationed in Asia, Africa and South America. In hospitals there were 14 at Alexandria, 9 at Cairo, 8 at Beirut, 8 at Jerusalem and 2 in the leper colony of Groot Chatillon, Surinam, South America; in orphans' homes 17 at Beirut, 11 at Smyrna, 10 at Jerusalem and 2 in the school and sanitarium at Areyon on Mt. Lebanon; in parochial work at Alexandria and Haifa 2; 15 were also employed in the hospital and 2 in the little children's school at Constantinople. On mission stations among the heathen there were 2 in Madagascar, 3 in Batavia, 2 in South Africa, 4 in West Africa and 4 in India any and 4.

4. Other Types: In the United States the deaconess cause has also struck roots in other Churches besides the Lutheran. In 1887-88 the work was taken up by the Methodist Episcopal Church, and in 1889, after various private efforts, the General Convention of the Protestant Epis-
and 16 native workers, with 17 elementary schools and 462 professing Christians.

DELI: A town of Punjab, India, 38 miles S. W. of Meerut. Noted for its wonderful old palaces and magnificent old buildings, in some respects the most beautiful and curious in the world. No city in India has finer thoroughfares than Delhi; most of its houses are of brick, well built and substantial. It is the easternmost of the great towns of the province, situated on a fertile plain on the right bank of the Jumna. It has great historical importance, having been the splendid capital of the Mogul (Turkish) emperor Shah Jihan, whose fine mosque, Jama Masjid, is a magnificent monument of the 17th century. Because Delhi was the former residence of the great Mogul, many Turks, Afghans, and Mongols have settled here, and life among the upper classes has a decidedly Mohammedan character. Delhi was besieged by the English during the mutiny of 1857. Its population (1901) is 208,575, two-fifths of whom are Mohammedans and nearly three-fifths Hindus. It is a station of the BMS (1818), with (1900) 8 missionaries, men and women; 24 native workers, men and women; 12 common schools, a theological college, a dispensary and 307 professing Christians. Station also of the Baptist Zenanah Mission (England 1868), with 8 missionary women, 20 native women workers, 6 common schools, 1 high school, a dispensary and 175 Zenana pupils. Station also of the SPG (1854), with (1902) 16 missionaries, men and women; 93 native workers, men and women; 10 places of worship, 19 common schools, 3 high schools and 873 professing Christians. Station also of the ME, with (1902) 11 native workers, men and women; 12 Sunday schools, a Young People's Society, and 999 professing Christians.

DEMERARA: A river and district in British Guiana (q.v.).

DEOBAND: A town in the Saharanpur district, United Provinces, India; situated 45 miles N. E. of Meerut. Population (1891), 19,300, of whom about 11,000 are Mohammedans and the most of the remainder are Hindus. Station of the ME, with (1902) 11 native workers, men and women; 10 places of worship, 19 common schools, 3 high schools and 873 professing Christians. Also written Deobund.

DEOGARH: A town in the Santal Parganas, Bengal, India; situated 55 miles S. by W. of Bhagalpur. Population (1891) 8,300, chiefly Hindus. It contains 22 temples of Siva and is a famous center of pilgrimage. Station of the GWM, with (1902) 7 missionaries, 2 of them physicians; 4 native workers, men and women; 3 preaching places, 2 schools, an orphanage, a dispensary, a leper home, and 130 professing Christians. Name also written Deogahur.

DEOLI: A town in Ajmera, India, 70 miles southeast of the town of Ajmer. Climate tropical. Population, 5,000, including Rajputs, low-caste Hindus and U. P. Minas. Station of the W. (1871), with (1902) 1 missionary and his wife, 16 native workers, men and women; 3 common schools and 10 church members. The place has suffered severely from famine and the Christian community has been depleted by the removals of members to other places.

DEPOK: A village south of Batavia, Java, East Indies. It was Christianized in 1714, and was the seat of a Dutch Missionary Society (under Zending) station from 1834 to 1852. In 1878 Schuurman had formed a Committee in Holland for its support opened a seminary here for training native workers for the whole archipelago. It has proved an efficient and valuable agency for bringing the different races of the islands into touch with each other and for cultivating closer relations between the various societies.

DERA GHAZI KHAN: A town in the Northwest Frontier Province, India; situated 45 miles west of Multan. Population (1891), 27,900, of whom 16,000 are Mohammedans and the larger part of the remainder are Hindus. Station of the CMS and the CEZ (1853 and 1893), with (1902) 4 missionaries, men and women (2 of them physicians); 3 native workers, 1 elementary school, 1 dispensary, 1 hospital and 44 professing Christians. It contains many mosques and a fine bazaar.

DERA ISMAIL KHAN: A town of the Northwest Frontier Province, India; situated on the W. bank of theIndus, in the Hazara District, A well-planned town, with houses of modern construction, but very badly drained. Population (1891), 26,900, of whom 15,200 are Mohammedans, including many proud descendants of old chieftains and other aristocrats. Station of the CMS and the CEZ (1853 and 1893), with (1902) 5 missionaries, men and women (2 of them physicians); 9 native workers, men and women; 1 elementary and 1 high school, 2 dispensaries, 1 hospital and 57 professing Christians.

DERVISH: A Mohammedan Theosophist or Sufi; commonly a member of an order formed for the purpose of seeking mystical knowledge of God. Etymologically the word "dervish" means one who begs at a door, literally as a mendicant, or figuratively as a suppliant at the door of God's mercy. The latter meaning is the one which the older Dervish Orders insist upon. In Turkey popular contempt for the unattached, wandering, and begging Dervishes is expressed in a proverb which says, "The Christian's lazy man becomes a monk; the Mohammedan's, a Dervish" (Kris- tanin tenbeli keshish olur, Mussulmaninki Der- vish). Yet comparatively few Dervishes are mendicant, and it is customary to call Dervishes monks, but none of them are monks in any sense which implies vows of service in an order, celibacy or permanent residence in a monastery. Of themselves they prefer to say that they are "Pakirs," that is to say, "poor" who desire to serve God. Therefore they have become followers of Sufism, or Theosophy (Ehli Tesaveyl). The order of Dervishes is called a "Way" (Tarikat). It is a voluntary association, guarded in a few cases only by secret signs and passwords. The members are not bound by the Order by any promise of惕ahih or debt. Men often remain for some considerable time from one Order to another, sometimes belong to two or more Orders at the same time, and lose no whitt in regard of their fellows if they withdraw, even for the purpose of settling up a new and independent Order. It is customary to call any Order, called a Tekke or a Zariyat, is built on some convenient place and endowed by legacies of the benevolent to serve for worship and other religious exercises according to the ritual of the Order. To this place all Mohammedans are permitted to resort for worship; there the special exercises of the Order are held, the public special exercises
occurring once, twice, or three times in the week; there are the rooms or cells in which the Elder (Sheikh) resides with such of the members as have a vocation to do so. The place is not a monas-
tery, however, and it may be on the same pre-
ises with the rooms where the wives of the Der-
ishes have their dwellings. The house commonly contains apartments for the wives, since they may be admitted to that order and are addressed as "Sister" by all the members.

What all the Orders of Dervishes have in common is, (a) the general doctrine of Sufism that man is capable of attaining to full knowledge of God, and to an ecstatic sense of union with God; (b) certain exercises of mind, of body, or of both, lead certainly to this knowledge of, and union with, God. These exercises constitute the "Way" to God (each Dervish order following its own method of attaining the common aim); (c) in order to follow the "Way" a perfect guide and absolute submission to his guidance is essential. This perfect guide is the founder of the order (called "Pir") and his successor (Khalifa), or the Elder (Sheikh), who has received grace from these to lead souls into thedesired district of the Field, if established; (d) all those who seek God by any "Way" are brothers (Ikhvan); those yet learning are seekers or novices (Muriid); those who are instructed and making progress in the way are "walkers" (Saadi); and a Saadi of long experience may become a "sheikh" (Murshid) of novices in due time perhaps a Sheikh of a separate chapter of the order; (e) the man who has many times repeated the ecstasy of the Divine Presence finally loses himself and becomes annihilated as to self-

The above tenets of Sufism are held by all Orders of Dervishes in common. The points of difference between the different Orders are, in the main, differences of method, but sometimes of interpretation or doctrine. The differences do not, however, as a rule, interfere with brotherly relations between the various Orders.

In theory the Dervish Orders derive their doctrine and the main points of their "Way" from Mohammed himself through the Caliphs Abu Bekr or Ali. This theory, however, is supported less by documentary evidence than by inter-

The exercises by which this condition of divine ecstasy is produced differ in the different Orders, but the theory of all divides the exercises into three parts: (a) Worship and withdrawal of the thoughts from earthly things; (b) Concentration of the mind (on the Sheikh, then on the Pir or founder of the Order, and finally, by these easy stages, upon the Almighty himself); (c) Recitation (Zikr) of the name thereof, and in the climax of a recapitulation of God's attributes continued until breathlessness. The Zikr is assisted by certain mechanical means: for instance, in the Kadiyrli and Rufai'iyy type, by swaying the body, stamping the feet, the whole congrega-
tion beating tambourines, etc., while the holy sentence is shouted in ceaseless repetition. In the Mevlviyyi method, the Zikr is inaudible to the accompanied by plaintive music of reed flutes, while the devotees whir like automatic tops. In the Nakshibendi "Way" the Zikr is also inau-
dible, while the tongue is doubled back upon the palate, the eyes are fixed upon the stomach, and the breath is retained as long as possible. In the Bektash^ system it is alleged that spiritu-

The Dervish Orders are commonly at odds with the Mohammedan theologians because they exalt Ali almost as the Persian Shi'ites do, while all their writings abound in texts and sayings, and all their documentary evidence of spiritual descent from Arabs cannot make their belief and practice
conform to Mohammedan orthodoxy. But the Mohammedanism of the Koran and the schools is essentially a religion of outward observances which keeps the eye of its follower fixed upon himself, his washings, etc. It has no idea that character can be developed in its followers, and certainly none of spiritual needs in man which God is pleased to fill. The Dervish Ordinaries promise Mohammedans a satisfaction for spiritual aspirations which otherwise would grieve their thirsting souls to the grave. It is but a little thing to men in such straits that the Dervishes have ransackedit Persia and India for the dogmas with which to glut the thirst of thousands who are not satisfied with the teachings of Mohammed and who go from one Dervish Order to another, still ever groping after the true "Way of God" and the "perfect guide" who shall lead their souls to rest.

Alto the Ulema, or theologians, of Islam frown upon the Dervish Orders, the laity are their warm supporters. In Turkey many a minister of the Government has a Sheikh attached to his household to give him private instructions in the way, while the Sultan himself is said to be a member of the Shabist Order. The influence of the Sheikhs is tremendous. The rule requiring perfect submission to their will unites with the influence of an austere life and a prophet's vehemence in denouncing patent corruption to make people hope from the Sheikh effective leadership in reform. It is such promise of reform by return to God which gave to the leader of the Kadiiryé and Khalvetiyé Dervishes of the Sudan when the whole land followed him as Mahdi until they had given him a power too great for his hands to wield. It is such promise of reform by return to God and breaking with the bond of the Arabian society and religious organization which gave to the plain, simple Sheikh of a group of Shazili Dervishes in Tripoli, less than forty years ago, the leadership of the Senoussiyé movement, which to-day is the most potent force in all North Africa, if not in Islam.

There is much in the teaching of the Dervishes which appears to be like a bridge between Islam and Christianity. The expressions of earnest desire to know God, of longing for annihilation of self and spiritual union with God and for escape from sin which are common in the teaching of the Dervishes seem to be a ground on which every Christian may meet them. Closer study discoursages this view by showing that the words are used in a special sense. "Desire for God" is desire for that feverish ecstasy produced by mechanical means, which the Sufis compare to drunkenness and which passes away leaving its victim morally what he was before. "Walking in the way to God," with escape from sin, does not imply loyal service, but suppression of responsibility for deeds done in the body. Union with God in the most of the Orders (the Nakshibendié and the Melamidé); an obscure offshoot from the Khalvetiyé Order are exceptions to this interpretation) does not mean fellowship, but absorption of the being, as a raindrop is absorbed in the ocean. With the Christian, union with God implies a higher type of manhood abounding in good works for others. With the Dervishes, it implies such a suppression of this world's intelligence that a naked idiot is the favorite type of its highest degree. Any analysis of Sufism reveals its sub-ordination to Indian Pantheism and probably to the Gnostic delirium of early Christendom. The missionary must approach Dervishes as he would approach those known to be saturated with these Asiatic perversions of great truths, and who need to be taught the first elements of faith in God.

Brown (J. P.), The Dervishes, London, 1868; D'Oehsson, Tableau de l'Empire Ottoman, Paris; Lane (E. W.), Modern Egyptians, London.

DESTERRO. See Florianoopolis.

DEUTSCHE ORIENT MISSION. See Germany; Missionary Societies in.

DEVON: A CMS mission station in the Saskatchewan district, Canada. Station established in 1840, and about to be transferred to the Canadian Church. It now (1901) has 1 missionary and his wife, 3 native workers, 6 schools and 770 professing Christians.

DHAMPUR: A town in the district of Bijnaur, United Provinces, India. Population (1891), 6,700, of whom 4,000 are Hindus and the larger part of the remainder Muslims. Station circuit of the ME. Statistics included in Bijnaur.

DHAMTARI: A town in the Raipur district, Central Provinces, India; situated 160 miles E. by S. of Nagpur. Population (1891), 6,700, of whom 5,400 are Hindus. Station of the PCC (1895), with (1900) 5 missionaries, men and women (one of them a physician); 6 native workers, a hospital, an orphanage, an industrial school and 50 professing Christians.

DHAR: A town and capital of the state of the same name in Central Provinces, India; situated 35 miles W. by S. of Indore. Population (1891) 18,400, of whom 75 per cent. are Hindus and about 20 per cent. Mohammedans. Station of the PCC (1895), with (1900) 4 missionaries, men and women (one a physician); 11 native workers, men and women; 1 preaching place, 3 elementary schools, 1 orphanage, 1 industrial school, 1 theological class, 1 hospital, 1 dispensary and 25 professing Christians.

DHARAPURAM: A town in Madras, India; situated 45 miles N.E. E. S. E. of Coimbatore; celebrated as a strategical center in the wars of the English with Tipoo Sahib and Hyder Ali. Population (1891), 7,700, of whom 5,900 are Hindus. Station of the WMS, with (1902) 1 missionary 10 native workers, men and women; 4 preaching places, 6 village schools, and 78 professing Christians.

DHARMSALA: Capital of a district in the Punjab, India; situated 95 miles N., of Simla at an altitude of 6,000 feet. It owes its name to an old Hindu dharmsala, or sanctuary. Population (1891), 6,200, ninety per cent. being Hindus. Station of the CMS. Statistics included in Kangra.

DHARWAR: A town of Bombay, India, capital of the district of the same name. It is situated 73 miles E. of Goa and is a railroad town and center of trade in produce, grain and cotton being extensively produced in the region. Population (1891), 32,800, of whom 23,900 are Hindus and 7,000 Muslims. Station of the Mission of the Mary Society (1837), with (1902) 3 missionaries and their wives, 21 native workers, men and women; 3 elementary schools, 1 high school and 235 professing Christians.
A settlement on the side of the Congo River, about 175 miles from its mouth. Station of the Swedish Missionary Society (1888), with 7 missionaries, men and women; 12 native workers, 1 preaching place, 6 Sunday schools, 5 seminary schools, and 18 professing Christians.

DIAMONTE: A town in the Argentine Republic, South America; situated on the Parana River, about 25 miles S. S. W. of Parana. Population about 2,000. Station of the SDA, with 2 missionaries and their wives. Statistics included under Buenos Aires.

DIAMOND HARBOR: A seaport in the district of the 24 Parganas, Bengal, India; situated at the head of the estuary of the Hugli, 30 miles S. S. W. of Calcutta. Population about 5,000. Station circuit of the ME, with (1902) 2 missionary women, 11 native workers, 5 Sunday schools, 5 common schools, 2 preaching places, 1 Young People's Society and 63 professing Christians.

DIAREB: A city and capital of a province of the same name in North Mesopotamia, Turkey. It is the ancient Amida, called by the Turks Kara (Black) A mida, on account of the walls, which, being built of black basalt, have a peculiarly forbidding aspect. It is situated on the Tigris River, being a caravan stage, and has always been an important place. Population about 34,000, of whom about 20,100 are Mohammedans (Arabs, Turks, Kurds, etc.) and the remainder Christians of various sects. It was for many years a station of the ABCFM and was given up because of insubility as soon as the evangelical church was able to stand alone.

DIBBLE, Sheldon: Born at Skanesateles, N. Y., January 26, 1809; graduated at Hamilton College, 1825; Auburn Theological Seminary, 1830; ordained at Utica, October 6, 1830. Sailed the same year with the fourth company of missionaries sent by the ABCFM to the Hawaiian Islands. He translated part of the Old Testament, prepared eight text-books on grammar, natural history, and Scripture history in the Hawaiian language, and wrote a History of the Sandwich Islands Mission (New York, 1839) and a History of Sandwich Islands (Lahainaluna, Honolulu, 1843). He died at Lahainaluna, June 22, 1845.

DIBRUGARH: Capital of the district of Lakhimpur, Assam, India; situated on the left bank of the Brahmaputra River, being the terminus of river trade by commercial steamers. Population (1891) 9,900, of whom 7,100 are Hindus and the remainder chiefly Muslims. Station of the ABMFM (1896), with (1901) 2 missionaries (one with his wife), 2 native workers, 1 preaching place and 150 professing Christians.

DIG: A town in Rajputana, India, lying 25 miles N. W. of Bhartpur. It is built in marshy land and is surrounded by water during most of the year. Population (1891) 15,800. Station circuit of the ME, with (1902) 31 native workers, men and women; 1 preaching place, 10 Sunday schools and 520 professing Christians.

DIKELE LANGUAGE. See KELE.

DIKWELLA: A town on the southern coast of Ceylon, situated about 10 miles E. of Matura. Station of the WMS, with (1902) 1 missionary, 19 native workers, men and women; 3 preaching places, 6 Sunday schools, 6 seminary schools, and 18 professing Christians.

DINAPUR: A town in Bengal, India, situated on the left bank of the Ganges, 11 miles W. N. W. of Patna. Population (1891) 44,000, of whom 32,300 are Hindus and about 10,000 Mohammedans. Station of the BMS, with (1900) 1 missionary and his wife, 3 native workers and 2 elementary school teachers, 1 dispensary and 394 professing Christians.

DINDIGAL: A town in Madras, India, 30 miles northwest of Madura. The name means "Rock of Dindu" and is taken from a remarkable wedge-shaped rock, 1,200 feet high, on which a fort has been constructed. The place was formerly of considerable importance. Population (1891), 20,000, of whom 14,600 are Hindus. Station of the ABCFM (1836), with (1901) 1 missionary woman, 71 native workers, men and women; 19 preaching places, 19 common schools, 12 Sunday schools, 3 high schools, 1 dispensary, 1 hospital and 607 professing Christians. Also station of the Leipzig Missionary Society (1890), with (1900) 1 missionary and his wife, 8 native workers, 4 preaching places, 1 common school, 1 high school, and 400 professing Christians.

DIP POINT: Station of the New Hebrides Mission on the island of Ambrym. See New Hebrides.

DISA: A town in Baroda, West India, lying about 20 miles W. of Palanpur. Station of the Presbyterian Church of Ireland (1893), with (1900) 1 missionary and his wife, 7 native workers, 4 common schools, 1 orphanage and 14 professing Christians.

DISCIPLES OF CHRIST. See FOREIGN CHRISTIAN MISSIONARY SOCIETY, and CHRISTIAN WOMEN'S BOARD OF MISSIONS.

DIX COVE: A settlement in the Gold Coast Colony, situated on the coast about 60 miles W. S. W. from Cape Coast Castle. Station of the WMS, with (1902) 1 missionary, 54 native workers, men and women; 29 preaching places, 5 Sunday schools, 1 common school and 261 professing Christians.

DJANDJI MATOGU: A settlement in the island of Sumatra, Dutch East Indies, situated on the Toba Lake about 50 miles N. E. of Siboga. Station of the Rhenish Missionary Society, with (1900) 1 missionary and his wife, 2 native workers, 2 day schools and 40 professing Christians.

DJEMAA SAHRIDJ: A village in Algeria, situated about 30 miles N. of Algiers. Station of the North Africa Mission (1882), with (1902) 2 missionary women, 1 assistant missionary and his wife, 2 native workers, man and woman; 2 preaching places, 1 Sunday school, 1 blind school and 40 Christians.

DJOCJAKARTA. See JOKJAKARTA.

DOANE, Edward Topping: Born at Tompkinsville, Staten Island, N. Y., May 30, 1829; graduated at Illinois College, Jacksonville, Ill., 1848; Union Theological Seminary 1852; ordained 1854, and embarked June 4, the same year, as missionary of the ABCFM for Micronesia, arriving February 6, 1855. The circumstances made it necessary for him to be transferred temporarily to the Marshall Islands and to Japan, yet the people of Ponapi, where he was stationed, had his heart, and to them he returned and for them labored with unwearied gentleness and courage, and with cheering success. In 1857, when the Spanish forces occupied the island, Mr. Doane was seized and carried to Santa Barbara, and thence sent as prisoner to the Philippine Islands. The natives
were so roused by his unwarrantable act, that, being without Mr. Doane’s influence to restrain them, they rose and took the life of the Governor. The Governor, Dr. Julius Von Dess, the American Consul at Manila, Mr. Doane was liberated by the Spanish Government, and was returned with apologies to his station. His influence throughout the islands was increased by what had happened. To his health declined, he clung to the pasture of 1386, at the age of 67, was conveyed by the “Morning Star” to Honolulu, where in two weeks he quietly breathed his last, at the house of the Rev. Dr. Hyde, on the 15th of May. He had been 35 years a missionary.

DOBER, Leonard: The first missionary of the Moravians to the Danish West Indies. He was a potter by trade. His attention was called to this field through a conversation in 1731 with a servant of Count Zinzendorf, who stated that he had a sister in St. Thomas, W. I., and desired some one to send to instruct the slaves in Christianity. Whoever went to these poor people on the island of St. Thomas must become a laborer to work among them, and Leonard Dober offered himself to do so. The Mission was so poor and necessary to them, that he was appointed to do it. It was a year before anything was done. When it was determined by lot, in 1732, Dober was selected, and Nitschman, who was to go with him to St. Thomas and then return to Herrnhut. The Moravians at this time knew very little of missionary undertakings, and gave them only these instructions: “In all things follow the guidance of the Spirit of Christ.” They set out for Copenhagen, with only their stockings in their hands and only six dollars in their pockets. They were told at Copenhagen that it would be impossible to get a vessel to go to St. Thomas, but their steadfastness of purpose raised up some influential friends for them among the royal family, counselors of state, and her majesty’s chaplains. They arrived in St. Thomas, December 13, 1732, and immediately found the servant’s sister, who, with her companions, rejoiced to see them. For four months Dober and Nitschman worked happily together, when Nitschman had to return to Europe. Dober was left destitute, for there was no clay on the island suitable for the making of pottery. He was for a time tutor to the governor’s child, but with his missionary work among the negroes, and he went to Tappus, a small village, where he lived in great poverty. In 1733 helpers came from England to take his place. Two months later Dober returned to Europe, to fill the office of superintending elder in the Moravian congregation at Herrnhut.

DOBUDJA: The portion of the Balkan Peninsula on the right side of the Danube, extending from Silistria and Varna to the mouth of that river, offering the most accessible military route from the north to Constantinople. The country is flat, containing several large swamps and lakes on the coast. Some parts are very fertile, and produce good crops of grain; others are covered with grasses. The population is made up of Greeks, Bulgarians, Wallachs and Tatars. Under the treaty of Berlin (1878) this district was taken from Turkey and added to Rumania, of which it is now a part.

DOBU: A settlement on the northern end of New Milly Island, now in New Guinea. Station of the Australian Wesleyan Methodist Church, with (1900) 2 missionaries and their wives, 2 missionary women, 37 native workers, 4 common schools, an orphanage, a dispensary and 6 baptized Christians.

DODANDUWA: A town in the southern part of Ceylon, situated on the coast about 20 miles N. W. of Galle. Station of the CMS, with (1902) 1 unordered missionary, 1 missionary woman, 1 native worker, 1 preaching place, and 2 industrial schools.

DOHAD: A town in the district of Panch Mahals, Bombay, India. Population (1891), 12,900, of whom 8,300 are Hindus and the remainder mostly Mohommedans. Station of the Presbyterian Church in Ireland (1891), with (1900) 1 missionary and his wife, 1 missionary woman, 7 native workers, men and women; 4 common schools, a dispensary and an orphanage.

DOHANUVUR: A district in Tinnevelli, India, giving name to a church circle of the South India Mission of the Church Missionary Society; founded in 1827 by a special gift of Count Dohna.

DOLAIR HILL: A settlement in the Fashoda district of the Sudan, situated on the Sobat 540 miles by river from Khartum. People of the neighborhood, pagans. Station of the UP (1902), with 2 missionaries and their wives, one of them a physician.

DOLE, Daniel: Born at Bloomfield (now Skowhegan), Maine, September 9, 1808; graduated from Bowdoin College, May 1830; Bangor Theological Seminary, 1839; sailed as a missionary of the ABCFM, November 14, 1840, for Honolulu. On his arrival he was appointed principal of the Punahou school, and when the school was incorporated as Oahu College he became the president, which position he held until 1855. He died at Koloa, Kauai, August 26, 1878.

DOLORES: A town in Argentina, situated about 150 miles S. E. of Buenos Aires. Station circuit of the ME, with (1902) 2 native workers, 3 preaching places and 67 professing Christians.

DOMASI: A mission station of the Church of Scotland in Nyassaland; situated about 40 miles N. by E. of Blantyre. The station was occupied in 1854, and has now (1900) 3 missionaries (2 of them with their wives), 2 native workers, 33 native women, 33 native workers, men and women; a chapel, 12 common schools, 1 high school, 1 industrial school, 1 dispensary, 1 printing house, and 138 professing Christians.

DOMBRE: An important government plantation, lying on the western bank of the Surinam River, in Dutch Guiana, South America, about twelve miles above Paramaribo. At and near the village there is a population of about 1,200 persons connected with the Moravian Church, and many heathen in the surrounding districts. Station of the Moravian Missions (1891), with (1900) 1 missionary and his wife, 21 native workers, 1 preaching place and 340 communicants.

DONDO: A trading station in Angola, West Africa, situated on the Quanza River, 180 miles from its mouth, at the head of steamboat navigation. Population, 5,000. Station circuit of the ME, with (1902) 1 native worker and 50 professing Christians. In the cemetery are the remains of several missionaries who lost their lives in the attempt to become accustomed to its insalubrious climate.

DOREH: A settlement on the W. coast of the western extremity of New Guinea, Malaya. Station of the Utrecht Missionary Society (1878)
appreciated by the Chinese Government; and at
the conclusion of the war, the emperor conferred
on Dr. Douthwaite and ten other medical mis-
soners the Imperial Order of the Double
Dragon (considered to be equivalent to the Order
of the Bath in England). When Dr. Douthwaite
was leaving Chi-fu the Chinese general came with
a guard of honor and drew up in front of the
hospital. After expressing to him the gratitude
of the Chinese people for his services, they
escorted him to the jetty. When his life-work
was coming to a close, he said: "Had I a thou-
sand lives instead of one, I would ask for no
greater joy, no greater honor, than to be per-
mitted to spend them all in the glorious work of
winning China for Christ." He died on October
6, 1899.

DOWLAISHVARAM: A town in the Godavari
district, Madras, India, 32 miles by the shortest
canal from Cocanada, and 4 miles south of Rahaj-
mundry. Population (1891), 10,500, mostly
Hindus. When first built, the town was a place
of much importance; and presently it is a permanent
station of the district engineering staff, and
the government workshops here turn out much work
for the Public Works Department. The town is
connected with several points on the coast, by
navigable canals. Mission station of the Evan-

cational Luthecian General Council, with (1901) 1
missionary and his wife, 21 native workers, men
and women; a preaching place, 24 common
schools, and 700 professing Christians. Station
also of the PB.

DRIEFONTEIN: Station of the South African
Methodist Missionary Society, situated in Natal,
with (1900) 64 native workers, 4 preaching places,
5 common schools, and 1,045 professing Chris-
tians.

DRUSES: A peculiar race and sect living in
North Syria, among the slopes of Mount Lebanon
and Anti-Lebanon. There are also some settle-
ments in the Hauran and a colony at Safed,
Palestine. They are found as far north as Bei-
rut, as far south as Tyre, and as far east as
Damascus. About 120 towns and villages are
occupied exclusively by them, and, together with
the Mononites, they compose the population of
over 200 more. They are estimated at 65,000.
Deir-al-Kamar, about 15 miles southeast of
Beirut, is the chief town of the sect.

The origin and ethnographical affinity of the
Druses are by no means settled. The most credi-
bile theory is that they have sprung partly from
the Cuthites, by whom the devastated cities of
Samaria were repeopled under the rule of Esar-
haddon; partly from the warlike Mardis, who
were brought to Lebanon by Constantine IV.
in the 7th century; and partly from the Arabs,
with, perhaps, a little of the blood of the Cru-
saders mingled with their very mixed ancestry.
Whatever their origin, their characteristics had
become fixed at the close of the 10th century.
They speak Arabic as correctly as the people
of Mecca; they possess a knowledge of the Chinese
Empire, with which their own traditions connect
them; and they exhibit a refinement in conver-
sation and manners, an appreciation of educa-
tion, especially that of women, which is in strik-
ing contrast to the other Syrian races with which
they are surrounded.

Hakim B'emmillah (the name is a title and
means Ruler by command of God), Caliph of
Egypt, who began to reign in 996, is the repute-

THE ENCYCLOPEDIA OF MISSIONS

Dotty
Duff, Alexander

with (1902) 1 missionary and his wife, 2 native
workers, 2 outstations, 2 common schools and 40
professing Christians.

DOTY, Elihu: Born 1812; graduated at Rutgers
College, N. J., 1835; and at the Theological
School, New Brunswick, N. J., 1836; was ordained
the same year as a missionary to the heathen.
He was the first member of the mission sent by
the Reformed Dutch Church and the ABCFM to Java,
where he labored from 1836 to 1840, when he was
transferred to Borneo and labored among
Dyaks. He removed to Amoy, China, in 1844.
Mr. Doty was an excellent Chinese scholar and
preacher; an indefatigable, courageous, self-den-
ying laborer; a man of singular frankness; and
was closely identified with the mission at Amoy from
its origin until his death in 1865.

DOUGLAS: A town in Cape Colony, S. Africa,
situated on the Orange River, about 60 miles
S. W. of Kimberly. Population, about 1,500.
Station of the Berlin Mission Society (1894),
with (1900) 1 missionary, 1 native worker, and
138 professing Christians.

DOUGLAS ISLAND: North of Admiralty
Island, Alaska, and about 75 miles N. E. of the
Treasure Gold Mine. Station of the American Friends' Foreign Mission
Board (1887), with (1902) 1 missionary and his
wife, 2 missionary women, 1 native worker, and
1 outstation. Station also of the PE, with (1901)
1 missionary woman, 1 preaching place, supplied
from Trenchard, and 16 communions.

DOUTHWAITE, A. W., M.D.: Dr. Douthwaite
left for China in connection with the China Inland
Mission, in 1874; and the first eight years of his
life there were spent in the province of Che-kiang,
at the stations of Shao-lsing-fu, Kii-chau-fu and
Wen-chau-fu, successively. At Kii-chau-fu he
formed a church of 90 members, and during his
first year at Wen-chau-fu he treated 4,075
patients. At a time when the Mission was in
great financial stress he was offered a govern-
ment post at a handsome salary, but he resisted
the temptation, and was faithful to his Christian
work through years of severe trial. In 1882 he
was obliged to recruit his health in the bracing
air of Chi-fu. With this place his name is inse-
parably linked, and throughout the Shan-tung
Province he won the confidence of thou-
sands of Chinese patients. In 1884, when Korea
opened its doors, Dr. Douthwaite left Chi-fu and
entered that land. Journeying into the interior,
he preached the Gospel, circulated copies of the
Word of God and healed the sick. After a most
effective work in Korea, he returned to Chi-fu in
1886, where he labored, in spite of bereave-
ments and severe illness, for twelve years.
During that time his medical work grew so extensively
that his Chinese patients numbered 20,000 annu-
ally; and in 1896 the out-patients numbered
26,700; in-patients, 216, and surgical operations,
851. Chinese, and for the first time acknowledged
the good results of his work, and from the official
to the beggar all sought his aid. Yet, with all
his skill and success, no one more readily recog-
nized the very limited powers of a medical man
and the absolute need of the hand of God in the
healing of the sick; and in this he and determination
were strong features in his character, and enabled
him to accomplish an amount of work which
would have taxed the powers of younger and
stronger men. The services of medical mission-
aries during the war with Japan were highly

THE ENCYCLOPEDIA OF MISSIONS

Doty

Duff, Alexander

author of their peculiar religion. Twenty-five years of tyranny wild and terrible leave little doubt of his insanity, under the influence of which he aimed to hold direct intercourse with the Deity, and proclaimed himself the incarnation of God.

His claims were made known in a mosque at Cairo by one Darazi, but they were received with such bitter hostility that Darazi fled to the mountains of Lebanon, where he taught the new faith, and the word Druse is supposed by some to be derived from this first apostle. Hamza, a Persian, and vizier of Hakim, is regarded as the real founder of the sect, for he formulated the creed and succeeded in gathering together a large body of adherents.

The Druses believe in one only God, who is without form or substance, incomprehensible, without attributes, and before whom man is dumb and blind. Ten times has this God revealed himself in human form, Hakim being the tenth and the last incarnation. A fixed number of hours in the first six epochs of Islam is the sum subtracted from, and all who are living now have lived before, and will continue to live in other bodies until the end of the world. At the death of one man the soul occupies a new body, of noble or base quality, according to the deeds done in the life before, and after myriads of reincarnations, when the soul has been purified from every stain, it will enter rest in God.

The correspondence of this part of the Druse doctrine with Indian philosophy is noticeable and probably came to them through Persian Sufis. The Druse do not acknowledge the claims of any other religions, but they countenance an outward profession of any religion whenever it may be expedient, and unite with the Mohammedan in his prayers and washings with the same indifference with which they sprinkle holy water in the Maronite churches. This apparent apostasy is due to the fact that no converts are desired or permitted, and the faithful are enjoined to keep their religion sacred and concealed, if necessary. Seven commandments of Hamza take the place of the first six points of Islam. These are: 1st. Truth speaking (only between Druses); 2d. Combination for mutual defense; 3d. Renunciation of all other creeds; 4th. Social separation from all who are in error; 5th. Recognition of the unity of Hakim with God; 6th. Complete resignation to his will; 7th. Obedience to his orders. Druses do not pray, for prayer is impatient interference with the Creator. There is none of the fatalism of Islam, however, for they recognize the freedom of the human will. Among themselves they divide men into two classes: 1st. Those who know the truth of religion, who are called Akkals, or intelligent; and 2d. Those who do not know, the Jahils, or ignorant. The Akkals, having attained knowledge of God, are holy and have no need of the observances of religion. On the other hand, the Jahils have never seen or conceived of religion as a means of training. Polygamy is not permitted, but divorce is freely allowed.

About the year 1860 the jealousies long existing between Druses and Maronites were fanned into fierce flame by fanatical Mohammedans who threatened to massacre the Maronites unless they converted to Islam. The Roman Catholic Maronites acquired through the protection given them by France. Horrible massacres of Christians followed in which the Druses acted with the Mohammedan rabble as the enemies of all Christians, and which were met with terrible reprisals whenever the Maronites found opportunity. The result was a European intervention, with the intervention of Turkish officials from the Lebanon, and the establishment of autonomous government for that district, with a Roman Catholic governor and mixed council, under a constitution drawn up by the European powers. Since that time the prosperity of the Lebanon has been in marked degree dependent on the proximity of Druses and Maronites living on perfect equality before the law, which is gradually extinguishing the ancient feuds and the habit of settling them by murderous attacks. The Druses are fine looking, brave, industrious and enterprising, and live in great part through agriculture.

DUALLA LANGUAGE: Of the Bantu family. It is spoken by some of the tribes found in the upper course of the Niger, and the large tribe of the 'Barbari,' who live near the coast, and who are now in a state of transition. This language has been reduced to writing in the Roman alphabet. Missionaries of the Baptist Missionary Society (BMS) and later of the Basel Missionary Society have done literary work in this language.

DUFF: A settlement in the Transkei region of Cape Colony, S. Africa, lying about 25 miles N. E. of Butterworth, Station of the UFS (1880), with (1902) 1 missionary, 18 native workers, men and women; 10 preaching places, 11 common schools, and 235 professing Christians.

DUFF, Alexander: Born April 26, 1806, in Perthshire, Scotland. He entered the university of St. Andrews at the age of fifteen, and studied there under the celebrated Chalmers. The Church of Scotland having awakened to the duty of sending the Gospel to the heathen, Dr. Duff was appointed its first missionary, and at the age of 23 embarked, October, 1829, for India. During his voyage he was wrecked twice, first on a reef of rock while rounding the Cape of Good Hope, again on the coast of Ceylon, and barely escaped a third wreck near the mouths of the Ganges. In the first wreck he and his wife lost everything, including his library, plans of operation and many valuable manuscripts. He reached Calcutta after a voyage of eight months. One of the chief objects he had in view in going to India was the establishment of a collegiate institute which should confer the highest education on native youth. His school was to be conducted on two great principles: (a) the Christian Scriptures should be read in every class, be the entire foundation and pervading salt of the school; (b) since the vernaculars of India could not supply the medium for all the requisite instruction, the sciences of the West should be taught through the English language. To counteract against the corrupt influence of government, all learned Orientals and the most experienced missionaries in Bengal. All these insisted that higher instruction ought to be given in Sanskrit. With the assistance of Rammohun Roy, who entered fully into Dr. Duff's views, the school was established, having for its object the education of five young men, but was soon removed to a commodious building. The instruction was in English, and the Bible held a chief place. Before the end of the first week there were more than 300 applicants. Of these, 250
were received. At the end of the first year a public examination, attended by a large number of scholars and students, was held, and produced great satisfaction. The next year the number of applicants was more than trebled. In 1839 Dr. Duff wrote: "The five who entered the first day have since swollen to an average attendance of 800. The Governor-General, Lord Bentinck, considered the ablest and most enlightened of the Governor-General. India has possessed, did homage to it by publicly proclaiming in the face of all India that it had produced unparalleled results." The number of pupils was soon increased to a thousand. Among the first converts were two from the educated and influential class. One was Babu Krishna Banerjea, a Brahman of high social position, editor of a newspaper, afterward a minister of the English Church, and a distinguished professor in Bishop's College, Calcutta. His influence on natives of all classes, especially the educated, has always been great. The other was Gopeenath Nundi, afterward a preacher in connection with the American Presbyterian Mission in the Northwest Provinces, who, during the Sepoy mutiny, when threatened with death, nobly testified for Christ, and was afterward honored in Cast and all-heaven.

On his recovery he made a tour through Scotland, and greatly increased the interest in the missionary cause by his thrilling appeals and the report of his successful work. The degree of doctor of divinity was at this time conferred upon him by the University of Aberdeen. He returned to India in 1839. At the disruption in the Church of Scotland in 1843 he cast in his lot with the Free Church, abandoning his beloved and prosperous institution, its valuable library and apparatus, and for twenty years conducted missionary work under that body. He built a new institution from the foundation, and equipped it as well as the old had been. The influence of his work continued to increase. Interesting conversions took place. In 1846, on the death of Dr. Chalmers, he was offered the office of principal and professor of theology in the Free Church College in Scotland, and, urged by Presbyteries, Synods and General Assembly to sacrifice his own predilections and accept, he declined, begging them to "allow him to retain, in the view of all men, the clearly marked and distinguishing characteristics of a missionary to the heathen." In 1850 he again returned home to work for the missionary cause, and sought to arouse the Free Church to more earnest efforts in India. In 1851 he was elected moderator of the General Assembly. In 1854, under the auspices of Mr. George H. Stuart, he visited the United States, where, as also in Canada, he addressed thousands on the missionary work in India. The University of New York honored him with the degree of LL.D. Returning to India in 1857, he opened his school for high-caste girls in the house of a Brahman. At the first examination, attended by distinguished native gentlemen, who expressed great satisfaction, 62 were on the roll. In 1864, his health having utterly failed, he took a final leave of India. On leaving Calcutta he received from all classes of the community a great demonstration of heathen and Christian, emphatic testimony of the great value of his services rendered for nearly thirty-five years in India. During the fourteen years spent in Scotland he urged with great eloquence upon the churches their duty to give the Gospel to the millions of India. His correspondence was extensive, many letters being directed to priests and to Hindu students. He had the chief management of the foreign work of the Free Church. In 1873 he was again elected moderator of the Assembly. In 1867 he was appointed professor of evangelical theology in the college of the Free Church, which office he held for eleven years. He died at Sidmouth, Devonshire, February 12, 1878, aged 72. He has been well described as "a man of dauntless will, consummate eloquence, impassioned piety, great self-reliance. His published works are: New Era of the English Language and Literature (1837); Mis-
imissions the Chief End of the Christian Church (1859); India and Indian Missions (1839); The Indian Rebellion, its Causes and Results (1858). The Calcutta Review was mainly established by him.

DUKE TOWN: A town in Lower Nigeria, W. Africa, situated on the left bank of the Old Calabar River, about 10 miles from the estuary. Population, 2,500; of these, 1,000 are European, the rest African, and unhealthy. Station of the UFS (1846), with (1902) 2 missionaries (one with his wife), 4 missionary women, 12 native workers, men and women; 1 high school, 1 industrial school, 1 dispensary, 1 hospital, 1 printing house and 394 professing Christians.

DULLES, John Welsh: Born Philadelphia, Pa., November 4, 1825; graduated at Yale College with high honor in 1844, and at Union Theological Seminary, New York, 1847; married Harriet Winslow, daughter of Rev. Dr. Miron Winslow; ordained October 2, 1848; sailed as a missionary of the ABCFM the same year for Madras. He was stationed at Rajapuram, having charge of the church and schools. In 1850 he made a tour with Rev. Henry Scudder with a view to establishing an outstation to the Madras mission, and on their advice Arcot was selected and afterward became the field of the Arcot mission. Mr. Dulles was fitted by talents, education, acquisition of the languages of the country, to do the missionary work. But his own ill-health and that of his wife compelled them to relinquish the field, and they returned in 1852. For three years after his return he served the American Sunday School Union. In 1856 he was appointed editorial secretary of the Publishing Committee of the Board of Publication in the New School branch of the Presbyterian Church. He was appointed to the same position in the reunited church in 1870, and, on the resignation of Dr. Schenck in 1886, was elected General Secretary of the Board. He wrote Life in India and The Ride through Palestine. Dr. Dulles died at his home in Philadelphia, April 13, 1887.

DUMAGUDEMI: A town in Madras, India, on the Godavari River, 115 miles N. by W. of Masulipatam. Population (1890), 5,000, chiefly Kois. Mission station of the CMS and CEZ, with (1902) 5 missionaries, men and women; 20 native workers, men and women; 1 preaching place, 15 elementary schools, 1 dispensary, 30 Zenana pupils and 830 professing Christians.

DUMAGUETE: A town in the southern part of the island of Negros, P. I. Beautifully situated in a fertile district. Population, 13,200. Station of the PN (1901), with (1902) 2 mission-
aries and their wives (one of them a physician),
1 high school, with industrial classes, and 1 dis- 
persary.
DUMBBOLE: A settlement in British Central
Africa, S. of Lake Nyasa, about 80 miles N. W. of
Blantyre. Station of the Zambesi Industrial
Mission, with (1903) 1 missionary and his wife, 1
chapel, 4 common schools and 1 industrial school.
Also written Domboli.
DUM DUM: Town in the district of the 24
Provinces, Bengal, India, 6 miles N. E. by E. of
Ft. William, Calcutta. It is an important mili-
tary station. Population (1891), 11,000, of
whom 6,300 are Hindus and the remainder chiefly
Muslims. Station of the WMS, with (1902) 1
missionary, 1 missionary woman, 8 native work-
ners, men and women; 7 preaching places, 4 Sun-
day schools, 6 common schools and 44 professing
Christians.
DUMISA. See UMZINTO.
DUMMAGUDEM. See DUMMAGUDEM.
DUNDEE: A town of Natal, 100 miles N. by W.
of Pietermaritzburg. It has extensive coal
fields. Population, 1,500. Station of the Swe-
dish Church Mission (1895), with (1900) 5 mis-
ionaries, men and women; 8 native workers,
3 preaching places, 7 schools, 1 industrial school,
1 hospital, 1 printing house and 297 professing
Christians.
DUNDREGAMA: Station of the SPG in the
diocese of Colombo, Ceylon, with (1902) 1 mis-
ionary, 6 native workers, 2 places of worship, 1
common school, and 1,023 professing Christians.
DUNEDIN: A city and seaport of New Zea-
land; situated 60 miles S. S. W. of Oamaru, on
the southwestern side of the bay running inland.
It is the most important commercial city of New
Zealand. First settled by members of the Free
Church of Scotland in 1843. The discovery of
gold near by changed the village into a city.
Population (1891), 23,500, including suburbs.
The Presbyterian Church of Otago has an enter-
prise here for heathen, with 1 missionary and his
wife, 1 native worker, 1 common school and 8
professing Christians.
DURANGO: Capital of the State of Durango,
Mexico; situated 195 miles N. of Zacatecas and
near a remarkable hill of magnetic iron ore.
About 10 miles from this place. It was founded
in 1539. Population (1889), 24,800. Station of
the MFS (1884), with 1 missionary and his wife,
2 missionary women, 1 native worker, 1 preaching
place and 3 Sunday schools. Station also of the
SBC, with (1902) 1 missionary and his wife, 3
native workers, 1 common school and 36 professing
Christians.
DURBAN: Capital of Natal, South Africa, at
the head of its harbor on Port Natal Bay, 45 miles
east southeast of Pietermaritzburg. It con-
tains several public buildings of importance, and
has a large trade. Population, 17,900. Mission sta-
tion of the ABCFM (1892), with (1901) 1 mis-
ionary and his wife, 34 native workers, men and
women; 40 preaching places. Also station of the
SPG (1872) among the 72,000 Indian coolies with
(1902) 1 missionary and his wife, 5 native work-
ers, men and women; 1 orphanage, 1 dispensary
and 100 communicants. Also station of the National
Baptist Convention (1900), with 2 missionaries,
1 missionary woman, 1 preaching place, 1 school,
and 210 professing Christians. Also station of
the South African General Mission (1895), with
(1900) 1 missionary and his wife, 2 native work-
ers, 2 preaching places, 1 theological college, and
76 professing Christians. Also station of the
South African Wesleyan Methodist Mission, with
(1900) 9 native workers, 6 preaching places, 1
common school, and 213 professing Christians.
DURU: A village in the Ranchi district of
Chota Nagpur. Station of the SPG, with (1902)
7 native workers, 3 common schools, and 449
professing Christians.
DUTCH EAST INDIES: Name given to Asiatic
territories and islands which are under the sover-
eignty of the Netherlands. The East India Com-
pany, created by the Dutch in 1602, conquered
these islands and ruled them for nearly two cen-
turies, but since 1798 the Company has ceased
to exist, and the mother country rules the pos-
sessions, comprising Java, Madura, Sumatra,
Rian-Lingga Archipelago, Banda, Borneo, Cele-
bes, Moluccas, Timor Archipelago, Bali, Lombok,
and New Guinea to 141 degrees east latitude,
with a total area of 736,400 square miles and a
population (1900) of about 36,000,000. The total
number of Protestants in the Netherlands Colonies
was 60,277, and the whole number of Europeans in
the islands is 75,297. Of the remaining popula-
tion 460,000 are Chinese, 24,000 Arabs, and
32,000,000 natives.

The pioneer missionaries to Dutch Borneo were
from the American Board, who labored on the west
cost from 1839 to 1849; but at present the Rhenish
Society only is doing missionary work here, altho
the British and Foreign Bible Society has done some
temporary work. On five of the islands, lying between New Guinea on the east and Sumatra and Borneo on the west, we find
the largest remnants of the earlier Dutch govern-
ment evangelization; and here a number of mis-
ionary societies are doing successful work.
The work in Sumatra was begun in 1820 by a Bap-
tist missionary; and now representatives of five
German and Dutch missionary societies are reap-
ing a rich harvest. Miracles of grace have taken
place in Java and Celebes as the result of the
faithful labors of missionaries of six Dutch soci-
eties, the Neukirchener Mission and the agent
of the British and Foreign Bible Society, the
N. Z. Missionaries and the WMS, the German
Christian Mission and the Christian Mission of
the Seventh Day Adventist Church. The number of
Christians (native) reported in the census was 309,258. There were 133 Prot-
estant and Roman Catholic missionaries in the
islands in 1900.

DWARAHAT: A town in the United Provinces,
India, in the Kumaon district. Station of the
ME, with (1902) 1 missionary and his wife and
148 professing Christians. Statistics included
under Bareilly.
Dwight
Edinburgh Medical

THE ENCYCLOPEDIA OF MISSIONS

Dwight, Rev. H. G. O.: Son of Seth and Hannah Strong Dwight, born at Conway, Mass., November 22, 1803, but reared at Utica, N. Y. Graduated at Hamilton College, 1825, and at Andover Theological Seminary, 1828. Appointed missionary of the ABCFM. Sailed from Boston for Malta in 1830. With Rev. Eli Smith he explored parts of Asiatic Turkey, the Caucasus, and Persia, in a journey which occupied the year from May, 1830, to May, 1831. The whole journey was performed on horseback amid great perils, the two missionaries being compelled, for the sake of safety, to wear the Turkish rebes and turban. These explorations led to the establishment of the ABCFM's missions among the Armenians of Turkey and the Nestorians of Persia. In 1832 Dr. Dwight was associated with Rev. William Goodell in the establishment of the station at Constantinople. He studied the Armenian language, and was on the most friendly terms with the Patriarch and leading men of the Armenian Church. In 1837 his wife and one of his sons died of the plague. In the autumn of the year 1861 he went to the United States to tell the churches of the wonderful changes of which he had seen the fruits. While engaged in this work he was killed by a railroad accident near Shaftesbury, Vt., January 25, 1862.

Dr. Dwight loved to preach, and to visit the people in their houses and shops in order to win them to spiritual life. He had an important part in introducing evangelical Christianity in Rodosto, Nieomedea and Adabazar, places which he used to visit repeatedly. He also gave much time to the preparation of books and tracts in Armenian, and, occasionally, to the editorial care of the weekly newspaper published by the mission in Armenian. He took a leading part in the publication of details of the persecution of evangelical Armenians by their own clergy, and was energetic in the steps taken to secure the intervention of the British government in behalf of religious liberty in Turkey.

The published works of Dr. Dwight are: A Memoir of Mrs. E. B. Dwight; Christianity Revived in the East; and a revised edition of the same, called Christianity in Turkey, published in London in 1854.

Dyer, Samuel: Born January 20, 1804, at Greenwich, Eng.; educated at Gosport, and Missionary College, Hoxton; sailed, April 11, 1827, a missionary of LMS, for Malacca, but went to Penang, where he remained three years. In 1835 he removed permanently to Malacca. His most important achievement was the invention of movable metallic type for printing the Chinese Scriptures. He labored under every disadvantage, having only once seen the process of type-founding in England. He personally superintended all the work, and the type that he cast were remarkable for their beauty and finish. So great was the improvement over the old Chinese method of printing, that the Bible, formerly printed in half a dozen volumes, was reduced to one, and the New Testament to less than ninety pages. He also took an active part in the translation and revision of the Chinese Scriptures. He died at Macao in 1843.

East London: A town and seaport in the southeast part of Cape Colony, S. Africa; situated at the mouth of the Buffalo River, 81 miles E. by N. of Grahamstown. Population, 6,000. Station of the SFG, with (1902) 1 native worker and 121 professing Christians; also station of the South Africa Wesleyan Methodist Mission, with 35 native workers, 6 preaching places, 6 Sunday schools, 6 common schools and 310 professing Christians.

Eastern Rumelia: An autonomous province formed (1878) by the Congress of Berlin. It lies between the Balkan and the Rhodope ranges of mountains, in European Turkey, with Philippopolis as its capital. In 1886 the people drove out the governor appointed by the Sultan, and it has since been treated as a part of the principality of Bulgaria. The ABCFM has a station at Philippopolis. The Friends (England) also have a medical mission there.

Ebenezer (Natal): A town in the southern part of Natal, S. Africa; situated 85 miles S. W. of Durban. Population, about 1,500. Station of the Free Methodists of America (1899), with branches at Itembu and Edwaleni, which are near by, with (1902) 4 missionaries, men and women; 4 native workers, men and women; 2 day schools, and 70 professing Christians. Station also of the Swedish Holiness Band (1899), with 1 missionary and his wife, 1 school and 140 professing Christians.

Ebenezer (Transvaal): A settlement in the Transvaal Colony, S. Africa, situated about 25 miles S. W. of Rustenburg. Station of the Hermannsburg Missionary Society (1872), with (1901) 1 missionary and his wife, 6 native workers, 1 preaching place, 7 day schools and 1,626 professing Christians. Station also of the Hannover Lutheran Free Church (1897), with 1 missionary and his wife, 1 native worker, 1 school, and 100 professing Christians.

Ebenezer (Bengal): A town in the Santa Parganas, Bengal, India. Station of the Indian Home Mission to the Santals, with (1902) 4 missionaries, men and women; 32 native workers, men and women; 2 high schools, 1 printing house, and (in the whole field of Djinapur and Ebenezer) 11,000 professing Christians.

Ebenezer Wimmera: A station of the Moravian Mission in Victoria, Australia; established in 1859 and now (1900) having 1 missionary and his wife, 1 preaching place, 1 day school, and 11 professing Christians.

Ebon. See Marshall Island.

Ebon Language: One of the Micronesian family of languages, spoken by about 15,000 people in the Marshall Islands, and reduced to
THE ENCYCLOPEDIA OF MISSIONS
Edinburgh Medical

writing by missionaries, with use of the Roman letters.

EBUTE-META: A town at the mouth of the Ogun River, Gold Coast, West Africa, about 25 miles N. of Lagos. It has a congregation of the Lagos Native Pastorate Association, which was founded by fugitives from Abeokuta and is under the supervision of the CMS. It has (1902) 3 native workers, 2 schools, and 541 professing Christians.

EDADOR: A South American republic, lying, as its name implies, on either side of the equator. It is bounded by Colombia on the north, on the east by Brazil, on the south by Peru, and on the west by the Pacific Ocean. Boundary disputes with Colombia and Peru, which are still unsettled, render it impossible to define its exact limits. Its area is about 116,000 square miles. Much of the land consists of lofty plateaus. Descending from the snow-capped mountains a temperate climate is met with, which then increases to tropical warmth as the plains are reached. The rainfall, especially at the head waters of the Amazon and its tributaries, is excessive. Earthquakes frequently occur, and there are at least 16 volcanoes. The population, estimated at 1,400,000, includes pure-blooded Indians (30 per cent.), mixed races (30 per cent.) and whites of Spanish descent. The religion of the republic is Roman Catholic. Primary education is gratuitous and obligatory. There is only one railway in course of construction, but there are 1,200 miles of telegraph lines. "The new régime inaugurated some years ago is firmer than ever, after crushing out armed revolution organized by Protestant, introducing new reforms every year, despite the revolutions, and setting forward prosperity in the country." Until within a few years, all Bibles were kept out of the republic, except Latin Bibles owned individually by the priests.

The Department of Public Instruction established a series of Normal schools organized by a ME missionary and taught by Protestant teachers. Truly a brighter day is dawning in Ecuador.

EDA: A settlement on the Edca, or Sanaga, River, Kamerun, W. Africa, situated at Edca Falls, 40 miles from the mouth of the river and at the head of navigation on the Basal Missionary Society (1887), with (1903) 2 missionaries, 1 missionary's wife, 21 outstations, 20 native workers, 1 high school, 23 common schools, and 189 professing Christians.

EDENDALE: A town in Natal, S. Africa; situated about 12 miles S. of W. of Pietermaritzburg; station of the South African Wesleyan Missionary Society, with (1900) 50 native workers, 5 preaching centers, 5 common schools, a Young People's Society, and 700 professing Christians.

EDINA: A town in Liberia, W. Africa; situated at the mouth of the St. John's River near Buchanan. Circuit of the ME, with a small congregation and some few church members.

EDINBURGH MEDICAL MISSIONARY SOCIETY (1841): In 1841 the Rev. Peter Parker, M.D., of the ABCEM Mission in China, visited Edinburgh. Dr. Abercrombie was so interested by his accounts of medical missionary work that he invited a few friends to his home to hear Dr. Parker's story of his work and to consider the formation of an association in Edinburgh for the promotion of medical missions.

A public meeting was held on November 30, when the following resolution was adopted by the Society: "We being deeply sensible of the beneficial results which may be expected to arise from the labors of Christian medical men cooperating with missionaries in various parts of the world, thus giving intelligent proofs of the nature and practical operation of the spirit of love, which is the very center of our religion, we desire to see diffused amongst all nations, resolve to promote this object and to follow the leadings of Providence, by encouraging in every possible way the settlement of Christian medical men in foreign countries, and that for this purpose a society be best established for the relief of the 'Edinburgh Association for Sending Medical Aid to Foreign Countries.'" It was at the same time resolved that "the objects of the Association shall be to circulate information on the subject, to endeavor to originate and aid such kindred institutions as may be formed to prosecute the same work, and to render assistance at missionary stations to as many professional agents as the funds placed at its disposal will admit."

At the second annual meeting (November 28, 1843) it was resolved that the association should be designated "The Edinburgh Medical Missionary Society."

For the first year the income of the Society was only £114, and at the close of its first decade the annual income had never exceeded £300. Until 1851 the funds of the Society were mainly expended in diffusing medical missionary information.

Lectures on the subject of medical missions were delivered by several of the directors, and afterward were published and widely circulated; prizes were awarded for the best essays on the subject, and every available opportunity taken to advocate the claims of this new organization. From time to time grants of money for the purchase of medicines and instruments were made to the few medical missionaries then at work in the foreign colonies.

The Main Point Mission Dispensary, the first home medical mission in Great Britain, was opened by Dr. Handyside in November, 1853. This became, in 1861, the Edinburgh Medical Missionary Society's Training Institute. Prof. Miller, a memorial fund of above £2,000 was raised, and the house at 56 George Square, now known as the "Miller Memorial Medical Mission House," was purchased and made over to the Society as a residence for the superintendent and students. Medical Mission dispensaries were also opened in Glasgow, Aberdeen, Liverpool, London, etc., and are recognized as powerful auxiliaries to the work at home.

In 1877 the laying of the corner-stone of the Livingstone Memorial Medical Missionary Institution marked a new era in the history of the Society; the widespread efforts made to raise the funds for the erection of this building gave a great impulse to the cause of medical missions. Besides the work at home, the Society supports Medical Missions at Nazareth and Damascus, in Syria, and is now, for the purchase of instruments, etc. The Edinburgh Ladies' Auxiliary
was organized in 1846 to assist the Medical Missionary Society in its work.

Missionary societies in general are composed of at least two classes:
1. Dispensary and Medical Missionary Society, College, Philadelphia;
2. Nazareth Medical Missionary Society, College, Philadelphia;
3. Damascus Medical Mission, called the Victoria Hospital; 1 medical missionary, 1 assistant, and 3 nurses.
4. Agra Medical Missionary Training Institution, superintendent and 21 native medical missionaries and 3 nurses.
5. Hawthorne Convalescent Home, Edinburgh; 239 patients during year.

The organ of the Society is a Quarterly Paper, published on the first of February, May, August and November at Edinburg.

EDUCATION; Its Place in Missions: In the successful prosecution of foreign missions the need of education has come to be fully recognized. There may be differences of view as to its place and relative importance in the various fields, but the general attitude everywhere is in favor of education as to its usefulness and desirability in all fields. All societies organized for general missionary work keep constant in view as the great purpose of their existence the teaching of the Gospel. Educational, medical, literary and philanthropic work may conceivably be dispensed with; not so the educational endeavor for the conversion of the heathen. For this the disciples were commissioned by Christ; for these missionaries are commissioned.

But long experience, particularly in Oriental lands, proves that Christian education is not only a valuable adjunct or complement to evangelistic effort—it is itself a means of evangelism. First, it prepares the way for the Gospel by undermining the old systems, and showing (a) the falsity of much of the teachings of the heathen religions; (b) the groundlessness of their superstitions; (c) the immorality of many of their time-honored customs; and (d) the illogical and unphilosophical character of their explanations of the natural phenomena of the universe. Western science with its practical demonstration effectively clears the opening mind of the fallacies and follies of Oriental wisdom and prepares it for the reception of the fundamental truths of a faith which is not at war with science, philosophy, and reason. Thus, mental training and illumination may, and often does, prepare the way for the acceptance of the Christian faith.

Second, Christian education is indispensable to the highest type of Christianity. Men may have had saving faith in Christ while in a state of utter illiteracy and ignorance; but their influence as Christians will be narrow and their usefulness restricted and limited. They must have training in the various branches of learning to fit them to be exponents and propagators of Christianity in the various spheres of life. The Christian native should be prepared to meet and overthrow the objections of the heathen native to the religion of Christ and to give an answer to every man that asks a reason for the hope that is in him. For those who enter the ministry, or take up certain kinds of Christian work, a thorough education is very desirable, and it is most convenient, economical and satisfactory to give all of these classes this higher education in colleges and universities in their own country. They could get it, of course, in the older and stronger institutions of the United States and Europe, but at much greater cost and under circumstances so different from those under which they must live and labor as Christian preachers among their own people, that the missionary society generally does not encourage candidates for the ministry to go to the Western institutions.

Third, Christian education is necessary to fit men for business and professional positions in their own country. While the system of instruction provided by government in India, and latterly by government in Japan, and to some extent in China, is at least as well as the Western system of instruction, it is complete and thorough, it is purely secular, and aims to be impartial in its avoidance of religious topics. The churches of the United States believe that it is wise and necessary to have denominational institutions of higher education of equal grade with the best secular colleges and universities, that young men and young women may be under positive religious influences and teaching during the most impressionable periods of their lives; and this reason has special weight in countries where heathen and antichristian religions prevail. China, Japan, and other countries prepare men to take service under the government, and for professional and business pursuits. Most of them enter as heathen; many of them graduate as Christians. Their conversion is earnestly sought by members of the faculty, who never forget in their function as teachers their character as missionaries. It is due to these missionary colleges and universities that some of those high in the councils of government or distinguished in professional and business pursuits are Christians; while many others, who do not openly break with all old customs and ceremonies, carry with them a high respect for Christianity, and use every reasonable opportunity to advance the interests of the institutions in which they have been educated. Their attitude is in no case one of hostility, but of friendliness. The value of education of the Western type is so fully recognized in many Oriental countries by government that Christian institutions meet with little or no opposition from the constituted authorities. It is true that the schools and colleges in North China were desired by the government as a whole, but simply because they stirred the hatred which the fanatical and superstitions rioters had for all things foreign. The potent influence of education in ameliorating the condition of women in the East is an element of vast importance in the working out of the great purpose of Christian missionary societies. There the woman, as among the Indians of the American continent and the savages of Africa and the South seas, is regarded as an inferior being, degraded, oppressed, abused, secluded, so that the finer qualities of the sex are in a state of suppression, and moves in a restricted sphere. Education not only enlightens the mind of her lord and master, so that he perceives her true place in the household and in society, but it tends to free woman herself from the chains of superstition and ignorance and reveals to her a nobler and truer life, according to a larger and diviner plan than that to which she has been condemned by ancient idea, custom and usage. The educational institutions for girls are, therefore, quite as important in the working out of missionary purpose as are those for boys, and the growth
in the number of these schools and the pupils attending them is one of the most significant signs of missionary progress. For it is clearly recognized by missionaries in the countries of the Orient that in the devotion of the women is the strength of the idolatrous religions. They cling tenaciously to the tenets and customs and ceremonial formalities long after they may have become neglectful and indifferent; and it would be impossible to Christianize the masses without reaching the women. The women exercise large influence over the children, and indoctrinate the girls in particular in all the superstitions they themselves receive. The education of women is, therefore, a necessity in missionary enterprise.

Mission schools may be classified according to grade as collegiate, preparatory, elementary, kindergarten; according to nature of instruction given, as theological, biblical, medical or industrial. In grade the institutions range from kindergarten and elementary day schools to the boarding or high schools and seminaries and to the college and university.

Of the latter class Dr. Dennis, in his Centennial Survey of Foreign Missions, reports 94, of which nearly 12, are in China, including Ceylon and Burma, 13 in China, 9 in Japan, 1 in Korea, 8 in Africa, and the rest (22) in Australia, Canada, Madagascar, Persia, Syria, Turkey, South America and the West Indies. In these 94 institutions there were, at the beginning of the century, 35,539 scholars, all males except 2,099. In India, where higher education appears to have been most fully developed, nearly 26,000 of the total number are to be found. There are fewer in China, strange to say (1,514), than in Africa or Turkey.

Of the boarding and higher schools and seminaries in which preparation is made for the college or university, there are 879, with nearly 86,000 pupils. Of these, 406 are in India, 106 in China, 85 in Africa, and 40 in Japan, including Formosa. In this class of schools the feminine sex has more adequate representatives than in the higher grade institutions, numbering 34,714, as against 49,612 male scholars. It is interesting to note that in China and Ceylon, Japan, Mexico, Oceania, Persia, Palestine, Syria, Turkey, South America, and the West Indies, girls predominate numerically in these institutions. In India proper, the boys pupils outnumber the girls more than two to one; in Japan, the tables are turned and the girls are nearly three to one, while in Mexico the proportion is nearly ten to one.

Of theological or training schools, for preachers and Christian workers there are 375. India leads with 126, China comes next with 68, Africa, third with 59, Japan, fourth with 38. The rest are distributed over the other missionary countries of the world. In these institutions 11,765 persons are being trained, 8,284 males and 3,515 females, the latter predominating in number in Burma, Japan, Syria and Turkey.

Passing next to medical schools and schools for nurses we note that there are 67, with 651 pupils, of whom 230 are females. China takes the lead in the number of these institutions with 32, having 270 pupils, India coming second, with 191 pupils.

Of elementary or village schools there are 18,742, with 904,000 pupils, two-thirds being of the male sex. There are also 122 kindergartens, with 4,704 pupils.

It remains to note in this statistical survey, that there are 179 industrial training institutions and classes, in which 9,074 persons (of whom 2,352 are females) are being prepared for one or another branch of industrial life. Africa here takes the lead in the number of such institutions, the number being 1,100, with 4,305 pupils, while Asia has only 1,845 pupils.

The importance of industrial training in the Orient and in Africa and Oceania is more fully appreciated as Christian communities increase, because methods of living are attained, and as converts are shut out of lines of work on account of their change of religion and customs. These schools are intended to prepare persons of both sexes for employment where skill is required and for which remuneration may be commanded. The Industrial Mission Aid Society of London seeks to secure opportunities for those so trained to engage in productive labor.

To summarize: Missionary societies have, in all, 20,458 educational institutions of all kinds, with 1,051,466 scholars, of whom 332,980, or about one-third, are females. The significance of these figures may easily be overlooked. Compared with the immense population of the lands in which these institutions are found, they appear almost infinitesimal. But they certainly bear a fair proportion to the number of Christian communities. The solidarity of the heathen and non-Christian populations, aggregating, perhaps, two-thirds of the grand total of the inhabitants of the world, is immense,—an overwhelming fact. After a century, more or less, of endeavor in Asia, all that can be claimed is that a beginning, a most encouraging beginning, has been made in Chinese work, the extent of which cannot adequately be represented by mere numbers. The crumbling process is everywhere at work on heathen solidarity, and the attitude of the masses toward the old religions is by no means the same as it was a century or even a half century ago.

Moreover, the propaganda of education is a rapidly expanding propaganda. The oldest college in the mission field, that at Serampur, founded by Carey and called "The first Christian college in the East," dates back only to 1819. Of the 94 collegiate institutions reported at the close of the last century, only twelve were founded before 1850. In the third quarter that number was increased to 25, while in the last quarter 57 were established. Thus, sixty per cent. of these institutions were organized in the last twenty-five years of the century, and of these, twenty fall within the last decade.

Still more notable is the recent origin of the institutions of the preparatory class. By far the greater number have come into existence in the last quarter of the century, particularly in the last decade. Of kindergartens in the mission fields there are none that go back of the ninth decade; most of them sprang up in the tenth. The growth of the educational institutions in mission fields in the ten years ending in 1900 is one of the most remarkable developments in the modern missionary movement. It is all the more remarkable when it is remembered that it coincides with the multiplication of the hospitals, dispensaries, orphanages and other philanthropic agencies. It proves that those who are responsible for the shaping of missionary policy are convinced that education is an indispensable adjunct of evangelization.
The cost of the educational work of missionary societies is naturally a heavy charge upon their annual appropriations. The support of the missionaries who are charged with the responsibility of conducting it is provided usually in the annual budget, together with the wages of native leaders and workers, with the items of rent, insurance, repairs, furniture, etc. Pupils may be expected to pay their board, and in certain classes of schools, fees for tuition, books, etc. Endowments are not numerous; but individuals in the home churches, classes in Sunday schools, young people's meetings and other organizations often assume the support of a girl or boy while in school.

In India a government subsidy is given to schools of a certain grade on the basis of examinations conducted by representatives of the educational authorities of the State.

**EFAT, or VATE.** See New Hebrides.

**EFATESE LANGUAGE:** Belongs to the Melanesian family and is spoken with several dialects in the island of Efate in the New Hebrides. It was reduced to writing by Scotch Presbyterian missionaries and an effort has been made to combine dialects so as to provide the people with a single literary language. Roman letters are used in writing Efatese. It is also called Pate and Vate.

**EFULEN:** A settlement in Kamerun, W. Africa, situated east of the coast belt and 70 miles S. of E. of Great Batanga. Station of the PN (1893), with (1903) 2 missionaries (one a physician) and their wives, 3 native workers, 1 boarding school, 1 dispensary, 1 hospital and 150 professing Christians.

**EGEDE, Hans:** See Danish Missions.

**EGEDESMINDE:** An Eskimo settlement on the west coast of Greenland, situated on Disco Bay. Population about 1,200. Formerly a station of the Danish Missionary Society. The inhabitants being now professing Christians the place is under care of the Danish Church and is not considered as a missionary field.

**EGYPT:** Egypt proper extends from the Mediterranean on the north to Wady Halfa at the head of the lake Baris on the south, and from the Suez Canal and the Red Sea on the east to an indefinite line of desert on the west. Politically it includes also a strip of Arabia on the east of the Suez Canal, Nubia, and an uncertain section of the Sudan. By far the greater part of this territory is practically uninhabited, so that of the officially reported 400,000 square miles, not more than 13,000 square miles contain a population of (1897) 9,734,405, giving a density of population three times as great as that of France, and even greater than that of Belgium and Switzerland.

Of the population nearly 9,000,000 are Mohammedans and 25,000 are Jews. The Christians number 730,162. Of these, 608,000 are Copts, 53,500 belong to the Greek Church, 56,500 are Roman Catholics and the remainder are Armenians and Protestants, with a few unclassed individuals.

The language of Egypt is entirely Arabic. The Coptic, representing the old Egyptian hieroglyphs, has long been a dead language, existing only in the Scriptures and liturgies of the Coptic monasteries.

The climate of Egypt is in general very dry. Northerly winds prevail in summer and south-
ELAT: A settlement in the extreme south of the Alfred district, Natal, S. Africa. Station of the Hermannsburg Missionary Society (1870), with a missionary and his wife, a chapel and a school.

ELIOT (Natal): A settlement in the extreme south of the Alfred district, Natal, S. Africa. Station of the Hermannsburg Missionary Society (1870), with a missionary and his wife, a chapel and a school.

ELIOT (Transvaal): A town in the Zoutpansberg district, Transvaal Colony, S. Africa, situated about 210 miles N.E. by N. of Pretoria. Station of the Romande (French Switzerland) Missionary Society (1879), with (1902) 10 missionaries, men and women (including physician and hospital nurses); 12 native workers, 14 schools, 1 hospital, and 184 baptized Christians.

ELIOT, John: Born, 1604, in Nasing, Essex County, England. He had eminently godly parents, "by whom," to use his own words, his first years were "seasoned with the fear of God, the Word, and prayer." He was educated at the University of Cambridge, in 1623, where he acquired a thorough knowledge of the original languages; after a just course of liberal studies, had a partiality for philology, and was an acute grammarian. On leaving the university he became an usher in the grammar school of REV. Thomas Hooker. To his connection with the latter he traces his conviction. He resolved to enter the ministry, and, being exposed to the tyranny of Laud on account of his non-conformity, followed Hooker to America, with sixty others, in the ship "Lyon," which reached Boston November 3, 1631. Some of his brethren who contemplated going there had enlisted from him the promise that, if they came, he would be their pastor. On his arrival he supplied the place of Mr. Wilson, the pastor of the Boston church, then absent in England. In 1632 the brethren whom he had left came and settled in Roxbury. Mr. Eliot was installed as their pastor, continuing in that relation till his death, nearly sixty years. In 1639 he was appointed, with Welde and Mather, by the civil and ecclesiastical leaders of the colony to prepare a new version of the Psalms. This Psalter, issued in 1640, was the first book printed in America. The Psalms entitled "An American Psalm Book, Faithfully Translated for the Use, Edification, and Comfort of the Saints in Public and Private, Especially in New England. It was called The Bay Psalm Book, but afterward The New England Version of the Psalms. The book passed through twenty-one editions. Soon after Eliot was settled in Roxbury he became deeply interested in the Indians, and, the legislature having passed an act for the propagation of the Gospel among them, he resolved to learn their language that he might preach to them. Through a young Pequot, who had learned a little English and whom he had received into his family, he obtained some knowledge of their language. He soon became sufficiently familiar with its vocabulary and construction to translate the ten commandments, the Lord's Prayer, some texts of Scripture, and a few prayers. In October, 1646, he made his first visit, with three others, to their camp near the site of Brighton, on the border of Newton, and preached to them, assembled in the wigwam of Waban, their chief. The sermon ever preached in North America in a native tongue. The service continued three hours, the Indians asking many questions. Two weeks

Natal, about 65 miles N. W. of Durban. Station of the Hermannsburg Missionary Society (1856), with (1902) 1 missionary and his wife, 11 native workers, 12 places of worship, 6 schools and 223 professing Christians.

EHLOMOHLOMO: A station of the Hermannsburg Missionary Society (1862) among the Zulus in the Vryheid district of Natal. The work has been very much interrupted by the Transvaal war and statistics later than 1901 are not at hand. There were 1 missionary and his wife, 2 native workers, a chapel, a school and 175 professing Christians.

EKAMBA: Station of the Norwegian Missionary Society in Natal, S. Africa, about 40 miles east of Ladysmith.

EKOMBELA: A station of the Hermannsburg Missionary Society in the Vryheid district of Natal, situated about 5 miles N. E. of Luneburg. Founded in 1862. Has about 100 professing Christians in the center and outstations.

EUKHLENGENI: Station, at present (1902) without a missionary, of the Hermannsburg Missionary Society, in the Vryheid district of Natal; situated about 40 miles N. E. from Vryheid. Has about 350 professing Christians.

EKULALENI: Station of the Church of Sweden Mission in Natal, S. Africa, situated among the Zulus north of the Tugela River. It was founded in 1888 and in 1900 had 5 missionaries, men and women, and about 75 professing Christians.

EHWENDENI: Station of the UFS in the Central Africa Protectorate, west of Lake Nyasa and among the Angoni tribes. It was founded in 1882 and now has (1902) together with Njiju and other outstations, 2 missionaries, one of them a physician, 50 schools with 144 teachers, 2 organized churches with 773 members, and 1 dispensary.

EL ARAISH: A seaport town in Morocco, 45 miles S. S. W. of Tangier. Station of the Gospel Missionary Society (1893), with 3 missionaries. Station also of the North Africa Mission (1899), with 2 missionary women and 1 dispensary.

ELAT: A town in the Kameruns, W. Africa, 75 miles E. of Efelen. Station of the PN (1896), with (1902) 5 missionaries, men and women (one a physician); an organized church, a school and a hospital.

ELMA. See ONOKOLO.

ELPETH: One of the Bahama Islands, W. T., lying 200 miles E. of the coast of Florida, between Great Abaco on the N. W. and Cat Island on the S. E. Area, 132 square miles, population, 8,733. Station of the Wesleyan Methodist Missionary Society. At Governor's Harbor this Society has 1 male missionary, 22 native workers, 648 Christians in native Church, 4 church buildings, 4 Sunday schools, and at Rock Sound it has 2 male missionaries, 9 native workers, 2 outstations, 301 Christians in native churches, 4 church buildings, 4 Sunday schools, the SPG (1849) and the Baptist Society having the field, have over 800 communicants and are doing excellent work.

EL FUERTE. See FUERTE.

ELIM (Cape Colony): A town in Cape Colony, S. Africa, situated in the Bredasdorp district, about 50 miles S. W. of Swellendam. Station of the Moravian Missions (1824), with (1900) 6 missionaries, men and women; 31 native workers, men and women; 2 preaching places, 2 schools and about 600 professing Christians.
after he made a second visit, when an old warrior asked with tears if it was not too late for him to come to God. In another fortnight he made a third visit, and to them about what they had heard. Desiring to civilize as well as Christianize the Indians, Eliot had those to whom he had preached gathered into a community on the site of their old camping ground. This was about five miles west of Boston, and to it, at the suggestion of the English, they gave the name Nohantum, signifying rejecting. Eliot exerted great influence over them with rare tact and sagacity to encourage them to adopt the modes of civilized life. A simple civil administration was established, and in 1647 the General Court established a court, over which an English magistrate presided. With social and industrial regulations, they were trained with the aid of some native helpers in religious duties. These Indians received the appellation of "praying Indians."

Another place for religious meetings and instruction was Naponet, within the limits of Dedham, and about ten miles from Roxbury, and Eliot’s chief was the first sachen to whom Eliot preached. A sachen at Concord now induced his people to petition for a tract near the English, that they also might be instructed. Their request was granted, a teacher was given them, and religious services commenced. They adopted a code of rules regulating their civil and religious duties and their social comfort. In 1648 Mr. Eliot visited Pawtucket, 35 miles southward, where was a powerful chief. He and his two sons gave evidence of conversing and desired Mr. Eliot to live with and instruct them, offering him the choicest location. About this time came an earnest request from a chief living 60 miles from Roxbury, on the present site of Brookfield, that Mr. Eliot would come and teach his people. As the journey seemed too great a distance, Eliot took two of his friends and two of his men in his little sloop on the Merrimack, but was unable to pass, because of ten thousand warriors in the region where his life would be in danger, a sachem who was so closely guarded that no one could pass by without the council permission.

He set out on horseback. The exposure and fatigue severely taxed his strength. "I have not been dry, he says, "night or day from the third day of the week until the sixth, but so travel, and at night pull off my boots to wring my stockings, and on with them, and so continue. But God stepped in and helped." Not only did the sachems violently oppose him and persecute the praying Indians, but he had received no aid or credit from others. His own countrymen even aspermed him. It was declared both "in old and New England that the whole scheme was to make money, and that the conversion of the Indians was a fable." But despite the opposition of the sachems, the apathy of most of the English and the hostility of some, he pursued his work with heroic faith. In 1649 Christians in England were so stirred by the fame of his work that a society, entitled "The Society for the Propagation of the Gospel in New England," was formed and incorporated by Parlia-ment. Five thousand pounds were raised and sent throughout England and Wales, and the goods were sent. This Society sent Eliot £50 per annum to live at Roxbury. Eliot had long desired to have all his converts gathered in one settlement; the Indians favored the scheme, and the funds received from England made it practicable. A site was chosen on the Charles River, 18 miles from Boston. A tract of 6,000 acres was set apart and named Natick. All the praying Indians except one tribe were here gathered in 1650. The town was regularly laid out, a house lot assigned to each family, and a large building erected to serve for a church and school room. Eliot himself, and several others visited Natick, and were highly gratified. An Indian preached before the governor "with great devotion, gravity, decency, readiness, and affection," and a psalm lined by the Indian schoolmaster was sung "in one of our ordinary English tunes melodiously." A Catechism, an Indian Psalter, a Primer, and the Indian Grammar. At the end of the latter he wrote: "Prayers and psalms, through faith in Jesus Christ, will do anything." In English he published The Communion of Churches, The Glorious Prospect of the Gospel among the Indians, and other works. When, through age and infirmity, he was unable to preach or visit the Indians, he induced several families to send their negro servants to him once a week, that he might instruct them in Gospel truth. He died May 20, 1690, aged eighty-six.

ELITUBENI. See Rainy.

EL KSAR. See Ksar El Kerib.

ELLICE ISLANDS: A group of small islands, S. E. of the Gilbert Islands. There are eight islands and small groups of islets, with an area of fourteen square miles and about 2,400 inhabi-
ants. The LMS has worked this field with a number of native workers from Samoa, a missionary visiting them once or twice a year. This has not had entirely satisfactory results, and in 1901 a missionary was stationed at Beru, in the southeastern portion of the Gilbert Islands, who will give a closer supervision to the work in the Ellice group.

ELILCHPUR: A city in Berar, Central Provinces, India, situated 32 miles N. W. of Amroati. It was once a great city. Population (1801), 26,600, of whom 19,000 are Hindus and about 7,000 Muslims. Station of the Kurku Inland Mission (1889), with 6 missionaries, men and women.

ELLIS, William: Born August 20, 1794, in London. Studied at Gosport and Homerton. Having offered himself at the age of twenty as a missionary to the LMS and been accepted, he spent a few months in acquiring a knowledge of printing and bookbinding; was ordained November 8, 1815, at Kensington, and sailed January 23, 1816, for the South Seas. He labored for a while at the islands of Eimeo and Huahine, setting up in Tahiti the first printing press in the South Sea Islands. He left Huahine for the Sandwich Islands, February 24, 1822, in company with Messrs. Tyerman and Bennet, the Society's deputation, reaching Hawaii March 21; visited Oahu in April, and, because of the affinity of the Tahitian and Hawaiian languages, was able to preach to the Hawaiians with facility in two months after his arrival. Being requested by the king and chiefs to join the mission in the islands, and the American missionaries cordially concurring in the request, he returned to Huahine, and removed his family to Oahu, February 5, 1823. Before two years had elapsed, illness of his wife compelled Mr. Ellis's return to England. During five years he served the LMS by addressing meetings in behalf of missions, and afterward, during nine years, he was Foreign Secretary of the Society. While filling that important office he wrote his great work on Madagascar, which is one of the classics of missions. In 1832, seven years after he had resigned his office as Secretary, Mr. Ellis was again called to serve the LMS in 1835—this time by going to Madagascar in order to supervise the reopening of the LMS mission there. After several disappointments this was accomplished in 1838. Later, however, after he returned to England in 1865, retaining connection with the LMS until his death, June 9, 1872.

ELLIS (J. E.), Life of William Ellis, London, 1873.

ELLORE: A town of Madras, South India, in the Godavari district, 38 miles north of Masulipatam. Population (1891), 29,400, for the most part Hindus. Mission station of the CMS (1854) and of the CEZ (1881), with (1902) 4 missionaries, men and women; 1 high school, 76 common schools (of which 65 are under the district church), 202 Zenana pupils, and 4,240 native professing Christians.

ELMINA: A town a few miles west of Cape Coast Castle in the Gold Coast Colony, W. Africa. Station of the LMS, where, in path of many difficulties and much opposition, the church is in a healthy condition. It has (1903) 89 native workers, men and women; 40 outstations, 44 preaching places, 5 schools and 496 professing Christians.

ELUKOLWENIS: A town in Griqualand East, Cape Colony, S. Africa. Mission station of the Moravians (1875). It was at first dependent for instruction on the weekly visits made by the missionary stationed at Ezimeuka. It has now (1900) 50 workers, men and women, and 210 professing Christians.

EMAKOSIN: A town in the Vryheid district of Natal, S. Africa; situated about 20 miles N. W. of Vryheid. Station of the WMS, with 1 missionary and 12 native workers of both sexes.

EMERSON, John S.: Born at Chester, N. H., December 28, 1800; graduated at Dartmouth College 1826; graduated at Andover Theological Seminary 1830; sailed as a missionary of the ABCFM for the Sandwich Islands November 26, 1831, reaching Honolulu, May 17, 1832. He was stationed at Wailua, on Oahu. There he spent the whole of his missionary life except four years, 1842-46, when he was professor at Lahainaluna Seminary. While there he published, with the assistance of Messrs. Alexander and Bishop, and S. M. Kamakan, an English-Hawaiian Dictionary, and Webster's Abbreviation, a closely-printed volume of 184 pages, containing 16,000 words in English, with definitions in Hawaiian. He died in 1867.

EMFUNDISWE: A settlement in the northeastern part of Cape Colony; situated about 30 miles S. of Kokstad. Station of the South Africa Wesleyan Methodist Missionary Society, with (1900) 1 missionary, 43 native workers, 18 outstations, 10 places of worship, 14 schools and about 500 professing Christians. The Woman's Association of the WMS also has a high school here.

EMGWALI: A town in Cape Colony, S. Africa; situated about 25 miles E. by N. from Stutterheim and not far from the Great Kei River. Station of the UFS (1857), with (1903) 1 missionary and his wife, 2 missionary women, 13 native workers, men and women; 10 outstations, 7 schools, and 438 communicants.

EMKINDINI: A settlement in Natal, situated in Zululand not far from the Umfolosi River. Occupied in 1900 as a station of the Zululand Missionary diocese.

EMLALAZI: A settlement in the Weenen district of Natal. Station of the Hermannsburg Missionary Society (1858), with (1901) 1 missionary, 5 native workers, 3 preaching places and 186 professing Christians.

EMMAUS (Natal): A settlement in the Upper Tugela region of Natal, situated about 30 miles N. of W. from Estcourt. Station of the Berlin Missionary Society (1847), with (1903) 2 missionaries, 13 native workers, 2 outstations, 8 preaching places and 365 professing Christians.

EMMAUS (Transvaal): A settlement in the Transvaal Colony, S. Africa, situated about 10 miles N. E. of Lichtenburg Station of the Hermannsburg Missionary Society (1868), with (1901) 2 missionaries, 1 native worker, 2 preaching places and 1,150 professing Christians.

EMMAUS (West Indies): A station of the Moravian Missions in the northwestern part of the island of St. John, West Indies. It was established in 1782, and in 1900 had 1 missionary
and his wife, and 8 native workers, men and women.

**Eirudi**; A settlement in Natal, S. Africa, situated near Estcourt. Station of the Hermannsburg Missionary Society (1863), with (1902) 1 missionary and his wife, 11 native workers, 4 preaching places, 3 schools and a Christian community of 566.

**Emiomboni**; A settlement in Natal, S. Africa, situated on the Tugela River about 35 miles from its mouth and about 35 miles E. of Greytown. Station of the Hermannsburg Missionary Society (1897), with (1902) 1 missionary and 1 native worker.

**Emuremura**; A settlement in Southern Nigeria, W. Africa, situated on Cross River about 80 miles W. by N. of Duke Town. Station of the UFS (1889); at present (1903) unoccupied.

**Endwedwe**. See Indwedwe.

**Enfield**; A town in the Island of Jamaica, West Indies, situated about 18 miles E. by N. of Kingston. Station of the United Methodist Free Churches (1891), with (1902) 1 missionary and 6 native workers.

**Engchun**. See Yung-chun-chau.

**Engg**; John, born in Cadbrundsalden, Norway, October 3, 1833. Died May 3, 1900. He began life as a carpenter in Christiania, but after his conversion he gave up his trade and spent five years at the Norwegian Mission Training School in Christiania. In 1865 he went to Zululand, and in the following year he entered upon his work in Madagascar. After remaining about a year in the capital, he went to North Betsileo and settled down in Betafo, where he did his life-work. He was the founder of the Norwegian Mission at this place. His health having failed, he returned home in 1895; but after a rest of two years he returned to his chosen field, where he labored, without interruption, for ten years. When he finally returned to his native land there were in his district more than 12,000 Christians, members of 76 local churches, and about 75 schools, besides the 1,200 or more baptized Christians who had been taken away by death. All this was largely fruit won through Enggh's work. As he was the oldest of the missionaries he was called "Father Enggh," and among Christians of all names and by many of the Catholic saints he was greatly loved for his work's sake.

**England**; Presbyterian Church of. See Presbyterian Church of England.

**Engotini**; A settlement in Cape Colony, S. Africa, situated about 30 miles S.W. from Queens-town. Station of the Moravians. It was founded in 1859 in a circle of twelve heathen Fingo "kraals," where the missionaries soon gained influence. The present force (1903) consists of 2 missionaries and 15 native workers, men and women.

**Eon**; A village in Cape Colony, S. Africa, 37 miles N. of Port Elizabeth. Population, about 1,500. Station of the Moravians, founded in 1818. The present force (1903) is 1 missionary and his wife, with 5 native workers and 280 communicants. The adherents have been diminished by the "Ethiopian Church" movement.

**Entakamo**; Station of the Unsectarian Mission to the Zulu-Kaffirs, situated in Natal, S. Africa, on the Umzimkulu River, about 10 miles N. by W. of Stuart's Town.

**Entombe**; A settlement in the Wakkerstroom district of the Transvaal Colony, S. Africa; station of the Hermannsburg Missionary Society (1861), which had about 400 professing Christians before the Transvaal war, but of which later details are not now (1903) available.

**Entumeni**; A settlement in the northeastern part of Natal, S. Africa, situated near Pt. Chater and about 10 miles S. W. from Eshowe. Station of the Schreuder Norwegian Mission, with (1900) 5 missionaries, men and women; a high school, a training class for women workers and 202 professing Christians.

**Enyanisweni**; A settlement in the Transkei region of Cape Colony, S. Africa. Station of the South African Wesleyan Methodist Missionary Society, with (1900) 8 preaching places, 5 schools and 455 professing Christians.

**Enyanjadu**; A settlement in Natal; circuit of the South African Wesleyan Methodist Missionary Society, with (1900) 40 outstations and 850 professing Christians.

**Enyezane**; A settlement in the Kranzkop district of Natal, S. Africa. Station founded by the East Friesian Missionary Society in 1859 and at present carried on by the Hermannsburg Missionary Society, with (1902) 1 resident missionary.

**Enzincuka**; Settlement in Griqualand East, Cape Colony, S. Africa, situated about 15 miles N. W. from Mount Frere. Station of the Moravian Missions (1881), with (1902) 1 missionary and his wife, 2 preaching places, 2 schools and 340 professing Christians.

**Ephrata**; A settlement in the Mosquito Reservation, Central America. Station of the Moravian Mission (1860), with (1903) 1 missionary and his wife.

**Epi**. See New Hberides, Aip.

**Epworth**; A station of the WMS, near Salisbury, Rhodesia, Central Africa. There are about 500 people living here who are all nominally Christians. One missionary cares for the work and the native congregation in Salisbury.

**Erazvur**; A town on the east coast of Ceylon, situated about 10 miles N. W. of Batticaloa. Station of the WMS, with (1903) 1 missionary and 22 native workers.

**Eritrea**; A colony of Italy in Egypt with autonomous administration. It lies on the Red Sea and is bounded landward by the Egyptian Sudan, Abyssinia and French Somaliland. The coast line is about 640 miles. The area is 99,500 square miles; population about 450,000, of whom about 2,000 are European. There is a military railway from Massaua to Maital, 23 miles, and 319 miles of telegraph line. The Swedish National Missionary Society has 5 stations in Eritrea, with 17 missionaries, men and women, and 185 communing Christians.

**Ero**; A town in the Coimbatore District, Madras, India, situated on the Cauvery River, 36 miles S. W. of Salem. Population (1893) 12,300, of whom over 10,000 are Hindus. Station of the Leipzig Missionary Society (1888), with (1903) 1 missionary and his wife, 10 native
workers, men and women; 3 preaching places, 4 common schools, 1 high school, and 272 professing Christians. The Society lists give the name as Irod.

ERROMANGO. See New Hébridès.

ERUNGALUR. See Irungalur.

ERZERUM: Capital of the province of the same name in Asiatic Turkey and an important fortress, situated 110 miles S. E. of Trebizond and a little south of the western branch of the Euphrates River. It is an important station of caravans and a point of departure for the Persian provinces. It is a town of considerable importance, being a place of trade and a central point of communication. It has a population of about 10,000, of whom 7,000 are Mohammedans and the remainder Christians of different sects. Station of the ABCFM (1859), with (1902) 1 missionary and his wife (the wife being a physician). 2 missionary women, 35 native workers, men and women; 22 outstations, 16 preaching places, 28 common schools, 2 high schools and 350 evangelical Christian communicants. Many of the members of this church are emigrating in order to find security for life and property.

ERZINGAN: A city of Asiatic Turkey, 76 miles southwest of Erzerum. Situated on the Erzurum, in the midst of the mountains, it is an important military center and is noted for the energy of its people, both Turks and Armenians. An outstation of the ABCFM worked from Erzurum.

ESIDUMBINI: A settlement in Natal, S. Africa, about 35 miles N. E. of Durban. Station of the ABCFM (1849), with (1902) 1 missionary and his wife, 1 missionary woman and 10 native workers, men and women.

ESKIMO LANGUAGE: A branch of the North American family of languages which is found in the Arctic coasts of America. It is spoken in varying dialects in the northern inhabited regions of America, from Greenland to Alaska, and by a small section of the Arctic dwellers in Eastern Asia. It has been reduced to writing by missionaries and, in some cases, by the invention of syllabaries which better suit the nature of the language.

ES SALT: A town in Syria, lying east of the Jordan and 15 miles N. W. of Heshbon. Station of the CMS (1873), with 1 missionary and his wife, 7 native workers, men and women; 4 schools and 380 professing Christians.

ESPRITU SANTO. See New Hébridès.

ESSEQUIBO: A settlement near the mouth of the Essequibo River, British Guiana, S. America, about 15 miles N. of Queenstown. Station of the Wesleyan Methodist Church of the West Indies (Eastern Conference), with 1 missionary and his wife, 5 preaching places, 3 schools and 360 professing Christians.

ESTABLISHED CHURCH OF SCOTLAND; Foreign Missions of. See Scotland, Established Church of.

ESTACION CATORCE. See Catorce.

ESTCOURT: A town in Natal, S. Africa, situated about 55 miles N. W. of Pietermaritzburg. Outstation of the SPG.

ESTRIDGE: A Moravian Mission Station on the northern coast of the island of St. Kitts, West Indies. The station was opened in 1845 and has 19 native workers, with 1 preaching place, 1 school and 450 professing Christians.

ETAH: A town and district in the United Provinces, India, situated 75 miles S. W. of Bareilly. Population (1891) 7,500, of whom 5,000 are Hindus and nearly 2,000 Mohammedans. Station of the ME, with (1903) 18 native workers, 1 preaching place, 1 day school, and 1,340 professing Christians. Station also of the FN (1900), with (1903) 3 missionaries and their wives, 35 native workers, men and women; 25 outstations, 48 common schools, 1 high school, 1 evangelistic training class, 1 training class for women workers and 950 baptized Christians.

ETAWAI: A town in the United Provinces, India, on the Jumna River, 85 miles west of the junction of the Ganges and the Jumna. It is a pleasant place, very picturesque, and contains several buildings of importance. It is regarded as the healthiest town on the plains of India. The population is (1891) 38,500, of whom 26,000 are Hindus and about 11,000 Mohammedans. Station of the FN (1863), with 1 missionary, 1 missionary woman and 11 native workers.

ETEMBENI (Natal). See Itembeni.

ETEMBENI (Cape Colony): A town in the eastern part of Cape Colony, situated about 15 miles W. by S. of King Williams Town. Station of the Berlin Missionary Society (1863), with (1903) 1 missionary, 4 native workers, and 285 professing Christians. Station also of the South African Wesleyan Methodist Mission with (1900) 89 native workers, 38 schools and 1,520 professing Christians.

ETINAN: A settlement in the eastern part of the British Colony of South Nigeria, W. Africa, situated on the Kwo-Ibo (or Qua-Ibo) River, about 40 miles from its mouth. Station of the Qua-Ibo Mission (1898), with (1903) 1 missionary, 3 native workers and 2 outstations.

ETTAMANUR: A town in Travancore, S. India, situated about 30 miles to the eastward of Kotayam. An itinerancy of the CMS, superintended from Tiruvella, with (1902) 18 native workers, men and women, 7 outstations, 9 schools and 1,165 professing Christians.

EURASIAN: A term employed to denote the offspring of European and Asiatic parentage, without regard to the proportion of the mixture. Such children are, in most cases, illegitimate, and the not necessarily so, and too often try to imitate the bearing of the higher class while living in subordinate positions like lower class Asiatics. Frequently they exhibit the worst moral characteristics of both races. Physically they are well formed, lithe, graceful, and often beautiful, and show great dexterity in all that requires dexterity and delicacy of touch, such as is required in clerical work. They do not have strong constitutions and are particularly subject to pulmonary complaints. By reason of their parentage, the Eurasian girls are often neglected and sink in the social scale.

In recent years missions have found means of reaching numbers of Eurasians effectively in India and China, so as to help them make the most of whatever abilities their mixed blood has given them.

EVANGELICAL ALLIANCE, The: An association for the defense of religious liberty and promoting the unity of all believers in the essentials of Christianity and their cooperation for its progress. It sprang from the labors of some great exponents of the Christian faith in different lands
toward the close of the first half of the 19th century. Notable among these were Thomas Chalmers of Scotland, John Angell James of England, George Fische of France, Merle D'Aubigné of Switzerland, and William Patton, Samuel H. Cox, Lorenzo L. Wood, and others in the United States. In 1842 a meeting of the Congregational Union of England gave large consideration to the question of greater unity among the various denominations of Christendom. In that year also the Established Church of Scotland appointed a committee to report on the same matter. A celebrated letter, dated March, 1843, outlining such an organization, and asking that a meeting should be called in England to consider it, was written by Dr. William Patton, one of the founders of the Union Theological Seminary of New York, to John Angell James. The project made an important topic in the bicentenary of the Westminster Assembly held in Edinburgh, July, 1843. A conference of different denominations held in the Wesleyan Centenary Hall in February, 1845, also discussed the movement. John Henderson, a wealthy banker of Glasgow, collected, and in 1845 published, a volume entitled "Essays on Christian Union." A meeting preliminary to organization was held in Liverpool, October, 1845. At this meeting there assembled as many as two hundred ministers and laymen representing nearly twenty denominations.

A call was decided on for a great meeting to be held in the following year in London, and the provisional committee held its meeting in April, 1846. Several delegates were present from the United States. The meeting for organization assembled in the Freemasons' Hall in London, opening in August, 1846. Eight hundred delegates represented fifty denominations of Christians, and were in session fifteen days. It was in this meeting that John Angell James in an address gave to Dr. William Patton of New York the honor of first conceiving the idea of the alliance. A resolution was passed asking that branches of the Evangelical Alliance be formed in Great Britain and Ireland, United States, France, Belgium, French Switzerland and the Waldensian Valleys, North Germany, South Germany and German Switzerland, British North America and the West Indies, and additional branches from time to time.

Prominent among the subjects of discussion were sectarianism, infidelity, Popery, the Sabbath, and Christian education. There was great interest in this meeting among all the denominations and in the missionary centers of the world.

This organization has held a number of great ecumenical meetings, which have discussed the foremost questions of human thought and progress. Few religious conferences have engaged an interest so profound and widespread.

Branch national organizations have been formed in Scotland, Ireland, United States, Canada, New Brunswick, France, Switzerland, Germany, Holland, Denmark, Italy, Spain, Turkey, Greece, Syria, Egypt, South Africa, Japan, China, Persia, East Indies, West Indies, Palestine, Australia, New Zealand, Chile, and Mexico.

Besides the aid to the Christian faith throughout the world, the Evangelical Alliance has been most practically useful in averting and ameliorating persecutions and oppressions from time to time in various parts of the earth. By united action in the way of remonstrance and petition, and by creating a wholesome and strong public opinion, religious liberty has been promoted in many countries, especially in Spain, Italy, Austria, Sweden, Turkey, Russia, Japan, and Persia.

By emphasizing in statements of doctrine only essentials in which all are agreed, by collecting statistics which exhibit the religious condition and progress of the whole world, and by discovering the signs of the times in the discussion of advanced measures, these cooperating bodies have opened an ameliorating influence among widely differing churches, which results in better conformity of their denominational standards to the spirit of union and progress.

A few missionaries of different schools held a three days' meeting for prayer in Lodiana, India, in 1858, and the suggestion arose that a request be made to all the Christian world for an annual week of prayer. The Alliance soon published the call, and has ever since sent forth the program of topics to all Christendom, before the beginning of the year. Many are the revivals that have followed this annual call to prayer, now identified with the Alliance, which has for its motto "Unus corpus sumus in Christo." The organ of the Alliance is Evangelical Christendom, monthly. London.

**EVANGELICAL ASSOCIATION, Society of the:** The Society was organized in 1839. For ten years its efforts were confined to New York and Canada, but in 1850 work was begun in Germany and later in Switzerland. The first distinctively foreign mission field was Japan, where a station was established in 1876. A new mission in China has long been contemplated.

There are (1903) 600 missionaries in the United States and Canada; 121 in Germany and Switzerland. In Japan there are 6 American missionaries and 24 workers, 1 station, 39 outstations, 906 church members.

The Woman's Missionary Society of the Evangelical Association was reorganized in 1892 and is auxiliary to the Missionary Society of the Evangelical Association. It includes 11 Conference Branch Societies and 153 auxiliaries. It aids in all departments of the work and supports 2 missionaries.

**EVANGELICAL LUTHERAN CHURCH.** See Lutheran Church.

**EVANSDALE:** A settlement in the western part of Natal, S. Africa, situated about 10 miles S. W. of Dundee. Station of the South Africa Wesleyan Methodist Missionary Society.

**EWE LANGUAGE:** Belongs to the negro family and is spoken in Dahomey by an unknown number of people. It has been written with Roman letters. It has two known dialects, called Anlo and Popo.

**EZINCUKA.** See Ezincuka.
FAA: A parish in the extreme northwest of the island of Tahiti. Outstation of the Paris Evangelical Society, with 125 church members.

FAASALELEAGA: A settlement district on Savaii, Samoan Islands, Polynesia. Formerly occupied by the LMS as a station (1830); it is now (1902) the center of a Christian community of about 5,000, of whom 1,400 are church members. There are 90 native workers, 33 places of worship and 38 schools.

FAIRBANK, Samuel Bacon: Born in Stamford, Conn., December 14, 1822. He fitted for college at Monson, Mass., and in Jacksonville, Ill. Graduated from the Illinois College in 1842 and from Andover Theological Seminary in 1845. He went to India as a foreign missionary under the ABCFM in 1846, arriving at Bombay the same year. He was located at Madamagur for four years, when he removed to Bombay and took charge of the mission press there. In 1857 he went to Vadala, in the Bombay Presidency, which was his headquarters until 1869. When Dr. Fairbank reached the usual limit of active service he decided to remain in India and devote his time to translation and literary work. Dr. Fairbank's language was the Marathi, and in this language he did much for the literature of the Marathi-speaking people, especially in the line of hymnology. He prepared the first book of musical notation for Western India. He was exceedingly fond of nature and a great student of the flora of India. Probably he did more than any man of this generation to teach the Indian farmers with whom he came in contact in his missionary work wiser methods of agriculture. This brought him personally into direct spiritual relations with many whom otherwise he could not have reached. In his own district he was chief spiritual authority for many Hindus as well as for Christians. He died of heat apoplexy on May 31, 1898, having served in India 52 years. In 1856 he married Mary Ballantine, daughter of a missionary to India. Six of their children became missionaries in India and Ceylon.

FAIRFIELD: A town in the southwestern mountainous part of Jamaica, West Indies. Station of the Moravian Missions (1823), with (1902) 1 missionary and his wife, 25 native workers, men and women, and 600 professing Christians.

FAIRFORD: A settlement in Manitoba, Canada, situated on the N. E. shore of Manitoba Lake. Station of the CMS, with (1902) 1 missionary, 4 native workers, 4 schools and 150 professing Christians. All the Indians in this place have learned to read and write English.

FAIRVIEW: A town in the southern part of Natal, S. Africa, situated on the sea coast about 12 miles N. E. of North Shepstone. Station of the Free Methodist Church General Missionary Board (1891), with (1903) 6 missionaries, men and women; 7 native workers, men and women; 2 schools, 1 industrial school and 100 professing Christians.

FAIZABAD: A town in the United Provinces, India, on the Gogra River, 78 miles east of Lucknow; a comparatively modern place, the somewhat decayed in appearance. Population (1901) 75,085, Hindus, Muslims and Christians. Language, Hindi and Urdu. A large military station. Station of the CMS (1862), with (1902) 12 native workers, men and women; 2 schools and 192 professing Christians. Formerly station of the Zenana Bible and Medical Mission, which withdrew in 1902, transferring its work to the CMS. Station also of the WMS (1876), with (1903) 2 missionaries, 2 missionary women, 58 native workers, men and women; 3 preaching places, 2 outstations, 8 common schools, 1 high school, 1 industrial school and orphanage and 173 professing Christians.

FAIARDO: A town on the eastern extremity of the island of Porto Rico. Station of the American Missionary Association, with 1 missionary and his wife.

FA-KU-MEN: A town in Manchuria, China, situated about 50 miles N. of Mukden. Station of the Presbyterian Church of Ireland (1899), with (1900) 1 missionary, 18 native workers, 6 outstations, 1 boarding school and 225 professing Christians. Name also written Fa-ko-men.

FALASHA KARA: This language belongs to the Hamitic group of African languages, and is spoken by the Falasha Jews in the Kara district of Abyssinia. It is written with the Amharic characters.

FALASHA JEWS: These Jews live in Abyssinia, numbering about 200,000 souls. They occupy, according to Cust, the anomalous position of not being Semitic, either in blood or in speech. Mission work among them was commenced in 1858 by the London Society for the Promotion of Christianity among the Jews, and since that time more than 1,500 of them have been baptized.

FALEALILI: A district on the southern shore of Upolu, the most beautiful of the Samoan Islands. Station of the LMS (1836), with (1902) 1 missionary, 38 native workers, 31 preaching places, 31 schools and 4,926 professing Christians, of whom 1,248 are church members.

FALLANGA: A settlement town on the Lesser Ponga River, French Guinea, W. Africa. It was the starting point for the mission among the Susus by the West Indies Church Association, Barbados. The first white missionaries who visited those regions were killed by the slave dealers, and in 1818 the mission was abandoned. The next who tried succumbed to the climate; but colored missionaries from Codrington College, Barbados, who arrived at Falangia in 1856, had a fair success. The work is now carried on by the Pongas Mission in connection with the SPG.

FALLSCHER, Christian (of Germany): Forty-three years before his death, on February 11, 1901, Christian Fallacher went to Jerusalem to work under the late Bishop Gobat. Six years later he was sent by him to Nablus, as a lay preacher, and there he remained for thirty-seven years, first in connection with Bishop Gobat and later with the CMS. Through his agency a church, schools, mission house and house for the mission ladies were built, and a year before his death a firman was obtained which enabled the CMS to build a large and handsome hospital. In 1891 medical work was opened in Nablus and
ladies were sent to help in schools and hospital duties. He was loved and honored by Christian, Muslim and Jew, and by his patient endurance and unpretending piety his influence became potent and far-reaching. Notwithstanding his active evangelistic work among the people, he learned the difficult Arabic language, and by his perpetual intercourse with the natives he gained a clear insight into its idioms and intricacies. He was also able to markable degree, by the grace of God, to identify himself with the people among whom he lived, and in many legitimate ways to follow their customs. He learned, in the Christian sense of the term, to lay aside much of his own personality and by coming into close sympathy he was enabled to apprehend the Eastern point of view.

FAN-CHENG-HSIEN: A town in the province of Hu-pe, China, about 10 miles north of Hsiyang-fu. Station of the Hauges' Synod China Mission (1893), with (1900) 6 missionaries, men and women, of whom 2 are physicians; 8 native workers, men and women; 4 schools, 1 hospital, and 1080 converts. Station also of the Swedish Evangelical Mission Covenant of America (1890), with (1900) 7 missionaries, men and women. Name also written Fan-cheng.

FANTI LANGUAGE: Belongs to the negro group of African languages, and is spoken by some of the tribes in the Gold Coast Colony, W. Africa, being a dialect of the Ashanti allied to the Otishi dialect. It was reduced to writing by missionaries of the WMS, who made use of the Roman letters. The beginnings of a literature have been created.

FARAVOHITRA: The favorite European quarter of Antananarivo, capital of Madagascar. It is situated on the west bank of the rocky ridge on which the city is built, and was bare and desolate in 1868, when the LMS chose it for a center of work. A memorial church was erected here in 1870 on the spot where in 1849 Christians were burned alive for refusing to give up Christ. The LMS has (1902) connected with Faravohitra and in the district 1 missionary and his wife, 256 native workers, 30 common schools and 4,412 professing Christians.

FARIDPUR (Bengal): Chief town of a district of the same name in Bengal, India, situated on one of the delta outlets of the Ganges about 120 miles N. E. of Calcutta. Central station of the Faridpur Mission (1857), with (1900) 3 missionaries, men and women, one a physician; 3 native workers, 6 schools and 1 hospital. Outstation of the SPG, with 250 professing Christians. Name also written Fureedpore.

FARIDPUR (United Provinces): A village 15 miles S. E. of Bareli, United Provinces, India. Population (1901), 6,496, of whom about 2,500 are Hindus and 2,500 Mohammedans. Circuit of the ME, with 20 native workers, men and women, and 306 professing Christians.

FARM AMSTERDAM. See AMSTERDAM FARM.

FARRINGA: A settlement on the River Ponga in French Guinea. Station of the Pongas Mission.

FATÉ LANGUAGE. See EFA TSESE LANGUAGE.

FATEHGANJ WEST: A village in the United Provinces, India, situated 10 miles N. W. of Bareli. Circuit of the ME North India Mission, with 27 native workers, men and women; 1 preaching place, 8 day schools, and 725 professing Christians.

FATEHGAHR (Punjab): A town situated about 15 miles N.E. of Batala, Punjab, India, occupied (1903) as an outstation of Batala by the CEZ.

FATEHGAHR (United Provinces): A town in the United Provinces, India. Capital of the district of Farukhabad, adjoining the town of Farukhabad and situated 70 miles S. of Bareli. It was the scene of a massacre of about 200 Europeans during the mutiny of 1857, population about 12,000. Station of the PN (1844), with (1903) 10 missionaries, men and women; 53 native workers, men and women; 6 outstations, 5 preaching places, 16 day schools, 4 boarding schools, 1 theological training class, 1 orphanage, 4 organized churches and about 400 professing Christians.

FATEHPUR: A town in the United Provinces, India, situated 70 miles N.W. of Allahabad. Population (1891), 20,000, of whom 10,000 are Hindus and 9,000 Mohammedans. Station of the PN (1853), with (1903) 5 missionaries, men and women; 9 native workers, men and women; 1 chapel, 2 schools and 2 outstations.

FAT-SHAH: A manufacturing town and river port on the River Ganges, 0 miles S.W. of Canton, Kwangtung, China. A great part of the traffic on the three rivers which unite to form the Canton River passes through this place, and people from all parts of Kwangtung, Kwangsi and even Yunnan are met with. In former years the hatred of foreigners was great, and at any time preaching was likely to cause commotion and trouble. Population about 400,000. Station of the WMS, with (1903) 3 missionaries, of whom 2 are physicians; 7 native workers, 6 outstations, 3 preaching places, 1 day school, 1 hospital, and 115 professing Christians.

FAURES Smith: A town in the Orange River Colony, S. Africa, situated 65 miles S. E. of Kimberly; the Jagersfontein diamond fields are near this town. Population about 2,000. Station of the South African Wesleyan Methodist Missionary Society, with (1900) 23 native workers, 28 outstations, 3 preaching places, 2 day schools, and 414 professing Christians.

FAYUM: A large town of Central Egypt, in the oasis of that name. Population of town and oasis, 150,000. Mission district of the United Presbyterian Church of America.

FEN-CHAU-FU: A city in the province of Shan-si, China, situated on the plain, 60 miles S. W. of Tai-yuen-fu. Elevation, 3,000 feet. Temperate climate; lowest thermometer 50° F. A population of over a million is reached here, among whom are many Roman Catholics and a few Mohammedans, but the majority are followers of Confucius and Buddha. Station of the ABCFM (1887), which was broken up during the Boxer rising of 1900. Reopened in 1901, but the missionary has not yet (1903) 94 church members.

FENG-CHEN: A town in the province of Shan-si, China, situated 85 miles S. W. of Kalgan. It is a station of the CIM (1902), with 2 missionaries, 1 with his wife. It is also a station of the CA.

FENG-HSIANG-FU: A town in the western
part of the province of Shan-si, China. Station of the C.M. (1898); broken up by the Boxer rising in 1900. Now occupied (1903) by 1 missionary and his wife and 1 foreign assistant. The name is also written Feng-siang.

FENG-HWA-HSIEN: A town in the province of Che-kiang, China, situated about 15 miles S. W. of Ningpo. Station of the C.M. (1866), with (1903) 1 missionary and a number of professing Christians. The work suffered considerable disturbance during the Boxer rising of 1900. The name is also written Feng-hua.

FENG-HWANG-CHENG: A town in Manchuria, about 100 miles S. E. of Mukden. Station of the Danish Missionary Society (1899), with (1903) 2 missionaries, 1 missionary's wife, 1 dispensary, 3 professing Christians.

FENG-KANG: A town in the province of Kiang-si, China, situated about 25 miles E. by N. of Kan-chau-fu. Station of the C.M. (1891), which was broken up at the time of the Boxer rising in 1900, and now (1903) is still vacant.

FENG-TSIAH. See Feng-hsian-fu.

FERGHANA: A territory of Asiatic Russia, formerly Khokand, one of the Khanates of Western Turkestan. It is enclosed by lofty mountains, and is for the most part well watered and fertile. The climate is severe in winter, and in the valleys is very hot in summer. It is noted for its fruits and its silk manufactures. The population is (1897) 1,560,000, composed of Turks and Lamas. A Lamas League was forced to accept a Russian protectorate in 1868 and was annexed to Russia in 1876. It is one of the regions where no Protestant missionary enterprise is allowed.

FERNANDO PO: An African island lying in the Gulf of Guinea, off the Kamerun coast, forming with the islands of Elobey, Annobon, Corisco, and other small islands, a colony of Spain. The area of all is 950 square miles; population 23,709, mainly Bubi negroes (of Bantu race). The island of Fernando Po is volcanic. Fernando Po has served at various times as a base of operations for missionaries wishing to enter African countries. The Methodists Missionary Society now has 4 stations there, with about 280 native Christians. The Spanish laws throw many restrictions about the missionary enterprise.

FEROZEPORE. See Ferozpur.

FETISHISM: It is common for those who have a theory of evolution to support, extending to religions as well as to physical life, the assumption that fetishism is invariably the lowest step in the ladder of man's ascent to higher religious conceptions; that, beginning with this simple alphabet, the race has gradually advanced through more and more complex and elaborate systems toward Christianity, which is the goal of the religions of the world. It is in one sense flattering to the Christian faith, but, in another, it is utterly subversive of some of its most fundamental doctrines. It were better in approaching this subject to leave the theories aside for a time, and to deal with simple facts.

What is fetishism as it is found still surviving among savage tribes in our time? What are the objects of worship to which we apply the name of Fetish?

It would take a volume to name and describe the Zulu's superstitions and give account of his religious views and practices. His superstitions are well nigh numberless. If a turkey-buzzard lights near a kraal, something will happen. For one of these birds to be caught in a snare is a bad omen. The man who kills one of them is unlucky. If a cock crowed in the early hours of the night, none of the people or cattle will be sick or die. Feeding dogs on the beaks and claws of birds will make them fierce and swift for the chase. To wear the claws of birds or beasts or small horns of cattle about the neck will make a man courageous and give him strength. Bits of bark, roots, or bones suspended from the neck will protect a man against poison, lightning, or the designs of an enemy. In the virtues and uses of charms, amulets, love potions, incantations, the African has great faith. Throughout Africa the curiously endowed objects known to us as fetishes are found to be of great variety, embracing amulets and charms worn about the neck, and consisting of tiger's teeth, serpent's fangs, stones washed into unusual forms, curious shells, bits of wood carved in fantastic fashion, etc. In Asia a mummery of serpents, dragons, and Vedas, i.e., a transparent horn, or a poten verse of the Koran, or a line from the Avesta supposed to be powerful in driving away evil influences; in Africa a stone or rock of fantastic shape at the door of a hut, or a skull hung above its lintel; in America a totem raised on a scaffold by some Indian tribe—all these are virtually fetishes, since they are arbitrarily chosen objects to which is attached some supernatural power. As a rule they are not supposed to be divine in or of themselves, but rather to embody a divine influence of a mysterious and somewhat spiritual character.

The fundamental idea is that of an indwelling power that is concentrated and peculiar. This point may be illustrated by popular superstitions which still exist among civilized nations. The horseshoe has in itself no more efficacy than any other mass of iron, but in that particular form it is supposed to embody a lucky influence. Certain coins or rather sacred keepsakes, carried in the pockets or worn upon the person, are sometimes supposed to be attended by mysterious influence. No Indian tribe, no group of thirteen persons embodies any baneful influence, but there are many in civilized countries who fear the vague fatality of that total number seated at a table. In fact the number of objects, incidents, relationships, etc., to which is ascribed a sort of magic influence, by the people of all lands, is very great.

In North China and in various other countries certain uncanny animals, like the weasel, the fox, or the serpent, are supposed to be attended by baleful influence. Wherever found, fetishism gives opportunity to the witch-doctor or the diviner. This again opens the door to the most terrible cruelty, through the "smelling out," and the appeal to trial by ordeal inevitably leading to sacrifice of human life and legalized butcheries, as in Dahomey or other "ju-ju" centers of West Africa. In its mildest form the appeal to the witch-doctor may still be seen among the Kaffirs and Zulus in South Africa. If one of the family, as the father, is taken sick, a deputation is sent with a cow or other present to the imangha, or medical priest, to inquire what is the matter
and what is to be done. The priest accepts the present and retires with the deputation to some nook near by, asks them to smite the earth with their rods, and so arouse the spirits, that he may hear what they have to say. After a long series of these performances the priest always comes out armed with the sick man's goods and a well-deputation that the sick man has neglected his religious duties; that it is a long time since he has slaughtered an animal in honor and for the benefit of his ancestral shades; that the best cow must now be offered, so the anger of the gods will be appeased, and the sick man get well. The messengers carry the word back, the sick man accepts, prayers are offered, sins are confessed, the best cow is slaughtered, the blood and galls are sprinkled upon persons, houses, and premises, the beef is put away in a hut by itself for the night, and in the morning the people proceed to see that the divinities have been there, have tasted the meat, and are satisfied. The neighbors gather, the beef is roasted and consumed, and the hope is expressed that the sick man may recover soon. If so, all is well, and the feast is given for the mourners, and skill in finding out the cause and cure of the sickness; if not, the doctor is denounced as a great humbug; he has got their cow, but they have got no good. And now they go with another cow to another to jyjanga and go through the same process, until finally the man does either recover or die.

How have these ideas gained currency among men? If when found among civilized peoples popular superstitious notions are empirical, if they are the result of slow growth and an imaginary experience, as they certainly are, we may assume that fetishism among savage tribes has had a similar development. Men have chosen their fetishes as they have come to place their confidence in certain remedies for bodily ailments. A certain medicine may have been selected by mere fancy at first, but if in repeated instances the results were successively to follow, it gained currency. And so with the fetish. Indeed, many remedies are mere fetishes, and are given to drive away diseases which are supposed to be caused by evil spirits. Pharmacy and superstition go hand in hand among savage races. In the choice of magi or diviners both ideas there is supposed to be a connection between the objects chosen and the mysterious power of unseen spirits.

So far from fetishism representing always the first stage of religious development, and that only, it proceeds side by side with higher forms of religion and intermingle with them. Many of its objects supposed to represent supernatural power have sprung up long after the higher faith was entertained.

Fetishism abounds in China, India, Burma, and Ceylon, in spite of the teachings of Confucius and Gautama. It has really more practical influence with the people than all the so-called book religions of the East. A distinguished civilian of Ceylon has declared that nine-tenths of the inhabitants of that country are really not Buddhists at all, but are the devotees of various superstitious fancies. The staple of the popular religion is devil-worship, or the fear of evil spirits. And the whole paraphernalia and ritual by which their evil influences are warded off belong to the category of fetishism.

Fetishism is a wide-spread superstition known in China as Fung Shii is practical fetishism; it is a supposed mysterious and supernatural something, which inheres in certain objects, resides in certain localities, or hovers over the abodes of the living or the dead. It is a system of geomancy, and is especially related to the graves of the departed.

In South America there are 7,000,000 of people who still adhere more or less openly to the fetishisms of their forefathers. In almost all nations, that which is unusual—a river issuing from a cave, a tree growing in a peculiar shape, a rock which the waters have worn in grotesque form—certain deformities of the human body—is supposed to be attended by weird and preternatural influence. And the functions of witch-doctors, jugglers, medicine-men, etc., are supposed to be directed to the proper management of these occult forces. The choice of lucky days or fortunate sites for buildings is supposed to belong to their province. Of the same class were the haruspices of the Romans, who inspected the entrails of animals or observed the flights of birds in order to direct, and the movements of armies or plan successfull exploits.

The theory of Comte that fetishism was the awestruck recognition of divine influence in all natural objects was incorrect; else why should particular objects be chosen, why one stone or tree or stream more than another? That which makes a stone holy is the differential, which distinguishes it from other objects, and concentrates in it the divine and available power; this constitutes its value. It has been uniformly observed that one fetish differs from another in the degree of inherent efficacy. It may differ from another in the kind of utility which attends it, one accomplishing one good result, and another, another. Where the system becomes elaborate, each desirable object of attainment may have its fetish, by whose potency it is to be gained. One of these preternatural objects may avert a given disease, another secure victory over an enemy, another insure the birth of a son.

A little reflection will convince us that fetishism is one of the most wide-spread and permanent of all faiths, and that it coexists with every other. We have perhaps not yet understood why, but we shall find it still existing in the most civilized countries. Among the colored population of our Southern States it prevails to a surprising extent. In spite of the white man's influence, and that of the Church and school, the 'hoodoo' finds awe-stricken thousands to tremble before it. Fetishism is mixed up with the cure of diseases and the selection of times and seasons for entering upon any particular enterprise. It is at the foundation of the success of nostrums and quackeries, and manifold expedients supposed to be induced by the experience of others. Mankind everywhere find the forces of nature at their command, and the fact that these are little understood and always more or less involved in mystery, does not prevent constant experiment. In a sense and in a degree all are yet children groping their way amid occult forces and those who are most enlightened by science and most exalted in religious privilege may well sympathize with benighted tribes who are left to their gropings merely. Considering their condition, it is not strange that in the silence of nature they are startled by the rustling leaf or by any exceptional phenomenon that
arrests attention, and are only too ready with the help of fancy to clothe it with divine influence. It is not strange that when they hear the voice of the thunder, or the roar of the distant waterfall, or the soughing of the waves in some distant clime, or the sound of the oar on the shore, they are awe-struck. To them there is no need of enlightenment; there is nothing articulate or intelligible in the voices of nature which they hear, and they have learned no wisdom. Having no divine revelation, recognizing no Father above, and only a God down with vague and mystic names, they are ready for any deep resource. And when some designing rain-doctor or juggler, witnessing their bewilderment and affliction, proffers his aid to relieve from drought or pestilence or famine, they must trust him; tho he has failed a hundred times they have no option. The totem on the scaffold, the amulets about their necks, are equally dumb and have often failed; but they have no other resource. Generation after generation they grope on amid failures; and such is the imper-ative necessity that man shall put his trust in something beyond the range of his own powers, that, altho fetishism has for ages proved barren as Sahara, yet it still exists and must exist till the knowledge of God, the Father of all, and Jesus Christ, the only Saviour, shall be made known. Fetishism is something too serious to recognize with any pleasure. It is the most pathetic illustration of human ignorance and destitution. To one who knows that man is made in God's own image and destined to worship and enjoy Him forever, no spectacle can be more melancholy than to see him embra- cing with bootless and abortive faith a sensued amulet, a bleached bone, or a carved stick. As an appeal to missionary zeal, the fetishism of the world is pathetic and eloquent. It proclaims in strongest terms the desolation of a soul that was made to be a temple of the Holy Ghost, but is in fact worse than empty. As to the manner in which the missionary should approach those who are under the thrall of fetishism we may quote from the remarks of Rev. Dr. George Robson, of the United Free Church of Scotland, at the Ecumenical Conference of 1900:

The more one learns of these fetish religions, the more is the conviction deepened that they are not wholly inven- tion of wickedness and brutality and cruelty, and underfalse customs and practices in themselves utterly to be reprobated, there are to be found relics of truth, survivals of purposes and aspirations that, however misdirected, were originally pure. To some, it may seem as if the proper attitude of Christianity (over against these degraded religions) is one of simple antago- nism. . . . But this is not the manner of Christian science. A true apologist is here necessary for exhibiting the glory of Christianity as the final religion for all mankind; and to accomplish this in all directions is the function of the missionary enterprise. I venture to think that this department of missionary apologetics has been comparatively neglected, and that it is most desirable that it should receive immediate and systematic attention.

LITERATURE: Britton (D. G.), Religions of Prehistoric Peoples, New York, 1897; Lyall (A.), Natural Religion in 1871, London, 1901; Schulze ('F.), Fetishism, New York, India.

FEZ: A city in Morocco, situated at an altitude of 1,300 feet, 36 miles east by north of Mequinez. It is one of the three residences of the Sultan and is a very large and pleasant city. The tomb of its founder is a sanctuary for criminals of all kinds. It has a fine mosque. Station of the North Africa Mission (1888), with (1902) a mission- ary and his wife, 3 missionary women, 1 theological training class and a dispensary. It is also a station of the Gospel Mission Union (1894), with a missionary and his wife.

FIANARANTSOA: The capital of Betsileo, Madagascar, situated 190 miles S. of Antananarivo. Population about 10,000. It is the cen- ter of the work of the London Missionary Society in Betsileo province (1863), with (1902) 10 mis- sionaries, men and women; 425 native believers, and women; 46 Sunday schools, 138 catechistic schools, 2 boarding schools, 1 dispensary, 1 hospital and 1,450 church members. Also station of the Paris Evangelical Mission Society, to which in 1897 the LMS transferred one of the three districts of the town. It has (1902) 7 mis- sionaries, men and women; 30 schools, 1 theo- logical training class, 1 high school and 600 com- municants. Station also of the Norwegian Mis- sion.

FIFE BAY: A settlement on the southern coast of the eastern part of British New Guinea. Sta- tion of the LMS (1890), with 1 missionary and his wife and native workers.

FIHAONANA: town on Imerina, Madagascar, situated about 30 miles N. W. of Antananarivo. Station of the Paris Evangelical Society, transferred from the LMS in 1897. It now (1902) has one missionary and his wife, 1 missionary woman, 45 native workers, 20 day schools, an orphanage and 450 professing Christians.

FIJI ISLANDS: A group of islands in the Pacific Ocean, lying about 1,000 miles north of New Zealand and 300 miles east from the Samoan group on the northeast. In all there are more than 200 islands, of which about 80 are inhabited. Viti Levu, area 4,250 square miles, is the largest, and Vanua Levu, area 2,600, the next in size. Suva, the capital, is on the south coast of Viti Levu. Including Rotuma Island the total area of the group is about 8,045 square miles.

There is very little level country. The greater part of the islands consists of alternating hills and valleys, the peaks sometimes rising to the height of four or five thousand feet. The climate, the warm and somewhat enervating to Euro- peans, is not unhealthy. The supply of water is abundant, as there are numerous streams. Tropical vegetation grows here in great abundance and luxuriance:
The aborigines, or Fijians proper, are classed midway between the Malay and the Papuan, or negro, type of races. The name Fiji was formerly synonymous with every cruelty and abomination that savages are capable of. Cannibalism was indulged in, sick and aged relations were killed, widows were not allowed to survive the death of their husbands, and slaves were slain to accom- company their dead masters; yet hospitality and politeness characterized this savage race in a remarkable degree. The Fiji savages believed in a future existence, and in two classes of gods—one immortal (a large serpent was the chief god of this class), the other, the spirits of heroes and chiefs. The priest spoke the will of the gods who were not worshiped through idols. The women of the upper class enjoyed considerable freedom and property.

There is one prevailing language, Melanesian in its character, with several dialects. It has a large vocabulary, is strong in its expression and flexible in its forms.

Fiji presents a wonderful illustration of the power of the Gospel to transform the lives of the
most degraded and to turn an entire people to the worship and service of the living God.

The complete Old and New Testaments are in circulation in the islands; day schools and colleges are maintained, and 1,000 churches, with an attendance of 100,000, are keeping up the moral and social condition of the people.

In the Fiji Islands there are now (1901) 2,247 native preachers and 31,422 native church members, besides 10,107 candidates for membership. In Rotuma, a solitary island lying between Fiji and New Hebrides, but politically connected with Fiji, there are 35 native workers and 460 church members. These churches are the fruit of the labors of the WMS, but are no longer connected with that Society, being in ecclesiastical relations with the Wesleyan churches in Australia.

When first discovered Fiji had a population estimated at 200,000, but diseases imported by European colonists have caused great mortality. In 1901 the population numbered 117,870. Of these, 94,097 were Fijians, 21,026 were Indians and Polynesians and 2,447 Europeans. Of the non-European population 2,529 habitually attend the Wesleyan churches and 9,338 the churches of the Roman Catholic Mission.

Allen (W.), Rotuma (Australian Association for Advancement of Science), Sydney, 1895; Culever (T.), & Calver (J.), Fiji and the Fijians, London, 1858 and 1877; Cousins (G.), Story of the South Seas, London, 1894.

FIJIAN LANGUAGE: Belongs to the Melanesian family and is spoken by about 100,000 people in the Fiji Islands. It has several dialects considerably varying from each other. It was reduced to writing by missionaries of the WMS and is written with Roman letters.

FILE HILLS: A settlement in the eastern part of Assiniboia, Canada, situated about 60 miles N. E. of Regina. Station of the Presbyterian Church in Canada.

FINANCES OF MISSIONS: This is the application of modern and approved methods to the special and peculiar conditions surrounding the financial operations of Foreign Missions.

A successful system of accounting must take into consideration two facts: First, few missionaries are selected with a view to their knowledge of finances and accounting, and few sent to the field have any special adaptation to such work. Second, this work must be committed to those who have gone as missionaries with a far different purpose, and who are reluctant to allow anything to interfere with the primary object of their missionary life. It is at once apparent that a system of accounting must be sufficiently simple to be readily comprehended and so worked out in its details as to minimize the time required of the mission treasurer, both as to work on the books and on statements and correspondence necessarily involved. Sufficient analysis should be provided in the form of report to enable the home office to work out as far as possible the many items of detail necessary to a full comprehension of the work from the financial standpoint.

The missions organization in the past (and to a large extent the method is still in force) has had a treasurer for each mission and a treasurer for each station, the latter accounting to the former, who in turn accounted to the home treasurer. This has resulted in absorbing the energies of a large number of missionaries with but measurably satisfactory results. Improved postal and banking facilities in even the countries most remote make it possible to eliminate the station treasurer, enabling one man, with a small amount of clerical help, to oversee the accounting of an entire mission or of several contiguous missions. Faithful and intelligent accounting is essential to the proper adjustment of the entire fabric of mission effort in its correlated departments. This can be best attained by sending to the field trained accountants whose entire time shall be given to the duties of mission treasurer and financial agent.

Estimates, Appropriations and Grants: These are the basis of all disbursements. The estimates are prepared on the field by the mission, and are intended to cover in detail the estimated expense of the coming fiscal year. The estimates should embrace the following items:

Cost of given work for the current year.
Estimated cost of the same work for the ensuing year.
Amount needed for additional or new work.
Estimate of field receipts from medical fees, tuition, subscriptions, press receipts, etc.

The estimates should closely follow the analysis of disbursements, and may be properly classified as follows:

CLASS I.—MISSIONARIES ON FIELD.
Sub-Class A.—Salaries.
B.—Children.

CLASS II.—MISSIONARIES NOT ON FIELD.
Sub-Class A.—Home Allowance.
B.—Children.
C.—Wives (if in United States).
D.—Freight.
E.—Travel.

CLASS III.—NEW MISSIONARIES.

To be filled in.

New York.

CLASS IV.—EVANGELISTIC.
Sub-Class A.—Native Ministers.
B.—Licentiates.
C.—Bible Women.
D.—Other Helpers.
E.—Additional Schools.
F.—Itinerating.
G.—Any other Work.

CLASS IV.—EDUCATION.
Sub-Class A.—Boarding Schools.
B.—Day Schools.
C.—Colleges.
D.—Theological Seminaries.
E.—Other Schools or Work.

CLASS VI.—HOSPITALS AND DISPENSARIES.
Sub-Class A.—Assistants (Foreign and Native).
B.—Medicines, etc.
C.—Expenses.

CLASS VII.—PROPERTY (IN USE).
Sub-Class A.—Rent, including Missionaries' Houses.
B.—Taxes.
C.—Insurance.
D.—Repairs.
E.—Attendances.
F.—Lights and Heating.

CLASS VIII.—PROPERTY (NEW).
Sub-Class A.—Cost of Land.
B.—Cost of Building.
C.—Alterations and Additions.
D.—Title Expenses.
CLASS IX.—MISSION AND STATION EXPENSES.
Sub-Class A.—Mission Meetings.
B. — Books, Printing, etc.
C. — Stationery, Postage, etc.
D. — Medical Allowance.
E. — Students’ Stipends.
F. — Personal Teachers.

CLASS X.—MISSION PRESS.

All estimates excepting those for Classes I., II., and III. are properly made in native currency, and this requires careful consideration by the home office of the probable course of exchange to ascertain the equivalent in American currency of the amount asked for in the estimates.

The next step is a calculation by the Finance Committee of the probable amount of income available for the ensuing year. This can never be determined to a certainty. It depends upon the degree of spiritual interest, and the financial conditions prevailing.

An average of receipts for a decade, provided the conditions mentioned are favorable, is a safe basis for estimate. The amount of probable receipts being determined, an allotment, based on the mission stations, capable of extensive, direct allotment is termed “The Appropriations” (or Grants) for the ensuing year. When communicated to the missions, these are the authorization for the making of contracts and the planning of the work. They should not be changed during the year, save as larger receipts than expected warrant an increase where enlarged operations are demanded and justifiable.

Disbursements: The disbursements under appropriations or grants call for great care on the part of the mission treasurer. The accounts with each station should at the end of each month show whether any class of expenditure has exceeded the appropriation or grant. Some excess disbursements must be expected owing to unforeseen emergencies, but these are offset by a rule requiring a reconciliation to the general secretary of all savings. A voucher system should be used in connection with all disbursements. This is not only a safeguard to the treasurer, but facilitates a satisfactory audit. Mission field receipts cover receipts from all sources except the home treasurer. They include donations sent direct to workers on the field, fees from hospital patients and from personal services rendered by the medical missionary, and tuition and board in schools and colleges. Many institutions, owing to favorable conditions, are self-supporting, and unless so reported could be enlarged to a proportion unwise and unjust as related to other departments of the work. Disbursements under Class VIII. call for extreme care. The acquisition of new property and construction of new buildings should be limited to the real necessities of the work with a conservative outlook to future development. The difficulty of securing, in most cases, reliable estimates, the fluctuation in the prices of material and labor, make careful supervision on the part of the financial representative most essential. Periodically to inspect the progress of building operations and the amount disbursed should be made to the home office. Charges and credits are largely multiplied because of the removal of the work from the base of supplies. The missionary and his family, in many instances, must be clothed, and, to a considerable extent, that of American structures in Europe; schools and hospitals must be equipped with modern appliances and the dispensaries supplied with large supplies of drugs and medicines. To the original invoices must be added the cost of transportation, insurance, commission, etc. Shipments of this character contain goods for home ten thousand dollars or more, and therefore, it is therefore necessary that the field treasurer should accurately apportion the various charges among those interested in the proportion of the cubic displacement.

A banking system is the natural outgrowth of a large amount of foreign work. Direct and economical facilities for the transmission of funds are due the missionary and his friends. Certificates of credit can be purchased from the field treasurer, drawn on the home office for payments in Europe or America, and, on the other hand, friends in America can procure money orders payable on the field. By this method insurance premiums, payments for purchases and transmission of gifts can be facilitated. The method is simple, but calls for care and precision in accounting. The factor of exchange enters into all charges and credits, and is frequently a matter of some complication owing to the wide fluctuations of a depreciated paper currency in many of the countries, and the absence of banking facilities capable of furnishing reliable rates at the time needed. The average rate at which mission bills of exchange were sold during the previous month is a fair basis for adjustment in the succeeding month. Loss in exchange, resulting from the sale of bills of exchange for authorized work under the appropriations or grants, is properly chargeable to the home office unless an item has been included in the estimates for that purpose. Under certain exceptional conditions it may be desirable to make for some missions all appropriations or grants in gold. In 1902 the peso of one of the South American countries, which had been worth 25c. gold, fell to a value of 2c. In this case, unless special relief had been extended, the saving in exchange to the home treasury would have resulted in disaster to the classes of work for which appropriations or grants had been made in local currency. The serious consequences of a worthless or fluctuating currency having no support or appraisable value, is becoming apparent that many countries are considering the adoption of a currency on the gold basis, and when this becomes general a serious embarrassment in mission accounting will be overcome.

An item of no small importance is that of travel. The expenditure varies with the size of the mission board or society, the number of missionaries employed and the location of the missions and stations. This expenditure should be carefully safeguarded in order to avoid unnecessary cost whether from extravagance or inexperience. The home office should send out information and should require a careful accounting in detail of all expenditures, for its audit and approval.

Mission presses, colleges, schools, hospitals and dispensaries should be planned on a business basis, each keeping a full set of accounts. The annual balance sheet sent to the home office should show clearly all items of receipts and the sources from which derived. The disbursements should be classified, and separate schedules given covering the amount put into the plant, with a full inventory of stocks on hand for the year and the fiscal year. These statements are a safeguard against disproportionate expansion and
the unnecessary accumulation of unsalable stock.

Outfit and freight allowances are properly limited to actual necessity, in each case a maximum limit being fixed as a precaution. Outfit lists are revised annually, and expenditures permitted only for such items as are recommended in the lists.

Freight allowance is designated in measured tons, and necessitates careful measurement of all freight at the point of shipment, excess above the allowed being a personal charge. As payment of charges to destination is rarely possible, all charges should follow the freight to the field, such amount as covers the tonnage allowance being charged back to the home office.

Real Estate Property: The value of property held by the leading boards or societies amounts to many millions of dollars, and these values are constantly increasing. The amounts needed for the purchase of land, erection of buildings, improvements and extensions, are usually included in the annual appropriations or grants. The value or cost of property should be set up on the books of the home office so as to appear in the annual statement and balance sheet of the board or society. The showing of such a large amount of invested funds gives a credit in business transactions appreciated by the bankers of the world who purchase mission bills of exchange or drafts.

Careful attention to this matter naturally leads to an intelligent investigation of land titles. The tenure of much mission property is still uncertain and insecure. There has been a great improvement in this regard during the past decade, and it is well to take advantage of the liberal tendency now shown by most governments in this particular.

Reports of Receipts and Expenditures: The success and efficiency of a system of accounting depends in the last analysis on the reports made to the home office. These should be sent quarterly, and at the close of the fiscal year. The value of quarterly reports lies in the opportunity to correct errors and explain disputed or misunderstood items before the preparation of the annual report. These reports should show the following items:

1st. Receipts, being debit items.
   Balance, Cash on hand first of year.
   Balance Bills of Exchange or Drafts on hand first of year.
   Bills of Exchange or Drafts received from Home Treasurer.
   Drafts made upon Home Treasurer.
   Charges by Home Treasurer (monthly statements).
   Certificates of Credit issued.
   Receipts in the field: Contributions, Rent, Interest, Sales, Medical Fees, Press Presses, School Receipts.

2d. Disbursements, being credit items.
   Disbursements under Appropriations or Grants, by stations.
   Property Disbursements.
   Outfits.
   Freight.
   Advances for travel.
   Money Orders from Home Office.

Credits from Home Office.
Receipts on the field used in current work as authorized.
Balance of Cash on Hand.
Balance Bills of Exchange or Drafts on Hand.

The report should be accompanied by schedules giving in sufficient detail the items which in the quarterly or annual reports are given in totals. The annual report in every instance should bear the certificate of the mission auditing committee. With such reports in hand the home office can determine the balance of appropriations unexpended, the balance of cash or negotiable bills in the hands of the mission treasurers, and the sums needed to complete fully the work of the year. They also furnish a reliable basis for the compilation of an intelligent annual report for presentation to the home constituency of the board or society.

The annual report of a mission board or society is incomplete and unintelligible without the presentation of a balance sheet. This, if accompanied by sufficient explanatory schedules, will furnish a basis for a report that will incline the laymen of the churches and will create a degree of confidence in the management that is essential to the best success.

FINNISH MISSIONARY SOCIETY (1859) (Name in Finnish, Suomen Lähetysseura): Finland was the last northern land to become Christianized after a crusade of King Eric the Holy, of Sweden, under the Uppsala Bishop Henrik, in 1157. Through Michael Agricola, Paul Junsten and other Finnish clergymen, the Lutheran doctrine was spread, and the whole Finnish people became Lutheran Protestants in the 16th century, but not till two centuries had elapsed was there any missionary interest. In 1742 a carpenter named Nyberg met with some Moravians at Copenhagen, and later went to Herrnhut and was sent out under the Moravian Church to Särinam, where he died. During 1820-1830 a religious movement spread over all Finland, and many clergymen, especially in Osterbotlen, wished to follow the example of the motherland, Sweden, which in 1835 founded its first missionary society.

The most zealous of these was Jonas Lagus, who bought a house with the intention of opening a training school for missionaries, training being deemed an essential preliminary to good service. He asked permission of the government to found a missionary society, but all religious work not ordered in the ecclesiastical laws and manual was suspected and his request was refused. Later Lagus and other priests were summoned before the courts for placing collection boxes for missions before their doors. At this time Pastor Reinquist, of Sordavala, was also an earnest believer in missions, and was collecting funds, which he handed over to the Swedish Society. He also wrote books and pamphlets, which had much to do in keeping alive the missionary interest.

In 1857 it was proposed by the Bishops of Finland that a solemn feast should be held in commemoration of the introduction of Christianity. Proposals should be carefully prepared and revised by the societies. A petition, signed by 200 persons of all classes, was presented to the Imperial Senate of Finland, and II. approved, and ordered a jubilee on the eighteenth of June. All Finland was aroused and some young priests seized this propitious moment to propose the formation of a missionary society. A petition, signed by 200 persons of all classes, was presented to the Imperial Senate of Finland, and in 1858, and, after consulting with the Emperor Alexander II., the Senate gave its approval.
to the plan, and prescribed that the 16,000 Finnish marks ($3,200) given at the Jubilee feast should be turned over to the new society, and that in memory of this feast a collection for foreign missions should be taken on one Sunday in each year. Directors were chosen in Helsingfors for the new society, and in the same year the organization settled on a permanent basis. In 1851 a missionary depot was opened in Helsinki, and in 1853, at the Finnish Missionary Society’s meeting, the name "Finnish Missionary Society" was formally adopted. During the first years of its existence the society worked through the Finnish Missionary Society, the Gossner Missionary Society, and the Hermannsburg Society of Pastor Harns; and it maintained a missionary from 1861 to 1867 in connection with the Gossner mission in Chota Nagpur, India.

In 1860 the first Finn presented himself to be trained for foreign work, and the first two scholars, Jurvelin and Malmström, were sent to Hermannsburg. In 1862 a missionary training school was opened at Helsingfors, and nine young men were chosen for a six years’ course. The funds of the society had reached the sum of 147,000 marks, and missions to Ovamboland and to South Africa were seriously contemplated. That year Dr. Carl Hugo Hahn, a Rhenish missionary from South Africa, gave an account in Helsingfors of a journey he took to the Ovamboland and among the Hereros in what is now German South-west Africa. The Finnish people became deeply interested, and after he had made a second journey, in 1863, sent 1,200 marks to Hahn’s school for the education of native preachers among the Hereros. Two years later Hahn sent the society his journal account of a tour to Ovamboland, and in it a strong appeal that they undertake work in that region. Accordingly an extra meeting of the members of the society was held, and it was decided that in 1868 five of the mission scholars and three colonists should be sent to establish a mission in Ovamboland, arrangements being made with the Rhenish Society to divide the field. The Finnish missionaries remained for a time in the Rhenish Mission Institute in Barmen and at their stations among the Hereros that they might become accustomed to the climate and people, and study the language with Hahn in Oujag. The first Finnish missionaries were:—

**Missions: Ovambo Mission.** The Ovambo people inhabit the lands along the border between German Southwest Africa and the Portuguese Colony of Angola. The southern tribes of Ovamboland belong to the German Colony, while the northern are under Portuguese jurisdiction. The first Europeans to visit the country were Mr. Galton from England and Mr. Andersen from Sweden, who traveled in this region in 1851. Several exploring tours were subsequently made among the Ovambos by Dr. Hahn of the Rhenish Society, and in 1869, the first Finnish missionaries were sent out. At first they remained in Hereroland with Dr. Hahn, studying the Herero language, which is akin to the Ovambo, and learning from the veteran missionary the best methods of work. In 1872 the missionaries founded a station at Omundonga, receiving a cordial welcome from king and people. Four of their number remained here to carry on the work, while the others pushed on; and by the following year five stations had been established among four Ovambo tribes. In 1872 the residence of the Portuguese stirred up the native men against the mission and its helpers; and among the northern tribes, and during the succeeding years sickness and death decimated the working force, so that during 1878-1882 the Finnish Mission consisted of but three stations and four missionaries. The first convert of Ovamboland was a young girl whom one of the missionaries took to Finland, where she was baptized in 1876. Subsequently she returned to her native land, and in 1880 married a native chief. In 1880 four young men were converted and went to the Rhenish missionaries in Hereroland to be baptized, so as to escape the hostility of their own people. The first baptism in Ovamboland territory was in 1883, when nine young men were received into the Church. Two years later more converts were made in times of famine or sickness, when conjurers and sorcerers failed to provide remedies. In such times of trouble the people turned to the missionaries.

After the death of King Kambonda, in 1885, there were political disturbances threatened to break up the work. His immediate successor was friendly to the missionaries, but unfortunately he lived but a short time, and at his death the tribes under his jurisdiction were divided into two rival factions, which were at war for many years. In 1880 the number of these rival kingdoms, in which part of the mission stations were located, was friendly to the missionaries, and in 1888 the missionaries in the other section were compelled to flee, abandoning their stations. In 1889 an unsuccessful attempt was made to reopen one of the old stations; but sickness and death had so reduced the mission force that in 1890 there were but two workers in the field.

From 1890 to 1900 the tide turned in favor of the Christians. More missionaries were sent out to meet the increasing needs for Christian teaching. The chiefs, one by one, ceased their opposition; old stations were reopened and new ones established. The people began to manifest great confidence in the missionaries. The German occupation of the southern part of the Ovambo territory had greatly improved the political situation among the tribes. In 1903 work was resumed among the Oukumbi and Ongandjera tribes. A printing press has been established; the New Testament and part of the Old Testament has been printed, as well as other Christian books and tracts.

There are (1903) 5 stations, 15 outstations, 11 Finnish missionaries and 39 native helpers; 1,235 baptized Christians, of whom 455 are communicants, and 1,100 scholars in the various educational institutions.

2. CHINA: (1901): A station was established in 1901 in the northern part of the Province of Hunan, at the market town Chen-shu, a region previously untouched by the missionary. The Finnish missionaries who founded the station studied the language and peoples with the older missionaries at Hankow and Changteh. So far the Finnish Mission in China consists of this 1 station with (1903) 2 missionaries.

**FIROZABAD**: A town in the United Provinces, India, situated 20 miles E. of Agra. Population (1891), 15,300, of whom 9,500 are Hindus and 4,500 Mohammedans. Station circuit of the ME, with (1902) 8 native workers, men and women; 12 Sunday schools and 380 professing Christians.

**FIROZPUR**: A city in the Punjab, India, situated on the old high bank of the Sutlej River, 34 miles from its present bed and 47 miles S. S. E. of Lahore. It is capital of a populous district,
in which are hundreds of villages. The climate is regarded as generally healthful. The population (1891) 50,400, of whom 23,000 are Hindus and 22,000 Mohammedans. Station of the PN (1882), with (1903) 4 missionaries, men and women, one of them a physician; 2 dispensaries and 2 hospitals.

Fiske, Fidelia: Born at Shelburne, Mass., May 1, 1816; in 1831 was a pupil then teacher at Mt. Vernon Female Seminary with Miss Mary Lyon. She embarked March 1, 1843, for the Nestorian Mission of the ABCFM at Urmiya, Persia, in company with Mr. and Mrs. Perkins and Mar Yohannan (returning to Persia). Miss Fiske's work was in the girls' school, and it was upon this school that the impress of her consecrated life. Not only the pupils but the women of the neighborhood learned to look to the school and to Miss Fiske for deep, spiritual instruction. After laboring there 14 years impaired health compelled Miss Fiske to return to the United States in 1858.

She was usefully employed in the United States, giving addresses on missions and taking part in revival work at South Hadley. She died in Shelburne, Mass., July 26, 1864.

FLETCHERVILLE: A town in Griqualand East, Cape Colony, S. Africa. Station of the South African Wesleyan Methodist Missionary Society, with (1900) 23 native workers, 9 outstations, 4 preaching places, 7 day schools and about 300 professing Christians.

FLORIDA ISLAND. See SOLOMON ISLANDS.

FLORIDA ISLAND LANGUAGE: Belongs to the Melanesian family and is one of those purely local languages without affiliation to others which seem to be so numerous in the western Pacific. It is used by the people of Florida Island (see Solomon Is.) and has been reduced to writing by missionaries of the Melanesian Mission. Roman letters have been used for the purpose.

FLORIANOPOLIS: A town and capital of the Province of Santa Catarina, Brazil, South America; situated on the west side of the island of S. Catarina, 240 miles N. E. of Porto Alegre. Pop. (1882) 3,800, but (1901) much increased by immigration of Germans, Italians and Syrians. Station of the PN (1900), with (1901) 2 missionaries and their wives, 3 outstations, 1 Young People's Society and 35 professing Christians. Formerly called Desterro.

FOOCHOW. See Fu-Chau-Fu (Fo-kien).

FOREIGN CHRISTIAN MISSIONARY SOCIETY (Disciples of Christ; 1875): As early as 1849 foreign mission work was carried on by the Disciples of Christ, but the missionary society was not formally organized until 1875. According to the constitution the society is composed of life directors, life members, annual members, and representatives of churches, Sunday schools, Sunday school classes and missionary associations. Its officers are a President, five Vice-Presidents, a Recording Secretary, a Corresponding Secretary and a Treasurer, elected annually. These officers constitute an executive committee, and, with the life directors, a board of managers. The missions of the Society are as follows:

1. Scombaviva: The first intention of the new Society was to work only in distinctively heathen lands, but in 1876, a young Dane who had been converted in this country was, at his own request, sent to Denmark as a missionary. As he had opportunity he visited Norway and Sweden. At this beginning the work has grown to the extent where there are (1903) 13 stations, 5 ordained missionaries and 11 churches, with 659 communicants.

2. Turkey: In 1879 a young Armenian convert in America was sent to Turkey at his own request, locating at Constantinople. In 1901 there were 17 stations and outstations, 4 missionaries and 22 native helpers, 18 churches, with 1000 communicants. These results after twenty-one years of labor seemed to the Society "very meager and disappointing, and believing that Turkey as a foreign mission field is both limited and preoccupied," the executive committee recommended the Society to withdraw from the field as soon as practicable.

3. India: In 1882 work was begun in the Central Provinces of India with a station at Harda. In 1885 Bilaspur was occupied, Mungoli in 1887 and Damoh in 1895. Evangelistic tours are made through the outlying districts and educational, industrial and medical work is carried on. Much time has been devoted to famine relief. A boys' orphanage has been established at Damoh, where the inmates are trained to be self-supporting; boy carpenters, weavers, shoe makers, farmers, blacksmiths, etc., are doing much work for the mission. A leper asylum is carried on, the finances coming from the Mission to Lepers in India and the East. There are (1901) 4 stations and 6 outstations, 22 American missionaries and 84 native workers, 5 churches, with 411 communicants, 9 day schools, 1 orphanage; total under instruction, 1,542; 4 hospitals and dispensaries; native contributions, $127.68.

3. Japan: A mission in Japan was established in 1883. The first station was in the district of Akita. The work is chiefly evangelistic, the beginning has been made in educational work. There are (1901) 7 stations, 23 outstations, 13 American missionaries, 21 native workers, 13 churches, with 832 communicants, and 2 day schools.

4. China: Work was begun in China in 1884, and gradually extended until there are 5 principal stations where educational and medical work is carried on. Much evangelistic work is successfully done in the outlying districts. An important feature of the work is the distribution of Christian literature.

There are (1901) 5 stations and 11 outstations, 28 American missionaries and 51 trained Chinese native helpers, 8 churches, with 576 communicants; 2 boarding schools, 5 theological classes, 7 day schools, 4 hospitals and dispensaries.

5. Africa: A station has been established at Bolengi, on the Congo. There are 7 missionaries (two of whom are physicians), and a very promising beginning has been made in medical, educational and industrial work, while evangelistic tours are made into the surrounding country.

6. Philippine Islands: In 1900 work was begun in the Philippines, special grants being made for this purpose, and a station was established at Manila.

In Cuba a station has been established at Havana, where preaching services are held in English and Spanish, and Sunday schools and day schools have been established.

7. Hawaii: In the Hawaiian Islands work has been begun at Honolulu, in a district peopled by Hawaiians, Portuguese, Chinese and Japanese.
The purpose is to work through the local church rather than build up a separate work. Two new missions have been begun; Sunday schools and day and evening schools established.

This Society also conducts missionary work in England and has missionaries in readiness to press into Tibet when the way shall be open.

ORGN: Missionary Intelligencer, monthly Cincinnati, O.

FORMAN, Charles Williams. Died at Kussussi, India, August 27, 1894. Dr. Forman was native of Kentucky, a graduate of Princeton Theological Seminary, and at the time of his appointment as a missionary a member of the Ebenezer Presbytery. He sailed for India, August 11, 1847, as a missionary of the American Presbyterian Board (N), while its mission work in that vast empire was still in its infancy. In 1846, at the close of the first Sikh war, the mission had crossed the Sutlej and planted a station at Jalandhar, within the Punjab. Soon after Dr. Forman's arrival in India, the annexation of the Punjab by the British Government, and the favor of the Board of Administration, which included the two Lawrence, Henry and John, opened the way for the occupation of Lahore, the capital of the new province, and the late Rev. John Newton and Mr. Forman were appointed to the station. It was in and from this center of influence that Dr. Forman did his missionary work. That work was varied as necessity or opportunity required. It consisted mainly, perhaps, in the organizing and super-intending of a system of schools under mission control where the Word of God was habitually taught and from which thousands of young men have gone forth with at least an intellectual conviction as to the truth of Christianity, while it is believed that not a few have felt its regenerating power.

Dr. Forman was universally beloved. The devoutness of his spirit, the simplicity of his life, the strength of his character, the broadness of his views and sympathies, his indefatigable zeal, his grasp of the situation in India, and, above all, his interest in and affection for the natives of all classes, won for him the universal esteem. During the early part of his illness, when a rumor of his death was circulated, a notoriously antichristian newspaper published in Lahore devoted an editorial to the commendation of his life and work, stating that no foreigner has ever done so much for the Punjab as "Padri Forman Sahib."

FORMOSA: An island lying between latitude 21° 53' 30" north and latitude 25° 33' north, about 90 miles from the mainland of China, from which it is separated by the Straits of Formosa. Its total length from north to south is 235 miles, and its greatest width is about 80 miles. Through the Indian, but more easily than the western coast, runs a chain of mountains. The coasts are rocky and uninviting, with few good harbors. The climate is in general more salubrious than that of the opposite mainland.

The inhabitants are of three classes—the Japanese and the Chinese immigrants, the civilized aborigines, and the uncivilized ones. Some of the Chinese are from the Amoy district and some are Hakkas from Swatow. Those of the aborigines who have adopted in part the customs of the Chinese are called Pe-pa-hwan, while the untamed savages are called Che-hwan.

These aborigines are partly of the Malay stock, and are broken up into many tribes and clans. Physically they are of middle height, muscular and broad-chested, large eyes, round forehead, broad nose, and large mouth. Their language possesses no written characters, and there are many dialects. In the district of Fosia alone, eight different languages have been recognized. The social condition of the natives is very low. The entire population of the island, according to the census of 1898, is 2,705,905.

The island of Formosa was known to the Chinese at an early date. In 1480 emigration to it was recorded. In 1624 the Dutch built a fort, Zeelandia, at the place where now stands Taiwan, and their power was maintained for thirty-seven years. In 1682 the power of the Emperor Kang Hi was recognized, and Formosa formed a part of the Chinese Empire, the outbursts on the part of the aborigines were common until 1805, when it was ceded to Japan. The treaty of Tientsin, 1860, opened the island to European commerce, and Formosa tea is now found the world over.

With the cession of Formosa to Japan, the Japanese came to the island in large numbers. The officials show a sincere desire to maintain a righteous administration. A number of missionaries are now subject to the Japanese regulations.

The Presbyterians of Canada, under the consecrated labors of Mackay, accomplished much for the northern third of the island, and the Presbyterians of England have brought great blessings to the southwestern and central sections. Mr. Mackay, aided by a single foreign colleague and about 80 native assistants, gathered in his churches nearly 2,000 communicants, while his schools had in training 1,314 pupils, and Oxford College 43 students. An interesting feature of the situation is the presence of a number of evangelists sent by the Christian churches in Japan, and supported by them, to labor among Japanese in Formosa.

No missionary work has as yet been attempted among the wild savages of the eastern part of the island, the number of all classes having been recorded for him of 1824.

FORMOSAN LANGUAGE: The language of the aborigines of Formosa. It belongs to the Malayan family of languages. It was reduced to writing by a Dutch missionary in 1655, and has been written in Roman letters by English Presbyterian Missionaries.

FORSYTH, Nathaniel: The first missionary of the LMS to India. Of very few missionaries is so little known. In the last decade of the 17th century a certain landowner in Scotland named Holdane became fired with missionary zeal for the conversion of India, sold his magnificent estate, and proposed to devote his substance to this object, going himself and taking other workers with him. The British Government, however, could not tolerate any such schemes, and forbade the enterprise so persistently that the mission was abandoned.

One of the party, Mr. Forsyth, then offered himself to the LMS, was accepted, and went out to India as a missionary but without salary, supporting himself from his own property. He landed at Calcutta in the summer of 1798, while Carey was still in the despair of his fruitless Indigo culture. He promptly learned that he would be expelled from India if he stayed in
Calcutta. So he quietly went 25 miles up the river to the Dutch settlement of Chinsurah. Quietly, perseveringly, conscientiously, he did his work, attracting no attention from the world, and even left for 14 years by his society absolutely unsupported. He was indefatigable in his efforts, and supported himself. So he was not heeded until he died, when in 1813 another missionary was sent to take up his work. Chinsurah, with Hugli, now is a flourishing mission center of the UFS, and the name of the pioneer evangelist of that field should not be forgotten.

FORT AIJAL: A military post among the Lushai Hills in Southern Assam, British India. Station of the Welsh Calvinistic Methodist Missionary Society, with (1900) 2 missionaries.

FORT ALEXANDER: A settlement in the eastern part of Manitoba, Canada; situated at the entrance of Winnipeg River into the lake of the same name, and 65 miles N. E. of Winnipeg. Station of the CMS (1864).

FORTALEZA: A seaport on the northeast coast of Brazil, situated on a cliff overlooking the small bay which serves as its harbor. It is the capital of the province of Ceara. Population (1890), 41,000. Station of the PS (1882), with (1902) 4 missionaries, 2 native workers, 20 stations, 1 preaching place, 1 day school, 1 organized self-supporting church with 156 members. Also called Ceara.

FORT CHIPPEWYAN: A military post and settlement on the N. side of Athabasca Lake, Athabasca, Canada. Station of the CMS (1867), with (1902) 1 missionary and his wife, and 1 native woman worker.

FORT CHURCHILL: A station of the Hudson Bay Company, situated in the territory of Kewatin, Canada, at the mouth of Churchill River, in a region whose mean annual temperature is 14.2°. Station of the CMS (1886), with (1902) 1 missionary and his wife, 1 native worker, 1 day school, and 706 professing Christians.

FORT DAUPHIN: A town on the S. E. coast of Madagascar, which has a somewhat important trade in indigo rubber. Station of the United Norwegian Lutheran Church of America, with (1800) 14 missionaries, men and women; 2 native stations, 16 out-stations, 16 day schools, 3 high schools, and 100 professing Christians.

FORT GEORGE: Station of the Hudson Bay Company on the east side of James Bay, in the W. part of the Ungava peninsula, Labrador. Station of the CMS, with (1902) 1 missionary and his wife, 3 native workers, and 2 day schools.

FORT HARTA: A Government port among the Chin Hills in W. Burma, situated about 130 miles N. W. of Pakokku. Station of the ABMU (1899), with (1903) 3 missionaries, 1 a physician; 2 wives of missionaries, 4 native workers, and 2 schools.

FORT McLEOD: A town in Alberta, Canada, situated 92 miles S. by E. of Calgary, at an altitude of 2,800 feet. Station of the CMS (1880), with (1902) 1 missionary, 2 native workers, 2 schools and 80 professing Christians.

FORT MACPHERSON: A settlement in the northwest territory of Canada, situated on Peel River about 125 miles from its mouth in Mackenzie Bay. Station of the CMS, with (1902) 2 missionaries and their wives, 6 native workers, men and women; 1 day school, and 505 baptized Christians.

FORT NORMAN: A settlement in the northwest territory of Canada, situated on the Mackenzie River, at the juncture of the Great Bear River and about 60 miles W. of Great Bear Lake. Station of the CMS (1871), with (1902) 1 missionary and his wife, 2 native workers, 1 school and 200 professing Christians; all the people having abandoned heathenism.

FORT PADDIE: See PEDDIE.

FORT PITT: A settlement in the province of Saskatchewan, Canada, situated on the Saskatchewan River, about 90 miles N. W. of Battleford. Station of the CMS (1888), with (1902) 1 missionary and his wife (who is a physician), 1 school, a dispensary, and 253 professing Christians.

FORT SIMPSON (Canada): A settlement in the territory of Mackenzie, Canada, situated on the mouths of the Island and Mackenzie Rivers. Station of the CMS (1868), with (1902) 1 missionary and his wife.

FORT SIMPSON (British Columbia): A town at the N. end of the Tsimshian Peninsula, British Columbia, with a fine harbor. Station of the SPG, with 1 missionary.

FORT SMITH: See KEKHRUKO.

FORT VERMILLION: A trading post in the territory of Athabasca, Canada, situated on the right bank of Peace River. Station of the CMS (1876), with (1902) 1 missionary and 142 professing Christians.

FORT YUKON: A military station in Alaska, situated on the Arctic Circle, at the mouth of the Porcupine, on the Yukon River. Station of the P. E., with 1 missionary and his wife and 500 baptized Indians (Eskimos and Aleuts).

FOTUNA: See NEW HEBRIDES.

FRANCKE, Aug. Herm.: The missionary movement of Pietism, which arose in Germany during the 18th century, produced remarkable results. Baron von Leibnitz, a philosopher of world-wide fame, came forward at this time as a vigorous advocate of missions; and in his work entitled Novissima Sinica and in the charter of the constitution of the Berlin Academy of Sciences, he embodied his views of the subject. The book of Leibnitz came into the hands of Francke, who addressed the author a letter in reference to it. That letter is not extant; but we have the interesting answer which Leibnitz wrote, which shows his genuine interest in the cause of missions. The missionary ideas of Leibnitz bore fruit in Francke and helped toward the first missionary activity of Protestant Germany. "Pietism united itself with missions, and this union alone enabled missions to live." Indeed, Lutheran Pietism was the spring and support of missions; and Francke was the real leader in the matter. The a pious layman, Baron von Weltsa, in the 17th century tried to convince his fellow-Christians of their duty to send the Gospel to the heathen, it was not until the beginning of the 19th century, under the leadership of Zinzendorf, Francke and Spener, that a real impulse was given to this great cause; but within the space of thirty years, despite many difficulties, seven large missionary societies were founded. The pioneers...
of evangelical missions in India were sent out by Frederick IV. of Denmark. These were the pupils of Francke at Halle; and several of their successors were also Germans and Pietists.

FRANZENFONTEIN: A settlement in German Southwest Africa, about 200 miles N. by W. from Walvis Bay. Station of the Rhenish Missionary Society among the Herero-speaking tribes, with (1903) 1 missionary and his wife, 9 native workers, men and women; 4 day schools, and 400 professing Christians.

FRAUENVEREIN für Christliche Bildung des weiblichen Geschlechts im Morgenlande. See GERMANY; MISSIONARIES IN.

FRAZER, Edward: A negro slave born in Barbados, W. I., 1708. He was taught to read and write by his mistress, joined a Methodist Church in 1819 and was appointed missionary of the WMS to Dominica in 1828, his master giving him manumission that he might accept the appointment.

FREE BAPTISTS: General Conference of (1833): The Foreign Missionary Society of the Free Baptists was organized to do correspondence between Elder John Russel, leader of the Freewill Baptists, and Revs. James Pegg and Amos Sutton, two of the earliest missionaries sent to India by the General Baptists of England. Their letters were published in the *Morning Star*, and resulted in the formation of the Society in "the old meeting house" at North Parsonsfield, Maine, in 1832, and in January the new organization was incorporated under the laws of the State. In 1833, after three years, the income of the Society amounted to $2,600; with this sum they sent their first four missionaries to India, Mr. and Mrs. Noyes and Mr. and Mrs. Phillips sailing from Boston in September of that year, arriving in Calcutta after a voyage of one hundred and thirty-six days. They at once proceeded to Cuttack, a station of the General Baptist Society of England, where they remained while acquiring the language. In January, 1837, they established a station at Sambalpur, in the hill district of Orissa, but the location proving unhealthful, it was abandoned the following year, and early in 1838 the Baptists organized a station with headquarters at Bargarh, the northern district of Orissa. A station was established and the foundations of permanent missionary work were laid. From this beginning there has been steady growth. Much work is done among the Santals, and schools for them have been established throughout the jungle, taught by natives who have been trained in the mission schools. From 1848 to 1860 a school was sustained at Balasore for victims destined for human sacrifice who had been rescued by the British Government. In 1840 medical work was begun by Dr. Bache, who established a dispensary at Balasore. In 1862 this was transferred to Midnapur. That year a printing press was established, which has not only been self-supporting but of late years has contributed to other branches of the work. In 1865 Zennah school was begun. Schools have been established, orphanages opened, and Sunday schools and Christian Endeavor Societies organized. Book rooms are maintained, and special attention is paid to the circulation of Christian literature. From 1833 to 1892 the name Free Baptist Foreign Missionary Society was retained, but the latter year the title was changed to the General Conference of Free Baptists.

There are (1902) 14 principal stations and 31 missionaries, 12 churches with 561 communicants, 76 Sunday schools, with 3,463 scholars, 32 schools through all grades, with a grand total of 3,555 under instruction; total contributions 1,405 Rs. There were 90 missionaries; 1,405 Rs. for the work of the missionaries; was stationed at the General Missionary Society, organized in 1873, cooperates with the General Conference of Free Baptists. It has a separate organization, sends out and supports missionaries and teachers, especially for women and children, and establishes schools. The United Society of Free Baptist Young People, established in 1888, is auxiliary to the General Conference of Free Baptists.

Headquarters: Auburn, R.I.

FREE CHURCH OF SCOTLAND MISSIONS. See SCOTLAND; UNITED FREE CHURCH OF.

FREEMAN, John Edgar: Born in the City of New York, December 27, 1809; was apprenticed at the age of fifteen to a trade; in 1829 publicly professed his faith in Christ, and in the same year was ordained for study for the ministry. In 1837 he purchased the last year of his time for $80; graduated at Princeton College 1835, at Theological Seminary 1838; was ordained July 12, 1838, by Presbytery of Elizabethtown; sailed for India October 12 same year, as a missionary of Presbyterians Board of Foreign Missions; was married on reaching his port, having charge of orphan boys and girls until the death of Mrs. Freeman in 1849. In impaired health, he visited the United States April 28, 1850, with his two children. In 1851 he returned, with his second wife, and was stationed most of the time at Mainpuri for six years. In 1856 he removed to Fatehgah. At the breaking out of the mutiny he attempted with others to reach Allahabad for safety, but was made a prisoner by the Sepoys and put to death at Cawnpur by order of the rebel chief, Nana Sahib, June 13, 1857.

FREE METHODIST CHURCH. General Missionary Society (1885): In the latter part of 1880 the Rev. E. F. Ward and his wife went out as foreign missionaries, partly at their own expense and in part supported by the Free Methodist Church, and were recognized as its missionaries. Their going was the immediate cause of the formation of the General Missionary Society, which was incorporated in June, 1885. The organization consists of a president, secretary and treasurer; a board of five directors, meeting each month for the transaction of business; a general board of sixteen members, advisory to the board of directors, composed of the four general superintendents, who are ex officio members; the general secretary and treasurer; seven members, representing the missionary districts of the church, elected by the General Conference, and three women, representing the work of the Woman's General Foreign Missionary Society, and nominated by it, though elected by the General Conference. The missions of the Society are as follows:

1. Africa (1885): The first missionaries of the Society sent to Africa, Mr. and Mrs. R. R. Shemeld, arrived at Durban in June, 1885, and went inland to Estcourt, where they opened a mission which was continued for some years and then abandoned. The same year Messrs. Agnew and Kelley with their wives began a mission at Inhambane, on the southeast coast. The location is unhealthy and the mission has suffered from sick-
ness and death. In 1890 the work was extended to Natal and in 1897 to Johannesburg.

There are (1903) 6 stations and 5 outstations, 15 American missionaries and 30 native helpers, 4 churches with 235 communicants, and 4 day schools.

2. India (1885): The first workers to be sent to India were Misses M. L. Rauff and Julia Zimmerman; other missionaries have been sent out from time to time. Schools and orphanages have been established, and churches and Sunday schools organized.

There are (1903) 2 stations and 1 outstation, 9 American missionaries and 13 native workers, 1 church with 80 communicants, 2 schools and 2 orphanages.

3. Japan (1895): Work was commenced by a Young Japanese who had been educated in America. The special field has been the island of Awa, the 'some work has been done in Osaka, with the expectation of making it the headquarters of the mission.

There are (1903) 3 stations, 4 American missionaries and 6 native workers, and 2 churches with 51 communicants.

4. Norway (1892): Work was begun by three missionaries, but after a few years the mission was discontinued.

5. San Domingo: Work was begun here in 1893 and continued till 1899, when the field was abandoned.

Headquarters: 14-16 No. May St., Chicago, Ill.

FREETOWN: Capital of the British Colony of Sierra Leone, W. Africa. It is situated on the south side of the estuary of the Sierra Leone River. It is enclosed landward by encircling mountains. It has pure water and the climate is equable, but the town partly overlooks the marshes of Kroo Bay. It has a good harbor and is the greatest seaport in West Africa. The population is 34,500. The Europeans, half-castes, and immigrants occupy distinctive quarters of the town. The Church Missionary Society commenced its work in 1816, which is now conducted mainly in educational institutions, as a Sierra Leone native church has been organized. A college at Fourah Bay, two miles above Freetown, was built in 1840, and is the principal college in connection with the West African Mission. In 1876 it was reorganized and affiliated with Durham University. The native church withdrew finally from the CMS in 1889 so far as receiving aid from the parent society is concerned. It numbers (1902) 3,920 professing Christians. The CMS now (1902) has at Freetown 5 missionaries, men and women; 18 native workers, men and women (besides 16 in the native church); 752 professing Christians, and 4 schools. Freetown is also a station of the CA and the African Methodist Episcopal Church of the US, of which no statistics are issued. Station also of the WMS, with 9 missionaries and 66 native workers, men and women; also of the United Brethren (1854) with 7 missionaries, men and women, and 12 native workers; also of the United Methodist Free Church (1859), with 5 missionaries, men and women. These six societies maintain, besides the CMS College above named, 16 schools and (including the number given above) have connected with them about 11,000 professing Christians.

FRENCH CONGO: A colonial possession of France on the west coast of Africa, bounded on the north by the Kamerun and the Spanish colony of Cape San Juan, and on the east and south by the Congo River and the Congo Free State. The regions of Upper Ubangi, Bagirmi and Wadai, forming the northern section and reaching to Lake Chad and the Sudan, are recognized as a sphere of French influence. This recognition was established as a result of the failure of Marchand and the Fashoda expedition of 1898 to extend the French domination eastward to the Nile. An agreement was made by which the line between the French and English spheres of influence follows an irregular and unsurveyed boundary between the above-named districts and Darfur. The whole area is about 450,000 square miles, with a population estimated by the Stateman's Year Book at 8,000,000 to 15,000,000. The region, between the ocean and the Congo, and extending from 5° south latitude to 3° north latitude, consists of a series of terraces rising from the coast and skirted by chains of hills which vary from 1,000 to nearly 5,000 feet in height. It is well watered. The Kwili has a total course of 360 miles, the Ogowe 720, and the Gabun is an estuary 40 miles long and 7 broad. There are two rainy seasons, September to December and then, after an interval of weather, the rain sets in until May. During the hottest days in March and April the thermometer varies from 78° to 93° Fahr., and in the cool months of July and August 73° to 86° Fahr. The climate is insalubrious, both on account of its humidity and the poisonous exhalations from the morasses. The soil is sandy, and vegetation consequently not as rich as the abundance of moisture would lead one to expect.

The original inhabitants have been largely displaced by immigrants from the interior. The Mongwe, of the Gabun, the remnant of a once powerful nation, are intelligent but frivolous. The Benga or Corisco are related to the Bakale, south of the Ogoué. These are now traders, packmen, etc. The Bangwe dwell between the upper and lower course of the Ogoué. The Fangs, who occupy most of the region east of the Gabun and north of the Ogoué, form two groups constantly at war with each other. They are light-complexioned, muscular and vigorous, the most energetic and industrious of all tribes of the region. They practise cannibalism in the inland districts. Among the Ashango forests toward the Congo, the Abengo are shy and timid, of small stature, and dwell remote from the beaten tracks. The Balumbo, or Bovila, are largely runaway slaves from the Gabun and Congo factories who have found refuge in the inhospitable regions south of the Nyanga River. Of all varieties of the Bantu speech the Mongwe is the most widely diffused in the coast lands. It was reduced to writing by American missionaries. A mission was established by the ABCFM in Gabun in 1842 and transferred to the PN in 1871. The Paris Evangelical Society has two stations on the Ogoué River and the BMS has a station at Wathen, farther south. Roman Catholic missions are of considerable importance. Wadai and the northern regions are still largely unexplored and are Mohammedan, chiefly following the great Sheikh es Senoussi in doctrine.

FRENCH, Thomas Valpy: Born in 1825, in Holy Trinity, Heathcote, Burgh-on-Trent, Derbys, May 14, 1891. Educated at Rugby School under Dr. Arnold, and at
University College, Oxford. B. A., 1846; 1848, Latin Essay; Fellow; M.A. 1849. In September, 1850, went to Agra, North India, as principal of proposed St. John's College. In 1854 he conducted with Pфанder the famous public discussion with the Mullahs at Agra, which was the means of the conversion of Maulvis Imad-ud-din and Maulvī Safdar Ali. In 1862 he was appointed to the Derajat Mission. On December 20, 1877, he was consecrated in Westminster Abbey the first bishop of Lahore (jurisdiction, Punjab and Sind). Fourteenth bishop from the CMS ranks. Dr. French was always a pioneer. Four times he went to India to begin new agencies, and as a missionary his career may be divided thus: (1) as founder and principal of St. John's College, Agra, 1850-58; (2) as founder and leader of the Derajat Mission, 1861-63; (3) as founder and principal of the Lahore Divinity School, 1869-74. In all three enterprises he did most important service. Dr. French was a great missionary to Mohammedans, and through his influence not a few were brought to a knowledge of salvation by Christ. It was by the nation which Thaply called the "Seven-Tongued Man," because he could preach in the English, Urdu, Hindi, Punjabi, Persian, Pushtu and the Arabic. Besides this remarkable linguistic knowledge, he could use in teaching, if not in preaching, the Latin, Greek, Hebrew, Sanskrit and German languages. He was the author of a number of able works and published several volumes of sermons. In 1887 he resigned his see, and in the 40th year of his missionary service he went to Maccot to found a new mission that might, he hoped, reach the hearts of the people of neglected Arabia. But his worn body was not equal to the strain of that trying climate and at Maccaot his labors came to an end. Birks (H.), Thomas Valpy French, 2 vols., London, 1895.

FRENCH SWITZERLAND; Missions of. See Switzerland.

FREERTOWN: A village in British East Africa situated 2 miles N. E. of Mombasa, on the eastern side of the inlet which separates Mombasa from the mainland. It is also known as the native name of Kisauani Station of the CMS (1874), with (1902) 11 missionaries, men and women; 15 native workers, men and women; 1 day school, 1 high school, 1 theological class and 598 professing Christians.

FRIEDENSTHAL: Mission Station of the Moravians in the western part of the island of St. Croix, West Indies. It was begun in 1721, in order to reach the large number of slaves on the surrounding plantations. The mission house stands on a hill in the outskirts of Fredericksbott. There are now at this station (1902) a missionary and his wife, with 12 native workers, men and women, and 158 Christians.

FRIEDENSTHAL: Mission Station of the Moravians situated near center of the island. It has the only country church in St. Croix, all the others being in the towns of Christiansted and Fredericksbott, which are fifteen miles apart. Station of the Moravian Missions (1804), with (1899) 361 professing Christians.

FRIEDENSFELD: A town on St. Croix Island, W. I., situated near the center of the island. It has the only country church in St. Croix, all the others being in the towns of Christiansted and Fredericksbott, which are fifteen miles apart. Station of the Moravian Missions (1804), with (1899) 301 professing Christians.

FRIENDLY ISLANDS. See Tonga Islands.

FRIENDS' (AMERICAN) Board of Foreign Missions. See American Friends, etc.

FRIENDS' FOREIGN MISSIONARY ASSOCIATION (England, 1865). The subject of foreign missions was brought before the central yearly meeting of the Society of Friends in England for the first time in 1835, at its meeting in London, and was seriously considered. From this time the matter was never lost to sight; in 1859 the interest was increased by George Richardson of Newcastle, who wrote to his fellow-members urging them to concerted effort for the salvation of the heathen. Stirred to action by this appeal, in 1861 an address was issued by the central governing body of the Society, calling on all its members to aid the cause of missions, and this idea of a mission was placed in that form known as the "Ellis, LMS missionary in Madagascar. This, led, in 1865; to the formation of a provisional committee to promote the cause of missions among English Friends, the nucleus of the present Friends' Foreign Missionary Association. All annual subscribers are members of the association, which is governed by a board appointed annually by the meeting of members. This board appoints the treasurer and secretaries and has power to delegate any portion of its business to the care of committees from its members. Missionary work is carried on in India, Madagascar, Syria, China and Ceylon.

1. India (1866): The first missionary of the newly formed association was Rachel Metcalf, who went to India to assist Mrs. Leupold of the CMS in an industrial school at Benares. In 1869 Elkanah and Irene Beard of America were sent out, and a separate station was opened, first at Benares, but removed to Jabalpur in 1870, where it remained till 1874. It was then permanently located at Hoshangabad, the center of a large district in the Nerbada Valley, with a population of three or four millions, then unreached by Christianity. In 1871 the work was extended to Sohagpur. The next years were spent in laying the foundations of various lines of work. Evangelistic tours were made in the outlying districts; schools were opened, orphanages established for both girls and boys, an orphan industrial system started and many auxiliary work begun. In 1890 two new stations were opened at Sioni Malwa, and Sihowe in Bhopal. In 1892 industrial works were established at Rasulia, Hoshangabad, with funds contributed especially for this purpose; this work has been continued with only occasional aid from the FFMA. In 1893 the Itarsi station was opened and in 1898 Bankheri was occupied by the Society. There are (1903) 6 stations and 10 outstations, 34 missionaries, 42 native workers, 6 churches, with 379 members, 4 boarding and high schools with 748 students; 24 other schools, with 1,203 pupils, 5 hospitals and dispensaries.

2. Madagascar (1867): In the same year (1866) that Rachel Metcalf went to India, two American Friends, Louis and Sarah Street, and James S. Sewall, of Hitchin, England, interested...
in the mission work by the addresses of Dr. Ellis, offered themselves for service in Madagascar, where they arrived in 1867, just at that juncture when the adoption of the Christian religion by that province was given consideration to districts, and the care of the Ambhotantely church devolved upon the Friends. The area of the entire allotted mission district was 2,000 square miles, and when first taken in charge by J. S. Sewall, in 1868, contained 6 chapels, a number which was increased in 1872 to 62 congregations with 37 schools. At Antananarivo the Society established a boys' high school in the Ambohitovove quarter, and one for girls in the Farahovitra quarter. In 1872 a printing office was started, which issues a monthly magazine for adults and one for children, and where the natives are taught printing and lettering, etc. In 1880 the Society joined with the LMS in carrying on a hospital and medical mission at Anakelye. In 1888 stations were opened at Arivonimamo and Mandrindro, in 1893 at Ambonimbianda and in 1897 at Amboniriana. In accordance with the regulations of the French Government the teaching of carpentry and agriculture has been added to the curriculum of the boys' high school at Antananarivo, thus entitling it to substantial government grants. The schools in and about Antananarivo (Ambohitovove, Farahovitra, etc.) are described in the FFMA reports under the French name of the capital, Tananarive. There are in Madagascar (1903) 5 stations, 23 missions, 830 native workers, 185 churches, with 2,482 members, 8 boarding and high schools, with 1304 students, 21 other schools, with 11,254 pupils, 2 hospitals and dispensaries.

3. Syria (Commenced independently 1869, organized, 1874, under the name "Friends Syrian Mission:" transferred to the FFMA 1898): Meetings held by Eli and Sybil Jones in Syria and Palestine led to further mission work, which was established by them at Ramallah, Jaffa and Ramleh, and continued at their expense until 1874, when the Friends Syrian Mission Committee assumed their support. The following year a training home for boys and an industrial school were opened for girls, another school being established, mainly with funds raised by the New England Friends' Committee. The Ramallah mission has a school for boys, another for girls, a cottage hospital and a dispensary. In 1898 this mission was transferred to the New England Committee in return for their share in the Brumana mission. In 1898 the entire work of the Friends Syrian Mission Committee was amalgamated with the FFMA. Schools have been established in the outlying villages; tuition was at first free, but in 1902 the principle of having the children pay a small fee was made general in all schools and was considered a success. Educational, industrial and medical work is carried on and many evangelistic tours are made; Bible women also make house-to-house appointments.

There are (1903) 1 station, 10 outstations, 13 missionaries, 47 native workers, 1 church, with 35 members, 2 boarding schools, with 109 students, 16 other schools, with 1,204 pupils, and 3 hospitals and dispensaries.

4. China (1866): The first station of the Society was opened at Han-chung by Robert J. and Mary (nee Davis) Swanton, on the Yang-tze. Shantung Province, was occupied, and in 1900 another station was opened by the Society Tung-chwan-fu in the same province. Schools for boys and for girls have been established; village schools, a Bible school for women and a school for training native helpers have been organised. Medical work is carried on at Tung-chwan-fu and a vigorous evangelistic campaign is organized in each station. Street chapel preaching meets with success, and many tracts and copies of the Scriptures are sold and distributed.

There are (1903) 2 stations, 12 outstations, 18 missionaries, 24 native workers, 2 churches, with 36 members, 2 boarding schools, with 36 students, 4 other schools, with 169 pupils and 1 dispensary.

5. Ceylon (1896): Work is carried on in the district around Matale (Clodagh) in the hill country north of Kandy, and in the district around Mirigama, in the low country, within forty miles from Colombo, the missionary in charge residing for the present in Colombo.

Work was begun at Matale in 1896 by Joseph and Frances J. Malcolmson. Both the Sinhalese and Tamil languages are used. In the Matale district itinerating evangelistic work is carried on, schools have been established for both boys and girls, and colportage work is carried on.

The Mirigama district is divided into two parts, each having a resident evangelist and one or two schools. So far the principal work is dig-ging deep and laying foundations.

There are (1903) connected with these 2 stations, 13 outstations, 15 Sunday schools, with 266 in attendance, 15 schools, with 640 pupils.

Turkey (1881): Two Armenians who had become connected with the English Friends were sent to Constantinople by private benevolence in 1881 to open a medical mission. This enterprise has extended into educational, evangelistic and industrial efforts and is reported in the Friends' Magazine of Foreign Missions, which now includes the work of the missions of the FFMA.

Our Missions, monthly, London, contains letters from the various missions carried on by Friends.

FRIENDS SYRIAN MISSION. See Friends Foreign Missionary Association.

FRIENDSHIP: A station at the Wesleyan Eastern Annual Conference of the West Indies, near Georgetown, British Guiana, with (1900) 2 missionaries, 1 missionary's wife, 5 preaching places, 5 day schools and 814 professing Christians.

FU-CHAU-FU (Fo-kien): Capital of the province of Fo-kien, China, situated on the Min River, 34 miles from its mouth. It is a treaty port, opened after the British war of 1842. The location is healthful, begirt by hills four miles distant. The walled city is about three miles from the river, with its extensive suburbs extending to the river bank and beyond on the south side. A foreign settlement has been built up on Nantai Island in the river. The two banks of the river are connected by bridges and a large population is housed in boats upon the river. The city has extensively cultivated fields, producing all kinds of porcelain. The population is estimated at 650,000. Station of the ABCFM (1850), with
(1801) 18 missionaries, men and women, of whom three are physicians; 62 native workers, men and women; 11 preaching places, 31 day schools, 2 high schools, 1 college, 1 theological seminary, 1 training class for women workers, 1 kindergarten, 2 dispensaries and 1 hospital. Station also of the CMS (1850) and CEZ (1884), with (1903) 30 missionaries, men and women, of whom three are physicians; 90 native workers, men and women; 9 outstations, 6 preaching places, 40 day schools, 5 high schools, 1 industrial school, 1 women's training class, 1 theological seminary, 2 dispensaries, 1 hospital and 1 school for lepers. Station also of the ME, with (1903) 29 missionaries, men and women, of whom three are physicians; 55 native workers, men and women; 10 outstations, 11 preaching places, 59 day schools, 2 high schools, 1 college, 1 theological seminary, 1 industrial school and 1 printing house. The aggregate number of professing Christians reported by these societies is (1903) 3,660. The name is also written Foo-chow and Fuh-chau.

FU-CHAU-FU (Kiang-si): A town in the province of Kiang-si, China, situated 128 miles S. by E. of Kiu-kiang. It has an important trade in native porcelain. Station of the German China Alliance Mission (1898). The name is also written Fu-cheo.

FU-CHEO. See FU-CHAU-FU (Kiu-ang-si).

FUERTE: A town in the province of Sinaloa, Mexico, situated about 170 miles S. W. of Chihuahua, on the Fuerte River. Population, about 3,000. Station of the ABCFM (1891). The name is also written El Fuerte.

FU-DING. See FU-TING.

FU-NING. See FU-NING-FU.

FU-KIANG-HSIENT: A town in the province of Kansu, China, situated about 30 miles N. W. of Tsin-chau. Station of CIM (1899), which has not been reoccupied as a missionary residence since the Boxer outbreak, being now (1903) visited by missionaries at Tsin-chau.

FUKUOKA: The principal town in the north-western part of the Island of Kiu-shiu, Japan. It is a railway station and seaport 65 miles N. W. of Nagasaki, and is divided into two parts: the business quarter and port, called also Hakata, and the old feudal town, pervaded with the quiet and decorum of the olden time. The population is (1888) 53,800. Station of the CMS (1888), with (1902) 1 missionary, 2 missionary women, 5 native workers, men and women; 2 outstations and 249 professing Christians. Station also of the ME, with (1903) 2 missionaries, 2 women missionaries, 13 native workers, men and women; 8 outstations, 2 preaching places, 1 orphanage, and 404 professing Christians. Station also of the SBC (1893), with (1903) 2 missionaries and their wives and 2 outstations.

FUKUSHIMA: A town and railway station in the island of Japan, Holland, situated 85 miles E. of Niigata. Station of PE, with supervision from Sendai.

FUKUYAMA: A town and railway station on the S. coast of Hondo, the main island of Japan, situated 112 miles W. by S. of Kobe. Population about 15,000. Station of the CMS (1891).

FULLERTON, Robert Stewart: Born at Bloomington, O., November 23, 1821; graduated at Miami University, Ohio, and Alleghany Theological Seminary; ordained by Presbytery of Chillicothe, 1850; sailed the same year for India as a missionary of the Presbyterian board. He was stationed at Agra, where he continued to labour and conduct two institutions, a male and a female school. He was relieved of the boys’ school on the arrival of Rev. R. E. Williams. At this time he became pastor of the Presbyterian Church at Agra, which charge he continued to hold, and also that of the female school, till the mutiny in 1857 broke up both schools and mission. The girls’ school, which had continued for five years, did much to elevate the tone of Christian feeling in the East Indian community, and the church had grown under his care. After the suppression of the mutiny he went to Fatehgarh to look after the scattered remains of the mission and prosecute the mission work. His labors at Agra, much to his regret, but necessarily, had been mainly in English. At Fatehgarh he gave himself with great diligence to the native language and became a fluent and effective speaker. He recommenced, as soon as practicable, the Furruckhabad High School, and also cared for the native church in the city, besides spending much time preaching in the bazaars. Under all his labors his health at the end of three years gave way. He went to the Dehra station on the hills in 1864, laboring there faithfully till near the end of his life. A malignant disease attacked him, from which he died, after three months of great suffering, October 4, 1865.

FU-MUI: A town in the province of Kwangtung, China, situated about 15 miles S. E. of Hwei-chau-fu. Station of the Berlin Missionary Society (1885), with (1903) 1 missionary, 10 native workers, 10 outstations, 1 school, and 397 professing Christians.

FU-NGHWA-HSIENT. See FENG-HWA-HSIENT.

FU-NING-FU: A town on the E. coast of the province of Fo-kien, China, situated about 70 miles N. E. of Fu-chau. Station of the CMS (1882), with (1902) 8 missionaries, men and women, of whom 3 are physicians; 33 native workers, men and women; 10 outstations, 14 day schools, 1 high school, 1 training school for women workers, 1 hospital, and 2,041 professing Christians.

FU-REEDPORE. See FARIDPUR.

FU-SAN: A treaty port on the S. E. coast of Korea, situated on the head of the Bay of Chosen; terminus of a railway to Seoul now (1903) in construction. Station of the PN (1891), with (1903) 6 missionaries, men and women, 1 of them a physician. Station also of the Woman’s Missionary Union of the Presbyterian Church of Victoria (1891), with (1900) 5 missionaries, men and women. Station also of the SPG (for Japanese residents), with 1 missionary and 1 preaching place.

FUTSUKPHAI: A town in the province of Kwang-tung, China, situated about 75 miles east of Canton. Station of the E. and S. Society (1879), with (1902) 1 missionary, 10 native workers, men and women; 7 outstations, 4 day schools, and 470 professing Christians. Written by the Germans, Futschukpfi.

FU-SHUN: A town in the province of Sze-
chwan, China, situated on the To-kiang River, 30 miles N. W. of Lu-chau. Station of the CIM (1902), with 1 missionary.

**FU-TSING-HSIEN:** A town on the east coast of the province of Fu-kien, 25 miles south of Fu-chau. Station of the CMS, with (1902) 5 missionaries, men and women, one of whom is a physician; 50 native workers, men and women; 2 outstations, 19 day schools, 1 dispensary, and 5,828 professing Christians. Circuit station also of the ME, with (1903), 28 native workers, men and women; 11 places of worship, 18 schools, 1 high school, and 1,353 professing Christians. Also called Hok-chiang.

**FUTUNA.** See New Hebrides.

**FUTUNAN LANGUAGE:** Belongs to the Malanesian family; and is spoken by a few hundred people in the island of Futuna, New Hebrides. It was reduced to writing by missionaries of the New Hebrides Mission Society and is written with Roman letters.

**FU-YIU-TSUN:** A town in the province of Shen-si, China, situated about 32 miles N. E. of Hei-ngan-fu. Station of the BZM (1898), closed (1903) since the Boxer outbreak of 1900.

**FWAMBO.** See Kawimbe

---

G

**GAGAEMALAE:** A settlement on the island of Savaii, Samoan Islands. Station of the Australian Wesleyan Mission, with (1900) 15 native workers, 3 preaching places, 3 schools and 104 professing Christians.

**GALELA:** A settlement on the northeast coast of the island of Halmahera, or Jilolo, in the Moluccas, Dutch East Indies. Station of the Utrecht Missionary Society (1866), with (1900) 1 missionary and his wife.

**GALKISSE:** A town in the outskirt of Colombo, Ceylon, East Indies. Station of the SPG (1846), with (1902) 12 native workers, men and women; 1 preaching place, 4 common schools and 251 baptized Christians.

**GALLAND:** A country formerly of Abyssinia but now included, for the most part, within the bounds of Italian Somaliland, Africa.

The people, called Gallas, seem to form a connecting link between the negro and the Semitic races. They are intelligent, vigorous and war-like. Some of the northern Galla tribes have adopted Abyssinian Christianity. The Gallas found to the south and southwest of Abyssinia are believers in fetishism. Three dialects of the Galla language—the Shoa, the Ittu and the Barretta—are spoken. All attempts made by missionaries to reach the Southern Galla tribes have failed through the fanaticism of the Arabs of Somaliland and the disturbed state of religion.

**GALLE:** A town and port on the southwestern coast of Ceylon, 66 miles S. by E. of Colombo, which has superseded it as a port of call for mail steamers from the Mediterranean to China, Australia, etc. A profusion of trees—palms, coconut, breadfruit—grow along the streets and the bluffs along the shore, and give a pleasing appearance to the settlement. Its name means "rock", and it is often spoken of as "Point de Galle." Population (1901), 37,000, composed of many races, including Singhalese, Hindus, Parsees, Arabs, Eurasians and Europeans. Station of the WMS (1814), with (1903) 1 missionary, 1 missionary woman, 101 native workers, men and women; 10 preaching places, 17 day schools, 2 high schools, 1 theological college, 1 industrial school, and 184 professing Christians. Station also of the SPG (1860), with (1903) 1 missionary, 12 native workers, men and women; a high school, an orphanage, and 167 professing Christians.

**GAMA:** A British West African Colony of 69 square miles, at the mouth of the Gambia River. The population (1901) is 13,456, of whom 7,707 are Mohammedan, 5,340 Roman Catholic and Protestant Christians, and 2,290 pagans. Besides the colony proper, the banks of the Gambia constitute a British protectorate, the area of which is 4,500 square miles, and the population 76,948. The WMS has a missionary station at Bathurst, with about 1,000 church members.

**GAMPOLE:** A village in the central province of Ceylon, situated 11 miles S. by W. of Kandy, in a lovely valley. It was once the capital of the island. Station of the CEZ (1896), with (1903) 3 missionary women and 22 native women workers.

**GANDA LANGUAGE.** See Ugandan Language.

**GANIRU:** A town in the United Provinces, India, situated 36 miles N. W. of Meerut and in the district of Muzaffarnagar. Population (1891) about 5,000. Circuit station of the ME, with 22 native workers, 16 Sunday schools, 9 day schools and 790 professing Christians.

**GANG-K'ING.** See Ngan-king-fu.

**GAN-REN.** See Ngan-REN-hsiien.

**GANSEE:** A settlement in the Bush country of Dutch Guiana, S. America, situated on the upper portion of the River Surinam. Station of the Moravian Missions (1848), with (1902) 1 missionary and his wife.

**GAN-SHUN.** See Ngan-shun-fu.

**GAN-TUNG.** See Ngan-tung-hsiien.

**GARDINER, Captain Allen F.** : Founder of the South American Missionary Society. He was born in England in 1794, and manifested even in childhood the spirit that controlled his later life. When found sleeping on the floor rather than in his bed, he gave as the reason that it was his intention when a man to travel all over the world, and therefore he wished to accustom himself to hardship. He began active service in the navy in 1810, when he was 16 years old, but resigned after the death of his wife in 1834, and wholly consecrated himself to his life-work: "to become the pioneer of a Christian mission to the most abandoned heathen."
He married a second time, and his family shared with him his trials and discomforts for a long time. Never discouraged, when he found the door closed on one side he turned another way. At one time he had joined the missionaries to South Africa, but the treachery of a Dutch trader forced them all to flee. Then he tried to secure an entrance to New Guinea. At last he settled upon South America as his mission-ground, went to the Falkland Islands as a point from which to reach Tierra del Fuego, and from that time on his life was one series of persevering effort and heroic endurance.

So anxious for the formation of the South American Missionary Society was Gardiner that in 1844 he guaranteed all expenses for three years and £100 a year thereafter. It was not until 1848 that he saw the mission undertaken, and in 1851 he and his companions in its pioneer effort died of starvation through failure of supplies.

**GARENGANZE MISSION. See Christian Missions.**

**GARO LANGUAGE:** Belongs to the Tibeto-Burman group of languages and is used by the Garo tribes, numbering some 25,000 souls, in the hill country S. of the Brahmaputra River in Assam. It is written with the Bengali characters.

**GARRAWAY:** A town and harbor on the W. coast of Liberia, W. Africa, situated N. W. of Cape Palmas. Station of the ME, with 1 missionary and 1 missionary woman. Also parish of the PE, with 1 missionary, 2 native workers, 1 day school and 50 communicants. Name written also Graway, with subdivisions Whole Graway and Half Graway.

**GAUB:** A station of the Rhenish Missionary Society in the northern part of German South-West Africa, lying about 300 miles N. E. of Walvis Bay.

**GAUHATI:** The largest town in Assam; situated on the Brahmaputra River, 45 miles N. by W. of Shillong. Climate unhealthy. Population (1891), 10,800, of whom 7,800 are Hindus and the remainder nearly all Muslims. Station of the ABMU (1843), with (1903) 8 missionaries, men and women; 21 native workers, men and women; 17 preaching stations, 17 schools, 1 high school, and 778 church members.

**GAYA:** A town in Bengal, India, situated 58 miles S. by W. of Patna, among ridges running out of the Ganges valley, and in a region filled with traditions of early Buddhist history. Six miles S. of the town is Buddh Gaya, the dwelling place of the founder of Buddhism. There is shown a lineal descendant of the Pipul tree, under which he sat in meditation. The population of Gaya is (1901) 71,288, nearly three-fourths being Hindu and about one-fourth Muslim. Outstation of the BMS (1882) and station of the Baptist Zenana Mission (1880).

**GAYAZA. See Gyaza.**

**GAZA:** A town in Palestine, situated 26 miles N. W. of Beersheba, on the road leading to Egypt, between the Mediterranean and the desert, about three miles from the sea. It is built partly on the sides of the steep hill which was crowned by the ancient town and partly on the plain below. It is the seat of a Greek, and also of an Armenian, bishop. It is a station for the caravan traffic between Egypt and Syria, and has a population of 15,000. G. is the Arabs of Station of the CMS (1878), with 5 missionaries, men and women, and a hospital.

**GEDDIE, JOHN:** Born at Banff, Scotland, 1815; brought up and educated in Nova Scotia, whither his parents immigrated in his infancy. They were earnest Christians, strongly imbued with a missionary spirit, and at his birth they determined to be a missionary. He received his academical and theological education at Dalhousie College. There being then no organization in Nova Scotia to send him to a mission field, he was ordained in 1858, and settled as pastor of the churches of Cavendish and New London, in Prince Edward Island. Soon after his ordination he wrote a series of letters on foreign missions, addressed to the ministers and members of the Presbyterian Church of Nova Scotia, which were published in the provincial papers, and resulted in the commencement of a foreign mission by the Synod. The field selected was the South Seas, and Mr. Geddie, offering his services, was accepted as their first missionary. He had been settled seven years, and had a wife and three children. To prepare himself more fully for his work, he took lessons in printing, and obtained some instruction in medicine. He left for the South Seas in 1849 via Cape Horn, stopping at the Sandwich Islands and waiting two months for a vessel for Samoa. There he remained eight months waiting for the "John Williams" from England. At Honolulu and Samoa he obtained much valuable knowledge from seeing the working of the London and American Societies' missions. On the advice of the missionaries of Samoa he chose for his field Anetian Island, New Hebrides, and Rev. Mr. Powell, one of the most experienced of their number, was appointed to assist in establishing the mission. Mr. and Mrs. Geddie had a hard and trying experience in dealing with a low and savage people. Hurricanes, diseases and deaths were attributed by the natives to the missionaries; the natives stole their property, threatened to burn their houses and take their lives. Mr. Geddie had, however, the most aptitude for the heathen as to gain their confidence, and in his efforts to dissuade them from the cruel custom of strangling widows his success was marvelous. Gradually several attended his instructions, and in two years forty-five assembled on the Sabbath to listen to his words and to worship God. Mr. Geddie had great readiness in acquiring the native language, and a remarkably retentive memory. He made early and extensive use of the press; was an excellent translator of the Scriptures; had great inventive power and was fertile in expedients: he could turn himself with facility to building a church, translating a Gospel, printing a primer, administering medicine, teaching a class, or preaching a sermon, traversing the island on foot, or sailing round it in his boat. In 1850 some of the chiefs and even sacred men joined him, of whom one, Walbit, supposed to have power over the sea, a man of fierce and cruel temper and much feared by the people, had his mind opened to the truth, and showed great eagerness to impart to others the truth he had himself discovered. Another chief of great authority in the island, and also a worshipper, was Nohoot. To prove his sincerity, which many doubted, he cut off his long
hair, abandoned polygamy, and, tho sixty years old, attended the school every morning and the worship on the Sabbath. Official persons among the heathen were welcomed into the mission house, and other parties, not native, whose proceedings were interfered with by the new teachers, combined in repeated attempts to rid themselves of the missionary. In 1851 his house, in which himself and family were sleeping, was set on fire at midnight. The excitement craze among the friendly natives over this dastardly act, the held in check by the missionary, convinced the perpetrators that such opposition could be continued only at their peril. Subsequently, when the people of a heathen district planned to attack the people of a Christian village, the Christians from all parts of the island assembled to reason with the hostile people, and to persuade them to live in peace. These events rallied and strengthened the friends of Mr. Geddie, and from that day the Christian cause triumphed. In 1852 the first converts, 13 in number, were baptized, and a Christian church formed on Anetium. In 1854 the whole population had abandoned heathenism. Mr. Geddie translated the Gospels of Matthew and John and most of the Epistles of Paul into the Anetian language, and printed them himself.

His health being impaired he visited Nova Scotia in 1864, after 18 years' absence. He took with him the Book of Psalms, which he had translated, and had it published at Halifax. He was received at home with great enthusiasm. The Queen's University at Kingston conferred on him the degree of D.D.; and the Synod honored him with the appointment of Moderator, which he declined. He returned to the island in 1866. In 1871 he went to Melbourne to carry part of the Old Testament through the press and was seized with paralysis, but recovered sufficiently to be removed to Geelong in Victoria, where he had left his wife and children. There he died, December 15, 1872.

GENADENDAL. See Gnadenal.

GEOGRAPHY of the Expansion of Christendom: At the beginning of the geographical expansion of Christendom we can, on an ordinary atlas map, cover up all there was of Christendom in the world with the point of one finger; at the end of a century a whole hand will not suffice; at the end of three centuries the whole Roman Empire must be included; by the close of the 10th century all of Europe, including the Russians, has become Christian; while Persia, Syria, Africa and Spain are lost to Mohammedanism; the 15th century map shows losses in Asia Minor and the Balkan regions, gains on the Iberian peninsula, and displays a new hemisphere which brings the full extent of the missionary problem to the heart of Christendom. From that day the march was steadily forward, until at the close of the 19th century every section of the globe has been reached with more or less effect.

1. The Pentecostal Church: The geographical conquests which surrounded the infant church assembled in that upper room in Jerusalem make very manifest the small extent of the known world. As far as civilization was concerned, it was a Mediterranean world. A stretch of three thousand miles east and west, and of fifteen hundred north and south, contained it all. Britain was still unconquered. The warlike Parthian was the greatest organized enemy of Rome. This Scythian monarch had learned some of the refinements of civilization from the downtrodden Persians, but was still essentially barbaric. It was he who was known to navigators, and caravan routes were open through to China. Travelers occasionally brought in accounts of strange lands and peoples, but all about this confined area of terra incognita lay the great cloudland of terra incognita.

The immediate task before Christianity was the conquest of the center of civilization—the Roman Empire. The geographical characteristics of this Mediterranean civilization as related to the company of Christian believers in Jerusalem deserve notice. (1) It was an empire of cities. Christianity must needs handle centers of population, especially in the West. From four to five thousand cities must be reached. (2) The Mediterranean furnished easy access from city to city. It was covered with sails employed in a thriving commerce. (3) Roman roads connected all parts of the empire, making travel carried rapidly. Along these splendid highways trudged the messenger of the Gospel from city to city. (4) One hundred million people were thus by land and waterways compactly drawn together in a territory containing less than two million square miles, as geographically considered, no portion of the globe furnishes so interesting a field for religious conquest as the territory of the old Roman Empire.

Roman civilization spread itself outside its own regions by two methods—commercial and military—and Christianity must needs follow in the track of armies and merchants. The caravan routes all led into the common basin of the Mediterranean, from Central Africa through Sahara by several ways, down the Nile; from Yemen along the Red Sea; from the Persian Gulf through the Syrian desert; from Mesopotamia, the center of the trade route of Persia to India, to which came the treasures from the Persian Susa, Hycania and Bactria, which in turn drew upon China through Statio Mercatorum, and from Hindustan and Farther India via Clisobra. Turning to the sea the routes are quite as numerous. The whole coast of southern Asia was familiar to the merchants, and regular routes by sea were open, finding their natural termini in the Persian Gulf and the Red Sea. Another thriving line of commerce came pouring into the outlet of the Mediterranean from distant Britain, and daring navigators pushed along the coast of the North Sea and penetrated the Baltic lands in search of trade. That a little later Christianity should be found firmly planted in far-away places is not surprising. The door was open, and the disciples could easily go in.

Garrisons of Roman soldiers were stationed all along the borders of the empire. These military barracks soon became centers from which Christianity spread outside the civilized world, and these isolated spots along the Rhine, the Daube, the Euxine and the Euphrates became oases of the faith. When the armies pushed beyond the boundaries of the empire, Christianity was sure to go with them. Christian soldiers captured
and enslaved by barbarians were the means of converting whole nations.

Another geographical condition of the greatest importance to Christianity was the wide extent of territory over which the Greek and Latin languages were spoken. At the opening of the Christian era Hellenistic Greek was the lingua franca of the Roman world. Greek colonies had been established all around the Mediterranean, and these had determined the language of commerce. Greek letters and arts had conquered Rome more effectually than the legions of the republic had overcome the peninsula of Hellas. The New Testament was composed in this universal language, and all through the early centuries Christian churches were Hellenistic. Later on the Latin tongue took the supremacy in the Western world, evidenced by the fact that it still remains the liturgical language of the majority of Christians.

More important, however, to the Christian Church than any of the conditions mentioned was the geographical distribution of the Hebrew race. Everywhere synagogues were the early preaching places of the apostles, and the majority of the Christians of the 1st century were of Jewish descent. Christianity, the develop- ment of the Old Testament religion, naturally turned to the believers in that revelation. Providentially, it seems, these seven millions of people, with their monotheism, their nobler conceptions of God and their purer ethics of life, had been scattered broadcast over the Roman world, and even beyond its boundaries. There were about four million Jews in Syria and Palestine at the opening of our era. One million lived in Mesopotamia and down the Tigris and Euphrates rivers. One million more were dwelling along the Nile and in the Delta, Alexandria having a large quarter entirely devoted to this people. A million more were estimated to have been distributed elsewhere about the Mediterranean. Paul and the other apostles found them everywhere. Most cities had a Jewish section. This race was especially numerous along the north coast of Africa. In Spain, up to the Rhone and about Rome, the commercial center of the world. The Sibylline Oracle says that “every land and every sea” was filled with them. Strabo, writing of the century before our era, says that the Jewish people had already come into every city and that it was not easy to find a place in the world which had not received this race and was not occupied by them. We find them in Southern Arabia (Yemen), Ethiopia (Abysinia), Armenia, Parchia, Iberia, Crimea, Hyrcania, and even China. Wherever there were Jews the door was open to the preachers of the Messiah.

With a Roman government to police the world, with highways and harbors facilitating journeys by land and sea, with a universal language at their command, and with Jewish people and prayer-houses distributed all over the empire, the apostles went forth to conquer. As the centuries went on we shall find the Christian churches most numerous and thriving where these conditions were most favorable.

II. The Apostolic Church. At the close of the 1st century a very inadequate presentation of the extent of its advance could be given. The Church was possible. The New Testament Church was more or less in hiding for three centuries, and the notices of geographical matters in Christian or heathen literature are only incidental. Legends and doubtful traditions have thrown a haze over the whole subject. By the time of the death of the apostle John there were Christian churches all over Syria, Asia Minor, Macedonia, Greece proper, the islands and Italy. There seems to be every probability that Paul may have carried out his desire to visit Spain between the two imprisonments at Rome. Peter was probably at Babylon and Mark in Egypt. Beyond this there is little certainty. The list of the converts on the day of Pentecost (Acts ii: 9-12) would lead us to infer that Christianity got a footing in Parthia, Media, Elam, Cappadocia, Pontus, Asia, Phrygia, Pamphylia, Egypt, Cyrene, Rome, Crete, Arabia “and in every nation under heaven” (Acts ii: 3). Ethiopia (of doubtful location) may have learned of Christ through the eunuch baptized by Philip. The apostle James familiarly addresses the “twelve tribes which are of the dispersion.”

Peter addresses the “sojourners of the dispersion in Pontus, Galatia, Cappadocia, Asia and Bithynia.” He sends greetings from Babylon (Rome? in Egypt? or on the Euphrates?—probably the latter). The innumerable traditions about the apostles and early disciples must be dismissed as unreliable. The discovery that of Paul in Britain, Lazarus in Gaul, Thomas in India, Bartholomew in Parthia, Andrew in Russia, Thaddeus in Edessa, Philip in Scythia, Matthew in Ethiopia and Judas the Zealot in Arabia. Yet these men were certainly busy somewhere, preaching the Gospel and building up churches.

This is certain—Christianity found a lodgment during the 1st century from Spain to Babylon (3,000 miles) and from Rome to Alexandria. It had taken the whole Mediterranean as its field of work. In 30 A.D., at Jerusalem there were at most 500 Christians; 100 A.D. there were probably 500,000. A map of the Christian world at this date, containing only certainties, would not give a true impression of the geographical extent of Christianity. From the unexamined spread a little later, it may well be inferred that there was a large growth in these early times before the great persecutions. The map should show the routes Paul took on his missionary journeys and on his way to Rome. The cities of Antioch, Tarsus, Derbe, Lystra, Iconium, Antiochia, Hierapolis, Colossae, Philadelphia, Sardis, Thyatira, Pergamum, Ephesus, Smyrna, Philadelphia, Thessalonica, Beraea, Corinth, Cenchreae, and Rome should be plainly marked. The following cities and countries should be put down as probable: Babylon, Edessa, Arabia, Petra, Alexandria, Cyrene, Ancyra (in Galatia), Perga, Troas, Athens, Rhodes, Crete, Miletus, Puteoli, Carthage and Southern Spain. It is possible that Dalmatia, Britain and the Rhone valley should be included. Clement of Rome (30 A.D.—102 A.D.), in his first epistle to the church at Corinth (§ 44), says there was “preaching everywhere in country and town.”

The Apostolic Church was to all intents and purposes a Greek-speaking church. It was largely drawn from the Jewish element, allo Gentiles took no part, and the prejudice against the Jew as a Jew had not yet arisen. The hopeful, buoyant tone of the apostolic letters indicates a growing success in the work. The churches do not seem to have
has been thoroughly organized as one church and consequently there were no internal geographical divisions.

III. The Ante-Nicene Church: The Church of the 2d and 3d centuries is under a denser cloud than that of the 1st. The absence of apostolic writings leaves so much room for the influence of historians or other indications. The era of representative Church councils was just beginning. Justin Martyr (105-167), the still more reliable Epistle to Diognetus of the same century, Irenaeus, bishop at Lyons, on the upper Rhone (130-202), and Tertullian, who wrote in the 2d and 3d centuries, unite in representing the Christians as "a great multitude," "a majority of every state," "dispersed even to the ends of the earth," and including "every sex, age and condition, and persons of every rank also." Among nations enumerated are the Carthaginians (Moore), "all the limits of Spain," "the diverse nations of the Gauls," "the haunts of the Britons, inaccessible to the Romans, but conquered by Christ," the Sarmatians, Dacians, Germans and Scythians.

Church councils and martyrologies furnish some information concerning the spread of Christianity in this obscure period. Eight savage Roman persecutions of the Church took place before Christianity won for itself imperial recognition, and the universality of several shows how widely the faith had spread. The fact that the wisest Roman emperors ordered the severest persecutions, because they feared the spread of its secret religio-political cultus, as they considered it, is another indication of the numerical strength of the Christians. It is estimated that by the opening of the 4th century there were 10,000,000 Christians in the Roman empire, as contrasted with the 500,000 at the close of the 1st century. A conservative guess as to the number of churches at the close of this period places them at 1,000 Oriental and 800 Occidental, but the data are very unsatisfactory. Important Church councils were held at Carthage (254), Elvira (Spain, 305), Arles (Gaul, 314), Ancyra (Asia Minor, 314) and Nicea (Asia Minor, 325). Contemporary documents give the names of the bishops or presbyters who were present, but not a third of the churches could have been represented. More than two thirds of these councils were held in Asia Minor where there were churches at the time Christianity was coming out from under persecution were distributed as follows: In Europe, 188 in all (Britain, 3, German lands, 3, Gaul 38, Spain 45, Italy 52, Southern Europe 37); in Asia 214 (Asia Minor 136, Northern Syria 36, Palestine 2d Arabia 18); in Africa 123 (Egypt and Libya 28, North Africa 95). A map indicating this condition of things would be sprinkled all over with cities containing Christian churches. Multiply them by three or four and it becomes apparent why the secular mind of Constantine the Great led him to throw in his lot with the Christians. Besides York, Lincoln and London, represented at the Council of Arles (314), there were doubtless churches scattered all over the land as far north as the Roman wall. All along the Rhine and Danube frontier we see a string of Christian fortresses. Roman soldiers were in the missions in this dangerous region. The Euxine was fringed all around with churches. Italy, Asia Minor, Syria, Egypt, North Africa, Southern Spain and the Rhone valley were thickly dotted with churches. Christianity is still strictly municipal, as might have been predicted.

IV. The Imperial Church (311-600): With Constantine's decree of amnesty to Christians (311) the Church entered upon a new era. Christianity became a state religion. The centers of civilization were within the Roman sphere, and the empire was slowly going to pieces. Under Julian the Apostate it made one spasmodic effort to regain its ascendency, and then gradually disappeared, or was absorbed by the Church or by some of the heretical sects. At the close of this period there were probably forty Christian churches in the territory occupied by the empire when at its widest extension. Besides the heretical sects already mentioned, some of which did most of their work in this period (Arianism, Donatism and Manicheism) are to be noted the Nestorians at work in the far East early in the 5th century, the Monophysites in Syria and Egypt a little later, and a century after, the Monothelites.

Outside the empire, this propaganda, which had been going on for several centuries, now came to notice and was carried on more systematically. Politically the Roman and Persian, was the first nation, as such, to embrace Christianity, early in the 4th century. The whole country seems to have received the new religion. Schools and churches were built and the Bible was translated. Since that time the Armenian Church has retained its independence.

During days of persecution Christianity made its way around the border of the Euxine, pushed into the interior of the Caucasus range and won over the Albanian and Iberian tribes. A most interesting mission of this period was to the Goths, various tribes of whom had been moving along the north shore of the Euxine and up the Danube. During their inroads they penetrated in the 3d century as far as Epheus and Athens. A large number of Christian captives from Cappadocia were dragged northward across the Danube to the Dacian rendezvous of these rude northmen, and thus the first Gospel seeds were planted. Progress must have been made, for the Gothic bishop Theophilus was present at the council of Nices (325). The apostle of the Goths, however, came a little later in the person of Ulphilas, a son of Cappadocian captives. Beginning early in the 4th century and continuing until the 6th century, he and his converts went through fiery persecutions (350 and 370), but the work of conversion seems to have gone on with increasing momentum. Both the East and West Goths were reached effectually, and through all their wanderings disseminated a more or less helpful Christian faith.

From the first Christianity had been pushing rapidly eastward. Mesopotamia must have had a large Christian population. Bishops came to Nicaea from as far east as Arbela and Nisibis. Persia had been reached at an early period. During the reign of Sapor II. (300-379) terrible persecutions indicate a large Christian population. When the Nestorians were driven from the Roman dominions, they commenced their missionary march eastward, making a first lodgment in Persia in the 5th century, at a time when Christianity was in the missions, and in the 6th and 7th centuries, sending missionaries southwestward into Arabia, to the southeast into India and Ceylon, and eastward to China; but it is impossible to know the extent of the spread of Christianity
in these vast regions. The St. Thomas Christians in India and the Christians of the Syrian cult at Urnia in northwestern Persia are all that have remained faithful up to modern times.

Turning to Africa there was a most interesting expansion of Christianity in Abyssinia during this period. Under the Syrian missionary, Frumentius, the Sudanic tribes of his time and the heathen Saxons and kindred tribes exterminated the faith except in Cornwall, Wales and Cambria. The Isle of Man seems to have been Christianized by Columbkille (512-597), and Secker (d. 565), who became a Christian after the Roman type and led his followers to accept the Gospel.

The German border was in constant turmoil owing to the ceaseless invasions from the north and east. The Gothic hordes that swept over the country had received a crude sort of Christianity, and so had the Vandals; but Attila the Hun was a heathen. Many of the Christian institutions founded in the 4th century were swept away. However, Valentinus preached the Gospel in the Tyrol (441), Paulinus was martyred at Ratisbon (470), Severus, bishop of Treves, was making efforts to spread the truth in Germany (453), and Severinus in Noricum and Pannonia (453). The Burgundians, the Franks and the Lombards were reached effectively, as well as the Alans and the Suevi. The Slavonians and Avars in Ilyrnia and Mosia received Christianity about 550.

The few, however, who were converted were converted during this era before they entered the confines of Christendom. At the close of this period, however, all about the borders of Christendom there was a labors of Christian missions. The only striking loss was southern Britain, which was soon to be won back.

V. The Feudal Church (600-1095): Great changes took place in the geography of Christendom during the feudal period, gains and losses balancing each other. The greatest organized enemy of Christianity, Islam, began its decimating war early in the 7th century. Arabia, Syria, Persia, Egypt, the north coast of Africa to the Atlantic, Spain and the Mediterranean islands were successively conquered. Christianity was wiped out in Arabia, Nubia and North Africa. Feeble churches remained in Persia, Egypt and Syria. In Spain Christianity still was vigorous. The mountainous regions of the peninsula were never wholly conquered, and even in the conquered portions Christianity flourished under the lenient reign of the Caliphate of Cordova. In the Asturias and Navarre the Christians were independent and became powerful. In Egypt and Nubia the monophysite Christians for the most part turned traitors, caring less for orthodoxy from Constantinople than fancied protection from Medina. Nestorianism was cut in two by the conquest of Persia and already began to decline, as its work went on in the Far East. Timothy, Patriarch of Syria (778-820), sent missionaries to China and India. In 845 Christians were proscribed in China, which they had been tolerated all through the 8th century. The Taurus range and the highlands of Armenia remained the frontier fortresses of the Eastern Church for many centuries, but as this period was closing, were being successfully penetrated by a new scourge from the East—the Turk.

All through Europe missionary work made substantial geographical gains. Pagan England was reclaimed and thoroughly Christianized. The heathen Saxons, Angles, Jutes and Scots and the Irish Church on the north and west and Augustine and his zealous followers on the south, the victory of Christianity was inevitable, and
England with Ireland, Scotland and Wales, was thoroughly Christian at the close of the feudal period.

In the meanwhile the fervid missionary zeal of the Irish Church was at work on a larger arena. In the 7th century Ireland was called "the Isle of Saints," largely because of its numerous monastic establishments. Having won the Picts and Scots to the faith, thousands of Irish monks looked longingly toward the heathen wilds of the Continent. Columbanus (born about 543), a disciple of Columhull, Abbot of Bangor, went from place to place, and finally settled among the Vogeze Mountains, on the German frontier. St. Gallus, his disciple, gave name to an illustrious monastery and to a Swiss canton. Other Irish missionaries set the rather sluggish churches of the Continent examples of simplicity, piety and missionary zeal that electrified the whole of western Christendom. From Gaul went forth Amandus (died 681 or 684) and Eligius (died 659), from England, Wilfrid (Clement) and Boniface (Winifrid), "the apostle of Germany." The Frisians were slowly won over from an unusually savage paganism. The last and overwhelming argument came from the sword of Petrus. D'Henin (Clement) made a full-blooded attempt to reach the Danes. A century later Ansgar (800-865) became the apostle of Denmark. About this time the sword of Charlemagne compelled the stubborn Saxons to cast away their idols and accept the Cross. Sweden was reached by Ansgar, but the real influence that brought Denmark, Sweden and Norway to Christianity came somewhat later from England. Siegfried, Trygvason and St. Olaf were the leaders. In 912 Rollo the Norman obtained Neustria and was baptized as Robert, Duke of Normandy.

While the Belgians, Normans, English, Frisians, Danes, Swedes, Norwegians, Saxons and other Teutonic tribes in Germany were being won over largely if not exclusively by the Irish, English and Gaelic missionaries, the Roman Church was fighting for life itself with marauders from the north and Saracens from the east and south. North Africa and Spain were entirely lost, and Sicily, Sardina and Corsica soon fell before the crescent. Later, as the flood-tide of Islam began to subside, the missionary efforts from Rome became more noticeable. The heathen Magyars crossed the Carpathian Mountains in the 9th century and settled on the Theiss and Danube. In 972 their leader, Geyza, married a Christian princess, Sarolta, daughter of the Transylvanian prince Grulis, who had been converted during a stay at Constantinople. German missionaries pushed down into the country ever and more. In 994 Adelbert of Prague baptized with the name of Stephen Goyza's son Voik, who was afterward famous as St. Stephen, the patron saint of Hungary. Under his lead Hungary became thoroughly Christianized and has ever been a firm adherent to the Roman Church.

Turning to the Greek Church we find a more promising field for missionary zeal. The Bulgarians are first heard of as a race of Finnish or Tatar blood, living on the Volga. In the 7th century a portion of them moved southwest, crossed the Danube and spread over the country between the Black and the Rhine Mountains. The Slavonic tribes occupying this region submitted to the newcomers, but in turn gave their language to their barbaric conquerors. The Bulgarians received Christianity during the 9th century. Cyril, the theologian, and Methodius, the painter, both natives of Salonica, were the apostles of this race. King Borogis was impressed by a painting representing the Judgment Day, and the conversion of the whole nation followed. After a sharp contest between the ecclesiastical authorities, a compromise was arrived at. The Bulgarians received an archbishop from the Greek Church, and have ever since been loyal to that body. The Servians and Croats were reached by these same missionaries.

Christianity reached the Czechs of Bohemia and Moravia, and a Slavonic Church, a little later in this same century (9th). Methodius spent the last years of his life in this work. The Czechs had already been reached by German missionaries, but not until the baptism of Barziway, the Duke of Bohemia, and his wife, and the arrival of Methodius, was much progress made. Even then there were some reactions. Under Bolesias II. Christian influence predominated and a bishopric was established at Prague (973). A century later all traces of paganism had vanished, and in 1092 the sacred forests were cut and the last heathen priests were burned.

The most important conquest of Christianity during this period was the conversion of the Russians at Kief. The traditions linking the Apostle Andrew to this country must be set aside entirely. During 955 Princess Olga visited Constantinople, and was so impressed with the Christian ceremonial that she was baptized and adopted the Christian faith. Returning to her northern home, her attempts to spread the faith were for a long while ineffective. When her grandson Vladimir came to the throne, missionaries from Muslims, Jews, Roman and Greek Christians urged upon him their respective religions. After some superficial investigation the decision was in favor of Greek Christianity, which brought with it the hand of the sister of the Byzantine emperor in marriage. In 988 Vladimir, his court, and all his subjects were baptized at one time in the river Dniper at Kief. The story of the spread of Christianity throughout the vast European tracts owned by Russia to-day is obscure. The consequences of the conversion of Vladimir, however, are immeasurable.

Greek missionaries from Mount Athos reached another Slav race, the Poles, early in the 10th century. In 966, their ruler, who had married a Bohemian princess, was baptized, and a large number of his court and people followed him.

The gain of territory that must have impressed Christendom most during this period was far across the Northern Atlantic, in Iceland and Greenland. Iceland was visited in the latter part of the 8th century by Irish monks, and was settled a century later by Norwegian pagan emigrants. Thence from that and Constantinople they became acquainted with the Gospel, and by the year 1000 Christianity was officially recognized as the religion of the settlement. Greenland was discovered in the 9th century and two small Christian settlements were established.

Christian missions no more flourished during this period through the checking of the Saracens at Constantinople by Leo III., the Issaurian, and at Tours by Charles Martel (752). Crete and Cyprus were soon won back by the Byzantine Empire. The Muslims were out of place in France, and soon were driven out of Narbonne, Arles and Nimes. In Spain Charies the Great
pushed them back to the Ebro. In 1017 Sar- 
dinia was reclaimed from the Saracen, and, in, and, in 1050, Corsica.

Such was the geographical status of the feudal 
church. Altho it was a dark age, and Moham- 
medanism almost pressed out the life of the 
church, it must be considered on the whole an age 
of astonishing progress. The dark age was above 
al a missionary age. It prepared the soil for the 
more substantial harvests that were to be reaped 
in a later and happier era. Its gains were 
mainly superficial and so were its losses. Vital 
Christianity was not swept away by Islam.

VI. The Crusading Church (1055-1500): The 
geographical gain of Christendom during this 
period was almost altogether military in character. 
The appeal everywhere was to the sword. It 
was a desperate fight for life with Islam and 
paganism in Spain, Sicily, Palestine, Asia Minor, 
the Balkan peninsula, Russia and along the Bal- 
tic.

The Crusades did little or nothing for the 
expansion of Christendom. They may, however, 
have put a check upon the Seljuk Turk, which 
gave Europe a respite before the more serious 
onslate of the Ottoman Turk.

The Empire was proclaimed by Pope 
Urban II. at Clermont, 1095, and in 1290 Acre, 
the last Christian stronghold in Syria, fell, 
bringing the Crusades to an end. The Crusades broke 
the aggressiveness of the Seljus, but the capture of 
Constantinople by the Crusaders weakened the 
Byzantine Empire, to the extent that it was powerless 
against the Ottoman Turks, who appeared on the 
scene of action during the middle of the 13th 
century. By 1299 they were firmly established on 
the borders of the already lessen Byzantine 
Empire, with Asia as their capital. With the 
exception of Trebizond, Cilicia, the island 
strip of land along the Bosphorus, and a few 
fragments, the Christian emperors of Constantinople 
had lost all their Asiatic possessions by 1340. The 
well-disciplined Ottoman army entered Europe 
1354, and held Adrianople within seven years. 
Then followed a rapid advance to the Danube 
and down along the Hellenic peninsula. Servia 
and Wallachia from being dependent states 
soon became a part of the Sultan's dominions. 
A momentary check, caused by the victory of 
Tamerlane over Bajazet at Angora, 1402 gave 
Constantinople a brief respite; but in 1453 the 
last vestiges of the Eastern Roman Empire fell 
with the capital city. The movement of the 
Ottoman now was northward. The heroism of 
the Christian nations of Southeastern Europe, 
unaided to any valuable extent by Western 
Europe, was of no avail against the Muslim 
battles, armed with the most approved 
weapons. The whole southern shore of the 
Euxine was gained. The remainder of the 
Greek mainland followed, with Albania and 
Bulgaria. W barbaric fell and the other lands fol- 
lowed, the brave Knights of St. John holding on 
to Rhodes to the last. Early in the next period 
the Janizaries crossed the Danube, took Hungary, 
Transylvania, Podolia, and controlled the whole 
coast of the Black Sea. During the last part of 
the 17th century the tide turned and European 
Christendom has ever since slowly but surely 
been recovering its territory from the Muslims.

In the meanwhile another Mongol horde, 
pagan as to religion, had been penetrating 
Christendom further to the north. Genghis 
Khan, after spreading his rule through vast 
regions in Asia, moved westward north of the 
Caspian, invaded Russia, captured Moscow, 
and, but for the heroism of the German 
armies under Henry the Pious at Wahlstatt 
(1241). Then the Mongols retired from Europe, 
leaving the "Golden Horde" on the lower 
Volga, which for two centuries kept Russia in 
tumour. At length, late in the 15th century, 
Moscow and Novgorod and other dependent 
Russian states threw themselves against the 
several khanates into which the "Horde" had 
been broken up, and, under such leaders as Ivan 
The Great and Ivan III., succeeded in making 
the Tatars dependent. The long-drawn battle 
between Russian and Tatar (Turk) still goes on, 
and must to the end. The Nestorians seem to 
have been favored by the Tatars of this time, 
who accepted their missionaries. The mysterious 
Prester John was a Tatar prince converted in the 
12th century. Late in this period another Mon- 
gol appears—Tamerlane—descendant of Gen- 
ghis Khan, but a Muslim who made himself master 
of the countries from China to the Medieval- 
ranean and from the Volga to Egypt. He 
defeated the "Golden Horde," and thus indirectly 
helped the Russian Christians, but in his bloody 
conquests Russian vassals were made slave by 
Nestorian churches in the far East and Central Asia. 
Christianity was almost completely blot out of 
those regions. A few colonies of Nestorians remained, 
which were visited by Roman Catholic 
missionaries in the 18th and 14th centuries. 
Tamerlane died in 1405.

Turning to the south-western corner of Europe 
there were in this period substantial geographical 
gains for Christendom. As in Russia so in Spain, 
no outside forces were called in during the long, 
successful crusade. At the middle of the 18th century the Moors were hemmed up in the moun- 
tainous retreats of Granada. At length, through 
the joint efforts of the King of Aragon and the 
Queen of Castile, Ferdinand and Isabella, the 
last rampart was taken, and in 1492 Boabdil, 
the last Saresa ruler, sailed away to Africa.

Turning to the land of the Baltic, a most interest- 
gain to the territory of Christendom during 
this period, came through the valor of the Teu- 
tonic knights. In the 11th century some prog- 
ess had been made among the Wends, a Slavonic 
population living in Asia Baltic between the Nei- 
the Vistula. Gottschalk, their ruler, suffered 
mandom in 1066. Vicelin worked among 
them in the following century successfully, and 
the Wends slowly accepted Christianity. In 
1155 Saint Eric, the Swedish king, undertook 
the conquest and conversion of Finland, across 
the Gulf of Bothnia. This crusade against 
heathenism went on for centuries with varied 
success, but the Christianity of Finland was super- 
vised. After the Reformation, the Knights of the 
Sword, or Sword-bearers, conquered Latvia 
and Estonia in the 13th century, and Prussia was 
gained by the Teutonic Knights, or Knights of St. 
Mary, a little later. Lithuania and Pomerania 
were next won. Heathenism gave way to the 
Cross at nearly every point, and at last Russian 
Christians were more than half way by the 
militant faith from the west.

Enough has been said to justify the calling of 
this the crusading era of Christendom. Very 
little missionary work of the ordinary kind was 
done during these stirring centuries. In 1265 
dependent friars were sent among the Moguls by 
Innocent IV. In 1315 a disastrous attempt was
made to convert Muslims in Africa. Franciscans in Northwestern Persia are said to have had several missionaries on the site of Isfahan in the 15th century. In 1344 the Canary Islands, off the Atlantic coast, became a fief of the Pope. The Madeiras (1418-20), the Azores (1432-57) and the northwest coast of Africa (1460-97) received missionaries. The Cape of Good Hope was reached, the west to the Pacific Ocean and a new world was discovered just at the close of this period and the whole geographical problem that faced the Christian Church began to be understood.

VII. The Colonizing Church (1500-1700): Great as had been the expansion of Christendom in each of the previous periods, that of the 16th and 17th centuries was unequalled. The Russian Church, after the defeat of the “Golden Horde,” quickly spread all over the territory now occupied by European Russia. In 1580 Goa in India crossed the Indus, and within eighty years the Pacific was reached and over 4,000,000 square miles were added to the territories of Christendom—the whole upper half of the largest continent in the world. Church and state went hand in hand. The zeal of the Church was matched by the power of the State, and the Church in its turn paralleled the State in its development and growth.

But the great expansion of Christendom took place across the Atlantic, largely under the banners of Spain, Portugal and France, and through the instrumentality of Dominicans, Franciscans, and Jesuits. The fervid imagination of the Church was set on fire by the great discoveries of this period. The chivalric spirit threw itself into the work of the discoverer and the missionary. But the great expansion of Christendom took place across the Atlantic, largely under the banners of Spain, Portugal and France, and through the instrumentality of Dominicans, Franciscans, and Jesuits. The fervid imagination of the Church was set on fire by the great discoveries of this period. The chivalric spirit threw itself into the work of the discoverer and the missionary. By 1585 Mexico was conquered and brought nominally to Christianity, somewhat in the same way as the greater part of Europe had been. A little later Central America, Peru, Chile and the rest of South America, with the exception of the extreme southern peninsula, were dealt with in a similar fashion. Paraguay was a Republic under the Jesuit Missionaries, and California, New Mexico and Florida were reached.

The earliest attempt of Protestants to do foreign missionary work was also colonial in quality. Under the patronage of Coligny a missionary colony was undertaken in Brazil in 1555, but the work carried it over all but a few missions, a few of a more religious in its character, soon collapsed through the treachery of the leader. In 1559 Gustavus Vasa began mission work in Lapland, and substantial progress was made. Another attempt at planting a missionary colony in America, made by Coligny under Ribault in Florida, was unsuccessful, the colonists having been savagely butchered by the Spaniards in the so-called “last crusade.” In the meantime the English colonies in North America brought substantial gains to the territories of Christendom. France pushed up the St. Lawrence and the Jesuit missionaries found their way to the great lakes. In the meantime actual missionary work was pushed vigorously in the East. The Franciscans were the vanguard. The bishopric of Goa was established in 1520. In 1528 the Capuchin order was founded. In 1540 the Societas Jesu was established at Rome. Francis Xavier went to India and Japan. Father Ricci was in China. In 1622 the Propaganda was organized at Rome. Great but ineffectual efforts were made to do missionary work in Africa, especially on the Congo and in Morocco. In 1688 the missionaries were expelled from Japan, and a terrible massacre of native Christians occurred. The Dutch in 1602 began in the islands of the Portuguese in the East Indies. In 1602 the Dutch East India Company was chartered. Ceylon was taken (1636), as well as Java, Formosa, Amboway, Sumatra, Celebes and other islands. The natives were forcibly Christianized, but the mission of the globe by the year 1700 was fairly complete. The great discoveries had all been made. The Christian world was at last fully aware of the nature of the world-problem. Siberia, South America, Central America and Mexico, the West India Islands and the Atlantic seaboard in North America were the special additions to the territory of Christendom; in all fully 12,000,000 square miles.

VIII. The Church Evangelistic (1700-1790): It is not until we enter this period of the geographical expansion of Christendom that we find the Church pushing forward at all systematically to the conquest of the globe for Jesus Christ, and regaining the apostolic principle that such expansion only is gain as carries with it the hearts of the people of any territory newly occupied. The Propaganda was founded at Rome in 1622, but during the 18th and 19th centuries all the religious bodies of Western Christendom have one by one awakened to the duty of overcoming paganism and Mohammedanism. With experiments of the German pietists in the Danish mission in Tranquebar in 1709, and the organization of the little Moravian Church at Herrnhut in 1732, a new spirit appeared among Protestant Christians. A desire to obey the command of Jesus began to spread which was not alloyed by political aims or entanglements. Men in the different western churches began to feel for means of securing the extension of the kingdom in lands entirely closed to the influence of the Gospel. Among these prophets of a new era for the Protestant world, Carey stood almost alone in 1792, but his words carried conviction, and the great missionary societies sprang up all over the world and sent out their messengers until the pagan world is covered with a network of the agencies of evangelization; the Gospel is being preached and printed in every great language and in numbers of lesser dialects; the children and youth of Western Christendom are the 18th and 19th centuries all trained in Christian schools and a new type of manhood, purer, kindlier and more spiritually-minded, is attracting the people to enquire whence it has come. A summary of progress and results during this period will be found in the article Modern Missions, and need not be repeated here.

As we look on the map and discover small parcels of pagan territory like Hawaii, Samoa, Fiji, New Zealand and other islands of the Pacific which have been entirely Christianized within a century, and as we see men who were heathen like the people of these regions only a century ago like those of Southern India, of Japan, of South Africa, of Uganda, who are seriously taking up the work of evangelization, it is clear that this period of the expansion of Christendom is to continue until the maps of the world show no point which has not heard and adopted in some sort the gracious laws of the King of Kings.

GEORGENHOLTZ: A settlement in the Transvaal Colony, S. Africa, situated in the Zoutpansberg region on the River Pafari. Station of the Berlin Missionary Society (1877), with 1 missionary and 5 native workers.
GEORGETOWN: Capital of British Guiana, South America, situated on the right bank of the Demerara River, near its mouth and where it is nearly one mile wide. It has a surprisingly large number of homes and workers in every year, due to it being a mission station. The city is (1891) 53,200. The city was formerly called Stabroch. It was occupied as a mission station by the WMS in 1815 and since 1885 has been under control of the Eastern Annual Conference of the Wesleyans of the West Indies, with (1901) 6 missionaries, men and women, in 8 preaching places, 6 day schools and about 2,000 professing Christians. In 1903, by request of the Conference of the West Indies, the WMS decided to resume the charge of work in this field. Station also of the SPG (1855), of the Seventh Day Adventists (1887), of the PB, of the NBC (1892) and of the AME, the last named societies having together (1900) 18 missionaries, men and women; 28 native workers, men and women; and 880 communicants.

GEORGIAN LANGUAGE: Belongs to the Ural-Altaic family of languages and the Caucasus branch. It seems to stand aloof from other languages in respect of certain words which it has borrowed. It is written with characters peculiar to itself and with the further peculiarity of having two alphabets, one of which is known to the priests only and is used for sacred purposes, while the alphabet known to the people is considered too profane for use in the best literature.

GERLACHSTHAL. See SPRINGPONTEN.

GERMAN EAST AFRICA: A German protectorate and sphere of influence, lying between Portuguese E. Africa and British Central Africa on the south and British E. Africa and Lake Victoria Nyanza on the north. It has a coast line on the Indian Ocean of about 620 miles, and extends west to Lake Tanganyika and the Congo Free State. The area is 383,079 square miles, the population (estimated) 6,750,000, mostly composed of Bantu negroes. The German E. African Company in 1888 acquired a fifty years' lease of the coast territory, and in 1890 the German East Africa Company bought the Suhel of Zanzibar, by whom the lease had been made, thus acquiring a protectorate over a territory larger by one-half than the entire German empire in Europe. A convention with England has fixed the boundaries between the protectorate and the British E. African territories. The seaboard (the Swahili coast) is a swampy and alluvial region, intersected by numerous streams. The climate is malarious, the rainfall abundant, and vegetation luxuriant. All the tropical plants and several European species flourish. Mountain ranges, toward which the coast region gently rises, separate this region from the plateaus which form the water-shed between the sources of the seaward rivers and of those of the Congo region. The regions west of Usagara and Nguru, consisting of waterless plains, have a dry climate and are generally baron. The first of these plains separates the Usagara from the populous district of Ugo. Beyond that district a second arid plain is crossed, and the water-shed, averaging from 4,000 to 5,000 feet above the level of the sea, is reached. Hence flows the Shimyru River northwards deep in the interior. Nguru is the Nile; as it emerges, it becomes the Nile. The Rungi also rises here and flows eastward to the Indian Ocean, and streams which empty into Lake Tanganyika, and thence find their way to the Congo, have their birth here. A railway is open from Tanga to Mombo (82 miles). There are well-kept roads between the principal towns.

The present inhabitants of the German Protectorate are:

1. The Swahili (or coast tribes), the people of the coast and island of Zanzibar. They are of Bantu stock, and, while intermingled with immigrants from all the neighboring regions, have a considerable portion of the Mohammedan religion. The Arab element has enriched and extended their language, modified their usages, and developed their trading instincts.

The Swahili language is the general medium of intercourse with the tribes of the interior, and is spoken as one of the 12 most important languages of the world, with reference to the vast area over which it is spoken. Besides the Bible and many religious treatises, it possesses already collections of proverbs, legends, poems, etc., and a folk literature is receiving constant accession. The Arabic alphabet is being replaced by the Roman.

2. The Wasaga, inhabiting chiefly the Usagara highlands, which separate the coast regions from the interior plateaus, have, in some of their clans, become more or less civilized through intercourse with explorers, while other clans remain in unrelieved barbarism. Their language is widely extended. The pierced lower lobe of the ear, which sometimes hangs down to touch the shoulder, serves to hold tobacco pouches, instruments, etc., and is a mark of freedom. Slaves are forbidden to pierce or ornament the ears.

3. The Wazaramo are coterminous with the Swahili tribes on the west. Contact with the coast people has had a civilizing influence upon some of the tribes, who wear the Arab dress and have discontinued many of the ferocious practices which still prevail among their kin in the remoter districts. They do not practise circumcision, the in many respects much more Mohammedan influence. Their possession of firearms renders them formidable slave-hunters.

There are 7 Protestant missionary societies operating in this region: the German East Africa Mission, the Berlin, the Leipzig, and the Moraian societies and the Universities Mission and the CMS. The whole number of stations occupied is 36.

The Roman Catholic Missions have their headquarters at Bagamoyo.

GERMAN EVANGELICAL SYNOD of North America (1884): Previous to 1884, all the foreign missionary work of the Synod was done through European societies. Those interested in the work, however, felt that they should have work of their own, and a monthly periodical called The Missionary was issued to stir up the people with this end in view. Another element in the denomination, intimately connected with the Basel Society, the North German Society (of Barmen), etc., desiring that these societies should be supported, began the publication of the Evangelical Friend of Missions, to advocate their cause. Many members of the Synod deprecated this course, and a committee was appointed who were hostile to the advisability of the Synod's undertaking an independent foreign work and to report to a general meeting of the Synod in 1883.
Besides the above named missionary interests an independent, union mission society had been organized during the year 1865, in New Brunswick, by members of many denominations, including Lutherans, German Presbyterians, Moravians, German and Dutch Reformed, and Evangelicals. The official name of the society was German Evangelical Mission Society in the United States. It sent the Rev. Oscar Luther to India, in 1867, with instructions to choose his special field of labor according to God’s leading. Through the pleadings of the Rev. Mr. Cooper of Nagpur, on behalf of the Chamaras of Central India, he was induced to begin work among these people, the first station being established at Bisrampur, near Raipur.

The work was placed on a firm material basis, inasmuch as Mr. Lohr was able to buy a large tract of land (1,926 acres), upon which he colonized his first converts. This tract is the site of Bierampur station. By 1883 two outstations had been established at Ganespore and Raipur.

This union organization having found that it could not support the growing enterprise in India, proposed to the General Conference of the Synod that it undertake the care and support of this work. The offer was accepted. In 1884 the union mission was dissolved. At that date there were but two ordained missionaries in this field.

The two mission publications were merged into the Deutscher Missionsfreund, published monthly in German. The missionary work of the Synod is controlled by a Board of seven members, elected every four years by the General Conference. The increase in the interest of the churches at home has kept pace with the gradual expansion of the work in India, the direct contributions increasing from $5,000 in 1891 to nearly $21,000 in 1903. There are (1903) 4 stations and 4 outstations, 15 American missionaries, 119 native workers, and 2,263 communicants. There are also primary schools and orphanages, and an asylum for lepers at Chanduri, with financial assistance from the Mission Board at Ganespore and Raipur.

GERMAN INNER MISSIONS: Inner missions embrace the whole work of loving faith in Christ as Rescuer, and seek by the Gospel and its applied truth in deeds of mercy “to renew, within and without, the condition of those multitudes in Christendom upon whom has fallen the power of manifold external and internal evils, which spring directly or indirectly from sin, so far as they are not reached by the usual Christian offices with the means necessary for their renewal.” (Wichern).

All evil of every kind, in every social form and every class of men, is to be overcome (1) by the fullest, freest spreading of the Gospel, (2) by careful, comprehensive Christian charity.

History: While the unified labor as well as the definition of Inner Missions did not begin before Johann Hinrich Wichern (born 1808, died 1881), its direct precursors in evangelization, apart from the indirect stimulus of the Reformation and Pietism, were the “Christenthums-Gesellschaft,” founded by J. A. Urlepberger (Augsburg, 1780), a union of all living Christians to relieve the spiritual destitution of the masses, the Bible societies (the earliest, Nuremberg, 1834; Stuttgart, 1812; Berlin, 1814), the Tract societies (Wuppertal, 1814; Berlin, 1814; Hamburg, 1820), the Gustav Adolf Society, to aid evangelical Christians in Roman Catholic countries with churches and pastors (founded November 6, 1832 by Dr. Grossmann of Leipzig). In social works of mercy J. Fr. Oberlin (1740-1826), the uplifter of the Alsatian Steinthal; Freiherr v. Kottwitz (1737-1843), the founder of the orphan’s home at Weimar; Christian H. Zeller (1779-1860), founder of the Institute of Mercy and for Teachers among the poor in Beugen; Amalia Sieveking (1794-1859), “the Tabitha of Hamburg,” and in many others.

In 1833 Wichern founded a home for the rescue of depraved children in Horn, near Hamburg (Das Rauhe Haus), and developed a brotherhood. Independently, Theo. Fliedner (1836) universally renewed the female diocesan. In 1848, at the “Wave the whole country” (Unu) Wichern first aroused evangelical Germany to enthusiasm for the whole work of Inner Missions. In his “Denkschrift,” Die Innere Mission der Deutschen Evangelischen Kirche (1849), Wichern outlined the whole program of Inner Missions. It was necessitated by special, epidemic conditions of sin, which could not be met by family, State and Church. Inner Missions, twin-sister to Foreign Missions, sought especially the baptized that had lapsed. But in charitable work they had a wider scope. With the Church they sought to be free cooperation kept the church offices to be respected, the confessional limits were not to be disturbed, but each confession was to work separately in the common spirit of Christ’s love. Of the State and its ecclesiastical administration only the right of free association was asked. A central board and district societies were to be organized. The spiritually dead were to be revived, the general social condition was to be raised by Christian methods to be determined by the special needs and the locality. Wichern’s program was that Inner Missions were to be the guiding spirit of love begotten of faith, and in Wilhelm Loewe in Neuendettelsau, Bavaria (1808-1872), arose the promoter of Inner Missions in the strict Lutheran acceptance.

The union of all forces since 1848 caused such development of the home for the homeless (Petrihau in Bonn), Martha Homes for servants, the Christian founding asylums, and the Christian care of idiots and epileptics (the largest epileptic home is in Bielefeld; Pastor Bodeschwinch). Systematic care of the poor was stimulated by Pastor Shunk in Erlangen, and by work in Elberfeld. Social cooperation in loan societies was promoted by W. Raffeisen in Flammersfeld, while G. Werner in Reutlingen sought by “brother-houses” to develop a Christian socialism. Since 1871 Inner Missions received scientific recognition, and are now taught in the universities. In practical work all lines of evangelical and charitable endeavor have been begun, but of special importance are the Christian social work to oppose unchristian socialism (Court Preacher Stoecker of Berlin), and evangelization (Pastor Schrenk).

Purpose: The purpose of Inner Missions in the evangelistic branch is to bring the Gospel to the masses, and to care for souls whom the regular work of the state church does not reach. Indirectly and without criticizing or hindering the
established church, Inner Missions spiritualize those who lack living faith. In diaconic work Inner Missions seek to perform the tasks of mercy which rest upon family, state and church, and which these forms of social organization ought normally and should accomplish with their means, but which they cannot accomplish because of accidental, historical reasons.

Workers: As its agents, Inner Missions employ ministers as itinerants, or superintendents of institutions or city missions, trained male workers like the brothers of the Rauchhaus or deaconesses, patterned after the service of the ancient church, and frequently deaconesses, who represent the ancient female ministry of mercy (See Deaconesses). But in addition many free laborers are required, and, by emphasis upon the spiritual interest of believers, all Christians are encouraged to help.

The Work: This includes (1) training of children in day nurseries, Christian kindergartens, Sunday schools, orphanages, or educational societies; (2) the protection and education of the young, and industrial schools and homes for servant girls, young women's and men's associations, homes for apprentices and for traveling workmen (Herbergen zur Heimat); (3) the care of the sick in asylums for deaf and dumb, blind, idiots, epileptics, insane, cripples, children's hospitals; by fresh-air work, and through nursing the sick poor in their homes; (4) the protection of the endangered, as workmen wandering from place to place with their families, seamen, and emigrants; (5) the reclamation of the lost in refugee and neglected children homes for Magdalen and inebriate, farm colonies for tramps, and religious work among prisoners; (6) efforts to suppress social evils through city missions, parish work, care of the poor, saving banks, loan societies, Christian socialist endeavors; (7) evangelizing the people by free addresses, preaching, distribution of sermons, tracts, Bibles, and Christian literature, and by free libraries.

The Methods are determined with care and deliberation. Besides the individual workers there is a central advisory board, and there are district associations and conventions to discuss the problems. To obtain what is needed, societies are organized. The society (Gesellschaft) is largely a financial agency to secure regular contributions. Above it is the Association (Genossenschaft), which seeks to reach some social betterment by common aid. It occurs in the form of building associations, workmen's associations, charitable organizations, but all on a Christian basis.

The highest associative form is the fellowship meeting (Gemeinschaft). This demands religious maturity of its members, who unite for prayer and edification in the house of the Holy Spirit. The danger is spiritual pride, but when humility is retained the fellowship is the salt of the whole work. In addition to these forms of free association the modern Institution is needed for its helpers as well as those helped. The Institution is not considered the finality, it is employed as the available means for training deacons, deaconesses, for aiding the sick and destitute and for saving the depraved. While societies and institutions appear to hinder family life, and demand sacrifice of the workers, yet the same is not true of the Inner Missionists. The family altar is sought to be reected in homes; the lost, wherever possible, are restored to their homes; masters and workmen, mistresses and servants are brought together in common bonds. As Inner Missions attempt to uphold the family, so they also aid the state. By doing work which is the state's, by opening up the popular understanding of real needs, they induce the state to find means to care of the poor, the socially neglected, and the criminal. Better legislation is fostered, and the public conscience aroused. The Church is the goal of all this work. Many workers are pastors, and the spiritual work is directed into churchly channels. For state church and its governmental administration will not allow the incorporation of Inner Missions in the church, because they would lose their vitality, become official and fail in interesting and finding support from the common people. But whenever occasion permits, and when the work can be carried on successfully by the organized state church, it is transferred. Still the principle of free association is maintained as the most effective stimulus.

The efficiency of Inner Missions is best seen in their development of all works of mercy. Almost every field of work has been occupied. The evangelistic work has constantly grown. The general religious life is sober, constant rather than inter- mittent, sensational, emotional. Southern Germany, especially Wurttemberg, has a larger element of feeling in its religion. The fruitfulness of consistent life is evident. Least effective have been the endeavors to meet socialistic ideas by Christian counterorganizations on the basis of a Christian socialism. The ideals of Christian socialism are either too advanced, for state church and its governmental administration will not allow the incorporation of Inner Missions in the church, because they would lose their vitality, become official and fail in interesting and finding support from the common people. But whenever occasion permits, and when the work can be carried on successfully by the organized state church, it is transferred. Still the principle of free association is maintained as the most effective stimulus.

The response has, therefore, been comparatively small.

R.), The German Inner Mission (American Journal of Sociology, March, May, July, 1890).

GERMAN SOUTHWEST AFRICA: A German dependency on the west African coast which it borders on the north and dispossesses of the boundaries of Angola on the north to Cape Colony on the south. The territory reaches to the east as far as the 20th parallel and is bounded east by the British territory of Bechuanaland. It includes Damaraland and Namaqualand. The area is estimated at 326,117 square miles, larger than the population at 250,000, of whom 4,674 are Europeans, in great part Germans.

The cliffs stretch with greater or less regularity parallel to the coast, and at an average distance inland of about 120 miles. From the coast to the ridge the land is terraced. The land west of this ridge passes through deep depressions off into the Kalahari Desert and the Kubang basin. The rainfall is very slight, and much of the coast is a sandy waste, tho on the uplands much vegetation has been obscured. The coastland districts are vast fertile plains. Rich copper ores have been found in many of the plateaus. The population is very sparse, especially in the south, where droughts and famines have well-nigh depopulated the country. Hottentots occupy about three-fourths of the land, or only one-fifth of the population. To the north are the Bantu tribes, Hereros and Ovambos, described as robust, intelligent, and industrious, but still
in the pastoral stage. The Rhenish Missionary Society and the Finnish Missionary Society have established themselves in this country. Missionaries have great influence among the people. Their work was specially begun in 1842, and they have 25 stations in the territory.

**GERMANY; Missionary Societies in:** The actual names of many of the German Missionary societies being unfamiliar to English readers, search for them in their alphabetical place might prove fruitless. It has seemed best, therefore, to group their work in the alphabetical order of their first article in their alphabetical order. The work of the Basel Society, territorially distinct from societies established within the German Empire, and of the Moravian Brethren, which has an international quality, will be found described in the alphabetical place of each. As to the order in which the societies are named in this article, the alphabetical, rather than the chronological, order has seemed to offer advantages to our readers; also the year book of the General Missionary Conference of Saxony, to which we are much indebted, follows the other order of arrangement.

**BAPTIST MISSIONARY SOCIETY (German):** This Society has relations with the BMS, but carries on independent work in the Kameruns. Its offices are in Berlin, and in 1902 it had in the Kameruns 5 stations, 14 missionaries, men and women; 40 native workers, 47 schools, and 2,170 professing Christians.

**PERIODICAL: Unser Heidemission, monthly, Berlin.**

**BERLIN MISSIONARY SOCIETY (Gesellschaft zur Beförderung der Evangelischen Missionen unter den Heiden. Often mentioned in German reports by the name "Berlin I."):** The originator of the missionary movement in Berlin was "Father" Jänicke (1748-1827), a man of honest, often rude, earnestness, who was an almost solitary witness to the Gospel in a time of little faith. He founded in Berlin in the year 1800 a school for training missionaries which rendered noble service to the cause of foreign missions during more than 25 years. It was interest aroused in missions by the work of Jänicke's school which, in 1823, led ten men, including Neander, Tholuck, von Gerlach, Lecoe, and others, to issue "An Appeal for Charitable Contributions in Aid of Evangelical Missions." They next presented to King Frederick William III. the status for a society, which received his approval, and the organization of the Berlin Missionary Society was completed in 1824. An effort was made, but unsuccessfully, to unite this with Jänicke's school. Nevertheless, a few years after Jänicke's death the school was discontinued, and the royal grant was transferred to the Berlin Missionary Society. For a time the income was divided by the Society chiefly between Moravian and Basel mission work, but in 1830 a training institute on the same general basis as Jänicke's was commenced. For a time out of 1834 the Society sent out its own missionaries.

**Organization and Home Department:** The management of the Society is in the hands of a self-perpetuating committee, about 18 in number. The greater part of the funds come from auxiliary bodies of which the number is over 100, and from the different states of Germany, and which have been combined in provincial leagues. The training institute is the chief feature of the Home Department. Applicants must have a good common school education; be, as a rule, 20 to 25 years of age; have fixed Christian character and some maturity of Christian experience; have a good knowledge of the Bible; show good mental ability, industry, honesty, and a decided sense of mission. A probationary year in Berlin is required and then comes the course of five years. The studies include the classics, English, Hebrew and German, exegesis, church history, history of missions, theology, etc. Special emphasis is laid on the devotional life of the Bible.

An important factor in all the German societies is their relation to the confessions, liturgy, and ecclesiastical order of the Lutheran Church. The Basel Society is very broad and liberal in its relations. In laying down the principles for the Berlin Missionary Society, the Confession, defined that "The fraternal cooperation of evangelical Christians of all confessions, who have reached the Word according to the Scriptures, without human additions and without strife over unessential differences of opinion, has won for Christendom much fruitful territory among the heathen." The principle was substantially the same among the other societies.

This principle has been in spirit the ruling one in the work from the first, but not without incidents that have been sometimes embarrassing to the work. There was the more variation because the circumstances were novel, and new paths had to be marked out. The union position in the statutes in 1824 could not be carried out to the letter; in 1833 the first missionaries that were sent out were directed to model churches after the Lutheran plan, for the great majority of the supporters were of the confession. In the years following it was repeatedly declared that the symbolic books of the Lutheran Church were the basis of instruction in the seminary next to the Scriptures. The ministerial rescript of 1842, which regulated the examination and ordination of the students, by the Consistory, declared that "the Augsburg Confession should be the basis. The instructions given to the missionaries in 1859, and again the revised rules of 1882, require of them that their belief and teaching shall be that of the "canonical books of the Old and New Testaments, according to the Augsburg (unenhanced) Confession and the Lutheran Catechism." These directions are not regarded as being in conflict with the principles of the statutes, but were occasioned by the necessity of the case. Instruction, church organization, teaching, must, if they are to go beyond the first principles, be in accordance with some one of the great religious systems. In practice the disputed points can be kept in the background, and the spirit of the liberal principle that was laid down can be the ruling one.

In 1850 and 1851, while, on the one hand, the mission was taking on a more confessional character, there was a movement on the part of a minority of the committee for a broader platform. The majority, however, were against such abandonment of Lutheran organizations; the crisis was reached when one of the inspectors attempted to introduce ultra-Lutheran ideas into the seminary. This was intolerable to some of the students and committee; the withdrawal of the inspector upon his lapse to the Separated Lutheran party restored peace to the Society.

An important element in the general policy of the Societies was the idea, long cherished and kept in view, to make the stations self-supporting, and that not only through the beneficence of the converts, but by profitable enterprises within the limits of the stations.
The usual method of establishing a station is to acquire by purchase or by cession a property which may not simply serve for a lot on which to erect the buildings of the mission proper, but will be large enough to furnish for native converts who are to constitute the parish. The community thus gradually grows in numbers by settlement upon mission land; church and dwelling-house are erected; a school is established and, perhaps, a store, a mill, or whatever enterprises are wanted, or which the formation of an independent church will engender. The size of the station warrants it, a catechist comes to the aid of the missionary; native helpers are employed; outstations are opened up, and other preaching places in addition. These in turn are made independent of the original one as their growth or prospects warrant. In localities where there are German immigrants as well as natives, the work among the latter often begins as a branch of the activity of the former in their own church.

II. Africa, (1) Orange River Colony: The first missionaries of the Berlin Society went, in 1834, to open work among the Bechuana of South Africa. They were unsuccessful and three of the five men first sent out founded a station called Bethanie in Orange River Colony. Other stations founded in that mission were, Pienem (1846), Adamshoop (1866), Kaffraria: Berefontein (1875), and Beaconsfield (1885). The invention of the diamond mines brought into the field a mass of the worst elements, and a controversy with the British Government as to the legal ownership of the land occupied by the station had a depressing influence on the work. Of late the situation has improved and the mission reports: (1903) 8 stations, 65 outstations, 15 missionaries, 125 native helpers, 3,254 communicants, 1,084 pupils.

(2) Transvaal: In 1837 work was begun at Bethul, but without much apparent success for some years, largely due to the disturbed political condition. Other stations are Petersburg (1857), Emidzeni (1864), Ettemben (1868). There are reported (1903) 5 stations, 9 outstations, 7 missionaries, 26 native helpers, 500 communicants, 366 pupils.

(3) Cape Colony: Work in this section was commenced at Zoar (1838) in connection with the South African Missionary Society, and conducted with varying fortunes until 1867, when the entire work was assumed by the Berlin Society. The principal stations are Amalia-stein (1856), Riversdale (1868), Herbertsdale (1872), Mosselberg (1879), Laingeburg (1883). There are reported (1903) 7 stations, 31 outstations, 20 missionaries, 89 native helpers, 2,712 communicants, 1,100 pupils.

(4) Natal: Emmaus was occupied in 1847; other stations are Christianenberg (1848), Stendal (1860), Emangwieni (1863), Hoffentr and Königberg (1868). There are reported (1903) 6 stations, 38 outstations, 19 missionaries, 72 native helpers, 1,343 communicants, 200 pupils.

(5) Transvaal: In 1848 the Society decided to discontinue work that it had undertaken in the East Indies, and after some years it enlarged its work in Africa, occupying the Transvaal, with a mission which has become the largest and most prosperous in the mission. The first station was Gerlachshoop (1860), afterward destroyed in the tribal wars. So also Kathlolo (1861) had to be abandoned for some years. Bothabale (1865) grew rapidly even through the English and Boer troubles, a printing establishment and training school being established there. Other stations in South Transvaal are Pretoria (1866), Wallmansthal and Neuhalle (1869), and later, the headquarters (Hauptquartier of the WMS), Heidelberg (1875), Wogentin (1876), Arkona (1877), Lobethal (1877), Moseg (1880) and Johannesburg. In the South Transvaal Mission are reported (1903) 13 stations, 112 outstations, 17 missionaries, 191 native helpers, 1,000 communicants, 2,550 communicants, 1,700 pupils.

(6) German East Africa: With the partition of Africa and the adoption of European spheres of influence by different German societies undertook to care for the German sections. As early as 1891 the Berlin Society occupied Wamannshoek, near the upper end of Lake Nyasa, and it extended its operations in that vicinity, establishing stations at Mbaton (1892), Kamororo (1893), Kullombe, and Bulungwa (1895). Two years later, with the formal delimitation of boundaries, there was a great advance, and in 1897 6 stations were established—Kidu-gala, Iembeule, Lopembe, Mbejela, Mufindi and Muhanga, this last being the farthest north. There are reported (1903) 13 stations, 29 outstations, 25 missionaries, 20 native helpers, 115 communicants, 300 pupils.

II. China: In 1846 Gutzlaff, who had been in China nearly twenty years, most of the time as an independent worker, appealed to the Rhinians and Basel societies for assistance, and four years later by a personal visit aroused much interest. Various unions were formed, but eventually consolidated into two, at Stettin and Berlin. The three organizations worked on with varying success until the prosperity of the Berlin missionary in South Africa made it seem feasible for it to undertake a wider work, and in 1882 it took over the work in Canton, arranging boundaries with the Basel Society, and since then it has been prosperous. Most of its work is in the vicinity of Canton, at Yueting, Tsienyang, and Tasholin (1898), are some distance to the north. There are reported (1903) 11 stations, 88 outstations, 28 missionaries, 140 native helpers, 1,418 communicants and 500 pupils.

In sending out its statistics the Society reports a class of native Christians to almost every instance very nearly double the number of communicants.

The periodical publications of the Society are: Berliner Missionenzeitung, monthly; Missionsfreund, monthly; Kleiner Sammler, monthly; Kleiner Missionsfreund (for Sunday schools), monthly; Rosanna (for children), monthly. All these are published in Berlin.

BERLIN WOMAN'S MISSIONARY SOCIETY FOR CHINA (Frauen-Mission für China): This Society, organized in 1850, largely under the influence of Gutzlaff, has for its special purpose the care of Chinese girls who have lost or been separated from their parents, and their training into Christian workers. Its sole enterprise is the Bethesda orphanage at Hongkong, where 3 missions have 118 girls under their care.

PERSONAL: for members: Mitteilungen der Berlin Frauenvereins, etc., quarterly.

BLIND OF THE FEMALE SEX IN CHINA; GERMAN MISSION TO THE: This Society has its headquarters at Hildesheim. Its work has been limited to the
single station of Tso-kwong, near Hongkong, where it carries on a school for blind Chinese girls and where it has 2 women missionaries and 6 native workers, 16 pupils in the school, and 20 converts. It has now (1903) opened another school for the blind, in Kow-long, the territory on the mainland facing the island of Hongkong, which has been placed under the protectorate of Great Britain.

PERIODICAL: Tsaukwong, quarterly, Berlin.

Breklum Missionary Society (Schleswig-Holsteinische Evangelisch-Lutherische Missionssgesellschaft in Breklum): Among the churches uniting in the North German Missionary Society were a number in the province of Holstein. After some years one of the pastors, Jensen, who for a few years had edited a paper in which mission work was a special feature, was urgent that the churches of that section should have their own society. He did not at first receive much support, but went forward on his own account and in 1876 bought the ground for a mission institute, later securing the endorsement of about fifty churches. A board of twelve directors, clergymen and laymen in equal numbers, was appointed, the Luther Church Mission and the episcopal churches each giving one. The institute was dedicated the next spring at Breklum.

The first missionaries were sent out from the institute in the winter of 1882; two went in the service of the Netherlands Missionary Society, and two under the auspices of the new organization. The field to be opened was suggested by a missionary of another society—viz., the kingdom of Bastar, in the Central Provinces of India. The difficulties in this inland region, however, were very great, and after some delay the missionaries removed to the Vizagapatam district and formed a station at Sahir. The work was fairly begun in 1885, and since then it has developed until there are (1903) 7 stations, 51 outstations, 23 missionaries, 70 native helpers, 3,741 baptized Christians, 1,088 pupils.

PERIODICAL: Schleswig-Holsteinische Missionsblatt, monthly; Sontagsblatt für’s Haus, weekly; Frauen-Missionsblatt, monthly; Der Kleine Missionsherald, monthly; in Hamburg, Kassel, Hanover, Bremen.

China Inland Mission, German Branches:
(1.) China Alliance Mission, Barmen: This Society, organized in 1884, has 7 stations in the provinces of Che-kiang and Kiang-si, China. In 1902 he had in the field 13 missionaries, men and women; 10 native workers, 3 schools and 73 professing Christians.
ORGAN: Der China-Bote, monthly, Barmen.

(2.) German Branch, Liebenswal in Württemberg: It was organized at Hamburg in 1899, and has 3 stations in the provinces of Kiang-su, Hunan, and Shan-si, China. It has (1902) 7 missionaries, men and women; 1 native worker, and 2 schools.
ORGAN: China’s Millionen, monthly.

Deutsche Orient Mission: This organization grew out of sympathy for the needs of destitute Armenian survivors from the Turkish massacres of 1885-96. It is under the general direction of Dr. Lepaus, its founder, and devotes itself chiefly to school and orphanage work wherever Armenian refugees are found in Bulgaria, Persia, and Turkey.
PERIODICAL: Der Christliche Orient, monthly, Berlin.

Evangelical Missionary Society for German East Africa (Evangelische Missionsgesellschaft füge Ost-Afrika, Berlin III): This Society, organized in 1886 by Pastor Diederichs, carries on an extensive work on and near the coast of German East Africa. There are two centers, Dar-es-Salaam, just south of Zanzibar, and Tanga, near the border of British East Africa, opposite the Island of Pemba. The confessional question appears to have occasioned some temporary difficulty, but to have been settled. In 1902 the society had 140 missionaries, 1,088 native workers, 642 native Christians, 889 pupils in schools.

General Evangelical Protestant Missionary Society (Allgemeine Evangelisch-Protestantische Missionsverein): Under influences from Switzerland this Society was organized at Berlin in 1884, to represent the more liberal theological views in the Lutheran and Reformed churches. Its aim is to labor particularly among the educated classes in the more liberalized countries, and it lays special stress upon literary work and scientific instruction. It has (1902) 2 stations in Japan (Tokio and Kioto) and 2 in China (Shanghai and Kiao-chau). Altogether in both countries it has 8 missionaries, 140 baptized Christians, with 150 pupils in its schools.

The Society publishes two monthly magazines: Zeitschrift für Missionszwecke and Religionswissenschaft; and Missionsblatt des elbg. ev.-pro. Missionsvereins.

Gossner Missionary Society (Gossnersche Missionsgesellschaft, Berlin II): Johannes Evangelist Gossner (1773-1858) was baptized and educated in the Roman Catholic Church, and held a small benefice at Munich. He came early under the influence of Martin Boos, and gradually his evangelical tendencies became so apparent that in 1817 he lost his benefice. But he did not publicly embrace Protestantism until 1826. From 1829 to 1846, when he retired as pastor emeritus, he had charge of the Bethlehem Church in Berlin. The missionary zeal which gave his life its peculiar character, and his love of the poor, have been awakened by Martin Boos, who, tho he never left the Church of Rome, was himself a kind of evangelical missionary, and for that reason was violently chased from place to place by the Jesuits. But otherwise it was a spontaneous outgrowth of his own nature, and he received his specific impulse toward the preaching of the Gospel to the heathen from his intimate connection with Spittler, one of the founders of the Basel Mission Society and a representative of the Pietist circles in Germany, and from the Moravian Brethren, who for a whole century had been the sole representatives of the missionary idea in German civilization. He became, in 1831, one of the directors of the Berlin Missionary Society, but in 1836 withdrew because he could not bring his ideas of what a Christian missionary should be into harmony with the Society’s ideas of how a Christian mission should be worked. He had his eyes fixed upon the Apostle—a man driven onward by the fire of his faith and throwing all his cares on God, while the Society had adopted the English model of a mission—a thoroughly organized institution, supported but also governed by the Christian community that estab-
lished it. Gossner felt perfectly certain that he was not wrong, but it was a long time before he came to understand that the Society was not wrong either. He seems to have given up in despair, and felt very much perplexed when, some months later, eight young men, artisans, who could and would support themselves wherever they might go, were appointed by the Church at Nagpur to be instructed and prepared so as to be sent out by some mission society, or to go out on their own account to preach the Gospel to the heathen. However, "this comes from the Lord," he said to himself, and undertook the task. After about six months' preparation these young men went, under the leadership of the Scottsman, Dr. Lang, to South Australia, and in the meantime new pupils had been received.

Then came difficulties with the ecclesiastical authorities and the government, but in 1842 the Society received royal sanction. This, however, made no essential change in methods, the missionaries being transferred to other societies or left to their own conduct. Such a system could not continue, and Gossner was forced at last to accept an organization on a broader foundation. In 1844 a number of Gossner's pupils had their attention called to the work at Nagpur, in the Banda country, and they were enabled to continue the Kols and Chota Nagpers work there. The race was degraded and it was five years before a single convert was baptized. Then came such overwhelming success that the question was not about a more or less slow progress by single converts, but about the conversion of a whole people. "We will have them all," exclaimed Gossner in his enthusiasm; "every one of them." But it was evident that in its then organization—a loose association of individual efforts—the mission was not able to manage the affair. When the missionaries fell out with each other, Gossner had no other means of setting them right than telling them: "If you don't agree, I shall stop praying for you." Then two great calamities befell the undertaking—the Sepoy rebellion and the death of Gossner. At first the rebellion actually threatened to extinguish the mission. The missionaries fled to Calcutta; their houses, schools, and churches were demolished, and the native members of the congregation were exposed to harsh persecution. When this news reached Berlin, Gossner made an offer to transfer the whole institution to the English Church Mission Society. The latter, on the contrary, gave the new organization. For some reason the Society gave no immediate answer, and in the meantime the national feeling in Germany became thoroughly roused and sorely hurt by the idea that this undertaking, German in its origin and so promising of success, should be left to others to be carried through. Suddenly Gossner took a decision without waiting for the answer from the English Society, and, shortly before he died, he transferred the mission and all his personal property to a Curatorium. From his accounts it appeared that in twenty-one years he had received from others 300,000 marks, which he had spent on his mission, besides paying out of his own pocket 33,000 marks. He left personal property worth 150,000 marks, which he wished to have invested as a permanent fund. The total amount of his life work was but little more than 200,000 marks.

After the rebellion restitution for property destroyed by the rebels was made, but proved a bone of contention, resulting in the secession of a considerable number of the older missionaries, teachers, and helpers, with about 7,000 members, who petitioned the SPG to take charge of their interests, which it did. The original Society has, nevertheless, held in its way in Chota Nagpur, and reports (1902) 23 stations, 283 outstations, 46 missionaries, 360 native helpers, 51,557 baptized Christians and 4,978 pupils.

Periodicals: Die Biene aus der Missionsfelder, monthly; Die Kinderbiene, weekly; The Sunday School Times, semi-monthly.

Hermannsburg Missionary Society (Evangeliisch-Lutherische Missionsanstalt zu Hermannsburg): Louis Harms (1808-1865) was the son of a pastor at Hermannsburg, Hannover, and was ordained in 1844 assistant to his father, whom he ultimately succeeded. Always deeply interested in foreign missions, he became a director in the North German Missionary Society, and was offered a position as teacher in its institute, but declined. On the removal of that Society to Bremen, he was urged to form a society more distinctively Lutheran in its character which should provide a means for utilizing the missionary zeal of his church, and this he did as soon as he became full pastor of the church. From the first it was supported by the peasants, without special canvassing for funds, and the men chosen to go out as missionaries were from peasant homes.

Good education was the only educational qualification required for admission to the institute that was at once established. The course was at first four years, later lengthened to six. In this school not only books were taught, but also farming, carpentering, and the like; for one prominent feature of the proposed mission was that colonization should be united with evangelization. Christianity and the arts of Christian civilization should be introduced together. Moreover, the mission station should be largely self-supporting, in order that the home contributions might be devoted chiefly to defraying the expenses of sending out men. Music was emphasized from the first, as is also the case on the field. Practical homiletical training was gained by the pupils by holding mission meetings in the neighborhood.

In 1853, the first men—eight missionaries and as many colonists—were ready to enter on the work, and they were late in that year sent out on the "Candace," one of the mission ships that play so important and romantic a part in the history of missions. A printing establishment was founded in 1858, and the last year the mission was chartered. It was to remain a private affair, yet to be under direction of the Hanover Consistory, in so far as that ordination was to be by this body; a report was to be made to it annually, and the right of inspection to be yielded to it. An advisory committee of ten to twelve persons was established, to which the property of the mission was transferred. In 1860 a second Mission House was erected, the two alternating in receiving pupils for the whole course. The Institute, now at first only from the immediate neighborhood, is now so widely and favorably known that it is patronized from all parts of Northern Germany. Louis Harms was succeeded in the Director's office by his brother, Theodore Harms, during whose term of office there was a schism in the Hanover church. This was settled in the formation of the "Free Church in Hannover," under the lead of Harms. Popular interest in the mission, however, was so great that after Harms' death an arrangement was made for cooperation, each church being represented on the Board.
Of special interest is the policy of the Society, carrying out that of its founder. This was to Christianize the land into which his laborers should go; not simply to convert certain heathen, and attend to their spiritual welfare, but to infuse into heathendom the leaven of Christianity, that should influence the whole land, and that throughout the area. A reason for compelling the colonists; this led him to be satisfied with slow advance if only his object was reached in the territory already occupied; this led him also to counsel the establishment of a central station from which the new ones should be supported and superintended. But in the Transvaal was in his scheme not a little touch of old apostolical fervor: for example, among the settlers upon a station there should be perfect community of property; each was to work for the common good, and all acquisition was to be applied to mission purposes. The ordained missionaries, the not working for material prosperity, were none the less employed in mission work; and, on the other hand, the colonists were to be regarded as of equal rank with the clergy, tho their chief work was to supply the physical needs of those around them. But there are the very persons—the Transvaal Dutch Boers: latter the Hermannsburg Mission gave up the field to the L.M.S. There were reported (1900) 46 stations, 103 outstations, 45 missionaries, 396 native workers, 25,400 communicants, about 40,000 baptized Christians and 6,038 pupils.

2. India: In 1866 an appeal came to the Society for work among the Telugus of India, and men were at once sent out who established a central station at Naidupett. The work has increased but slowly, and there were reported (1900) 9 stations, 13 outstations, 12 missionaries, 91 native workers, 1,683 communicants, 570 pupils. Other enterprises commenced have been subsequently abandoned. One to New Zealand was given up, and one to Australia was handed over to the Evangelical Lutheran Synod of Australia. A work was also begun in Persia, which, however, has not been developed.

PERIODICALS: Hermannsburger Missionsblatt, fortnightly; Missionsblatt für unsere liebe jugend; Hermannsburg, Hannover.

JERUSALEM UNION IN BERLIN (Jerusalems-Verein zu Berlin). Founded by Court-preacher Strauss and others for the support of evangelical institutions in the Orient, in the vicinity of Jerusalem, this Society supports schools, hospitals, and hospices, for the "inner and outer mission" among the native inhabitants of that region, and among Germans resident there. The conduct of its affairs is in the hands of a committee of at least 16, who elect their own successors.

The Union, has from the first, enjoyed royal support, and for long years was under the special protection of Empress Augusta. Since the present Emperor's visit to the Levant, in 1897, it has received special support and encouragement.

The chief activity of the Union is in Jerusalem, where it has a less distinctively mission character than in other stations. Here the funds are supplied to support in part various German institutions which have a mainly national character. It contributes to the salary of the pastor of the German church, who makes quarterly visits to the Germans in Haifa and Jaffa, and to that of the assistant preacher, who is also teacher in the German school. As early as 1867 a collection was made in Germany for church building in Jerusalem; in 1869 the Prussian crown came
into possession of the Murestan, the site of the old convent Santa Maria Magna; the locality was excavated and now a fine church has been erected there. In connection with the parish is a Men's Union, and lately a Youths' Union has been established.

Other places occupied are Bethjala, Bethjala, Bethjala, Haifa, Jaffa, and, lastly, Bet Sahur. There are 2 orphanages, for Syrians and Armenians, an educational Institution (Talitha Kumi) for girls, a hospital under the care of the Kaiserswerth dispensary, a leper asylum. There were (1902) 430 pupils in the 8 schools.

KIEL MISSION TO CHINA: This Society was formed in 1897, with headquarters in Kiel but with its responsible head in the field. In 1902 it had 3 stations in China, in the district near Pakhoi, with 6 missionaries, men and women, 3 native workers, 1 school, and 33 professing Christians.

ORGAN: Er Kommt, fortnightly, Kiel.

LUTHERAN FREE CHURCH OF HANNOVER, MISSIONARY SOCIETY OF: This Society has its headquarters in Hannover. It is a branch of the Evangelical Lutheran Missionary Society, and carries on missions in Natal and Transvaal in S. Africa. In 1902 it had in the field 9 missionaries, 41 native workers, 17 schools, and 4,050 professing Christians at 8 stations.

LEIPZIG EVANGELICAL LUTHERAN MISSION SOCIETY (Evangelisch-Lutherische Mission zu Leipzig): As early as 1819 there was in Dresden a missionary association closely affiliated with and working through the Basel Society. With the development of the confessional question and the desire to emphasize distinctively Lutheran creed and organization, the individualistic methods of Basel were not altogether satisfactory, and in 1832 the Dresden association established its own mission school, which in 1836 developed into a complete missionary seminary, and in the latter year it also constituted itself an independent mission society, which was removed to Leipzig in 1846.

In 1844 Dr. Karl Graul became president of the society and director of its seminary. He traveled extensively in the East and came to conclusions which resulted in the complete dissolution of the connection between the Leipzig and the Basel societies. The Basel Society, in accordance with all pietistic missionary labor, aimed chiefly at individual conversions. Dr. Graul, on the contrary, looked for a national conversion, and he consequently demanded more from the missionaries he sent out, namely, an intimate acquaintance with the whole state of civilization,—religious, scientific, literary, political, and social,—among the people to whom they were sent. He also wished to make the Leipzig Society the center of the entire missionary activity of the Lutheran Church, and he gave its labor a strictly Lutheran character, which imposed upon the laborers a certain reserve toward their colaborers of other denominations.

MISSIONS. 1. INDIA: As was natural, the attention of the Society was turned to India, and some of its missionaries commenced work among the Tamils in 1840. This gave good occasion for the transplanting of the institution to the old Danish-Tamil Mission (itself conducted on high-church Lutheran principles), when Tranquebar was ceded to England in 1845. Two years later the transfer was complete, and the Leipzig Society entered into the inheritance of Ziegenbalg and Schwartz.

The caste question at one time threatened to endanger the success of the work, as the policy of the Leipzig Society in regard to women was rather too lenient. That, however, was overcome, and the growth and strength of the mission is indicated by the following figures (1902): 40 stations, 769 out-stations, 41 missionaries, 743 native workers, 19,178 communicants, 9,407 pupils.

In Africa: Youths' missions in 1892 the Leipzig Society joined the number of German organizations working in Africa, and took charge of a mission in British East Africa, which had been founded by a Bavarian Society. This mission, called the Mahamba Mission, has (1902) 3 stations, Jumpa (near Mombassa), Ikutha (near Mt. Kenya), and Mulango, with 9 missionaries.

A little later the Society began a distinct mission in the vicinity of Mt. Kilima Njaro, in German territory, known as the Majanga Mission. This reports 8 stations, and 16 missionaries.

The Women's Aid Society of the Leipzig Evangelical Lutheran Mission (Frauen-Heil's Vereine der Evangelischen-Lutherischen Mission zu Leipzig) is auxiliary to the Society, with special reference to its work for women in India.

NEUESDEITELSAU MISSIONARY SOCIETY (Gesellschaft fur Innere und Ausere Mission im Sinne der Lutherische Kirche): This Society was organized first, in 1849, with special reference to work among Lutherans in America, and, to some extent, among the Indians. Later, in 1885, in connection with the Immanuel Synod of Australia, it commenced work among the natives, and the same year celebrated the occupation of Kaiser Wilhelmsland (New Guinea) by sending missionaries there. It reports (1902) 7 stations, 15 missionaries, 30 communicants, 90 pupils.

Periodicals: Freundschaft kirchlicher und politischen Wochenblatt, weekly (with supplement relating to work in North America, Australia, and New Guinea).

NEUKIRCHEN MISSIONARY INSTITUTE (Neukirchener Missionaranstalt): This Society was founded in 1882 by Pastor Doll of Neukirchen, partly to carry out a vow made during a severe illness, and partly to provide for Germany an institution representing the standpoint of the China Inland and similar faith missions. It has, however, come to be conducted on the same general lines as the other societies.

The fields of labor are Java and British East Africa. There are reported (1902), in Java, 7 stations in the two districts of Samarang and Rembang, 9 missionaries, 46 native helpers, 565 baptized adults, 562 pupils. The classes reached are Mohammedans, Javanese, Chinese and some Arabs.

In Africa the work among the Mohammedans, along the Tana River, has not proved successful, but one baptized adult being reported at Lamu after 14 years of effort. Among the Swahili there has been better success. There are (1902) 4 stations, 8 missionaries, 142 baptized adults, 171 pupils.

Periodicals: Der Missions- und Heidenbote, monthly, with supplement; Jugendmissionblatt, monthly; Die Uhren- laserin, semi-monthly. Neukirchen.

NORTH GERMAN MISSIONARY SOCIETY (Norddeutsche Missionsgesellschaft): As early as 1802 there was formed in East Frisia, in response to
influences from the Moravian and the London Missionary Societies, a "Mission Society of the Mustard Seed," for the purpose of collecting funds in aid of missions. Other similar unions were formed throughout North Germany, the most important being those in Rhenish and Lower Lusatian. Aid was sought and collections were sent to Jänicke in Berlin and to Basel, and two men presenting themselves for service aroused great interest. Other unions were organized at Lübeck (1820) and Hamburg (1823), but no movement toward affiliation was made until 1834. In 1836 several of them, the Elberfeld, Stade, Hamburg, Lauben, Ritzebuttel, Lehe, and Bremerhaven, organized the North German Missionary Society, with headquarters at Hamburg, where in 1837 a Missionary Institute was established.

From the beginning there were in these unions numbers of both the Lutheran and the Reformed bodies, and this resulted both in difficulties on the field and divided counsel at home. Gradually, as the discussion grew sharper, several of the more distinctly Lutheran unions withdrew; the headquarters were removed to Bremen, and the Society gradually became largely Reformed, to the union feature never disappeared, and there are Lutherans as well as Reformed members on its committees.

Africa. The first movement of the Society was toward New Zealand, where work was commenced in 1842 but not developed, the one of the two missionaries remained for some time and continued to receive help. The next year men were sent to the Telugus in India, but that work was handed over to the American Lutherans, and the Society concentrated its efforts on the west coast of Africa, just east of the Gold Coast Colony. Among the principal stations are Accra, Anyako, Keta, etc. The terrible climate has been a heavy drawback, but the Society has persevered and reported (1902) 5 stations, 37 outstations, 27 missionaries, 74 native workers, 2,908 communicants, and 1,487 pupils. Periodical: Monatsblatt der Nord. Miss.-Gesellschaft, monthly, Bremen.

Rhenish Missionary Society (Rheinische Mission-Gesellschaft in Barmen): A small missionary union of twelve laymen was formed in 1799 in Elberfeld. As it grew in numbers it inaugurated the Bergische Bible Society and the Tract Society of Wuppertal. In 1819 a similar union was formed at Bremen, which worked in connection with the Basel Missionary Institute but organized its own school in 1825. Three years later these two, joined by unions at Cologne and Wesel, formed the Rhenish Missionary Society, with headquarters at Bremen. The first missionaries went to South Africa and landed at Cape Colony in October, 1829. In that region 40 missionaries under the direction of the Moravian Brethren, the London Missionary Society, the Wesleyans, and the Scotch Free Church were already in work at 30 stations among the Hottentots, Kafirs, Negroes, Bastards, etc. Therefore the Rhenish missionaries hesitated where to go. Finally, in the beginning of 1830, they founded their first station at Wuppertal, and in 1832 they built and consecrated their first church at Unterhagen.

In 1834 the Society found that they had more missionaries ready for work than could be employed in Africa, and, moved by what they had heard from the American missionary, Abeel, and the LMS missionary, Medhurst, they decided to open a new field in Borneo, to which they afterward added two other islands in the Dutch colonies of the East Indies, Sumatra in 1862, and Nias in 1865. In 1846 they also began a Chinese mission, and in 1857 inaugurated work in Kaiser Wilhelm and in New Guinea. In its general character the Rhenish Society has followed the main lines of the Basel Missionary Society, and carries the cordial support of both Lutherans and Reformed. It met with financial difficulties in 1851, which compelled the transfer of the headquarters from Cologne to the Basel and Berlin societies, but it soon regained lost ground and continued to enlarge its work.

Missions. 1. Africa: There are three missions in Africa: Cape Colony, Namaqua-Herero, and Ovambo. The Cape Colony mission covers the region to the vicinity of Capetown. The territory it occupies is known as the station, Carnavon, in the center of the colony, and three others, Steinkopf, Concordia, and Komaggas, are in the northwest part of the colony. The work is among the Hottentots, Negroes, holfrode, and Kaffirs. The schools are crowded and the industrial and commercial elements of the work are well developed. There are (1902) 10 stations 14 missionaries, 136 native helpers, 6,547 communicants, 2,547 pupils.

The Namaqua and Herero mission is in Germany West Africa, and covers the entire territory occupied by the Namaqua Hottentots and the Herero Negroes. There are (1902), 24 stations, 35 outstations, 35 missionaries, 123 native helpers, 5,303 communicants, 2,405 pupils.

The Ovambo Mission is on the border of German West Africa, and covers the entire territory of Angola. The youngest of the missions, it has 3 stations, 5 missionaries, 2 native workers, 35 communicants, 130 pupils.

2. Dutch East Indies: The work of the Rhenish Society in Borneo was commenced in 1842 among the Dyaks of the southeastern portion of the island. The first efforts met with little success, with no convert being baptized in eight years. They adopted two measures, both of which miscarried: i.e., the ransoming of "pandelasings," or slaves, for officers, and compulsory attendance at their schools. The Dyak is a very poor people; they were not paid a rice-seed, and another has a gold crown so heavy that he cannot bear it. Then the poor man borrows of the rich, but the rate of interest is so outrageous that a very small debt will in a very short time make a man a "pandeling." He likes, of course, to be ransomed, but that ransom cannot make him a Christian. By the agency of the Dutch government the Dyak children were driven to the mission school, but that was not the true entrance to Christianity either. In 1859 the whole fabric suddenly tumbled down. The Dyaks rose in rebellion, seven missionaries were killed, the rest fled to Bandjermasim, the seat of the government, and all the stations were burnt down. In reality, the rebellion was raised against the Dutch government, but the missionaries were caught up in it and they were not able to resume work until 1866. From that time, however, the work has progressed steadily and surely. There are reported (1902) 8 stations, 16 outstations, 11 missionaries, 42 native workers, 1,085 communicants, 688 pupils.

A mission to the Dyaks was organized in 1862, and has rapidly developed into the most important field of the Rhenish Society. Circumstances were propitious. The climate is much better than that of Borneo, as most of the stations are
situated at an altitude of 2,000 feet or more. The country is well filled up, and the Battas, the Malay tribes along which the mission works, are possessed of some civilization. They have themselves reduced their language to writing, and they like to read. Dutch missionaries have long ago mastered the language for all scientific and literary purposes, and the whole Bible is translated into Batta. Very fortunate also it will be that the Battas' missionaries early came in contact with the Battas. Hence the sensitiveness shown elsewhere concerning missions to Islam was not allowed free play. When the Mohammedans of Sumatra petitioned the king of the Netherlands for the expulsion of the Christian missionaries, the request was refused.

There are reported (1902) 32 stations, 205 outstations, 60 missionaries, 1,152 native workers; 22,524 communicants, 10,902 pupils.

A mission in Nias was commenced in 1865. It reports (1902) 12 stations, 12 outstations, 20 missionaries, 77 native workers, 3,904 communicants, 820 pupils.

The youngest mission of the group, in the island of Mentawei, south of Nias, was organized in 1901, and reported in 1902 1 station, 2 missionaries, 1 native worker, 7 communicants, 10 pupils.

3. China: Since 1846 the Rhenish Society has had a mission in Hongkong and vicinity, and 1 station, Tai-ping, in the southwestern part of the Kwang-si province. The report shows (1902) 6 stations, 10 outstations, 14 missionaries, 29 native workers, 883 communicants, 290 pupils.

4. New Guinea: Soon after the formation of the Colony of Kaiser Wilhelmsland the Rhenish Society felt the responsibility for mission work among the Papuans and in 1887 opened a station at Bogadji. Here are (1902) 4 stations, 7 missionaries, 128 pupils.

SUDAN PIONEER MISSION: A society formed in 1900, with headquarters at Eisenach. In 1902 it had in the field 1 missionary and 1 woman missionary, 3 native workers, and 2 schools, with 150 scholars, all at Assouan, in upper Egypt.

Ogda: Der Sudan-Pionier, monthly.

WOMEN'S SOCIETY FOR CHRISTIAN EDUCATION OF THE FEMALE SEX IN EASTERN COUNTRIES (Frauenverein für christliche Bildung des Weiblichen Geschlechts im Morgenlande): This Society, organized in 1842, is known also as the "Berlin Woman's Missionary Association" and the "Woman's Oriental Union." Its chief work is the sending out of teachers and deaconesses to various fields, chiefly India, who work in connection with other societies. Many of these teachers are under the CMS. The Society has for its own chief work a foundling asylum at Sikandra, North West Provinces. In 1900 and 1901 two women were sent to China. The principal of the Talatha Kumi orphanage of the Jerusalem Union was sent out by this Society.

MISSIONSBLAT der Frauenvereine, etc., monthly, Berlin.

The German Foreign Missionary Societies have united in forming an "Executive Committee" (Ausschuss der deutschen Evangelischen Missions-gesellschaft), which has advisory functions when called upon. Each of the Societies must be in a position to discuss questions that affect the whole missionary interest, and which represents the united societies in all relations with the Government. This Executive Committee is composed of five members elected annually, and meets, whenever necessary, at the call of the secretary. The secretary for the year 1903-04 is Rev. A. Merenski, D.D., of the Berlin Missionary Society.

GERTRUDSBERG: A settlement in the extreme north of the Transvaal Colony, S. Africa, situated in the Zoutspanberg district, on the slopes toward the Limpopo River, and among the Bawembia tribes. Station of the Berlin Missionary Society (1899).

GAZIABAD: A town and railway junction in the United Provinces of India, situated 15 miles E. N. E. of Delhi, in the district of Meerut. Population (1891), 10,000, of whom about 6,000 are Hindus and about half that number Muslims. Circuit station of the ME, with (1900) 12 native workers, men and women; 8 day schools, and 1,900 professing Christians. Station also of the CMS (1894), with (1903) 2 missionary women and a dispensary.

GAZIUPUR: A city in the United Provinces, India, situated 40 miles E. N. E. of Benares, on the lowlands bordering the Ganges. The district of Ghazipur is one of the hottest and dampest in this part of India. The city has a monument to Lord Cornwallis, who died there in 1806. It is the center of the government opium monopoly and manufactury. Population (1891), 45,000, of whom about two-thirds are Hindus and one-third Muslims. Station of the Gossner (German) Mission, and of the Zenana Bible and Medical Mission.

GHEG LANGUAGE. See ALBANIAN.

GIATWANGAK: A settlement in British Columbia, situated on the Skeena River, about 120 miles from Metlakatla. Station of the CMS (1882), with a constituency both among the Indians and among Chinese employed in salmon canning works.

GIBARA. See JIBARA.

GIBEON: A station of the Rhenish Missionary Society in German Southwest Africa, situated about 190 miles N. E. of Angra Pequena. It has (1903) 1 missionary and his wife, 3 native workers, one a woman; 1 day school, and 333 professing Christians. The people among whom this station is established are Namaquas in the main.

GIFU: A town and railway station on the main island of Japan, situated 75 miles E. N. E. of Kioto. It is the capital of the prefecture of the same name, and has a population (1898) of about 31,000. Station of the CMS (1890), with (1903) 4 missionaries, men and women, and 7 native workers, men and women. Two interesting features of the work here are the home for ex-convicts and the school for the blind.

GIKUKI: A settlement in Portuguese East Africa, situated on a high bluff overlooking Inhambane Bay. Station of the ME (1884), with (1903) 1 missionary and his wife, 9 native workers, men and women, a printing house and a high school.

GILBERT ISLANDS: A cluster of coral islands in Micronesia, lying on both sides of the equator. Population estimated at 32,500. The climate is equable, and the therm is not oppressive. The inhabitants resemble the Malays. Before the advent of missionaries they were fond of war and prone to suicide; kind to their children, hospitable, generous, and more considerate of
women than is usual among savages. They ate human flesh occasionally, but were not habitual cannibals. These islands are now under British, and missionary work has been going on since 1831, during the 19th century is under the Hawaiian Evangelical Association (in cooperation with the ABCFM), greatly aided by the new conditions which foreign control supplies. The training school for the Gilbert Islands is at Rukai, where one of the missionaries resides. Literary work for the islands occupies another missionary residing at Honolulu, H. I. A third missionary spends his time in touring from island to island in a vessel chartered for the purpose. One missionary and his wife (Hawaiians) reside on the island of Malana, in the islands of Marakesi, Aranaka, Kuria, and Nonouti, the additions to the Church (in 1901) numbered 80. The southernmost islands of this group have been under care of the LMS and are virtually Christianized.

GILBERT LANGUAGE: Belongs to the Micronesian family of languages and is spoken by the people of the Gilbert Islands. It was reduced to writing by missionaries of the ABCFM with the use of Roman letters.

GILL, William: Born January 14, 1813, at Totness, England; sailed April 11, 1838, as a missionary of the LMS for Raratonga; stationed at Arorangi in that island. In 1842, in the absence of Mr. Buzacott from Raratonga, he took charge also of his station and of the institution at Avuva. Between 1843 and 1846 he visited the other islands of the Hervey group, spending six months in Mangi and the New Hebrides, New Caledonia, and the Loyalty Islands, returning by way of Samoa to Raratonga. In addition to his evangelistic and pastoral work he translated the Rarotongan Bible, besides other books in that language. His wife devoted herself to the elevation of the native women. In 1853 he went to England and did not return to the mission field. Before his connection with the Society ceased he printed the second edition of the Rarotongan Bible, besides other books in that language. In October, 1856, he was settled as pastor at Woolwich, and died at Blackheath in 1878.

GILLESPIE: A settlement in Griqualand East, Cape Colony, S. Africa, situated near Mt. Avery. Station of the UFS (1889), with (1903) 1 missionary and 11 native workers, men and women; 12 outstations, 1 day school, and 600 baptized Christians.

GILMOUR, James: Born near Glasgow, June 12, 1843. Died in Mongolia, May 21, 1891. With his master's degree won at Glasgow he entered Cheshunt College, near London, where he took a two years' theological course. On February 22, 1870, he sailed from Liverpool as a missionary of the LMS, and on May 18 he reached the Chinese capital, which was to be his headquarters of his future work, so far away over the Great Wall on the Mongolian highlands. He arrived in China at the critical time when an anti-foreign storm was on the eve of breaking out at Tien-tsin; but the young missionary, within three months after his arrival, started up through the famous South Pass, toward the frontier city of Kalgan. The Mongolian field stands as a buffer state between Siberia and China proper, with an area more than one-third as large as the United States. Much of Gilmour's missionary life was spent among the agricultural Mongols; and single-handed he succeeded himself in selecting the Gospel among 2,000,000 of the most superstitious and exclusive persons in all the East. Between the years 1818 and 1841, the missionaries Stallybrass and Swan had labored at Selenginsk and Ougan Dome, with several assistants; and they left, besides the graves of some of their numbers, a Buriai-Mongol translation of the Bible and several earnest converts. Save for a few copies of the Scriptures found here and there, preserved carefully by a few native Christians, Gilmour found little to build upon; but this itinerant evangelist for years was untiring in his journeys, living usually with the nomadic tribes in their tents, and witnessing for Jesus as they gathered about him in the fields or along the mountain sides. As a lay physician, Gilmour was greatly aided in securing the confidence of the Mongols; and at his street-tent dispensary in towns, nearly 300 miles northeast of Peking, he blessed the bodies and souls of hundreds of this rude people. After 1886 he made Chiao-yang his headquarters. Mrs. Gilmour was a genuine helpmeet to her husband, and her educational work among the women and children was far-reaching in its influence. Besides his work far from the cities, Gilmour labored also at Peking, Tien-tsin and Shan-tung; but on the Mongolian plains he loved most to witness for his Master.

Gilmour (J.), Among the Mongols, 1884; Lovett (R.), Gilmour of China, 1891.

GIBSONE: A town and port of entry in New Zealand, situated on Poverty Bay, on the E. coast of the North Island, 85 miles N. E. of Napier. Population, about 3,000. Station of the CMS, with (1903) 2 missionaries, one missionary's wife, 85 native workers, men and women; 11 outstations, 2 village schools, 1 theological training institute and 4,000 baptized Christians.

GIZ LANGUAGE: Giz is another name for the ancient Eophician language of Abyssinia, now found in books only and replaced by the Amharic in ordinary use. It is written with the same letters as Amharic except that it lacks one or two letters which correspond to the latter language under influence of the Arabic.

GLEASON, Anson: Born at Manchester, Conn., May 2, 1797. In 1822 he became an assistant missionary of the ABCFM, and in January, 1823, started for the Choctaw country. He traveled the long journey on horseback. After eight years of service among the Indians, the health of his family obliged him in 1831 to return north. He then came into connection with the Mohicans settled near Norwich, Conn., and a church having been formed, he was ordained as its pastor. For a time he was district secretary of the ABCFM in Vermont and New Hampshire; for ten years he labored among the Seneca Indians near Buffalo, and he afterward became a city missionary, serving with unabated interest until his death, in Brooklyn, N. Y., February 24, 1885.

GLEN HAVEN: A town in the eastern part of Jamaica, W. I., situated in Portland, about 7
miles S. W. of Buff Bay. Station of the AFFM (1851).

GLENTHORN: A settlement in Cape Colony, S. Africa, situated near Linton in the district of Bedford. Station of the UFS (1840), with (1905) 1 missionary and his wife and 2 native workers.

GNADENDAL: The oldest mission settlement of the Moravians in South Africa. It was founded in 1737 by George Schmidt. On his expulsion from the colony the work was suspended for nearly fifty years; it was then, in 1792, renewed, and an old convert of Schmidt's being discovered still residing there, it was fully preserving a Dutch Testament he had given her. The settlement is situated in the district of Caledon, 65 miles E. of Cape Town, near the junction of a rocky glen called Barian's Kloof with the valley of the Sonderend, down which it extends nearly a mile and a quarter. The name means "Valley of Grace," and was chosen, it is said, by one of the old Dutch Governors, who was moved by sight of the work of the mission. It has now (1901) 14 missionaries, men and women; 87 native workers, men and women; 4 preaching places; 4 day schools, the 1 theological seminary (founded 1838) and 740 communicants.

GOALPARA: A town in Assam, British India, situated on the left bank of the Brahmaputra, 70 miles W. of Gauhati. It is a very miserable situation, as unhealthful for natives as for Europeans. The civil officials live on a hill 250 feet above the plain. Population (1891), about 5,500, of whom 3,500 are Hindus. Station of the CMS (1897), with access to the Garos and Rabhbas.

GOBAT, Samuel: Born at Crémieux, Berne, Switzerland, January 26, 1799. At the age of nineteen, having an earnest desire to be a missionary, he entered the Basel Missionary Institution, previously perfecting himself in the German language. In 1823 he was sent to Paris to study Arabic and Oriental study. Appointed in 1826 to commence a mission in Abyssinia, he returned the continent, received Lutheran ordination, and sailed for Egypt in September of that year. He spent three months at Jerusalem in 1827 in making acquaintance with the Abyssinians at the monastery in that city, and from 1830 to 1833 he traveled extensively in Abyssinia proclaiming the Gospel to priests and people. His health having failed, he left for home at the close of 1836, and was associated in 1839-42 with the Society's missionaries at Malta, in superintending the translation of the Bible into Arabic, and taking charge of the printing press. He was appointed vice-president of the Malta Protestant College in 1845, and the same year, visiting England, was ordained deacon in the Church of England. After the episcopal of the Anglican Church at Jerusalem became vacant by the death of Bishop Alexander, Mr. Gobat was nominated as his successor by the King of Prussia (Frederick William IV.), and consecrated at Lambert July 5, 1846. His work in Jerusalem left a permanent mark on the country, being notable for piety, vigor, tact, and good judgment. He died in Jerusalem May 11, 1879. He wrote A Jour-

nal of Three Years in Abyssinia (London, 1847).

GOCHAS. See Gokhas.

GODDA: A town in the Santal Parganas, Bengal, India, situated W. of the Rajmahal Hills, about 140 miles S. E. of Bhagalpur. Station of the CMS (1903) 1 missionary and his wife, 232 native workers, one of them a native woman, 18 outstations, 18 day schools, 1 boarding school, 1 dispensary, and 432 baptized Christians.

GOHRA: A town in the Bombay Presidency, India; situated in the Panch Mahals district, about 40 miles N. E. of Baroda. The town is almost entirely surrounded by jungle. Population (1861) 1,400, of whom 7/8 of the Mohammedans and the most of the remainder Hindus. Station of the ME, with (1902) 1 missionary and his wife, 45 native workers, 1 orphanage, and 522 professing Christians.

GOEDE HOOP. See Good Hope.

GOED FORTUIN: A settlement in British Guiana, S. America, situated on the Demerara River, about 12 miles S. by W. of Georgetown. Station of the CMS (1838) 1 missionary and his wife, 5 outstations, 5 preaching places, 4 day schools, and 391 professing Christians. This, with other work of the W. L. Wesleyan Conferences, was transferred back to the CMS in 1903.

GOEDERWACHT: A settlement in Cape Colony, S. Africa, situated about 35 miles west of Piquetburg and about 90 miles N. by W. of Cape Town. The place was originally a Hottentot settlement founded by a planter who bequeathed the land to his faithful slaves. The name, meaning "well guarded," refers to the nature of the site, which is surrounded by a spur of the Mountberg, overlooking St. Helena Bay. Station of the Moravian Missions (1845), with (1900) 2 missionaries and their wives, 25 native workers, men and women; 1 chapel, 1 day school, and 200 professing Christians.

GOGO (Gogha): A town in Kathiwar, Bombay Presidency, India; situated in the district of Ahmadabad, on the W. side of the Gulf of Cambay, 45 miles W. of Broach. The climate is temperate and healthful. The natives are considered the best sailors in India. Population (1891), 6,600, of whom 3,200 are Hindus and the rest part of the remainder Muslims. Gujarati is the language of the district, but a dialect peculiar to the Muslims is also used and known as Musulmani. Station of the Presbyterian Church in Ireland (1845), with 1 missionary and his wife and 2 native workers.

GOGO LANGUAGE: Belongs to the Bantu family, and is spoken by about 100,000 people living in the central part of German East Africa, west of Mpwapwa. It was reduced to writing by missionaries of the CMS and is another case of the use of Roman letters by iliterate tribes.

GOKHAS: A station of the Rhenish Missionary Society in the eastern part of German Southwest Africa, situated among the Namaquas, about 300 miles S. E. of Wallfisch Bay and 260 miles N. E. of Angra Pequena. It has (1891) 1 missionary and his wife, 3 native workers, 1 day school, and 353 baptized Christians. The name is written by the Society, according to German rules, Gochas.

GOLAGHAT: A village in Assam, situated 88
miles S. W. of Dibrugarh, in the district of Sibsagar. Population, about 5,000. Station of the ABMU (1888), with (1903) 1 missionary and his wife, 17 native workers, men and women. 14 preaching places and outstations, 2 day schools, 1 high school, and 900 professing Christians.

GOLBANTI: A village in British East Africa, situated on the Tana River, 116 miles north by east of Mombasa. It is also spoken of sometimes by the name Borabini. Station of the United Methodist Free Churches (England) (1888), the mission being directed especially to the Gallas, the reaching to some extent the Pokomo also. It has (1903) 1 missionary and 3 native workers. It is preparing for industrial instruction of the people, and owns an estate of four miles frontage on the Tana River and two and a half miles depth.

GOLD COAST: A British colony on the Gulf of Guinea, having a coast line of about 360 miles. The protectorate that embraces Ashanti and Adumasi is included with the colony proper under the general designation of Gold Coast. The colony proper has about 42,000 square miles, the whole territory about 72,500 square miles. The population is estimated at 1,500,000 negroes, chiefly of the Akra and Techi (or Otji) tribes.

In the Upper Volta basin and interfluvial highlands the aborigines have held their ground as separate groups. But the distinctions of language, customs, and physical characteristics are rapidly disappearing. The aborigines are called Fososo, that is, "barbarians," by the Ashanti called Asante. Their language is the Akwamu, 14, and allied idioms, which, tho unintelligible to the Ashanti peoples, yet belong to the same family of languages as the Otji or Ga. The Otji peoples include the Ashants, Dankiras, Wassaws, Akims, Assins, and Fantis, and are the ruling race. They are well developed physically and, and, perhaps, owe some of their characteristics to Berber and Arab blood. They are farmers, artisans, merchants, stock breeders, fishermen, according to their surroundings. The missionaries use for their translation of the Bible, proverbs, hymns, etc., the Akwampon dialect. The incredible cruelty and carnage of Ashanti power, with human sacrifices and slaughter, have largely been stopped by the British annexation. A railway has been opened from Sekondi on the coast to Kasauni.

The WMS and the Basel, and the North German Missionary Society occupy 22 stations in this colony.

GOLOVIN BAY: A settlement on the W. coast of Alaska, situated at the head of Golovin Bay and about 40 miles N. E. of Cape Nome. Station of the Swedish Evangelical Mission Covenant of America (1892), with 2 missionaries and 2 missionary women.

GOND LANGUAGE: Belongs to the Dravidian family, and is spoken by 1,500,000 people inhabiting the Central Provinces, India. It is related to both Tamil and Telugu. It has no alphabet peculiar to itself, but attempts have been made to introduce the Hindi (sagari) characters among the northern Gonds and the Telugu characters among those bordering on the Telugu country.

GONDA: A town and capital of a district in the United Provinces, India; situated 60 miles E. by N. of Lucknow. The name means a "safe fold," and is due to the origin of the settlement, which was built about a cattle fold in the center of a dense forest. Station of the ME, with (1902) 2 missionary women, 110 native workers, men and women; 5 preaching places, 62 Sunday schools, 12 day schools, 1 orphanage, and 1,150 professing Christians.

GONDIA: A village in the Central Provinces, India; situated on the railways about 50 miles E. by N. of Nagpur. Station of the Pentecost Bands of the World (1899), with 3 missionaries, one a man, and an industrial school.

GONDS: A non-Aryan race of Central India, numbering some 2,000,000 and forming the largest remnant of the Dravidian aborigines, so called, who were pushed back by the later Aryan immigration into the mountainous, ill-watered, upland region known as Gonds, the land of the Gonds), which is some 400x300 miles in extent and lies between 18° 40' and 23° 40' Lat. and 75° to 82° Long., mostly within the Central Provinces, Bastar and Berar. The Gonds are thinly scattered over this region, sharing the more accessible plains with the Hindus, and the Rajputs of Malwa early intermarried with the Gonds, forming the Raj-Gonds, who have retained the physical peculiarities, but have laid aside the rough habits of the Gonds and taken on some elements of Hindu civilization. The wild Gonds form the mass of the population of Bastar, whose ruler is a Gond. In the north of this state they are called Muriyas (forest people); southward about the Godavari and Pranhita valleys dwell a branch known as Kois (hill people), while those who live higher up in the hills are known as Gu-te-koi (high-hill people). The Khonds, another branch, are found in Orissa east of Gondwana. The long-continued independence of the Gonds as a race has been due to the arid, inaccessible character of their country, but their race unity is now broken, and as time goes on they are approaching more nearly to the language, customs and religion of their Hindu neighbors. The Gonds are short in stature, have dark, nearly black skin, small deep-set eyes, thick lips, thin beards and long black hair, and are strong and sturdy. The language is of great disposition, the Gonds being generally honest and truthful, grateful for kindness and hospitality. A rag about the loins and strings of beads are the chief articles of dress, and, in the N. W. of Bastar, the women content themselves with abbreviated aprons of leafy twigs. The sexes are intellectually and socially on an equality; women are freely wooed and marry usually after they are sixteen. A village is a straggling line of cultivated enclosures with a hut in each. They are in demand as mine-workers. The language of these tribes is called Gondi. The northern Gonds speak also a corrupt Hindi, and the southern, including the Kois, use Telugu. The religion of the Gonds, allied to the Bhuta cult common to the uncultivated people of South India, consists of the worship of nature and of the spirits of the dead, initiated by human sacrifice until its suppression by the British, when images of the horse and food were substituted as offerings. In religious ceremonies the rudest symbols are employed, the representation of their chief deities, Pharsa-Pen, Loha-Pen and Bhera-Pen, being a hatchet, a nail and a chain.
The priests exercise large power. The more advanced Gonds have borrowed from the religion of the Hindus, worshiping Siva and Kali especially, and the Raj-Gonds have developed a system of caste which is foreign to Gond tradition.

The Free Church of Scotland began in 1845 a mission to the Gonds, under Rev. S. S. Hilltop, who took into the employ of the mission the remaining members of an earlier German effort. The United Free Church of Scotland Mission, with headquarters at Nagpur, too no longer distinct a mission to the Gonds, now carries on this work through the aid of twenty-eight Christian workers stationed in the region, Col. Colton and Capt. Haig, the mission to the Kois was begun in 1860, the first fruit of which has, however, been more among other races than among the Kois. As a result of the Conference on non-Aryan Missions in 1877 a Gond Mission was established at Mandla, to which stations at Marpha and Patpara have been added. Five hundred converts were enrolled by the CMS in 1900, but many of them were not Gonds, the low caste Hindus proving more accessible and progress. Thus, while the Gonds during a long period have been regarded as a field of singular promise, missions to them are still in the day of small things.

Gondwana was the most sorely stricken region in India during the famine of recent years. The missionaries exemplified the Gospel by extensive relief work.

Imperial Gazetteer of India (Article Gonds); History of the Church Missionary Society: King (W. R.), Aboriginal Tribes of the Naga Hills, London, 1845, pp. 128, 163; Colton (J. F. and Kay (U. W.), Races and Tribes of Hindostan, 4 vols., London, 1868-70.

GOOD, AUGUSTUS CLEMENS: Born December 19, 1830, at Dayton, Pa. When but a lad he made public confession of his faith in the Presbyterian Church. He received his preparatory training in Glade Run Academy from 1873 to 1876; was graduated from Washington and Jefferson College in 1879 and from the Western Theological Seminary in 1882. His degree of Ph. D. was given by Washington and Jefferson College in 1890. In June, 1882, he was ordained by the Presbytery of Kittanning as an evangelist, preparatory to sailing for Africa, having been previously appointed a missionary by the Presbyterian Board of Foreign Missions (N.). He chose the Dark Continent as his field of labor mainly because it was a hard field and because few at that time were found willing to enter it. He sailed for Africa September 18, 1882, and on his arrival was assigned to Baraka station, near the mouth of the Gaborone River. Being a man of fine linguistic ability, he soon mastered the Mpongwe language and ten months after landing preached his first sermon in the native tongue.

It was his chief delight to itinerate along the river, carrying the Gospel to those sitting in darkness. In this work he was greatly blessed.

For several years there was an almost continuous outpouring of the spirit, and hundreds of converts from heathenism were baptized. Large through his own instrumentality the one church existing in 1884 multiplied to four before his final removal from that field in 1893. During his last year or two on the Ogowe, when burned with a desire to care for the three church stations, he also revised the entire New Testament in Mpongwe and the Hymn Book then in use, adding quite a number of hymns to the latter. During this period and also later Dr. Good made some valuable contributions to natural history by sending many choice specimens to the Western University of Pennsylvania.

Dr. Good made three distinct journeys into the unexplored interior, with no companions save native carriers. Altho he made light of the discomfort encountered and of the danger to which he was exposed, no one can read his unvarnished narrative of travel without being impressed with the heroic spirit of the man. He marched day after day along the beds and on the edge of streams, sometimes through mud a foot deep, his clothing constantly soaked with the dense foliage kept wet by frequent tropical showers. But these were small matters in his estimation compared with the joy of being able to open a pathway for the Gospel to the savage tribes of the interior. The joy increased as the range of his vision widened and he found the Bule people to belong to the great Fang family, and to be widespread and quite accessible.

He was pushing exploration and translation with all his might, with the intention of joining his family in America the next spring; intending to write while here among many choice specimens at least one through the press the Gospels and possibly other parts of the Scriptures, when his life closed in 1893.

GOODELL, WILLIAM: Born in 1792, at Templeton, Mass. Graduated at Dartmouth College and Andover Theological Seminary. Appointed as missionary of the ABCFM, he sailed December 9, 1822, for Beirut, where, after a few months spent at Malta, he arrived November 16, 1823, expecting to proceed to Jerusalem, but the disturbed state of the country in consequence of the Greek revolution prevented. At Beirut he aided in establishing a mission and pursued the study of the language and Arabic. He was engaged in a raging between Greece and Turkey, and persecution from the ecclesiastics prevailing, his work was interrupted, and, consular protection being withdrawn, he was often in great peril. In 1828 he went with his family for a time for safety to Malta. There he issued the New Testament which he had translated into Armeno-Turkish. In 1831 he was transferred to Constantinople to take part in establishing the new mission to the Armenians. His time here was chiefly occupied in translating the Old Testament into Armeno-Turkish. He was full of genial humor, simple, courageous and of deep spirituality; among his associates and the natives of Turkey his influence was weighty. His great work, the translation of the Bible into Armeno-Turkish, was completed by him in 1841; and was the result of exertions and accuracy that it underwent repeated revisions, and the final one was not finished till 1863, four years before his death. On the day that he finished it he wrote to Dr. John Adams, his teacher at Andover: 'Thus have I been permitted by the goodness of God to dig up that land, at which billions may drink, or, as good
Brother Temple would say, to throw wide open the twelve gates of the New Jerusalem to this immense population."

In 1851 he visited his native land, where he remained two years. In 1853 he returned to Constantinople, where he labored with enthusiasm and success till 1865, when, on account of failing health, he requested a release from the Board, after forty-three years of missionary work. He died in 1867, aged 75, at the residence of his son in Philadelphia.

**GOOD HOPE:** A settlement in the northern part of the Transvaal Colony, S. Africa, situated in the Zoutpansberg district, about 60 miles E. of Blauberg. Station of the WMS, with (1905) 1 missionary, 105 native workers, men and women; 22 outstations, 48 preaching places, 20 Sunday schools, 4 day schools and 783 professing Christians. Station also of the Hannover Evangelical Lutheran Free Church, with (1900) 2 missionaries, 2 native workers, 6 outstations, 2 schools and 287 professing Christians. The form given to the name by the German Society is Goede Hoop.

**GOOTY:** A town in Madras, India, 50 miles east of Bellary. The place is celebrated in history for its very strong fort, captured by the British in 1799 from Mysore. The CMS sent the first Gooty Missionaries here in 1841. Population (1891) 6,600, of whom 4,400 are Hindus, who speak Telugu. Station of the LMS, opened at Nandyal in 1855 and transferred to Gooty in 1881. It now (1905) has 4 missionaries, 69 native workers, men and women; 56 outstations, 51 Sunday schools, 51 day schools, 1 theological school, 1 woman's training school and 5,000 professed Christian adherents.

**GOPALGANJ:** A village in Bengal, India, situated in the Faridpur district, about 40 miles S. of Faridpur and on one of the streams of the Ganges Delta. Station of the Bengal Evangelistic Mission (1894), with (1901) 21 native workers, 5 preaching places, 9 day schools, 1 boarding school, 1 industrial school, 1 dispensary and work among lepers.

**GORAKHPUR:** A city in the United Provinces, India, situated on the Rapti River, 100 miles N. by E. of Benares, at an altitude of 250 feet. Population (1901) 64,000, of whom 41,000 are Hindus and 22,000 Muslims. Station of the CMS (1842), with 7 missionaries, 13 men and women; 37 native workers, men and women; 14 day schools, 1 boarding school and orphanage, 1 college and 1,042 professing Christians. Station also of the Zenana Bible and Medical Mission, with 3 women missionaries and 18 native women workers.

**GORDON, Andrew:** Born in Putnam, N. Y., September 17, 1828; graduated at Franklin College, O., nativit; studied theology at Canonsburg, Pa., 1853; appointed by synod missionary to Sialkot, North India; sailed September 28, 1854. Dr. Gordon was the founder of this mission of the United Presbyterian Church. He was a devout and useful laborer with pen and tongue. He returned to the United States in 1855 greatly debilitated, but having gained sufficient strength to warrant active labor again, he reembarked in 1875 and was stationed at Gurdaspur, Northern India. He returned home the second time because of illness of members of his family, and left forward with satisfaction and eagerness to return to his work in India. After a long and painful illness he died in Philadelphia, August 15, 1887. Dr. Gordon was preparing a version of the Psalms in the Urdu language when he returned. He published a valuable work, *Our India Mission* (1886).

**GORDON, Marquis Lafayette, M.D.:** Born in Waynesburg, Pa., July 18, 1843. Graduated from Waynesburg College in 1868 and from Andover Theological Seminary in 1871 and from Long Island College Hospital, Brooklyn, N. Y., 1872. He studied in the College of Physicians and Surgeons, in New York, from which he received the degree of M.D. While securing his education he spent three years in the army during the Civil War. He entered Japan as a missionary of the ABCFM in 1872 and was stationed at Osaka. He early identified with the work of the Doshisha at Kioto and was soon recognized as one of the ablest and most efficient of the missionaries of any Board in Japan. Altho Dr. Gordon had qualified as a physician, after reaching the field he was convinced that he could work more successfully in some other profession. He chose the ministry of the Word, gave up the practise of medicine, and devoted himself entirely to evangelistic and educational work. Through his marked ability, his affection for the people and his great tact, as well as the spiritual power of his life, he won a strong position for himself in the affection and confidence of the people. This position he held to the time of his death. In 1893 he published the volume, *An American Missionary in Japan*. At the time of his death, in Aumurdale, Mass., on the 4th of November, 1900, he had in press his second volume, *Thirty Eventful Years in Japan*. These two books contain a comprehensive history of the work and methods of the American Board in that empire. Dr. Gordon was married to Miss Agnes Helen McDonal at Auburndale, Mass., in 1852. Two daughters of his are now in Japan.

**GORDON MEMORIAL:** A station of the United Free Church of Scotland, in Natal, S. Africa. See Umsinga.

**GOSHEN:** A settlement in Cape Colony, S. Africa, situated about 7 miles N. by W. of Cathcart. Station of the Moravian Missions (1892), with (1901) 2 missionaries and their wives, 13 native workers, men and women; 1 chapel and 1 school.

**GOSPEL IN FOREIGN PARTS; Society for the Propagation of.** See Society for the Propagation of the Gospel.

**GOSSNER MISSIONARY SOCIETY.** See Germany; Missionary Societies in.

**GOVERNMENTS; Relation of Missionaries to:** This is a matter of great perplexity, difficulty and importance. The missionary is in one sense a man without a country. In another sense he is a man of many countries. He does not renounce his nationality or citizenship. As Paul at times fell back on his high position as a Jew and Pharisee, so the missionary must often assert his privileges of birth and country. At the same time he is a resident of foreign lands and inevitably related to foreign governments, on his own account, as an individual; in behalf of the property and other local interests acquired by his mission, and in behalf of converts and adherents, who rely on him for advice and sympathy as to enjoying justice and protection in secular things. As Paul appeared now before Ananias, the high-
priest; now before Felix and Festus, Roman governors; now before Agrippa, and finally appealed to Caesar, so the missionary may find himself tossed between different, often conflicting, sources of authority, seeking to reach some supreme Caesar, often finding only Herods and Pilates who will make friendship over his defeat.

The relation which he sustains to the government of the country where he works may have to be one of virtual defiance. Ever since the Apostles met the prohibition of their persecutors by saying, "We ought to obey God rather than men," and rejoiced "that they were counted worthy to suffer dishonor for His name," the first preachers of the Gospel have encountered in most non-Christian countries the hostility of the powers that be. From Stephen to Bishop Han-nington they have found hostile peoples and rulers arrayed against them, and yet have persisted in gentle defiance of threat and command and force. The first Protestant work in Japan was in quiet disregard of hostile laws, proclama-tions, and penalties. And for years before, Cath-olic priests had been at work sustaining suppressed Christianity, "sleeping," as one of them expressed it, "by day, working by night." Long have they also done the same in Korea, where, as at Japan, the government used its powers for the understood purpose of establishing a prohibited religion. Their position at Seoul, the capital, afforded for some years a most interesting instance of the curious intermingling of possible relations with different governments. As foreign-ers at an open port they were under the diplo-matic protection of their home governments. As court physicians, heads of hospitals, asylum, schools, etc., they were under the protection of the Korean government, received distinct appointment as Korean officials of a certain rank, and had a kind of private policemen assigned them for protection and service. In private they were also recognized as missionaries. Yet in all this public capacity, mission labor was prohibited; in any capacity it was liable to be stopped at any moment. The situation was full of perplexity for the missionary and his con-science. But Christianity has taken root in Korea; it has made progress more rapidly than in Japan at the start and it has won for itself a place in the land.

In Japan one restriction long remained which involved the question of the true relation of the missionary to the Japanese government. Outside of the open ports, passports were required and could be had for travel only for purposes of health and science. It was often a question among missionaries whether such traveling pass-ports ought to be used for evangelistic purposes. The first missionaries to India were in defiance of the law, not so much of heathen as of Christian government. The history of the East India Company's friendship with heathenism and hostility to Christian effort is one of disgrace, happily relieved, however, by noble exceptions, and steadily improved by the pressure of the better sentiment of England until, with the assumption of rule by the British government in 1857, the present policy of friendly neutrality was adopted. At the time, however, there was often nothing for the deported or prohibited missionaries to do but seek some other country, like Burma, or cast themselves on the help of a friendly government like that of Denmark at Serampur, or wait in quiet and disguise for reluctantly extorted per-mission to go on with work.

In Turkey the Christian laborer stands under the protection of his own government, with explicit recognition of his character as a mission-ary. Yet so far as his work touches Mohammed-anism, he is engaged in an endeavor to lead persons to violate by a change of religion the most stringent provisions of the law of the land. This change, great, the most persistent pressure on the part of Christian governments has induced the Turkish government to relieve, in theory, from punishment by death. Practically it is still bitterly opposed and severely punished. The relation of a missionary to a government thus compelled against its will is of necessity strained. He must have constant dealings with lower and higher officials who on the most flimsy pretext, or with no pretext at all, seek to close his schools and chapels, stop his printing press and silence his native preachers, while the unthinking multitude are stirred up to riot against Protestants, and wildest excesses are committed, until the claims of humanity force the powers at Constantinople to interfere. The censorship of the press exercised in Turkey and especially directed against the missionaries is in many cases only more ignorant than it is severe. To keep in communication with hostile officials, to endure oppressive edicts while contending for equitable treatment promised by treaty or by law, to press important cases on the attention of the American consul or minister—these are among the most severe and hard-hitting of a missionary's life, not only in Turkey, but in China, Korea and possibly to some extent in Japan.

To specify one further question that is full of embarrassment to the missionary: When a mis-sionary is hampered by the unwillingness of local officials to give him rights secured by law, how far may he follow usages that prevail in Turkey or in China and secure his civil rights by pay-ments which will induce the official to do his duty instead of evading it? Backshish is suspected and demanded by the official, but yet it is not clearly a degrading or demoralizing. How far shall the missionary seem to sanction the prevailing corruption? How far must he resist it? This most practical question repeatedly recurs. The missionary's difficulties are more subtly perplexing in case he enters into anything like an alliance with any government. But these difficulties are not peculiar to the foreign field. They must be dealt with as they are dealt with at home. For every such alliance is in effect a union of Church and state. The failings of Roman Catholic mis-sions in this respect, whether in North and South America, in Japan, China, India, or other coun-tries, are too well known to be told. They form a most instructive part of the history of missions. France and Germany to-day are eager to offer such alliance to missionaries. France, in particu-lar, has sought to advance colonial interests through claiming to be the pro-tector of all the missions of the Roman Propaganda. It has long sought to gain political power in China by posing as the patron of all Roman Catholic missionaries of whatever nationality. It has regarded and treated both Catholic and Protestant missionaries and their governments in pushing its colonial schemes. The Legion of Honor medal has been recently conferred upon M
Cassalis, an old French Protestant missionary, for "extending the influence of France in Basutoland," in the sphere of British influence in South Africa.

Germany, too, has the colonial fever, and the interest in missions has been increased all over the land because it is believed that, even if missions are not commercial enterprises, they can be wisdoms of heathendom, they can be used wisely as Germanizers of certain parts of it. As a veteran missionary friend in Germany puts it: "The opinion of the German African Society with regard to missionary societies is that they are not unfeasible attempts to spread the Gospel, but merely handmaidens to colonial politics—a cow to give milk to the mother-country."

This alliance with the government on missionary ground gives rise to a new set of hostile relations. France wants only French, Germany only German, missionaries. The language and sentiment of the country must be exclusively taught in the colonies of that country. Missionaries of other nationalities must be excluded, for they neither could nor would enter into such alliances for political and national schemes.

The missionary may be forewarned to anticipate attacks of critic or mentor to half civilised officials of the land where he is preaching the Gospel. For a large class of questions is added to those which perplex the missionary when he is appealed to by native Christians to secure government aid or interference in behalf of them and their interests. The expectation and hope of such aid and protection from the missionary is one of the motives most damaging to the sincerity of new converts. It harms the missionary, too, by filling his time and thoughts with civil matters, lawsuits, appeals, etc.

For instance, in Travancore, the question of the caste privileges of Christians comes up. They are said to be low caste, which would shut them off from much. They claim to be no caste. One typical case decides many. The privileges of entire orders of persons are at stake; the courts must decide, the missionaries must make up, present, and push the case. That may keep them in the courts for years. Anywhere in India the right of Christians to use the village well or fountain may be denied. But the government has decayed for the time being, and, therefore, the missionary is impelled by kindly compassion to bring such a case before the collector.

In China and in Turkey or Persia officials are not strict observers of the laws. When they oppress the Christians the influence of the missionary is incessantly invoked to help his adherents. Natural sympathy for those in distress and the desire to see fair play have made some men allow most of their time for years to be consumed by such lawsuits, whose result, of whatever sort, was sure to be harmful to their spiritual work.

Another such connection with the local government often appears to work for good. For their superior education and ability missionaries are often appointed to some official position. Dr. Verbeck was for some time a state official of Japan. President Martin, of Peking, at the head of the Imperial College, was appointed by the government. Missionary, Dr. Allen and Mrs. Bunker were the court physicians of the king, Queen of Korea. Dr. McKenzie at Tien-tsin was closely related to the Viceroy Li Hung Chang. Others have served for a time as diplomatic agents of the home government, like S. Wells Williams or Dr. Whitney, of Tokio. The appointment of such men to such positions often prepares the way for the Gospel and commends it to strangers.

Yet as a rule, contrasting the high calling of a simple missionary with any other position, one might say of some who turn aside from the mission to offer the work what Dr. Carey wrote regretfully of his son: "Felix has shrunk to an ambassador."

The general rule of the Church Missionary Society, as published among its regulations, is as follows: "Every missionary is strictly charged to abstain from interfering in the political affairs of the country or place in which he may be laboring;" "Never assume a position of hostility to the ruling powers;" "Stand aloof from all questions of political leadership and political partisanship;" "Tribute to whom tribute is due, custom to whom custom, fear to whom fear, honor to whom honor."

It is not strange, when one sees what a snare is spread in all dealings with magistrates and civil authorities, that many of those who are most consecrated and experienced should decide that the only safe plan for the missionary is that of silent activity in all such matters. They say, they can ask from any government is to be let alone, and regarded with friendly neutrality. The best they can do for the mission is to lean on no arm of flesh, invite no aid of consul or magistrate, but rely on God and what He sends for His servants. They are not the foes of any people, they should not be the political engines of any government, nor should they make any government their engine.

Another complication of this question is the attitude toward missionaries sometimes adopted by ill-informed officials of the home governments. Such officials sometimes regard missionaries as pettifogous lunatics whose object in life is to get themselves into trouble with a view to disturbing the peace of officials abroad who are charged with the protection of their wandering fellow-countrymen. The ignorance which fosters such opinions may be gauged by perusal of the article in this book on The International Service of Missions. We cannot better close the discussion of these delicate problems than by the following suggestions prepared for the use of missionaries and students of missions, Rev. James S. Dennis, D.D., which foreshadow, perhaps, opinions to be set forth in the third volume of his Christian Missions and Social Progress:

"We shall not undertake to call in question the fact that under exceptional circumstances, under the presence of false understandings, or as the outcome of religious fanaticism, the entrance of Christianity into non-Christian lands has been unwelcome, and awakened more or less opposition. This is natural, perhaps inevitable, and historical precedents would lead us to expect it. It seems to be incidental to the propagation of Christianity, and yet so long as the missionary teacher is within recognized and acknowledged treaty rights, and does not transgress international agreements, he is not called upon to refrain from pursuing his calling by fear of diplomatic difficulties. So long also as his appeal is only to the reason and free moral sense of man, without attempting to exact an unwilling adherence by any expedient which forces the conscience, he is strictly within the bounds of that universal exercise of moral
freedom which belongs to man as man. It is not in fairness or justice within the sovereign rights of any government, despotic or liberal, to exercise lordship over the conscience in the realm of religious freedom. That would be to usurp a power which belongs to God alone and which He has never delegated to human rulers. As a religious teacher of God’s people, the Christian missionary has the right of way the world over. Within his proper limitations he is unimpeachable as a moral force among men. The highest authority which mankind is called upon to acknowledge has commissioned him to discharge a duty which is sui generis in history. He may be hindered, opposed, persecuted and martyred, but his credentials are authoritative, and cannot be destroyed. He may be silenced temporarily, or banished for a time, but his opportunity is certain to come, and he is bound to avail himself of it.

"It becomes him under these exceptional conditions to discharge his duty with meekness, patience and tact, to exemplify in his own character and conduct the wisdom, gentleness and sincerity of the great teacher, to seek only a moral victory by legitimate spiritual means. Where the missionary service is rendered in this spirit it is rarely, if ever, offensive, and any possibility of disturbing goodwill is reduced to a minimum. In fact, the charge which has sometimes been made indiscriminately that missions are the cause of international alienation has been greatly exaggerated. There has been much misunderstanding on this point, and some considerable misrepresentation. The conspicuous illustration, of course, has been China, and on the basis of a false induction, a sweeping and railing accusation has been made against missions in general as a cause of trouble among the nations. While it is no doubt true that the political assumptions of Roman Catholic missions in China are offensive to the Chinese officials, yet it can be safely said that Christianity as exemplified in Protestant missions, exercising its simple and legitimate function as a teacher in the sphere of morals and religion, is guiltless in the matter of political meddling. In reference to the Boxer disturbance of 1900 in China, and other similar outbreaks which preceded it, it is sufficiently clear that the Chinese officials, especially their resentment at foreign encroachments upon official prerogative, territorial integrity and native industries, are adequate explanations of the uprising, which has aimed at the foreigner of whatever class as an intruder, but chiefly in his official and commercial character rather than at the missionary as a religious teacher. In fact, the missionary, all things considered, has made it safer and more possible than it would otherwise have been for all foreigners to reside in China. Numerous friendly acts and proclamations by high officials of the empire, since the convulsions of 1900, have indicated a specially kindly feeling to missionaries. The Missionary Peace Commission of 1901 in Shansi is a remarkable evidence of the respect and consideration shown to missionaries by many Chinese officials since the troubles of 1900. The recent opening of Hopeh province by the missionaries of the London Society has reclaimed in a measure an immense section of China to foreign residence, which will be a boon both to missions and commerce.

"At the Seventh Annual Conference of Foreign Mission Boards of the United States and Canada, held in New York City January, 1899, a report was presented embodying the results of a careful canvass of mission fields throughout the world as to the attitude of civil governments toward Christian missions and missionaries wherever they happen to be established. The report indicates the fact that almost the world over the attitude of local governments was friendly and helpful, with few signs of friction and opposition. In view of the many regrettable incidents in the contact of Western nations with Eastern peoples, and the frequent objectionable personal conduct of many foreigners residing in the East, the outcome above indicated is especially significant and speaks much for the respect accredited to missions and their representatives."

GOVERNOR'S HARBOR: A station of the WMS in Eleuthera Island, Bahamas, with (1903) 1 missionary, 24 native workers, 4 preaching places, 1 day school, and 303 professing Christians.

GOVINDPUR: A village in Chota Nagpur, India, situated about 25 miles S. W. of Ranchi. Station of the Gossner Missionary Society, with (1900) 2 missionaries, 76 native workers, men and women; 37 preaching places, 2 day schools, 1 boarding school, 1 dispensary, and 8,722 professing Christians.

GRAAF REINET: A town in Cape Colony, S. Africa, situated in the district of the same name, 58 miles S. W. by S. of Middleburg, on a small plain nearly enclosed on one side by mountains, and on the other by a bend of the Sunday River. It is one of the oldest towns in the colony and is celebrated for its sulphur springs. Station of the SPG (St. James Parish), with (1900) 1 missionary and 1 native worker.

GRACEBAY: A mission station of the Moravians (1797) on the island of Antigua, West Indies, 6 miles west of Gracehill.

GRACEFIELD: A town on the northern coast of Antigua, West Indies. It is pleasantly situated close to the sea, the cool seabreeze making it one of the healthiest places on the island. Station of the Moravian Missions (1840), with (1900) 9 native workers and 134 communicants.

GRACEHILL: A town in Antigua, W. L., 8 miles E. S. E. of St. Johns. Station of the Moravian Mission (1774), with (1900) 1 missionary and his wife, 17 native workers, 2 schools, and 466 professing Christians.

GRAHAM'S HALL: A little village in British Guiana, situated on the Industry Plantation, 10 miles east of Georgetown. The population is composed chiefly of negroes from the Barbados and some East Indian coolies. Station and center of the Moravian Mission in Guiana (1873), with (1900) 35 native workers, 2 schools, and 395 professing Christians.

GRAHAMSTOWN: A town in Cape Colony, S. Africa, situated in the district of Albany, 55 miles W. S. W. of King William's Town on the railway to Kimberley and at an altitude of 1,800 feet. It is the chief town of the Eastern Cape, with extensive woolen manufactures. It is the seat of an Anglican and a Roman Catholic Bishop. Station of the SPG (1861), with a missionary and a theological school. Station also of the South African Wesleyan Mission Society, with (1900) 48 native workers,
4 preaching places, 3 day schools, and 492 professing Christians.

GRAN CHACO. See Argentine Republic and South American Missionary Society.

GRAND CAYMAN: One of the Cayman Islands, West Indies, 176 miles northwest from the west end of Jamaica. The island is 17 miles long and 4 to 7 miles broad. Climate, tropical; population, 4,500, composed of English mulattoes and pure negroes; language, English; religion, Protestant. The United Church of Scotland has (1902) 2 stations on Grand Cayman, with 2 missionaries and 8 native workers, and 534 church members.

GRANT, Asahel, M.D.: Born at Marshall, N. Y., August 17, 1807; died April 24, 1844. Graduated in medicine at Pittsfield, Mass. Practised medicine at Baintrim, Pa., until the death of his wife. Appointed medical missionary of the ABCFM among the Nestorians in 1834. Arrived at Urmiya, Persia, November 20, 1835. The medical skill of Dr. Grant was at once called into active exercise. Altho the ignorance and superstitions of the people hampered his efforts, he acquired great influence. Patients came from distant regions—from Mesopotamia or from the Caucasus; haughty Mohammedan mollahs kissed the hem of his garments; in his life in the wild mountain regions he was more than once indebted for his safety to recognition by some patient who had seen him in Urmiya. Dr. Grant's thrilling adventures among the Nestorians of the mountains made his name famous. His work there was broken up by the massacres of 1843. Two years later he died. His influence as a physician opened the way for his successors and his personal attractiveness won him friends who long mourned his early death.

GRASSMAN, Andrew: Born February 23, 1704, at Senftleben, Moravia; called "to the clearer light of the Gospel" through Christian David in 1725. Persecuted in Moravia, he, with others who sympathized with him, removed in 1728, under the leadership of Christian David, to Count Zinzendorff's estate at Berthelsdorf, afterward called Herrnhut. From 1731 till 1737, he, with some Moravian companions, traveled, learning successively the Swedish, Finnish and Russian languages, supporting themselves by their trades at their respective trades, and making known the Gospel, as opportunities offered, in parts of Germany, Sweden and Lapland. His attempt in 1738 to reach the Samoyedes in the Russian Empire led to his arrest and imprisonment for six months, followed by his expulsion from the country.

Mr. Grassman subsequently labored as a missionary in Greenland. He was made Bishop of the Moravian Church in 1756. He died March 25, 1753.

GREAT ABACO ISLAND: One of the northernmost islands of the Bahamas, with a population of 3,300. Circuit of the WMS, with (1903) 23 native workers, men and women; 7 preaching places, 5 Sunday schools and 450 professing Christians.

GREAT BASSA: A town and seaport in Liberia, W. Africa. Station of the PE (1853), with 4 native workers.

GREAT BATANGA: A settlement and district in the Kamerun Colony, W. Africa, situated S. of the Lokinje River in the S. W. part of the colony and 170 miles N. of the Gabun. In climate, the district is one of the healthiest and most agreeable on the coast, and German and English traders resort there. Station of the PN (1885), with (1896) 10 missionaries, 194 woman, one of whom is a physician; 15 native workers, men and women; 10 outstations, 10 day schools, 2 boarding schools (closed temporarily), 1 dispensary and 800 professing Christians.

GREAT SANGI ISLAND. See SANGI ISLANDS.

GREBO LANGUAGE: Belongs to the negro class of African languages and is used in the regions inland from Liberia. It was reduced to writing by missionaries of the PE, and is written with Roman letters.

GRECO-TURKISH LANGUAGE: The Turkish language as written with Greek letters by Greeks of Asiatic Turkey.

GREECE: The Hellenic Kingdom embraces a territory of about 25,000 square miles, and has a population of (1896) 2,433,506, Greeks and Albanians. Scotland has the largest extent of territory and almost as many people. A fair wealth and natural resources, Greece is proverbially the poorest country in Europe.

Richard Cooper Harned, American Consular Agent at Athens, has been long a resident of the country. He finds the Greeks steadily improving in wealth and culture. Agriculture occupies the attention of the majority (seven-eighths) of the inhabitants. Only seven cities can boast of more than 10,000 people. Fifteen cities (from Athens, 114,356, to Missolonghi, 6,324) contain only 250,000 inhabitants, or about one-ninth of the whole population of Greece. Nearly ten per cent. are shepherds; as many are seafarers. There are 100,000 Albanians scattered about the kingdom. They began migrating southward over four hundred years ago, at the time of the Turkish conquest. These people, who still speak their unwritten language, have become largely Hellenized, yet are easily distinguished from the Greeks proper. They are found mainly in Attica, about Thebes, on the Isthmus of Corinth, throughout ancient Argolis, in the southern district of Euboea, and in a few neighboring islands.

The war of the revolution (1821-9) left Greece in a deplorable state. The Protocol of London declared her a kingdom under the protectorate of England, France and Russia. Prince Otto of Bavaria ascended the throne January 25, 1833. King George, son of the King of Denmark, succeeded King Otto in 1863. Under both these reigns the kingdom has seen slow but steady advancement. Under the present constitution (adopted October 29, 1864) the whole legislative power is vested in a single chamber of representatives, called the Boulé, and the executive power is in the hands of the king and his responsible ministry. The fact that only a fraction (2 millions out of 8 millions) of the Greek-speaking people for whom it is intended are included in the present kingdom of Greece keeps the ambitious little country continually in a restive condition, and the great powers have frequently been obliged forcibly to compel the Greeks to keep the peace. This restriction is received with bad grace by the people. An extension of the territory of the kingdom to the north (1881) only whetted its appetite for more. The island of Crete has been in a chronic state of unrest and now looks toward annexation to Greece at no distant day.

Athens has been the capital of "the Kingdom
of the Hellenes" since 1830, and has grown from a squalid Turkish village, clinging to the northern slope of the Acropolis, to a large, clean and beautiful city, with its palace and gardens, its fine hotels and boulevards, its cathedral and university, its art museums and its public schools. To the song of music and melody is added the noise of motor traffic, making it one of the most interesting cities in the world. The city is a busy hive of educational institutions. The English Church and the Protestant Evangelical Greek Church are to the east of the Acropolis, near the ruins of the temple of Jupiter Olympus. The British and American schools for research in Greece are on the southern slope of Mount Lycaebetus.

The Boule meets November 1 (old style) every year, and the city thereafter presents a brilliant scene, in which the royal retinue, the deputies, the foreign ambassadors, the military classes, the church hierarchy, the throng of students from the whole Greek world, together with foreigners from every clime, make the modern city vie with its ancient self in picturesqueness and interest.

The inhabitants of the kingdom are mostly adherents of the Greek Orthodox Church. The most encouraging thing about modern Greece is its splendid system of schools. There has never been a time when Greece has been absolutely destitute of educational facilities. Even during that long period of abject oppression under Turkish rule—which lasted from the opening of the 16th century until the war of independence, 1821-29—the rudiments of an education had been taught by the clergy of the Greek Orthodox Church. Even during the revolution schools were covertly carried on. When the country came out of this baptism of blood the national mind was roused as only a great struggle for freedom can rouse it, and efforts were immediately put forth to put its schools on a solid foundation. It was necessarily a most difficult undertaking. The country was bankrupt. At that critical hour in the nation's life the influence of English, French and American sympathizers was a large factor in starting the whole long and interesting development of educational affairs in Greece. America's influence was felt especially in two directions—the study of the Bible in all Greek public schools, and the education of the girls of Greece. Two more fundamental results could not have been attained, and from all appearances these would not have been attained but for American impetus. Since 1863 educational affairs have moved on faster than ever. Teaching has become a regular profession, and the old age of teachers is provided for by a judicious pension system, regulated by the term of service. More than half the teachers in the elementary schools are women—a remarkable fact when we consider that through the centuries of Turkish oppression the education of women was almost entirely neglected. One of the most interesting institutions in Athens is the "Arsakeion," a girls' school, named from its founder, M. Arsakes, a wealthy merchant, originally from Epirus. It was the result of the American idea fostered by Dr. and Mrs. Hill. To-day it is by far the finest girls' school in Greece. The institution is graded carefully from the kindergarten up to the normal department, taking a girl from the age of four or five up to eighteen or twenty. It is a custom for far-away villages to select their brightest girls, collect money for their expenses, and send them to the Arsakeion, that they may have efficient teachers for their village girls. Since its start this school has scattered more than 2,500 graduates over Greece and Greek-speaking lands, and most of them teach. If the limited benevolences for educational purposes might be indefinitely increased. In proportion to her size, population, and wealth, the little Hellenic kingdom surpasses even open-handed America in this point.

**Mission Work**: When the struggle for independence called the attention of the civilized world to Greece, Christian work was begun in the land by various churches of America. The CMS had already sent missionaries in 1815, their operations being mainly confined to the Ionian Islands.

The PE sent out Rev. J. J. Robertson in 1828 to see whether Greece presented an encouraging field for the efforts of this Church.

This mission was reinforced in 1830 by the arrival of Rev. Dr. and Mrs. Hill. They went first to the island Tenos, where they spent six months; then removed to Athens, the scene of their long and successful educational work, carried on in the midst of the instruction of the inhabitants, with a careful avoidance of anything that might look like a proselyte from the Greek Church.

In 1828 Rev. Jonas King of the ABCFM, whose previous sojourn in Jerusalem and Smyrna had given him an opportunity to acquire some knowledge of the modern Greek, and also awakened a deep interest in their spiritual condition, was chosen by a committee of ladies in New York to take charge of supplies for the physical wants of the impoverished Greeks. His knowledge of the language enabled him at once to do something to meet their still deeper spiritual wants, and he was permitted to remain, supported by these ladies, till 1831, when the American Board decided to enter Greece as a mission field, and Mr. King was transferred to its service and removed from Tenos, where he, too, like Dr. Hill, had begun his work, to Athens, where he established schools of a high grade for boys, held preaching services, and also devoted much time to the preparation of religious literature, for which he was particularly fitted by his great and varied attainments as a Christian scholar. In 1834 Dr. and Mrs. Riggs opened a school at Argo, and were subsequently joined by Mr. Benjamin. This station was given up in 1837, Mr. Riggs going to Smyrna.

About this time (1837) the Rev. S. Houston and Rev. G. W. Leyburn of Virginia, also in connection with the American Board, went to Areopoliis, in Laconia, in response to an earnest invitation of Pietro Bey Mavromihalis. They soon had two schools for boys in successful operation, in one of which the Rev. M. D. Kalopothakes, now so long associated with evangelical work for his countrymen, received his earliest religious impressions.

The Baptists also began a mission under Mr. Buel and Mr. Arnold.

A printing establishment had been founded by the ABCFM at Malta, where publications in the various languages of the Eastern Church were printed. Very soon there was a much greater demand for those in Greek than in any other language. In 1830 the Rev. Mr. Temple, who was in charge of this department of the work, reported that the previous year the press had been employed
wholly on modern Greek, to the amount of 4,670,000 pages, chiefly schoolbooks. The demand for books was such that they rarely accumulated on the shelves.

Those were years of hope for all who were looking for the renovation of the Greek Church, both clergy and people seeming gratefully to acknowledge the liberty, and desiring the larger freedom of action which was bound speedily to lead to self-support.

The Greek Evangelical Church is Presbyterian in doctrine and form of government. A local synod has been organized called the “Synod of the Free Evangelical Church in Greece.” It has under its care the Bible work of the British and Foreign Bible Society. The colporteurs employed are all Christians who are able to do an important evangelistic work in connection with their sales of the Scriptures. The Εγκυκλοπαίδια Αξιόλογα, a monthly paper for children edited by Dr. Kalopothakes, is now in its twenty-fourth year and has an annual circulation of about 7,000 copies. The Star of the East, the weekly paper, was discontinued at the close of 1885.

Through the kindly assistance of the Religious Tract Society, 400,000 tracts are received by the American Board and distributed in various parts of Greece.

GREEK CHURCH: Several names and titles are used by writers who mention this church; e. g., The Greek Orthodox Church, The Eastern Church, The Orthodox Imperial Church, The Greek Catholic Church and The Orthodox Eastern Church of Christ. The name and title preferred by the Greeks themselves and claimed by them as the most correct is “The Holy Catholic and Apostolic Orthodox Church of the East.” (Ἡ Ἁγία Καθολικὴ καὶ Ἀποστολικὴ Ὀρθοδόξα Ἑκκλησία τῆς Ἀναγέννησις). Aherne says it claims as its adherents those who accept and abide by the decisions of the first seven ecumenical councils, viz.: Nice, 1st, 325, and 7th, 787; Constantinople 2d, 381, 5th, 533, 6th, 680; Ephesus 3d, 431; Chalcedon 4th, 451. It represents the state religion of Greece, Russia, Bulgaria, Servia, and Rumania, and of the larger part of the Greek and Slavic people in Turkey and other parts of the world. Its numerical strength is estimated at a little less than 100,000,000 souls. These, in round numbers, are distributed as follows: In Greece, 2,400,000; in Turkey, 5,000,000; in other parts of Asia, 4,000,000; in Africa, 3,000,000; in America, 50,000; in Bulgaria, 2,000,000; Servia, 2,000,000; Montenegro, 200,000; Rumania, 4,800,000; Austria-Hungary, 3,100,000; Russia, 73,300,000.

History: The claim of the Greeks, that this is the oldest Christian Church, is founded on the facts (a) that they are the heirs of the original Greek Empire of Byzantium or Constantinople; (b) that they still use in their worship the Greek of the Apostles and the liturgy of the early Fathers; (c) that the Greek Fathers were in the majority at the first seven ecumenical councils of the 318 Bishops at the first council 310 were
from the East), the decisions made and the doctrines established being largely colored by Greek philosophy and Greek thought, and finally (d) that their church history begins in the Passion week, or "The Great Week," of our Lord's life. The Syrian Church claims the precedence because (Acts xii: 26) "The disciples were called Christians first in Antioch by the Greeks to John xii: 20, 23: "There were certain Greeks among them, that came up to worship," and to the Master's words: "The hour is come that the Son of man should be glorified."

It is fair to state that the Armenian Church makes the claim (which the Greeks dispute) that these so-called Greeks were Armenians sent from their King Abgar and that under the preaching of the Apostles Thaddeus and Bartholomew they were the first to accept Christianity as a nation. Greek tradition tells us that the earthquake at the time of the Crucifixion was felt in Athens and that Dionysius the Areopagite exclaimed: "Either God suffers or the universe is being destroyed," and that thus he and certain others were prepared for the preaching of Paul.

The political and organic history of the Greek Church begins with the conversion of Constantine, 312 a.d. This was followed by the cessation of persecution and establishment of Christianity as the state religion. A more perfect organization was secured by the council of Nicaea in 325. In this year also was begun the Cathedral Church of St. Sophia, and the founding of the first Christian city, "New Rome," or Constantinople, dedicated "To the service of Christ" May 11, 330. The natural jealousy of Rome, the former imperial city, and the rivalry springing up between the two cities, created parties not only in political but in religious life as well.

The Bishop of Rome was not ready to yield precedence to the Bishop of Constantinople, or even to acknowledge the latter's equality with himself. Decisions of various councils in regard to this matter were acceptable to neither party. (The Council of Constantinople in 381 declared that the Bishop of New Rome should be inferior only to that of Old Rome.) Seventy years later, the Bishop of Rome was declared the "Apostolic See." In the latter part of the 6th century the Patriarch of Constantinople claimed precedence over all Christian Churches, but in 606 the Emperor Phocas gave this honor to Boniface of Rome. Minor differences in customs and in forms of theological statement were enlarged as the centuries moved on. There were endless controversies as to methods and times of fasting, the administration of the Sacraments and the procession of the Holy Spirit. While the Latins declared that the Holy Ghost proceeded from Father and Son, the Greek Church held that the procession was from Father alone. Pope Leo III., at the Council of Aix-la-Chapelle in 809, approved of the expression "Filioque" (and from the Son) and soon after, in order to give greater authority, the canons of the great Council of Constantinople were falsified by the interpolation of the disputed clause. This was deemed by the Easterns the great sin of the Western Church and has never been forgiven.

As the Greek Empire decreased in power and renown, the power of the Papacy became more deeply rooted, and when the Pope of Rome, aiming at universal supremacy, began to interfere indirectly with the affairs of the East, and Michael Cerularius, Patriarch of Constantinople, protested, papal legates visited Constantinople and on the 16th day of June, 1054, repairing to the great church of St. Sophia, they there in the name of the Pope excommunicated the Patriarch and all his adherents. "After pronouncing this dreadful anathema, they placed their sentence on the High Altar of the Church, and shaking the dust off their feet they dismissed the Patriarch and all his adherents."

The separate histories of the Eastern and Western Churches may properly begin at this date—June 16, 1054.

The great missionary work of the Greek church began in 861, when the brothers Cyril and Methodius went to the Slavs to convert them to the Slavic alphabet and literature, and the Bible in the vernacular, are the result of their work. Thus the way was opened for the evangelization and instruction of the Servians and Rumanians, and in due time of the Russians also. The conversion of the Russians, following the visit to St. Sophia of the envoys sent by Vladimir; the baptism of Czar and people in the Dnieper at Kiev; the building there of the first Christian Church and the marriage of Anne, sister of the Emperor Basil, to Czar Vladimir, the Church of Kiev remained the metropolitan city until its destruction by the Mongols in 1240, when the see was removed to Vladimir and afterward transferred to Moscow.

Church Government: The government of the Greek Church is episcopal, with orders of Patriarch, Bishops, Priests, Deacons, Sub-deacons, etc. In the Turkish Empire it is divided into four metropolitan sees—Constantinople, Alexandria, Antioch and Jerusalem. Each of these is presided over by a Patriarch. All have equal rights, but the Bishop of Constantinople is made a Patriarch of Constantinople. The latter presides over the "Grand Synod," which is made up of the Bishops of the surrounding provinces. It is theirs to elect or rather nominate the Patriarchs. The full election waits upon the approval and confirmation of His Majesty the Sultan. He recognizes the Patriarch of Constantinople as the responsible head of the Church and the medium of communication between the sovereign and the Greek people.

In Greece the supreme authority of the Church is the Synod at Athens, which consists of five clerical and two lay members. Their former dependence upon the Patriarch of Constantinople ceased in 1833, tho a few external rites and honors (the preparation of the anointing oil, etc.) are still reserved to that prelate. For six centuries the Russian Church was dependent on the Patriarchate of Constantinople and was governed by Metropolitans, some of them Greeks sent directly from the Patriarch, others Russians elected to the office. Even up to the middle of the 17th century the Patriarch of Constantinople had to have his appointment confirmed by the Patriarch of Constantinople. Peter the Great in 1712 curtailed the authority of the Primate of Moscow and substituted that of the Holy Synod over which the influence of the Czar is supreme. Thus the Czar became head of the Church as well as of the state in Russia. Without the presence of the procurator of the Czar the "Holy Synod" can hold no meetings nor are their decisions valid without his consent. In Rumania the government of the Church rests with two Archbishops, the first of them styled the Primate of Rumania, the second the Arch-
bishop of Moldavia. There are, besides, six Bishops of the national Church. In Servia, the Church is governed by the Synod of Bishops, all the ecclesiastical officials being under the control of the Minister of Education and Public Worship. The Greek Church of Bulgaria was dependent upon the Patriarch of Constantinople until 1870, when the various Bulgarian sees were united under one chief bishop known as the Bulgarian Exarch.

Church Buildings and Services: The Eastern hierarchy resembles the Jewish type, and the Eastern church building as a reminder of the Jewish temple. It has three divisions: (1) The Holy Place; (2) The Body of the Church, and (3) the Narthex or Porch. Above the latter is the fatticed apartment for the women. The narthex was originally set apart for catechumens or for penitents, under the Amulipum of the body of the church for the congregation. The Holy Place, separated by the screen of wood or marble covered with pictures, is for the priests and their attendants and for preparation of the bread and wine upon the Holy Table. The church building itself is not only grand and imposing but very light and east and west. The entrance is always at the west, so that the worshipers may face the east. The schoolboy who (not in a Sunday school but in the ordinary primary school) is taught the mystical meaning of all parts of the church building, and of each portion of the priest's dress, tells us that "the worshiper thus turns his back upon the deeds of darkness and his face toward the Sun of Righteousness who is to arise with healing in His wings."

The Greek Church lays stress on its acceptance of the first seven ecumenical Councils, and on its doctrine that the Sacraments of the New Testament are seven, the Jewish symbol for completeness. The seven sacraments are: Baptism, The Lord's Supper, Chrism, Confession, Ordination, Marriage, and the Tollund. She believes in baptismal regeneration and at baptism receives each child into full church membership. She uses candles and incense in worship; she rejects images, but adores pictures. The worshiper himself kisses the picture of the saint and lights a candle before the shrine. Such pictures are found not only in the churches, but in the homes of the people, in hotels and in ships at sea. Baptism is by three-fold immersion. Leavened bread is used in the Communion, and the laity partake of the cup also. She allows her priests to be married before ordination, but never after. Celibacy is limited to Bishops and monks. The clergy are not allowed to shave or to have the hair cut after entering sacred orders. The liturgy of St. Chrysostom (an abridgment of that of St. Basil) is used each Lord's day. Instruction is not allowed. The music is by a double choir of boys and men. Preaching has not been common excepting in Lent, but it is becoming more frequent in certain localities. After the exaltation of the Host, and the sacred procession about the church, the people are invited to the Communion at each service, but this invitation is rarely accepted, excepting after the three longer fasts of the Church, viz.: at Christmas, Easter, and the Fast of the Sleep of the Virgin, in August.

In addition to the three longer fasts every Wednesday is a fast, and Friday, the preceding week, is the Fast for Good Friday. All three fasts are severely observed. From all animal food, including eggs, milk, butter and cheese. On certain special days fish is allowed.

The Greek calendar still follows the old style, and was during the 19th century 12 days, and since 1900 (which in the Orient was regarded as Leap Year) has been widened to 13 days. The new style was introduced by Gregory XIII.

GREEN, Samuel H.: Born Worcester, Mass., October 10, 1822; practiced medicine for a while in Worcester; sailed for Ceylon as a medical missionary of the ABCFM, April 20, 1847; returned home on account of ill health in 1874. He continued the preparation of medical works in the Tamil language. Several standard volumes were prepared by him, covering in all between three and four thousand pages, and are used as text-books in India. Dr. Green's name stands a household word among the people of the island to whose interest he devoted his life. He died at Worcester, May 28, 1884.

GREENBAY: A settlement on the island of Antigua, W.I., near St. John's. After the emancipation of the slaves in Antigua, the idle, the vicious and immoral gathered here and made the place notorious for vile deeds of all description. The Moravians in 1848 opened a preaching place, with such success that in a short time the character of the people changed completely. At present (1901) there are 14 native workers, men and women, with 2 preaching places, 1 school and 413 communicants.

GREENLAND: An extensive region, including 46,740 square miles, belonging to Denmark, lying northeast of North America, from which and its outlying islands it is separated by Davis' Strait and Baffin's Bay. Cape Farewell, its southern extremity, is a point on a small island from which the east coast extends northeast toward Cape Breverder, where it takes a more northerly course, and stretches toward the Pole to an unknown distance. The southern part of this coast is rugged and barren, with cliffs and precipices visible far out at sea. The climate is very healthful, the temperature varying according to the distance from the Pole. Fogs are prevalent most of the year, and but little rain falls. The population, except about 300 Danes, consists entirely of Eskimos who live by hunting and fishing, and number 11,595 (1901). A few live on the east coast, where is the only mission station on the heathen side. All the manufacture and settlements are on the west coast, upon the lowlands along the fiords. Greenland is divided for administrative purposes into two inspectorates, North and South Greenland, each subdivided into seven districts, having a director who is assisted by a parliament of two men. The crown of Denmark has a monopoly of the trade, which is carried on under the direction of
the Greenland Trading Company. After years of discouraging efforts on the part of missionaries, all the natives have been converted to Christianity. The religious instruction of the people is in the hands of the Church of Denmark. In 1900 the Moravians, who had several stations in Greenland, withdrew, considering their work was done. The Eskimos have given up their nomadic habits and enjoy the benefits of civilization, while they are afflicted with fewer of its vices than are the Indians who have come into contact with the white man elsewhere. Liquor is prohibited in all the settlements.

GREENVILLE: A town in Liberia, W. Africa, situated on the Sinoe River near its mouth, and included in Sinoe in missionary reports. Station of the PE (1853), with (1901) 5 native workers and 57 communicants. Also station of ME, with (1902) 1 missionary and his wife, 15 native workers, 10 outstations, 8 preaching places, 1 industrial school, and 462 professing Christians.

GRiffin, Davis: Born December 20, 1792, at Glenmillwh, Carmarthenshire, Wales; educated at Wrexham and Gosport; sailed as missionary of the LMS for Madagascar, October 25, 1820. He made the first translation of the whole Bible into the Malagasy language, assisted by Mr. David Jones. In 1834 his connection with the LMS was terminated, and he returned to England. Returning afterward to Madagascar, he settled at Antananarivo for purposes of trade, and made great efforts to assist the persevering Christians. Returning to England in 1842, he became pastor at Welsh Hay. He published History of Madagascar in Welsh, revised the Malagasy version of the Bible, and prepared numerous works in the Malagasy language. He died at Machynlleth, March 21, 1863.

GROTT CHATILLON: A settlement in Dutch Guiana, S. America; situated on the Surinam River, about 12 miles S. of Paramaribo. Station of the Moravian Missions, with 4 missionaries, men and women; 1 native worker, 2 preaching places, 1 school and a leper asylum known as "Bethesda."

GROOT SANGIR ISLANDS. See Sangir Islands.

GUADALAJARA: A town in Mexico, the second in importance of the republic, and capital of the State of Jalisco. Situated on the Santiago Rive, 130 miles S. S. W. of Zacatecas, and at an altitude of 5,000 feet. It was founded in 1542, and has many churches and convents, a university, a mint, and an academy of painting. Population (1900), 101,208. Station of the ABCFM (1882), with (1902) 6 missionaries, men and women; 4 native workers, 5 outstations, 1 girls' boarding school, 1 theological seminary and training school. Station also of the International Medical Association (Seventh Day Advent), with 3 missionaries, 1 dispensary, and 1 hospital. Station also of the MES (1884), with (1901) 6 missionaries, men and women, and 1 native worker.

GUADALCANAR ISLAND. See Solomon Islands.

GUAM, or GUAHAN: An island of the Ladrones or Marianne group, in the Pacific Ocean, N. of the Caroline Islands. It is the largest island in the group and was ceded to the United States by Spain in 1898. It is about 32 miles long, contains about 200 square miles, and is surrounded by coral reefs. It is thickly wooded, well watered, and fertile in soil. The population (1903) is estimated at about 9,000, two-thirds of the whole number living in Agana, the capital. They are mostly immigrants from the Philippines. Spanish is the official language and Roman Catholicism the prevailing faith. The Protestant mission on the island was established by Luis Sainiotes, a Jesuit, in 1668. The ABCFM established a mission in Guam in 1900. It now has a station at La Punta, near Agana, with 1 missionary and his wife, 1 day school, 1 boarding and industrial school, and 114 professing Christians, of whom 30 are communicants.

GUANAJUATO: A town in Central Mexico, 160 miles northwest of Mexico City. A pleasant city, built on both sides of a narrow defile in the mountains at an altitude of 6,500 feet. It lies in a rich mining district, and in the census of 1900, its population was 41,486. Station of the ME, with (1902) 1 missionary and his wife, 2 women missionaries, 11 native workers, men and women; 2 preaching places, 2 day schools, 1 dispensary, 1 hospital, and 514 professing evangelical Christians.

GUANTANAMO: A town in Cuba, W. I., situated 40 miles east of Santiago, in a very productive region of sugar estates. Population, about 24,000. Station of the American Baptist Home Missionary Society (1899), with 1 missionary and his wife.

GUARANI LANGUAGE: Belongs to the South American family of languages, and is spoken by the native population (mixed blood) of Paraguay. It is written with Roman letters.

GUATEMALA: A republic of Central America, bounded on the north by Yucatan, east by British Honduras, the Bay of Honduras, and the republics of Honduras and San Salvador; south by the Pacific, and west by the Mexican State of Chiapas. Its greatest length, from northwest to southwest, is 325 miles, its greatest breadth about 300 miles; area, about 58,000 square miles. Climate, excessively hot in the low, and cool in the high, regions, is generally healthful. The soil is exceedingly fertile, but poorly cultivated. Population (1900), 1,647,283, of whom 109,000 are pure Indians, very few descendants of Europeans, and the rest mestizos, a mixture of Spanish and Indian blood. The Indians live mostly by themselves, and the civil authorities immediately governing them are chosen from their own race. Indolence and licentiousness are the besetting vices of all the people. Language, Spanish; religion, Roman Catholic, but all other creeds have liberty of worship. The government is republican; the legislative power is vested in a congress, and the executive is a president, assisted by three ministers, elected for four years. The capital is Guatemala, by far the finest city in Central America, situated in a picturesque plateau in the southwest part of the republic. The missionary societies operating in Guatemala are the PN; with 2 stations, and the Central Amth. 1 station, with 10 in their mission. The ABS also has an agency at Guatemala city.

GUATEMALA LA NUEVA: Capital of Guate-
mala, Central America, situated at an altitude of 4,850 feet in the southern part of the country, 50 miles from the Pacific and 150 from the Bay of Colombia. Population (1898), 74,000, of whom five-sixths are of European origin. The houses are rather low and squallid looking, being constructed with a view to escaping damage from earthquakes. Station of the FN (1892), with 1 missionary and his wife. Station also of the Central America Mission (1899), with 6 missionaries, men and women. Agency of the American Bible Society.

GUAYAQUIL: A seaport in Ecuador, S. America; capital of the province of Guayas, situated on the right bank of the Guayas River, 35 miles above its mouth, and 165 miles S. W. by S. of Quito. Population, 51,000, of whom about 5,000 are foreigners, the most of the remainder Indians and half-breeds. Station of the Gospel Missionary Union (1896) and of the PB.

GUAYMAS: A seaport of Mexico, situated on the Gulf of California, 275 miles W. of Chihuahua. It is connected by railroad with the United States railroad system. Population, about 7,000. Station of the Mission, 1 missionary and his wife and 1 native worker.

GUBBI: A town in Mysore, India, situated 50 miles N. W. of Bangalore. Population, 4,000. Station of the WMS, with (1903) 1 missionary and 66 native workers.

GUDUR: A town in the district of Nellore, Madras, India, situated 24 miles S. W. of the town of Nellore. Population about 20,000. Station of the Hermannsburg Mission, with (1902) 1 missionary and his wife, 10 native workers, men and women; 1 preaching place, 3 outstations, 4 schools and 296 professing Christians.

GUIANA: An extensive territory on the northeast coast of South America, bounded on the north by the Atlantic, on the west by Brazil, and on the west by Brazil and Venezuela. The country slopes from the south, where the mountains reach an altitude of 7,000 feet, to the lowlands of the north. Six large rivers, whose general trend is north, drain the country. In the lowlands the climate is tempered by the equatorial breezes, which blow all the year. Terrific thunderstorms often occur, and at times earthquake shocks may be felt. The fertility of the soil is unsurpassed in South America.

The three Guianas are the only European colonies on the Continent, and combined they are not larger than Wyoming and Colorado.

1. British Guiana, formally ceded to Great Britain in 1814, is the largest of the three colonies, and includes the settlements of Demerara, Essequibo, and Berbice, named from the three rivers. It extends from 9° to 1° north latitude, and from 57° to 52° north longitude, including an area of 109,000 square miles. The government is administered by a governor, assisted by a court of policy. There are over 150,000 acres under cultivation, half of which is devoted to the raising of sugar. Population (1891), 278,477, composed of negroes, mulattoes, East Indians, and Chinese. For many years Chinese immigrants were brought to work on the sugar plantations, but about 1870 all organized importation was discontinued, and there are now only about 4,000 Chinese in the colony. The chief crop is sugar cane. There are 150 schools which receive government grants, with 21,384 pupils. Georgetown is the capital and principal city.

Mission work in British Guiana is carried on by the Moravian Brethren, the National Baptist Convention, the LMS, the SPG, the SDA, and the PB.

2. French Guiana (Cayenne) was acquired by France in 1626, and includes an area of 46,850 square miles. It is by far the hottest of the three colonies, is poorly cultivated, and its trade is very insignificant. Cayenne is the capital and largest city. It is by far the most inaccessible part of South America untouched by Protestant missions. Its total population is about 35,000.

3. Dutch Guiana (Surinam) is separated from French Guiana on the east by the river Marowijne, and on the west from British Guiana by the river Corantyn. It was first acquired by the Netherlands in 1667 in exchange for New Netherlands in N. America, and was finally surrendered to its possession by the peace of Paris, 1815. The area is 46,000 square miles, much of it consisting of flat and swampy land, while the high mountains are found toward the south. The population is (1900) 65,968, exclusive of the negroes living in the forests, engaged principally in agriculture. Sugar is the principal product. Paramaribo is the capital. The government is in the hands of the governor and council, who are nominated by the queen. Entire liberty is accorded to the members of all religious confessions, and in 1902 there were the following connections: Reformed and Lutheran church members, 9,584; Moravian Brethren, 28,027; Roman Catholics, 12,771; Jews, 2,879; Hindus, 11,158; Mohammedans, 3,918. Mission work in Surinam is carried on by the Moravian Brethren (1735).

GUINEA: Name formerly applied to much of the western coast of Africa south of the Gambia River. It is now commonly applied to Portuguese Guinea lying adjacent to Senegambia, and to French Guinea south of the former and north of Sierra Leone.

Portuguese Guinea: A colony of Portugal, is on the coast, entirely surrounded on the land sides by French territory. It has an area of only 4,440 square miles, and a population of 820,000 (estimated). It includes the Bissagos Islands off the coast of the chief island of Bioko, in the Gulf of Guinea.

French Guinea: A colony of France on the western coast of Africa, detached from the colony of Senegal in 1890, and organized as a colony in 1893. It has an area of about 95,000 square miles, and an estimated population of 2,200,000. It extends from Portuguese Guinea on the north to Sierra Leone and Liberia on the south, and is bounded on the east by the French dependencies behind Senegal and the Ivory Coast. The coast is low and unhealthy.

GUJARAT: A region in Bombay, India. The name does not refer to any political division of the Bombay Presidency, but rather to the area within which the Gujarati language is the ordinary vernacular of the Hindu inhabitants. This region is composed of part of the districts belonging to the Bombay Presidency, and in part of the territories of many different native states. It lies along the shore of the Indian Ocean, at its northeastern angle, and between the coast and the Western Ghats, which stretch along the coast. On the southeastern, it reaches latitude 11° north, 115 miles north of Bombay; its most northern point, where it touches Rajputana, is in latitude 24°
GULICK, Peter J.: Born at Freehold, N. J., March 12, 1877; graduated at Princeton College 1895, and at Princeton Theological Seminary 1827; sailed November 3, the same year, a missionary of the ABCFM, with the second reinforcement for the Sandwich Islands. He was stationed first at Waimea; then Koloa, on Molokai, till 1847; then at Waialua, Oahu, till 1857, when he removed to Honolulu. In 1874, after forty-seven years of service, he went with his wife and daughter to reside with his son, O. H. Gulick, in Japan. He died in Kobe, December 8, 1877. Six of his children became missionaries of the American Board.

GUMLA: A village in Chota Nagpur, India, situated about 35 miles south by west of Lohardaga. Station of the Gossner Missionary Society, with (1903) 2 missionaries, 20 native workers, men and women; 13 preaching places, 7 Sunday schools, 2 day schools, and 1,911 professing Christians.

GUMMPUR: A town in the Madras Presidency, India, situated 50 miles south of Chichacole. It includes the peninsula of Kathiawar, Kachchh, the native states of Baroda, Cambay, those of Mahi Kantha, Rewa Kantha, and Palanpur, and several other inferior chieftainships. It also includes five districts of the Bombay Presidency, and is said to contain a population of 3,000,000. The total area, including feudatory states, is 70,038 square miles, and the total population about 10,000,000. The city of Surat is one of the oldest missionary stations in India; it was occupied by missionaries of the London Missionary Society as early as 1824. About 1846 the mission was transferred to the Irish Presbyterian, who now have 10 stations in that district. The ME and the CA have latterly established stations in this region also.

Jeffrey (Rev. R.), Fifty Years' Work in Kathiawar and Gujarat, London.
GUNDER, Herman: Born in Stuttgart, 1814. Died in 1893. He joined the Basel Mission in Malabar, India, in 1839, and for twenty-four years he exerted a wide and potent influence in India and other lands. Dr. Gundert was a man of great learning, and his pen was a blessing to the cause of missions. He was the author of many Malayalam books; his dictionaries did much toward the development of the language and dialects of the people among whom he labored, and his Bible translations were painstaking and scholarly. His failing health necessitated his return home, where he became editorial secretary and principal of the "Calwer Verlagsverein."

GUNNAUR: A town in the district of Budaon, United Provinces, India, situated about 3 miles from the left bank of the Ganges. Population (1891), 5,500, of whom 3,200 are Mohammedans. Circuit station of the ME, with (1901) 500 professing Christians.

GUNONG SITOLI: A town on the E. coast of the island of Nias, Dutch East Indies, W. of Sumatra. Station of the Rhenish Missionary Society, with (1903) 2 missionaries, 1 missionary's wife, 15 native workers, men and women; 2 outstations, 4 day schools, and 853 professing Christians.

GUNTUR: A municipality and district in the Presidency of Madras, India, situated in the region of the Kistna, about 20 miles W. of the river, in a region that is quite healthful but rather difficult of access. Population (1891) 23,400, of whom 17,300 are Hindus. Station of the ELGS, with (1902) 18 missionaries, men and women; 62 native workers, men and women; 22 preaching places, 42 Sunday schools, 32 day schools, 1 college, 1 orphanage, 1 hospital and dispensary, and 4,848 professing Christians.

GURDASPUR: A town in the Punjab, North India, 44 miles northeast of Amritsar. Unimportant except as a trading center for the produce of the neighboring villages. In appearance and sanitary arrangements it is fairly good. Climate, cool and pleasant. Population (1891), 6,000, of whom 3,600 are Hindus and 2,600 Mohammedans. Station of the UP (1872), with (1903) 1 missionary and his wife, 3 women missionaries, 12 native workers, men and women; 39 outstations, and 16 village schools.

GURZALLA: A town in the Madras Presidency, India, situated on the Kistna River, about 85 miles E. of Hyderabad. Station of the ABMU (1895), with 1 missionary and his wife, 23 native workers, men and women; 8 outstations, 4 preaching places, 12 day schools, 1 boarding school, and 5,000 professing Christians, of whom 1,800 are baptized adults.

GUTU'S: A settlement in Rhodesia, Central Africa, situated about 175 miles E. N. E. of Bulawayo, E. of the Station of the London Missionary Society (1892), with (1903) 3 missionaries, 1 missionary's wife, 1 native worker, 13 outstations, 12 preaching places, and 150 professing Christians.

GUTZLAPP, Karl Friedrich August: Born at Pirritz, in Pomerania, July 8, 1893. He early showed great zeal in study, and expressed a strong desire to be a missionary, but, his parents being too poor to educate him, he was apprenticed to a saddler at Stettin. At the age of eighteen he made known his wishes for a missionary life in a sonnet which he addressed to the King of Prussia, which led to his being admitted to the Pädagogium at Halle, and afterward to the mission institute of Jänicek in Berlin. On leaving the school he visited England, and meeting Dr. Morrison, the Chinese missionary and scholar, his mind turned strongly to China as his ultimate field of labor. In 1826, under the auspices of the Netherlands Missionary Society, he sailed for Batavia, where, by close study and intercourse with Chinese residents, he made great proficiency in the Chinese language. In 1828 he severed his connection with the Netherlands Mission Society, and resolved to go on his own account to China. Between 1831 and 1834 he made three voyages along the coast of China, Siam, Korea, and the Lu-chu islands. In these he went at first in the disguise of a Chinaman, afterward as an interpreter, surgeon, and chaplain on the British ship "Lord Amherst." On the death of Dr. Morrison, in 1834, he was appointed interpreter and secretary to the British ambassador, and finally superintendent of trade, which office he held till his death. During the opium war and the negotiation of the treaty of peace at Nanking, May 29, 1842, he rendered valuable service to the British by his knowledge of the language and customs of the people.

His medical skill and great learning won the respect and confidence of the people. An attempt made by him and others, in 1844, to spread Christianity by means of native agents proved premature and unsuccessful. But his indefatigable personal efforts for the cause of religion and Christian civilization in China deserve to be held in grateful remembrance by the Church. He made a translation of the New Testament into Siamese, and was associated with Medhurst in translating the Bible into Chinese (Wenli). He also, aided by shipwrecked Japanese sailors, translated the Gospel of John into Japanese in 1838. In 1849 he visited England, Germany, and other countries in Europe, and by his addresses gave a new impulse to missionary effort in China. He returned to China in 1851, and died at Victoria, Hongkong, August 9 of the same year.

GWAMBA LANGUAGE: Belongs to the Bantu family of African languages. The term is used by a subtribe in the Transvaal. Better acquaintance with them has revealed the fact that the name is merely a local name for the Tonga language.

GWELO: A town in Rhodesia, Central Africa, situated about 100 miles N. E. of Bulawayo, among the Matabili. Station of the BPG (1895).

GYAZA: A settlement in Uganda, Central Africa, situated about 100 miles E. of Mvugo Station of the CMS (1895), with (1903) 1 missionary and his wife, 119 native workers, men and women; 1 preaching place, 3 day schools, and 2,437 professing Christians. The name is also written Gayaza.
HAI-CHENG-HSIEN: A town in the province of Liao-tung, Manchuria, China, situated about 32 miles E. by N. of Newchwang. It was the scene of a defeat of the Chinese army by the Japanese in the war of 1894. Station of the UFS (1876), with (1903) a missionary and his wife, 25 native workers, 8 outstations, 5 day schools, and 865 professing Christians.

HAIDARABAD: Capital of the native state of the same name in S. Central India, situated on the Musi River, a tributary of the Kistna, amid wild and picturesque scenery. Towering above all other buildings is the splendid pile of the British Residency. The city was founded in 1589, and its population, numbering (1901) 448,466, is the most varied in India, as well as the most turbulent in appearance. The inhabitants are, for the most part, Mohammedans, making Haidarabad the largest Mohammedan city in India and second in the world of Islam to Constantinople alone. It is a station of the CMS (1901), with (1902) 5 missionary, 5 native workers, and 30 professing Christians. Station also of the WMS, with (1903) 3 missionaries, 60 native workers, men and women; 4 preaching places, 11 day schools, and 193 professing Christians. Station also of the ME, with (1902) 1 missionary and his wife, 3 women missionaries, 19 native workers, men and women; 8 day schools, an orphanage, and 28 professing Christians. The YWCA also has a representative there.

HAIDARABAD: A city in Sind, India. The city is a naturally and artificially fortified town, formerly the capital of Sind. It stands on a low limestone ridge E. of the Indus, and is noted for its silks and its manufactures of fine work in the precious metals. Population (1891) 54,600, of whom 32,000 are Hindus and the remainder nearly all Mohammedans. Station of the CMS (1856) and the CEZ (1885), with 1 missionary and his wife, 3 women missionaries, 22 native workers, of whom 8 are women; 10 day schools, and 1 model school. There are also 356 pupils in the zenanas.

HAIDARABAD: One of the largest and most important of the so-called feudatory states of India, governed by a native prince. The ruler is called the Nizam, who is a Mohammedan, the descendant of the "Nizam-ul-Mulk," or viceroy of the Deccan, who ruled the country as viceroy of the Mogul emperors of Delhi nearly two centuries ago, but in the decadence of the Delhi power rebelled and set up as an independent prince. A British resident is maintained at the Nizam's court. This state is often called "the Nizam's Dominions." Among the people it is popularly spoken of as "the Mogulai."—in allusion to the Mogul origin of its rulers. It lies in the center of the great tableland which occupies almost all of India south of the Vindhyaa Mountains. The area of the state is about 80,000 square miles. The population (1891) is 11,211,142. Of this number about 10 per cent. are Mohammedans, and as the ruling dynasty is Mohammedan, persons of that faith occupy not only the principal positions of trust and authority but also pervade the lower ranks of both civil and military employment. The state lies just where several language areas meet; accordingly there is a great diversity of dialect within its borders. Marathi is spoken by the Hindu population of the west and north-west; Kamarai by the Hindus of the southwest; Telugu by those of the eastern districts; Hindustani by the Mohammedans throughout, the Persian is the court language; and the aboriginal tribes (Gonds, etc.) have, as elsewhere, each its own tongue. The habit of carrying guns is prevalent among Mohammedans throughout the state; to some extent Hindus also adopt it. It is not unusual to see, in some village bazaar, a man with a long matchlock musket over his shoulder, a curved sword in his hand, two or three daggers and knives of different patterns stuck into his girdle, and a shield of ancient pattern hanging down his back. The presence everywhere of these walking arsenals, together with the violent and bitter fanaticism of the average Mohammedan, and the feeling prevailing in the minds of the Muslim inhabitants of the Haidara State that it is a territory sacred to their faith and power, often renders missionary work there difficult, not to say dangerous; no Christian preacher has ever been actually assailed, the sometimes threats of violence, however, are quite real. While it was considered unsafe, some years since, for strangers to enter Haidarabad City without protection, this is not the case at present. In other parts of the territory life and property are usually safe. Education in the Nizam's state is rather backward, and the general condition of the country is shown by its roads, postal system, and other appliances of civilization, attests the inefficiency and carelessness of Oriental rule. Yet the constant example of the British Government is not lost upon the leading men in the Haidarabad State, and the government is striving, not altogether prettily, to succeed, to pattern its operations after the model thus set before it. Three lines of railway pass through the territory, and thus the capital city is brought into direct communication with outside civilization. The WMS, the SPG, the ME, and the ADMU are the missionary societies chiefly engaged in the territory of Haidarabad. The whole number of missionaries in the 19 stations is 54, both men and women. They carry on 130 schools of all grades, and the number of communicants connected with these stations is about 5,500. The whole number of Christians reported from the Nizam's territory by the census of 1901 is 22,996. On the whole, altho this Mohammedan area in the midst of territories under the control of an enlightened Christian nation, is still to a degree benighted, yet rays of light are beginning to dawn over it, and civilizing influences are slowly penetrating it from all sides.

HAIFA: Also called Caifa; it is the Scamnium of St. Jerome, a seaport in Syria, situated at the foot of Mt. Carmel, 9 miles S. S. E. of Acre. It is the terminus of a railway from Damascus to the coast through the Hauran. There is a German colony and a colony of Russian Jews at this place. Population about 3,000. Station of the Jerusalem Verein (1891), with (1903) 1 missionary and his wife, 1 deaconess, 1 place of worship, and 1 village school. Station of the Jerusalem and the East Mission Fund; outstation of the CMS, the statistics being included in Acre (or
THE ENCYCLOPEDIA OF MISSIONS

the coast, and the interior of the island is given up mainly to the aborigines.

_Missions_: In 1830 the Roman Catholics commenced a mission at Kiu-chau. All that remains of their work now is the cemetery of the missionaries and a few hundred descendants of the early converts. Protestant missionary work began in 1881 with the medical and missionary labors of Mr. Jeremissen, an independent self-supporting missionary. In 1883 Rev. B. C. Harpy, of the Presbyterian Board Mission, arrived at Canton, made a visit to the island. In 1884 a preaching place to the Hakka was opened at Noda, a Hakka settlement. In 1886 the PN sent two missionaries who made Kiu-chau the center of their work. During the last decade the Gospel has been preached in nearly every part of the island, several chapels have been built, hospitals have been opened, schools have been established, and largely through medical missions many have been won to Christ.

_HAINANESE LANGUAGE_: Belongs to the Tai group of the Indo-China family of languages, being spoken by the inhabitants of the island of Hainan, South China. The Roman letters have been used in writing it for missionary purposes by missionaries of the PN.

_HAI-TAN_. See HE-TAN ISLAND.

_HAITI, or HAYTI_: An island of the West Indies, next in size to Cuba, and lying between Cuba on the west and Porto Rico on the east. It is mountainous, with the ranges running from east to west throughout the island. The soil is exceedingly fertile, and mineral wealth is supposed to be considerable. About two-thirds of the island is occupied by the Republic of Santo Domingo. The western part, comprising a little more than one-third of the whole area, belongs to the Republic of Haiti. The island was discovered by Columbus in 1492 and entered by Spaniards in 1493. The western part was occupied by French buccaneers in 1632 and annexed by France in 1697. A century later the slaves revolted against the French and after bloody wars proclaimed their independence in 1801. The eastern coast of Spain was ceded to the island was ceded to the Haitians in 1822-23, but revolted in 1843-44, becoming the Dominican Republic. The western part of the island was ruled by emperors for some years and finally adopted the republican form of government. The area of the whole island is 28,260 square miles.

_HAITI, or HAYTI, Republic of_: An independent territory in the western part of the island of Haiti. The republic is of the French type and has suffered from numerous revolutions and wars. The people are largely blacks (some 10,000 of whom are immigrants from the United States) and a very few whites. The population of the republic was about 850,000 in 1857, a church census in 1901 claims that there were 1,294,400. The language is a dialect of French, and the religion is Roman Catholic, although the voodooism of the Africans is extensively mingled with the Christianity of the common people.

Protestant missions were begun in Haiti by the WMS in 1816. They received a fresh impetus in connection with the emigration of negroes from the United States, in 1824. Many of these were Methodists and others were Baptists. Several preachers were among these American negroes, and a Methodist Conference organized among...
them in connection with the African Methodist Church of the United States continues to this day. The Baptists also have several churches in Haiti which were established in consequence of this emigration. The American Baptists maintained missionaries in three or four different years, but gave up the field to the BMS, and, at present, the Jamaica Baptist Missionary Union aids some smaller Baptist congregations, the general work being undertaken by the Haitian Baptist Union, composed of the pastors of churches which have no financial aid from abroad.

Colored Episcopalians from the United States having emigrated to Haiti in 1861, the field was taken up by the PE, and there are now six regular congregations, superintended by a Bishop, and with a theological seminary for training a native ministry. The field is very needy, since the people of the country districts are ignorant and rather to be classed as fetish worshipers than as Christians.

HAJIN: A town in Asiatic Turkey, about 30 miles north of Adana, in the heart of the Taurus Mountains. The population is almost entirely Armenian. Station of the ABCFM (1880), with (1902) 1 missionary and his wife, 3 women missionaries, 58 native workers, men and women; 7 outstations, 4 preaching places, 2 village schools, 2 high schools, an orphanage, a Young Woman’s Christian Association, and 616 church members.

HAKA. See Fort HAKA.

HAKKA: A distinct race found in the Canton province, China, near Canton and Swatow. They are of a lower social rank than the Pun-ti or native Chinese, and speak a different dialect. They are also found in the island of Hainan.

HAKKA LANGUAGE: A dialect spoken by a peculiar race or tribe who inhabit the mountains of Kwangtung province in China. It is written with the Chinese characters. Missionaries of the Basel Society have had some success in introducing the Roman letters as a more convenient means of writing it.

HAKODATE: A seaport on the southern extremity of the island of Yezo, Japan. The town is built along the base of a rocky headland, and is not unlike Gibraltar in its situation. A landlocked bay affords ample shelter and anchorage for the largest vessels. The governor of Yezo resides at Hakodate, where there are a government hospital and medical college. The streets are clean and well kept. Population (1890) 53,700. Station of the CMS (1874), with (1903) 3 missionaries and their wives, 3 women missionaries, 23 native workers, men and women; 4 outstations, 5 preaching places, 5 day schools, 1 boarding school, 1 theological class, 1 industrial school, 1 hospital, and 675 professing Christians. Station also of the ME, with (1902) 2 missionaries and their wives, 5 women missionaries, 41 native workers, men and women; 9 outstations, 15 preaching places, 2 day schools, 1 high school, and 749 professing Christians.

HALL, Gordon: Born at Tolland, Mass., April 8, 1784; graduated at Williams College 1809 with the highest honors of his class; studied theology with Dr. Porter (afterward professor at Andover); was licensed to preach, but, declining several invitations to settle, his heart being set on going to the heathen, he entered Andover Seminary in 1810. Here he was associated with Mills, Richards, and a few other kindred spirits, who prayed and conferred in reference to personal labor among the heathen. After studying medicine he was ordained at the same time with Judson and others, and sailed February 18, 1812, as a missionary of the ABCFM for India, reaching Calcutta August 8. Peremptorily required by the East India Company to leave its territories, and unsuccessful in his attempts to obtain permission to establish a mission, he presented to the governor of Bombay an earnest appeal, which brought him official permission to remain. In Bombay he labored thirteen years, visiting the temples and bazars with the Gospel message, discussing with the Brahmins and translating the Bible. Having completed the translation of the New Testament into the Marathi, he left Bombay for a preaching tour on the continent. At Nasik, a hundred miles distant, he found mulatto negroes and other inhabitants, consisting of sick till his medicines were exhausted. He then started to return to Bombay. At Durlidhapur, spreading his mat in the veranda of a heathen temple, he lay down to sleep. Rising at four o’clock in the morning to resume his journey, he was violently attacked by a crowd of forty, and for two hours of great suffering, breathed his last at the age of forty-two, March 20, 1826. The lad who with him buried him shrouded in his blanket, without a coffin. A stone with an inscription in English and Marathi marks the place of his interment. “No missionary in Western India,” says one, “has ever been more respected among the Brahmins and higher classes for his discussions and pulpit discourses.” His tract, The Conversion of the World, or the Claims of Six Hundred Millions, which he prepared in connection with Mr. Newell, was widely circulated in America and England and produced a profound impression.

HALL, William Nethorpe: Born in Sheffield, Yorkshire, England, April 19, 1829. In 1849 he was called to the regular ministry, having already been a lay preacher. But his health failed, and he went into business. In 1859, the Methodist New Connexion, having decided to commence mission in China, Mr. Hall offered to go, and in the autumn of 1859 he sailed with the Rev. J. Innocent as a missionary of the Methodist New Connexion. On their arrival in China they remained for a brief period in Shanghai. Mr. Hall was anxious to settle at Su-chau-fu, which was then in all its glory. He visited the place, then made it the center of his operations, while Mr. Innocent went to Tien-tsin, which had just been opened by treaty. The Taeping rebels devastated Su-chau, and prevented the establishment of a mission there. Mr. Hall went to Tien-tsin and united with Mr. Innocent in laying the foundations of a very prosperous mission. During the Tien-tsin massacre of 1879 the Protestant chapels, eight in number, were ruined and the members dispersed, many of them being beaten and some of them killed. Mr. Hall remained in the city during the awful outbreak, cheering the faint-hearted and seeking to rescue those who were in danger. The storm exhausted itself, quiet was restored, compensation was demanded and to some extent made, and the work of the mission was resumed. But it took a long time to retrieve the losses incurred.
In 1873 he returned home on furlough, and devoted his whole time to obtaining money to support an institution for the training of native preachers. He died May 27, 1879, and then returned to China and built the Training College at Tien-tsin.

Mr. Hall was pursuing his manifold works with intense enthusiasm, when in the spring of 1878, already weakened by his labors, he was smitten by diphtheria. He died on August 19, 1879. He was a man of vigorous and cultured intellect, copious eloquence, and undying energy. He had an iron will and dauntless courage. His one purpose found expression in words which were constantly on his lips—"China for Christ."

HAMADA: A town in Japan on the west coast of Honshiu, 200 miles N. E. by N. of Nagasaki. Station of the CMS (1890), with 2 women missions and 3 native workers.

HAMADAN: A city in Persia, supposed site of the ancient Ecbatana; situated at the E. base of Mt. Elvend, 185 miles W. S. W. of Teheran. Altitude, 6,000 feet. A trade center for caravans between Baghdad and Teheran. Population, 50,000. Station of the PN (1880), with (1903) 8 missionaries, men and women (one a physician); 25 native workers, men and women; 4 out-stations, 4 days schools, 2 high schools, and 186 professed evangelical Christians.

HAMLIN, Cyrus: Born near Waterford, Me., January 5, 1811; died at Lexington, Mass., August 8, 1900. Left an orphan in his infancy, Cyrus Hamlin was brought up in poverty by a mother who wrung a living from a little farm representing all her property. He was not a promising child, and when old enough was set to learn the jeweler's trade with a relative. A taste for books revealed itself while he was at this work, and led to his decision to earn a college education and become a minister. The carrying out of this decision in spite of utter lack of means revealed an initiative, resourcefulness, self-abnegation, and consecration to Jesus Christ which marked his whole career. Having graduated at Bowdoin College in 1834, and then at Bangor Theological Seminary, he sailed for Turkey in December, 1838, as a member of the A.B.C.F.M. He then acquired a literary knowledge of the Armenian and a colloquial knowledge of Turkish and modern Greek, and was entrusted, in 1839, with the opening of a boarding school for the training of preachers and teachers for the service of the mission. Several of Dr. Hamlin's high qualities immediately came to light in the energy and ingenuity by which he overcame obstacles put in his way by Mohammedan, Armenian, and Roman Catholic bigotry. The school was an experiment; its equipment was largely created by Dr. Hamlin, from in becoming its principal he had undertaken in the mission councils to build up a theological seminary at Bebek out of nothing. The school was a success; the men whom it trained for the ministry are remembered among the most sturdy pillars of the mission enterprise in Turkey, and other men who were there taught the nobility of honest toil by Dr. Hamlin in his stove factory, last factory, flour mill, bakery, or laundry, have been among the most successful and most honored laymen of the Evangelical Churches of the Ottoman Empire. The various industries just named were not carried on as a part of the work of a theological seminary. The last three enterprises came into being in connection with the Bebek Seminary, but with the purpose of providing means of livelihood for those destined for evangelical work who had been raised by the boycott pronounced against them as a part of the major excommunication hurled at "free thinkers" by their ecclesiastical chiefs. There is rarely to be found in the history of missions a more picturesque spectacle than that of Dr. Hamlin during the Crimean War (1854-56), observing the wounded English soldiers landed on the quays of Constantinople; abandoning his school duties in order to verify and remedy the facts; berating English officers of every grade for the red tape that made possible a criminal neglect of suffering soldiers; finally taking contracts to supply the hospitals and depot camps with eatable bread and thoroughly cleaned linen, and then executing the contracts with brilliant and beneficent efficiency by turning to the work all his energies and those of all of his students and teachers, and of scores of poor creatures who had been left behind as work because of their faith. And there is hardly a more impressive figure of self-forgetfulness among the many devoted missionaries of the world than that of Dr. Hamlin, after having carried this enterprise through by his own unselfish and unaided abilities, taking the $25,000 which fell to him as his legitimate profit, and covering it all into the missionary treasury to be used in aiding the little native communities to build chapels and churches. The whole episode of his services to the English army was magnificent as an achievement and thrilling as revealing the man. But the inceptive theological seminary became almost obliterated under the weight of the flour mill and bakery. While the question was under discussion of improving the efficiency of the seminary for training the native agency needed by the mission, Dr. Hamlin resigned his connection with the A.B.C.F.M. at the invitation of Christopher Robert, of New York, in order to establish Robert College at Constantinople. The first class of this college was received in 1863. The enormous difficulties in regard to site, authorization, and construction of the college buildings were by no means insoluble, energy, resource, and pluck which made Dr. Hamlin inimitable, and the structure on the Bosporus hills, which is the enduring monument to his memory, was opened in the summer of 1871.

In 1873 Dr. Hamlin returned to the United States and his connection with the A.B.C.F.M. ceased. He excelled in works of preparation and in dealing with initial difficulties. Others could endure better than he the steady drudgery of organizing and developing the College in order to carry it satisfactorily forward into the place assigned to it in the preconceived plan. Dr. Hamlin was professor of dogmatic theology at Bangor Seminary from 1877 to 1880, and president of Middlebury College in Vermont from 1880 to 1885, and after his retirement to Lexington, Mass., was much sought after for lectures and information for newspaper articles.

He was a most spiritually-minded man and of very deep principles. A master in temper, and sometimes disposed, in a land of turbulence like Turkey, to take the law into his own hands when a hopelessly irreconcilable element needed to be removed, he was extraordinarily ready to make amends, in a tender, whole-souled way that did really make amends, for any injustice done in
haste. No American missionary, without exception, ever gained such hold upon the hearts of the evangelical native community in Turkey, nor is regarded by them as having accomplished so much, as Dr. Hamlin for the spiritual and moral renovation of that land of darkness.

HANAMAKONDA: A town in the native state of Haidarabad, India; 86 miles northeast of the capital. Climate, tropical; population, 8,000. Station of the AIMU (1879), with (1903) 1 missionary and his wife, 2 women missionaries, 27 native workers, men and women; 18 outstations, 14 school-houses, 1 hospital, and 513 church members.

HAN-CHENG-HSIEN: A town in the province of Shen-si, situated on the Hoang-Ho River, 120 miles N. E. of Hsi-tung-fu. Station of the CIM (1897), with (1903) 1 missionary and his wife and 3 women missionaries.

HAN-CHUNG-FU: A town in the province of Shen-si, China, situated on the Han River, 225 miles N. E. of Cheng-fu, tu, at an altitude of 2,000 feet. It is a center for trade with Sze-chwan. Station of the CIM (1879), with (1903) 2 missionaries and their wives.

HANG-CHAU-FU: A city in the province of Chekiang, China, situated at the southern terminus of the Grand Canal, and at the head of Hang-chau Bay, 110 miles southwest of Shanghai. Its beauty of location is celebrated in a popular Chinese proverb, and, with the beautiful western lake, in which are fair-like islands, and around which stand villas and monuments, with its extensive circuit of twelve miles, its well-paved, clean streets and numerous public buildings, it well deserves the name of an earthly paradise. It is a great center of Chinese commerce and learning. Marco Polo celebrated its beauty under the name of Kinsai, and in a northeastern corner of the city is the Nestorian church of which he speaks. The population has been estimated at 800,000. Station of the PN (1859), the CMS (1864), the CIM (1886), the PS (1867), and the ABMU (1899). These societies together report (1903) 41 missionaries, men and women; 85 native workers, men and women; 29 places of worship, 25 places of worship and high schools, 18 village schools, and 1,500 professed Christians. The PN has a college here and a school for training women for evangelistic work; the ABMU has a printing house, and the CMS has 2 hospitals and dispensaries, a refuge for opium victims, and some special work for lepers. Besides these special features of the missionary enterprise, the Mission to Lepers in India and the East has two houses for the children of lepers. In reports the name is written Hangchow.

HANDS, John: Born December 5, 1780, at Roade, Northamptonshire; studied at Gosport; sailed May 5, 1809, as a missionary of the LMS for India. He was first stationed at Bellary. In 1829 he visited England, and returned to India in 1831. He translated the whole Bible into Kanarese, and superintended its printing. He was subsequently appointed agent of the Society in Ireland, arriving in Dublin January 24, 1845, where he died June 30, 1864, aged eighty-four.

HAN-KAU: A city in the province of Hupei, China, situated on the north side of the Yangtse River, at its junction with the Han, about 450 miles west of Shanghai. It is the largest commercial center of Middle China, was opened to foreign trade in 1858, and is connected with Shanghai by regular steamships. The British settlement is on the river front in the eastern portion of the city, where foreign houses and roadways are built. The native city is surrounded by a wall sixteen feet high and four miles in circumference. It contains a population estimated at 300,000. Wu-chang, the capital of the province, is on the southern bank of the Yangtse, opposite Hankau, and the two are often spoken of together with Han-yang, which faces Hankau on the other side of the Han River, as one city. The population of the three cities together is about 1,200,000. Station of the LMS (1861), the PE (1865), the WMS, the CIM (1889), the American Norwegian Lutheran Church (1891), and the United Evangelical Church (1900). These societies together have (1903) 35 missionaries, men and women; 72 native workers, men and women; 32 outstations, 11 places of worship, 19 day schools, 2 boarding schools, 5 dispensaries, and 5 hospitals. The WMS has special work among the blind, and the LMS has recently opened and staffed a training school for women evangelistic workers. The National Bible Society of Scotland has here a printing house under charge of two agents (with their wives), and 27 native workers. Name also written Hankow.

HANKEY: A village in Cape Colony, S. Africa, situated in the Humansdorp division, 45 miles W. of Port Elizabeth. Population, about 1,600. This settlement was established by the LMS in 1828 as a refuge for freedmen, upon land which the Society had purchased. After some years the quality of the negro population began to deteriorate, and in 1875 the LMS ceased to provide for their care and spiritual nurture. In 1900 it took up this work again and established a school there for the higher education of the children of colored Christians throughout the colony. It now (1903) has 2 missionaries and their wives, 15 native workers, 3 day schools, 1 boarding school, and about 1,600 professing Christians, of whom 370 are church members.

HANNINGTON, James: Born at Hurstpierpoint, Sussex, England, September 3, 1847. Love of nature, of fun, and of adventure was phenomenal with Hannington. He shrank from no risk which promised a view or a specimen. Averse to study, he left school at the age of fifteen, and was put in his father's counting-room at Brighton. To whatever suited his tastes or habits he applied himself with untiring perseverance, never to be outdone, and never to be foiled. As captain of a battery and as commander of a steam yacht he early displayed ability in the control of men, and resource under exigencies. But he was as disinclined to business as to study. In boyhood the love of his mother was the sheet-anchor of his life. He not only never neglected the externals of religion, but was never wholly satisfied with a life apart from God. About the age of twenty-one he decided to prepare for the ministry of the Church of England, and to that end, in October, 1868, entered St. Mary's Hall, Oxford. He soon established an ascendency over his fellow-students, which he maintained without a rival throughout the university course, and this influence was often beneficial, but it cannot be said that he was studious, except in the line of his pursuit as a
naturalist. He was ordained a deacon in 1874, and took charge of a small parish in Devonshire. There he experienced a new conversion, and in 1875 a conversation on missions with two ladies led him to the CMS, and in 1876 he joined it. Eight years later the cruel death of Messrs. Smith and O’Neill, two missionaries on the shores of the Victoria Nyanza, in Africa, greatly moved him. Believing that he had certain elements of character as well as experiences of life that fitted him for preaching to the heathen, he left England, Rubaga. He was soon afterwards married to the daughter of a seled Arab. Mrs. Harmshope, he said, was the soldier appointed to kill him: “Go, tell Mwanga that I die for the Baganda, and that I have purchased the road to Uganda with my life.”

His last words to his friends in England, scribbled by the light of some camp-fire, were: “If this is the last chapter of my earthly history, then the next will be the first page of the heavenly—no blots and smudges, no incoherence, but sweet converse in the presence of the Lamb.”

HANOVER: Missionary Society of the Lutheran Free Church of. See Germany; Missionary Societies of.

HAN-YANG: A town in the Hupe province, China, situated at the confluence of the Han and Yangtse Rivers, opposite Han-kuu. It has iron and steel works of some importance. Population about 400,000. Station of the CMS, with (1903) 1 missionary, 2 women missionaries, 10 native workers, men and women; 1 outstation, 2 preaching places, 1 day school, 1 boarding school, 1 dispensary, and 138 professed Christians. Station also of the ABMU (1893), with (1903) 1 missionary, men and women; 10 native workers (one a woman), 8 preaching places, 2 day schools and 531 professing Christians.

HAPPY GROVE: A village 7 miles N. W. of Kingston, Jamaica, W. I. Station of the AFFM, with 3 women missionaries.

HARBOUR ISLAND: An island lying at the N. end of Eleuthera Island, Bahamas, W. I. Station of the WMS, with (1903) 2 missionaries, 41 native workers, men and women; 8 preaching places, 7 Sunday schools and 802 professing Christians.

HARDA: A town in the Central Provinces, India, 48 miles southwest of Hoshangabad. Population (1891) 13,600, of whom 10,000 are Hindus. Station of the FCM (1882), with (1901) 8 missionaries, men and women; 20 native workers, men and women; 4 outstations, 2 places of worship, 3 day schools, 2 dispensaries, 1 hospital, 1 orphanage, 1 theological class and 1 leper asylum. Name also written Hurda.

HARMSHOPE: A settlement in Beechuanaland, S. Africa. Station of the WMS, with 70 miles N. of Mafeking and close to the Transvaal frontier. Station of the Hermannsburg Missionary Society (known in 1885 reports as Patu Letschopa, given its present name in 1876). It now has about 1,400 professing Christians under charge of 1 native preacher and 4 helpers.

HARPER: A settlement at Cape Palmas, Liberia, w. Africa. Station of the PE (1836), with (1901) 10 native workers, men and women; 2 places of worship, 1 orphanage and girls’ school and 400 professing Christians, of whom 260 are communicants.

HARPUR: A town in the United Provinces, India, situated 23 miles S. by E. of Meerut. Population (1891) 18,500, of whom 8,500 are Hindus and 6,000 Muslims. Station circuit of the ME, with (1902) 23 native workers, men and women; 2 preaching places, 11 day schools and 1,300 professing Christians.

HARPUT (Armenian Kharpert—Rock castle):
A town in Asiatic Turkey, situated near the Murad Su branch of the Euphrates, about 60 miles N. W. by N. of Diarbekir. It stands at an altitude of 4,100 feet on a hill that overlooks a most fertile plain. The population of the town is about 12,000, chiefly Mohammedans, but with a certain number of Armenians and a few Syrian Christians. At Mezere, a small village 3 miles distant, is the residence of the Governor-General of the province of Mamuret-ul-Aziz (commonly called the province of Harput). The Armenian part of the town and the villages of the plain were devastated in November, 1895, and thousands of the Armenian inhabitants massacred after the authorities had first induced the villagers to give up, as a token of loyalty, what guns they possessed. At the time of the massacre artillery was turned upon the Armenian quarter of the town, and eight of the buildings of the American Mission were looted and destroyed. Station of the ABCFM (1855), with (1902) 13 missionaries, men and women; 119 native workers, men and women; 40 outstations, 38 preaching places, 58 village schools, 5 high schools with industrial department and 1,450 evangelical Christians. The most important feature of this station is the Epiphany School, which offers higher education to the people of a wide expanse of country in the heart of Asiatic Turkey. The college has a department for girls, which is wholly separate from the department for young men, altho under the same administration. In 1901 there were in all departments, from kindergarten up, 1,057 students, of whom 476 were girls, and 100 boys and girls were in the four college classes. The buildings burned in 1895 have been rebuilt. The indemnity paid by the Turkish Government was not, however, enough to cover the cost.

HASBEYA: A town in Syria, Asiatic Turkey, situated 22 miles E. S. E. of Sidon, in a deep glen on the ridge of Mt. Hermon. It has asphalt pits in its neighborhood. Population about 5,500. Station of the ABCFM (1866), with (1900) 2 women missionaries, 6 native workers and helpers, and 7 Sunday schools in the place and neighboring villages.

HASKELL LECTURESHIP for India. See BARROWS LECTURESHIP.

HA Ssass: A town in Mysore, India, situated 63 miles W. by N. of the city of Mysore. Population about 6,000. Station of the WMS, with (1903) 1 missionary, 38 native workers, men and women; 6 places of worship, 13 day schools, 1 orphanage, and 169 professing Christians.

HASTINGS, Eufras Parmeele: Born at Clinton, N. Y., April 17, 1821; graduated at Hamilton College 1842, and Union Theological Seminary 1846; ordained at Clinton, October 6, 1846; emigrated for Ceylon, November 18, the same year, as missionary of the ABCFM. On his arrival he was appointed by the mission as an instructor in the Batticotta Seminary, where he remained five years. On a brief visit to the United States, he married. In 1853 he reembarked for Ceylon and resumed his connection with the seminary until it was closed two years later by the deputation from the Board; he was then stationed for two years at Chavakachcheri, and then for twelve years at Manepy. In 1870 he again visited the United States, and engaged with Mr. Sanders in collecting funds for a college in Jaffna. Returning, he was appointed in 1872 president of the college. After occupying the presidency of the college for seventeen years, he retired in 1889, on account of increasing physical infirmities and removed to the Manepy station, of which he took charge. He died July 31, 1889, after an illness of two or three days.

Altho Dr. Hastings devoted himself largely to educational work, this did not prevent his preaching. He had the active superintendence of several churches while ostensibly burdened with the care of Jaffna College.

HASTINGS: A village in Sierra Leone, situated about 12 miles S. E. of Freetown. Station of the WMS, with (1903) 33 native workers, men and women; 4 preaching places, 2 day schools, and 319 professing Christians. Station also of the Sierra Leone native church in cooperation with the CMS, with (1903) 6 native workers, men and women; 8 preaching places, 2 day schools, and 613 professing Christians.

HATHIRAS: A town of the United Provinces, India, situated in the district of Aligarh, about 22 miles S. of that city. Population (1891) 39,200, of whom 33,700 are Hindus and about 5,000 Muslims. Station circuit of the MES, with (1902) 21 native workers, men and women; 11 day schools, and about 800 professing Christians.

HATTEN: A village in Ceylon, situated 25 miles S. W. of Kandy and just north of Adam's Peak. Station of the WMS.

HAUSA LANGUAGE: Belongs to the negro group of African languages. It is the medium of intercommunication between the inhabitants of extensive districts in the Niger region in West Africa. It is customary to speak of "the Hausa people," "Hausa land," "Hausa language," etc. Since CMS missionaries went to live in that country, however, it has become apparent that these terms exist outside of Africa only. Hausa means "the language," and the name is applied to the language of the Habes race, which has spread up the river by a number of different tribes within and without the Fulani Kingdom. Some of these tribes are Mohammedans in religion and some are still heathen. The language has been printed with Roman letters by missionaries of the CMS.

HAVANA: Capital of Cuba, situated in the western part of the island and on the N. coast. It has a beautiful harbor. Population 22,900. Station of the American Church Missionary Society (1876), the AFFM (1899), the FCMS (1899), the MES, and the African Methodist Episcopal Church. These societies have 12 missionaries, men and women, and 11 native workers. The ABS also has a depot in the city in charge of an agent.

HAWAIIAN EVANGELICAL ASSOCIATION
(1823): Less than five years from the landing of the first missionaries on Oahu of the Hawaiian Islands, a "General Meeting" of the missionary fathers was convened. This was held annually for thirty-one consecutive years, from 1823-1854, with but seven exceptions. At the first meeting the object of the gathering was stated: "We, the undersigned, ministers and missionaries of the Lord Jesus Christ in the Sandwich Islands, being set for the defense of the truth and the enlightening of the Gentiles, agree to unite in an association for mutual improvement and mutual aid in laying the foundation, maintaining the order, and building up the house of the Lord in these islands of the sea." In 1854 this General Meeting became the Hawaiian Evangelical Association; three years before, in 1851, the Hawaiian Missionary Society of the fathers had been formed, for the purpose of cooperating with the American Board in its new missions in the island world; this was continued till 1863, when the Hawaiian Evangelical Association was remodeled by being opened to representatives of the native churches, and the Board of the Hawaiian Evangelical Association, commonly known as the Hawaiian Board, was formed. The Association "all ordained clergymen, both native and foreign, of the Congregational and Presbyterian orders on the various islands of Hawaii, and of Micronesia and the Marquessas Islands, together with such laymen as may be elected from time to time by a two-thirds vote, and lay delegates appointed annually by the local island associations; six from Hawaii, four from Maui and Molokai, four from Oahu, and three from Kauai and Ni' Hawaiian." This Association appoints the members of the Hawaiian Board, of whom twenty-two are white men and eleven are natives. It is the duty of this Board to perform any agency requested of it by the Prudential Committee (American Board), in respect to former missionaries of the ABCFM at these islands; and the education of their children at the islands, and to take charge of home missions in the Hawaiian Islands, the promotion of a native ministry, and of females who may become teachers and pastors' wives; of the preparation, publication, and circulation of useful books and tracts, and also of foreign missions, so far as the conduct of them from these islands shall be found practicable and expedient, and shall be charged of and disburse funds contributed for these objects. The home mission work of the Hawaiian Board consists of evangelistic and educational work among the native Hawaiians, and the English-speaking population, and among Chinese, Japanese, Portuguese, and Gilbert Islanders resident in the islands. Total expenditure for home missions, $31,801.12, as follows: home missions $7,068.07, Japanese missions $5,005.20, Chinese mission $9,641.50, Portuguese mission $3,571.35, North Pacific Missionary Institute $2,435, Kohala Girls' School $2,280.

The foreign work of the Hawaiian Board began in 1852, when three Hawaiian families went with the American Board missionaries to establish the Micronesian Mission. A year later a chief from one of the Marquessas Islands landed at Lahaina, and asked that missionaries be sent to his island. A considerable amount of missionary influence was required to respond to the call, and one of them still remains there. Since the beginning of its foreign work, the Hawaiian Board has sent more than thirty Hawaiian families to the Micronesian and Marquesas Islands, and the native church has grown, upon a conservative estimate, not less than $11,000 to this work.

Total expenditures for foreign missions (1901): Salaries $911.10, publications $177.31, fund $73.70; grand total $1,162.01. Publications (190; chiefly hymn books and Bibles), $1,931.37. Receipts for all publications (190), $435.71, invested funds $146,619, property $102,800.

The organ of the Society is The Friend, monthly, Honolulu, H. T.

HAWAII, or SANDWICH ISLANDS: A group lying in the middle of the Pacific Ocean, in latitude 19° to 22° north, and longitude 155° to 160° west, about 2,000 miles from San Francisco, and constituting a territory of the United States. The islands were discovered by Captain Cook in 1778, and were named by him the Sandwich Islands, but they have always been called Hawaii by the natives themselves. The principal islands and their respective areas are: Hawaii, 4,850 square miles; Maui, 750 square miles; Oahu, 700 square miles; Kaui, 750 square miles; Molokai, 700 square miles; Lanai, 700 square miles; Niihau, 110 square miles, and Kahulaw, about 40 square miles.

Almost the entire surface of Hawaii is composed of the slopes of four volcanic mountains. Mauna Loa, 13,800 feet high, is one of the few active volcanoes. Mauna Kea, on the opposite north side of the island, is 13,805 feet in height and is the highest peak in the Pacific Ocean. This island is of historical interest as being the place where Captain Cook was killed, and a monument is erected at Kealakeakua Bay. Maui has also mountains of volcanic origin, with fertile valleys lying between. Kahulaw, together with Lehua, is a large sheep pasture. Molokai is formed by a backbone ridge, with lateral spurs enclosing ravines. A leper settlement is the only object of interest found on this island. Oahu is noted for the beauty of its scenery. Peaks, cliffs, ravines, cascades, and tropical vegetation unite to please the eye. It is traversed from southeast to northwest by two parallel ranges of hills. By some volcanic upheaval a bay of the sea has been converted into a plain some twenty-five feet above the level of the ocean, and this is the site of Honolulu, the capital of the territory. Kauai, like the rest of the islands, is mountainous, but has many valleys which are very fertile, and the north side of the isle is the choicest land for growing sugar in the whole group. Nihiaw has a dry, fertile soil, and is used for pasturing sheep.

The climate of nearly all of the islands is noted for its healthfulness, for, tho' warm, it is equable, and there is very little variation in temperature between the winter and summer. Clear skies and regular land and sea breezes combine to render the islands one of the most delightful habitations in the world. The rainfall is quite excessive, especially on the windward side of the larger islands.

The natives of the Hawaiian Islands belong to the Malay race, as modified in the Polynesian type. Physically, they are among the finest races in the Pacific, and they have shown considerable vigor. Before the invasion of the last two centuries the introduction of Christianity they were not much superior in moral character to any of the other savages in the Pacific. Polygamy, infanticide,
and polyandry all prevailed. The idolatry of the Kanakas, as the natives are called, was barbarous and bloodthirsty, for human sacrifices were frequently offered during the sickness of a chief, at the consecration of a temple, or at the inception of a war. On the other hand, the natives are even-tempered, light-hearted, and a pleasure-loving race. When the islands were discovered the natives were estimated at 400,000, but they seem to be dying out, for the census of 1890 gives only about 30,000 in all. There is reason to believe that in the course of a few years the total extinction of the race will ensue. The remainder of the population consists of 7,835 half-castes, 28,533 white foreigners and people of foreign descent, 58,500 Japanese, and 25,742 Chinese. There are restrictions on Chinese immigration. The language is a branch of the Malao-Polynesian, and can be understood by New Zealanders. It is a soft, liquid, vocalic tongue, containing only five consonants, k, l, m, n, p, an aspirated h, five vowels, and a vocalic w.

The former scanty costume of the inhabitants has given place to a modern European dress, the women still cling to the holoka, a loose white or colored garment with long sleeves. Leprosy is prevalent, and the government has established a settlement on Molokai, where sufferers from this disease are isolated.

Religion: Since the spontaneous movement of 1819-20, when idols and temples were destroyed by the natives, the Gospel has been preached until the whole nation is now practically Christian. The American missionaries arrived in 1820, and, in addition to accomplishing the conversion of the islanders to the Christian religion, they taught them to read and write, reducing their language for the first time to a written form. All forms of religion are tolerated. Roman Catholics, Anglicans, and Congregationalists are the principal denominations. Schools are established all over the island.

Mission Work: The history of the mission work of the ABCFM in Hawaii relates one of the most significant triumphs of the Gospel. Its work in the islands has all been passed over to the Hawaiian Evangelical Association. The SPC has carried on work among the Chinese in the islands, but upon the annexation of Hawaii to the United States their work was transferred to the PE. According to the census of 1896 there were 26,363 Roman Catholics (largely Portuguese) in the islands, 23,779 Protestants of all denominations, 4,886 Mormons, 44,306 Buddhists, and 10,192 not described.

D.), A Brief History of the Hawaiian People, New York, 1892; Whitney (C.), Hawaiian America, New York, 1899; Bingham (H.), Residence of Twenty-one Years in the Sandwich Islands, Hartford, 1847; Brain (B. M.), Transformation of Hawaii, New York, 1899; Sisley (N.), Five Years Church Work in Hawaii, London, 1896.

HAY RIVER: A trading post in the Mackenzie Territory, Dominion of Canada, situated on the Great Slave Lake at the mouth of Hay River. Station of the CMS.

HAZARIBAGH: A town in Bengal, India, capital of the district of Hazaribag. Situated on a high plateau of 2,000 feet, and is picturesquely situated among conical hills about 60 miles S. S. E. of Gaya. Population (1891), 16,700, of whom 12,100 are Hindus. Station of the Goseer Missionary Society (Berlin II.), with (1893) 1 missionary and his wife, 7 native workers, 2 preaching places, 1 village school, and 141 professing Christians.

HEBON (Labrador): A village in a sterile and forbidding region on the E. coast of Labrador. Population, 2,000, Station of the Moravian Missionaries (1880), with (1900) 3 missionaries and their wives.

HEBON (Natal): Station of the Hermannsburg Missionary Society (1882), situated in the E. part of Natal, near the Tugela River, and about 60 miles from Pietermaritzburg. It has (1902) 1 missionary and 6 native workers.

HEBON (Palestine): A town in Palestine, Asiatic Turkey, situated in a long, narrow valley about 20 miles S. W. of Jerusalem, at an altitude of about 2,200 feet. It has an important relic of antiquity in its "sanctuary" built over a cave traditionally known as the Cave of Machpelah. Station of the CA. Outstation of the Jerusalem Verein of Berlin. The town is known locally by the title given by Abraham, El Khalil: the Friend of God.

HEBON (Transvaal): Station of the Hermannsburg Missionary Society (1872; opened at Matlare in 1866), with (1902) 2 missionaries, 1 missionary's wife, 5 native workers, 4 preaching places. There were before the war 1,044 professing Christians here, but the present situation has not been reported by the Society. Hebron is situated over the Transvaal Colony about 18 miles N. W. of Pretoria.

HEERENDYK: A substrata of the Moravian Missions in Dutch Guiana, S. America. It is one of a number of plantations situated on the northern banks of the Comewyne, where a large number of converts were gathered by the traveling missionary. In 1856 a piece of land was purchased, a church and mission house erected, and a regular congregation formed. It now has 26 native workers and about 250 professing Christians.

HEIDELBERG: A town in the Transvaal Colony, S. Africa, situated about 25 miles S. E. of Johannesburg. Station of the SPG and of the WMS, with (1903) 1 missionary, 25 native workers, 10 outstations, 6 places of worship, 5 Sunday schools, 1 day school and 530 professing Christians. Station also of the Berlin Missionary Society (1875), with (1903, as far as can be learned since the war) 19 native workers (the missionary in charge being in Germany), 15 outstations, 1 day school, and 828 professing Christians.

HENG-CHAU: A town in the province of Hu-nan, China, situated on the Hsiang River, 50 miles S. of Hsiang-tan. Station of the PN (1902), with 2 missionaries and 1 dispensary. The name is sometimes spelled Heng-chow.

HENDRA: An important and growing town in Lower Burma, British India, situated on the Irrawady River, 100 miles north-west of Rangoon. It is the center of a large rice trade. Population, 19,800, of whom 15,000 are Buddhists. Station of the ABMU (1853), which has two distinct fields of labor—the Karens and the Burmese. It now (1898) has 7 missionaries, 3 men and women; 172 native workers, men and women; 89 outstations, 81 preaching places, 63 day schools, 3 boarding schools, 53 Sunday schools, 74 organized churches, and about 10,000 Christian adherents, of whom 3,093 are church members.
HERBERTSDALE: A village in Cape Colony, S. Africa, situated about 40 miles N. W. of Moseltown (1902) 1 missionary, 10 native workers, men and women; 2 outstations and 662 professing Christians, of whom 167 are communicants.

HERMANNsburg: A settlement in Natal, situated in the Umvoti division, about 15 miles E. of Greytown. Station of the Hermannsburg Missionary Society (1854), with (1902) 1 missionary and his wife, 10 native workers, men and women; 2 outstations, 2 preaching places, 2 day schools and 625 professing Christians.

HERMANNsburg Missionary Society. See Germany; Missionary Societies in.

HERMON: A village in Basutoland, S. Africa, situated near the W. frontier, about 5 miles E. of Wepener. Station of the Paris Evangelical Society, with (1902) 1 missionary and his wife, 22 native workers, 8 outstations, 9 preaching places, 9 day schools and 1,639 professing Christians, of whom 954 are church members.

HERMOSILLO: A town in Mexico, capital of the State of Sonora, situated on the Sonora River, 110 miles north of Guaymas. Population 7,100. Station of the ABCFM (1836), with (1902) 1 missionary and his wife, 3 native workers and 21 outstations.

HERSCHEL: A village in Cape Colony, S. Africa, situated in the angle between Basutoland and the Orange River, 22 miles E. by N. of Aliwal North. Station of the SPG (St. Michael's parish), with (1902) 1 missionary and 1,660 professing Christians.

HERVEY, or COOK, ISLANDS: A small group in the Pacific, between 18° and 22° south latitude, and 157° and 170° west longitude. The population consists mainly of emigrants from Tahiti and Samoa, and numbers about 12,000. In 1859, at the invitation of the chiefs and people, a British protectorate was proclaimed, and in 1901 the islands were annexed to New Zealand and a British resident stationed at Ratotonga to control enforcements. Owing to the efforts and careful work of the London Missionary Society, whose missionaries commenced evangelizing these islands in 1823, the majority of the inhabitants are now Christians, and take high rank among the converts in Polynesia. The principal islands are the following: Ratotonga, 20 miles in circumference, with about 2,000 inhabitants. It was occupied by the LMS in 1823, and there are now (1901) on the island 2 missionaries and 1 missionary woman, 5 native workers, 5 Sunday schools, 6 common schools and 524 communicants. Mangaia, with 1,540 inhabitants, was occupied by the LMS in 1823. There are there now 1 missionary, 78 native workers, men and women; 3 Sunday schools, 5 common schools and 562 communicants. Aitutaki, 12 miles in circumference, has 1,170 inhabitants. It became a mission station in 1821. There are now there 1 missionary, 3 native workers; 1 Sunday school, and 282 communicants. Atiu or Vaiti has 920 inhabitants. It was entered in 1823 by the LMS and there are there and in surrounding islets 7 native workers and 690 communicants.

HE-TAN ISLAND: An island belonging to China and lying off the coast of the province of Foo-chow. Three missionaries worked in Tang-tau in the N. E. part of the island.

HIAO KIAN. See Hsiao-Kan-Hsiien.

HIAU KAN. See Hsiao-Kan-Hsiien.

HILL, John Henry: Born 1791; graduated at Columbia College, New York; for several years was engaged in commercial pursuits; pursued a theological course at the seminary, Alexandria, Va., and was ordained deacon and presbyter by Bishop Meade in Norfolk, 1830. He and Dr. Robertson were appointed by the American Episcopal Missionary Society as missionaries to Greece. They sailed October, 1830, landing on the island of Tenos, where they remained six months, and then removed to Athens. In 1832 Mrs. Hill, aided by her sister, Miss Mulligan, opened a female school in their own house, with the Bible as a text-book. From the first the school was crowded and within two years more than 300 children were daily instructed in a stone building erected for it. Three generations of Greek women have there received a Christian education. Other schools for boys and girls were soon established. The schools of the missionary were the models for the municipal and national schools afterward established, and furnished teachers for them. A#print of the Greek LXX, too, was placed in charge of graduates from the Hill institution. Once a week Mr. Hill met the boys of all the schools for the study of the Septuagint, which they translated into modern Greek and which he then explained. On Sunday the scholars were taught the Gospel for the day, or the Bible in course containing the history of Christ's life. Four years later he wrote: "When we think of our humble origin from a dark, dirty, vaulted cellar of an old Venetian tower, our progress thence to an old Turkish house and two miserable chambers, and gradually to our own residence, and the filling up first of one room and then of another, and now look at our large and commodious schoolhouse, the largest in Athens, completely filled from top to bottom with industrious children, numbering nearly six hundred, we are astonished."

In 1845 Mr. Hill was appointed chaplain to the British Legation, and for many years officiated as such in the English Chapel of St. Paul at Athens. The appointment was unsolicited by him, and "most justly due to him for his great and untiring services to the English residents for twelve years past." In 1869, in view of his advanced years and that of his wife, he handed in his resignation to the Board. The committee resolved "to provide for his comfortable support in Athens, the city of his adoption and life's work, until his death."

In token of the appreciation by the nation of his educational work, Dr. Hill received from the Minister of Education an official document, dated June 18, 1891, in which occurs the following paragraph: "Upon the fiftieth anniversary of your school, which was the beginning of the more systematic education of the young women of Hellas, I take pleasure in transmitting here the congratulations of his Majesty."

While Dr. Hill's main work was the education of the young women, he performed other useful labors. In connection with Dr. Robertson and others of the mission he translated valuable English textbooks, secular and religious, into modern Greek. By his preaching, teaching and personal intercourse he communicated much Christian truth to the clergy. He died at Athens July 1, 1892.
aged ninety. The Greek Government gave him a public funeral.

HILL, Joseph Sydney: Born 1852. Died 1894. Native of Barnach, Swindon; educated at Islington C. M. College. On October 14, 1876, he went to Leke, Lagos, W. Africa, and in September, 1878, was stationed at Waipora, New Zealand Mission, where his connection with the CMS closed in 1882. In 1883 he became chaplain of H. M. Prison, Auckland; in 1892 was appointed Commissary of the Archbishop of Canterbury and Director of Niger Mission, and in the same year was made Bishop-Designate of the Niger. In 1893 Durham University conferred on him the Hon. D.D. Degree, and in the summer of this year he was consecrated in St. Paul's Cathedral second Bishop of the Niger, now named "Western Equatorial Africa," with two native Assistant Bishops. Both Bishop and Mrs. Hill died at Lagos of fever, January 5, 1894. Bishop Hill combined the highest standard of spirituality with a singularly forbearing spirit, and his influence left a lasting impression on the Niger.

HINDERER, David: Of Schorndorf, in the Kingdom of Wurttemberg. Missionary in Lagos, Western Nigeria. Aged 20, he was a graduate of the Basel Missionary Training school. After a short time of preparation at Abockuta he was directed to go forward into the further interior and try to reach the Mohammedan Hausa people. This he did not succeed in doing; but on May 20, 1851, he was the first white man to enter the great town of Ibadan, the name of which was ever afterward associated with his own. In the following year he visited England and married Anna Martin, whose missionary life was as heroic and successful as her husband's. During twenty-eight years of labor in Western Africa, Mr. Hinderer did much pioneer work; and in 1874-5, when he paid his last visit to his old field, he opened up new work to the east of Lagos, leading in 1876 to the occupation of Odo Ondo by Charles Phillips, afterward bishop. Mr. Hinderer died in 1890, and in 1898 a new church was completed at Ibadan as a memorial to David and Anna Hinderer.

Mr. Hinderer's literary work was in the Yoruba language, and included a translation of the book of Isaiah, of the Pilgrim's Progress, and of some hymns. He also revised Bishop Crowther's translation of the Bible.

HINDI LANGUAGE: The language of the Hindus in distinction from that of the Mohamme-
dans of India. It is based upon the ancient Sanskrit, and is called by the literary class Prakrit in contrast to the purer Sanskrit of literature. It is written like Sanskrit, with the Devanagari letters. Traders and in general the lower class of natives often write (and print) the Hindi in an imperfect imitation of the Devanagari, which is called Kaithi. The Hindi language is the vernacular of more than fifty millions of people in the north of India, and possesses an extensive literature aside from the ancient Sanskrit literature.

HINDUISM: In order to gain a clear understanding of the religious systems of India it is important to observe a distinction in names. Brahmanism and Hinduism are not interchangeable. Brahmanism properly denotes an earlier stage of development in the faith of the Hindus; Hinduism denotes that more complete and com-
posite system which embraced all previous stages, and, like a spreading banian-tree, covered all the superstitions and philosophies which had been known to the Indo-Aryan race. If we go back to the earliest teachings of the Vedas and attempt to characterize the faith of the families of the ancient hymns, we may properly call it Aryanism or Vedism. It is a simple and well-nigh mono-
theistic nature worship, largely imported by the Indo-Aryan conquerors from the original cradle of the Aryan race in the high tablelands of Central Asia. Nature, under the most prominent of Varuna's personifications, is worshiped as the source and the upholder of all things, and is invested with moral attributes and a moral government of the world. Some of the hymns to Varuna seem truly devout. At that early period we find no well-defined polytheism, though there is a ten-
dency toward it in the disposition to address separate powers of nature,—the sun, the sky, the dawn, the rain, fire, etc.,—as embodying the one deity who is supreme.

There is no trace of idolatry or the worship of images and symbols; there is no developed pantheism, no system of transmigration, no widow-burning, nor authorized infanticide. The dead were buried in that early period instead of being burned, and the oppression of woman was comparatively mild. There was no hint of divine incarnations, and no Trimurti or Hindu Trinity.

The next development may be called Brah-
manism. It was a galling and oppressive sys-
tem of sacerdotalism, instituted and enforced by the Brahman or priestly caste. It was well developed by about 800 years B.C., and it bore undisputed dominion for 300 years. It made use of such portions of the Vedas as supported, or seemed to support, its assumptions; and by comment and interpretation, and additions to the sacred hymns, it produced what were known as the Brahmanas. These were based upon such allusions in the Vedas as were supposed to relate to forms and acts of worship, and they became, under the Brahman's hands, complete rituals. They dealt with every question and every interest which concerned the Brahman caste. They traced its divine origin, sanctified its superstitious observances and its religious rights. They assigned bounds and limitations to the three subordinate classes, viz.: the Kshatriyas or soldier caste, the Vaishyas or farmer caste, and the lowly Sudras or the mensal caste. Thus distinctions were fixed immovably. Barriers were raised which might not be passed, and disabilities were laid upon the lower orders from which there was no escape. Marriage, social relations, industries, and vocations, military service, rights of property, laws of inheritance—every interest of human life was subdivided to the dominion of caste.

The privileges and exemptions of the Brah-
manas involved an intolerable oppression of every other caste. The life of a Brahman was inviolate even by kings.

In connection with this caste system the most absurd and burdensome system of sacrifice sprang up. It has been common for the races of man to observe the custom of offering sacrifices to deity. They have generally been expiatory; often they were offerings expressive of gratitude or they were free gifts made in the hope of secur-
ing favor and the bestowment of some desirable boon. In Vedic times there were significant
Hinduism

THE ENCYCLOPEDIA OF MISSIONS

traces of vicarious sacrifice—even of a divine and altogether voluntary sacrifice made by deity for the benefit of others. One is reminded of the Great Sacrifice made once for all, as set forth in the New Testament; and it has been claimed by eminent Oriental scholars that these Vedic references denote strange traditional reminiscences of a prediction once made in the Old Testament: "Lamb slain from the foundation of the world."

But under the teachings of the Brahmanas period the doctrine of sacrifice became a monstrosity. It was a system of bargaining between earth and heaven. A sort of tariff of values was fixed, which the gods could not disregard. If one were rich enough in sacrificial gifts he might bankrupt the gods by hopeless obligations. It was claimed that the sacrifice of a hundred horses might demand the throne of India. Sometimes even demons placed the gods in their power and wrought anarchy in the universe by the abundance of their sacrifices. Of course the explanation of these extravagances is found in the fact that the Brahman or priestly caste derived an immense revenue from their bloody offerings. In a real sense they ate what the gods were supposed to eat in a spiritual sense, and in all the expense they only threw down the bills they paid for their services. Not only for the living but for the dead were sacrifices demanded. Not even the Church of Rome in the palmy days of Tzetzel and Leo X. derived such revenues from the doctrines of Purgatory and Indulgences as accursed to the Brahmanical priesthood of India.

The land was deluged with sacrificial blood, the people groaned under the awful burden, and the day of reckoning drew near.

About 500 B.C. the more intellectual classes of India became restive; schools of philosophy sprang up; men were led to consider the great mysteries of life, and, if possible, to solve the problems of human destiny. They were no longer content to be mere ignorant slaves under a galling sacerdotalism. Men rose up and threw off the system of sacrifice or greatly weakened its power. At the same time Buddhism arose with its protest not only against caste and sacrifice, but against the whole system of superstition which the Brahmans had created. Tired of the extreme religiousness of Brahmanism, it went to the opposite extreme of rejecting all religion. Gautama became atheistic. For six years he had tried ascetic Brahmanism and found it barren and illusive. He therefore taught a system of ethics and of self-reliance and self-righteousness, as a substitute for the national religion.

The development of Buddhism and the Darsanas or Six Schools of Philosophy had been preceded by the Upanishads—a system of speculative teachings partly drawn from, and partly reared upon, the philosophic portions of the Vedas, as the Brahmanas had been built up from their scattered references to ritual. These Upanishads were the earliest sources of Hindu philosophy, and from them the weapons were first drawn which crippled the power of the Brahmans.

But over against this movement was a desperate effort of the Brahmins to resist its rationalism. These results are seen in the so-called Dharmasastra, or Code of Manu. This is not definitely known in what precise order these conflicting movements of the great minds of India proceeded. Strict chronology is the one thing wanting in all Hindu literature; it has well been said that the historic instinct is wholly unknown to the Hindu mind. But it is supposed that the dangerous philosophic tendencies of the times specially stimulated the Brahmanas to guard and buttress their assumptions by those laws which, the produced by different authors, were thrown into one through the effort in the massive compilation ascribed to Manu.

A brief account of these various elements in Hindu literature will set forth their relations more clearly. The Vedas, classified under the various divisions of Mantras or Hymns, Brahmanas or Rules of Ritual, and Upanishads or Vedic Philosophy, are known as Smritis or Direct Revelations. These subsequent works now to be considered are called Smritis or unrevealed teachings of eminent sages.

The Darsanas or Six Philosophic Schools were all in agreement on certain points, such as the eternity of matter past and future; the eternity of soul—both the infinite and the individuated soul; the necessary connection of soul with matter in order to enable it to act (even the infinite soul is unconscious until it evolves the universe which is its body); the attendant evil of all such connection; the need of transmigration in order to throw off by long discipline the evil consequences of such connection; and that pessimistic doctrine which makes it the great end of human existence to get rid of itself by being absorbed into deity.

In their separate and distinctive characters the Six Schools were these:

(1) The Nyaya, founded by the Brahman Gotama, and which maintained that all the evils of life result from false knowledge or misapprehension, and that the remedy is to be found in acquiring right methods of investigation and reflection. It proposed an elaborate classification of knowledge, and framed a syllogism more elaborate than that of Aristotle. It was really a system of salvation by logic.

(2) The Vaiseshika, founded by Kanada, was an advance upon the Nyaya, tho in the same direction. Both were analytical. The latter applied logical and analytical processes to all the facts of nature and of life. It claimed to solve the mystery of creation on an atomic theory like that of Lucretius and the extreme evolutionists of our day.

Like some more modern evolutionists, divided as to the existence of a first and moving Cause, the adherents of these two systems resolved themselves into two classes: the Agnostic or Atheistic school; and those, especially of a later day, who recognized the being of Isvara (God).

(3) Another important school was the Sankhya, founded by Kapila. This was synthetic rather than analytic. It ascribed the origin of the visible world to an active principle, regarded as the pre-existing substance (juxtaposition), the subatomic entity, the "rootless root" of all things. In order to the energizing or activity of this universal source of being it must come into contact or cooperation with soul. It is active, but not intelligent. Soul is intelligent, but inactive and helpless. Each supplements the other. The existing substance called Prakriti clothes the soul, to which it meets with bodies, and invests them with life; and so the teeming universe is produced.

This dualism of Prakriti and soul was illust-
trated among philosophers by the relation of the two sexes, and with the low and unphilosophic classes this led to the notion of the male and female principles in the gods, and to the endless corruptions which have been developed in India along these lines.

(4) A fourth system of philosophy was the Yoga by Pantaljali. In one view this was rather a ritual than a philosophy, since it related wholly to the observances of the ascetic life, and gave endless rules therefor. But in prescribing methods for ridding the soul of the corrupting influence of man's ego, it dealt with subtle metaphysics and finely elaborated processes of logical analysis, and often evinced a marvelous philosop-

(5) A fifth school was the Maismas by Jai-
mimi. It was a reaction against the rationalism of the Nyaya and the Sankhya, and aimed to exalt the word and testimony of the Veda even to the place of God. In its root-principle it was a system of book-worship. It made the Veda self-existent and eternal; even the sound of its spoken words was eternal, and had always been audible. In its details it was an elaborate ritual for the right reading and comprehension of the sacred hymns. A false syllabic quantity in reading, an inspiration where there should have been an expiration of the breath, was a heinous if not an unpardonable sin. The Veda was a fetish in the fullest sense.

(6) The sixth school was the Vedanta, founded by Vyasa. This was out-and-out pantheism—a fuller development of it than has appeared in the Upanishads. "Brahman (neuter noun for the Self-existent) is this very universe, and he has no second." From him, in him, and for him all things exist. The visible world and even our consciousness are only phenomenal and illusory, as when in his evening walk one thinks he sees a snake and makes it very real, while in fact it is only a rope lying across his path. The Vedanta school has molded the intellectual classes of India through all subsequent ages. Whatever superstitions have grown out of the Sankhya, and whatever extravagances may have attended the asceticism of the Yoga, the men of thought have been Vedantists, and are to this day. In the famous Sanskrit schools of Benares this is the prevailing philosophy. And from that which the ancient Vedic priests to Indian thought its strong hold upon the non-Christian and naturalistic minds of all lands.

The Laws of Manu: There is some evidence that the Laws of Manu preceded the full development of the Schools of Philosophy, though the bear internal evidence of having followed the Upanishads. They do not allude to Buddhism by name, though certain references to "Atheists" are supposed by some to refer to the followers of Gautama. The supposition is not necessary, as there were other Atheists besides Buddhists. Manu is a code of duties and laws written in the Sanskrit—Brahma, Vishnu, and Siva—nor to the doctrine of Bakti (faith) in relation to Krishna. Both that and the doctrine of Saktism (the worship of the female energy) were of later date. Manu was severe in his humiliation of woman; yet her position was not so degraded or so degrad-

(2) The fatalism of Manu's theology. "In the beginning he (Brahma) assigned names, actions, and conditions to all beings. . . In order to distinguish actions he separated merit from demerit. To whatever course of action the Lord first appointed each kind of being, that has spontaneously adopted in each successive creation (transmigration). Whatever he (Brahma) assigned to each at its first creation,—noxiousness or harmlessness, gentleness or ferocity, virtue, or sin, truth or falsehood,—that clings to it."—(Manu, Book I, 6-13.)
The singular place assigned to austerities. Dividing his own body, the Lord became half female. With that female he produced Viraj. Viraj, having performed austerities, produced Manu. Thus Manu, speaking to the sages, says: "But know me, O most holy of the twice-born, to be the Child of Manu, the fourth of the five Viraj himself produced, having performed austerities. Then I, desiring to produce created beings, performed very great austerities, and thereby called into existence ten great sages, lords of created beings. They created seven other Manus, possessing great brilliancy, gods and classes (ranks) of gods, and great sages of measureless power. Then many other creations are named. Thus was the whole creation produced by those high-minded ones by means of austerities, and at my command.

Waman's sad estate. The Manu is exonerated from even a mention of the Suttee, which became a custom before Alexander's invasion, yet there is little doubt that the influence of his Code, by a logical process, led to it. Ramahai quotes many passages from the Vedic literature, in which kings kill their own women, but she adds many strong contrasts from the Code of Manu. In strict accordance with the fatalism above named, we read in Book 9, 17, that "when creating them, Manu allotted to women a love of their bed, of their seat, and of ornament, impure desires, wrath, dishonesty, malice, and bad conduct." Manu made woman, and yet Manu has pronounced upon her the most blighting curse.

Transmigration. To the great sages, Bhrigu sprung from Manu, answered thus: "Hear the decision concerning this whole connection with actions: Actions, which spring from the mind, from speech, and from the body, produce either good or bad results. By action are caused the various conditions of men: the highest, the middling, and the lowest. Know that the mind is the instigator, here below, even to that action which is connected with the body, and which is of three kinds, has three locations, and falls under ten heads. (These are given.) A man obtains the result of a good or an evil mental act in his mind, that of a verbal act in his speech, that of a bodily act in his body. In consequence of such mental acts committed with his body, a man becomes in the next birth something inanimate; in consequence of sins committed by speech, a bird or a beast; and in consequence of sins of the mind, he is born in low caste." The above is a verbatim statement (Manu, Book XII) of the three-fold principle of all transmigration.

The Fully Developed Hindu System: Without dwelling longer on this remarkable code, probably the most widely influential that was ever promulgated, we notice briefly the irradiation of Buddhism into the Hindu system, and its influence upon it. Springing up about 450 to 500 A.C., it gained such power within two centuries that it became the state religion of India—not that it supplanted Brahmanism; it merely dominated it. The immense system of sacrifices it effectually crippled, and it rebuked some of the most extravagant assumptions of the priests.

It produced a more humane spirit toward man and beast, and exemplified a higher code of ethics. To some extent it alleviated the condition of woman. Above all, it resisted the extreme rigors of caste, tho its theories of human equality and mutual right were forced to compromise with a system which it could not wholly overthrow. By its more sympathetic character it so won the people that after Buddha's death the Brahmans as a stroke of policy included him among Vishnu's incarnations. Meanwhile Hinduism, the system largely created and strongly supported by Brahmans, embodied so much of Buddhism as served its purpose, while it strongly opposed the influence of the Sangha or Buddhist order. Thus it gradually superseded and finally persecuted the rival system, and drove it from India. Nevertheless, Buddhism bore with it to other lands many fundamental principles borrowed from the Brahmans. Meanwhile Brahmansm had captured the two popular epic poems which celebrated the military exploits of the heroes Rama and Krishna, and turned them to its purpose by interweaving with them many doctrinal and mythological elements. The popularity of these heroes, both of whom belonged to the soldier caste, had excited the jealousy of the Brahans; yet they could not resist the tide; they must utilize it. They therefore raised Rama and Krishna to the position of deliverers, and brought them within the same line of procreation with themselves. Meanwhile they had gradually developed the doctrine of the Trimurti or Trinity, of Brahma the Creator, Vishnu the Preserver, and Siva the Destroyer and Renovator. Vishnu was the most popular as the preserver and sympathizer, and it was a natural and easy device to make all the alleged deliverers of Hindu tradition incarnations of Vishnu. Buddha was finally added as the ninth avatar, and prophecy predicted a tenth, who shall yet come as a spiritual deliver to establish a kingdom of righteousness.

Thus, by an accretion of whatever was desired of Vedism, Brahmansm, Buddhism, and philosophy, was developed the all-embracing system which we may call Hinduism. Its distinction from the earlier sacerdotal system known as Brahmanism will readily be seen.

It not only embraced the systems above named, but it also borrowed many popular superstitions from the Dravidians, Kols, Santals, and other previous invaders whom the conquering Aryans found in the country. The system has been compared to some old building which through a long period has been patched and repaired and enlarged by additions till nearly every original aspect has disappeared, and the result is an entire hamlet rather than a simple structure. Certain elements of Mohammedanism, Judaism, and some writers claim to have found traces of an influence borrowed from the so-called Syrian Christians who migrated to Malabar in the early centuries of the Christian era. In any case, it is certain that in our own time, Hinduism is borrowing largely from Christianity and the ethics and humanities of our Christian civilization. Under British rule, and in contact with the educational influence of missionary and government education, it has thrown off some of its most debasing customs, and under the title of Revived Aryanism is now proclaiming Christian ethics on what claims to be Vedic authority.

As already intimated, it is in the great Epics, the Ramayana and the Mahabharata, that the Trimurti with their incarnations are developed in the most popular form. They are ancient as
heroic poems; they are of later date as Brahmanized religious treatises. Probably they were molded into their present form somewhere between the fourth and the second century before our era, tho parts were added later.

The Bhagavad Gita: The eclectic poem known as the Bhagavad Gita was embedded in the encyclopedic mass of the Mahabharata probably as late as the first or second century of Our Lord. The interpretation given by the great commentator Sankaracharya bears a much later date.

The original author evidently gathered what he regarded as the pure honey from all flowers of Hindu literature. It is certainly a remarkable production, and seems to present many parallels to the New Testament, till one discovers that its mystical pantheistic meanings are often the very opposite of Christian truth, and that the similarities are only in phrases.

Very much has been made of the alleged resemblances of certain passages in the Bhagavad Gita to the New Testament. Translators who have proceeded with this theory in view, and especially those who have desired to discredit the Christian Scriptures as a probable plagiarism upon the Hindu poem, which claims to be of an earlier date, have read into their translation many phrases and many conceptions borrowed from Christianity, and of which a Hindu translator would never have dreamed. Large numbers of alleged parallels have been pointed out, most of which are fanciful and strained, while others seem plausible till we take into account the different ideas which the same language would convey to Hindu and to Christian minds respectively. "Union with God," which to a Christian means fellowship, would to a Hindu pantheist signify displacement of the human ego by the divine. In the one case it would imply loyalty, in the other the removal of all personal responsibility. The words "sin," "righteousness," "savior," "salvation," "heaven," find no corresponding terms in Sanskrit which convey our meaning, and the use of these and similar terms in translating Hindu literature is wholly misleading.

The Mahabharata is Arjuna, a cousin of Krishna, but in the Bhagavad Gita Arjuna is eclipsed. Indeed, he becomes a humble suppliant, while Krishna, a hero of the old border wars of the Punjab, a brave, large-hearted, but dissolute leader, is made divine—nay, the Supreme: He is the One only existing God. He is Vishnu, not the Vishnu of the Trimurti, but the sole, self-existing and all-governing One.

It should be said that under the strong influence of a surviving monothestic feeling the last two representatives of the Trimurti became each supreme in the worship of his respective followers, and to this day the worshipers of Vishnu and of Siva are distinct sects. Krishna was a further development of Vishnu worship.

In the later Puranas, dating not earlier than the 6th century A.D., the mythology of Vishnu, Krishna, and others runs wild, and, as has been shown by the late Dr. Wilson, of Bombay, the character given to those deities in the Vishnu Purana will scarcely bear the light.

In alluding to the pantheistic meaning of the Bhagavad Gita, we have touched the secret spring of that rare sublity which the missionary so often encounters in the Hindu mind, and which enables it to parry all attempts to find a lodgment for the saving truth of the Gospel.

Rev. Ram Chandra Bose has said that the first challenge which an agnostic foreigner in India presents to the missionary is the alleged parallels of the Bhagavad Gita to the New Testament, and generally with the assertion that the former, as being the older, must be the source of the latter. The most extravagant laudations are heaped upon its ethics and its philosophy. The Bhagavad Gita is supposed to have been written by some unknown author about the beginning of the 2nd century A.D., and it was thenceforth embodied in the epic poem Mahabharata. It attempted to reconcile the conflicting schools of philosophy, and to gather into one dramatic production all the loftiest sentiments found in previous literature. Its alleged resemblances to the New Testament are largely due to the Christian conceptions which have been read into it by modern translators, and by the use of words which would convey to Hindus and Christians respectively entirely different ideas, and meanings.

Subtle Influence of the System: The practical influence of Hinduism on individual life and character presents a marked contrast with that of Christianity. The life of the high-caste Brahman is intensely religious; no other system is so exacting as his, and yet his wearisome system is abortive, and even debilitating. The code of Brahmanism never deals with general principles in the regulation of conduct, as does the Gospel. It inculcates no such great central motives and sources of action as faith and love. Instead of prescribing, as Christ did, the comprehensive law of love to God in supreme degree, and love to our neighbor as to ourselves, it makes endless petty exactions. "Unlike Christianity, which is all spirit and life," says Dr. Duff, "Hinduism is all letter and death."

The Infinite, Brah, left no thinking or judging to be done by man in the sphere of religious duty, but revealed from heaven every act and observance, every posture and motion of the hand or turn of the eye, connected with worship. A devoted Brahman must in the morning clean his teeth with the twig of a particular tree, uttering at the same instant a particular prayer; if he must be specially careful in throwing away the twig. He must bathe in a particular kind of water, and if it be an inferior stream or fountain, he must pray the Ganges "to be included in this small quantity of water," by what Roman Catholics would call a "real presence." He must dip in the water, sprinkling it in prescribed directions, and offering certain prayers. Another of his morning duties is to salute the sun, which must be done with a lock of his hair tied in a particular way on the top of his head, while a large tuft of grass is held in his left hand, and three spires of a different grass in his right hand. He must also be sure to sip water, and with his wet hands touch his head, eyes, ears, nose, shoulders, breast, and feet. Should he happen to sneeze or spit, he may not sip water till he has first touched his right ear. In the Ganges, especially amid the crowds at Benares, or at the great Melas or bathing festivals, this sipping goes on, however filthy the water may have become by the constant treading of the multitudes.

The whole life of a Brahman, if he be supposed to follow his ritual, is a slavish round of petty observances—sippings, and rinsings of the
Hinduism

THE ENCYCLOPEDIA OF MISSIONS

mouth; changes of attitudes and of apparel; drawings of lines on the ground, and smearings with clay, or meal, or liquid, or cow-dung; kneeling or prostration before evil spirits; shifting of sacred threads or hallowed dishes; compoundings of herbs, and rice, and fruit; wreathings of flowers, and repetitions of endless prayers, and texts of the Vedas, and sacred names.

We have given only a small portion of the doleful picture, to show the nature of the greater acts of worship rendered to particular gods in the temples. All acts of life are according to program. In marrying, a Brahman must select a girl with neither too much nor too little hair, and it must not be red. She should not be deformed nor talkative, nor afflicted with an unlucky name.

This holy man must be a close student of the Vedas, but should never read them with a sour stomach, nor with his limbs crossed, nor with his feet on a bench. He must not read in a cow-pasture, nor in any place of offensive odors. He must close his book if a dog has barked or a jackal howled or an ass has brayed. He must never cut his own hair, nor bite his nails, nor step upon hair or ashes. He must not look at his wife when eating or sneezing or yawning. He must not stand under the same tree with idiots or washermen. He must never run when it rains, nor spit in a stream of water, nor step over the tether of a calf, nor ride after oxen with imperfect horns or ragged tails.

Reforms and changes: There have been many attempts to reform or to supplant Hinduism, and all except that of Christianity have failed. The impression made by Buddhism was altogether the most profound, and came nearest to permanent success. But, as we have seen, after centuries of contact and rivalry it failed. Tho its aggressive missionary work, which Hinduism did not attempt to emulate, extended into many lands, where it still prevails, yet on the same field, and in what seems to have been a fair trial of strength, Buddhism finally succumbed to its older and more subtle rival. Hinduism had the advantage of an appeal to the supernatural, to awe, to the fear of man, and to the fear of God. Moreover, it recognized the being of God and the real entity of the human soul. Doubtless, also, it found substantial aid in the entrenchments of caste, and in the power of venerable custom. Each system was greatly influenced by the other, but hardly more so remained with the Brahmans. Even in far-distant lands Buddhism has always recognized, however inconsistently, the power of Hinduism. The twelve Buddhist sects of Japan, as we find them in our day, have one thing in common—it may almost be said only one, viz., that in all their temples the images of the gods of Hinduism are invariably found. Protesting as it does against polytheism and idolatry, and virtually atheistic as it is, at least in its old orthodox teachings, Buddhism yet clings to Hindu polytheism with all its dumb idols.

Nearly a thousand years ago Mohammedanism swept into India with all the power and prestige of a conquering race, and a fanatical and everywhere victorious faith. Raised to the seats of arbitrary power, and strong in the clear and consistent monotheism, which it had borrowed from the Old Testament Scriptures, it might have been expected to supplant Hindu idolatry as it had overcome other faiths in many lands. Yet, after more than eight centuries of opportunity and power, it left Hinduism still triumphant; and the forty millions of Mohammedans, less than a fifth of the total population, still give evidence of having received from the old Brahmanical cult quite as much as they imparted.

Sikhism was another attempt at the reform of Hinduism. Nanak, its founder, in his disgust with the false religious idealism, hoped to effect a compromise between Hinduism and Islam. Upon the monotheism of the latter a superstructure of the best teachings of the Vedas was to be reared, and an ideal faith thus secured. But Sikhism has also failed to make any serious impression on Hinduism. For a time it won military and political supremacy in the Punjab, but it is little more than the worship of a book; it knows nothing of the true God; the essence of Hindu idolatry still remains.

The influence of the Somajes of our own time upon the heterogeneous, changeful, and yet ever vital Hinduism has not been slight. The Brahmo Somajes of Mohun Roy and Chunder Sen were indeed disappointing in their results, yet they promoted the disintegration of the old system, and did much to bring discredit upon the foul corruptions of modern Hinduism. Like Mohammedanism and Sikhism, they urged a return from polytheism to the simple monotheistic worship of Vedic times, and they opposed the injustice and cruelty so long visited upon woman. Chunder Sen exalted the Messiah of the Christians as the chief of all the world's prophets and teachers, but his system has declined.

The most imposing of all these monotheistic movements at the present time is the Arya Somaj. So far as the Arya Somaj or any other form of revived Aryanism hopes to regenerate India, it is doomed to disappointment. It cannot long utilize the forces of Christian ethics and Christian civilization under Vedic labels. The fraud will be discovered. The world cannot be convinced that this modern creed is real Hinduism, and the reaction will be proportionate to the illusion. On the other hand, when the real teachings of the Vedas are combined with the superiority of monism, as it will be, the emptiness of the old cisterns will fully appear. Prof. Max Müller in one of his many lectures has dwelt upon the disappointment and dismay with which intelligent Hindus have observed the discourses which modern scholarship has thrown to the light of the Vedic literature, and he ascribes to this cause the virtual collapse of the earlier Somajes.

In reply to the confident assumptions of the leading Aryas, Rev. Martin Clark, D.D., of Amritsar, has also exposed the rotten foundation on which they build, by publishing some literal and damaging Vedic translations.

The Contrasts of Hinduism and Christianity: Hinduism has some elements in common with Christianity which it is well to recognize. It is theistic; it is a religion, as distinguished from the agnostic ethical systems of the world. Hinduism recognizes a direct divine revelation which it regards with profound reverence, and through all its variations and corruptions it has inculcated in the minds of the Indian races a deeply religious feeling. It has been claimed that the Hindus are the most thoroughly religious people in the world. Like Christianity, Hinduism appeals to man's intellectual nature; it is inwrought with pro-
found philosophy; it has its trinity, its incarnations, and its predictions of a Messiah who shall restore the truth and establish righteousness.

But, compared with Christianity, the contrasts of Hinduism are far greater than its resemblance. First, as to the nature of God. There is an infinite distance between the cold and unconscious Brahman, slumbering age after age, without thought or emotion, or any moral attribute, and the God of Israel, Whose power and wisdom and goodness, Whose far greater than the Brahman and tender compassion, are so constantly set forth in the Scriptures. The latter compares Himself to a father who cares for his children, and who has redeemed the world by an infinite sacrifice. Second, there is a striking contrast in the comparative estimates which Hinduism and Christianity place upon the human soul. Unlike Buddhism, Hinduism does recognize the existence of a real soul, but it is only a temporary emanation, like the moon's reflection in the water. It resembles its source as does the moon's image, but coldly and in a most unsatisfactory sense. There is no hope of escape, and the end is absorption. On the other hand, Christianity teaches us that we are created in God's image, but not that we are His image. We are separate, the dependent; and if reunited to Him through Christ, we shall dwell in His presence forever. There is a great difference between the two systems in strong contrast in the comparative encouragement and hope which they hold out for the future. The doctrine of transmigration casts a gloom over all conscious being; it presents an outlook so depressing as to make life a burden, and the aeme of all possible attainment is individual extinction; Christianity promises an immediate transfer to a life of unalloyed blessedness, and an endless growth of all the noblest human powers and capacities. Hinduism finds the explanation of life's mysteries and inescapable trials in the theory of sins committed in a previous existence; Christianity recognizes the same trials, but mitigates them, with the hope of solutions to be found in a future life of compensating joy. The one turns to that which is past, unchangeable, and hopeless, and finds only sullen despair; the other finds encouragement in the hope of personal improvement. Fourth, Hinduism has no Savior and no salvation. It is, therefore, not a religion in the highest sense, for by the very derivation of the word, religion is the uniting of the soul to God; it implies the ruin of sin, but provides a rescue from it. That is unworthy of the name which presents an omnipotent arm stretched forth to save. Hinduism provides nothing above the low level of unaided human struggle and merit, and there is no divine helper, no sacrifice, no mediator, no regenerating spirit. It has no glad tidings to proclaim, no comfort in sorrow, no victory over the sting of death, no resurrection unto life.

There are a thousand other peculiar principles in Hinduism whose subtle influence is felt in society and in the State, and to which the faith and influence of the Gospel present the very strongest of contrasts.

Christianity has raised woman to a position of respect and honor, and made her influence felt as something sacred and potential in the family, in all society, in the State. Hinduism has brought her down, even from the place which she held among the primitive Aryans, to ever-increasing degradation; it has made her life a burden and a curse.

The following impassioned prayer, quoted by Ramabai from the lips of a Hindu woman who had been brought up in the house of a “child widow,” reveals the anguish which falls to the lot of woman under the Hindu social and religious system:

“O Father of the world, hast Thou not created us? Hast Thou not cared for men? Hast Thou not thought for us women? Why hast Thou or ated us male and female? O Almighty One, hast Thou not made us equal? O Lord, we too may have some part in the comforts of life. The cry of the oppressed is heard even in the world; then cast Thy look upon our victim hosts, and shut Thy doors of justice. O God Almighty and unapproachable, think upon Thy mercy, which is a vast sea, and remember us. O Lord, save us, for we cannot bear our hard lot.”

In its broad influence, Christianity has raised the once savage tribes of Europe to the highest degree of culture, and made them leaders in civilization, and rulers of the world. Hinduism has so weakened and humbled the once conquering Aryans that they have long been an easy prey to the very lowest in the scale of humanity. Christianity shows in its sacred books a manifest progress from lower to higher moral standards; from the letter to the spirit; from the former sins that were winked at to the perfect example of Christ; from the narrow exclusiveness of Judaism to the broad and all-embracing spirit of the Gospel; from prophecy to fulfillment; from types and shadows to the full light of redemption. The sacred books of Hinduism have degenerated from the lofty aspirations of the Vedic nature-worship to the vulgarity of Saktism and the Linga, from the noble prayers of Vairuna to the low sexuality of the Tantras, from Vedic conceptions of the creation sublime as the opening of John's Gospel, to the myths of the divine turtle and the boar, or the amorous escapades of the supreme and “adorable Krishna.”

Christianity breaks down all barriers which divide and alienate mankind, and establishes a universal brotherhood in Christ; Hinduism has raised the most insurmountable barriers, and developed the most inexorable social tyranny ever inflicted on the human race. Christianity enjoina a higher and purer code of life than it has in Vedic times; the former demands that every soul should conform to the universal standards of all people; it aims at perfection; it treats the least infraction as a violation of the whole law; it regards even corrupt thoughts as sins; it bids us be holy even as He is holy in Whose sight the heavens are unclean; Hinduism, on the contrary, is below the ethical standards of respectable Hindu society. The better classes are compelled to apologize for it by asserting that that which is immoral and debasing in men may be sinless in the gods. The offenses of Krishna and Arjuna would not be condoned in mortals; the vile orgies of the “cow worship” of Siva would not be tolerated but for their religious character. The murders committed by the thugs in honor of Kali were winked at only because a goddess demanded them.

It is the peculiar distinction of India that it has been the theater of nearly all the great religious. Brahmanism, Buddhism, and Mohammedanism have all made trial of their social and political power, and have failed. Last of all came Christianity. The systems which preceded it had had centuries of opportunity, and yet Christianity has done more for the elevation of Indian society in the last fifty years than they
had accomplished in all the ages of their dominion. Neither Buddhism nor Mohammedanism had made any serious impression upon caste; neither Buddhism, inspired by mitigating the wrongs which Brahmanism had heaped upon woman—Mohammedanism had rather increased them. The horrors of the Satti (Suttee) and the murder of female infants, those bitterest fruits of priestly tyranny, were left unchecked till the British Government. inspired by mitigating influence and a general Christian sentiment, branded them as infamous, and made them crimes.

The sentiment even of the better classes of natives in India is now greatly changed by these influences, and the conventional morality is rising above the teachings of the national religion. Widow-burning and infanticide belong almost wholly to the past. Child-marriage is coming into disrepute; and caste, theot not destroyed, is crippled, and its preposterous assumptions are falling before the march of social progress.

Perhaps the very highest tribute which Hinduism has paid to Christianity is seen in the fact, already noticed, that the modern Arya Somaj has borrowed its ethics and some of its religious doctrines, and is promulgating them upon Vedic authority. It has renounced these corruptions of Hinduism without bearing the light, together with such social customs as caste, child-marriage, child-widowhood, and the general oppression of woman. It denounces the incarnations of Vishnu as mere inventions, and, therefore, cuts up by the roots the whole Krishna cult, with its divine assumptions. It abhors polytheism, and not only proclaims the supremacy of one only true God, self-existent, the Creator and Upholder of all things, but it maintains that such was the teaching of the Vedas, and that when various names were used, they all referred only and always to One and the Same.

**Hindustani Language.** See Urdu.

**Hing-an.** See Hsing-ngan-fu.

**Hing-l.** See Hsing-l-fu.

**Hing-hua.** See Hsing-hwa-fu.

**Hing-ping-hsien:** A town in the province of Shien-si, China, situated about 30 miles W. of Hsi-ngan-fu. Station of the CIM (1893).

**Hinnen.** See Hsing-ning-hsien.

**Hirampur:** A town in the Santal Parganas, Bengal, India, situated about 20 miles S. of Barhwa. Pastorate of the CMS, with (1903) 8 native workers, 5 preaching places, 3 day schools, and 256 professed Christians.

**Hiroki:** A town in the main island of Japan, situated about 15 miles N. W. by S. of Aomori. Population, 29,100. Station of the ME, with (1902) 6 missionaries, men and women; 12 native workers, men and women; 1 day school, 1 boarding school for girls, 1 kindergarten, and 218 professed Christians. Station also of the PE (1876), with (1902) a missionary and his wife and 1 woman missionary.

**Hiroshima:** A town in Japan, situated 155 miles W. by S. of Kobe. It is noted for its great temple of Miyajima. Population (1906), 12,078. Station of the ME (1888), and the CA (1891), and the CMS (1896). These societies report at this place 14 missionaries, men and women; 24 native workers, men and women; 19 outstations, 10 preaching places, 1 high school, 1 day school, and about 550 professed Christians.

**Hislop, Stephen:** Born in Scotland, studied at the Medical School of Glasgow, and at the New College. In 1844 Major-General Hill, stationed at Jalna, in the Nizam's territory, presented to the Free Church of Scotland the sum of £2,500 for the founding of a new mission. Mr. Hislop, who had distinguished himself as an accomplished missionary, next year he was attacked by a disease, and he began his work in February, 1845, at Kamptee, ten miles from Nagpur city, cordially welcomed by Captain Hill and other British officers, who handed over to him a school which they had established, and otherwise greatly encouraged him. He was assisted by three Gujarati artisans. In 1846 he removed to the city of Nagpur, containing a large Mahruatta population, and opened, with thirty scholars, a school in the vicinity of the Rajah's palace. The school soon took a high position as a mission with instruction for girls, and by 1850 the scholars sent forth annually between 250 and 300 pupils. It is called the Hislop Missionary College. The Central Provinces being ruled by a heathen government, and the people having no desire for education, his position was that of a trying one. His life was often peril. In 1853, in connection with caste prejudices and the baptism of several natives, a serious riot occurred, and an attack was made on the mission house, which, but for his heroic defense by the native Christians, would have resulted in the death of the missionary and scholars. The following year he was attacked by a fanatical Mohammedan mob, but rescued by the aid of an old pupil and some Sepoys. He was conveyed to the mission house in an apparently dying state, ten deep gashes appearing upon his head, and his body greatly bruised. In 1857, during a visit to London, he presented a MS on the Mohammedan of a combined plot of the up-country Sepoys and the Mussulmans of the city to massacre all the Europeans on a given day, he informed the authorities, so that the design was frustrated, and the Madras and Bombay Presidencies were thus saved from the rebellion. This devoted missionary met with an early and tragic death. On September 4, 1863, he rode into a river in the night and was drowned.

**Hisssar:** A town in the Punjab, India, situated 98 miles W. N. W. of Delhi. Population (1891), 16,900, of whom 10,000 are Hindus. Station of the SPG, with 2 women missionaries.

**History of Missions:** The true history of missions is far more than the mere record of the extension of Christianity. It includes the development of the mission idea within the Church as well as its outward application in the conduct of mission enterprise. It covers, too, the development of method and organization. The present complicated machinery of missions, which seems to many so cumbersome and so unlike the simple evangelization of the apostolic days, or even of the earlier missions of the present era, is really but a growth. Each new wheel or band or cog in the mechanism has been added not to meet a theoretical conception, but an actual need, and no
history can be complete that does not touch at least upon this element in mission progress. The history of missions has to do also with the effect of missions upon the world apart from the results usually looked for by the missionaries themselves. Relating to Hinduism, Buddhism, Shintoism, each must be dealt with in reckoning up the sum total of results of mission effort. It is evident that so wide a reach is impracticable within the limits of this work, which must be content with the more common general conception of a recovery of the extension of Christianity through the agency of missionary enterprise, merely indicating some of these other topics as suggestive for further reading and study.

To facilitate this, the general topic is treated under five titles: Geography of the Extension of Christendom, summarizing the article in the first edition on the Historical Geography of Missions, and giving a bird's-eye view of the extension of Christianity over the world in the different periods; Apostolic and Early Christian Missions, giving a survey of the general character and methods of the first six centuries; Medieval Missions, describing the movements and influences that made Europe Christian, and covering the period up to the Reformation; Roman Catholic Missions, from the Reformation to the present day, and Modern Protestant Missions, covering the same period. These different articles, of necessity, somewhat overlap, but no more than seems essential to the accurate conception of each subject, and the four periods are so distinct that separate treatment is inevitable.

HO: A station of the North German Missionary Society (1859) in Tagolgan, W. Africa, situated near the western border of the colony, about 60 miles N. by W. of the mouth of the Volta River. It has (1903) 8 missionaries, men and women; 31 native workers, men and women; 18 outstations, 21 day schools, and 1,585 professed Christians.

HOACHANAS: A settlement in German South-west Africa, situated among the Namaqua tribes about 230 miles E. S. E. of Walvis Bay. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 2 native workers, 1 day school, and 256 professed Christians.

HOBSON, Benjamin: Born January 2, 1816, at Wellington, N. Island, New Zealand; educated in medicine in London; sailed July 28, 1839, as a medical missionary of the LMS for China, reaching Macao December 18. There he was occupied with his medical work till the beginning of 1845, when he removed to Hongkong, and, on June 1, opened a hospital. In 1850, his health having failed, he returned to England, and, being unable to resume work in China, he retired after a while from the service of the Society. Besides his labors in Chinese hospitals, he wrote and translated into Chinese treatises on medicine, anatomy, surgery, medicine, midwifery, and natural philosophy, which have had a very wide circulation. He died at Forest Hill, near London, February 16, 1873.

HO-CHAU: A town in the province of Shan-si, China, situated about 100 miles S. W. of Taiyuen-fu. Station of the CIM (1889), with 2 women missionaries, 6 native men and women. The work of reorganization after the disaster of the Boxer outbreak has hardly (1903) proceeded to the point of definite information of the state of the church members at this place.

HOFFENTHAL: A settlement in Natal, S. Africa, about 40 miles W. S. W. of Colenso. Station of the Berlin Missionary Society (1888), with (1903) 2 missionaries, 10 native workers, 6 outstations, 1 day school, and 257 professed Christians.

HOFFENTHAL, or HOPEDALE: A settlement on the east coast of Labrador. Station of the Moravian Missions (1782), with (1900) 6 missionaries, men and women; 10 native workers, 1 day school, 1 dispensary, 1 hospital, and 70 church members.

HOFFMAN: A settlement in Liberia, situated at Cape Palmas and near Harper's Station of the PE (1856), with (1902) 1 missionary, 2 native workers, 6 outstations, 2 day schools, and 144 professed Christians.

HOH-CHAU. See Ho-Chau.

HOHENFRIEDEBERG: A settlement in German East Africa, situated in the Usambura region about 70 miles N. of Tanga. Station of the German East Africa Mission, with theological and industrial schools and a leper asylum.

HOISINGTON, Henry R.: Born at Vergennes, Vt., August 23, 1801; learned the printer's trade in 1815 in Buffalo, and pursued it in Utica and New York. He fitted for college under Dr. Armstrong at Bloomfield Academy; graduated at Williams College in 1828, and Auburn Theological Seminary in 1831; settled in Aurora, N. Y., the same year; sailed as a missionary of the ABCFM for Ceylon in 1833. In 1834 he was sent with Mr. Todd to the city of Madura to establish a new mission. In 1836 Mr. Hoisington returned to Jaffna, and was placed at the head of the seminary. On account of ill-health he visited the United States in 1842, and returned to Jaffna in 1843, but continued ill-health compelled him to give up his lifework as a missionary in 1849. Mr. Hoisington possessed a vigorous and acute mind, and his work as instructor of Tamil youth led him to study profoundly Hindu science, metaphysics and theology, and in the department of higher Tamil literature he had, perhaps, no superior in Southern India. After his return home he wrote for the American Board of Commissioners for Foreign Missions.

HOI-CHI-MING, Ho: A village in the province of Kiang-si, China, situated in the N. part of the province about 135 miles S. E. of Kiu-kiang. Station of the CIM (1875), with 3 women missionaries.

HOK-CHIA. See Fu-ting-hsien.

HOK-KEO. See Ho-Kau.

HOK-SU-HA: A town in the province of Kwang-tung, China, situated in the hill country, about 135 miles N. E. of Canton. Station of the Basel Missionary Society (1866), with (1903) 2 missionaries and their wives, 18 native workers, 16 outstations, 11 day schools and 429 professed Christians. Name also written Hoksuhua.

HOL-LIN-KOH-RI: A village in the province of Shan-si, China, situated in the N. part of the province, about 28 miles W. N. W. of So-ping-fu. Station of the GA.

HOME MISSIONS in the United States: The
United States is one of the greatest mission fields of the world. Ever since the days when the discovery of the New World and the condition of the savages found by the Spanish explorers led to the sending of the Old World to send missionaries, the history of Christian effort in the United States has been one of continual and almost unabated zeal and earnestness. The work has gone through the various stages of evangelistic and pastoral agencies in the older and more settled districts of the country, but there are always new regions to be cared for and new people to evangelize.

The urgency, diversity, and magnitude of the work of Christian missions in the United States can best be understood by looking at the different elements which comprise the population and the influences which affect the efforts of the church.

1. Work for the Native Population: Under this head we can consider the term “native” as including that part of the people who are native born or who have been located in the country for a period long enough to be assimilated: the Indians, the negroes, as well as the native Americans. This work will be shown in the detailed account of the various Home Missionary societies, which follows. The general facts in regard to the present condition of the population may be stated briefly.

The development of the great territories in the West, and the consequent migration of the inhabitants of the older and more settled states, has caused the growth of mission work, and the diversification of the work into two-fold, pastoral and evangelistic. Pastoral work is carried on in the settled states; in the large cities it is combined with the work of City Missions in order that the poor and the rich may have an equal chance to hear and profit by the teachings of the Gospel. But even this does not sufficiently take into account the great movement of people into new territory, where the Gospel is being carried forward. The Indian, as he leaves his old home, and the negro, as he moves into the town, are still a missionary field.

The rapidity with which the Western states are increasing in population is phenomenal. How great a proportion of this increase is due to migration, and how much is properly referred to the arrival of immigrants from other countries, cannot be determined without more data than have yet been furnished by the Census Bureau; but the increasing rate of increase in many of the older states, such as Ohio, Indiana, Iowa, Missouri, and Illinois, is distinctly traced to the migration of the people. Hence a great proportion of the rapidly increasing population of the Western territories and states is made up of those who have severed family, social and religious ties by moving into the more distant regions. Must these ties be left with no new objects around which to cling, until they shrivel up and respond but slowly to any stimulus? Or shall the Church keep pace with the world and supply new church ties as soon as the old ones are severed; new places of worship, ere the habit of church-going ceases to exist; new influences for good before the careless or seared conscience fails to respond? These questions are at the root of the nature of home mission work. A study of the social conditions which might be called the peculiar objects of the Church's care—her own wandering sons and daughters.

2. Work for the Immigrants: Attracted by visions of wealth, justice, and liberty of action; driven out from their home-lands by poverty, increase of population, tyranny and misrule; aided by the easiness of travel and the necessity required for the journey, the emigrants of European countries have poured in upon the United States in a steady stream. This influx of foreigners is regarded as the greatest of dangers to the civil and religious life of the country. The Turke, the Jew, the Hugenot, the Swede, the German with joy. There is now no great urgency for his labor. His morals, his socialistic, anarchistic tendencies, his conception of liberty as license, his inability to appreciate the honor and responsibility which go with the right of franchise—all these make the average European, the type of the most objectionable of strangers. The results of this immigration are seen distinctly upon the statistics of crime. Many of these immigrants come from Christian communities, and they are influenced in the same way as the native American is when he changes his home; but by far the greater number belong to the bilge-water of the various ships of state in the old countries. The absorption and Americanization of such immigrants is a herculean task thrown upon the Church. They are numerous and the Church is devising means to escape the conflict which is imminent by stopping the inroads; but with strange lack of the sense of proportion, the immigration of a few thousand Chinese has been prohibited, while hundreds of thousands of immigrants are yearly coming to our shores from Southern and Eastern Europe. The Church has the greater task, for many of these immigrants come from countries where they have had little religious instruction; and in addition to the difficulties which arise from the nature of the case—the knowledge of the people, the isolation of their life—there are added other factors which complicate still further the problem. These are, as ably set forth in Strong's Our Country, Romanism, intemperance, Mormonism, wealth, and the collective will of the people. Mormonism has officially abolished polygamy, but even if this were other than a purely formal and nominal abolition, it is still the foe to the best interests of the individual and the state; of the papacy, this is not the place to speak; intemperance is upon well recognized as an enemy to the Church and the Commonwealth that it needs no words of description; city life and its dangers are seen on all sides; and the influence of the inordinate desire for wealth is keenly felt by all.

This, in brief outline, is the condition of affairs which makes this field of work one of paramount importance. It means one of the most important questions of the great social issues of the day. Missions are one of paramount importance by reason of the enormous extent of territory, the number of the people, the interests at stake, and the conviction that the future of this nation will depend upon the success with which the Church fulfills the obligations which have been imposed upon her missions.

Home missions is the name given to the work of the church for those in our own country, whether it be among aborigines, immigrants, or frontier settlers; and every denomination is actively engaged in this work, whether or not it is
made a separate department, and classified and reported separately from the general work of the church. The work was organized, April 27, 1832, in New York City, where it still has its general offices. Its object is "to promote the preaching of the Gospel in North America." Until its organization, missionary work in the new settlements of the West had been prosecuted to a limited extent by some of the Baptist Conventions of the older States, and especially by the Baptist Missionary Society of Massachusetts, organized in 1802. This Society took the initiative in the formation of the General Society. Rev. John M. Peck, who for many years had rendered remarkable service as a missionary in the Mississippi Valley, and Rev. Jonathan Going, of Massachusetts, who was sent out to confer with him, were foremost spirits in the new movement. Dr. Going became its first Corresponding Secretary, serving for five years; then, in succession, Rev. Luther Crawford, twelve years; Benjamin Hill, D.D., twenty years, from 1840 to 1862; Jay S. Backus, D.D., twelve years, 1862-74; James B. Simmons, D.D., seven years, 1867-1874; E. E. Taylor, D.D., five years, 1869-1874, the work being divided among them during the period of their contemporaneous service; Nathan Bishop, L.L.D., two years, 1874-76; S. S. Cutting, D.D., three years, 1876-79; H. L. Morehouse, D.D., fourteen years, 1879-93; T. J. Morgan, L.L.D., nine years, until his death in 1902, when Dr. Morehouse, who had been Field Secretary for this period, was recalled to the general secretariatship, and E. E. Chivers, D.D., was appointed Field Secretary.

Until 1845 its constituency included Baptists of the whole country, numbering then about 385,000, fully half of whom were in the South. There was the disruption over the question of slavery and the withdrawal of Southern Baptists to form an organization of their own. The West was the chief field of the Society's operations—Detroit, Chicago, and many other important points were occupied. Exploring and pioneer missionary work was done in states and territories by mission methods. In 1845 its first missionaries went overland to Oregon, and in 1849 via the Isthmus to California. With the expansion of civilization in the West, as precious metals were discovered, railroads constructed and lands opened to settlement, its pioneer missionaries were quickly on the new fields. The first year of its history its force of laborers was fifty; in 1854, one hundred and seventy-five. For the thirty years ending 1862 its receipts were $795,259. In that period, 1,242 churches were organized, 881 were in the Western states and territories. Its missionary expenditures there have been about $4,000,000.

A Church Edifice department of the Society was contemplated in 1854 and a little was done during subsequent years. In 1869 it was definitely organized, and by 1875 about $275,000 had been secured as a loan fund to aid churches in erecting edifices. From the proceeds of this fund 333 churches were thus aided. In 1881 the Gift Fund was established, and as large contributions were secured for it, the Society by 1885 was aiding over 100 churches annually in gifts and loans, and within twenty-two years had helped in the erection of 1,806 church edifices, chiefly by the way of gifts. Its permanent Church Edifice Loan Fund is $165,000 and the Permanent Gift Fund, the income only to be used, $158,000.

The Society's work for the Freedmen, began in 1862, expanded into a large educational department, in addition to the distinctively missionary efforts put forth in their behalf. The total expenditures for these purposes have been about $4,000,000. It aids wholly or in part twenty-nine schools, twelve of which are higher and seventeen secondary institutions; the much secondary work is also done in the higher institutions. Most are coeducational; two are for young women only, viz., Hartshorn College, Richmond, and Spelman Seminary, Atlanta, the latter probably the largest and best-equipped school of its kind in the world. Since 1874, the society has been organized, as a department of Virginia Union University, Richmond; while in all the other higher schools considerable attention is given to the training of students for the ministry, of whom between 400 and 600 are in attendance yearly. The University of Chicago, the University of Virginia, the University of North Carolina, and the University of Rhode Island, are most prominent among the school, and many others are in the neighborhood of 1,000 students. The total enrollment for 1897-98 was 7,078. It is estimated that the total enrollment from the first is quite 80,000.

A pronounced religious and missionary spirit dominates all these institutions, which have powerfully affected for good not only the two million negro Baptists of the land but multitudes besides. The valuation of these school properties is approximately $1,500,000. The Society's annual expenditures for these purposes is about $150,000. Endowments are greatly in need of augmentation, the endowment for the schools being only $288,132. Many capable negro teachers, a number as heads of schools, are in the force of instructors.

Among the foreign populations the Society in 1893 had 282 missionaries laboring among fifteen nationalities from Europe and two from the Orient, the total number of nationalities or peoples among which it labors being twenty-one. The work begun in 1846 among the Germans has grown to large proportions, the membership in the German Baptist Churches of the United States having now 25,000. Similar work began among the Swedes in 1848, also among the Danes and Norwegians about the same time, has enlarged until now the Scandinavian Baptist Movement number over 27,000. Missions to the French Canadians, chiefly in New England, since 1870 have included an acquisition of at least 3,500 converts from Romanism. In recent years missions have been undertaken with good results among the Bohemians, Poles, Italians, Portuguese, Finns, Hungarians and Russians. The enormous immigration of recent years has afforded a great opportunity for the evangeliza-
tion of multitudes ignorant of the essential truths of Christianity. To the Chinese, after ineffectual attempts to secure a suitable laborer sooner, the Society appointed a missionary at San Francisco in 1870. There were many hindrances to this enterprise during the anti-Chinese agitation on the Pacific coast. The chief missions now are in San Francisco, at Banta and Butte, Chicago and New York City. There is a flourishing mission to the Japanese in Seattle.

The North American Indians have been included in the Home Mission Society's field since 1865, when the Indian work in the vicinity of the missions was transferred to it. Continuously since then have missions been maintained among them. For many years work was limited mostly to the five civilized tribes, among whom very gratifying progress has been made. Within the last decade missions have been established among the "blanket Indians," with truly remarkable results among the Kiowas. The Society's missions embrace twelve Indian tribes, among whom there are over 4,000 members of Baptist churches. There are two excellent schools for the Indians, at Tahlequah and near Muskogee, Indian Territory. The missionary and teaching force among them in 1903 was twenty-nine.

The Spanish-speaking peoples of this continent and adjacent islands are part of the Society's field. The first evangelical preacher to go to Mexico was the first Baptist minister, Rev. James Hickey, in 1862, which led to the organization of a Baptist Church at Monterey in 1864. During the troubous period of the war and the unsettled state of affairs in Mexico, until the overthrow of the Maximilian Empire, missionary work there was difficult. Union was transferred to it. Its receipts for all purposes have been about $13,500,000, its permanent invested funds being $876,000, besides $516,000 in foreign funds. Its receipts for 1903 were $621,387.32. For this vast and varied work of three great departments, Missionary, Church Edifice and Educational, covering every state and territory, Alaska, some Canadian Provinces, Mexico, Cuba and Porto Rico, there is a Secretary, one Corresponding Secretary, and one Treasurer, with necessary assistants, the cost of administration being only about six per cent. of its receipts.

Congregational: When the American Home Missionary Society was organized, in 1826, several local organizations and societies with Congregational ministers were in operation, some of which originated in the last century. The Society for Propagating the Gospel among the Indians and others in North America was founded in 1787; the Missionary Society of Connecticut, and the Berkshire and Columbia Missionary Society, in 1798; the Massachusetts Missionary Society in 1799. Others of a later origin existed in the other New England States and in New York. Some of them confined their operations within their own geographical limits. Others sent missionaries to the Institute in the new settlements of Northern New England, and the remoter wilderness, even to the banks of the Mississippi. But as these societies acted independently of each other, some sections were over-supplied with laborers and others were left in utter destitution. General invited laborers sometimes came into competition and conflict with each other, and the funds contributed for their support were worse than wasted. It was evident that a more comprehensive and effective system must be devised to supply the destitute portions of the land with Congregational missionaries; but no direct steps were taken toward the solution of this problem till 1825, when plans were formed which resulted in the organization of the American Home Missionary Society.

The United Domestic Missionary Society, undenominational in its principles and spirit, was formed in 1822. At an important meeting, composed of eminent New England ministers, held in Boston January 11, 1826, a resolution was adopted recommending that the United Domestic Missionary Society of New York be regarded as the American Domestic Missionary Society. The Executive Committee of the UDMS cordially responded to the overture from the Boston meeting and issued a circular to friends of Home Missions in all parts of the United States, inviting them to meet in New York to form an American Home Missionary Society. One hundred and twenty-six individuals, representing thirteen States and four denominations, responded to this invitation, and met in New York (Brick Church) on May 10, 1826. On May 12, the United Domestic Missionary Society, in responding to the proposition made by the convention meeting in the Brick Church, adopted the following resolution:

"Resolved, That the recommendation of the convention be adopted, and the UDMS now become the American Home Missionary Society, under the constitution recommended by the convention."

Officers were at once elected and the work begun.

Its Constituency: Of the churches cooperating, the Associate Reformed shared but little either in its labors or benefactions. The Reformed
Dutch churches withdrew when their own Board was organized in 1832. The New School Presbyterian Church consented to cooperate until 1861, when the General Assembly appointed its Presbyterian Committee on Home Missions. Thus the AHMS, without any change either in its constitution or principles of action, became the organ of Congregational churches only. On the 1st of October, 1883, by permission of the Supreme Court of the State of Michigan, the corporate name of the Society was changed to "The Congregational Home Missionary Society" and it has ever since been known as such.

Its object was "to assist congregations that are unable to support the Gospel to the destitute within the United States." It was to supply the destitute everywhere, but especially those in the new settlements on the northern, western and southern frontiers, with the privileges of the Gospel through the ministry of the Word and the Church of God.

Its method has been to supplant the former plan of mere missionary tours, pursued by the Domestic Missionary Societies, by providing permanent churches and a permanent ministry, entering into partnership with each church in sustaining its minister, stipulating that it shall bear its full share of the burden, an annually increasing share, until the church shall become self-supporting. The stimulating effect of this system is seen in the fact that, during the last ten years, about forty churches have been annually brought to self-support; and the average annual expenditures for a year of missionary labor have been $300.

Through the Woman's Department no considerable portion of revenue has been obtained.

The estimated value of gifts sent in "missionary boxes" during the last twenty years has exceeded $50,000 annually.

Its Foreign Department: When the Society was organized, our population was being increased by only 10,000 immigrants annually. In view of the peril to our country involved in this vast increase of foreign immigration, the Society in 1823 entered upon a more distinct systematic effort in behalf of this class of our population. In these twenty years the work has made rapid progress, and the number of missionaries who have preached in foreign languages during this time (1803) is 230, including German, Scandinavian, Bohemian, Polish, French, Mexican, Italian, Spanish, Finnish, Danish, Armenian, Greek, and Welsh.

Summary: Of the 5,650 Congregational churches in the United States, more than four-fifths of the whole were planted, and many more have been fostered, by the Congregational Home Missionary Society and its auxiliaries. Since its organization in 1826, 507,072 members have been added to churches under its care.

In 1862-3, 1,907 home missionaries were employed; 4,936 hopeful conversions were reported, 8,250 members were received into home missionary churches; 2,573 churches and stations were regularly supplied with the Gospel; 57 churches reached self-support; 95 new churches were organized; 72 houses of worship were built, 108 Sunday schools were established; 127 schools were opened for Indian pupils; 150 Sunday schools were organized; 60 young men connected with home missionary churches were preparing for the ministry. 230 home missionaries were laboring among the Germans, Welsh, French, Swedes, Norwegians, Danes, Bohemians, Spanish, Indians and Mexicans. Total expenditures in 47 States and Territories, $589,734.47. The work of church erection is carried on by a distinct organization, the Congregational Church Building Society.

Lutheran: The Lutherans have been actively engaged in missionary work in Alaska and among the American Indians and negroes. As early as 1835, at the suggestion of Dr. Augustus A. Baierlein, a Lutheran, and the Baptist Missionary Union, a small mission was sent to Sitka, the capital of Alaska, and the membership at one time numbered 150. Ethokin, one of the governors, was a native of Finland and a Lutheran, and when he entered upon the duties of his office he brought with him a Lutheran minister. This work came very near dying out. The Swedish Missionary Union and the Russian Orthodox Church have been sending missionaries to Alaska since 1866, and the Swedish Lutherans of America have lately become greatly interested in Alaska as a mission field. The entire work of the early Indian missions had only a temporary existence, and altho the Lutherans did faithful work among the red men, for years they found that congregations were organized and schools were planted only to be disbanded and broken up in course of time. The outward appeal of the Church to the territory of the Indian and its fruits of immorality and unjust treatment made the Indian suspicious of the white man's dealings. In 1845, Vraemer, afterward professor in Concordia College, Springfield, Ill., began work among the Chippewa Indians for the parish of Frankenmuth, Michigan, and largely through this agency he became acquainted with the language, and was enabled to speak to large assemblies of Indians. The work grew, and Baierlein was sent out from Germany. Baierlein traveled about, visiting one tribe after another, and he established a station about sixty miles from Frankenmuth, built a log house for living and school purposes, which proved to be a center of good. Miessler, sent out by the Leipzig Society, came to assist Baierlein. In his study of the language Baierlein's reader and spelling book in the Chippewa language was of great service. The mission was eventually transferred to the Missouri Synod. The general uprising of the Indians in defense of their rights put an end to the station in Minnesota under the faithful supervision of the missionary Cloeter. In 1852 a number of Norwegians are carrying on a successful work among the Indians in the neighborhood of Wittenberg, Wis., where, in 1885, they erected a schoolhouse, and under the care of Rev. Mr. Morstadt the work has prospered. The United Synods of Wisconsin, Minnesota and Iowa are conducting mission work among the Apache Indians, and a missionary plant has been established near San Carlos, Arizona. The Synods have recently appropriated a considerable sum of money to be used in the erection of houses for missionary work.

The Lutherans are also doing excellent missionary work among the American negroes.

Methodist Episcopal: The origin of Domestic Missions in the Methodist Episcopal Church was in 1812. Bishop Asbury about this time began looking after the spiritual condition of the American circuit riders, and thus began the Methodist missionary circuits. This was the period of vigorous, aggressive work in the then Far West and in the New England States. In 1819 the Missionary Society of the Methodist Episcopal Church was formed, the organization growing out of a
revival among the Wyandot Indians. In the Preachers' Meeting of New York, held April 5, 1819, in the Forsyth Street Church, it was
"Resolved, That it is expedient for this meeting to establish a missionary and Bible Society of the Methodist Episcopal Church in America."
Article XIII of the Constitution provided that the Society should be established "wherever the Book Concern may be located," and the General Conference was authorized to adopt an article into the Constitution for such purpose, and to make the book-agents treasurers, and also to provide for the appropriation of funds within the object specified.

The plan of procedure was to organize auxiliaries in all the principal cities. The first auxiliary formed was the Female Missionary Society of New York, about ninety days after the parent Society was instituted, one of the earliest missionary organizations of women in the land.

The General Conference in Baltimore, May, 1820, adopted the report of a committee on organization, and gave the Society and the missionary cause a great and effectual impulse. The existence of the Society really dates from this General Conference of 1820. In the autumn of 1820 the Society actively began its operations, sending Rev. Jonas Brown of the New York Conference to labor among the French people of Louisiana.

Present Scope: The Domestic Missions, as to languages used, may be classified as English-speaking and non-English-speaking, the latter including works among the Bohemians, Chineses, Finns, French, Germans, Indians (14 tribes), Italians, Japanese, Portuguese, Scandinavians, and Welsh.

The field embraces the Arizona, Atlantic, Black Hills, Gulf, Kalispell, Nevada, New Mexico English, New Mexico Spanish, New York, New England, Pacific Japanese, Porto Rico, Utah and Wyoming Missions, together with those administered by Annual Conferences. All Domestic Missions are administered under the direction of the presiding bishops, who (except for Missions in New England) draw upon the Missionary Society for grants-in-aid not to exceed in amount sums fixed yearly in advance by the "General Missionary Committee," a representative body acting under the authority of the General Conference of the Methodist Episcopal Church. Disbursements for Domestic Missions in 1902 amounted to $482,811. Appropriations for 1903 amounted to $495,297.

Work for Bohemians is carried on in five Annual Conferences, the Upper Iowa Conference alone conducting Bohemian missions in three of its districts. There are four missions in Chicago, besides those in Baltimore and Cleveland, and the Coke Mission of the Pittsburg Conference.

The ME Church has missions for Chinese in several cities of California, with headquarters at San Francisco, besides the work carried on in New York, among the Bohemians, Chineses, Finns, besides those in Baltimore and Cleveland, and the Coke Mission of the Pittsburg Conference.

From the time of the conversion of William Nast, in 1835, the ME Church has labored among German-speaking people. There are nine regular Annual Conferences, and the North Pacific German Mission Conference, with a combined membership of 62,480. In charge of this membership is a corps of 541 pastors, 266 of whom receive financial aid from the Methodist Missionary Society.

Indians: Twenty-one Methodist Episcopal missionaries and 22 local preachers are reaching about 12,000 Indians. At present there are Indian missions within the bounds of 13 Conferences, of which missions 17 are in Michigan, 5 in New York State, 9 on the Pacific Coast, 1 in Minnesota, and 1 in Providence. The tribes reached are these: Ukiah, California Digger, Onondaga, Oneida, Chippewa, Seneca, Tonawanda, Ottawa, Painters, Washoe, Black Feet, St. Regis, Klamath and Nooksack.

The ME Church has missions among Italians in Boston, Buffalo, Chicago, Detroit, New Orleans, New York, Philadelphia, and Providence, besides those in smaller towns.

The Pacific Japanese Mission Conference of the ME Church covers the work in Hawaii and the Pacific Coast. There are 14 stations, with 18 missionaries, 6 local preachers and a membership of 1,100.

There are 20 Negro Conferences in the ME Church, with a membership of 278,000, cared for by 1,420 pastors, 806 of whom receive financial aid from the Missionary Society. Those charges which are helped by funds of the Missionary Society are almost all in the Southern states.

Work among Portuguese is confined to the New England and New England Southern Conferences. There are missions in East Cambridge and New Bedford, Mass., and Providence.

In 1845 the work of the ME Church among the Scandinavians was begun by Olaf G. Hedstrom, a member of the New York Conference. Since that time work has grown to such an extent that there are 4 Annual Conferences among the Swedes and 2 Norwegian and Danish Conferences besides the work carried on under the administration of 7 English-speaking Conferences. Of the 218 Methodist pastors laboring among Scandinavians, 212 are supported in part by the Missionary Society.

Spanish: The work includes the efforts put forth in the New Mexico Spanish and Porto Rico Mission Conferences. In the New Mexico Spanish Mission Conference there are 46 stations and circuits, 34 of which have church buildings. There were 2,704 members and probationers in 1902. The work in Porto Rico was begun by Dr. C. W. Drees, formerly in the South America Mission. He arrived in San Juan March 25, 1900. There are already 19 stations on the island, with 17 missionaries, 14 native workers and 888 members and probationers.

Besides the work among the classes mentioned above, the Methodist Episcopal Church contributes, through its Missionary Society, to the support of 520 pastors among white people of the Southern States, many of whom are working among the illiterate thousands in the mountains of Tennessee, Kentucky, and the Carolinas; to the support of 1,758 churches among other white people in the United States, to the Deaf-Mute Missions of Baltimore and of Chicago, to the Mission among the Hebrews of Boston and other cities and to the City Mission enterprise.
of Brooklyn, New York, Jersey City, Hoboken, Newark, Paterson, Philadelphia, Pittsburgh, Detroit, St. Louis, Kansas City, and St. Paul, Minn.

In addition to the work above set forth, the other benevolent societies of the Methodist Episcopal Church, such as the Board of Church Extension, the Sunday School Union and Tract Society, the Board of Education, the Freedmen’s Aid and Southern Education Society, and especially the Woman’s Home Missionary Society, which is auxiliary to the parent board, expend large sums on work having a distinct home missionary outcome.

**Methodist Episcopal Church, South:** By the law of the General Conference of the Church each annual conference is authorized to organize a Board of Missions auxiliary to the General Board. Said Conference Board appoints its own officers, regulates its own affairs, and has control over the missions it may establish within its bounds and of the funds raised for their support, provided it is responsible for the maintenance of such missions, and provided it secures the consent of the Bishop presiding over the conference. These Conference Boards of Missions have work in all the cities of the South, in factory and laborers, among mining populations, and in remote rural districts. The number of home missionaries supported in part or in whole for 1902 was 1,270, and the amount raised by the several conference boards for this purpose was $188,259.

The General Board makes some appropriation annually to the work in the Western fields. No greater moral heroism has been displayed in any field than by many of those men who have gone to the firing line at the call of the Church. In view of the peculiar conditions and of the tremendous drift of population unreached by any church, in many cases lying along the watershed east and west of the Rocky Mountains, appropriations are made to a number of smaller conferences and assistance given to those who are entrechipping Christianity at strategic points. In addition to this, the General Board, at its last annual meeting in St. Louis, faced to face with the rapid growth of urban and factory population, authorized the adoption of a plan of city missions which looks not only to the strengthening of Christian forces in our cities, but to the training as well of those who are to become leaders in every city work.

The Woman’s Home Mission Society of the Methodist Episcopal Church, South, was established in 1886. The returns for the year 1902-3 are as follows: Members, 14,414; teachers and missionaries, 58; day and night schools, 11; pupils, 1,324; paroches helped, 112; value of supplies distributed, $14,309, and total collections, $87,685.

The work of the Society includes aid in building parsonages, both through the local and connectional organizations, the distribution of supplies for orphans, missionaries, mission schools and Rescue Homes, the maintenance of schools, of which there are three in Florida for Cuban children, two for the children of mountainers in Kentucky and in North Carolina, one on the Pacific Coast for Chinese and Japanese, a Home for Female Orphans, a Home for School for Negro Girls, and a school for Indians at Anadarko, Indian Territory. A mission has also been maintained among the miners of West Virginia. The Society also is interested in the Scarritt Bible and Training School in Kansas City, Missouri, for the education and training and consecration for work among the needy. These cooperate with the pastors of churches and with the sixteen missionaries and twelve City Mission Boards which have been formed. No missionary organization in the Church has made greater progress and managed its affairs more wisely than this Society.

While the General Board of Missions appropriates funds to the German and Indian Mission Conferences they fall in the same class with those in the remote West as home or home missions. The German work began over fifty years ago among the immigrants who came to New Orleans. Later the mission extended into Texas and in 1890 became the German Mission Conference. The results of this work have been most encouraging. The membership of 11,440 contributes annually for missions one dollar per capita and from eight to ten dollars for other purposes. A Joint Commission of representatives of the other Texas Conferences, with one from the German Conference, has done much to inspire and bind these German Methodists into closer union with the whole Church.

The entire mission work of the Church was in behalf of the Negroes and Indians. The former have been set apart into the Colored Methodist Episcopal Church, with an independent organization and presided over by bishops of their own race and selection. The Indians are still the wards of the Church, but the rapid influx of the white population into Oklahoma and the Indian Territory has steadily driven them in upon themselves until the work has become narrowed down to a limited area where full-bloods and blanks” Indians who are preached to by a few of their own men and by white preachers of the Indian Mission Conference through interpreters. The policy which has been pursued in the Indian Mission work has not been as wise nor as effective as that adopted in the foreign field. The work, which has become so thoroughly interwoven with that of the white population that it is impossible to give correct statistics.

**Presbyterian:** About the time of the founding of the first Presbyterian (1700-1705), the ministers of the early church followed the colonists wherever they went. In 1758 it was found necessary to have a mission board send Presbyterian missionaries along the Atlantic coast, up to the foot of the Alleghenies and beyond, not only to English but to all settlers of whatever tongue or faith. Missions to the Negroes and the Indians were established. Records of the first synod show that continual demands were made upon Princeton College in its earliest days for means to support missionaries and open missions in destitute places. An interesting item is the fact that the first recorded grant of missionary money was made to the First Presbyterian Church of New York City. At the first session of the General Assembly, which was organized in 1789, it was resolved to send forth missionaries to the frontiers to organize churches and attend in general to the religious and educational needs of the people.

In 1802 the work had grown to such dimensions that the first Presbyterian General Assembly formed under the name of the Standing Committee of Missions. Nominations of missionaries were made by it and presented to the General Assembly for Confirmation.

After the War of 1812 the Committee felt
unable to cope with the increased needs and opportunities of the work, and the General Assembly in 1816 organized a larger and more comprehensive body to take up the work, called "The Board of Missions." Its power was such as to enable it to conduct the missions and decide all questions relating to work with missionaries, and the payment of salaries without waiting for the approval of the Assembly; it was further empowered to organize branch societies, and the Church was urged to cooperate in such organizations.

One of the first acts of the new body was to send out the missionaries seeking homes in what was then the West, and in 1826 the American Home Missionary Association was formed. In its directorship were many Presbyterians, and Presbyterian Churches contributed to its support and benefited by its aid.

When the division took place in the Presbyterian Church in 1839, the Board of Missions remained in connection with the Old School branch, and in 1857 underwent a change in name, being called "The Trustees of the Board of Domestic Missions and the Missionary Society of the Presbyterian Church in the U. S. A."," the new School threw in its allegiance for a time with the AHMS (see above), but gradually separated from it. The first step in departure was the organization in 1855 of the Church Extension Committee, which carefully disclaimed all intention of interfering with the work or support of the AHMS; but the differences grew, until finally in 1861 the New School Presbyterian Church withdrew entirely from the AHMS, organized a Presbyterian Committee of Home Missions, which superseded the Church Extension Committee and which conducted the home mission work of that branch of the Church, until finally in 1870 the glorious reunion of the two Assemblies took place, and the two bodies, the Presbyterian Committee of Home Missions and the Board of Domestic Mission, were merged into one Board. At the time of reunion the New School committee had the names of 530 missionaries on its roll and the Old School Board 613. The new Board was incorporated in New York in 1872. Members of the General Assembly are appointed by the General Assembly, and number 10 ministers and 11 laymen; one of the ministers is the president of the Board. In addition there are a secretary, two assistant secretaries, a treasurer and a superintendent of school work. The Board reports annually to the General Assembly, to which it is responsible for its actions, tho it has absolute jurisdiction in the interim between the meetings of the General Assembly, but appeal can be had to the General Assembly. Its administrative offices are at 156 Fifth Avenue, New York City.

The work of the Board is two-fold: that of the missionary pastors and the missionary teachers. The latter is committed to the Woman's Board and is outlined more fully below. The former resolves itself into two forms: (1) The salary raised on the field is supplemented by the Board. (This is the case in most of the churches in the States, the few exceptions being limited to some work among Indians or some other unusual fields.) (2) The Board sometimes assumes the entire salary of the minister, as in certain fields in the West, in the United States, and among the Indians of the unformed localities. In every such instance strong effort is put forth to secure from the people part of the pastor's salary as speedily as possible.

The Woman's Board, organized in 1878 as the Woman's Executive Committee, and known as the Woman's Board since 1897, cooperates with the Board of Home Missions, undertaking no work with the missionaries, but presided over by its president, corresponding secretary, young people's secretary, editor, recording secretary, treasurer and corresponding secretary Freedmen's department.

The work of the Woman's Board is: (1) To raise money for the support of the educational work under the care of the Board of Home Missions—namely, teachers' salaries, school buildings and equipment—and for general home mission purposes. Mission schools are located in Alaska, Porto Rico and Cuba and, in the States, among the Indians, Mexicans, Mormons, mountaineers of the South, and foreigners.

As an adjunct to the Board of Home Missions and the Woman's Board, vitally connected with them both, stands the Young People's Department, which has for its special care the enlistment of the young people's societies in the home mission work, the assignment of synodical "specials" and the gathering and disseminating of information concerning the mission fields.

Self-supporting Synods: In 1886 the Synod of New Jersey assumed charge of the home mission field within its own bounds. Other Eastern Synods have since taken the same action till in 1903 the Board is relieved, wholly or in part, of the work in New York, New Jersey, Pennsylvania, Baltimore, Kentucky, Ohio, Indiana, Illinois, Michigan, Wisconsin, and Iowa.

Results: The whole work of the Board for the century closing with 1900 may be briefly summarized as follows:

First Standing Committee on Home Missions appointed, 1802; Board of Home Missions organized, 1815; Number of commissions issued since that time, each representing one year's work, 74,063; Whole amount expended in this work from the beginning, $23,000,000; Number of missionaries in 1900, 1,371; Number of missionaries aided by self-supporting Synods in 1900, 734; Whole number of missionaries in 1900, 2,125; Whole number, including teachers in mission schools, 2,737.

Protestant Episcopal: Early in the 19th century home missionary work was undertaken to a limited extent under the auspices of voluntary societies in the Dioceses of New York and Pennsylvania. These efforts, however, tho they accomplished much good at the time, were not steadily sustained or adequately supported, and did not reach beyond the western borders of the States named. It was not until 1835, the year in which the principle was accepted that the Church itself is the divinely constituted missionary society, that aggressive mission work at home was undertaken on any extended scale in the name of the whole Church. In that year the Rev. Dr. Jackson Kemper was elected the first missionary bishop and was sent to the West, with a jurisdiction covering the territory now comprised in the states of Indiana, Missouri, Kansas, Nebraska, Iowa, Minnesota and Wisconsin. In truly apostolic spirit Bishop Kemper devoted himself to the religious welfare of the home missions, and when he began his work he found a few small and scattered congregations, still fewer clergy and
but a few communicants. In the section over which he once exercised supervision there are to-day (1903) 13 dioceses, 16 bishops, 596 other clergy and 69,000 communicants. This is but one instance of the parallel pressure striking, of the rapid growth of the Protestant Episcopal Church in the Far West during the last half of the 19th century.

The work of the Protestant Episcopal Church is organized on the principle that every foot of territory over which the flag of mission was carried whether on the North American Continent or elsewhere, shall be under the supervision of a bishop. These areas of supervision in sections of the country where the Church is strongest are known as dioceses, and support their own bishops. In other parts of the country where the population is still comparatively scattered and the Church less strong, these areas of episcopal supervision are known as missionary districts, and the support of the bishops is provided by the Domestic and Foreign Missionary Society. The dioceses are being steadily divided and subdivided and new diocesan districts are being organized at the rate of 18 per year. The missionary districts on the continent number 18, with 17 bishops. There are also the extradiocesan districts of Porto Rico, Honolulu and the Philippines, each with its own bishop.

Broadly speaking, there are three different kinds of home mission work: (1) That carried by the Church as a whole, under the general supervision of the Board of Managers of the Domestic and Foreign Missionary Society, and known as "Domestic Missions." (2) That carried on by each diocese under the direction of its bishop and the local board of missions, and known as "Diocesan Missions." (3) That carried on, generally under diocesan supervision, among the poor and the foreign-speaking populations of nearly all the large cities, and known as "City Missions." It is only of the home mission work carried on by the Church as a whole, that this paper is supposed to treat. This general work naturally follows four lines:

(I) Among White People: Missions among the white people are maintained in all of the missionary districts, and at the present time in some 33 of the dioceses, where local resources are not sufficient to meet all the aggressive work that should be done in establishing the Church in new centers. This work varies widely in extent and in character. Aid is given for the maintenance of missionary work in an old State like Maine, as well as in the newer commonwealths of the Middle and Far West. It may be carried on in a New England college town, in the midst of a Western farming community, or among the mining camps of the mountain States. In all cases the aim is to build up strong self-supporting congregations which may in turn give aid to other places. In some places elementary schools are maintained, as among the mountaineers of North Carolina and Kentucky. Again, aid is given to boarding schools of high grade, and in a number of localities excellent work is being done through Church hospitals. The value and success of this home mission work are seen in the fact that in a number of districts the district and diocesan boards of church aid has given the baptisms and confirmations form a much larger percentage of the Church population than is the case in many of the older and stronger dioceses.

(II) Among the Negroes: The Church's work among the Negroes is done in twenty-four dioceses, first, by providing opportunities for worship through mission churches and chapels in many country districts and in the large cities; the Church in the South, secondly, through 90 day schools and 3 general industrial schools, in which latter training is given the boys and young men in various trades, and the girls and young women in domestic economy; and thirdly, through 3 hospitals exclusively for colored people. One hundred and sixty-three missionaries are at present working among the colored people, many of them Negroes themselves. There are at present 22,000 baptized members and about 8,500 communicants connected with the Negro congregations.

(III) Among the Indians: The Church has been exceedingly successful in its missions among the Indians, particularly in the Northwest. Great pioneer missionaries like the Right Rev. Henry B. Whipple, D.D., sometime Bishop of Minnesota, and the Right Rev. William Hobart Hare, D.D., the present Bishop of South Dakota, with great devotion and success, are working among the Indians of the Northwest. These aboriginal Americans and have demonstrated how thoroughly adapted it is to meet their moral and spiritual aspirations. The strongest Indian missions are found in Minnesota and South Dakota, but the work is also carried on in 12 other dioceses and districts. At the present time there are the Episcopal Church between 15,000 and 18,000 baptized Indian Christians, of whom about 6,000 are communicants. The Indian clergy number about 30, and services are conducted by scores of other Indians, as catechists and lay helpers.

(IV) Among Foreign-speaking People: Among foreigners comparatively little has been done by the Church as a whole, missionary work in this direction being generally left in the hands of the local diocesan and parochial authorities. One general missionary is maintained among the Swedish congregation of the East, and aid is given to a number of smaller congregations in the Central West and Northwest. Aid is also given in the maintenance of the mission and home for Japanese in San Francisco. In some localities thorough work is being done among Chinese by the parochial boards.

Four domestic missionary districts present conditions differing so greatly from what is usually known as home mission work that a few words may be said about them individually.

1. Alaska: Nothing was done by this Church in Alaska, beyond a preliminary investigation, until 1856, when the Rev. Octavius Parker was appointed to begin work wherever he might find it practicable among the Indians along the Yukon River, the Presbyterians already having excellent missions in the southeastern section. The work thus begun has been gradually extended along the whole length of the river, and as the white population increased missions were established in the centers occupied by them. At the present time the Church in Alaska is ministering to white people, Indians and Eskimos. Day schools and boarding schools are maintained at a number of Indian stations and four mission hospitals are now rendering valuable service. The development of the Alaska missions is due chiefly to the heroic work of Bishop Rowe and pioneer helpers like the Rev. John W. Chapman, the Rev. Jules L. Prevost and Dr. John B. Driggs.
2. Porto Rico: Prior to the war with Spain there existed at Ponce a congregation connected with the English diocese of Antigua. When Porto Rico became American territory this was transferred to the Protestant Episcopal Church of the United States. Services were also begun in 1898 in San Juan by an Episcopal army chaplain. The work has been continued by the appointment of regular missionaries under the leadership of the Right Rev. James H. Van Buren, S.T.D., who was consecrated bishop in 1902. Missions are maintained at San Juan, Ponce, Puerta de Tierra and in Porto Mula, on the island of Vieques. The Bishop plans to open missions in other points as rapidly as the equipment can be provided.

3. Hawaiian Islands: Here again missionary work had been undertaken by the Church of England prior to the annexation of the islands to the United States. The Right Rev. Henry B. Restarick, D.D., who was consecrated bishop in 1902, found that work was already being carried on among the Hawaiian and English-speaking people. It spread rapidly, as well as among the Chinese of the city. Two good organ schools, Iolani College for boys and St. Andrew's Priory School for girls, established under the English mission, have been greatly strengthened. The work has also been extended to all of the larger islands. It is carried on not only in the towns, but in some instances among the large plantation communities. The work among the Chinese has been increased by additional Sunday schools, night schools and settlement work, besides personal visits to the homes of well-to-do families. A strong center, and work has been begun upon the erection of the cathedral church and parish house. Medical, settlement and kindergarten work is also carried on, and one missionary has been assigned exclusively for work among the large Chinese population. Outside of Manila stations have been opened at Iloilo to the south and at Baguio and Bontoc in the north. The latter points are centers of a region peopled chiefly by the Igorrote tribes, among whom no other Christian work has yet been attempted.

The home missionary staff of the Protestant Episcopal Church includes 22 bishops, 790 other clergymen, 160 laymen and 225 women.

The annual receipts of the Domestic and Foreign Missionary Society for home work are about $600,000. In addition to this amount it is estimated that $350,000 is given annually through various diocesan charities for home mission work in the several dioceses.

In the sixty-eight years since the Church began aggressive home missionary work she has grown rapidly both in extent and influence. In 1835 there were 15 bishops, 703 other clergy and 39,600 communicants. In 1903 there were 88 bishops, 5,000 other clergy and 760,000 communicants.

Reformed (Dutch): Until the independence of the American Reformed Churches in 1772, they were themselves de facto missionary societies. At the close of the Revolution the list shows 55 churches, 32 ministers serving 53 of these churches, and 2 licentiates.

In 1786 the General Synod took the first action on the subject of church extension, and appointed a committee to devise some plan for sending the Gospel to destitute localities. They reported to the next Synod, and recommended that voluntary collections be taken up in all the congregations to aid in the extension of the church. This was the first effort made. The monies collected were to be transferred through the Classes to the Synod.

The subject of church extension is found inserted as an item in the regular business of each Classis as early as 1780. A Classis at this time would collect from $50 to $100 annually. At the close of the century all the Classes were forward money (most of the churches contributing), except the Classis of Kingston, for the cause of church extension.

The Synod of 1806 formally appointed the Classis of Albany to take charge of all the missionary operations in the northern States. 1806-1822. The Synod now appointed a committee of ministers and elders, with plenary powers, to whom should be committed all her missionary operations. They were located in Albany till 1819, when they were directed to locate in New York. They were known as the Synod's Committee of Missions, or the Reformed Dutch Church in America.

The committee began their operations on the old plan—short tours by settled pastors; but such efforts proved unsatisfactory. Settled ministers were wanted.

With the transfer of the committee to New York the mission to the Canadian churches was abandoned. Some of the Classes now began to retain their money for their own missionary necessities. At the suggestion of Rev. Paschal N. Strong a number of individuals, in January, 1822, organized themselves into a society, to be known as "The Missionary Society of the Reformed Dutch Church." This act was made known to the Synod, and the matter was referred to the Committee on Missions. The birth of the society was hailed with joy. Its board of managers was made Synod's Committee on Missions, and the churches were exhorted to form auxiliary societies.

1822-1832. The policy of the new Society was to employ as many of the graduates of the Theological Seminary at New Brunswick, N. J., as were willing to undertake mission work, to have auxiliary societies in every congregation, and to take up collections at the monthly concerts for prayer. During the ten years of its existence the Society collected more than $30,000, aiding about 100 churches or stations and 130 missionaries. It also started, in 1826, the Magazine of the Reformed Dutch Church, which, four years later, was transformed into the Christian Intelligencer. In 1833 the Missionary Society became auxiliary to the Board, and for nine years the Board depended on Classical agents. In 1837 the first church of the denomination was formed in the then Fair West at Fairview, III. In 1841 there
were enough churches to organize the Classes of Illinois and Michigan, and ten years later the Class of Holland. In 1870 the corporate name of the Board was changed from the “Board of Missions” to the “Board of Domestic Missions of General Synod.” In 1849 the Board was reorganized, and in 1866 was incorporated under the name of The Board of Domestic Missions of the Reformed Protestant Dutch Church. In 1870 the name of the Board was changed to the present title, viz.: The Board of Domestic Missions of the Reformed Church in America.

Its administrative offices are at the Reformed Church Building, 25 East 23rd Street, New York City.

In 1854 the plan of a Church Building Fund was adopted, the object being to raise funds to aid feeble churches by loans to erect houses of worship and parsonages. In 1852 the Women’s Executive Committee was organized as an auxiliary to the Board. Beginning with the specific work of raising money for the erection of parsonages, they have extended their efforts, till now, besides furnishing many mission churches, providing comforts for pastors’ families and Christmas boxes for Sunday schools, they wholly support missions and schools among the Indians in Oklahoma and the mountain whites in Kentucky and Tennessee. In 1903, they collected $36,357 for their work. The original charter of the Board restricted its work to “aiding weak and founding new churches of the denomination.” In 1900 the charter was amended so as “to allow its missionaries to engage in evangelistic work which may not immediately eventuate in the founding of new churches.” In the year ending April 30, 1903, the Board had under its care 245 churches and missions located in twenty States and Oklahoma Territory, and helped to support 175 missionary pastors, besides student missionaries. In that year the Board received and expended $98,965.

Southern Baptist Convention: In response to a call made for the purpose, by the Virginia Baptist Foreign Mission Society, the Southern Baptist Foreign Mission Convention was organized in Augusta, Ga., in 1845. The object of the movement was declared in the first paragraph of the Constitution adopted, which stated it to be “for the purpose of carrying into effect the benevolent intentions of our con- ciscutients by organizing a plan of eliciting, combining and directing the energies of the whole denomination in one sacred effort to the propagation of the Gospel.”

The Convention created two boards, one for Foreign Missions located at Richmond, Va., the other for Home Missions located at Marion, Ala., where it remained until 1882, when it was removed to Atlanta, Ga.

The Home Mission Board has been, and is still, the special agency for carrying forward the purposes of the Southern Baptist Convention as expressed above. Its work, therefore, has been largely along the line of discovery, development, and combination.

The policy of the Board from the date of its organization has been that of cooperation. Under instructions from the Convention it has sought to form auxiliary relationship with State Conventions, District Associations and Missionary organizations. Its field of labor has, during these years, become more clearly defined and may be described as follows: Maryland, Ken- tucky, Indian Territory, Oklahoma, and all the States south of these, together with the four Eastern provinces of Cuba in favor of the Home Mission Society of New York.

The work of the Board has naturally become divided into the following distinct departments: Frontier Missions, which includes portions of Arkansas, Texas, Oklahoma and Indian Territory; The Mountain Regions, embracing a large area of territory extending from West Virginia through Virginia, the Carolinas, Tennessee, Ken- tucky and Georgia into Alabama; Work in the Cities, such as New Orleans, Memphis, St. Louis, Baltimore, etc. The imperative needs of this feature of the work are being pressed upon the Board with renewed emphasis, work among the foreign population rapidly becoming one of the most important features of the work of the Board; Cuba, in which gratifying progress has been made and which is exceedingly promising for the future. The other department of the Board’s work is that of Work among the Negroes, to which more special attention is likely to be directed in the immediate future than ever before. The spiritual welfare of the negro, however, has been a matter of concern to Southern Baptists ever since Africans were imported to this country. During the antebellum days they were baptized and received into fellowship of the white churches. Since their separation and organization into churches of their own race, the Board has con- stantly aided them in the proper formation of church government, as well as in moral and theological training.

The first annual report of the Board showed the appointment during that year of six missionaries, one in Virginia, one in Florida, one in Abraham, one in Louisiana and two in Texas. The work accomplished by the Board has constantly increased until its last Annual Report shows the following summary of work:

- Missionaries, 671; weeks of labor, 24,355; churches and stations, 3,104; addresses, 145,551; prayer meetings, 12,223; religious visits, 163,587; baptisms, 8,969; received by letter, 9,716; total additions, 18,690; churches constituted, 127; houses of worship built and improved, 280; Sunday schools organized, 494; Bibles and Testaments distributed, 17,903; tracts distributed (pages), 3,044,588.

Since its organization the Board has had under annual appointment an aggregate of 10,190 missionaries. They have reported 222,505 additions to churches, and 3,504 churches constituted. The Board has been instrumental in establishing something over 17 per cent. of all the white Baptist Churches within the bounds of the Southern Baptist Convention. It has aided weak churches in their early struggles in the capital city of every State, save one, including the capital of the nation, and the island portion of all points of importance in the Southern States.

The constituency of the Home Mission Board consists of 1,737,466 white Baptists, organized into 19,919 churches. In the same territory the number of negro Baptists is estimated to be 1,927,089.

HONAN-FU: A town in the province of Honan, situated in the N. W. part of the province, about 20 miles S. of the Hoang-ho. Station of the CIM (1902), with 2 missionaries.
HONDURAS: A republic of Central America, lying between the Caribbean Sea on the east, the Pacific Ocean and the Isthmus of Tehuantepec on the west, and separating Nicaragua from Guatemala. It became part of the Central American Confederation in 1822, but asserted its independence in 1838, and is now governed by a president elected by popular vote for four years. It has almost the exact area of Mississippi, with a population of (1900) 587,500, the majority of whom are aboriginal Indians and Mestizos, with 5,000 descendants of the early Spanish settlers, and 5,000 negroes. In general, the country is mountainous, the Cordilleras crossing it from north to south. There are many rivers, most of them flowing east. On the highlands the climate is pleasant and equable, but along the Caribbean coast it is hot and malignant. The soil is extremely fertile, and luxuriant, tropical vegetation is found along the coast. Roman Catholicism is the religion of the country. The coming in of North Americans and other foreigners is introducing good roads and improved methods of living, so that a better future is before the republic. When the President of Honduras visited the Bay Islands in 1900 he invited the Protestant workers to come into the interior, and the invitation is being accepted.

HONDURAS, British: A crown colony on the Caribbean Sea south of Yucatan, east of Guatemala, and 600 miles west from Jamaica. It has an area of 7,562 square miles and a population of 27,542. The capital is Belize, with 5,800 inhabitants. Mission field of the WMS, the SPG, and the Jamaïcian Baptist Missionary Society. Over 2,000 members are gathered in 56 organizations, 2,500 pupils are taught in 20 day schools and many more in Sunday schools, and 12 missionaries are doing valiant service throughout the colony.

HONGKONG: An island at the mouth of the Canton River, off the southeast coast of China, about 40 miles E. of Macao and 90 miles S. of Canton. It is a British possession, having been ceded by the treaty of Nan-king (1842). It is a rocky, mountainous island, nine miles long and from two to six broad, and comprises an area of 29 square miles. Previous to the occupation of the island by the British, it was the home of a few fishermen, who oftentimes changed their occupation to that of piracy when opportunity offered. Now it is one of the most important British possessions in the East. Victoria, the capital and main city, is on the northern shore of the island, by the side of a safe and ample harbor. Fine streets and terraces cut in the side of the mountains, laid out with the best of engineering skill, and, beautified with trees and tropical plants, have changed the entire appearance of this rocky island. Other settlements in the colony are Aberdeen, on the south side of the island, and Kowloon, a strip of land on the peninsula of that name, which was ceded to the British in 1861, and increased to an area of 376 square miles by a lease of adjacent territory under the treaty of 1898. The healthfulness of the colony is as good as any in a like latitude. Oppressive heat and humidity last from May to October, but during the four winter months the bracing, cold atmosphere makes the presence there delightful. Hongkong is a port of call for the lines of mail steamers from Europe, America, and Australia. Daily steamers run between Victoria and Canton and Macao, while numerous lines ply between Victoria and the coast ports of China. The population (1901) was 283,905, of whom 6,000 are white of all nationalities (only one-third English), and 233,263 Chinese. The government supervises 178 schools, attended by 7,700 pupils. In these schools English is taught. Mission work in Hongkong is identified with the early history of the various missionary societies who work in China. The societies at present laboring here are the LMS (1843), the Basel Society (1852) the CMS (1862), the ABCFM (1883), the WMS, the SDA, the Rhennish Society (1847), the Berlin Ladies' Society, and the German Mission to Chinese Blind. Together, these Societies have (1903) 40 missionaries in Hongkong, men and women; 122 native workers, men and women; 24 outstations, 18 preaching places, 4 boarding schools, 50 day schools, 1 orphanage, 1 blind asylum, and 2,500 professed Christian adherents. The BFBS has an agent here, and the YMCA has made it a regular station since 1899, with a man and his wife to foster the extension of the YMCA.

HONOLULU: The seat of government and principal seaport of the Hawaiian Islands, situated on the southeastern coast of Oahu, is a fine commercial city. Its mild and equable climate ranges from 67° in January to 83° in August, marking the annual mean 75° with a variation in either direction of only 7°. It is a port of call for the steamers plying between San Francisco and Australia, and occasionally for the steamers between San Francisco and Hongkong, while it is the terminus of a line of steamers running semi-weekly to San Francisco. The inhabitants number 39,305, among whom are a great many Japanese, Chinese, half-breeds, and natives of various islands of the Pacific. The P. E. Church has a bishop at Honolulu. There is also a Roman Catholic bishop. Mission work is carried on by the Hawaiian Evangelical Association, and by other denominational agencies. The ABCFM (1819) was first in the field, and the Hawaiian Evangelical Association has taken up its work. The ME, the FCMS, the PE (taking over the work of the SPG), the SDA, and the Pentecostal Society all have missions in Honolulu, largely among the Japanese, the Chinese, and other immigrants, many of whom are Portuguese and Roman Catholics.

HONWAR: A town in the Bombay Presidency, India, situated about 18 miles W. S. W. of Bija- pur. Station of the Basel Missionary Society (1845), with (1903) 1 missionary and his wife and 9 native workers. The name is written Honar in the Basel Society's publications.

HO-NEY: A village in the province of Kwang-tung, China, situated in the highland district not far from Ho-su-van. Station of the Basel Missionary Society (1901), with (1903) 2 missionaries, 1 missionary's wife, 23 native workers, men and women; 17 outstations, 8 day schools, 2 boarding schools, 626 professed Christians.

HOOCHOW. See Hu-CRAU-FO.

HOOGHLY: See HUGLI.

HOPE FOUNTAIN: A settlement in Rhodesia, South Central Africa, situated about 7 miles W. of Buluwayo. Station of the LMS (1860), with (1903) 2 missionaries, 1 missionary's wife, 3
native workers, 3 day schools, 1 industrial institute, and 900 professed Christian adherents, of whom 15 are church members.

**HOPE VALLEY:** A settlement in the N. part of Queensland, Australia, situated on the sea-coast near Cookstown. Station of the Neuen-dettelsan Mission Society (1886), with (1900) 6 missionaries, men and women.

**HORDEN, John:** Born in 1828; died in 1893. In 1861 left England to work as a lay missionary in S. Africa. Returned home the following year, but soon afterward he was appointed by the CMS as missionary to Moose Fort, Northwestern Canada. In 1852 Bishop Anderson visited Moose and Mr. Horden was ordained deacon and priest the same year. When the diocese of Rupert's Land was divided in 1872, he was chosen Bishop of Moosonee, a diocese coextensive with the shores of Hudson Bay, and running from 300 to 500 miles inland, and as far north as human beings exist. Owing to the difficulties of locomotion his episcopal duties were confined entirely to the south of the bay until 1879, when, in virtue of a new portion of his diocese, he had to descend south for several hundred miles, then go west by the Canadian Pacific Railway, through three dioceses, then take a northerly direction through Rupert's Land, and finally veer round to northeast to reach York Factory. This journey required the greater part of the summer; and during the winter his time was fully occupied in day school work, visiting, personal interviews with all classes of the community, in learning the vernacular and in giving instructions respecting the verbal construction of the language. In February, 1880, he took the journey by sled to Churchill, when the thermometer averaged 37° below zero, and he remained there until April, working among the people at the post and among the Chipewyas and Eskimos. In the summer of this year, amid the greatest difficulties, he visited the outstations of York Factory. These visits were very successful and hundreds turned from heathenism and accepted Christianity. When death came to him at Moose, January 12, 1893, he was engaged in revising his own translations and in preparing the Bible. His literary works consist of Bible translations, prayer book, hymn book, Gospel history into the Cree languages, several translations into the Saluto, Eskimo and Ojibway languages, and other minor translations.

**HOSCHUWAN.** See HO-SU-WAN.

**HOSHANGABAD:** A town in the Central Provinces, India, situated on the left bank of the Narbada River, 40 miles S. E. of Bhopal. It is on the high road to Bombay, having an excellent trade. Population (1891), 13,500, of whom 9,910 are Hindus and the larger part of the remainder Mohammedans. Station of the FFM (1874), with 2 missionaries, 12 schools, 1 industrial school, and 1 dispensary.

**HOSHIARPUR:** A town in a district of the same name in the Punjab, India, situated 45 miles N. of Ludhiana. Population, about 20,000. Station of the PN (1867); at present (1903) not occupied by missionaries. It is in charge of a native worker with his wife and 1 native woman, whose husband is a physician. There is an orphanage, with industrial department, a hospital, and 1,206 professed Christians, of whom 774 are communicants.

**HOSTEL:** Some of the missionary societies apply this name to boarding houses for students established at a missionary station in connection with or near a high school or college which attracts young men from a distance. Hostels are sometimes established for Christian students in order to strengthen them against influences to which they are exposed in the vicinity of their homes. Others are opened for non-Christian students, and such become a most effective method of evangelization in view of the influences which they bring to bear on heathen or Mohammedan students who, during their education, are removed from the anti-Christian pressure surrounding them in their homes. The SPG missionaries in Delhi, India, for this reason regard such a hostel as the heart of their Christian work in that city.

Hostels are being established by some missions in places where they have no higher educational institutions, and with the direct purpose of bringing non-Christian students at secular colleges under moral and Christian influence.

**HO-SU-WAN:** A town in the province of Kwang-tung, China, situated in the highlands near the headwaters of a branch of the Tung River, about 40 miles N. E. of Hwei-chau-fu. Station of the Basel Missionary Society (1885), with (1903) 1 missionary and his wife, 7 native workers, 4 outstations, 2 day schools, 1 boarding school, and 346 professed Christians. Name written by the Society, Hoschewan.

**HO-TSIN-ESIEN:** A town in the province of Shan-si, China; situated in the S. about 32 miles W. of Kiang-chau, and a little above the confluence of the Fen-ho and Hwang-ho. Station of the CIM (1893), with (1903) 1 missionary and his wife.

**HOTTENTOT-BUSHMAN RACE:** When the southern angle of Africa was first visited by Diaz and De Gama four centuries since, as when it began to be colonized also by Europeans in 1652, it was found to be occupied by a somewhat peculiar aboriginal race, which soon came to be known as the Hottentots. Out of this parent stock have come several affiliated groups known as Bush-men, Namaquas, Korannas, and Griquas. The Hottentots called themselves originally Khoe-Khoi, "Men of Men." Prichard regarded their present name as a corruption of Houteniqua, the name of an extinct tribe. But those who know the language, finding in it no roots of such a word, prefer the opinion advanced by T. Hahn, a scholar who knew the language as his mother tongue, having been born and bred among them as the son of a missionary, that the Dutch gave them this name, Hottentot, because of the curious sounds, especially in the clicks, in which their languages are replete, as if they had been stammered. Indeed, in Low German, the word Hottentot, or Huitentett, is found, meaning, it is said, a "quack." More than two centuries since, they were represented by the traveler, Dapper, as "speaking with clicks like Calicut hens." These clicks, of which there are a great number, dental, or lateral, seem to have had their origin in the onomatopoetic principle, in the Hottentot tongue, and from this to have
been taken over and adopted into some of the neighboring languages, especially into Kafric and Zulu. The Hottentot abounds also in harsh consonants and aspirated gutturals, which, with the clicks, are hard for a foreigner to acquire. The eminent comparative philologist, Dr. Bleek, who had the best of means for forming a correct opinion, calls the Hottentot a suffix-pronominal, sex-denoting language, and classes it with the Hamitic of North Africa. According to T. Hahn, it is strictly monosyllabic, and every root ends in a vowel. It uses suffixes and postpositions, has three grammatical genders and three numbers, four clicks and three tones. It has an extensive oral literature of songs and animal stories, is highly developed, and anything but the mere jargon which the early Dutch settlers fancied it to be.

Grout, in his Zulu-Land, says: "The geographical position of the Hottentot, from the time he was first known to the European, situated as he was at the southern extremity of the African continent, and flanked from sea to sea on his north or inland side by a broad belt of people of a very different language and appearance, would seem to indicate that the search for his pedigree and ancestry, provided it be present in the extension of the home, must be made in regions far removed in respect to both time and place. Happily, within the last few years, a careful study of his language and a comparison of this with the old Egyptian and Coptic tongue have given a clue to his ancient abode. If we may create, some of the most learned and acute philologists of the present day, and those who have had the best opportunities for studying the Hottentot and Bushman, together with other African dialects, this Gariepine tongue of the southern extreme belongs to the same family as the old Egyptian and Coptic, the Berber, and Ethiopic, in the farthest north of the continent; and what is also highly interesting and important, this southern branch of the family is found to surpass all the rest in the integrity with which it has preserved the more essential characteristics of the original stock.

"Admitting the correctness of these views, we can have no doubt as to the early ancestry of the Hottentot and Bushman class, including the Koranna and Namaqua, and that their origin is the same as that of the nations of northern Africa, the old Egyptian, and kindred tribes, including, perhaps, the Libyan or Berber and the Guanches."

The likeness of the Hottentot, in many respects, to the old Egyptian family would indicate that the former was once a part of the latter. It follows, then, that these extreme southern tribes were once sundered by some dividing wedge from the extreme northern, and by this new incoming power or alien race, of a very different language, were driven on southward from age to age, till they finally reached their present abode in the southern angle of the continent, from which they could be driven no farther. The linguistic argument is supported by the fact that the appearance, manners, customs of the Hottentots, differ in many respects essentially from the Hottentot of their northern border, and yet afford good grounds for classing them with the old Egyptian and other North African nations. Some of the learned at the Cape of Good Hope have found pictures and impressions among the antiquities of Egypt, so like the Hottentot, as to make it certain, as they think, that the original of these representatives must have been people of this race. Then again, the Hottentots of South Africa, in days of old, as the early travelers in that region and their own traditions tell us, were wont to worship their dead, as is the case with which the historian tells us, was found among the northern nations of Africa in their sidereal worship. And yet we find no trace of this worship among their neighbors of the Bantu race. The gods of the Zulus are regarded as having their home beneath and never above. The northern nations of olden times, like the Hottentots from time immemorial, made use of the bow and arrow, while the Zulu and his neighbors of the Bantu race use the spear, short sword, and war club. And yet it is in looking at the more permanent and marked feature of the Hottentot, his language, and its likeness to that of the old Egyptian, that we find the strongest proof that he is related to the men of North Africa.

With facts like these before us, it is easy to believe this stock, originally one, was, at an early age, split and separated into the two parts we now find at the two extremes of the continent, in the extreme south of the continent, by the incoming of the sundering wedge of another race, as the Bantu, from the northeast. Eruptions from that quarter, in those early ages, were not uncommon, as we know from the incoming of the Israelites and of the Shepherds Kings. As the families in the northeast grew and multiplied, it was but natural that some of them should press to the south and west, as from the Euphrates into Egypt. Finding Egypt already filled by a previous family, some of which had, doubtless, begun to move on up the Nile, southward, it was easy for the new race to split the old, and push a part before it, each advancing up the Nile and onward to the south, like one wave after another, till finally that in the lead was crowded into the extreme south and flanked by the other on its northern border, the former now called the Hottentot, the latter the Bantu race, each of them continuing to keep up its distinctive aboriginal traits in a remarkable manner.

In personal appearance the Hottentot is short in stature, of a yellowish brown in color, like a faded leaf, with high cheekbones, black eyes, nose flat, hair twisted into clusters. When first mentioned by the Portuguese, Hottentots are described as pastoral in their pursuits, rich in cattle, scant in dress, living in huts, and remarkable for the excellence of their morals. But the扩展 of a nation in respect to their freedom of mode of life, and morals was greatly changed, often for the worse, by the coming in of the white man. Subsequently, by the introduction of a better rule and much missionary work in their behalf, the condition of many of them was greatly improved. Some of the tribes have been civilized, and many of the people become good citizens, intelligent, steady, and industrious, and not a few are brought to embrace the Gospel. Many are in the employ of the Dutch farmers; but their tribal home, so far as they have any, is on the Orange River, from the Atlantic eastward half across the continent.

Out of this original Hottentot stock, at an early date, came a large branch, the San tribe, now called the Bushmen. This name is an Angli-
cized form of the Dutch Bojes-men. Indeed, some speak of the original stock as opening out into two branches, the Khoikhoi and the San, the former being, primarily, given to the pastoral mode of life, the latter to hunting. For this wandering, hunting, predatory kind of life the Bushmen of to-day have the same love as their ancestors, the San, had when first seen centuries ago by Europeans. Their habitat is here and there among the wild regions of the Orange, in the bush, among the rocks and ravines of the hills, or secluded recesses of the mountains, on the outskirts of other tribes. They build no houses, have neither flocks, herds nor tents. They are very diminutive in stature, of a dark yellow color, their hair like wool twisted together in thin tufts. They have no nationality, and it would seem that their religion consists chiefly in a few superstitious notions concerning evil demons. In their unsettled, wandering condition it has been difficult to carry on mission work among them, tho some have been induced to join stations among other tribes, being in this way brought to a knowledge of the Gospel. They speak essentially the same language as the Hottentots, and yet the points of difference are many. In one respect they are an enigma, that is, in the "signs they have given of intelligence and artistic skill; for," as Dr. Cust says, "they have exhibited a wonderful power of graphic illustration. The rocks of Cape Colony and the Drakenberg have everywhere examples of San drawing, figures of men, women and children, animals characteristically sketched, and as a proof that the art is not extinct, figures of their enemies, the Boers, appear unmistakably. Rings, crosses, and other signs have given rise to the speculation, quite unsupported, that they may represent some form of indigenous writing, but the facts, such as they are, must not be stretched beyond what they actually evidence, and this is sufficiently noteworthy."

Another tribe of Hottentots, the Namaquas, living as nomads near the Atlantic along the Orange River, the Great Namaqua on the north side and the Little Namaqua on the south, speak essentially the same language, of the same complexion, kind of eyes and hair, as the Bushmen and other Hottentots, and yet are tall, well-proportioned, and under the training of missionaries have come to be somewhat enterprising and industrious. Many of them have been educated and have become the Christian faithful. Not unlike to these are the Koranas and the Hottentot tribes who live also along the Orange, to the east of the Namaqua. Going still farther east, to a region near to where the Vaal and Modder enter the Orange, we come to where the Namaquas began to be gathered and consolidated with others a century or more ago. Being a mixed race, many of them the offspring of colonists and Hottentot women, they speak two languages, the Hottentot and the Dutch, tho the latter is fast supplanting the former. Their well-watered valley, a little north of the Orange, had an attraction for others, and some became the abode of free blacks and Hottentot refugees from the Cape Colony; and soon they were joined by two companies of mixed bands from Little Namqualand, in the lead of Adam Kok and his sons, all of mixed blood. Neighboring clans of Koranas and Bushmen became a part of the settlement. A mission station was formed among them at Klaarwater, and Messrs. Anderson and Kramer began to teach them the Gospel, how to read, to cultivate the soil, and build houses not substantially than mat huts. Their history for all these generations, like that of other Hottentot and Bushmen tribes, has been remarkably diversified—in many respects sad, and full of wrongs. Many of them, profiting by the teachings of the missionaries, as the years have gone by, have become intelligent, industrious Christian men, while others have continued to prefer the savage life.

A negro race on the west coast, north of the Orange, having been subjugated by the Namqua and called Damara, or "conquered," the adopting the language of their conquerors, do not really belong to the Hottentot race. Those of the Damara who speak the Hottentot are called the Hill Damara, to distinguish them from the Herero, who are of the Bantu race, and called Cattle Damara.

For all these tribes much good mission work has been done. Through the patient endurance of many trials, in face of much opposition from those who should have been helpers together with them, the missionaries laboring to raise these benighted, persecuted tribes to a better plane of life have seen their labors greatly blessed, have seen great secular, social, civil good brought to them, and souls, not a few, fitted for immortality.

HOWLAND, William Ware: Born in West Brookfield, Mass., on the 28th of February, 1817. His father was the fifth generation from John Howland, who was one of the first band of Pilgrims who sailed in the Mayflower. Mr. Howland graduated from Amherst College in 1841, and from Union Theological Seminary in New York in 1845. He reached Jaffna, Ceylon, early in 1846 as a missionary of the ABCFM, and was located at Batticotta, where he assisted in the work of preaching to the same tribes. He gave himself not only to the work among the Damara, but he gave most of his time to preaching in the vernacular and in village work. In 1868 he moved to Tippallay, and for ten years had charge of the vernacular training and theological institution. After the death of "Father Spaulding," in 1873, Mr. Howland became the senior missionary in the American Mission in Ceylon. He also succeeded to the title "Father," and even to-day, among both missionaries and natives, Christian and Hindu, he is reverently known as "Father Howland."

For fifteen years he was located at Oodooval and had charge of the station where he died August 26, 1892, after nearly half a century of life and labor among the Tamils of Jaffna, making only one visit to the homeland during the period. Mr. Howland married Miss Susan Reed in 1846, herself a trained educator. A year or two after entering missionary service under the American Board, Dr. Howland was preeminently an evangelist and preacher of the Gospel of Jesus Christ.

HOWRAH: A large town and important railway center on the Hugli River, Bengal, India, opposite Calcutta, of which it is practically a suburb. Population (1901), 157,594, about three-fourths of the people being Hindu and
one-fifth Muslims. Station of the BMS (1821) and BZM (1851), with (1903), together, 2 missionary and their wives, and 1 woman missionary, 10 native workers, mission also and women; 6 day schools, and 215 professed Christian adherents, of whom 60 are church members. Station also of the SPG (1821), with (1903) 14 native workers, 2 outstations, 3 places of worship, 3 day schools, and 296 baptized Christians, of whom 418 are communicants. And also of the CEZ (1881), with 4 women missionaries, 14 native women workers, and 4 day schools.

Hsiang-Cheng-Hsien: A town in the province of Ho-nan, China, situated about 28 miles W. by S. of Hu-chau. Station of the CIM (1892), with (1903) 1 missionary and his wife. Name written by the Society, Si-hsiang.

Hsin-an-Hsien: A town in the province of Ho-nan, China, situated about 45 miles W. of Ho-nan. Station of the CIM (1890), with (1903) 1 missionary and his wife and 1 woman missionary. Name written by the Society, Sin-an-hsien.

Hsin-Chang-Hsien: A town in the province of Che-kiang, China, situated about 20 miles E. of Hu-chau. Station of the PS (1892), with (1902) 2 missionaries, one with his wife; 1 woman missionary, 4 native workers (one a woman), 1 boarding school, and 100 professed Christians. Name written by the Society, Sinchang.

Hsin-Chang-Hsien: A town in the province of Che-kiang, China, situated about 45 miles S. W. of Ning-po. Station of the CIM (1870), with (1903) 1 missionary and his wife. Name written by the Society, Shichang.

Hsin-Chau: A town in the province of Shan-si, China, situated in the central part of the province, about 45 miles N. N. W. of Tai-yuen-fu. Station of the BMS (1885), with (1903) 1 missionary and his wife, 5 native workers, and 6 outstations. Station also of the BZM, not yet (1903) reoccupied since the Boxer outbreaks. Name also written Hsin-chow.

Hsin-cheng: A town in the province of Ho-nan, China, situated about 49 miles S. of Chang-te. Station of the Presbyterian Church in Canada (1892), but since 1900 an outstation of Wu-hwei.

Hsin Chow. See Hsin-chau.

Hsin-feng-Hsien: A town in the province of Kiang-si, China, situated about 40 miles S. by W. of Kan-chau. Station of the CIM (1890), with (1903) 2 missionaries. Name written by the Society, Sin-feng.

Hsi-nan-Fu. See Hsi-nan-fu.

Hsi-Chau: A town in the province of Shan-si, China, situated about 115 miles S. W. of Tai-yuen-fu. Station of the CIM (1885), with (1903) 1 missionary and his wife. Name written by the Society, Si-chau.

Hsien-yu-Hsien: A town in the province of Fo-kien, China, situated about 25 miles W. S. W. of Hsing-hwa. Station of the CMS and the OZ, with (1903) together 1 missionary and his wife, 3 women missionaries, 28 native workers, men and women; 18 day schools, 1 boarding school, and 638 professed Christians. Station also of the ME, with (1903) 2 women missionaries, 64 native workers, men and women; 4 outstations, 37 preaching places, 1 village school, 1 women's training class, and 1,005 professed Christians. Name written by the Societies, Sing-tu.

Hsi-ssiang-Hsien: A town in the province of Shen-si, China, situated about 30 miles S. E. of Han-chung-fu. Station of the CIM (1895), with (1903) 2 women missionaries and a day school. Name written by the Society, Si-ssiang.

Hsin-Chau. See Hsin-chau.

Hsin-feng-Hsien: A town in the province of Kiang-si, China, situated about 40 miles S. by W. of Kan-chau. Station of the CIM (1890), with (1903) 2 missionaries. Name written by the Society, Sin-feng.

Hsi-Nan-Fu: A town in the province of Shan-si, China, situated in a vast wheat field, S. W. of the confluence of the Wei-ho and King-ho Rivers, and at the convergence of many natural trade routes. It was founded in the 12th century, n. c., and for 2,000 years was the capital of Eastern China. Its environs are rich in antiquities. One of the most important preserved in this city is the tablet setting forth the relations of Nestorian missionaries of the 8th century to the Chinese government. The place is probably the same as the Thinal of Pademony, and it is called Changan by Marco Polo. The town stands at an altitude of 1,500 feet, surrounded by high walls which enclose considerable pieces of cultivated land. The streets are straight and clean. Population, about 500,000. Station of the CIM (1893), with (1903) 4 missionaries and 2 wives of missionaries, who are engaged in giving an impulse to the work checked by the Boxer movement. Station also of the BMS (1894), who have now (1903) no missionary actually in the city. Station also of the Swedish Alliance Mission, and agency of the BFBS. Name also written Singan.

Hsin-hwa-fu: A town in the province of Fo-kien, China, situated on the coast about 50 miles S. W. by S. of Fu-chau. It is built at the foot of hills looking out over a fertile plain and over the Hsing-hwa Bay. An important literary center; it has an examination hall seating 3,000 students. Station of the ME (1864), with (1903)
1 missionary, 3 women missionaries, 119 native workers, 6 outstations, 48 places of worship, 34 Sunday schools, 3 day schools, 2 boarding schools, special work among lepers, 1 printing house, 1 industrial school, and 1,769 professing Christians. Station also of the CMS (1894), with 3 missionaries (one wife of a missionary), 2 women missionaries, 13 native workers, 9 day schools, 1 boarding school, 1 theological class, 1 dispensary, 1 hospital, and 661 professed Christians.

HSIANG-MIN-TING: A town in the province of Kwang-tung, China, situated about 78 miles N. W. of Fukien. Station of the CMS (1898), with 1 missionary and his wife. Name written by the Society, Hsing-i.

HSIANG-MIN-TUAN: See HSIANG-MIN-TING.

HSIANG-TIEN-TSZE: A town in the province of Szechwan, China, situated about 20 miles N. of Pao-ning-fu. Station of the CIM (1892), with 1 missionary and his wife. Name written by the Society, Sin-tien-tsi.

HSIANG-TU: A village in the province of Szechwan, China, situated about 12 miles N. N. E. of Cheng-shan. Station of the CMS (1894), with 3 missionaries, two of them with their wives. Work was very much broken up in 1902 by the renewal of Boxer disturbances. Name also written, Sin-tu.

HSIANG-YANG-CHAU: A town in the southern part of the province of Ho-nan, China, situated 110 miles N. W. of Han-kau. Station of the American Norwegian China Mission. Name written by the Society, Sin Yong.

HSIPA: A city in Burma, situated 90 miles N. W. of Mandalay. Station of the ABMU (1890), with 1 missionary (a physician) and his wife, 8 native workers, men and women; 1 hospital, 2 dispensaries, and 1 boarding school.

HSIUYEN: A town in Manchuria, China, situated about 100 miles S. E. of Mukden. Station of the Danish Mission Society (1898), with 1 missionary in charge.

HSU-CHAU: A town in the province of Szechwan, China, situated on the Yangtse River, about 125 miles W. S. W. of Chung-king-fu. Station of the CIM (1888), with 1 missionary and his wife, who are preparing new premises in a different quarter of the city from that formerly occupied. Station also of the ABMU (1889), with 6 missionaries, men and women; 5 native workers, men and women; 29 places of regular worship, 2 day schools and 70 church members. Name written Sui-chau by the missionaries.

HSUEN-HWA-FU: A town in Chi-li, China, situated on the Yang River, 85 miles N. W. of Peking. Station of the CIM (1902), with 1 missionary and his wife. It is also a station of the CA.

HSUEN-LANG-KAU: A town in the province of Szechwan, China, situated 38 miles N. W. of Cheng-tu-fu. Station of the CMS (1902), with 2 women missionaries.

HSU-CHAU-FU: A town in the province of Kiang-su, China, situated 160 miles N. W. of Nanking. Population, about 120,000. Station of the CIM (1904), with 7 missionaries, men and women, two of whom are physicians; 2 native workers, 4 preaching places, and 1 dispensary. Name written by the Society, Hsouchow-fu and Chuchow-fu.

HUACHO: A town and seaport of Peru, South America; situated about 78 miles N. W. of Lima, with which it is connected by railway. Station of the PB, with 1 missionary and a printing house.

HUAINHIN: An island of the Society group in the South Pacific Ocean, lying 120 miles N. W. of Tahiti. The surface is mountainous and the soil fertile. Population, 2,000. Mission field of the Paris Evangelical Missionary Society, with 576 church members.

HUBLI: A town in the Presidency of Bombay, India, 13 miles S. E. of Dharwar, on the main road from Poona to Harwar. The center of the cotton trade of the Marathi country. Population (1901), 60,214, of whom about two-thirds are Hindus. Station of the Basel Missionary Society (1839), with 3 missionaries, 2 wives of missionaries, 16 native workers, men and women; 2 outstations, 3 day schools, and 472 professed Christians. Outstation also of SPG, with 2 native workers, 1 place of worship, 1 school, and 116 professing Christians. The YWCA has a missionary here and a young women’s society.

HUME, Robert Wilson: Born at Stamford, Conn., November 9, 1809; graduated at Union College, 1833, taking high rank as a scholar in a large class; studied theology at Andover and Princeton; attended medical lectures; ordained in 1839, and sailed April 1, the same year, as a missionary of the ABCFM for Bombay. He was stationed for fifteen years at Bombay, spending a part of the cool months making tours. For some years he was secretary of the Bombay Temperance Union, and editor of its journal, called the Temperance Repository, which attained a high place for ability and usefulness. For ten years he was secretary of the Bombay Tract and Book Society. It was through his influence that, instead of gratuitous distributions, as had formerly been the custom, the bearers who were employed, who went into all the districts of Western India, and sold hundreds of thousands of these publications. One of the Bombay journals, referring to this
Society, says: "The rapid advance the Society has made of late years has been due mainly to Mr. Hume's prudent and energetic management." Soon after his arrival in India, a monthly magazine in the native language was commenced. In 1854 he was taken very ill, and the physicians decided that his life could be saved only by his going to a colder climate. He proceeded in an English vessel to Cape Town, but he died November 26, in sight of the coast of Africa, a week before the arrival of the ship at Cape Town.

HUMPHREY, William John: Educated at Queens College and Ridley Hall, Cambridge; B.A. in 1884; M.A., 1888; ad eundem, Durham, 1893. On July 17, 1888, he was accepted as a missionary by the CMS; in September, 1890, entered the Sierra Leone Mission as principal of Fourah Bay College. In September, 1893, was called to charge the work at Cline Town, and after this date, altho his health was failing, he was incessant in his labors. In April, 1898, the brief message, "Humphrey killed," reached England from Sierra Leone. Early in this year the imposition of a "but tax" by the British Government upon the natives of Sierra Leone caused discontent and revolt among the Tennes and other tribes. The insurgent chiefs had several encounters with the British troops and covered the country between Port Lokoh and the mission stations at Makomp and Ro-Gbere. On March 12, 1898, Humphrey, who had been sent to Grand Caney for his health, returned to Sierra Leone, and immediately, as secretary of the mission, hurried to Port Lokoh to look after the interests of the missionaries and their fellow-workers. This first journey was made in safety, but on a second occasion, as he, accompanied by two porters, was passing through the Kassi country for Ro-Gbere, he was murdered by an insurrection.

HUNT, Phineas R.: Born at Arlington, Vt., January 30, 1816. From his conversion in early life he was an active and zealous Christian. He went to England in 1839 as a missionary printer of the ABCFM, and was stationed at Madras. His warm-hearted, Christian efforts among the English-speaking population, native and foreign, and his generous sympathy endeared him to a wide circle of friends. He had the charge of the mission press in Madras, and was also treasurer of the mission, in both of which departments he discharged his duties with great fidelity. He greatly improved the style of Tamil printing. The Tamil Bible and the dictionary of Dr. Winslow, both printed by him, are monuments of his skill and painstaking efforts.

On the discontinuance of the Madras mission he went to Peking in 1868, a veteran of twenty-nine years' service in a foreign field, to fill a similar post. His labors were invaluable to the mission. He established the first printing office in Peking in which the foreign press and metallic movable type were used. He died May 29, 1878.

HU-CHAU-FU: A town in the province of Che-kiang, China, situated on the Tai-hu Lake, 90 miles W. S. W. of Shanghai. The climate of the surrounding plains is malarious. Population, about 70,000. Station of the ABMU (1888), with 2 missionaries (one a physician) and their wives, 10 native workers, men and women; 9 outstations, 2 day schools and 241 professed Christians, of whom 40 are communicants. Station also of the MES (1900), with 1 missionary and his wife, 6 native workers, 5 outstations, 4 preaching places, 1 dispensary, and 158 professed Christians. Name also written Hoochow.

HUEI-KING: A town in the province of Ho-nan, China, situated 110 miles S. W. of Chung-tu-fu. Station of the FCC (1902), with 1 missionary and 1 native worker. Name is sometimes spelled Huei-king and Hwei Ch'ing.

HUOGLI: A town in Bengal, India, capital of a district of the same name. It is situated on the right bank of the Hugli River, 25 miles S. of Calcutta. It is said to have been founded by the Portuguese in 1537, and the adjoining town of Chinsurah was a Dutch town. The population, with Chinsurah (1891), is 33,100. Station of the LMS in 1798 and transferred to the UPs (1849), with (1903) 3 missionaries, 1 wife, 2 women, 124 native workers, 50 day schools, 3 boarding schools, and, including Kalna also, 330 communicants. Station also of the Chinsurah and Hugli Zenana Mission (1875), with 1 missionary, 7 missionaries, 1 native woman worker, 5 day schools, and 100 Zenana pupils.

HUMENE: A settlement on the east coast of the island of Nias (near Sumatra), Dutch East Indies. Station of the Rhenish Missionary Society, with (1903) 1 missionary, 20 native workers, men and women; 3 outstations, 4 day schools, and 1,458 professed Christians.

HUNG-TUNG-HSIEN: A town in the province of Shan-si, China, situated on the Pei-Ho River about 15 miles N. by E. of P'ing-yang-fu. Station of the CIM (1866), not yet (1903) a receptacle of missionary residence since the Boxer rising of 1900. Name written Hong-tong in reports of the Society.

HUN-YUEN-CHAU: A town in the province of Shan-si, China, situated north of the great wall, in the E. part of the province. Station of the CIM (1866), not yet (1903) since the Boxer outbreak of 1900, when the missionaries were killed.

HURDA. See HARDA.

HURRICANE HILLS: A settlement in Assiniboia, Dominion of Canada, situated 30 miles S. E. of Regina. Station of the Presbyterian Church in Canada, opened in 1897 as an Indian Reserve, where are about 200 souls, all pagans.

HUTA BARAT: A village in the island of Sumatra, Dutch East Indies, situated between Siboga and Toba Lake, about 3 miles from Paa Raja. Station of the Rhenish Missionary Society among the Battaks, with (1903) 1 missionary, 62 native workers, men and women; 10 outstations, 11 day schools, and 3,676 professed Christians, of whom 1,731 are communicants.

HWAI-KING. See HUEI-KING.

HWAI-NGAN-FU: A town in the province of Kiang-su, China, situated on the Grand Canal, 10 miles N. E. of Nanking. Population, about 150,000. Station of the FS (1895), at present (1903) unoccupied.

HWAI-YUEN: A town in the province of Nanghschih, China, situated at the confluence of the Hwai and Ko rivers, on a low site which is flooded every three or four years. The river is
an artery of commerce for the provinces of Ngan-hwei and Ho-nan. Population 20,000. Station of the PN (1902), with 4 missionaries (2 with their wives), 1 woman missionary, 2 native workers, 1 hospital, and 1 dispensary.

HWANG-HSIEH: A town in the province of Shantung, China, situated about 50 miles N. W. of Chifu. Station of the SBC, with (1900) 7 missionaries, men and women, 1 of whom is a physician.

HWANG-YEN-HSIEH: A town in the province of Che-kiang, China, situated about 75 miles S. of Ning-po. Station of the CIM (1896), with (1903) 1 missionary and his wife, 2 women missionaries, 13 native workers, 12 outstations, and 1,019 professed Christians.

HWEI-FU: See HWANG-HSIEH.

HWEI-CHATI-FU: See HWANG-YEN-HSIEH.

HWEI-YI: A town in the province of Shantung, China, situated about 97 miles S. of Hang-chau. Station of the CIM (1884), with (1903) 1 missionary and his wife, 6 native workers and 4 outstations.

HWEN-YUEN. See HUN-YUEN-CHAU.

HWU-CHAU. See HUN-YUEN-CHAU.

HWU-LU-HSIEH: A town in the province of Chi-li, China, situated 215 miles S. W. of Peking. It is an important commercial center, lying at the foot of a pass over the Shan-si Mountains, by which the road leads to Tai-yuen-fu. Station of the CIM (1887), with (1903) 1 missionary and his wife and 1 woman missionary.

HYDE, Rev. Charles McEwen: Born in New York, June 8, 1832. Died at Honolulu, October 13, 1890. Educated at Williams College and Union and Princeton Seminaries. He was ordained at Brimfield, Mass., in 1862, and was pastor there and in Haverhill until 1876. On May 31, 1877, he arrived at Honolulu. Soon after his arrival in the foreign field he took a prominent part in the mission work among the Hawaiians, and as a preacher, a teacher, and an organizer his influence was felt. He reorganized the theological school at the North Pacific Missionary Institute, and until his death he was a leader, especially in educational matters, on this important field. He labored effectively among the Chinese, Japanese, and Portuguese, as well as among the Hawaiians.

HYDERABAD. See HAIDARABAD.
